The savings required to be made by committees under this legislation, if it is approved by the House at the same aggregate total, will amount to $36 billion in fiscal 1982. That is highly significant.

Without this action, the Government's deficit could be at least $80 billion. That would be an economic catastrophe.

The bill now is clearly in the court of the House of Representatives. I hope that the House will act promptly to approve a measure at least as stringent as the one being passed tonight by the Senate.

Frankly, I believe the Senate could have cut more deeply than it did. There still will be a sizable deficit.

I voted in favor of the amendments of the distinguished Senator from Wisconsin (Mr. PROXMIRE), to cut an additional $2 billion from total appropriations and an additional $665 million in budget authority for 1982 from the Export-Import Bank, plus additional amounts in 1981 and 1983. I also supported the distinguished Senator from Arizona (Mr. DECONCINI), in his effort to reduce waste, fraud, and abuse, by an additional $3.2 billion in 1982, plus an additional $400 million in 1983. All these amendments were rejected.

These amendments would have cut appropriations for 1982 alone by more than $5.8 billion, with resulting spending cuts over several years. I believe they should have been approved.

Nevertheless, in my view, the Senate has done a commendable job. I salute the President of the United States and the Budget Committee for their leadership.

Mr. METZENBAUM. Mr. President, 2 weeks ago, my vote in the Budget Committee enabled the chairman to bring this resolution to the floor with a unanimous 20-to-0 vote.

As I stated in committee and as I shall continue to state, I am in total agreement with President Reagan's two-pronged objective of reducing Federal spending and balancing the budget.

The thrust of the President's concerns are my concerns. I cast an affirmative vote in committee as a signal that I am in accord with the President's objectives—but that I also felt the Budget Committee's report could and should be improved by changes on the floor.

I knew it would not be realistic to expect that we could make all the changes that we felt were needed. But I also felt that there were distinct possibilities that we could make some basic improvements after Senate debate.

My concerns with the budget package can be simply expressed:

It it unfair.

It is inequitable.

Despite the administration's rhetoric about a social "safety net," the realities are otherwise:

It will hurt the elderly.

It will hurt the poor.

It will hurt working, middle-income families.

It will hurt veterans.

It will hurt children.

It will hurt college students.

It will hurt minorities.

It will further hurt the unemployed.

And it will hurt our already devastated cities in the Northeast and Midwest.

But I must compliment my colleagues on the majority side. They have done a masterful political job of "keeping the troops in line." They have been able to defeat overwhelmingly any constructive amendment offered by the minority.

Any hope for a reasoned and reasonable approach to correcting some of the defects in this resolution disappeared 2 days ago.

At that time, my distinguished colleague from Rhode Island (Mr. CHAFEE) offered an amendment that would have restored at least a small amount of money for needed programs in education, low-income energy assistance, health services, UDAG, and mass transit.

The Chafee amendment was cosponsored by a bipartisan group of our colleagues. The Chafee amendment would not have "busted the budget." In fact, if it had been adopted, the budget would still have reduced fiscal year 1982 spending by $1.4 billion more than President Reagan recommended.

The Chafee amendment would have at least sent a message to the American people that this Senate does care.

But this Senate turned down the Chafee amendment and we lost the chance to display even a tiny degree of sensitivity. That vote said to the American people that this Senate really only cares about the politics of the situation.

There is no doubt that the majority will easily win this vote today.

But the losers will be the American people.

It is tempting to jump on the bandwagon. It is always easier to go with the tide.

But I cannot, in good conscience, cast my vote for these budget cuts that will harm millions of Americans who need our help.

I want to reduce Federal spending. I want to cut out waste and inefficiency throughout the Government. And I, too, want to balance the budget.

But I must cast my vote against this resolution because of the unfair and inequitable manner in which it has evolved in its final shape.

I fervently hope that the House will more accurately reflect the concerns of the American people and that I shall be able to support the eventual report of the conference committee.

BUMPERS AMENDMENT

● Mr. LEVIN. Mr. President, I rise in support of Senator BUMPERS' amendment to restore funding for the childhood immunization program in fiscal year 1982. The administration has proposed that the immunization program be included in a preventive health care block grant to the States and be funded at 75 percent of its fiscal year 1981 level. As Senator BUMPERS has indicated, there is no logical reason why we should cut funding for this program which so clearly saves us Federal health care dollars in the long run.

I want to take this opportunity to briefly depart from a discussion about this program, however, to talk about the President's block grant proposals in the area of health. Nothing in the reconciliation instructions binds any authorizing committee to acceptance of the President's block grant proposals, but the Senate Labor and Human Resources Committee has indicated that it looks "favorably" upon consolidation of categorical health programs and there is cause for concern as a result.

There are two major health block grant proposals contained in the President's budget. In both cases, the President recommends a 25-percent decrease in funding from fiscal year 1981, based upon the expectation that consolidation of categorical health programs will result in significant administrative savings. In the February 18 budget message to the Congress, the administration states:

> It is anticipated that these reduced funding levels will be offset at least in part by increased flexibility given to the States; the block grants will also result in a dramatic reduction in Federal administrative overhead.

And again, in its March 10 revised budget the administration states:

> Because the new block grant legislation would allow significant savings in program overhead and more efficient service delivery due to the elimination of overlapping service responsibilities, this funding change need not result in a reduction of services.

My concerns about the drastic cuts in funding proposed in the consolidation of health care programs and in categorical programs in other areas of the budget, prompted me to send a letter to the Office of Management and Budget nearly 2 weeks ago requesting the figures which were used to make the determination that a 25-percent reduction in funding would be offset by savings in administrative costs. To date, I have received no response and I must admit that I am rather dubious about the availability of such figures.

After questions were raised about administrative costs and duplication of services in the categorical education program, the General Accounting Office undertook a study of the regulations, requirements, and services provided to students in 11 Federal education programs. The GAO focused on their implementation in six States—California, Georgia, Massachusetts, Michigan, Missouri, and Ohio, and determined that duplication of services in these programs is minimal. With regard to administrative costs, the GAO stated:

> Although State and local education officials claim that numerous Federal programs significantly increase administrative costs, they could not readily identify specific examples of such additional costs.
>
> Consolidation does not appear to be needed to deal with duplicate services to students, and despite support from some officials, its potential for reducing administrative costs is unknown.

Mr. President, I have always believed that the States should have greater flexibility and responsibility in determining how Federal dollars are spent because I feel that the States are sometimes in a better position to know what the needs of its population are. Last year, I sup-

ported an amendment offered by Senator Bellmon to the child nutrition reauthorization bill to consolidate categorical nutrition programs—on a pilot project basis—for that very reason.

The Bellmon block grant amendment would not have reduced funding for nutrition programs. It simply offered an option for up to six States to consolidate their programs on an experimental basis. This approach is to be contrasted with the Reagan administration's proposals to consolidate categorical programs and then drastically reduce Federal funds for them.

In light of the unavailability of reliable figures which set forth the percentage of administrative savings which would result from consolidation, I am concerned that the administration's emphasis on block grants may simply be a facade for making substantial cuts in important health care programs.●

Mr. MOYNIHAN. Mr. President, it is with deep reservations that I cast my vote for final passage of Senate Concurrent Resolution 9.

As I have repeatedly said, we must cut Federal spending so as to reduce the Federal deficit, curb the inflation rate, restore economic productivity, create the opportunity for a needed tax cut and shrink the portion of our gross national product that is consumed by the national government.

But there are cuts and there are cuts, and those embodied in this resolution are more painful, less equitable and more damaging to groups and regions that cannot easily withstand them than was necessary.

I did my utmost within the Budget Committee to shape a package of "reconciliation" instructions that would achieve the necessary savings with minimal pain to those least able to bear it. In several instances my view prevailed. But in most cases, it was rejected by a majority of the Committee on the Budget—on which committee, I am obliged to note, I am the only Northeastern Senator.

In reluctantly voting to "report out" the resolution to the full Senate, I resolved to strive to correct these shortcomings when the resolution was considered on the floor.

And so I did. But time after time during the past week, the amendments I proposed and the amendments I supported failed to carry a majority of the Senate. In most instances, they were defeated by margins of 2 or 3 or 4 to 1. This notwithstanding truly extraordinary effort by those, both in and out of the Senate, who shared my view.

We proposed. We argued. We struggled. We fought. Not to reject the principle of budget reductions or the reconciliation process, itself a painful but demonstrably effective mechanism for bringing Federal spending under control. Rather, our efforts were directed to preserving the budgetary leeway for such essential Federal concerns as aid to elementary, secondary and college students, health care for the ill, jobs for the unemployed, dignity for veterans, security for the elderly, economic development for our communities and efficient and economical mass transit for our urban areas.

We tried, as well, to narrow the budgetary leeway that now permits dozens of tax loopholes, such as the celebrated "butterfly straddle," for those not in need. This one loophole alone costs taxpayers $1.3 billion per year. We tried, also, to gain agreement to the principal of "equal sacrifice," under which no State would be expected to bear more of the spending cuts than its share of the Nation"s population.

We were beaten. And the resolution that we now pass reflects very few changes from the resolution proposed by the Budget Committee.

Fortunately, the House of Representatives must still act. And, also fortunately the resolution itself merely specifies the aggregate savings that each substantive committee must produce within the array of programs and activities under its jurisdiction. It is my fervent hope that in the course of achieving such savings, those committees will depart from the programmatic expectations that are built into—but not required by—the reconciliation resolution.

Almost every committee retains considerable flexibility in formulating specific legislation intended to reduce Federal outlays. I shall do my best in the committees on which I serve to see that full use is made of this flexibility to produce legislation that moderates and equalizes the consequences of its reductions. I trust that many of my colleagues will do the same.

Mr. KENNEDY. Mr. President, we are coming very close to the final vote on the resolution. I should like to take just a few minutes to indicate to the people of my State and also to the Senate my position on the budget resolution.

I believe the Senate could have shaped this budget in a way that meets the Nation's basic economic goals—and that does not fail the fundamental test of fairness for the 200 million Americans we are sworn to represent. But this is not such a budget.

I believe the Senate could have shaped this budget in a way that achieves the total spending cuts that President Reagan wants—and that does not impose unjust sacrifice on the Northeast States or any other region of this Union. But this is not such a budget.

I believe the Senate could have shaped this budget in a way that helps to reduce the intolerable burden of inflation—and that does not seek that goal at the expense of the young, the veteran, the poor, the sick, the elderly, the cities, and all the other people in our society who look to us for help when times are hard. But this is not such a budget.

I cannot support the passage of the budget now before us. It is a budget that makes no sense in economic terms or in human terms.

Again and again, in the long and depressing days of this debate, I have sought with many of my Democratic colleagues to eliminate the clearest inequities of this budget and blunt its hardest edges.

The small successes we had at the early stages offer scant solace now. Our efforts on the Labor Committee won modest increases in five vital areas—education, the handicapped, legal services, fuel assistance, and preventive health. But only a third of those increases survived the Budget Committee. And all our efforts on the Senate floor have been in vain.

An ideological juggernaut has rolled relentlessly through the Senate. In its wake, if its work is allowed to stand, will be the ruined lives and shattered hopes of millions in our society. The cold and dry statistics in the budget resolution do not begin to tell the real story of this budget. The real story is told in human terms:

The young children who will suffer from inadequate nutrition programs in their schools;

The students who will lose the dream of a college education;

The elderly on social security who will lose the retirement benefits they worked for and paid for under a solemn contract with their government;

The veterans of World War II and Korea and Vietnam, who served their country well in war but who now will lose the health care they deserve;

The citizens in colder regions of the Nation, who will face a cruel choice between food and heat when winter comes again; and

The families at the edge of poverty who will bear the cruelest brunt of the unacceptable action we are asked to take today, and for whom the promise of a safety net is little more than a calculated hoax.

We are told, and it is surely correct that we cannot solve our Nation's problems by simply throwing money at them. But it is also true that we cannot solve our problems by throwing the wrong budget cuts at them—and certainly not by indiscriminate cuts that seek to roll back the bipartisan social progress of a generation.

The first skirmish in the battle of the budget is over. But the debates of recent days are only the beginning of a battle for social and economic justice that will last throughout the present Congress. We have not been successful at the outset. But we shall come back to these concerns again and again in the months and years ahead. We shall speak out in every way we can. And we shall never sound retreat.

Mr. President, in conclusion I want to commend my colleagues who have worked so hard and provided such effective leadership in this debate. We may not have prevailed on our amendments—but Senator BYRD, Senator CRANSTON, and Senator INOUYE deserve great credit for their skillful leadership both on the Senate floor and in our caucuses.

And I also commend Senator BRADLEY, the leader of our economic task force, and Senator HOLLINGS, the ranking member of our party on the Budget Committee, for their tireless and outstanding efforts throughout the long days and nights of this debate.

Finally, I commend all my Democratic colleagues on the Labor Committee for their cooperation and their productive contributions to the many issues we raised together in our committee and on the floor.

Mr. President, I yield the floor.

NATIONAL SCIENCE FOUNDATION—EAGLETON AMENDMENT

● Mr. LEVIN. Mr. President, I support the Eagleton amendment to restore funding to the National Science Foundation (NSF) for basic social science research.

As a nation, we cannot afford to reduce our commitment to basic research. We all know that basic research in chemistry, biology, and physics have led to technology improvements and greater economic productivity. Basic social science research serves a similar function for governmental policymakers. Research into the behavior of individuals as economic and social beings have allowed us to gage in a more accurate fashion whether the policies we adopt will actually accomplish their goal.

We are a strong Nation. That strength stems partly from our commitment to basic research. The meager resources we commit to basic research have proven beneficial to all of society. And that is why government must continue its support of basic research. The knowledge that is the result of basic research activities is often just too generalized for the private sector or market economy to support.

I submit for the RECORD portions of a brief paper written by F. Thomas Juster, director of the Institute for Social Research at the University of Michigan. The paper is entitled "Basic Research, Productivity and the Federal Budget."

The paper is as follows:

BASIC RESEARCH, PRODUCTIVITY AND THE FEDERAL BUDGET

(By F. Thomas Juster*)

INTRODUCTION

The beginning of the 1980s finds the U.S. beset with a number of serious economic and social problems: a lagging growth rate of productivity; a stubbornly intractable inflation rate; a public sector deemed to be too large (by many) and ineffective in achieving its objectives at reasonable cost (by more); a distant but clearly foreseeable worsening of dependency, which will start to happen when the baby boom cohorts reach retirement age, coupled with a system for dependency support which is already under strain even with favorable demographics; changes in values relating to marriage, family and children whose ultimate effects are perceived only dimly; a work ethic that many think to be eroding; and so on.

Public policies which affect these and other problems have to be formulated whether or not the consequences of such policies are fully understood, and whether policymakers are favorably or unfavorably inclined toward an activist role for government: Accurate knowledge of the short- and long-term consequences of different alternatives is a prerequisite for effective policy formulation regardless of one's policy objectives. This paper argues that the most important knowledge gap that we have is in understanding both aggregate and individual behavioral responses to changes in economic and social conditions, and that reducing our ignorance about such responses is an important priority for the administration and the Congress. Reducing ignorance implies the adoption of policies designed to encourage the right kinds of research programs.

*Director, Institute for Social Research and Professor of Economics, the University of Michigan.

RESEARCH, KNOWLEDGE AND PRODUCTIVITY

Although most will agree that there is a relationship between research, increments to knowledge and eventual productivity payoff, the links are typically obscure except for an occasional dramatic example. Moreover, the links are apt to be better defined (although not necessarily stronger) in the physical sciences than in the social or behavioral sciences. As an illustration, we know a good deal about the relation between basic research in agriculture, the development of new strains of corn, and the resulting productivity gains reflected by higher yields. Specific examples of this sort in the physical sciences could be multiplied almost without limit.

In the social sciences, the eventual productivity or payoff linkages are typically obscure because of the nature of the research activities, even when the research is of a relatively applied sort. For example, it is clear to everyone that society benefits from the existence of the National Income and Product Accounts, or from knowledge of the distribution of earnings among the population according to various personal and other characteristics, or from the knowledge (if it existed) that a one percent increase in gasoline prices would reduce gasoline usage by eight-tenths of one percent. But what is the payoff from such basic information about societal conditions or the behavior of people in the society? Although I am sure that a significant rate of return exists to such knowledge, I would be hard put to tell anyone what it is.

Much social science research is concerned with insuring that policymakers and other social scientists have relevant knowledge about societal conditions or about the effects of various public and private programs on the members of society. For example, almost everyone would probably agree that it is important to know whether Head Start actually increases child development, or whether older people tend to dissave when they reach retirement. But what is the social payoff to that knowledge? It surely facilitates the formulation of better public policies, but what is the payoff to that facilitation? One can conclude that there is a payoff and that such knowledge is important, but I think anyone would be hard pressed to say exactly how big the payoff is, and perhaps more importantly, how much resources should be devoted to the generation of this type of knowledge.

Thus recognizing that there is a link between research, knowledge and productivity does not really enable us to say much that is helpful about the amount of research that the society 'ought' to support.[1] In the social sciences, besides the fact that the payoff variables are too complex and subtle to measure in any straightforward way, there are other characteristics of research which make judgments about the optimum level of public support very difficult to fashion. Any research effort, especially basic research, is a relatively high-risk enterprise: many, even most, such efforts will not have any payoff, and the overall return is the result of adding together a few activities that generate extremely high returns with a great many that generate little or no return. In addition, the characteristics of the knowledge and productivity gains from research activity is widely diffused, both over future years and often in areas different from the original objective. That probably tends to be more true in the social sciences, where it is often difficult to define direct links between an increase in research activities, a gain in useful knowledge and a resulting gain in societal well-being.

Even though it is difficult to define the research-productivity linkages in a way that accurately describes the process, there are two types of indirect evidence that bear on the issue. First, we know something about the broad characteristics of differences among nations in policies toward basic research, and about differences among those societies in productivity growth rates. Second, we know something about the nature of the current problems facing U.S. society, and about the kinds of research activities that might contribute to the resolution of those problems.

Among modern societies, favorable attitudes toward basic research, and the wider use of public resources for that purpose, tend to be positively associated with rates of progress. Countries like the U.S., Germany and Japan appear to give more weight to basic research activities than others: those are also countries where rates of economic progress have been historically higher than elsewhere. And the relative decline in U.S. performance in recent years is not inconsistent with the relative decline in U.S. investment in basic research, evident in the data for the past decade.

A number of recent discussions of the U.S. economy and society convey what I judge to be an accurate impression of the nature of the current problems facing the U.S. Simply stated, the idea is that our current problems are more behavioral than technological; that is, sluggish performance arises not from the fact that we have become laggard in some technological sense, but from the fact that the processes of translating new technology into decisions has become less effective. Two illustrations may make the point clear.

It is often argued that the productivity lag during recent years in the U.S. is in part a consequence of the fact that business decisionmakers are unwilling to adopt major new technological innovations, which often require completely new plant facilities, because of the uncertainties produced by the regulatory environment and by the high and variable rates of price inflation experienced in recent years. If so, that cannot be cured by enhancing the flow of new technology, but can only be remedied by modifying the environment in which investment decisions are made.

Second, it is often alleged that the problem with the U.S. auto industry, relative to its Japanese competitors, is not that the Japanese have more advanced technology in their production facilities, but that the Japanese style of management and organizational structure has produced significant advantages over the U.S. in terms of work incentives, quality control, etc. If that is true, the problem is again not technological but behavioral.

In both cases, if one wanted to insure a flow of relevant basic research designed to help resolve these current issues of high priority and national importance, we would have to do it by encouraging the right kind of social science research, not by expanding the rate of technical change.●

[1] In all societies, most basic research activities are subsidized, typically by the central government. The reason is a simple economic one—no single individual or business firm can capture enough of the benefits from the generalized knowledge that is the product of basic research to warrant undertaking such activities for profit. There are, of course, exceptions to that general statement.

● Mr. WEICKER. Mr. President, I am casting my vote in the negative on Senate Concurrent Resolution 9 because of the precipitate, injudicious way the President's spending reduction package has been considered in the body. We are supposed to be a deliberative body but, instead, we have been a mirror to the administration's program.

As to the economics, I am prepared to say that I could support the basic policy that Federal spending must be brought under control and that the total of cuts of the magnitude proposed by the Presi-

dent might be about right. But cuts must include a scrutiny of all the agencies and activities of Government.

However, this resolution asks us to slash budgets without regard for substance, without delving into details that prove or disprove a program's worth. It asks us to accede to arbitrary bottom-line dollar amounts without the benefit of serious attention to line items. In short, it demands agreement in the absence of thought.

To do that would be to follow the bad example the Office of Management and Budget set when it conjured its figures out of philosophy rather than reality. It would mean abdicating my responsibility to conscientiously examine the pros and cons of every piece of legislation put before me. Pros and cons deal with matters of quality. Dollar signs, standing alone, do not.

Social and scientific programs are forced to bite the budget-balancing bullet even as we hand defense a blank check. I tell you now that what we are going to wind up with is less security, not more. Hardware will never make us secure. Only superior technology can. Technology is a product of education. Education that is shredded in this resolution.

Similarly, we will not have a strong economy if our cities crumble, if we default on our commitment to energy independence and mass transit. Our poor cannot be productive if they have no housing and are without medical care.

The key question then, Mr. President, is whether this proposed fiscal plan is appropriate for our country and its future. Given its order of priorities and the order of national needs, I conclude that clearly it is not.

Remember that the decisions we make now in 1981 will still be felt a decade from now. I am not against great experiments but this has the makings of a great mistake. That is why I urge my colleagues to join me in voting against a resolution so lacking in substance, and commonsense. This is a mean-spirited venture by a great nation.●

● Mr. HART. Mr. President, I support the budget reconciliation instructions reluctantly. I support the bill because believe the Federal budget must be reduced by at least $40 billion. But I do so reluctantly because a number of the specific budget cuts—and the priorities which underlie them—undermine three basic goals of our Government: Increasing economic growth and productivity, providing a safety net for the needy, and achieving energy security.

We must continue to work toward these goals and a budget that is more consistent with them through the relevant committees, as well as the Senate Budget Committee when we mark up the first concurrent resolution for fiscal year 1982.

For the past 3 years, I have worked toward reducing Federal deficits as one tool to combat inflation. We should continue our efforts to achieve fiscal restraint, and I welcome the support of the administration in this endeavor. But the program embodied in the reconciliation instructions is deficient in several important aspects which I and others attempted to change.

My support for restoring funding for programs such as low-income energy assistance, preventive health care, social security benefits, National Science Foundation research, and youth job training were guided by the following three principles:

First, we should maintain public investment that contributes to economic growth, such as programs which foster technological research and the educated and well-trained work force that is crucial to increasing productivity. We must also maintain the public capital base—railroads, highways, and waterways—that represent our Nation's infrastructure.

I support inclusion of funds for this essential supply-side investment: Programs for scientific research and for job training. Our Nation's economic strength comes as much from the innovation and skill of its people as from its machines and factories. This is essential investment in human capital.

Second, we must protect and accurately identify the truly needy. This goal requires more than rhetoric and slogans about "safety nets." We should not arbitrarily cut programs on which the poor and the needy depend: Child nutrition; nutritional assistance for women, infants—and children; medicaid: and low-income energy assistance. Clearly the administration's safety net has considerable holes. By selectively restoring funds for these and other programs—and choosing other cuts—we can fill those holes.

Third, we must increase our energy security. This means we must rely on conservation, renewable energy, and synthetic fuels as well as nuclear energy. Therefore, I and many of my colleagues offered an amendment to increase our energy security and restore balance to our energy program.

These three principles—supply-side investment, a true safety net, and energy security—summarize the shortcomings of the administration's proposed cuts. We can achieve a better program that is consistent with these principles while still applying real spending restraint. The real test for the success of any program is whether it achieves bipartisan consensus.

The most serious deficiency, however, is not in the choice of budget cuts. Rather, it is the administration's narrow assumption that these measures alone will solve the problems of our economy. They will not.

We cannot solve the problems of inflation without a policy that fosters moderation in prices and wages. We cannot demand national sacrifice and investment until we take steps to make sure that all parts of the Nation and our society reap the economic rewards. And our economy will never be healthy and secure until we reestablish our own independent energy supplies.

These are formidable challenges, but we can meet them. And we will.●

● Mr. BRADLEY. Mr. President, I am casting my vote in favor of the reconciliation resolution because I agree with its overall objective—to bring about a substantial reduction in Federal spending. However, I have deep reservations about this resolution and the President's economic program generally, which I have stated repeatedly on the floor of the Senate during the course of the debate, and in the Senate Finance Committee hearings on the budget. These reservations concern the soundness of the economic assumptions which underly the President's budget and tax proposals and the failure to set spending priorities in a way that supports the development of strong economic infrastructure and human capital to meet the demands of the future.

I am afraid that the administration is missing a golden opportunity to build a consensus for economic growth. One cannot bring all people under the same tent of increased competitiveness if some people become victims of the budget. I have offered my comments on the President's program in a positive spirit, in the hope of helping the President to realize his very laudable objectives of restoring robust growth to the economy, reducing inflation and maximizing the competitiveness potential of the private sector. I will continue to follow closely economic developments and offer my views on them in a constructive spirit. I hope the administration and my colleagues in the Senate similarly will respond to the evidence of events and take measures necessary to correct their policy, should it become evident that some of the risks I have identified concerning the President's program jeopardize the health of the only economy we have.●

Mr. LEVIN. Mr. President, I am compelled to vote against this resolution even though I accept and support its call for reductions in Federal spending and find myself in general agreement with the level of spending it proposes.

Despite that agreement, I cannot agree to the broader social philosophy which this resolution contains. I think it represents bad public policy for the Nation—and even worse public policy for States, like my own, already suffering from high unemployment and economic inactivity.

It is bad national policy to break our promise to millions of Americans who have counted upon the social security system to provide them with a minimum benefit when they retire. It is bad public policy to reject our commitment to millions of young men and women who counted on social security student benefits to help finance their college education. It is bad public policy to cut needed funds for education and child nutrition programs. It is bad public policy to refuse to fund the strategic petroleum reserve and viable energy programs such as conservation, solar, geothermal, and synthetics. It is bad public policy to adopt a welfare strategy which will force the working poor to give up their low paying jobs and go back on public assistance in order to meet their minimum needs.

And these policy flaws are made even worse when they are considered—as I must consider them—from the perspective of a State suffering from high unemployment, low economic growth, and inequitable Federal support. Michigan has a 14-percent unemployment rate—and ranks last in rate of return on the tax dollars it sends to Washington. Under this budget, those problems are going to become more severe. We are going to lose

trade adjustment assistance benefits—benefits that we promised the working men and women of this country in return for their support for an open trade policy. That policy has resulted in a flood of imports which has unemployed hundreds of thousands of workers in Michigan—and in return we now cut their benefits. We are going to loose UDAG and EDA funding—funding which has been essential in revitalizing our older urban areas. We are going to lose mass transit programs which are critical to the growth and development of our cities. We are going to lose low-income energy assistance programs which are particularly needed by people in frost belt States to get through the winter. And all of these programs are going to be lost without the Senate even having before it an administration analysis of the regional impact of the budget—despite the fact that one has been promised us for months.

Mr. President, many of us have tried to correct those weaknesses during this past week. Scores of amendments have been offered designed to moderate the impact of this resolution. Time after time they have been defeated. Even a modest request that committees attempt to ascertain the regional imbalances in Federal expenditures was rejected.

But not only were our attempts to restore funding for critical programs rejected, efforts to make cuts in areas of waste, fraud, and abuse were also defeated. Specific amendments designed to eliminate billions of dollars in specific areas of unnecessary expenditures were rejected. I just cannot support a budget which protects waste and eliminates effective and needed programs.

Much as I would like to vote for the spending restraint this resolution requires I cannot embrace the social philosophy it mandates.

The issue here is not if we are fiscal tightwads or whether we are big spenders. The issue here is whether we are willing for example, to cut child nutrition programs while continuing to provide tax breaks for developing new fast food franchises across this country. The issue is not if we want a balanced budget or not. The issue is whether we want a balanced society or not.

This budget calls for reduced Federal spending. I favor that. But it also calls for reducing Federal attempts to make our society more just and more equitable. And I cannot support that.

In the weeks and months ahead we will have opportunities to try and change some of the inequities which this resolution endorses. I believe we can make those changes. I believe we can have a budget which restrains Federal spending without restricting individual opportunity. That is the kind of budget I pledge myself to work for and support.

Mr. President, I understand the desire of the Senate Budget Committee to reduce the cost of unemployment benefits. At the end of the last session of Congress, I was involved with the Finance Committee in an effort to change the unemployment compensation program and I supported a number of modifications in the program that would have resulted in cost savings in certain aspects of the program.

The Budget Committee is now proposing to require 20 weeks of work for eligibility for any unemployment benefits. As I am sure my friend on the Finance Committee knows, this is a departure from existing law and tradition which allow individual States to establish the degree of labor force attachment required of workers to be eligible for unemployment benefits. Labor force attachment has always been defined by the States and usually reflects the particular economic and philosophic outlook of the individual State.

My second concern is that this proposal does not consider the different standards which all States use to compute eligibility. It is an across-the-board prohibition that does not reflect what a number of individual States already do to insure that workers do not qualify for a great number of weeks of unemployment unless they have adequate qualifying weeks. For instance, in my home State of Michigan, one must have 18 qualifying weeks before any benefits are paid. At that time, benefits are limited to three-fourths of the number of weeks worked, so it would take 34 qualifying weeks to get the full 26 weeks of regular benefits. In other States that is not the case. In these States, when the threshold for weeks worked or wages paid is reached, full UI benefits weeks become available to the worker. In New York, 20 weeks of employment at average of $40 or more per week entitle a person to a full 26 weeks of regular benefits. In Ohio, 20 weeks of employment at $20 or more immediately provides a person with 20 weeks of UI immediately, growing to 26 weeks with additional covered weeks. Furthermore, we have a great number of States which do not use weeks worked to qualify workers, but rather wages paid.

Mr. DOLE. Mr. President, I appreciate the observations of the distinguished Senator from Michigan (Mr. LEVIN) concerning the impact of the proposed 20-weeks-of-work requirement on States such as Michigan which have a sliding scale of unemployment compensation eligibility. I recall that this was dealt with by the Senate last year in a bill that was ultimately not enacted.

Mr. President, in our effort to achieve needed budgetary savings, we must always be mindful of the impact that proposed changes will have on the States. This is particularly important in programs, such as unemployment compensation, which operate as a partnership of the Federal and State governments.

Accordingly, as chairman of the Finance Committee, I have considerable interest in the situation described by the Senator from Michigan. It may be that there is a way to accommodate the concerns he has expressed and still achieve the budgetary savings that the resolution we are now considering will require the Finance Committee to make. I can assure the Senator that the committee will carefully review the matter and work with him to try to find a satisfactory solution to the problem.

Mr. DODD. Mr. President, I intend to oppose final passage of Senate Concurrent Resolution 9, the budget reconciliation resolution. I do this with reluctance, because I agree wholeheartedly with its goals. It is clear that our national economic situation requires a leaner Federal budget. If the American economy is to regain its traditional vigor and momentum, we must retarget fiscal policy toward increasing productivity, employment, trade, and growth, and toward restraining inflation.

Like most Americans, I am prepared to support substantial funding reductions—if they are equitably apportioned, where they contribute to the health and well being of our Nation, and to the extent that they are part of a coherent and effective overall economic strategy.

In this particular case, Mr. President, none of those criteria has been adequately met. And for that reason I will vote against this budget resolution. I am convinced that it falls far short of what we can—and should—develop both as an economic recovery plan and as a statement of national priorities.

The congressional budget process primarily concerns choices among competing demands on Federal financial resources. This resolution errs not in the number of spending cuts nor in their aggregate dollar amount but in where those cuts fall and don't fall. Simply stated, this resolution makes too many wrong choices.

In the course of the Senate's consideration of this resolution, I voted for amendments that would have cut far deeper into unnecessary Federal spending and I voted to restore financial support for useful programs that had been cut beyond what our economy need on important national priorities could afford.

The major objection to this resolution, Mr. President, is that many of its spending cuts are more likely to hurt future economic performance than to help it.

Nothing aggravates the severe inflation which undermines our economic stability more than dependence on uncertainly supplied and outrageously priced foreign oil. Until we make maximum use of means to conserve petroleum products and develop alternative energy sources, we cannot expect to solve either our energy or economic problems. Yet, this proposal eliminates or substantially reduces Federal programs to stimulate alcohol fuels production, to develop solar power and other new sources of energy, and to encourage conservation. Whatever limited economic benefit might accrue from cutting spending in these areas would soon be overwhelmed by the degree to which our progress toward greater energy independence would be stalled and turned back.

I was extremely disappointed that the Senate rejected the amendment offered by Senator HART and Senator TSONGAS. It was a good amendment which, without adding substantial outlays to the budget, would have preserved the flexibility of the Energy Committee to pursue improvements in energy policy in the areas of conservation and nonfossil fuels.

The pricing policies of the OPEC cartel and the effects of the recent decision to decontrol domestic oil mean billions and billions of dollars in additional costs for American consumers. They cannot afford it. And we in Congress cannot

afford business as usual with such excessive reliance on oil and gas. Yet that is the effect of the choices made by this budget.

Similarly, the serious cuts in housing programs, in mass transit, and in economic development promise not to save Federal resources but to deplete them. Those programs represent sound investments in the future. They leverage State and local resources as well as private ones into the creation of the economic infrastructure needed for productive jobs and renewed prosperity. I cannot credit undercutting these programs with advancing us economically. Just the opposite is more likely.

We had opportunities in the course of consideration of this resolution to improve the treatment of these economically essential programs. I supported the amendment offered by Senator MITCHELL, of Maine, to restore part of the funds cut from the Economic Development Administration. It was a modest amount: For the coming 2 fiscal years EDA would expend only one-half of the funds anticipated under current policy projections. It was a productive amendment: Recent studies show the net cost of a job saved or created by EDA loans averages between $660 and $1,000—that is far less than the alternative costs of welfare and unemployment compensation. The Mitchell amendment failed.

I also supported an amendment offered by Senator CHAFEE of Rhode Island. It was a fiscally responsible amendment which would have stayed within the spending limits proposed by the President. It was an economically useful amendment that, among other things, partly restored funding for urban development action grants. It sought, in that way, to keep healthy a program which has attracted $6 of private investment and generates 17 cents in State and local revenue for every Federal dollar spent. And it was a fair amendment. The modest amounts it would have restored to fuel assistance and weatherization, for example, came nowhere close to the additional amounts consumers will pay for fuel as a result of decontrol. But even this limited funding for programs essential to Connecticut—mass transit, UDAG, fuel assistance, community health programs—was rejected.

Another kind of investment in the future that suffers in this resolution is represented by the various loan programs to enable children from lower- and middle-income families to obtain higher education. This is a country of great natural resources—but none of these are more valuable than our human resources. Families are already caught between skyrocketing college costs and rising prices in other parts of their family budgets. The triple whammy which this resolution imposes in higher interest rates, a reduced subsidy, and stricter eligibility requirements will inevitably mean that some of these young people will forgo the full development of their potential. Making that kind of long-range sacrifice for limited immediate savings seems extremely shortsighted. I regret very much that the Senate rejected the amendments offered by Senator MOYNIHAN to—at least partially—correct this situation.

But this budget resolution not only made counterproductive spending reductions; at the same time it failed to seek many economies where they were possible and useful.

I am disturbed, for example, Mr. President, that the Senate failed to approve the amendment offered by Senator PRYOR to trim $2 billion in unnecessary and wasteful Federal procurement. I voted for that amendment. I believe the record developed during its consideration well-documented excessive spending on nonessential items ranging from pencils to perfume that could be saved without any damage to legitimate Federal functions or purposes. Failing to cut into that fat meant that we cut deeper into the bone of useful programs than was necessary.

Another amendment which would have struck hard at frivilous spending was offered by Senator DECONCINI. It documented our ability to recoup $3.9 billion currently overspent for filmmaking, advertising, consultant services, travel, and the like. Surely that money could have been spent far more productively in programs which this resolution decimates. I believe the Senate made a major error in defeating it.

The dollar amounts saved had we acted with the good judgment to approve amendments like these would have enabled us to enact amendments I supported for modes restoration of funding to school lunch and fuel assistance programs, for trade adjustment assistance to unemployed workers, for better health programs, for college loans, and assistance to our elementary and secondary schools. Refusing to make those tradeoffs typified the wrong choices we made in this budget resolution. Despite the pledges of the administration that no area of the budget would escape painstaking scrutiny, it is clear that there have been some sacred cows.

Numerous General Accounting Office studies, statements of the Comptroller General, and even acknowledgments from Pentagon officials, have all indicated approximately $15 billion of waste in the military budget.

Yet, virtually no economies have been proposed in that sector. Instead the budget resolution calls for spending $27 billion more on military programs than last year.

I strongly support a national defense, second to none, and recognize that we will have to increase outlays to achieve it. But I am also cognizant of the Comptroller General's warnings that we may not be able to absorb massive additional amounts for military spending and the fact that dollar for dollar this may be the most inflationary way for money to be spent.

Achieving many of the possible efficiencies noted by authorities would not hurt our defense posture; it would probably improve it. Increasing defense expenditures by two-thirds of the recommended increment instead of the full amount recommended would enable us to address the security needs of this Nation with the largest peacetime addition to military expenditures in our national history. And either approach would permit us to moderate the impact on education, on health programs, on energy conservation, mass transit, housing and community development that is imposed by this budget.

After all, Mr. President, true national security depends not only on guns and tanks and missiles. The health and morale of our citizenry, the soundness of our communities and educational institutions, the strength of our economy are also vitally important elements of any reasonable definition of that term. I believe we could and should have done better to provide for our national security than this resolution does.

This budget resolution also fails any reasonable test of equity. The people of my State and this country generally realize that sacrifices need to be made—but they want them to be fairly apportioned.

That, however, is not the case with Senate Concurrent Resolution 9. It imposes few burdens on wealthy individuals or corporations. It makes no progress toward a balanced budget by closing tax loopholes.

Instead, it asks our retired citizens to do without the social security minimum payment, it directs workers who have lost their jobs to further diminish their standard of living, it tells elderly citizens struggling with skyrocketing fuel costs that they may have to choose between food or heat next winter, and it says to middle-income families who are already hard pressed to cope with the inroads inflation makes into their lifestyle that college educations for their children may become unaffordable luxuries.

Those are representative examples of the choice made by this resolution. They are not balanced and they are an important reason to reject the resolution.

I want to make it quite clear, Mr. President, that I do not object to substantial spending cuts. I could support a budget resolution with the bottom line figure of Senate Concurrent Resolution 9. If the budget reconciliation resolution which emerges from conference with the House makes more sensible and equitable choices, it will receive my support, but this one fails the minimal tests to which we should submit it.

Mr. RIEGLE. Mr. President, despite a fierce disagreement over specific national spending priorities which we will fight out over the weeks and months ahead, I believe we must make a significant overall cut in Federal spending, and I am voting today to establish a limit on Federal spending as requested by the new administration.

I believe fiscal restraint at this time is a necessary part of the effort to fight inflation, reduce taxes and stabilize our economy.

While I am supporting overall budget cuts in the amount the administration has sought, I have fought, and will continue to fight to spread those spending cuts more fairly and equitably across our society, in far different ways than the Reagan administration has proposed.

On separate votes, ranging from maintaining the minimum benefit on social security to continuing the immunization of American children against polio and other diseases, I have helped lead the fight to save those vital activities from proposed administration budget cuts I

feel are wrong. There are many other areas of waste and unnecessary spending in the Federal budget where we can make the needed savings, including tobacco subsidies, multibillion dollar Western water projects, and procurement waste and excessive spending in the Defense Department.

Because they control the Senate—and have a 53-to-47 voting majority—the Republicans voted as a bloc in this opening round to defeat all our attempts to eliminate obvious waste in such things as Government travel, unnecessary procurement, uncollected debts and consulting fees—while at the same time they opposed our efforts to continue vital programs for the elderly, school lunch programs, student loans, veteran health care, alternative energy sources, TRA, unemployment compensation, CETA, education, and many others.

Mr. President, there are also very serious regional imbalances in the impact of the proposed administration budget, where the industrial Midwest and Michigan are being asked to make a substantially greater sacrifice than other States and regions. This is unfair and unwise national policy and it must be corrected.

Despite public assurances from OMB Director Stockman that he would provide a regional analysis of the impact of the administration's proposed budget cuts, they have failed to produce that analysis.

I cannot and will not support budget reductions that discriminate unfairly against Michigan or our region.

While we have now begun the debate on national spending priorities, Mr. President, these issues will not be settled for many months. This is just the opening round.

I am totally committed to continue the fight for the priorities that I think make sense for Michigan and America, and I believe we will start winning that fight once the American people find out exactly what is at stake—and when they also speak out for a national direction that is fair and sound.

So we are not finishing that critical debate today—we are only beginning it

Our fight now moves out across the country to the American people for their judgment, just as it moves here in Congress into the individual committees of jurisdiction in the Senate and the House of Representatives for the long, hard struggle and decisions that will actually determine which specific programs and activities will be funded and at what levels.

Today we set a budget ceiling—a ceiling that will limit overall Federal spending—and I am supporting that spending ceiling. It is a necessary first step in moving our Nation toward economic recovery—and toward a fiscal discipline that can begin to bring Federal spending under control and reduce inflationary pressure.

Mr. DOMENICI. Mr. President, I yield myself just 1 minute before we vote.

I thank our distinguished majority leader for the help he has been to me in these days on the floor on this reconciliation instruction, and also the many Senators who have been helpful in moving the matter along and in supporting the Budget Committee.

It goes without saying that I could not have accomplished this without their support, without the support of the distinguished minority manager of the bill, my good friend, Senator HOLLINGS, and I thank him and the minority leader for his assistance in expediting matters and helping us with this very difficult and complicated 5 days in the Chamber.

Mr. HOLLINGS. Mr. President, I yield myself just a minute to commend the distinguished chairman of our Budget Committee.

Through his persistence and the way he handled this measure in the committee and on the floor, we are making a historic cut in Federal spending.

I think it was Adlai Stevenson, when asked once whether he was a conservative or a liberal, said:

That is not the important question. The important question is am I headed in the right direction?

I think that we now are headed in the right direction through this reconciliation activity in the past several weeks, culminating here this evening in a $36.9 billion cut in spending, which is $2.9 billion more than that requested by President Reagan. That coupled with the $8.8 billion in administrative savings will give us approximately $45 billion in savings in fiscal year 1982.

I harken back to December 5 when the first Reconciliation Act for 1981 was signed into law; here by April we are adopting another reconciliation for 1981, 1982, and 1983, of over $36 billion.

It has been quite a feat. It has been quite a pleasure. It has been done in large measure because of the leadership of the distinguished Senator from New Mexico, our new chairman of the Budget Committee, and of course, the leadership of the distinguished majority leader, Senator BAKER, and our distinguished minority leader, Senator ROBERT C. BYRD.

Senator ROBERT C. BYRD has coordinated the minority side throughout the entire exercise.

We are ending up here with a good resolution which all Senators can support.

I thank the Senator from New Mexico. He has done an absolutely outstanding, superb job.

Now we are ready to vote.

VOTE ON UP AMENDMENT NO. 50

The PRESIDING OFFICER. Under the previous order, the question recurs on agreeing to the amendment of the Senator from Delaware (Mr. BIDEN).

On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Maryland (Mr. MATHIAS) is necessarily absent.

Mr. CRANSTON. I announce that the Senator from New Jersey (Mr. WILLIAMS), is necessarily absent.

I further announce that, if present and voting, the Senator from New Jersey (Mr. WILLIAMS), would vote "yea."

The PRESIDING OFFICER. Is there anyone in the Chamber who wishes to vote?

The result was announced—yeas 37, nays 61, as follows:

[Rollcall Vote No. 74 Leg.]

YEAS—37

Biden	Glenn	Pell
Bradley	Hart	Pryor
Bumpers	Heinz	Randolph
Burdick	Inouye	Riegle
Cannon	Jackson	Roth
Chafee	Kennedy	Sarbanes
Chiles	Leahy	Sasser
Cohen	Levin	Specter
Cranston	Matsunaga	Stafford
Dodd	Melcher	Tsongas
Durenberger	Metzenbaum	Weicker
Eagleton	Mitchell	
Ford	Moynihan	

NAYS—61

Abdnor	Garn	McClure
Andrews	Goldwater	Murkowski
Armstrong	Gorton	Nickles
Baker	Grassley	Nunn
Baucus	Hatch	Packwood
Bentsen	Hatfield	Percy
Boren	Hawkins	Pressler
Boschwitz	Hayakawa	Proxmire
Byrd, Harry F., Jr.	Heflin	Quayle
	Helms	Rudman
Byrd, Robert C.	Hollings	Schmitt
Cochran	Huddleston	Simpson
D'Amato	Humphrey	Stennis
Danforth	Jepsen	Stevens
DeConcini	Johnston	Symms
Denton	Kassebaum	Thurmond
Dixon	Kasten	Tower
Dole	Laxalt	Wallop
Domenici	Long	Warner
East	Lugar	Zorinsky
Exon	Mattingly	

NOT VOTING—2

Mathias	Williams

So Mr. BIDEN's amendment (UP No. 50) was rejected.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. DOMENICI. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. KENNEDY. Mr. President, as I understand it, the amendment which I offered earlier is about to be voted on. I offer that amendment on behalf of myself and the distinguished Senator from Pennsylvania, Senator SPECTER. I would ask that his name be added as the principal cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

VOTE ON UP AMENDMENT NO. 51

The question recurs on the amendment of the Senator from Massachusetts, as modified. The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. STEVENS. I announce that the Senator from Maryland (Mr. MATHIAS) is necessarily absent.

Mr. CRANSTON. I announce that the Senator from New Jersey (Mr. WILLIAMS) is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 26, nays 72, as follows:

[Rollcall Vote No. 75 Leg.]

YEAS—26

Baucus	Glenn	Moynihan
Biden	Heflin	Pell
Bradley	Inouye	Randolph
Burdick	Kennedy	Riegle
Cranston	Leahy	Sarbanes
DeConcini	Levin	Specter
Dodd	Matsunaga	Tsongas
Eagleton	Metzenbaum	Zorinsky
Ford	Mitchell	

NAYS—72

Abdnor	Garn	Murkowski
Andrews	Goldwater	Nickles
Armstrong	Gorton	Nunn
Baker	Grassley	Packwood
Bentsen	Hart	Percy
Boren	Hatch	Pressler
Boschwitz	Hatfield	Proxmire
Bumpers	Hawkins	Pryor
Byrd, Harry F., Jr.	Hayakawa	Quayle
	Heinz	Roth
Byrd, Robert C.	Helms	Rudman
Cannon	Hollings	Sasser
Chafee	Huddleston	Schmitt
Chiles	Humphrey	Simpson
Cochran	Jackson	Stafford
Cohen	Jepsen	Stennis
D'Amato	Johnston	Stevens
Danforth	Kassebaum	Symms
Denton	Kasten	Thurmond
Dixon	Laxalt	Tower
Dole	Long	Wallop
Domenici	Lugar	Warner
Durenberger	Mattingly	Weicker
East	McClure	
Exon	Melcher	

NOT VOTING—2

Mathias	Williams

So Mr. KENNEDY's amendment (UP No. 51) was rejected.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. GOLDWATER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

VOTE ON UP AMENDMENT NO. 52

The PRESIDING OFFICER. Under the previous order, the vote occurs on the amendment of the Senator from Florida (Mr. CHILES). All those in favor will indicate by saying yea; those opposed, indicate by saying nay.

The nays appear to have it.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the amendment——

SEVERAL SENATORS. Yeas and nays, Mr. President.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that the rollcall vote be 10 minutes.

The PRESIDING OFFICER. An order has already been entered for a 10-minute vote.

The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Maryland (Mr. MATHIAS) is necessarily absent.

Mr. CRANSTON. I announce that the Senator from New Jersey (Mr. WILLIAMS) is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who wish to vote?

The result was announced—yeas 46, nays 52, as follows:

[Rollcall Vote No. 76 Leg.]

YEAS—46

Andrews	DeConcini	Inouye
Baucus	Dixon	Jackson
Bentsen	Dodd	Kennedy
Biden	Eagleton	Leahy
Bradley	Exon	Levin
Bumpers	Ford	Matsunaga
Burdick	Glenn	Melcher
Byrd, Robert C.	Hart	Metzenbaum
Cannon	Hawkins	Mitchell
Chiles	Heflin	Moynihan
Cohen	Hollings	Nunn
Cranston	Huddleston	Packwood
Pell	Sarbanes	Tsongas
Pryor	Sasser	Zorinsky
Randolph	Stafford	
Riegle	Stennis	

NAYS—52

Abdnor	Gorton	Nickles
Armstrong	Grassley	Percy
Baker	Hatch	Pressler
Boren	Hatfield	Proxmire
Boschwitz	Hayakawa	Quayle
Byrd, Harry F., Jr.	Heinz	Roth
	Helms	Rudman
Chafee	Humphrey	Schmitt
Cochran	Jepsen	Simpson
D'Amato	Johnston	Specter
Danforth	Kassebaum	Stevens
Denton	Kasten	Symms
Dole	Laxalt	Thurmond
Domenici	Long	Tower
Durenberger	Lugar	Wallop
East	Mattingly	Warner
Garn	McClure	Weicker
Goldwater	Murkowski	

NOT VOTING—2

Mathias	Williams

So Mr. CHILES' amendment (UP No. 52) was rejected.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. JEPSEN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOMENICI. Mr. President, I yield back the remainder of my time.

Mr. HOLLINGS. I yield back the remainder of my time.

We have agreed to have a voice vote on the committee amendments and then a rollcall vote on final passage.

Mr. BAKER. Mr. President, I ask for the yeas and nays on final passage.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. Are there further amendments? If not, the question is on agreeing to the excepted committee amendments, as modified and amended.

The excepted committee amendments, as modified and amended, were agreed to.

VOTE ON SENATE CONCURRENT RESOLUTION AS AMENDED

The PRESIDING OFFICER. The question is on agreeing to the concurrent resolution, as amended. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Maryland (Mr. MATHIAS) is necessarily absent.

I further announce that, if present and voting, the Senator from Maryland (Mr. MATHIAS) would vote "yea."

Mr. CRANSTON. I announce that the Senator from New Jersey (Mr. WILLIAMS) is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 88, nays 10, as follows:

[Rollcall Vote No. 77 Leg.]

YEAS—88

Abdnor	Boren	Byrd, Robert C.
Andrews	Boschwitz	Cannon
Armstrong	Bradley	Chafee
Baker	Bumpers	Chiles
Baucus	Burdick	Cochran
Bentsen	Byrd, Harry F., Jr.	Cohen
Biden		D'Amato
Danforth	Hollings	Percy
DeConcini	Huddleston	Pressler
Denton	Humphrey	Proxmire
Dixon	Inouye	Pryor
Dole	Jackson	Quayle
Domenici	Jepsen	Randolph
Durenberger	Johnston	Riegle
East	Kassebaum	Roth
Exon	Kasten	Rudman

Garn	Leahy	Schmitt
Glenn	Long	Simpson
Goldwater	Lugar	Specter
Gorton	Matsunaga	Stafford
Grassley	Mattingly	Stennis
Hart	McClure	Stevens
Hatch	Melcher	Symms
Hatfield	Mitchell	Thurmond
Hawkins	Moynihan	Tower
Hayakawa	Murkowski	Wallop
Heflin	Nickles	Warner
Heinz	Nunn	Zorinsky
Helms	Packwood	

NAYS—10

Cranston	Levin	Tsongas
Dodd	Metzenbaum	Weicker
Eagleton	Pell	
Kennedy	Sarbanes	

NOT VOTING—2

Mathias	Williams

So the concurrent resolution (S. Con. Res. 9), as amended, was agreed to.

Mr. HOLLINGS. Mr. President, I move to reconsider the vote by which the concurrent resolution was agreed to.

Mr. DOMENICI. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The title was amended so as to read "Concurrent Resolution revising the congressional budget for the United States Government for the fiscal years 1981, 1982, and 1983, to include reconciliation."

Mr. DOMENICI. Mr. President, I ask unanimous consent that the Senator from Ohio (Mr. METZENBAUM) be taken from Senate Concurrent Resolution 9 as a cosponsor and that the Senator from Nevada (Mr. CANNON) be added.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOMENICI. Mr. President, I ask unanimous consent that the Secretary of the Senate be permitted to make technical and conforming corrections as may be necessary to reflect the decisions of the Senate on Senate Concurrent Resolution 9.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR PERIOD FOR THE TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business not to extend beyond 30 minutes in which Senators may speak for not more than 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. Mr. President, earlier, just before the vote, I expressed my position on this budget resolution, but I want to take this moment of the Senate's time to indicate that although over the period of the last 5 days I have offered a number of amendments, and most of those amendments were defeated, I want to, first of all, commend the two managers of the bill, the distinguished Senator from New Mexico and the distinguished Senator from South Carolina, for the way in which they handled the amendments which a number of us offered, the nature

and quality of the discussion and the debate.

It seems to me that basically it was constructive and positive, and I think all of us—at least this Senator—felt that he had a fair opportunity to have his positions evaluated by the Senate and considered by the Senate.

So I want to commend both of our colleagues for the way in which they have dealt with these very difficult, complex, and important issues before our country.

I also want to pay special tribute to the minority leader, Senator ROBERT C. BYRD, as a Member of this institution and also as the minority leader in the Senate. He has spent a great deal of time working with his colleagues and insuring that we were going to have an opportunity to present our views and to work with us in a very constructive way. I want to pay tribute to his leadership as a leader not just of our party but also a leader in the Senate for the way in which he brought many of his colleagues together to insure that there was going to be an opportunity for expression before the Senate of important issues.

I want to acknowledge the leadership as well of Senator CRANSTON and Senator INOUYE who worked very closely with Senator ROBERT C. BYRD. I also commend the Senator from New Jersey (Mr. BRADLEY) for the work he did for our caucus and in helping to develop the policy positions.

Finally, as others have done, I commend the majority leader, who bears the responsibility for all of the Senate, for the way in which the Senate as a whole has handled this issue, and to thank them for their courtesies which have been extended to this Senator in offering his amendments.

REFLECTIONS OF THE MINORITY LEADER ON THE BUDGET RESOLUTION OF RECONCILIATION

Mr. ROBERT C. BYRD. Mr. President, I thank Mr. KENNEDY for the very kind comments he has just made with reference to my efforts. I also thank Senator STENNIS for the generous comments which he earlier made regarding those efforts.

I express my appreciation to Mr. HOLLINGS and to Mr. DOMENICI for the leadership skills they have demonstrated here in the consideration of this resolution. They have spent long hours, and they have evidenced at all times the fact that they knew their subject well.

I want to express special commendations with respect to the work of the majority leader. This is truly an extraordinary budget resolution, and at all times the majority leader was most fair and considerate of the Members on this side of the aisle. He bent over backwards, so to speak, to accommodate the needs of Members on our side of the aisle, and I could not have asked for fairer consideration than we were given, and for this I thank the majority leader.

But I also want to commend him, as I said. He demonstrated outstanding skill in the handling of this very difficult, complex resolution. He removed most of the areas where points of order would probably have lain at the very beginning, and the discipline of his Members on his side of the aisle was, I think, something remarkable to see.

Now, having said that, I would like to say with respect to the resolution that we on this side of the aisle know something about the difficulties that are involved in balancing the budget and in making cuts in Federal programs.

It was this time last year, possibly a little earlier, that I met for 8 days in one of the rooms just off the Chamber here with administration leaders, with House leaders, and with other Senate leaders in an exercise that was calculated to balance the budget and bring about cuts in Federal spending.

When the knowledge of those proposed cuts leaked out, of course, we were deluged with mail. In some instances I know in my office the mail went as high as 300 to 1 against some of the cuts we were proposing.

We balanced the budget for the first time in the first concurrent budget resolution, but the economy went into a slide and the increased costs of oil and other forms of energy made it impossible for the Government to balance the budget. So we Democrats know something about the problems that come with any effort to balance this budget.

We came to the consideration of this resolution, therefore, with a determination to give of our best efforts to the balancing of the budget, and we supported, as I think I can speak generally for Democrats—I do not presume to say that I am speaking for all Democrats or for any particular individual Democrat—but I think I can say that Democrats generally felt we wanted to support the scope and dimensions of the cuts that were recommended by the President.

So, it should be writ—and writ large—that the Senate, in a bipartisan effort, has given the administration all the savings it requested, and then some.

Throughout consideration of the resolution, Democratic Senators have adhered to a single, simple strategy. We have worked to stick within the savings totals recommended by the President. At the same time we have tried to adjust the cuts so as to plug the holes in the President's safety net.

Time after time we were defeated in this effort by an almost solid phalanx of Republican votes. The press has interpreted those votes as defeats for Senate Democrats.

The record should be made clear, Mr. President. It was not the Democrats in the Senate who were defeated. It was the veterans who will receive less adequate health care who were defeated. It was the schoolchildren who will not receive school lunches who were defeated. It was the elderly people who will no longer receive minimum social security benefits and who cannot afford to pay their utility bills who were defeated. It was college students and disadvantaged schoolchildren who were defeated.

Last fall, the American people voted for restraint in Federal spending. Democrats are in favor of cuts. In fact, we support cuts in the dimension of those requested by the President and recommended by the Budget Committee in this resolution.

But the American people did not vote for less veterans health care, for less energy independence, for less access to institutions of higher learning, or for elimination of minimum social security benefits. And we Democrats, as a party, have tried to restore cuts in programs which we believe enjoy broad-based support among the American people.

Senate Democrats have met several times this week and last to review this reconciliation instruction and consider proposed amendments. Some weeks ago, I appointed the distinguished Senator from New Jersey Senator BILL BRADLEY, to head an 11-member economic task force, charged with the responsibility of analyzing the administration's economic program. The task force and most other Democratic Senators offered their views on many of the recommended budget cuts. We determined that each of these program reductions should be measured against specific goals which we sought to accomplish. Specifically, the cuts should:

Promote economic growth and fight inflation;

Provide short-term savings that will not result in long-term costs;

Be consistent with other major national priorities, such as reducing our dangerous dependence on foreign oil; and

Be fair and equitable so that no single group bears a disproportionate share of the burden.

In our caucus deliberations, Senate Democrats agreed to stand as a party on 11 amendments which were ultimately offered by Senate Democrats. The total increase in fiscal year 1982 outlays, had all those amendments passed, would have been $2.488 billion. But not all of our amendments attempted to restore cuts. Some sought new savings and others included offsetting savings. Had all our amendments passed savings would have been increased by $2.640 billion in fiscal year 1982. Thus, the net effect of the amendments endorsed by the Democratic conference and considered on the Senate floor would have been to increase the level of savings in the reconciliation resolution by $152 million.

As Democrats, we feel obligated to address some of the central concerns and priorities of this Nation. While there is a general public commitment to reduced Federal spending, public opinion is highly selective as to where cuts ought to be made. It is by no means clear that the mandate of the November election was an endorsement of a wholesale dismantling of 30 years of social progress. It is doubtful that voters knew or understood the true dimensions of the administration's budgetary agenda. Everyone wants to eliminate waste and fraud, but few people understand "waste and fraud" to mean their child's school lunch program, veterans' health care, or social security benefits.

It is also doubtful that the voters understood the administration's energy policy to consist only of higher fuel prices. The administration's budget drastically cuts every alternative fuel research and development program and most conservation and strategic planning activities as well. Total reliance is placed on the discovery and development of new oil and gas reserves, although every credible study indicates that the United States will not be able to maintain even current production levels.

The solution to the problem of oil imports lies not only in conservation but

also in the rapid development of other energy resources—including coal and oil shale. Democrats and many Republicans, do not believe that the comprehensive energy policy enacted by the 96th and 97th Congresses should be dismantled. The goals of the Energy Security Act—to substitute 2 million barrels of imported oil a day with alternative fuels—must be realized. I would expect the Senate Energy Committee to scrutinize these budget proposals and to restore funding for those energy development programs which hold the most promise.

But, Mr. President, the people who are going to be hurt by the budget cuts will know by the record as to how we Democrats stood in our efforts to lessen the burden of those cuts, to shift the cuts elsewhere, to offset some of the cuts, and to increase revenues by some of the amendments that were offered from our side. They will make a judgment.

I would say that 6 months from today or a year from today, the people will be able to determine who was "defeated" during these floor votes. And in due time they will render a judgment that the people who were "defeated" during the past 7 days were the middle- and low-income families and many people who are living on small fixed incomes.

The burden of balancing the budget is falling on those who are least able to bear it in most instances. Many of the cuts constitute false economy, and in the long run we will all pay more as a result. For example, there are the cuts in EDA, Farmers Home, Appalachian Regional Commission, and energy programs.

Mr. President, this is the first round in the budget process. There will be other times when the Senate will meet and again and again deal with these matters. And we, on this side of the aisle, will continue our diligence in behalf of the people.

In the main we will support increased defense spending. The Senate has already been doing that. We will support regulatory reform, and we will support restraint in Federal spending. We will support a tax cut that is fair and equitable and that will encourage business investment and increase productivity.

I, again, congratulate the majority leader and those on his side of the aisle who have shepherded this resolution through the Senate. I admire the way that he held his votes together.

I do say this—and I do not say it facetiously. I think it is a matter of fact. His party in the Senate has been in the minority a long time. That minority has not found it difficult over the years to stand united as a party. The Democratic Party is a very diverse party and has been in the majority a long time and has not, I suppose, seen the necessity to stand as unified as the Republican minority was able to do. And now that ability to wield a unified Republican force in the Senate certainly stands the distinguished majority leader in good stead.

I compliment him. I admire his work. Again, I say I could not have asked for more fair consideration at all times throughout the debate on this resolution—and it is a historic resolution. He has certainly gone out of his way to accommodate the needs and the requests of the minority Members on this side of the aisle and I thank him for it. We understand that we cannot always agree on substance. And in this instance, I think both sides have played their respective parts as they saw their duty to play those respective parts. I think they did well.

I want to commend and thank my colleagues on my side of the aisle, because I think they, too, gain from this very interesting exercise. Our meetings, I think, brought us closer together. Our Members had the opportunity to voice their views. Not all of the amendments, by any means, that were called up on our side were agreed upon in the caucus to have the support of the party. But, nevertheless, Members had the right as individuals to call up their amendments.

On the votes dealing with party-sponsored amendments, as agreed upon in caucus, our party held together very well. On the vote, first of all, on veterans health services, as I remember, we lost three Members on our side and one independent. We picked up one Member from the other side. On the second veterans health services vote, we, I think, lost the same number and we picked up two votes on the Republican side of the aisle. So my party Members held together very, very well in support of the amendments agreed upon in caucus. But the arithmetic was plain. We were always outnumbered by the majority party.

I thank my Democratic colleagues for the support that they gave, and I commend them. I believe that where we felt that the cuts were not fair or that the safety net was indeed letting certain groups of people slip through, I believe that the American people will, in the final analysis, be able to say "well done" to those on this side of the aisle for the votes that they have cast, for the positions they have taken, and for the amendments that they have offered.

As to the Senators on the other side, they, too, worked hard. We have had excellent attendance on both sides of the aisle. I think all Senators are to be commended. We may not all agree, but when all is said and done, we are all trying to do what we think is the best for our country.

Finally, let me apologize to the distinguished majority leader for keeping him waiting.

I ask unanimous consent to insert certain memorandums prepared by the Senate Democratic Policy Committee staff.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE REAGAN BUDGET: ECONOMIC ASSUMPTIONS

The President's economic assumptions are unrealistically rosy because they rely on historically unfounded economic responses to tax cuts and budgetary stringency. Should the President's economic assumptions fail to the extent prior experience suggests they will, budgetary deficits will be substantially greater than those currently assumed.

The most authoritative evidence as to the likely budgetary effect of less optimistic economic assumptions is a CBO analysis of the Reagan budget which suggests a conservative addition to the Reagan 1982 deficit of $20 to $25 billion. The CBO additions to the Reagan deficit are due to higher program costs resulting from interest rates, higher unemployment and higher inflation than that assumed in the Reagan budget. Similar CBO reestimates add about $50 billion to the Reagan 1984 budget outlays (See attached CBO analysis).

ADMINISTRATION ECONOMIC ASSUMPTIONS: A COMPARISON WITH ALTERNATIVE SOURCES

Table I compares the results from simulations of the Reagan program by traditional economic models. The Merrill Lynch and Administration projections are most optimistic. The different outlooks between Merrill Lynch and the Administration on the one hand and the Chase, Wharton and DRI models on the other principally result from different assumptions as to the effects of a personal tax cut on inflation and the effect of government policies on inflational expectations.

The traditional view is that reduced taxes, especially in an inflationary environment, result in spending of the major share of the tax windfall. Increased spending results in increased prices, tight money, higher interest rates, reduced investment and eventually, reduced real growth. The latter traditional view is supported by historical experience.

By contrast, the Administration and Merrill Lynch presume a break with historical experience in that reduced taxes will increase the after-tax return on investment, thereby encouraging consumers to save and invest their tax windfall instead of spending it. Should a substantial share of the windfall be invested, real growth, real increases in wages, productivity and employment, and reduced inflation would follow.

The marginal savings rates implicit in the Administration's tax cut appear to break dramatically with prior experience. The Reagan tax cut assumes marginal rates of saving from 60% to 70%. Econometric literature on marginal savings rates is thin. Some estimates, however, have shown marginal rates could be as high as 20% to 25%. In addition, there is reason to believe that more of the Reagan tax cut will be saved than prior tax cuts. Martin Feldstein estimates that more than ⅓ of the total tax cut will go to families with incomes over $50,000.

In a similar analysis Dave Evans estimates that 84% of the tax cut will go to families above the medium income level. In general, savings rates do tend to increase with income.

In the final analysis, however, it is generally agreed that high marginal rates of saving dissipate quickly into consumption. The full range of economists from conservatives like Milton Friedman to liberals such as the late Arthur Okum agree that high marginal rates of saving dissipate into consumption within a few economic quarters.

A second premise which underlies the Administration and Merrill Lynch projections concerns the impact of government policies on inflationary expectations of consumers and investors. An aggressive attempt at budget balance, a consistent monetary policy, and deregulation are, in the Administration's view, policies that will transform traditional inflationary expectations. No one argues, for instance, that reducing government spending is a very direct way to reduce inflation. A standard rule of thumb is that for every $10 billion in reduced spending, we reduce inflation by only 1/10 of one percent. The major effect of a balanced budget on inflation is argued to be psychological. The government's serious attempt to control inflation, through the latter means, it is assumed, will convince consumers and investors that inflation will lessen in the future. As a result, investment will be encouraged and attempts to stay one step ahead of inflation through wage bargaining, anticipatory buying, and anticipatory pricing will abate. In short, consumers and investors will behave according to their future expectations that inflation will be reduced by government instead of their historical experience which tells them that the rate of inflation has increased in the past and will continue to increase in the future.

In addition to these two assumptions

about general economic behavior, there are two other factors that account for the difference between the Administration's projections and less optimistic scenarios:

1. The Administration presumes that the new supply side effects will occur with remarkable rapidity. Employment and price effects of new investment, for instance, are generally measured in decades. The Administration assumes investment impacts on productivity and inflation in the space of a few years. Much the same is true with respect to inflationary expectations. The Administration, for example, predicts a CPI of 6.2% by 1983, compared to the current 13.5% in 1980.

2. The Administration presumes remarkable growth with very little expansion in money supply. The Administration compensates for slow growth in money supply by assuming an historically unprecedented "velocity" in the use of available money. While peak rates run at roughly 5 percent, the Administration's assumptions appear to run as high as 6.5 percent to 8 percent.

MARGIN FOR ERROR IN FUTURE DEFICITS

Should the Administration's economic assumptions fail, deficits are likely to be much higher than currently projected.

1. Interest. For example, should the Administration's interest rate assumptions be unfounded, deficits will grow substantially. Early evidence that the Administration's rates are high is found in the Senate Budget Committee's assumption which increase the Administration's assumed rate by 2.5 percent in 1981, 3.0 percent in 1982, and 3.2 percent in 1983. One assumes the Senate Budget Committee raised the Reagan rate in view of tight money and the unacceptable velocity of money assumed in the Administration's plan. In any event, the Administration's interest costs run $7.4 billion below the Carter assumptions for FY 1982.

2. Inflation. In FY 1983, about $261 billion in payment programs will be indexed to the CPI. Should the 1983 CPI grow at 8.2 percent, as opposed to 6.2 percent as assumed by the Administration, costs in these programs alone will increase by roughly $5 billion.

3. Unemployment. The Administration is in substantial agreement with other models as to the future rate of unemployment. However, should current projections be off by as little as 1 percent, the added budgetary deficit could run from $20 to $25 billion in lost revenues and added costs in "safety net" programs.

TABLE 1.—SELECTED MAJOR ECONOMIC INDICATORS

	1980[1]	1981	1982	1983	1984	1985

CONGRESSIONAL BUDGET OFFICE,
Washington, D.C., March 13, 1981.

[Memorandum]

To Alice M. Rivlin.
From Jim Blum.
Subject Preliminary Outlay Reestimates of the Administration's Budget.

This memorandum summarizes a very "quick-and-dirty" set of preliminary reestimates of outlays for fiscal years 1981–1984 that would result under President Reagan's budgetary proposals, using CBO's estimating methods and the alternative set of economic assumptions developed by CBO.

ECONOMIC ASSUMPTIONS

Table 1 compares the Administration economic assumptions with the alternative set produced by Fiscal Analysis that incorporates the President's fiscal policy. The CBO alternative assumptions show higher inflation, higher interest rates, and higher unemployment, all of which means higher outlays. Table 2 provides preliminary reestimates of Administration budget outlays for the effects of the CBO alternative economic assumptions on indexed benefit payments, unemployment insurance, and net interest costs. Use of the CBO alternative economic assumptions adds almost $30 billion in outlays by fiscal year 1984.

We would also reestimate the Administration budget outlays for other reasons. For example, we would add $6 billion to Defense Department outlays in 1982 because of different assumptions about spending rates, and at least another $1 billion to reflect higher fuel costs than assumed for the Administration estimates. Our preliminary evaluation of the President's budget cuts for the Senate Budget Committee suggests that the outlay savings have been overestimated by at least $4 billion for 1982. We also have other estimating differences based on different programmatic assumptions about spending rates, growth in beneficiary populations, and other factors that would add at least another $2 billion to 1982 outlays in the proposed budget. Finally, we would project higher defense outlays in the outyears because of higher inflation in the CBO alternative economic assumptions. Secretary Weinberger has testified that the Administration would request additional funds if inflation turns out to be higher than projected for the budget estimates.

These program reestimates would add 10 to 15 billion dollars to 1982 Administration budget outlays, 15 to 25 billion to 1983 outlay estimates, and another 15 to 25 billion to those for 1984. Together with the reestimates based on alternative economic assumptions, we would reestimate Administration budget outlays for 1984 upward by about $50 billion as shown in Table 3. These reestimates will be done in detail during the next week, and are therefore subject to change. I believe the Table 3 numbers are in the right ball park, and probably on the conservative side.

Table 3 also shows the Administration reestimates of the Carter budget, based on new economic assumptions and other factors. These reestimates are somewhat lower than CBO's, but are still quite large. The message is still the same. If the economy does not perform according to the Administration's scenario, outlays by 1984 could be much higher than projected by the Administration. The amount of additional spending cuts necessary to balance the budget by 1984 could be twice as large—or more—as the $44 billion of unidentified savings shown in the March 10 budget revisions.

TABLE 3.—PRELIMINARY CBO REESTIMATES OF ADMINISTRATION BUDGET OUTLAYS

[By fiscal year, in billions of dollars]

	1981	1982	1983	1984
Administration budget outlays	655	695	732	770
Preliminary CBO reestimates:[1]				
Alternative economic assumptions (table 2)	1	10	21	29
Other estimating differences	4–6	10–15	15–25	15–25
Subtotal	5–7	20–45	36–46	44–54
Administration budget outlays reestimated	660–662	715–720	768–778	814–824
Administration reestimates of Carter budget	−7	−15	−21	−33

[1] Preliminary, subject to change.

BROKEN BUDGET PROMISES

Depending on one's subjective view of economic theory, and intangibles such as future expectations, one might give the President the benefit of the doubt on his economic assumptions.

However, review of his success to date in meeting projected budgetary goals raises serious questions about the Administration's accuracy in budgeting.

1. A Balanced Budget. Throughout his campaign, the President promised to balance the budget by FY 1983. As recently as January, Administration officials were predicting a balanced budget by FY 1983. Now they are projecting a barely balanced budget in FY 1984.

2. FY 1981 Outlays. In his major economic address of September 9, 1980, Candidate Reagan predicted outlay levels of $620 billion in FY 1981.

In November, during congressional consideration of the second budget resolution for FY 1981, Caspar Weinberger, speaking for the President, urged the Congress to budget only $620 billion in outlays. He assured a dubious Congress that the President could achieve that outlay level.

Two and one-half months later, in his February 18, 1981 budget submission, the President called for FY 1981 outlays of $654.7 billion—a difference of $35 billion.

3. Floating Savings Estimates. Between the February 18 and March 10 budget submissions, OMB discovered that they had misestimated their February 18 savings by $7.6 billion. There were surprises on the revenue side as well.

4. Waste and Fraud. In his September 9, 1980 speech the President promised to cut waste and fraud by $13 to $18 billion in FY 1981. Ed Meese confidently told the press in November that the Administration had identified enough "waste and fraud" to cut Federal spending by 6 percent (or approximately $37 billion).

Now the President is requesting FY 1981 cuts of $6.4 billion.

5. Tax Cut. In his September speech, and as late as January through his spokesmen, the President was promising an effective date of January 1, 1981, for his tax cut.

He now says that Kemp/Roth should not take effect until July 1, 1981.

Some Concerns About the President's Budget:

A. An Inflationary Gamble;
B. The Safety Net Has Holes;
C. Economic Dunkirk;
D. A Non-Energy Policy; and
E. Waste and Fraud vs. Entitlements.

A. AN INFLATIONARY GAMBLE

President Reagan has made the ambitious claim that his program will cut inflation by half in 1983—to 6.2%. The theory behind this claim is that large spending cuts will dampen demand and large tax cuts will

stimulate increased savings and thus investment.

Reagan's assumption that massive tax cuts will be saved instead of spent on consumption is highly dubious. This assertion has been widely challenged.

However, few people have really focused on the extent to which Reagan is proposing spending cuts of a dimension which can begin to offset his tax cut recommendations. Looking at his projected savings versus his revenue loss for fiscal year 1986 is illustrative.

Remember, in considering the President's savings levels, CBO has projected outlay levels $20 billion to $25 billion higher than the President's in fiscal year 1982, and $44 billion to $54 billion by fiscal year 1984.

By fiscal year 1986, the President assumes (optimistically) that the savings he has recommended thus far will total $102.7 billion. He projects increased defense spending of $63.1 billion. Thus, when you subtract defense increases from his announced cuts, they result in net budget cuts of $39.6 billion by fiscal year 1986.

His materials indicate that he will recommend additional spending cuts by FY 1983 which will be worth $42.7 billion in FY 1986. If we accept this rather ambitious goal, total net spending cuts will be $82.3 billion by FY 1986.

On the revenue side, 30% tax reductions will cost $162.4 billion by FY 1986. Depreciation changes will cost $59.3 billion by that time. Proposed user charges and increased taxes and fees will increase revenues by $8.0 billion. The net revenue reduction by FY 1986 will be $209.8 billion.

Compare this to the projected spending savings of $82.3 billion and you can readily see that this budget cannot be characterized as restrained.

Proponents of the Reagan tax cut will argue that without it, inflation and increased Social Security taxes will cause people to pay considerably more taxes. This is a credible argument.

However, the plan assumes massive current and future cuts in federal spending which may fail to fully materialize.

Unless the President gets all of his spending cuts, unless CBO estimates are wrong, and unless the level of government spending is not driven up by economic circumstances which are worse than the Reagan scenario, his massive tax cuts could be very inflationary.

B. THE SAFETY NET HAS HOLES

For the stated purpose of protecting the "truly needy," the Administration has defined a safety net of seven programs: Social Security retirement, medicare, veterans' compensation and pensions, free school lunches, Head Start, summer youth jobs and Supplemental Security Income. The "safety net" costs some $215 billion annually. More than $200 billion is spent on just three of the seven programs in the net—the only three which do not require a strict income test: Social Security retirement, medicare and veterans' disability and retirement. These three programs are not generally seen as benefits designed for the truly needy.

In his budget message, President Reagan described the truly needy as "the elderly and others who rely on Government for their very existence." Would the elderly poor fall through the Administration's safety net? The Administration proposes:

Cutbacks in public housing when nearly one-half the residents are low-income elderly;

Reductions and revisions in Section 8 rental assistance when nearly 80 percent of new construction tenants are low-income elderly;

Cuts in mass transit which might result in eliminating half-fare allowances for the elderly;

Cuts in medicaid when almost one-half of medicaids cost results from medical care for the aging poor; and,

Cuts in community revitalization programs (Community Development Block Grants, Community Services Administration) that benefit the elderly through senior centers, low-income weatherization and other projects.

Would those "who rely on Government for their very existence" fall through the safety net? The four largest federal welfare programs are Aid to Families with Dependent Children, medicaid, food stamps and housing assistance. Reagan proposes to cut these programs by more than $14 billion in budget authority next year. One out of every six families receiving AFDC support would be forced off the rolls or have its benefits reduced.

To help pay for the Reagan tax cut, the family of four making $11,000 would lose its food stamps, which provide an average of $47 in monthly benefits, for an annual cost of $564. This same family will pay about $55 more in Social Security taxes this year. Next year, it would pay $60 less in federal income taxes, while paying more for traveling to and from work, for housing and for day care. (Ironically, Reagan's advisers say that they want to strengthen the work incentive.)

Other federal programs which have slipped through the President's "net" are: low-income energy assistance, foster care and adoption assistance, Special Supplemental Food Program for Women, Infants and Children (added back in the Budget Committee), day care, job training, compensatory education and unemployment.

C. ECONOMIC DUNKIRK

In his economic address to the nation, President Reagan used the year 1960 as the benchmark after which things began to go wrong for America. President Reagan concluded: "We all know we are very much worse off." The facts clearly establish otherwise.

Americans are richer today than they were in 1960; average real disposal income has more than doubled.

The benefits of economic growth have been reasonably well distributed. The percentage of Americans living in poverty has been cut in half over the last twenty years.

The most basic measure of the standard of living is the quality of life itself. The average person's life expectancy is now nearly four years longer than in 1960. The infant mortality rate has declined 46 percent.

The quality of housing has improved substantially, and a higher percentage of Americans own their own homes. The number of families living in physically inadequate housing has declined steadily: from more than 20 percent of all households to about 8 percent.

Americans are better educated. In 1959, nearly 16 percent of the labor force had less than an eighth grade education; by 1979, less than 5 percent had not completed at least eight years of school.

Americans are better protected against uncertain futures. In 1960, only 48 percent of our workers had regular health insurance; today more than 63 percent is insured. Twenty years ago, less than 58 percent of all workers had life insurance; today almost 80 percent of the work force is insured.

Let's look at the facts. In his February 6 economic address, President Reagan said, "The percentage of your earnings the federal government took in taxes in 1960 has almost doubled." In his address to the Congress, February 18, 1981, he said, ". . . in the last five years, Federal personal taxes for the average family increased 67 percent."

In 1960, federal personal income taxes were 10.8 percent of total personal income. In 1980, they were 11.9 percent.

The total amount of federal personal income taxes and Social Security taxes paid in 1960 accounted for 13 percent of total personal income. In 1980, they accounted for 15.9 percent.

In his economic address, Reagan said that U.S. industry is being taxed so hard, it is "being priced out of the world market."

Between mid-1970 and 1980, U.S. exports grew 35 percent. Our trade balance is improving, despite massive oil bills.

If we examine national income, and all federal receipts including corporate tax revenues and various business duties, we discover that in 1960, federal receipts were 22.8 percent of national income, and twenty years later, they were 24.5 percent.

The public debt has been falling in terms of our Gross National Product. In 1960, the public debt stood at 56.9 percent of the GNP. Twenty years later, the debt stands at about 35 precent of GNP.

Of leading industrial nations, the United States has one of the lowest deficits as a percentage of GNP—France is the only industrialized nation to run a comparably low deficit.

While the level of federal expenditures has grown, the size of the federal workforce has fallen in relation to our growing population. In 1960, we had 1,808,334 non-postal civilian employees, or 1.00 percent of the population. In 1980, we had some 2,215,852 employees or .97 percent of the population.

President Reagan told the American people that "we are in the worst economic mess since the Great Depression." At that time, twenty-five percent of the people were unemployed, the banks were closed, and the country was fighting deflation rather than inflation. The nation cannot be well served by policies based on a distorted view of our problems and our strengths.

D. A NON-ENERGY POLICY

The Administration's energy policy rests on two principles: very high energy prices, and reliance on the oil companies to find and produce energy, including synfuels. During the past several years, the Democrats, with Republican support, have fashioned a clear-cut energy policy alternative. This policy rejected the "laissez faire" approach that the Reagan Administration is now pursuing.

Major gaps

The following are the major gaps in the Administration's energy policy proposals:

Miscalculations of the effect of immediate decontrol of oil. The Administration's decontrol action is inflationary, unlikely to influence drilling rates (which already are at record levels), and it hurts lower-income people worse than those with high incomes.

Dismantling of synthetic fuels demonstration program. While the private sector will be able to get some help from the Synthetic Fuels Corporation, it is not certain that sound projects will be pursued. The private sector has shown itself to be unwilling to undertake the demonstration of most advanced synthetic fuels technologies because of the high risk involved.

Dismantling the conservation programs in the Energy Department. Vigorous energy conservation activities are a necessary part of our national energy policy. High prices force less use of oil, but these conservation programs find ways to use less fuel efficiently. High oil prices may cause a factory to run shorter hours, or cause an apartment house to be ten degrees colder than normal. Sound conservation practices can save a factory's fuel so that it can produce at full capacity, or allow an apartment house to heat with less fuel and no discomfort. Reliance on high prices to achieve conservation levies needless hardships on people.

Dismantling the alcohol fuels, biomass, and solar programs. These alternatives are essential building blocks in an energy policy aimed at cutting dependence on imported oil. Serious efforts to exploit these sources

of energy were mandated in the Energy Security Act and the Energy Tax Act of 1978. The Administration's cuts will delay progress towards widespread use of these energy sources.

Reliance on nuclear power. While it is likely that nuclear power will continue to be a necessary part of our energy supply base, the budget increases for nuclear research are not justified. If the same criteria applied to fossil, solar, and renewable energy research, development and demonstration were applied to the Department of Energy's nuclear activities, a cut of $550 million would result.

Lack of contingency planning for energy supply emergencies. Department of Energy officials believe, along with the President, that the free market can take care of most energy supply problems. Unfortunately, there is no free market in oil—the OPEC cartel controls the basic world price and export production levels—so the "free market" will produce giant price increases, gas lines, and spot shortages of heating oil, gasoline, and other fuels in case of an emergency. The Energy Department has not demonstrated an understanding of this potentially grave problem.

E. WASTE AND FRAUD VS. ENTITLEMENT CUTS

During the campaign, the President promised many times to achieve considerable reductions in government spending simply by eliminating waste and fraud. In his major economic speech on September 9, 1980, particularly in the accompanying fact sheet, Candidate Reagan promised to cut spending by 2% in FY 1981 and by 7% in FY 1985. He said his optimum goal would be a 3% cut in FY 1981, increasing to 10% in FY 1984. He promised to achieve these cuts "through a comprehensive assault on waste and inefficiency."

Certainly the legitimate recipient of school lunches or preventive health care or student loans must wonder what was wasteful or inefficient about those programs.

In that same speech, Candidate Reagan promised to focus on "waste, extravagance, fraud and abuse in federal programs."

Clearly, that is what the American people voted for. But are Urban Development Action Grants wasteful? Are child nutrition programs extravagant? Is job training or vocational education fraudulent? Is support of mass transit abusive?

Candidate Reagan assured the American people that his "strategy for growth does not require altering or taking back necessary entitlement programs already granted. . . ."

The fact is that the President's budget cuts are based on extensive alteration and cutbacks of entitlement programs.

Food stamps, Social Security benefits, Aid to Families with Dependent Children. Unemployment Insurance, Trade Adjustment Assistance—to name a few—are all entitlement programs which will be changed significantly by the President's recommendations.

POLLS ON REAGAN'S BUDGET CUTS

Recent public opinion polls reflect the dichotomy between the desire for reduced government spending and support for many of the programs Reagan proposes to cut. Too much government spending is most often identified as the major cause of inflation, but there is little public enhusiasm for deep cuts in many federal programs. Despite the general public commitment to reduced government spending and a balanced budget, voters are highly selective about where the cuts ought to be made.

When questioned about a wide array of general and specific areas of government spending, the public seems to favor cuts in only a few sectors, while keeping spending at current levels in many other programs. For example:

1. In a Harris poll released on February 19, cuts in the comprehensive employment and training program were favored by a margin of 62 to 31, but cuts in the school lunch program were opposed 63 to 35. Similarly, cuts in veterans' benefits were opposed 66 to 31, but cuts in general revenue sharing were favored by a margin of 61 to 30.

2. In a Washington Post/ABC poll released February 24, 22 percent said government spending for college loans should be increased, 48 percent said it should be left as is, and only 28 percent said it should be decreased.

3. In the Post/ABC poll, 60 percent felt that government spending on the program to develop synthetic fuels should be increased, while only 15 percent wanted it lowered. This is consistent with the results of a recent Newsweek poll, in which 58 percent of the respondents said that too little was being spent on synfuels development.

4. As to Reagan's proposed cuts in unemployment insurance benefits, the Post/ABC poll indicates that 23 percent want these benefits increased, 49 percent want them left alone and only 25 percent want them decreased.

5. No more than 15 percent of those responding to the Post/ABC poll favored cuts in government spending for education, health programs, defense or fighting crime.

6. A Gallup poll conducted for Newsweek released February 23, revealed the following opinions on whether the federal government is spending too much, too little or about the right amount on selected programs:

POLL ON GOVERNMENT SPENDING

[In percent]

	Too much	Too little	Right amount	Don't know
Highways	23	30	38	9
Food stamps	61	14	18	7
Defense	18	54	20	8
Synthetic fuels	15	58	13	14
Urban development	27	29	27	17
Arts and humanities	34	19	28	19
Child nutrition	13	40	34	13
Postal Service	46	9	35	10
Farm-price supports	27	34	23	16
Training and funding for public jobs	38	30	22	10

Newsweek, Feb. 23, 1981.

Mr. BAKER. Mr. President, I wish to express my deep gratitude to the distinguished minority leader for his remarks concerning me and other Members on this side of the aisle.

Let me say initially I want him to know I am grateful for many things that would not appear to the casual observer.

For instance, the first major decision in this battle was not made on the floor of the Senate but rather, I suspect, in the mind of the minority leader and in his caucus. That is whether there would be a major challenge on this technique of trying to implement the new President's program, that is to say through the reconciliation route under the Budget Act.

It was clearly decided that the challenge would not be made on that basis.

I doubt that that was widely noted, but it is important. It is a mark of responsibility, I believe, on the part of the minority, and most especially on the part of the minority leader, that no such challenge was made.

By the way, Mr. President, I wish to insert statements in respect to the precedential value of what we have done at the conclusion of my remarks. I ask unanimous consent to do so.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. BAKER. Those remarks will point out that I do not consider this a precedent. It was an extraordinary act to accommodate extraordinary circumstances. But more on that subject later.

Next, Mr. President, I want to say that I am grateful to the minority leader for his cooperation, his unfailing cooperation and significant cooperation, in making it possible for us to deal with a total of 40 amendments and points of order or waivers. That could not have been done in the relatively brief time in which the Senate dispatched this business without his cooperation.

Notwithstanding that we prevailed and the minority did not, I think the Senate is the winner because we have acted in a responsible way and in the best traditions, the best constructive traditions, of the adversary relationship between these two great national parties which populate this Chamber.

We have disagreements, Mr. President. That is in the essence of the adversary proceedings in which we engage in the formulation of public policy of this country. It would surprise no one to know that I disagree with the minority leader on the question of who lost—whether the veterans lost or school children lost or old people lost.

I say they did not lose; the country won, because we changed the direction of the public policy of this Nation for the first time in decades, and Members on this side of the aisle any many on the other side of the aisle were called on time after time after time for a total of 40 amendments and motions to stand shoulder to shoulder and vote against popular, universally attractive political proposals. The strengths and the fortitude of Senators in this Chamber to do difficult things, potentially politically damaging things, in order to bring about the changes that are necessary to retrieve this Nation from what I believe is the brink of national insolvency was little short of spectacular.

So I do not believe individual groups within the country lost. I believe the country won because we put ourselves on a new path, a new direction, a new set of values in the formulation of our future public policy.

Mr. President, none of this could have occurred without the truly extraordinary service of the Senator from New Mexico, Senator DOMENICI, the chairman of the Budget Committee. I am sure I do not disparage the service of any other Senator now or in the past when I say that in my experience here I have never seen a Senator grow as Senator DOMENICI has grown in his role as chairman of the Budget Committee. He is a brilliant young man. He has a magnificent future. He has contributed in a historic way at this moment to the future of this Nation.

Mr. President, he does not come to that role as the first occupant of that chair. It has been occupied previously by such great former colleagues as Senator Muskie, of Maine; by Senator HOLLINGS, of South Carolina. It may be that the greatest single accomplishment, the very essence of the budget process, is its evolu-

tion and development into a dedicated group, a bipartisan group, determined to perform for the best interests of the Senate, of the Congress, and of the country.

This could not have happened as well without the good example of the predecessors in office of Senator DOMENICI, but nor could it have happened, Mr. President, without that splendid level of cooperation between Senator HOLLINGS, the minority manager, the ranking member on the committee, and Senator DOMENICI. They are indeed an example for all of us to the business of putting aside partisan conflict and uniting in a single purpose for a single purpose.

Mr. President, I could go on and on in commending each Member of the Senate on both sides of the aisle. In my 15 years in the Senate, I have never seen this body act more responsibly, with greater care and caution, freer of passion and vindictiveness. It has truly been an extraordinary performance.

Mr. President, to briefly summarize my thoughts I do not wish to further extend an already tiring and laborious day. But I would be most remiss not to comment on the work the Senate has just completed.

And any comments in that regard must begin with a recognition of the outstanding leadership of the chairman of the Budget Committee, the Senator from New Mexico (Mr. DOMENICI), and the ranking member of that committee, the Senator from South Carolina (Mr. HOLLINGS). The mere fact that the Senate has completed this no less than monumental effort in only 6 days of floor consideration and but a few additional days of committee action is testimony to the statesmanship, the patience, and the skillful expertise of our distinguished friends and colleagues from New Mexico and South Carolina. On behalf of not only myself, but I venture to say as well on behalf of President Reagan and the American people, I commend and thank Senator DOMENICI and Senator HOLLINGS.

This is truly a most historic moment in the course of our Republic—historic not only because we are at long last implementing much-needed scrutiny and accountability to the manner in which the Federal Government spends the public's moneys, but historic as well because this Senate has clearly evidenced that it can, as an institution, respond to a national crisis with thoughtful and effective action.

I submit, Mr. President, that the pattern of Federal expenditures for roughly the past five decades has been building steadily to just that end—the national crisis of a bankrupt nation. We have not averted that crisis, to be sure. But, we have finally taken a most significant step in that direction. We have recognized that the Federal Government cannot and must not be the arbiter of every governmental endeavor. We have recognized that the Federal Government is no less bound to economy and efficiency than any other level of government, or any American family, for that matter.

There have been a great many amendments offered to this budget resolution since we began our deliberations a week ago, amendments seeking to restore funding for the various programs reduced by the Budget Committee in accordance with President Reagan's proposals. Each of the amendments, I am sure, was offered with the best of intentions toward helping various classifications and groups of our citizenry.

While I can only concur in the goals of the amendments, I would suggest that those goals can be attained more readily and permanently through the course of fiscal responsibility and stability as reflected in the resolution as it now reads. To that end, I want to express my sincere appreciation to my 52 colleagues for standing in virtual unanimity on each question posed.

Finally, Mr. President, I spoke at the outset of my remarks about the work the Senate has just completed. Indeed it is a marvelous achievement. But in reality, we have just begun our work. Much remains to be done. There are even more difficult decisions awaiting us. But I am confident, perhaps as never before, that we can and will make those difficult decisions of the future just as we have made the difficult decisions this last week.

EXHIBIT 1

THE RECONCILIATION PROCESS

The reconciliation process we have utilized to consider the Administration spending proposals is the best procedural mechanism which could have been advanced for that purpose. It has enabled us to view spending reductions in a comprehensive and orderly arrangement. It has permitted us to consider the necessary budget cuts and to establish priorities for those cuts within the President's economic program.

At the same time, Mr. President, use of this process has highlighted several difficult procedural issues. Two of these questions concern out-year reconciliation and the relationship between reconciliation and program authorization.

Although I appreciate the problems which have been discussed, I am convinced that in each instance the Budget Committee acted within its rights under the Budget Act. The Committee responded to extreme economic circumstances through an extraordinary legislative vehicle. The fact that they did so consistent with the purposes and letter of the Budget Act does not mean that these procedures should be routinely employed. I do not necessarily regard this resolution as a precedent for future deliberations taken pursuant to the Act. Furthermore, the Act itself may need clarification. The Budget Act has not undergone change since it became law in 1974. It may be time to review the Act in light of its procedural uncertainties and to propose amendments as the need may arise.

I suggest, Mr. President, that this matter deserves serious examination. The budget process can only function well if there is widespread support for its objectives and procedures. That support is eroded by fundamental procedural ambiguities such as have arisen in relation to this resolution, and bringing clarity and precision to the Budget Act will serve the Senate and its committee structure well.

HONORING JAMES S. BRADY AND EXPRESSING THE DESIRE OF THE SENATE FOR HIS SPEEDY RECOVERY

The PRESIDING OFFICER. The Senator from Delaware.

Mr. ROTH. Mr. President, I send a resolution to the desk on behalf of myself, Mr. BAKER, Mr. DOLE, Mr. MATTINGLY, and Mr. BIDEN expressing the concern of the Senate for Mr. James S. Brady and his wife and ask for its immediate consideration.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The resolution will be stated by title.

The legislative clerk read as follows:

A resolution (S. Res. 108) to honor James S. Brady and to express the desire of the Senate for his speedy recovery.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

Mr. ROTH. Mr. President, last Monday, as we all know, Jim Brady was struck down by a bullet fired at the President of the United States. Since then, Jim has made what can only be described as miraculous progress. I think all of us in this Chamber, the many people Jim knows throughout the country, and even millions who have never had the pleasure to meet him, have shared the joy as he battles back from his terrible wound.

My good friend Jim Brady served as press secretary from 1977 to 1979, where he was one of the brightest, most energetic, and creative staff members that I have ever come in contact with during my 14 years on Capitol Hill. Jim was always able to take complex ideas, such as Roth-Kemp, and portray them in a highly understandable and effective manner. Whether it was passing out cigars at the birth of "Son of Roth-Kemp," or using pencils with erasers at both ends to dramatize the efforts of a group of Senators to cut the budget, Jim always made his point.

Jim left my office to join the Presidential campaign of Governor John Connally. When that effort ended, the Reagan for President team, always alert for good people even if they were with the opposition, grabbed Jim and made him a key adviser to then-Governor Reagan.

He has approached his responsibilities as Press Secretary to the President with skill and wit. It is no coincidence that the press and the new Reagan administration have gotten off to such a good start. Jim Brady has made it happen.

Yesterday, the Washington Post, in an editorial said that Jim was "a real man, a whole man, and a fine man." I could not have said it better, and I ask unanimous consent that the entire editorial be placed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. ROTH. Mr. President, I also want to pay my respects to Jim's wife, Sarah.

I know that in his hour of need, Sarah has been a tower of strength to Jim. Like Jim, she is a warm, wonderful person who has faced this horrible ordeal with such bravery and quiet optimism for Jim's recovery.

Few people live life with such vigor, enthusiasm, and good humor as Jim Brady. I know all of my colleagues join

me and my wife, Jane, in praying for the day when Jim will once again be able to be with us. As a public servant, and as a man, Jim Brady is one of a kind. We need him, and we want him back just as soon as possible.

EXHIBIT 1

A WORD ABOUT JIM BRADY

Ronald Reagan's press relations have been among the best that we can remember of any president. This was not a foregone conclusion, and it surely has not been because his ideology was secretly shared by the Washington media or because the media had some special affinity with him over the years. And it also has not been because of all that "management" and "manipulation" the people in our business always fear and often countenance. Rather, it has been owing in large part to Mr. Reagan's own easy affability as a campaigner and as a president and also, in large part, to that affability as it has been reflected in James S. Brady's personality and enterprise.

Mr. Brady has held, in many ways, the most visible (and thankless) job in Washington. The man better known as Jim, and even better known yet by the nickname he really loves—"the Bear"—came equipped with all the qualifications to do this impossible job: humor, patience, wit, loyalty to the president and, fully consistent with that, an inclination as well as a capacity to get information to his restless, boisterous and not always very polite media charges. This, as precedent has shown, is not a job for the uptight or the grudge-holder or the secretive or the unforgiving; and Jim Brady has been the opposite of all these things.

As Mr. Brady lies wounded in George Washington Hospital, our gratification at his progress only partially mitigates our rage at the cruelty of his fate. A great man with a joke, a reader of serious (non-Washington) books and the inventor of a drink called "Captain Bear's Nightie Night" and of a corrosive meal known as "Goat Gap Texas Chili," Mr. Brady is clearly a fellow who has learned to enjoy a life apart from the grim, driven ways of high politics in this city. That, paradoxically, can mean the difference between someone who is good at one of these high-powered White House jobs and someone who is not. Mr. Brady has values and interests and joys outside and independent of the mad, workaday duties of serving as a president's press secretary. His capacity to convey these, and to reach back to them under pressure, clearly have lent him a special credibility in his job. The president's press aide is a real man, a whole man and a fine man. What has happened to him is an unspeakable outrage.

JIM BRADY: PUBLIC SERVANT AND FRIEND

Mr. DOLE. Mr. President, the resolution before us expresses the Senate's sincere appreciation for Jim Brady's dedicated service to his country and its deepest concern for his family during this very difficult and tragic time. As daily reports of Jim's improved condition continue to come forth, our prayers and thoughts remain with him.

To many, James Brady is only a name—to the Senator from Kansas, James Brady is a friend. His career in public life has been an exemplary one and when he was named by President Reagan to be his press secretary, it seemed a fitting tribute to Jim's dedicated public life. Jim has served the Congress, the executive branch at HUD, DOD, OMB, candidates, and now the "chairman of the board."

There is more, however, to Jim Brady than an exemplary career in public service. There is Jim's family life—far more important to him than power, prestige, or prominence. Jim is husband to Sarah and father to Scott and Missy. Jim's outside interests vary as greatly as his professional abilities, and I remember reading an article just last week telling of his avocation as chef extraordinaire.

In his private as well as his public life, Jim has a flare and competence matched by few. Only 2 months on the job has shown he handles pressure and stressful situations with elan and ease—traits which will serve him well on his road to full recovery.

In closing, I only say that my prayers and Elizabeth's are with you and your family—get well soon, Jim.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 108) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

Whereas, James S. Brady, the Press Secretary to the President, was seriously injured on March 30, 1981, as the result of a gunshot wound inflicted on him during the course of an attempt on the life of the President by an assassin;

Whereas, Mr. Brady is in serious condition as the result of such gunshot wound; and

Whereas, Mr. Brady sustained his injury while performing his duties as Press Secretary to the President and serving his country: Now, therefore, be it

Resolved, That the Senate of the United States commends James S. Brady for his courage and for contributions and service to his country and prays for his speedy recovery and for his family in this time of uncertainty and apprehension.

SEC. 2. The Secretary of the Senate shall transmit a copy of this resolution to James S. Brady and his family.

EXTENSION OF MORNING BUSINESS

The PRESIDING OFFICER. The Chair must announce the period for morning business has expired.

Mr. BAKER. Mr. President, I ask unanimous consent that the time be extended for 10 more minutes under the same conditions.

The PRESIDING OFFICER. Without objection, it is so ordered.

DR. CHESTER CROCKER: A GOOD CHOICE

Mr. HAYAKAWA. Mr. President, on Monday, April 6, the Senate Foreign Relations Committee will hold hearings on the nomination of Dr. Chester Crocker to be Assistant Secretary of State for African Affairs. I am extremely impressed with his qualifications and feel he is an excellent choice for this position.

Dr. Crocker has been associated with Africa for two decades as a journalist, academician and as a staff officer in the National Security Council. He has been active in the Republican Party and chaired the Africa Advisory Committee for President Reagan. Dr. Crocker was instrumental in formulating the Republican Party platform on Africa.

As a student of history, he has developed that sense of history which is so important in understanding global nuances. In an article which appeared in the Washington Quarterly, "African Policy in the 1980's," Dr. Crocker identifies the problems and the issues facing that continent. His understanding of Africa is evidenced by the fact that he does not oversimplify the problems, yet he proposes concrete solutions.

Mr. President, I urge my colleagues to read this article and ask unanimous consent that it be printed in the CONGRESSIONAL RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

AFRICAN POLICY IN THE 1980s

(By Chester A. Crocker)

Both the Carter administration and its predecessor have learned about Africa the hard way—by trial and error. Leaving aside their many differences, each reversed its initial approach in important respects before leaving office. It ought to be possible after 20 years experience with independent African states under five presidents to draw some conclusions for the coming decade.

AN UNCERTAIN DOMESTIC BASE

Within the government, there is a limited pool of expertise on Africa and a woefully inadequate institutional memory. Much of what exists suffers from the classic weakness of regional specialists whose love affair with "their" region clouds judgment. Few regional experts on Africa have a serious interest in the conduct of foreign policy, in part because until recently Africa has not often attracted top talent in the bureaucracy. Prestige and status were higher elsewhere. Two results followed: When African issues became important, policy initiative rapidly shifted up the hierarchy beyond the literate level. If senior policy people ignore or distrust their regional advisors, actions will be based on stereotypes and gut instincts; they will tend to be reactive, sporadic, and lacking in follow-through. Yet it can be downright dangerous when African specialists are given the opportunity to make policy precisely because they are unaccustomed to it and uncomfortable with the necessity for choice.

Secondly, there are few solid bases of public interest and support for African policy in the political center outside the government. The mainstream of the political process at the mercy of current headlines and newscasts, on the one hand, and the polarizing pressures of fringe groups on the other. On a generous counting, there may be one dozen congressional offices where eyes do not glaze over at the very mention of African issues. Yet legislators are repeatedly asked to take positions on these matters—a situation that fosters the search for one-line answers. It may be less than encouraging to know that the Africanist professoriate is being tapped more than in the past by government agencies. Only a distinct minority are comfortable conceptualizing the U.S. national interest except in terms that are deemed identical to "Africa's own interest."

Growing corporate attention to African opportunities could have a steadying influence on the policy process, but the impact is limited in practice. This can be explained in part by doubt among some regional experts about whether foreign capitalism is good for the Third World. Even those who favor a salient role for the multinational corporation in U.S.-Africa policy, such as former Ambassador Andrew Young, find that the wish does not quickly translate into effective and sustained policies. Africa itself poses a formidable list of obstacles to heightened corporate activity—instability, narrow national markets, corruption (and U.S. laws on illicit payments), and alien legal and financial structures. Hence it is not surprising that American corporations have diverse and widely varying views on what Washington should be doing in Africa. Some want our officials to do battle with entrenched European interests in a struggle for markets and

projects. Others would prefer the U.S. to be a minor commercial power with no political or strategic objectives; this theory holds that what is good for local African governments is good for U.S. business there. Almost no one is articulating the national or Western economic interests in Africa and relating it in a coherent way to our other regional interests.

A DEARTH OF POLICY RESOURCES

The argument for a more effective and durable African policy does not rest on the claim that U.S. African interests are eclipsing our other interests; it rests instead on the premise that our African interests are growing more rapidly than our influence—that the gap between official rhetoric and performance has grown dangerously. Washington has more things to do than ever before in the region: seeking peaceful change in southern Africa, forestalling communist influence with individual regimes, seeking access to selected military facilities, expanding the scope for human rights observance, supporting regional stability as a basis for development, obtaining increased access to petroleum and nonfuel minerals, and correcting a mushrooming imbalance of trade in the region. Yet the power of U.S. diplomacy is stagnant or declining. The resources behind American policy have not kept pace with the expansion of American promises and needs.

The resource problem will continue for as long as African policymakers, Congress, the media, and interest groups remain confused or in basic disagreement about U.S. regional interests. When officials remain reluctant to admit that Africa has become (and is inevitably) an arena of East-West rivalry, it is not surprising that they are ambivalent about maintaining security relationships with individual states. This is the mentality that sees future Vietnams or Irans whenever an arms supply relationship with a threatened government is considered. The proper role of U.S. naval presence in African waters will remain unsettled so long as there is more misunderstanding and suspicion about our Navy's motives than there is about Soviet aims in the region. American security-related programs such as arms-sales credits and military training are a minor fraction of all such activity in Africa, while our African efforts in the security field account for less than 10 percent of worldwide U.S. programs.

Carter administration officials have finally admitted that their programmatic resources are inadequate, and economic assistance levels are now rising somewhat. But if our purpose is to advance American interests and influence recipient government policies, U.S. diplomats are equipped with precisely the wrong kinds of aid policies. U.S. programs in Africa reflect a confusing range of bureaucratic guidelines, congressional restrictions, quixotic campaigns, and worthy humanitarian objectives. But a review of these priorities in foreign assistance policy suggests that no real decisions about priorities have been made. The only real decision has been the negative one of not utilizing assistance programs for any coherent foreign policy purpose. The heavy emphasis placed on food aid and assistance aimed at meeting the current needs of the rural poor ("basic human needs") almost rules out using aid as a total for the promotion of any U.S. interest—either developmental or political. American diplomats are to a large extent disarmed since they lack effective and flexible policy tools and are obliged to operate as though their job was to run a popularity contest from the highest moral ground available. Some of our proven friends in the region do not qualify for what Washington is offering; others are just not interested. Though the portion may be increasing slowly, less than 20 percent of U.S. aid to sub-Saharan Africa offers Washington any degree of flexibility to further bilateral relations interests with individual countries.

Most U.S. programs in Africa are spread too thin and are too small in scale to serve as a backdrop for an active regional diplomacy, no matter what the substantive content of that diplomacy may be. In 1979, U.S. bilateral aid accounted for only 7 percent of all official development assistance to black Africa: if the U.S. contribution to multilateral agencies is included, the total American share of African aid receipts rises to 11.6 percent. Furthermore, American assistance programs are widely dispersed; only nine of the 51 sovereign entities on the continent and nearby island nations did not receive their modest slice of U.S. assistance in fiscal year 1979, four of them being ineligible as OPEC (Organization of Petroleum Exporting Countries) members.

Even assuming that our only real interest is to promote African economic development—a rather bizarre assumption—the relationship between means and ends in U.S. policy remains fuzzy. A relatively large chunk of aid is sent routinely to socialist Tanzania, one of the world's most heavily assisted yet least developing countries. Meanwhile, the capitalist and pro-Western success story of the Ivory Coast is rewarded with virtually nothing from Washington. The amount of U.S. assistance that goes to countries with the lowest levels of gross domestic product (GDP) per capita is about the same as that provided for relatively wealthy ones. To take another example, last year only 29 percent of total U.S. aid went to countries growing faster than 5 percent annually—about the same proportion as went to those where real output is actually declining. Even sworn opponents would have a hard time arguing that Washington has clear preferences and plans for African development.

There are, of course, several forms of policy resources that can support U.S.-African diplomacy. The personal time and energy of senior officials and the president himself is one example. Washington's overall global prestige and demonstrated political will are obviously a central resource in policymaking. So, too, is the potential—if properly managed—for Washington to capitalize on the strengths and the pluralism of our open and multiracial society. The black American experience and culture, when projected into foreign policy, provide a basis for communication and nonracist symbolism that no other major power can match.

To the extent that these intangible ingredients exist and are coherently organized, Washington has the potential to compensate for its meager stock of tangible resources in African policy. In addition, we are lucky to have Western allies with African policies of their own. American regional strategy should take cognizance that our allies' interests and roles in Africa may be more important to them than ours are to us. But it is not possible to return to the comfortable phrases of the Lyndon Johnson-Dean Rusk era when the only abiding reality in U.S. policy was to push the Europeans as far in front of us as possible. It is simple self-delusion to argue in the African context of the 1980s that the only burdens worth bearing are those that are currently borne by our friends.

It is not just the Johnson-Rusk tradition that fails to measure up. The Cyrus Vance-Andrew Young litany of "Africa for the Africans" is a state of mind, not a policy. For much of the past few years, Washington has in fact been trying to conduct an ambitious regional policy on the cheap—side-stepping tough choices, avoiding exposure and redefining interests that get challenged, seeking the high ground first and last, manipulating atmospherics to suggest an identity of American and African interests, and pretending that the very existence of the West's private sector could serve as a surrogate for a coherent strategy. By the same token, there can be no return to the condescending and reactive spasms of interest (interspersed with neglect) of the Nixon-Ford era. The United States paid a price for Angola not only because there was no domestic base for an interventionist policy, but also because there was no diplomatic base in Africa for one.

In the coming decade, policymakers will need to develop a more careful calculation of the means-ends relationship in African policy. At the same time, the case for an activist regional policy must be based more explicitly on clearly defined American interests that can be understood and supported at home.

THE ECONOMIC STAKE

At first glance, Africa presents a confusing and seemingly contradictory economic picture to the investor or policymaker from overseas. On the negative side, the continent contains two-thirds of the world's poorest countries. Caught up in the triple nexus of soaring population growth, declining agricultural output, and rising energy prices, many African countries are going backwards by any realistic economic measure. Even nominal gross domestic product per capita (which ignores inflation) has declined in over a dozen countries during the 1970s. Per capita food production is estimated to be declining by 1.4 percent annually. Energy costs encourage people to burn whatever they can find for fuel; the effect of this practice, when combined with the pressure of animals on the land, is to help Africa's deserts spread (52 percent of the land is either desert or threatened by desertification). Inadequate transport systems greatly magnify the capital and energy costs of development, while also making it difficult even for food surplus countries to feed themselves. Population and urbanization growth rates are among the world's highest, while the region's literacy rate hovers around 20 percent.

Public policies tend in the main to support urban elites and the patronage requirements of insecure governments at the expense of other groups and goals. For a growing list of countries, the external debt service burden has reached crisis proportions, aggravating relations with creditor governments and firms. Governments that try to address the problem by economic self-discipline tend to be rewarded by riots and coups. Foreign investors need nerves of steel, or the prospect of splendid near-term returns, to enter such a climate. Trade prospects are hindered by the narrowness of national economies, the embryonic status of mass consumer markets, and wild fluctuations in export earnings that make imports possible.

But there is another side to this grim portrait that makes it unwise to ignore the African economy. Gross regional statistics mask almost more than they reveal of the substantial intraregional variations in economic performance. Some African countries have established solid records for sustained growth and competent economic management: Botswana, Cameroon, Kenya, Ivory Coast, Nigeria, South Africa, Gabon, and Algeria. Others demonstrate substantial potential because of their resource endowments once domestic or regional political woes can be overcome: Angola, Zimbabwe, Zaire, Zambai, and Sudan.

American performance in African export markets has been poor. It is not keeping pace with the existing growth of African markets, let alone with African market potential. In 1979, some 60 percent of U.S. exports to sub-Saharan Africa remained concentrated in South Africa and Nigeria; while these are admittedly the two dominant economies in the region, none of the other 45 economies of sub-Saharan Africa purchased more than $130 million of U.S. goods and technology. At a time of growing economic competition among the industrial democracies, black Africa's share of U.S. exports has fallen to a lowly 2.3 percent; by the same token, the

U.S. share of the African market has also fallen from 11.6 percent to 9 percent in the years 1970–77. For U.S. businesses, the sub-Saharan African market is no bigger than Australia's.

It is decidedly in the U.S. interest that over 75 percent of Africa's trade is with the Western industrial democracies. Little would be gained by trying to displace our European allies from their role and stake in Africa in order to remedy the lackluster American export record. The thrust of policy should be directed toward promoting development and an expanded U.S. share of a growing African market. It must be recognized, however, that the low level of U.S. direct investment will continue to hamper exports in the late 1970s a meager 3.2 percent of worldwide U.S. foreign direct investment was in Africa—2.4 percent if North Africa is excluded and a mere 1.2 percent if both North Africa and South Africa are excluded. This provides an extraordinary slender base for an American export offensive. Interestingly, mining and smelting ranked only third—after the petroleum and manufacturing sectors—as a magnet for American investors, despite growing U.S. dependence on imported nonfuel minerals.

There are important reasons why officials, exporters, and investors should be paying more attention to African opportunities. First, there is a growing trade imbalance with the region that now includes our second, fourth, and fifth largest sources of imported petroleum products. While U.S. exports have lagged during the 1970s, sub-Saharan Africa's share of U.S. imports has risen from 2.5 percent to 6.5 percent during the 1970–78 period. Both the volumes and the prices of our oil and mineral imports will continue to grow. In 1979 the overall U.S. trade deficit with Africa approached $20 billion, nearly double the deficit with Japan and over 50 percent of the worldwide deficit. There is little evidence yet of any countervailing trends in exports or investment earnings that might offset the widening gap.

A second reason for concern is that the U.S. private sector constitutes an important potential adjunct of regional policy in Africa. Government programs and activities, as previously noted, are not an adequate basis for U.S. influence. Washington must stimulate greater corporate involvement in Africa precisely because Washington itself has so little to offer. All too often we appear as an ephemeral power whose policies rest on rhetoric and rigidly bureaucratic programs. Greater U.S. trade and investment will mean more substantial links with African countries, more mutuality of interest, and greater influence in encouraging both development and political objectives.

The third reason for concern over the U.S. economic position in Africa is the growing American and Western dependence on its raw materials. In the 1980s, the United States will be substantially dependent on imports to meet its need for many of the major nonfuel minerals used in basic engineering, chemical, and electronic industries that are central to both the civilian economy and defense production. The situation is even more dramatic for our allies and competitors in Europe and Asia; these economies could not survive in recognizable form without mineral imports, many of them from Africa. Interrupted access, stagnant output, or cartel-like price management would have lesser but still substantial consequences.

Most African specialists, in and out of government, are content to note that the raw materials of the continent make "their region" more important. Little thought is given to the potential for an intra-allied resource scramble, much of which could occur in Africa. Still less thought is given to the conditions for expanding the development of the region's petroleum and mineral reserves, or to the global political implications of Western dependence on nonoil minerals. There is nothing obscure about the facts of African endowments of fuel and nonfuel minerals. The problem is that they are seldom aggregated in ways meaningful to policy; resource geologists and regional political analysts talk past each other. As a result, it would be an exaggeration to speak of the existence of a U.S. policy of any sort on strategic mineral imports. This must change in the 1980s.

The African mineral most widely recognized in the United States is oil. Nigeria, Libya, and Algeria together account of 40–45 percent of U.S. imports from OPEC members (the figure would be about 35 percent if non-OPEC imports were included). Africa accounts for about 20 percent of European Economic Community (EEC) crude imports. The list of lesser African producers—Egypt, Gabon, Angola, Tunisia, Congo, and Cameroon—is steadily growing, and it is possible that the 1980s will witness the emergence of another one or two major African producers. The continent is also the leading region in the supply of liquid natural gas (LNG) to world markets. The striking thing about African petroleum development is not its absolute scale: the continent currently produces only about 10 percent of Free World output of crude, and it accounts for an equivalent share of proven reserves. The significance of African oil lies in the fact that most of it is available for export because the region itself consumes a mere 2 percent of world consumption. In addition, as a relatively underexplored region, Africa has greater potential for oil discovery than most other areas. From the U.S. standpoint, there are additional advantages to African oil since it is relatively nearby and its quality is well suited to the way our refineries are geared to maximize output of gasoline.

Even so, Washington is not specifically dependent on Nigerian or Libyan oil. Even though they have location and quality advantages, it would be a matter of temporary inconvenience to switch sources, and only Libya of the African producers has the fiscal flexibility to withhold production from the market on a substantial scale. The U.S. interest in African oil is thus basically an integral part of our worldwide interest in maximizing the supplies that come to market. In addition, for balance of payments reasons, it is in the U.S. interest that American oil firms play their proper role in African oil development.

The case of Africa's other fuel minerals—coal and uranium—is somewhat different. The continent's proven and economically recoverable coal reserves are some 5 percent of the world's total, but nearly all of them are concentrated in South Africa. Under very conservative estimates of its reserves, South Africa ranks sixth in the world in hard coal reserves, outstripping such countries as Germany, Poland, and Australia. It is already a major source of steam coal imports for several European countries; by the mid-1980s South Africa is expected to be the third largest steam coal exporter after Australia and Poland. By itself, the Republic could meet half of the projected European steam coal deficit in the mid-1980s; alternatively, it could meet Japan's rapidly rising deficit several times over. The net U.S. interest in this trade involves a complex tradeoff between domestic energy and environmental factors, balance of payments concerns, and the energy security of our alliances.

The African continent possesses in excess of 25 percent of noncommunist uranium reserves (at prices up to $50/lb.), and it accounts in 1980 for about one-third of noncommunist output. Theoretically, many African countries are potential producers, but the region's actual share of future supplies will depend on worldwide demand and decisions taken by the Canadian and Australian authorities. At present, South Africa and Namibia jointly (no breakdown is available) account for some 61 percent of Africa's output, and they represent the second larest source of exports in the noncommunist world (after the United States). Niger's production is rising rapidly, and both South Africa and Namibia could probably double theirs. Africa's contribution to world uranium supplies (exports) is already three times as large as its share of world oil production, and the dependence of European and Asian countries on African supplies may grow further.

TABLE 1.—AFRICAN RESERVES AND EXPORTS, AND WESTERN IMPORT DEPENDENCE

	African percent of noncommunist reserves	African percent of noncommunist exports	U.S. import as percent of consumption [1]	EEC import as percent of consumption
Antimony	18	36	43	95
Asbestos	9	29	85	97
Bauxite	30	(2)	93	74
Chrome	98	51	90	100
Columbium	7	22	100	100
Cobalt	61	86	90	100
Copper	15	33	13	81
Gold	61	83	56	(3)
Iron ore	1	13	28	79
Manganese	79	61	98	100
Phosphate rock	40	55		99
Platinum group	98	85	89	100
Vanadium	92	88	25	99

[1] U.S. figures are for net import reliance and reflect domestic recycling.

Sources: Africa's Role in World Mineral Supply, 1974–77 (Special Studies Division, Minerals Bureau, Department of Mines of Republic of South Africa, June 1978); Phillip Crowson, Non-Fuel Minerals and Foreign Policy (London: Royal Institute of International Affairs, 1977); U.S. Bureau of Mines. Commodity Data Summaries, 1980. Base years range from 1976–77.

When it comes to nonfuel minerals, African output is frequently a major influence on world markets and African reserves a key part of potential world supplies. For some minerals the Soviet Union is the only alternative source of substantial exports. Since it is a relatively underexplored continent, Africa's mineral importance appears likely to grow. But this assumes a climate of confidence and stability that permits long lead-time projects (e.g., 10 years) to be successfully planned, financed, and brought into operation. In the meantime, the West's continued supply of needed African minerals is potentially vulnerable at several points—

ranging from ocean transport routes to rail and port congestion or disruption, labor disputes, a shortage of skilled managerial personnel, inadequate maintenance, or even the conscious withholding of supplies for political or price reasons.

The U.S. imports a steadily growing share of its requirements in minerals. African exports play an important role in meeting U.S. imports of: antimony (South Africa), bauxite (Guinea), chrome ore and ferrochrome (South Africa, Zimbabwe), cobalt (Zaire, Zambia, Morocco), industrial diamonds (South Africa, Zaire), gold (South Africa), manganese and ferromanganese (Gabon, South Africa), mercury (Algeria), palladium (South Africa), platinum (South Africa), chromium (Zaire), and vanadium (South Africa). The dependence of Europe and Japan on imports of these commodities from Africa is generally higher, and it includes such additional minerals as copper (Zaire, Zambia, South Africa), tin (Zaire, Nigeria, Rwanda, South Africa), iron ore (Liberia, Mauritania), phosphates (Morocco, Tunisia, Western Sahara, Togo, Senegal, South Africa), and asbestos (South Africa, Swaziland). In addition, African countries play an important role in the market for certain specialized minerals used in sensitive technologies (computers, telecommunications, avionics, electro- and fiber-optics, lasers, semiconductors) such as: beryllium (South Africa, Uganda), columbium (Nigeria, Zaire), germanium (Zaire, Namibia), and tantalum (Nigeria, Zaire). As the table suggests, there are a few areas of Western basic, chemical, electronic, and defense industries that are not affected by African production and mineral potential.

WHAT TO DO ABOUT IT

American officials habitually point out that the Soviets and their allies cannot offer what Africans need most: economic development. It is true that the Eastern bloc accounts for a pitiful 2 percent of all economic assistance to sub-Saharan Africa. But the American (and Western) comparative advantage only exists if we make use of it by coherently organizing the available economic and technological tools. Washington needs to stop thinking of African policy as a philanthropic venture and start defining U.S. interests in the economic relationship with Africa. Instead of trying to run rural welfare programs that bypass sovereign governments, the United States should lay aside such echoes of the white man's burden and press ahead with more mundane tasks: export promotion programs, investment incentives for business in African mining development, targeting aid toward regional infrastructure projects, and exploring the concept of industrial free zones with African leaders. The private sector needs to be consciously incorporated in a new approach. U.S. business cannot be held responsible for conducting foreign policy, but the time has come for Washington to recognize more clearly that what it does—or fails to do—affects overseas business activity and the nation's economic health. It is primarily the private sector that has the skills, technology, and financial power to advance the mutual interests of Africans and Americans.

A region that accounts for half the U.S. trade deficit and a major share of Western energy and mineral supplies deserves to be taken seriously. New attitudes, programs, and laws are needed. Today, Washington is more adept at export restrictions than export promotion; and African markets get exactly 2 percent of the meager Commerce Department export promotion funding. The Overseas Private Investment Corporation (OPIC) seeks to reduce through insurance the risk factors facing investors in developing countries, but this remains a largely passive undertaking. Washington continues to adhere to the stance that it will "neither promote nor discourage" overseas investment. There is little evidence of positive coordination among relevant economic agencies (AID, Ex-Im Bank, OPIC, Commerce, Treasury, Energy, Interior, and State itself) concerning African economic interests. American antitrust laws and other legislative hurdles make it downright difficult for the executive branch to orchestrate an economic program for Africa.

Without an energy policy, a minerals policy, or an industrial policy it will not be easy to develop a more effective African strategy. But at least we ought to know what not to do. First, Washington must resist simple-minded appeals to do battle with the Europeans and the Japanese for African markets and raw materials. Such an approach will fail—because their stake and their reach are superior to ours—and it plays into the hands of America's global adversary. But Washington should also stop expecting U.S. business to operate at a competitive disadvantage. This means improved commercial advising and intelligence, a strengthened commercial diplomacy backed at senior political levels, and specific policy shifts in export promotion, export finance, investment insurance, and taxation of foreign income.

Second, it is not acceptable to proclaim our growing need for Zairean cobalt, South African chrome, or Nigerian oil and leave it at that. African states do not need U.S. encouragement to flex their resource muscles, and we do ourselves no favors by groveling in our own vulnerabilities. The long-term goal is to reduce the potential for resource scrambles, market manipulation, and overreliance on any single source. Many of the remedies are, of course, domestic. In Africa, the basic objective should be to accelerate the development of oil and mineral reserves, if possible through a low-key but concerted effort with our major allies. We need to avoid becoming isolated outside the Giscardian triangle envisioned to include Europeans, Arabs, and Africans united against "superpower mismanagement" of North-South relations. Yet Washington also needs to strengthen allied resistance to political intimidation that could result from the resource vulnerability of European and Asian market economies.

Third, American policy elites should restrain their inclination to conceive of Africa in terms of ideological abstractions and political slogans. Profitable business can be done with avowedly Marxist regimes provided that they are not essentially Soviet puppets—in which case there may be overriding arguments for limiting official economic ties. Profitable business can also be done in both black Africa and white-ruled South Africa. As a matter of both common sense and political ethics, efforts to force Western enterprises and economies to choose between the two must be stoutly resisted. Given South Africa's enormous mineral resources and the close interlocking between the economies and mineral sectors of southern Africa, it is unlikely that the United States could carry either its allies or the neighboring black-ruled states with it in a policy of anti-South African trade and investment sanctions. This will be true unless the entire South African structure begins to disintegrate, in which event the point becomes moot.

In the absence of such a breakdown, would U.S. economic disengagement have any predictable effects at all in advancing the cause of nonviolent change and racial accommodation? Such a proposal represents a leap into the dark, based on the politically and morally unacceptable notion that whatever happens in South Africa without American involvement is going to be preferable to the situation if we stay. American and Western capitalism are on trial in many respects in Africa. For the American government to urge U.S. firms to plead nolo contendere in South Africa would represent a massive exercise in amoral defeatism.

DEFINING POLITICAL/STRATEGIC INTERESTS

The American view of the African environment is colored by a mix of laziness and ignorance, on the one hand, that finds it easier to superimpose familiar patterns than to explore for new ones; and, on the other hand, a set of relativist cliches that see Africa as different, unique, and comprehensible only "in African terms," and unaffected by the basic logic of international politics. These distortions explain the unproductive split of U.S. observers into "globalists" and "regionalists." The two schools have coexisted uneasily for years, their relative influence fluctuating with domestic moods and external events. Until mid-1979, the predominant Carter administration view has been "regionalist." All foreign conflicts were seen as potential Vietnams and all efforts to exercise U.S. muscle as either wrong or doomed. Cuban-style stabilization in Angola has been blessed, vetoes over U.S. policy have been handed out to Soviet/Cuban decision makers and guerrilla leaders, and Washington has adopted fence-sitting postures in places like Morocco. Though the "globalist" minority has raised its head intermittently, the dominant voice has argued that Soviet-Cuban adventurism in Africa is not a real problem: it can flourish only in conditions of chaos and power struggles where military instruments are decisive, and it will therefore be short-lived.

"Globalists," on the other hand, have been quick to spot future Angolas in the making each time a Soviet arms deal is announced, and equally quick to label groups and governments "Marxist" with the clear implication of direct Soviet influence or control. The presumption has been that African politics is almost infinitely malleable by determined outsiders and that, therefore, each Soviet move or Marxist slogan should be interpreted as a test of our manhood. Among many in Congress and the media the Rhodesian war has been portrayed largely in terms such as these.

Both groups profoundly misread African reality. As a distinguished American Africanist has argued, "there are no quick fixes for Africa's instability." The continent is in transition from a fragile postcolonial pattern of order to a future, undetermined one. African leaders face this process in an eclectic, experimental, but profoundly practical frame of mind. They care about results, and results have at least something to do with personal and political survival. Few African governments have the capacity to commit their societies irrevocably to any specific set of norms, relationships, or models. This indeterminate quality in African politics is best explained by the weakness and fluidity of cultural and political institutions.

Outsiders can operate successfully in the region only to the extent that they comprehend local power realities, and are capable of defining their interests (in markets, bases, human rights, or whatever) in terms that translate regionally. On the other hand, African leaders are well aware that external linkages and power balances can make a decisive difference in shaping their choices and influencing the process of change. Africans depend overwhelmingly on outside capital, imported skills and technology, and "borrowed" diplomatic and military power for the pursuit of their own goals. The natural instinct in African diplomacy is to obtain the maximum possible advantage from outside powers while safe-guarding as much autonomy as possible for local solutions and initiatives. It is widely recognized in Africa that the communist powers have little to offer in the development field, but it is also clearly appreciated that local power realities are influenced by force, physical coercion, and political intimidation. One chooses from those external linkages that are, in fact, available.

The future of Africa will be most influenced by those who participate with Africans in a host of day-to-day, often unglamorous activities that may appear to have no immediate payoff. Inevitably, outsiders will be asked to support regimes and policies that, on occasion, run counter to their own values and models. Thus, the difficult thing about conducting an effective regional policy is neither getting involved nor disengaging. The challenge is to acquire and retain a level of influence commensurate with one's interests. It is harder to stay in Africa than it is to go in or get out.

Americans find it hard to accept the limits on our real power to bring about political change in other countries; it is easier to proclaim an ambitous agenda and then dissociate ourselves if unpalatable compromises appear to be necessary. Three of Africa's most despicable regimes met their demise during 1979—not, as we are tempted to believe, because of growing acceptance of U.S. human rights concepts. Change occurred in Macias' Equatorial Guinea, Bokassa's Central African Empire, the Amin's Uganda because of (1) a bloody power grab by a political rival and former collaborator, (2) a case study in French military intervention, and (3) a military adventure by Tanzania's eversanctimonious leader, Julius Nyerere, who nonetheless owes his own post to efficient action by the British Royal Marines back in 1964.

Americans have no historical mandate to be a policeman in Africa, but neither does anybody else. Since the United States and Africa exist in a competitive world, and since some of our regional interests are becoming important, it is clearly unwise to rule out the military instruments of foreign policy. Whether the goal is to promote human rights or to counter Soviet-Cuban destabilization efforts, American restraint and the denial of support to friends will only bolster the local parties that are best organized and armed.

Yet relatively few situations lend themselves to direct, physical action. An effective response to Soviet-Cuban behavior in Africa will include many elements aimed at demonstrating that Washington knows what its interests are and how to back them in relevant ways. In practice, this means devoting significant resources to the objectives of development, greater stability, and an expanded capacity on the part of Africans to govern and administer. Economic assistance, manpower development, arms sales, and military training are important programs, but they are not enough. African policy must also draw from the state of the global political balance and from U.S. ability to devise worldwide energy and minerals policies. Finally, new policy concepts are needed to bring to bear in Africa the organizational, administrative, and entrepreneurial talents and experience—in American unions, companies, parties, universities, and interest groups—that make a plural and self-reliant society possible.

SOUTHERN AFRICAN CHOICES

For the first time since the Portuguese revolution of 1974, the shape of things to come in southern Africa is at least dimly discernible. It is a little early to proclaim a miracle in Zimbabwe (Rhodesia), but British diplomatic virtuosity in bringing about an internationally recognized government and an end to the war means a potential start toward the restabilization of a strife-torn region. The victory by a militant and Marxist guerrilla leader, Robert Mugabe, has led some to question whether this was quite the outcome that Margaret Thatcher had in mind when she grasped the Rhodesian nettle a year ago. No one yet knows whether Mugabe's pragmatism in the first half of 1980 can last, or whether he can impose himself and his views for the long pull.

But there is a larger significance to the Zimbabwe transition. The end of a costly war has salvaged one of Africa's strongest economies and administrative structures. Western diplomacy has removed a contested political vacuum (which it had, admittedly, helped to create) from the map of southern Africa. This reduces the possibilities for Moscow to exploit an indeterminate civil conflict in the name of "liberation." The chances for a Cuban-South African clash, Angolan style, have receded. The emerging leadership is neither pro-Soviet in inclination nor independent upon the Soviet-Cuban axis in its external ties. Moscow and Havana will have less access to Zimbabwe and its immediate neighbors than seemed possible a few months ago. Although guns and guerrillas played an important part in the conflict and were never absent from the minds of voters, the ultimate test of political legitimacy was a Western-sponsored and monitored election. This is as it should be.

The end of the Zimbabwe conflict is only the beginning of a new set of challenges for Western policy in southern Africa. In Namibia (South-West Africa), the low-level guerrilla conflict continues while the parties maneuver over two distinct political tracks—the internal track sponsored by South Africa on its own and an international track leading to recognized independence and sponsored by the UN, the frontline states, and the Western powers. Only the second track can end the war and the juridical conflict over the territory's status, and Washington should continue to press this approach. But it will fail unless or until Pretoria gains confidence that it can live with the outcome of a transition that it does not control unilaterally. Neither Pretoria nor the SWAPO guerrilla movement have much confidence in the concept of "free and fair" elections, and neither yet believes that it must make basic compromises. The task calls for Western finesse and credibility of a high order.

Southern Africa is a region of great potential, but the Western nations must remain engaged there during periods of strife and gloom if that potential is to be realized. We will hear a babble of voices adding up to a dissonant chorus, especially from within South Africa because that society is both more fragmented and more open than most African countries. Americans must learn to tolerate the babble, resisting the specious argument that a choice must be made between black and white or between interests and principles. In reality, American interests and principles cut across the shifting line between black and white-ruled Africa. Where it is possible to build or strengthen linkages between the peoples of South Africa and between South Africa and its neighbors, on conditions acceptable to the local parties, this should be done. It will be tragic if Washington follows the polarizing instincts of some AID officials and their academic conferees by seeking to "de-link" the region's economies along racial lines. These links represent more than the reality of South Africa predominance and white domination: they also represent a basis for development and, potentially, for accommodation. The frontline states themselves are showing greater pragmatism in this regard than more distant Africans and Westerners.

In order to capitalize on Moscow's current isolation and irrelevance in southern Africa, Washington and its allies should be concentrating their capital talents, and aid on the region as a whole. It would be foolhardy if American policymakers operated in the frontline states as though they consisted of easily distinguished hostiles and friendlies, using Marxist rhetoric as the litmus test. As Mozambique's policies make clear, there is an avid interest in Western ties and a highly developed survival instinct in the area. Let us build on it.

In South Africa, the continent's most dynamic capitalist economy is demonstrating the ability to generate resources for both internal growth and change toward a more equitable social order. For the first time in a generation, the obscure politics of Afrikanerdom are showing clear signs of a noteworthy flexibility. The Botha government has committed itself to a moderate reformist process whose ultimate end remains utterly unclear. Black politics is increasingly fragmented on tactical and leadership issues, but increasingly united in the confidence that change is coming through whatever combination of violent and nonviolent strategies is available. White politics are becoming less tribal and ideological, and more rational. The current fluidity does not make meaningful change certain, but it does make it possible. For the time being the Botha leadership has wide support among white voters, but the Afrikaner political establishment remains divided about the possibility of controlled change.

It is the Western task to encourage purposeful, evolutionary change toward a nonracial society in ways that work, without prejudging basic questions about the "ultimate" blueprint that ought to be resolved by South Africans. Common sense and fundamental American principles are the proper guide. If U.S. history has meaning for Africa, it is that a multiracial society with guarantees of individual and minority rights is possible and can work. As a democracy, the United States cannot endorse situations or constitutions that are racist in purpose of effect; nor can we endorse the abuse of Western norms by people dedicated to violence and uninterested in an open system. Our role, therefore, is to support and recognize progress that occurs and maintain the pressure for continued movement—not to expect instant miracles or bless as sufficient half-way measures.

Western policy will require a careful sophistication that is unlike anything so far witnessed in Washington. Pressure is necessary, yet the sources of effective and productive pressure are severely limited and they should not be wasted in largely symbolic gestures. Good timing and an appreciation of internal South African dynamics are essential, yet the outside world and domestic American society have clocks of their own. It is necessary to permit South Africans themselves to build their future, yet an absence of movement will guarantee that the issues become further internationalized. Despite these difficulties, the United States will find it even harder to walk away from the problem because South Africa is by its nature a part of the West. We see too much of ourselves and project too much of our domestic agendas there. The United States is the only major power that can be open and credible to all parties, and this in itself suggests an American role. In the final analysis, it matters very much how change occurs and who participates in it.

U.S. IMMIGRATION POLICIES

Mr. HUDDLESTON. Mr. President, on numerous occasions, as my colleagues will recall, I have stood on this floor to discuss issues relating to the immigration policies of the United States. A news story just off the Associated Press newswire has caught my attention today. I should like to bring it to the attention of this body.

Richard Schweiker, the Secretary of Health and Human Services, and our former colleague in the Senate, has just instituted and completed a survey on the issuance of social security cards in this country. One item that has resulted from that survey that is of interest is that Secretary Schweiker's investigators found that nearly one-half of the social security cards issued in New York City and Washington in the first 9 months of

1980 went to aliens, 20 percent of whom were in this country illegally or without work permits.

Mr. President, I submit that that does suggest the deplorable state of the immigration policies of this country and the implementation of those policies. I call my colleagues' attention to the fact that a few days ago, I, along with some nine other Members of the Senate, introduced legislation dealing with some of those problems and I commend that legislation to their attention.

I commend the distinguished Secretary of Health and Human Services, Mr. Schweiker, for immediately issuing orders to tighten up the issuance of social security cards and working with the Immigration and Naturalization Service in developing better procedures so that we can have some kind of order, some kind of control over the social security cards that are issued and to whom they are issued and can help straighten out the immigration problems that we have in this country.

Mr. President, I ask unanimous consent that this news release from the Associated Press by Mr. Christopher Connell be printed in the RECORD at this point.

There being no objection, the news release was ordered to be printed in the RECORD, as follows:

SOCIAL SECURITY CARDS

(By Christopher Connell)

WASHINGTON.—Richard S. Schweiker, Secretary of Health and Human Services, ordered tighter controls Thursday on the millions of social security cards issued each year.

He said social security numbers are becoming "a de facto universal indentifier" and must be protected against fraud and misuse by illegal aliens and others.

Consequently, Schweiker said, blank social security cards will be removed from the agency's 1,300 field offices and a centralized card issuance system set up in its place.

The Social Security Administration, part of Schweiker's department, issues seven million new numbers and more than four million replacement cards each year.

Schweiker said the agency will work with the Immigration and Naturalization Service on "improved procedures to verify the authenticity of INS documents" that aliens use to get social security cards.

His actions followed a report from his inspector general that said the social security agency was doing a poor job keeping the cards out of the hands of illegal aliens and others not entitled to them.

Schweiker's investigators found that nearly half the social security cards issued in New York City and Washington in the first nine months of 1980 went to aliens, 20 percent of whom were in the country illegally or without work permits.

The auditors criticized social security's practice since 1974 of issuing "non-work" cards and numbers to aliens who need them for bank accounts, driver's licenses or other purposes, but who are not authorized to work here. Schweiker ordered a review of that policy.

FORMER SENATOR SAM J. ERVIN, JR., WRITES ON FORCED BUSING FOR RACIAL BALANCE PURPOSES

Mr. THURMOND. Mr. President, as I am sure my colleagues in the Senate are aware, I have always opposed the forced busing of schoolchildren for racial balance and have fought time and again within the Judiciary Committee, and here in the Senate, to stop this wrongheaded, wasteful, and destructive practice.

For many years, one of the principal national leaders in the fight to halt mandatory busing was Sam J. Ervin, Jr., of Morganton, N.C., my friend and distinguished former colleague in this body. Senator Ervin retired in 1975 after serving his Nation well for 2 years in the House, 6 years on the North Carolina Supreme Court as an associate justice, and 20 years in the U.S. Senate. Although Sam Ervin relinquished his leadership in public life, he has remained active as a private citizen—studying, writing, and lecturing on a number of national issues of constitutional dimension. I am proud to say that Sam Ervin was, as a U.S. Senator, and is today as a private citizen, one of the foremost scholars of the U.S. Constitution. Like myself, Senator Ervin believes that the Constitution is an enduring document of clearly defined principles that, if this Nation is to remain a nation ruled by law and not by human whims, must be strictly construed and faithfully applied by the judiciary.

Senator Ervin has recently completed an excellent, comprehensive article on the subject of forced busing. In his article, Senator Ervin examines that court-ordered remedy as it should be viewed under a careful, proper analysis of the equal protection clause of the 14th amendment and the Civil Rights Act of 1964. His conclusion, with which I wholeheartedly agree, is that mandatory busing solely for integration purposes not only is not required by the 14th amendment of the Constitution and the 1964 Civil Rights Act, but actually contravenes the plain language and express purpose of both these statements of the law of the land. On the other hand, the distinguished statesman from North Carolina also points out that the 14th amendment, as correctly applied in the 1954 Brown against Topeka Board of Education case, prohibits any State action that would, on account of race, bar a child from attending the nearest neighborhood school.

Mr. President, this scholarly treatise by Senator Ervin is one of the best statements I have been privileged to review on the subject of tyrannical, judicial activism, which has led to misinterpretations of the 14th amendment and the 1964 Civil Rights Act. In case after case, the Federal courts have been ignoring the plain language of the law. Instead, reformist judges have substituted their own egalitarian notions, so as to mandate pupil and teacher assignment remedies that are contrary to a proper reading of the law.

Mr. President, while Senator Ervin's article is lengthy, I believe it is well worth reading by all Senators, staff members, and others who are concerned with constitutional law issues. It is my hope that Congress will glean from writings, such as this outstanding piece by Senator Ervin, both the wisdom and the will to halt the deleterious practice of forced busing for racial balance, while insuring equal educational opportunity for all Americans.

Mr. President, I ask that this article be printed in the RECORD at the end of these remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

EXCLUSION FROM NEIGHBORHOOD SCHOOLS OF CHILDREN AND THEIR FORCED BUSING FOR INTEGRATION: UNCONSTITUTIONAL FEDERAL TYRANNIES

The exclusion from their neighborhood schools and the forced busing of school children for integration purposes is a foolish, wasteful, and useless tyranny, which is outlawed by the very provision of the Constitution invoked by the Supreme Court to justify it, namely, the equal protection clause of the Fourteenth Amendment.[1]

MY ABIDING CONVICTIONS RESPECTING THE CONSTITUTION

Before explaining why this is so, I deem it not amiss to make certain observations. I have lived about four score and five years; I have spent a substantial part of my energy and time during these years in studying the Constitution, its history, and its objectives; I have acquired by my study abiding convictions respecting these matters; and I note that many Americans far wiser than I have entertained like convictions.

The Constitution is our most precious heritage as Americans. When it is interpreted and applied aright, the Constitution protects all human beings within our borders from anarchy on the one hand and tyranny on the other.

The wise British statesman, William Ewart Gladstone, rightly described the American Constitution as the most wonderful work ever struck off at a given time by the brain and purpose of man.[2]

WHY THE CONSTITUTION WAS WRITTEN AND ADOPTED

For ease or expression, I use the term Founding Fathers to designate those who framed and ratified the Constitution submitted by the Convention of 1787, and those who framed and ratified the amendments which have been added to it.

The Founding Fathers knew the history of the frustrating struggle of the people against arbitrary governmental power during countless generations for the right to self rule and to be free from tyranny, and understood the tragic lessons taught by that history.

As a consequence they comprehended these eternal truths: First, that "whatever government is not a government of laws is a despotism, let it be called what it may"; [3] second, that the "occupants of public office love power and are prone to abuse it"; [4] and, third, that what autocratic rulers of the people had done in the past was likely to be attempted by their new rulers in the future unless they were restrained by laws which they alone could neither alter nor nullify.[5]

The Founding Fathers desired above all things to secure to the people in a written Constitution every right they had wrested from autocratic rulers while they were struggling for the right to self rule and freedom from tyranny.

Their knowledge of history gave them the wisdom to know that this objective could be accomplished only in a government of laws, i.e., a government which rules by certain, constant, and uniform laws rather than by the arbitrary, uncertain, and inconstant wills of impatient men who happen to occupy for a fleeting moment of time legislative, executive, or judicial offices.

For these reasons, the Founding Fathers framed and ratified the Constitution, which they intended to last for the ages, to constitute a law for both rulers and people in

Footnotes at end of article.

peace and in war, and to cover with the shield of its protection all classes of men with impartiality at all times and under all circumstances.[6]

While they intended it to endure for the ages as the nation's basic instrument of government, the Founding Fathers realized that useful alterations would be suggested by experience.[7]

Consequently, they made provision for its amendment in one way and one way only, i.e., by combined action of Congress and the states as set forth in Article V. By so doing, they ordained that "nothing new can be put into the Constitution except through the amendatory process" and "nothing old can be taken out without the same process"; [8] and thereby forbade Supreme Court Justices to attempt to revise the Constitution while professing to interpret it.[9]

THE CONSTITUTIONAL SEPARATION OF POWERS

In framing and ratifying the Constitution, the Founding Fathers recognized and applied an everlasting truth embodied by the British philosopher, Thomas Hobbes in this phrase: "Freedom is political power divided into small fragments."

They divided governmental powers between the federal government and the states by delegating to the former the governmental powers necessary to enable it to operate as a national government for all the states, and by reserving to the states all other governmental powers.[10]

They divided among the Congress, the President, and the Federal judiciary the powers given to the federal government by giving to Congress the power to make federal laws, imposing on the President the duty to enforce federal laws, and assigning to the federal judiciary the power to interpret federal laws for all purposes and state laws for the limited purpose of determining their constitutional validity.[11]

In making this division of powers, the Founding Fathers vested in the Supreme Court as the head of the federal judiciary the awesome authority to determine with finality whether governmental action, federal or state, harmonizes with the Constitution as the supreme law of the land, and mandated that all federal and state officers, including Supreme Court Justices, should be bound by oath or affirmation to support the Constitution.[12]

THE DUTY OF SUPREME COURT JUSTICES

No question is more crucial to America than this: What obligation does the Constitution impose on Supreme Court Justices?

America's greatest jurist of all time, Chief Justice John Marshall answered this question with candor, clarity, and finality by his opinion in Marbury v. Madison and Gibbons v. Ogden. In these indisputably sound decisions, Chief Justice Marshall declared:

1. That the principles of the Constitution are fundamental, and are designed to be permanent.

2. That the words of the Constitution must be understood to mean what they say.

3. That the Constitution constitutes an absolute rule for the government of Supreme Court Justices in their official action.

4. That the oath or affirmation of a Supreme Court Justice to support the Constitution "is worse than solemn mockery" if he does not "discharge his duties agreeably to the Constitution of the United States.[13]

In elaborating his second declaration, Chief Justice Marshall said:

"As men whose intentions require no concealment generally employ the words which most directly and aptly express the ideas they intend to convey, the enlightened patriots who framed our Constitution, and the people who adopted it, must be understood to have used words in the natural sense, and have intended what they have said." [14]

This being true, Supreme Court Justices are forbidden to commit verbicide on the words of the Constitution while they are pretending to interpret them. I am indebted to Dr. Oliver Wendell Holmes for the expressive term verbicide. He declared in his Autocrat of the Breakfast Table:

"Life and language are alike sacred. Homicide and verbicide—that is, violent treatment of the word with fatal results to its legitimate meaning which is its life—are alike forbidden." [15]

The Founding Fathers undertook to immunize Supreme Court Justices against temptation to violate their oaths or affirmations to support the Constitution by making them independent of everything except the Constitution itself. To this end, they stipulated in Article III that Supreme Court Justices "shall hold their offices during good behaviour * * * and receive for their services a compensation, which shall not be diminished during their continuance in office."

In commenting upon the awesome power vested by the Constitution in Supreme Court Justices, Justice (afterwards Chief Justice) Stone made this cogent comment: "While unconstitutional exercise of power by the executive and legislative branches of government is subject to judicial restraint, the only check on our own exercise of power is our own sense of self-restraint." [16]

Many years after the adoption of the Constitution, Daniel Webster, one of the wisest of statesmen, made a caustic and correct comment upon public officials who undertake to substitute their personal notions for rules of law. He said:

"Good intentions will always be pleaded for every assumption of authority. It is hardly too strong to say that the Constitution was made to guard the people against the dangers of good intentions. There are men in all ages who mean to govern well, but they mean to govern. They promise to be good masters, but they mean to be masters." [17]

By this comment, Webster portrayed the judicial activist with accuracy. A judicial activist is a judge who interprets the Constitution to mean what it would have said if he instead of the Founding Fathers had written it.

The Constitution does not suffice, however, to check the unconstitutional exercise of power by Supreme Court Justices who are judicial activists because they are either unable or unwilling to subject themselves to the requisite self-restraint. As a consequence, they substitute their personal notions for constitutional precepts while pretending to interpret that instrument.

JUDICIAL ACTIVISM IS DESTRUCTIVE OF CONSTITUTIONAL GOVERNMENT

Many distinguished Americans, who understood and revered the Constitution, have rightly declared that judicial activism is destructive of the Constitution because it tends to substitute government by the personal notions of judges for the government of laws that instrument was ordained to establish. I quote three of the most famous of them.

George Washington, who served as President of the Convention which framed the Constitution before becoming the first President of our country under it, made this assertion in his Farewell Address:

"If in the opinion of the people, the distribution or modification of the constitutional powers be in any particular wrong, let it be corrected by an amendment in the way the Constitution designates. But let there be no change by usurpation; for though this, in one instance, may be the instrument of good, it is the customary weapon by which free governments are destroyed. The precedent must always over-balance in permanent evil any partial or transient benefit which the use can at any time yield."

Judge Thomas M. Cooley, author of Constitutional Limitations, declared:

"1. The meaning of the constitution is fixed when it is adopted, and it is not different at any subsequent time when a court has occasion to pass upon it.

"2. A court * * * which should allow a change in public sentiment to influence it in giving to a written constitution a construction not warranted by the intention of its founders would be justly chargeable with reckless disregard of official oath and public duty; and if its course could become a precedent, these instruments would be of little avail. * * * What a court is to do, therefore, is to declare the law as written, leaving it to the people themselves to make such changes as new circumstances may require." [18]

Benjamin N. Cardozo, Chief Judge of the New York Court of Appeals and Justice of the United States Supreme Court, stated in his enlightening treatise The Nature of the Judicial Process that "judges are not commissioned to make and unmake rules at pleasure in accordance with changing views of expediency or wisdom" and that "it would put an end to the reign of law" if judges adopted the practice of substituting their personal notions of justice for rules established by a government of laws.[19]

NO JUDICIAL DECISION MERITS RESPECT IF IT IS REPUGNANT TO THE CONSTITUTION

Some of those who condone judicial activism and verbicide assert that all decisions of the Supreme Court ought to be deemed sacrosanct, and that patriotism commands all citizens to refrain from criticizing them because criticism diminishes the respect of the people for the Court.

This assertion is intellectual rubbish. No judicial decision merits respect unless it is respectable, and no judicial decision is respectable if it flouts the Constitution which the judges participating in it are bound by oath or affirmation to support.

As Justice Frankfurter has so well declared, "judges as persons or courts as institutions are entitled to no greater immunity from criticism than other persons or institutions * * * Judges must be kept mindful of their limitations and of their ultimate public responsibility by a vigorous stream of criticism expressed with candor however blunt." [20]

Chief Justice Stone concurred with Justice Frankfurter's views by stating that "where the courts deal, as ours do, with great public questions, the only protection against unwise decisions, and even judicial usurpation, is careful scrutiny of their action, and fearless comment upon it." [21]

The most vigorous denunciation of judicial activism and verbicide by Supreme Court Justices is to be found in opinions of their Brethren. For example, Justice Jackson had this to say in his concurring opinion in *Brown* v. *Allen*, 344 U.S. 443, 535:

"Rightly or wrongly, the belief is widely held by the practicing profession that this Court no longer respects impersonal rules of law but is guided in these matters by personal impressions which from time to time may be shared by a majority of the Justices. Whatever has been intended, this Court also has generated an impression in much of the judiciary that regard for precedents and authorities is obsolete, that words no longer mean what they have always meant to the profession, that the law knows no fixed principles."

Justice Jackson added this scathing observation to his concurring opinion: "But I know of no way that we can have equal justice under law except we have some law." (344 U.S. at page 546)

Since Justice Jackson wrote his concurring opinion in 1952, the Supreme Court has vastly stepped up its judicial activism and verbicide. By so doing, it has made plain a truth which James Madison expressed as a belief to the Virginia Convention on June 16, 1788. At that time Madison said:

"Since the general civilization of mankind, I believe that there are more instances of the abridgement of the freedom of the people by gradual and silent encroachments of those in power than by violent and sudden usurpations."

Footnotes at end of article.

By constantly increasing judicial activism and verbicide, Supreme Court Justices have expanded for practical purposes the powers of the federal government in general and their own powers in particular far beyond the bounds to such powers set by the Constitution, and have converted the Supreme Court itself in large measure from a judicial tribunal in a government of laws into a judicial oligarchy whose decisions are controlled by the personal notions of its members.

As a consequence, the states have been largely reduced to meaningless zeros on the nations' map and virtually all the public activities of the people and many of their private activities, private preferences, and private thoughts have been directly or indirectly subjected to federal regulation.

Time and space preclude a statement of the impact of all their judicial activism and verbicide on constitutional government in America and the freedom of Americans. I shall, therefore, confine what I have to say on the subject to the decrees of the Supreme Court which sanction the exclusion from neighborhood schools and forced busing of school children for integration purposes. The Supreme Court asserts that these decrees are justified by the equal protection clause of the Fourteenth Amendment. The words and objective of this clause contradict this claim.

By practicing judicial activism and verbicide on this constitutional provision, the Supreme Court distorts it into conferring upon itself, inferior federal courts, and unelected federal bureaucrats the arbitrary power to deny school children of all races the right to attend schools in their neighborhoods and to order them to be bused to distant schools elsewhere to mix them in racial proportions pleasing to judges and bureaucrats, and thus makes innocent school children of all races the helpless and hapless pawns of judicial and bureaucratic tyranny.

The stark nature of this tyranny was revealed to a limited degree by news items of recent days emanating in Louisiana. According to these news items, a federal judge sitting in that state threatened to adjudge three white teenaged high school girls guilty of contempt of his court and to punish them accordingly.

Their offense was that they had continued to seek their education at their familiar neighborhood school instead of journeying by bus to an unfamiliar distant school elsewhere. In so doing they had allegedly disobeyed an order issued by the federal district judge commanding the state school board to deny them admittance to their neighborhood school and to bus them to the distant school elsewhere for integration purposes.

In a very real sense, all judges of inferior federal courts are servants of the federal judicial hierarchy headed by the Supreme Court. The federal district judge sitting in Louisiana undoubtedly acted under the conviction that his action was required by the forced busing decrees of Supreme Court Justices.

THE TRUE MEANING AND OBJECTIVE OF THE EQUAL PROTECTION CLAUSE

The Fourteenth Amendment became a part of the Constitution on July 21, 1868. When it is interpreted and applied right, its equal protection clause is one of the simplest and most salutary of the provisions of the Constitution.

The clause extends its protection to all persons of all races, colors, or classes who are similarly situated within the boundaries of any state. Its objective is to secure equality to such persons under the law of the state.[22] The clause specifies that no state "shall deny to any person within its jurisdiction the equal protection of the laws.[23]

By this phrase, the equal protection clause requires the laws of the state to treat all persons within its jurisdiction alike under like circumstances, both in the rights conferred and the responsibilities imposed.[24]

The clause applies only to states and to state officials acting under state law. Further than that, the clause does not go. It does not apply in any way to private individuals, or confer upon the federal government any power to control their conduct.[25]

Since all federal officers, including Supreme Court Justices, are bound by oath or affirmation to support the Constitution, no court, department, or agency of the federal government has any power to require a state or any state officer acting in its behalf to violate the equal protection clause. The Supreme Court has expressly ruled that Congress cannot do so.[26]

THE BROWN CASE

During the 86 years following the ratification of the Fourteenth Amendment, presidents, governors of states, Congress, state legislatures, and federal and state courts interpreted the equal protection clause to permit a state to segregate by law persons within its jurisdiction on the basis of race as long as the facilities which served them were equal.

The interpretation was knows as "the separate but equal doctrine." This doctrine did not originate in any Southern state. It had its genesis in Massachusetts. In 1849, the Supreme Judicial Court of Massachusetts created and applied it in *Roberts* v. *City of Boston*, 59 Mass. (5 Cush.) 198, when it rejected the plea of Senator Charles Sumner that the City of Boston be compelled to admit black children to a racially segregated school for whites.

By a 7 to 1 vote, the Supreme Court applied "the separate but equal doctrine" to the segregation of passengers on the basis of race in transportation in 1896 in *Plessy* v. *Ferguson*, 163 U.S. 537; and by a unanimous vote, the Supreme Court applied "the separate but equal doctrine" to the segregation of children in public schools on the basis of race in 1927 in *Gong Lum* v. *Rice*, 275 U.S. 78.

Justice Brown of Michigan wrote the opinion in *Plessy* v. *Ferguson* for a court composed of himself and Chief Justice Fuller of Illinois, and Justices Field of California, Harland of Kentucky, Gray of Massachusetts, Brewer of Kansas, Shiras of Pennsylvania, White of Louisiana, and Peckham of New York. Harlan dissented, and Brewer did not participate. Harlan based his dissent on the proposition that "our Constitution is color blind."

Chief Justice Taft wrote the opinion in *Gong Lum* v. *Rice* for an unanimous Supreme Court composed of himself and Justices Holmes and Brandeis of Massachusetts, Van Devanter of Wyoming, McReynolds and Sanford of Tennessee, Sutherland of Utah, Butler of Minnesota, and Stone of New York.

On May 17, 1954, the Supreme Court handed down its unanimous decision in *Brown* v. *Board of Education of Topeka*, 347 U.S. 483. By this ruling the Supreme Court adjudged "that in the field of public education the doctrine of separate but equal has no place." In its final analysis, the decision in the *Brown Case* is based upon the proposition that the equal protection clause of the Fourteenth Amendment forbids a state to consider race in assigning children in its public schools, and in consequence a state violates the clause if it excludes a child from any of its schools because of the child's race. Hence, the decision accepts as valid Justice Harlan's assertion in *Plessy* v. *Ferguson* that "our Constitution is color blind."

At the time the decision in the Brown Case was announced 17 states and the District of Columbia were maintaining segregated schools for black and white children.

It is no exaggeration to say that the decision of the Supreme Court in the Brown Case shocked the nation. In common with multitudes of other Americans, I doubted its validity and wisdom. Such a drastic change in the interpretation of the equal protection clause, I thought, ought to have been made by a constitutional amendment and not by judicial fiat.

Since the Supreme Court handed down its decision in the Brown Case, I have spent much energy and much time studying the origin, the history, the language, and the objective of the equal protection clause of the Fourteenth Amendment.

My study has constrained me to accept as valid these deliberate and definite conclusions:

The "separate but equal doctrine" is consistent with the origin and history of the equal protection clause.

Nevertheless, the "separate but equal doctrine" is inconsistent with the words and manifest purpose of the equal protection clause.

The equal protection clause requires the laws of a state to treat alike all persons in like circumstances within its borders both in respect to rights conferred and responsibilities imposed.

The objective of the equal protection clause is to insure equality under state law of all persons similarly situated within the borders of the state.

A state frustrates the equal protection clause and its objectives if it makes the legal right or legal responsibility of persons within its borders depend upon their race.

The Brown Case requires a state to assign its children to its public schools without regard to their race and invalidates any state law to the contrary.

Despite my original misgivings respecting it, the Brown Case constitutes a proper interpretation of the equal protection clause.

The equal protection clause governs state action only, and does not apply in any way to the conduct, dealings, associations, social activities, or racial preferences of individuals.

Finally, the equal protection clause contemplates that all persons shall enjoy equal civil liberties under state law, but does not entitle any persons of any race to any special privileges or preferences superior to those accorded to persons of other races by state law.

JUDGE PARKER'S EXPLANATION OF THE BROWN CASE AND THE EQUAL PROTECTION CLAUSE

When the Supreme Court made its decision in the Brown Case, it decided four separate cases which it had combined for the purpose of hearing and decision. After its decision, the Supreme Court remanded the four separate cases to the courts in which they had originated for further appropriate proceedings.

One of the four cases, Briggs v. Elliott, involved a challenge to the constitutionality under the equal protection clause of the public schools of Clarendon County, South Carolina. This case had originated in the United States District Court for the Eastern District of South Carolina and had been decided in the first instance by a three-judge district court composed of Circuit Judge Parker, and District Judge Waring and Timmerman.[27]

Circuit Judge John J. Parker, who afterwards served as Chief Judge of the United States Court of Appeals for the Fourth Circuit, was deemed by the bench and bar to be one of America's greatest jurists of all times.

After the Briggs Case was remanded to the United States District Court for the Eastern District of South Carolina by the Supreme Court for further proceedings, Judge Parker wrote what he called a per curiam opinion for the three judge court, which was then composed of himself, Circuit Judge Dobie, and District Judge Timmerman.

In this illuminating opinion, Judge Parker explained the Brown Case and the equal protection clause with correctness and clarity. In so doing, he said:

Footnotes at end of article.

"This Court in its prior decisions in this case, 98 F.Supp. 529; 103 F.Supp. 920, followed what is conceived to be the law as laid down in prior decisions of the Supreme Court, *Plessy* v. *Ferguson*, 163 U.S. 537, 16 S.Ct. 1138, 41 L.Ed. 256; *Gong Lum* v. *Rice*, 275 U.S. 78, 48 S.Ct. 91, 72 L.Ed. 172, that nothing in the Fourteenth Amendment to the Constitution of the United States forbids segregation of the races in the public schools provided equal facilities are accorded the children of all races. Our decision has been reversed by the Supreme Court, *Brown* v. *Board of Education of Topeka*, 349 U.S. 294, 75 S.Ct. 753, 757, which has remanded the case to us with direction 'to take such proceedings and enter such orders and decrees consistent with this opinion as are necessary and proper to admit to public schools on a racially non-discriminatory basis with all deliberate speed the parties to these cases.'

"Whatever may have been the views of this court as to the law when the case was originally before us, it is our duty now to accept the law as declared by the Supreme Court.

"(1–4) Having said this, it is important that we point out exactly what the Supreme Court has decided and what it has not decided in this case. It has not decided that the federal courts are to take over or regulate the public schools of the states. It has not decided that the states must mix persons of different races in the schools or must require them to attend schools or must deprive them of the right of choosing the schools they attend. What it has decided, and all that it has decided, is that a state may not deny to any person on account of race the right to attend any school that it maintains. This, under the decision of the Supreme Court, the state may not do directly or indirectly; but if the schools which it maintains are open to children of all races, no violation of the Constitution is involved even though the children of different races voluntarily attend different schools, as they attend different churches. Nothing in the Constitution or in the decision of the Supreme Court takes away from the people freedom to choose the schools they attend. The Constitution, in other words, does not require integration. It merely forbids discrimination. It does not forbid such segregation as occurs as the result of voluntary action. It merely forbids the use of governmental power to enforce segregation. The Fourteenth Amendment is a limitation upon the exercise of power by the state or state agencies, not a limitation upon the freedom of individuals.

"The Supreme Court has pointed out that the solution of the problem in accord with its decisions is the primary responsibility of school authorities and that the function of the courts is to determine whether action of the school authorities constitutes 'good faith implementation of the governing constitutional principles'." [28]

Judge Parker's sound explanation of the Brown Case and the equal protection clause was subsequently rejected by the judicial activists on the Supreme Court.

DE JURE AND DE FACTO SEGREGATION

The Brown Case rightly held that the federal government has no power whatever in respect to the assignment of students to the public schools of a state unless the state discriminates against a child by denying him admission to one of its schools solely because of his race.

Subsequent decisions correctly accept this principle as valid. Under it, segregation of the races in public schools is either de jure or de facto.

De jure segregation, which is subject to federal authority, is an existing condition of segregation in a public school resulting from intentionally segregative action on the part of the school board acting as a state agency and *de facto* segregation, which lies outside the bounds of federal authority, is an existing condition of segregation arising out of the custom of American families of different races to establish their homes in communities inhabited by other families of their respective races.[29]

THE COMPULSORY INTEGRATIONISTS AND THE DIE-HARD SEGREGATIONISTS

It is necessary to describe the political climate which prevailed in the United States during the years of the civil rights revolution. As I stated on occasions during that time, the constant preoccupation and agitation respecting race impaired our national sanity.

The spirit of moderation, tolerance, and mutual understanding ordinarily characteristic of Americans of all races and all walks of life was largely lacking. People of diverse views respecting racial matters engaged in furious, intolerant, and uncompromising controversies concerning them. These controversies erupted in political and legal battles, and sometimes in physical encounters.

For ease of expression, I call the extremists among one group compulsory integrationists, and those among the other die-hard segregationists. I was not happy with either the compulsory integrationists or the die-hard segregationists, and they were not happy with me. Some of the compulsory integrationists applied to me their most approbrious epithet "racist", and some of the die-hard segregationists called me a "flaming liberal."

Despite their violent disagreements in general, both the compulsory integrationists and the die-hard segregationists spurned by abiding conviction that the Constitution commands that men of all races shall enjoy equality under the law and forbids the grant of special legal rights and special legal privileges to men of one race denied to men of other races.

The thinking of the compulsory integrationists on this score was twisted awry. They had convinced themselves that members of the minority race were entitled to legal rights superior to those of members of the majority race, and their goal was to induce, if not to coerce, Congress and the federal judiciary and agencies to grant members of minority races such superior legal rights.

The die-hard segregationists were equally wrong. They were convinced that the legal status of members of the minority race ought to be inferior to that of members of the majority race, and they acted accordingly.

The compulsory integrationists claimed that they were merely seeking to eradicate from the hearts of all Americans the attitudes and inclinations they deemed to be racial prejudices or racial preferences. They were bent on accomplishing their objectives by the coercive power of law rather than by the persuasive power of reason or religion. The laws they sought, and in some instances secured, convert innocent external acts into illegal conduct upon the conclusion or supposition of fallible federal officers that the innocent external acts were done with racial discrimination or racial preference.

I strongly disagreed with the compulsory integrationists in this respect. I believed that the true function of law is to outlaw external acts which are evil, and not to regulate the thoughts of men, no matter how erroneous their thoughts may be.

Laws which make innocent external acts illegal solely on the basis of the internal thoughts which may accompany them are dangerous. They are, indeed, the stuff of which tyranny is made.

This is true because the administrators of such laws do not possess the clairvoyant power to determine what is in the human heart. As the Old Testament so well says in I Samuel, Chapter 16, verse 7, "The Lord seeth not as man seeth; for man looketh upon the outward appearance; but the Lord looketh on the heart."

I deemed the demands of the compulsory integrationists unwise for other reasons.

While I abhorred racial prejudice in all its aspects, I entertained the earnest belief that racial prejudice can be effectively removed from the human heart only by reason or religion. Furthermore, I rejected the notion that racial preference is synonymous with racial prejudice. In my judgment, racial preference is inseparable from liberty in some of the most intimate relationships and some of the most significant activities of men of all races.

I also entertained the earnest belief that the means by which the compulsory integrationists sought to impose their objectives on the people of our nation were incompatible with the purpose of the Founding Fathers in drafting and ratifying a written Constitution which divides governmental powers between the federal government and the states.

This purpose was explained with complete fidelity to truth by Chief Justice Salmon P. Chase in *Texas* v. *White*, 1 Wallace (U.S.) 725, when he said: "The Constitution, in all its provisions, looks to an indissoluble union composed of indestructible states."

The ultimate goal of the compulsory segregationists, I believe, was to reduce the states to meaningless and impotent zeroes insofar as the regulation of inter-racial relationships was concerned. Their immediate goal was undoubtedly to persuade federal courts and agencies by specious interpretations of the equal protection clause to compel the states to integrate all their schools racially and thus deny children of all races any liberty to choose the schools they attended.

I deplored the attitude and response of some die-hard segregationists toward peaceful demonstrations by members of the minority races who were seeking to obtain equality of rights under the law.

The First Amendment, which I revere, gives to both the wise and the foolish a constitutional right to engage in peaceable demonstrations to present their grievances, real or imaginary, to government or the public. Peaceable demonstrations have therapeutic value in all cases.

If the grievances are real, the peaceable demonstrations may persuade government to grant appropriate relief; and if they are imaginary they may relieve the demonstrators of their tensions, in whole or in part.

I abhorred the brutality which die-hard segregationists sometimes visited upon peaceful demonstrators during the civil rights revolution. I was outraged by the attack some die-hard segregationists made upon the demonstrators who were marching from Selma to Montgomery, and publicly stated that they were the most effective allies the compulsory integrationists had.

Both the compulsory integrationists and the die-hard segregationists disliked the Brown Case. The former did so because it adjudged that the equal protection clause forbade racial discrimination, but did not mandate racial integration; and the latter because it prohibited segregation in the future similar to that of the past.

THE CIVIL RIGHTS ACT OF 1964

Section 5 of the Fourteenth Amendment provides that "the Congress shall have the power to enforce, by appropriate legislation, the provisions of this article."

Ten years after the Brown Case, Congress exercised its power to enforce the equal protection clause insofar as it relates to the assignment of students to state educational institutions. It enacted Title IV of the Civil Rights Act of 1964.[30] Its purpose in so doing was to clarify the role of the federal government in the assignment of students to state schools and bring peace to an America troubled by the bitter controversies between

Footnotes at end of article.

the compulsory integrationists and the die-hard segregationists.

The Title rightly recognized as sound the ruling of the Brown Case that the equal protection clause forbids a state to practice racial discrimination in assigning students to its educational institutions, but does not empower federal courts or officials to compel states to integrate such institutions in racial proportions pleasing to them. Both the words of the Title and its legislative history are as clear as sunlight in a cloudless day.

Since it was in rapport with the equal protection clause, the Title was well designed to win the approbation of all Americans other than those who are wedded to the obsession that the Constitution should be construed to satisfy their personal notions rather than its own objectives.

By Title IV, Congress regulated what had become known as "desegregation" in public education.

By provisions of Section 401(a) and 407(a), which were incorporated in the Title as it was originally proposed and retained in the Title in its final formulation, Congress specified with exactness and completeness what the equal protection clause requires of the state in assigning children or students to its educational institutions, and the role, i.e., the function, of federal courts and federal officers in respect to this state activity.

Section 401(a) in its original and final form expressly declares that " 'desegregation' means the assignment of students to public schools and within such schools without regard to their race, color, religion, or national origin."

Section 407(a) in its original and final form explicitly denies the Attorney General power to bring legal proceedings to desegregate the educational institutions of a state unless children "as members of a class of persons similarly situated are being deprived by a school board of the equal protection of the laws," or an individual "has been denied admission to or not permitted to continue at a public college by reason of race, color, religion, or national origin."

Congress could not have found plainer words to enforce the equal protection clause and establish these principles as law for people and rulers alike:

1. The state's obligation in assigning students to its educational institutions is simply to make the assignment "without regard to their race, color, religion, or national origin."

2. The role, i.e., the function, of federal courts and federal officers is simply to enforce that obligation in case the state fails to perform it.

3. Federal courts and officers have no power in any event to order the state to assign students to its educational institutions on the basis of their "race, color, religion, or national origin."

While Congress was debating and formulating Title IV, many Senators and Representatives expressed concern with the increasing tendency of inferior federal courts and federal officers to order state school boards to assign students to their schools on a racial basis and thus compel them to integrate their schools racially instead of merely preventing racial discrimination.

To allay this concern, Congress added amendments to Title IV as originally proposed to make it doubly certain the Title would prohibit racial integration by the fiat of federal courts and federal officers as well as racial discrimination by the state in the assignment of students to state educational institutions.

One of these amendments was incorporated in Section 401(a) immediately after the Title's original and final definition of what constitutes "desegregation", and consisted of these words: "but 'desegregation' shall not mean the assignment of students to public schools to overcome racial imbalance."

The other amendment was incorporated in Section 407(a), and was expressed in this unmistakable language: "Provided that nothing herein shall empower any official or court of the United States to issue any order seeking to achieve a racial balance in any school by requiring the transportation of pupils or students from one school to another or one school district to another in order to achieve such racial balance, or otherwise enlarge the existing power of the court to insure compliance with constitutional standards."

The proviso did not contain any exception or create any limitation to its applicability. Hence, it applied to all racial imbalances, regardless of whether they resulted from de jure or de facto segregation. Since "all legislative powers granted to the United States" is vested in Congress by Article I, Section 1 of the Constitution, the subsequent nullification of the proviso by federal courts and federal executive officers constituted a gross usurpation of power denied them by the Constitution and statutes they were professing to interpret.

An illuminating colloquy concerning the proviso occurred between Senator Hubert H. Humphrey, the floor manager of the Civil Rights Act of 1964 in the Senate, and Senator Robert C. Byrd, on the floor of the Senate on June 4, 1964 during consideration of the Civil Rights Act of 1964.

Senator Byrd was distressed by the possibility that Title VI of the Act, which primarily governed state programs receiving federal financial assistance, might be utilized by federal courts or federal officers to coerce state school boards to engage in the forced busing of students.

Senator Byrd put this question to Senator Humphrey: "Can the Senator from Minnesota assure the Senator from West Virginia that under Title VI school children may not be bused from one end of the community to another end of the community at the taxpayers' expenses to relieve so-called racial imbalance in the schools?"

Senator Humphrey replied: "I do."

The colloquy continued as follows:

Senator BYRD. "Will the Senator from Minnesota cite the language in Title VI which would give the Senator from West Virginia such assurance?"

Senator HUMPHREY. "That language is to be found in another title of the bill, in addition to the assurances to be gained from a careful reading of Title VI itself."

Senator BYRD. "In Title IV?"

Senator HUMPHREY. "In Title IV of the bill."

Senator BYRD. "Will the Senator from Minnesota read that language in Title IV?"

Senator HUMPHREY. "Yes, I would be happy to do so. The provision merely quotes the substance of a recent court decision—the so-called Gary Case."

Senator Humphrey thereupon stated that the language under consideration was embodied in the proviso in Section 407(a), and read to Senator Byrd and the other members of the Senate the proviso verbatim in its entirety. The colloquy continued:

Senator BYRD. "What does the word 'herein' mean?"

Senator HUMPHREY. "It means within the Act."

Senator BYRD. "Does it mean the act or the title?"

Senator HUMPHREY. "It means the act. If the Senator would like to offer an amendment, if he believes we have not been sufficiently precise, I wish he would do so. As Senator in charge of the bill, I would entertain such an amendment."

Senator BYRD. "But would the Senator from Minnesota also indicate whether the words 'provided that nothing herein shall empower any official or court of the United States to issue any order seeking to achieve a racial balance in any school by requiring the transportation of pupils or students from one school to another or one school district to another in order to achieve such racial balance' would preclude the Office of Education (of the Department of HEW), under Section 602 or Title VI from establishing a requirement that school boards and school districts shall take action to relieve racial imbalance wherever it may be deemed to exist?"

Senator HUMPHREY. "Yes. I do not believe in duplicity. I believe that if we include the language in Title IV, it must apply throughout the act."

After elaborating the fact that the drafters of the proviso had modeled it on the language of Judge Beamer's opinion in *Bell* v. *School Board of Gary*, (D.C. Indiana, 1963) 213 F.Supp. 819, Senator Humphrey assured Senator Byrd in particular and the Senate in general that the proviso forbade federal courts and federal executive officers to require state school boards to bus students to effect the racial integration of schools. He did so by assertions which are intellectually indisputable. He said:

"I should like to make one further reference to the Gary Case. This case makes it clear that while the Constitution prohibits discrimination, it does not require integration. The busing of children to achieve racial balance would be an act to effect the integration of schools. In fact, if the bill were to compel it, it would be a violation, because it would be handling the matter on the basis of race and we would be transporting children because of race. The bill does not attempt to integrate the schools, but it does attempt to eliminate segregation in the school system." [31]

THE GREEN CASE

While the "separate but equal doctrine" was deemed constitutional, New Kent County in rural Virginia maintained two racially segregated schools, one a combined elementary and high school for blacks known as Watkins School and the other a combined elementary and high school for whites known as New Kent School.

In 1965, the County School Board of New Kent County adopted a freedom-of-choice plan for the assignment of children to its schools. This plan permitted every child, regardless of his race, to attend whichever school he chose, and provided him free transportation to enable him to do so.

In exercising their freedom of choice, all of the white students and 15 percent of the black children decided to attend New Kent School, and 85 percent of the black children elected to attend the Watkins School.

The Supreme Court repudiated the freedom-of-choice plan of New Kent County as unconstitutional under the equal protection clause in *Green* v. *County School Board of New Kent County*, (1968) 391 U.S. 430.

Although Title IV of the Civil Rights Act of 1964 had been the supreme law of the land for almost four years, the Green Case totally ignored its provisions, and dismissed the Act as a whole with the nonchalant remark that it simply indicated that Congress was "concerned with the lack of progress in school desegregation." [32]

When I was a small boy, my father, who revered the rule of law, took me to the old Supreme Court room in the Capitol at Washington and told me: "Here is where the Supreme Court sits. The Supreme Court will be faithful to the Constitution though the heavens fall." As a result of this childhood experience, I do not find it easy or pleasant to be critical of the Supreme Court, even when it practices verbicide on the words of the Constitution.

I have scrutinized the opinon in the Green Case on many occasions, and will reluctantly comment on it with complete candor.

The opinion reflects anger rather than calm reasoning, and illustrates judicial activism and verbicide run riot. It is replete with

---

Footnotes at end of article.

specious arguments which bear virtually no relationship to the constitutional provision it undertakes to construe and apply.

It ignores the plain words of that provision which expressly restrict their coverage to the states, and applies them to those individuals who happen to be school children in assignment cases. It does this by adjudging that the equal protection clause denies these individuals the freedom to choose the schools they attend.

Its language reveals why the Justices impose this limitation upon the freedom of the children. The Justices apprehend that their natural inclination to have daily associates who are members of their own race will deter both black and white children from voluntarily mixing themselves in the schools in racial proportions pleasing to the Justices.

The opinion claims that the Court is merely applying the Brown Case and its implementing decision, Brown II, (1955) 349 U.S. 483. The Green Case does recognize these rulings of the Brown Case: First, the equal protection clause does make racial discrimination in public education unconstitutional; and second, that the equal protection clause confers no power whatever on the federal government to take any action in respect to the assignment of children to state schools unless the state discriminates against a child by excluding him from one of its schools on account of his race.

Otherwise the Green Case is totally repugnant to the Brown Case. It rejects the ruling of the Brown Case that the equal protection clause requires the state to ignore race in assigning children to its schools and to make such assignments solely on a nonracial basis, and adjudges that the clause compels the state to give priority to the race of children in assigning them to its schools and to make such assignments on racial basis.

It also rejects the ruling of the Brown Case that the equal protection clause merely empowers the federal government to prohibit an offending state from practicing further racial discrimination, and adjudges that the clause imposes upon an offending state the affirmative obligation to integrate all its schools racially.

The Green Case creates a special rule for the 11 states of the old Confederacy and the six nearby border states which were maintaining dual systems of racially segregated schools on May 17, 1954. These states, it declares, must destroy "root and branch" all vestiges of past racial discrimination by converting their former dual systems into unitary school systems. This obligation is consummated, it further declares, only when the racial mixture in its schools renders them unidentifiable as "white schools" or "negro schools" and makes them identifiable solely as "just schools."

The Supreme Court has subsequently defined a unitary school in less lucid terms as one in "which no person is to be effectively excluded from any school because of race or color." [33]

The Supreme Court's invalidation of freedom-of-choice in the Green Case cannot be reconciled with this definition. After all, however, judicial aberrations can never be reconciled with constitutional government.

The Green Case illustrates in graphic fashion the tragic truth that many men of good intentions entertain an insatiable desire to impose their personal notions on others, and cannot be safely trusted with unlimited and unsupervised governmental power.

The subsequent non-busing decisions of the Supreme Court followed the Green Case. They accepted its philosophy that the Constitution is color conscious rather than color blind, and its ruling that the equal protection clause obligates an offending state school board to take affirmative action to mix the races in its schools if both black and white children reside within its jurisdiction.

Footnotes at end of article.

Inasmuch as they follow the Green Case, a detailed analysis of those subsequent cases would not increase an understanding of the problems arising out of the forced busing of school children for integration purposes. Hence, further reference to them is omitted.

CHASTISING THE SOUTH

I use the term South to embrace the States of the Old Confederacy and the nearby border states having similar school laws. These states did not possess sufficient prophetic power to know in advance that the Brown Case was going to invalidate as unconstitutional under the equal protection clause the "separate but equal" doctrine which had been held valid in all governmental circles, federal and state, during the preceding 86 years. Consequently, they were still operating legally segregated dual systems of schools on May 17, 1954, the day of the Brown decision.

The compulsory integrationists initiated their activities by concentrating on the segregated schools of the South and disregarding segregation in schools elsewhere. By so doing, they enlisted the aid of politicians in other parts of the nation who found it politically profitable to chastise the distant South for its actual or supposed sins, and to ignore the similar shortcomings of those exercising governmental power in their own states.

The compulsory integrationists and their allies were delighted with the Green Case because it gave the Supreme Court's blessing to the chastisement of the South. In it, the Supreme Court Justices invented drastic new rules applicable to the South only, and ordered inferior federal courts sitting in the South to abandon the "deliberate speed approach" of Brown II, and compel state school boards in the South to obey the new rules at once.

Acting under the Green Case and subsequent Supreme Court decisions following it, federal courts sitting in the South and federal agencies, notably HEW, required state school boards to take various actions, some quite artificial and some quite expensive to state taxpayers, which they deemed likely to speed racial integration in their schools.[34]

I enumerate some of their requirements. They compelled state school boards to deny hundreds of thousands of children, black and white, admittance to their nearest schools, and to attend what they called satellite schools which they "clustered, grouped, or paired" with their neighborhood schools, often in distant and non-contiguous areas; to restructure the boundaries of districts and attendance zones to secure the maximum amount of racial mixing, often in ways incompatible with the terrain and customary routes of travel; to close existing schools in communities inhabited by families of one race, and to consolidate their student bodies with those of student bodies in schools in communities populated by families of the other race; and to build new schools in or adjacent to areas where families of both races resided.

All too often the interests and well-being of children, parents, taxpayers, and education were sacrificed to accomplish integration.

While the South was being treated in this fashion, the Supreme Court, inferior federal courts sitting in other parts of the land, and federal agencies virtually ignored racial segregation in the schools of the North, the East, and the West, notwithstanding such segregation in schools of their inner cities was usually far more pronounced than in southern communities.

Even after they abandoned "the separate but equal" doctrine in good faith and opened their schools without discrimination to students of all races, school boards in the South found little surcease from chastisement. This was true because racial imbalances in Southern schools were presumed to result from de jure segregation, while racial imbalances in Northern, Eastern or Western schools were either ignored or presumed to be caused by de facto segregation.

The disparity of treatment of the various areas of our country justifies this caustic comment. While the American Creed was proclaiming that our land was "one nation under God," the Supreme Court and federal agencies were ruling that the South and other parts of our country were not one nation under the Constitution.

The disparity of treatment prompted Senator John C. Stennis and me to offer two amendments, which passed the Senate. My amendment decreed that rules of evidence in school desegregation cases in all federal courts should be uniform. The Stennis Amendment commanded federal courts and agencies to apply to school segregation throughout the country identical regulations.

The Stennis Amendment provoked an indignant outcry from a few Northern Senators. Thereupon Senator Abraham Ribicoff, of Connecticut, as just a man as ever sat in the Senate, arose in support of the amendment. He declared, in essence, with much eloquence that the Stennis Amendment placed a mirror before Senators who favored integration in the South and disfavored it in the North, and enabled them to see their hypocrisy.

FORCED BUSING

I digress momentarily to emphasize a relevant psychological truth.

When contending groups who entertain different views and seek different ends use the same words to express their contradictory ideas and aims, they produce a lack of public understanding of their differences and the impact which the triumph of one group or the other will have on the way of life of our country.

Advocates and opponents of compulsory integration of schools have used the same word, "desegregation", to express their irreconciliable ideas and incompatible goals. The federal judiciary has added to the lack of public understanding by using the same word, "desegregation", as if it had a single definite meaning.

Opponents of compulsory integration habitually attribute to the word "desegregation" a meaning identical with that given to it by the Supreme Court in the Brown Case and Congress in Title 4 of the Civil Rights Act of 1964. To them, "desegregation" means the assignment of pupils to state schools without regard to their race. To the compulsory integrationists, on the contrary, "desegregation" means the assignment of students to state schools because of their race.

The differences between the two groups are not mere matters of semantics. They reflect a most serious conflict of ideas and demands in respect to the governmental powers delegated to the federal government and reserved to the states by the Constitution, and with respect to whether the Constitution forbids or countenances federal tyrannies which rob innocent children and their inoffending parents of freedom.

The contending groups agree on only one proposition, i.e., that the equal protection clause confers no power upon the federal government to take any action concerning the assignment of students to state schools unless the state commits racial discrimination by denying a child admittance to one of its schools solely on account of his race.

The contending groups insist, however, that the equal protection clause confers on the federal government totally divergent powers in respect to a state school board if it is guilty of racial discrimination in the manner specified.

According to the opponents of compulsory integration, the equal protection clause directs the federal government to require the offending state school board to remedy the consequences of its racial discrimination and to refrain from racial discrimination in the future; and according to the advocates of compulsory integration, the equal protection clause compels the federal government to assume complete control of the assignment

of students to schools subject to the jurisdiction of the offending school board, and to compel the board to assign students to its school in racial proportions to the maximum extent feasible.

I return to the narration of events.

Notwithstanding its drastic nature, the Green Case was not calculated to produce integration in the schools of the South to a degree pleasing to compulsory integrationists.

Their desire was frustrated by two factors. One, which had its genesis in what seems to be an inborn human characteristic, was the custom of American families of all races to establish their homes in communities inhabited by families of their respective races; and the other, which had its origin in a dislike for compulsory integration, was the tendency of American white families to flee from the inner cities to the suburbs.

Segregation in public schools resulting from these factors is obviously de facto segregation. It is caused by the exercise of free choice by individuals and not by segregative acts of state school boards.

Nevertheless, the origin of segregation in the public schools of these racially segregated residential communities has not usually exempted their schools from federal regulation under the principle that de facto segregation in state schools is not subject to federal jurisdiction. This has been true because these schools have ordinarily been located in state school districts larger than the residential communities they serve. As a consequence, the federal government has usually been able to assume jurisdiction over them either on the basis of evidence of racial discrimination in other schools of their district or on the basis of the assumption that the segregation in them represented racial imbalances presumed to result from the segregative acts of school boards.

The only practicable way for the federal government to integrate state schools in residential communities racially segregated by the voluntary choices of their places of abode by their inhabitants is to resort to forced busing of students.

The forced busing of students for these purposes involves these two successive acts of compulsion: First, denying school children admittance to their neighborhood schools; and, second, assigning and transporting them to schools elsewhere.

Although various reasons are given for it, the real objective of forced busing is to integrate the bodies rather than to enlighten the minds of school children.

Ordinarily forced busing involves an exchange of black and white children. Black students are barred from their neighborhood schools, and compelled to attend schools in communities inhabited by whites; and white children are barred from their neighborhood schools and compelled to attend schools in communities populated by blacks.

On April 20, 1971, the Supreme Court handed down its decision in *Swann* v. *Charlotte-Mecklenburg Board of Education*, 402 U.S. 1. By this decision, the Supreme Court adjudged for the first time that the federal judiciary may constitutionally employ forced busing as a tool of school desegregation.

The Swann Case was originally heard by Chief Judge J. Braxton Craven, Jr., in 1965. He ruled that the geographic zoning plan of the Charlotte-Mecklenburg Board of Education satisfied the equal protection clause as it had been interpreted in the Brown Case. In so ruling, he made this observation:

"This is another school case. Our adversary system of justice is not well-adapted for the disposition of such controversies. It is to be hoped that with the implementation of the 1964 Civil Rights Act the incidence of such cases will diminish. Administrators, especially if they have some competence and experience in school administration, can more likely work out with School Superintendents the problem of pupil and teacher assignment in the best interests of all concerned better than any District Judge operating within the adversary system. The question before this court, even within its equitable jurisdiction, is not what is best for all concerned but simply what are plaintiffs entitled to have as a matter of constitutional law. What can be done in a school district is different from what must be done." [35]

After Judge Craven's sound ruling, the Supreme Court handed down its decision in the Green Case and similar decisions in *Monroe* v. *Board of Commissioners*, (1968) 391 U.S. 430; *Alexander* v. *Holmes County Board of Education*, (1969) 396 U.S. 19; and *Carter* v. *West Feliciana Parish School Board*, (1970) 396 U.S. 1032. These cases ruled that state school boards in the South had an affirmative duty to eradicate at once "root" and "branch" all vestiges of segregation resulting from their former dual systems of schools and that they could do this only by mixing the races in their schools without delay to the maximum degree feasible.[36]

The Constitution had not been changed since Brown, but the Supreme Court Justices had altered their notions as to what was constitutional or desirable.

The Supreme Court did not spell out the rationale underlying its new decisions, or the reason why the Constitution now covered the South in a different way from the North, East, and West.

The inference concerning the rationale underlying the new judicial fiat was nevertheless inescapable. It was that the South had been practicing racial discrimination during all the times it had relied upon the "separate but equal doctrine", even though Supreme Court Justices had not been smart enough to know it until May 17, 1954, the day of the Brown Case.

Despite the humor in it, this rationale was legally sound. As Dean Samuel F. Mordecai, of the Old Trinity (now Duke University) Law School, was wont to say: "The law makes queer distinctions between the obligations it imposes on different categories of men. It requires the layman to know all the law, and the lawyer to know a reasonable amount of the law. But it doesn't require the judge to know a damned thing."

After the Supreme Court handed down the Green, the Monroe, the Alexander, and the Carter Cases, the Swann Case was reinstituted, and James B. McMillan, a conscientious and erudite United States District Judge, heard it.

As one of the inferior members of the federal judicial hierarchy, Judge McMillan was required to follow and apply in the re-instituted Swann Case the new rulings of the head of the federal judicial hierarchy, the Supreme Court.

The defendant in the Swann Case, the Charlotte-Mecklenburg Board of Education, had administrative jurisdiction of the Charlotte-Mecklenburg School system, which encompassed the City of Charlotte and Mecklenburg County, N.C., served the educational needs of the more than 600,000 people residing in them, and was the 43rd largest public school system in the United States.

The area allotted to the system was large, comprising 550 square miles and extending 22 miles east-west and 36 miles north-south. Seventy one percent of the people inhabiting the area were white and the other 29 percent were black.

The Charlotte-Mecklenburg School system operated 109 schools, and served more than 84,000 pupils. Of the 24,000 black children attending these schools, 21,000 attended schools within the City of Charlotte, and two-thirds of those 21,000—about 14,000—attended 21 schools, where the student bodies were either totally or more than 99 percent black.

After protracted hearings, Judge McMillan ruled that the Charlotte-Mecklenburg Board of Education was impermissibly operating a dual system of schools in violation of the Green Case and like decisions, and entered a "desegregation order" requiring it to assign administrators, teachers, and students to the schools throughout the system as nearly as practicable in racial proportions corresponding to the populaiton of the area, i.e., 71 percent white and 29 percent black.

By Judge McMillan's order, the Charlotte-Mecklenburg Board of Education was mandated to bus thousands of students an average "daily roundtrip" approximately "15 miles through central city and suburban traffic" to mix the races in its schools. Many of them were little tots.[37]

By the desegregation order, the Charlotte-Mecklenburg Board of Education was specifically commanded to do these things:

1. To deny thousands of students, both black and white, admission to their neighborhood schools.

2. To assign these children to clustered, grouped, paired, or satellite schools throughout the area in the racial percentages specified insofar as that was practicable.

The order expressly commanded that the Charlotte-Mecklenburg Board of Education transport to the schools to which they were assigned all students who did not live within walking distance of such schools.

The defendant appealed from the order to the United States Court of Appeals for the Fourth Circuit, which vacated the order and remanded the case to the District Court for further proceedings conforming to its opinion.

Although it deemed the order to be required in most respects by the decisions in the *Green Case* and those following it, the Circuit Court's ruling was based on its conviction that the busing it mandated was excessive, and for that reason not required to make the Charlotte-Mecklenburg system a "unitary" system within the purview of the *Green* and kindred cases. As the Circuit Court pointed out, the order increased by 39 percent for integration purposes the busing being used by the school board for educational purposes, and necessitated an increase of 32 percent in the school board's fleet of buses.[38]

The Supreme Court reversed the case on certiorari, and upheld Judge McMillan's order in its entirety.

Before discussing the constitutional infirmities in its ruling respecting the forced busing of school children for integration purposes, it is advisable to note what the Supreme Court adjudged in the Swann Case in respect to the other questions presented to it.

Like the opinions in the Green, Monroe, Alexander, and Carter Cases, the Supreme Court opinion in the Swann Case pays lip service to the Brown Case by asserting that it is following the decision in it. It does quite rightly assert that the federal judiciary acquires no power under the equal protection clause unless the state school board violates the clause (page 15); that its power in such case is limited to correcting the condition that offends the clause (page 15); and that its function in exercising its power is merely "to see that school authorities exclude no pupil on a racial minority from any school, directly or indirectly, on account of race" (page 23).

After making these assertions, the Supreme Court repudiated the Brown Case, and adjudged that when a state school board violates the equal protection clause its constitutional obligation to assign students to its schools without regard to race is forthwith converted into a constitutional obligation to assign all students to its schools on the basis of race and in so doing to mix them racially to the maximum extent feasible.

To decree this metamorphosis of the equal protection clause, the Supreme Court perverted the words and objective of the equal

Footnotes at end of article.

protection clause and nullified section 401 (a) of the Civil Rights Act of 1964 (42 U.S.C. section 2000c).

It perverted the words and objective of the equal protection clause by converting its prohibition of racial discrimination to separate the races into a requirement of racial discrimination to mix them.[39]

Section 5 of the Fourteenth Amendment provides that the Congress shall have the power to enforce, by appropriate legislation, the provisions of the Amendment.

When Congress enacted Title IV of the Civil Rights Act of 1964, it exercised this power insofar as it relates to the assignment of students to state schools. Its purpose in so doing was to define the role of the federal government in what had become known as "desegregation" of the schools, and restore a measure of racial peace to an America troubled by the bitter controversies between compulsory integrationists and diehard segregationists in respect to public school systems.

Section 401(a) of Title IV of the Civil Rights Act of 1964 (42 U.S.C. section 2000c) was in perfect rapport with the equal protection clause when it described desegregation as the assignment of students to state schools without regard to race. Consequently, it constituted the supreme law of the land under Article VI of the Constitution.

Hence the Supreme Court unconstitutionally nullified the supreme law of the land and thwarted the effort of Congress to bring some peace to a troubled America when it repudiated the definition of "desegregation" set out in section 401(a) of the Civil Rights Act of 1964 (42 U.S.C. section 2000c), and decreed that "desegregation" is the assignment of students to state schools on a racial basis.

Inasmuch as it holds that the forced busing of students is a constitutionally permissible way to integrate state schools, the Supreme Court decision in the Swann Case has other infirmities.

Two of its additional constitutional infirmities may be epitomized as follows:

1. The Swann Case adjudges that the federal judiciary has power to compel state school boards to violate the equal protection clause.

2. The Swann Case rules that the federal judiciary has power to apply the equal protection clause to individuals, notwithstanding its coverage is expressly restricted to states and state officials.

When it enters a forced busing decree, the federal district court initially commands the school board to divide the students in a particular district or attendance zone into two groups; to permit the students of the first group to attend their neighborhood schools in the district or zone; and to deny the students in the second group admission to such neighborhood schools.

The most sophisticated sophistry cannot wash out the plain truth that this initial command requires the school board to treat the students in the two groups, who are similarly situated because of their residences in the same district or zone, in a different manner, and that is exactly what the equal protection clause was put in the Constitution to prevent.

The forced busing decree secondarily commands the state school board to assign the students in the second group to schools in other areas and to transport them by buses to the schools to which it assigns them in order either to decrease the number of children of their race in their neighborhood schools or to increase the number of children of their race in the schools elsewhere.

Again, the most sophisticated sophistry cannot wash out the plain truth that the second command of the forced busing decree requires the state school board to deny the students in the second group admission to their neighborhood schools solely on account of their race, and that is exactly what the Supreme Court rightly ruled in the Brown Case is a violation of the equal protection clause.

A sound rule of constitutional and statutory construction is embodied in the Latin phrase expressio unius est exclusio alterius, meaning the expression of one thing is the exclusion of another. The equal protection clause provides that no state shall "deny to any person within its jurisdiction the equal protection of the laws." Manifestly the clause applies exclusively to states and public officers acting for them, and excludes individuals from its coverage.

Notwithstanding this, the forced busing decrees of federal district courts apply the equal protection clause as it is now interpreted by the Supreme Court to hundreds of thousands, perhaps millions, of public school students and their parents each school day. To maintain otherwise is to deny and defy obvious truth.

When it enters a forced busing decree, the federal district court orders the state school board to integrate its schools by the twofold process of denying selected groups of students admission to their neighborhood schools and by busing them to other schools elsewhere. These decrees clearly apply to these students and their parents because they subject them to punishment for contempt of court if they disobey them or obstruct their execution.

The direct application to the students of the first step in forced busing, i.e., their exclusion from their neighborhood schools, is too obvious to require any explanation. The application to students and parents of the second step, i.e., the busing itself, is more intricate, and is made more understandable by some elaboration.

While the judges responsible for the forced busing decrees are still snug in their beds, the parents of the students to whom the decrees apply are compelled to arise from their beds, and to arouse their children from their slumbers, prepare and serve them breakfasts, and send them outdoors, no matter how inclement the weather may be, to await the arrival of the buses. The students, who are often small tots, are compelled to take round trips, which are often long and wearisome, each school day between their homes and often distant schools in other communities. All of this is done to mix the bodies of the students in racial proportions the federal judiciary deems desirable.

Such unrestrained exercise of judicial power, I submit, has no rightful place in an America, which boasts in its national anthem that it is the land of the free, unless it is indispensable to the nation's well being.

No such case can be made for forced busing of students for integration purposes.

Let us examine the reasons advanced by the advocates of forced busing to justify it.

In the ultimate analysis, they are two in number. The first one, which is untrue as well as a rank insult to blacks, is that black children cannot possibly acquire an adequate education unless they have the coerced companionship of white children while they are attending school.

The second reason is that schools in communities predominantly inhabited by whites are academically superior to the schools in communities predominantly populated by blacks; that black children are, therefore, denied educational opportunities equal to those of white children; and that the only way to remedy past deficiencies in the education of black children and to secure them educational opportunities equal to those of white children is forced busing, which transfers some black children from inferior schools in black communities to superior schools in white communities, and some white children from superior schools in white communities to inferior schools in black communities. Advocates of forced busing exhibit no concern for the plight of the white children who are transferred by it from superior schools in white communities to inferior schools in black communities. They are indifferent to the inescapable conclusion that on the basis of their own premise this forced busing denies these children equal educational opportunities.

The reasons assigned by the advocates of forced busing are specious and not authentic. The only intelligent remedy for past deficiencies in education is remedial education; and the only intelligent way to secure equal educational opportunities for all children, black and white, is to establish adequate schools in all areas.

The substitution of forced busing for intelligent solutions of educational problems calls to mind the remark of Pope Julius III to the Portuguese monk: "Learn, my son, with how little wisdom the earth is governed."

In an effort to make forced busing more acceptable, the opinion of the Supreme Court in the Swann Case observed that the District Court had found that the forced busing trips of most elementary school students would take "not over 35 minutes at the most", and that about 39 percent of the nation's public school children were "transported to their schools by bus in 1969–1970 in all parts of the country."

The District Court's finding respecting the time required for the forced busing trips of elementary school students, it seems, was applicable to one way rather than round trips. Be this as it may, it did not embrace the time spent by such students at both ends of their journeys waiting for buses. The time expended in waiting for buses and traveling on them, I submit, is wasted, and ought to be utilized to enlighten their minds in classrooms in schools nearest their homes.

To be sure, state school boards necessarily bus multitudes of students from distant homes to the nearest schools available to them for educational purposes. The distinction between necessary busing for educational purposes and the unnecessary and wasteful forced busing sanctioned by the Supreme Court in the Swann Case is as wide as the gulf which yawns between Lazarus in Abraham's bosom and Dives in hell. The untold millions of dollars wasted in financing forced busing ought to be spent to improve school facilities, enlarge the teaching skills of teachers, and to provide students with learning aids.

The opinion of the Supreme Court in the Swann Case stamps with its approval the judicial discrimination of applying different rules of evidence to desegregation cases in the South and those in other parts of the nation. It does so by this ingenious observation: "In a system with a history of segregation the need for remedial criteria of sufficient specificity to assure a school authority's compliance with its constitutional duty warrants a presumption against schools that are substantially disproportionate in their racial composition."

A case can be made for the proposition that the Supreme Court's decision in the Swann Case also violated the supremacy clause of Article VI of the Constitution when it nullified the proviso of Section 407(a) of the Civil Rights Act of 1974 (42 U.S.C. section 2000c–6). This proviso forbids federal officers and courts to order transportation of students to achieve a racial balance in any school.

The defendant in the Swann Case had invoked this proviso as a prohibition on forced busing for integration purposes.

As the colloquy of June 6, 1964, between Senator Humphrey, the Senator in charge of the legislation in the Senate, and Senator Byrd, of West Virginia, and all the other legislative history of the legislation, reveals, Congress actually intended this proviso to outlaw forced busing for integration purposes. Moreover, a case can be made for the proposition that the words of the proviso,

properly interpreted, sufficed to achieve this congressional purpose.

Be this as it may, the Supreme Court nullified the proviso of Section 407(a) as it had the rightful definition of desegregation of Section 401(a) by arguments totally incompatible with both the words and the legislative history of these sections.

The first of these arguments was self-contradictory. It was that Congress enacted these sections "not to limit but to define the role of the Federal Government in the implementation of the Brown I decision." How Congress can define the role, i.e., the function of the federal government in a particular activity without defining the limits of its powers in respect to that role is a linguistic impossibility.

The second of these arguments is equally as baffling. It was that Congress inserted the proviso in Section 407(a) "to foreclose any interpretation of the Act as expanding the existing powers of federal courts to enforce the Equal Protection Clause." After stating this argument, the Supreme Court promptly expanded the powers of the federal judiciary in this respect by nullifying the limitation the proviso imposed on federal officers and federal courts.

In the final analysis of its confusing words, the third of these arguments was that in enacting the nullified sections, Congress was a bunch of legislative fools attempting to regulate something it had no constitutional authority to regulate, i.e., de facto segregation.[40]

During the times when the Supreme Court was concerned about racial segregation in public schools in the South and was ignoring racial segregation in public schools in other regions, I offered amendments to an education bill to outlaw forced busing for integration purposes.

In arguing unsuccessfully for the adoption of these amendments, I stated, in substance, that I wanted to warn Northern, Eastern and Western Senators that when the compulsory integrationists had reduced the South to a state of total vassalage, they would not emulate Alexander the Great and weep because there were no more worlds for them to conquer; but that, on the contrary, they would direct their efforts to the public schools of the North, East, and West.

My prophesy proved true. The Supreme Court finally realized that the equal protection clause applies to other parts of the country as well as to the South, and that forced busing constituted the only practical way of mixing the races in the public schools of the North, East, and West.

After the federal courts in these areas began to assume jurisdiction of suits for forced busing, a highly respected Northern Senator, who had spoken and voted against my amendments, offered a proposal to amend the Constitution to prohibit the forced busing of students to integrate public schools. I thereupon went to him and made this private comment: "I'm glad you've seen the light." He made this private response to me: "Yes. It's just as you predicted. They're goring my ox now."

After it announced its decision in the Swann Case, the Supreme Court rendered a number of other rulings upholding federal district court orders requiring the forced busing of public school students to integrate school systems in virtually all sections of the country where people of different races reside. These rulings are subject to the same infirmities as the Swann Case, and require no analysis in detail.[41]

The federal district courts, which are compelled to implement the Supreme Court's perversion of the equal protection clause, have not monopolized forced busing as an integrating tool. On the contrary, some federal officers have employed it on a massive scale.

From time to time, Congress has enacted laws authorizing grants of federal funds to state school boards to aid them in educating public school students, and has entrusted to federal executive agencies, such as HEW and the newly created Department of Education, the power to administer these grants in conformity with the congressional intent.

Congress enacted Section 601 of Title VI of the Civil Rights Act of 1964 (42 U.S.C. Section 2000d) to prevent discrimination in federal assisted programs, and not to achieve the integration of state schools. In so doing, it acted in harmony with the true meaning and real objective of the equal protection clause. This section provides:

"No person in the United States shall, on account of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving federal financial assistance."

Unfortunately for constitutional government and freedom, federal executive agencies sometimes delegate the power to administer the grants Congress makes for educational purposes to officers employed by them who are, in reality, crusading bureaucrats. A crusading bureaucrat may be defined as a non-elected federal officer who exercises a mile of power for every inch of authority bestowed on him.

All too often the crusading bureaucrats to whom federal executive agencies delegate their power to administer congressional educational grants are, in reality, compulsory integrationists. They pervert the statutory prohibition of racial discrimination by state school boards receiving federal financial assistance into a positive command that all state school boards applying for or receiving such assistance must be racially integrated to the maximum extent feasible or at least in racial proportions pleasing to them.

They make their perversion of the Act of Congress effective by exploiting in alternative ways the financial needs of state school boards. They make grants without delay to school boards which willingly yield to their integrating objective and withhold or threaten to withhold grants from those which refuse or are reluctant to do so.

THE OBLIGATION OF THE PRESIDENT AND CONGRESS

Federal courts and federal officers are perpetrating these tyrannies on people of all races in all parts of our country where substantial numbers of children of diverse races live. Despite their pretenses to the contrary, they are seeking to compel racial integration, and not to prevent racial discrimination.

The tyrannies have no rightful place in an America which claims to be the land of the free. They are unconstitutional, wasteful, and useless. They ought to be ended. Those victimized by them cannot end them. But the President and Congress can.

The President and the members of Congress are bound by their oaths to support constitutional government and protect freedom. For this reason, they have the positive duty to end these tyrannies.

They ought not to be deterred from doing their duty because these tyrannies have been sanctioned by Supreme Court decisions. On the contrary, this fact should impel them to act without delay to end the tyrannies. They are the only beings on earth who possess the lawful power to do so.

Supreme Court decisions are the handiwork of fallible men. There is nothing sacrosanct in them. Supreme Court decisions merit respect only if they are respectable, and they are not respectable when they flout the true meaning and real objective of the equal protection clause.

The power of the President, acting alone, to end these tyrannies is more limited than that of the Congress. He has undoubted power, however, to end the tyrannies of the officers of the executive branch of the federal government. They are merely assisting him in performing his constitutional duty to take care that the laws of the nation are faithfully executed, and he can stop them from perverting those laws by annexing to them conditions repugnant to the congressional intent.

The power of Congress to end these tyrannies is virtually unlimited. The Founding Fathers knew the tragic truth that some public officials love power and are prone to abuse it, and inserted in the Constitution provisions adequate to prevent such abuse.

Article I, section 1, of the Constitution vests in Congress "all legislative powers" of the federal government. Hence, Congress may enact new laws sufficient to compel officers of the executive branch of the federal government to stop perverting old laws.

The Constitution confers upon the federal judiciary authority to restrain unconstitutional exercise of power by Congress, and upon Congress authority to restrain the unconstitutional exercise of power by the federal judiciary.

This assertion is undoubtedly shocking to some, especially compulsory integrationists, who believe the federal judiciary to be omnipotent and Congress to be impotent in the area under consideration.

Section 5 of the Fourteenth Amendment authorizes Congress to enforce, by appropriate legislation, the provisions of the equal protection clause, and Article III of the Constitution empowers Congress to regulate the jurisdiction of all federal courts inferior to the Supreme Court and the appellate jurisdiction of the Supreme Court itself.[42]

By virtue of these constitutional provisions, Congress has virtually complete power to enact laws specifying how the equal protection clause is to be enforced in accordance with its true meaning and real objective, and defining the jurisdiction of the federal courts in a manner requiring them to act accordingly.

By implementing these constitutional provisions in this way, Congress can put a virtual end to the judicial and bureaucratic tyrannies under consideration.

While I was serving in the Senate, I made remarks explaining these constitutional provisions, and introduced a bill which was aptly designed to use them to end these judicial and bureaucratic tyrannies. My remarks and bill are set out in pages 33,033 to 33,041 of the Congressional Record for November 5, 1969. I reintroduced the bill on other occasions with the co-sponsorship of Senator James B. Allen, of Alabama, one of the nation's wisest and most courageous Senator of all time.

In closing, I pray that the President and the Congress will prove their devotion to constitutional government and the freedom of Americans by ending the judicial and bureaucratic tyrannies I have been discussing. They cannot perform a more important task. When all is said, tyranny in a Republic is far more reprehensible than tyranny in a Monarachy.

See, also, *West Coast Hotel Co.* v. *Parrish*, (1937) 300 U.S. 379, where Justice Sutherland stated in a dissent: "The judicial function is that of interpretation; it does not include the power of amendment under the guise of interpretation. To miss the point of difference between the two is to miss all that the phrase 'Supreme law of the land' stands for and to

convert what was intended as inescapable and enduring mandates into mere moral reflections. If the Constitution, intelligently and reasonably construed in the light of these principles, stands in the way of desirable legislation, the blame must rest upon that instrument, and not upon the court for enforcing it according to its terms. The remedy in that situation—the only true remedy—is to amend the Constitution."

[31] *Congressional Record*, Vol. 110, Part 10, pp. 12, 713–12, 717. Although the provisions of Title IV of the Civil Rights Act of 1964 were in rapport with the true meaning and real objective of the equal protection clause, I voted against the Act for reasons stated by me in detail while the legislation was under Senate consideration. Some of these reasons had their origin in provisions of the Act, and others were prompted by apprehensions as to how it would be applied by courts and executive agencies.

While many of them are not germane to my specific subject, I deem it not altogether amiss to epitomize some of them in this note.

The Act is in irreconcilable conflict with the principle that all Americans of all races are entitled to equal rights under both federal and state laws. It deprives all Americans of precious rights for the supposed benefit of members of minority races, and it subordinates other precious rights of all Americans to demands made by or in the name of members of minority races.

To be sure, the Act pays some lip service to the concept of equality. In so doing, however, it is reminiscent of Anatole France's assertion: "The law, in its majestic equality, forbids the rich as well as the poor to sleep under bridges, to beg in the streets, and to steal bread."

The Act was devised with the understanding that in its practical administration it would be employed to extend to members of minority races special privileges not accorded to others. It is being so administered.

The Act violates with vengance the doctrine of the separation of powers, which wisely discountenances the merger of powers to make, enforce, and interpret laws in a single public official or single public body.

It does this by combining in the federal agencies charged with its administration and enforcement these discordant powers: (1) The legislative power to write regulations having the force of law; (2) the executive power to administer and enforce its provisions and these regulations, and to prosecute violations of them; and (3) the judicial power to judge and punish these violations.

The combination of these discordant powers in the federal agencies make them, in reality, judges in their own causes. As a consequence, they cannot act with the cold neutrality of the impartial judge, and those subjected to their jurisdiction are denied due process and fair play.

These provisions of the Civil Rights Act of 1964 are repugnant to my philosophy of government and my enduring conviction that freedom is the most precious value of civilization.

Apart from other considerations, they determined me to vote against the Act. There were other considerations. But they strongly reinforced my determination.

I had grave apprehensions as to how HEW, EEOC, and other federal executive agencies would interpret and apply the Act, and as to how the Supreme Court would react to the effort of its Title IV to put restraints on judicial and bureaucratic abuse of the equal protection clause in the assignment of students to state schools.

Another consideration arose out of my realization that the enactment of the Civil Rights Act was another step in the process by which the power-hungry federal government was undertaking to destroy the states as viable instruments of government and concentrate in itself the power to dominate the lives of Americans in virtually all respects.

This consideration has long been of profound concern to me. It ought to be of similar concern to every American who does not relish the prospect of having his status reduced to that of a galley-slave pulling an oar in the ship of state.

My gravest apprehensions have materialized since the passage of the Act. HEW, EEOC, and other federal executive agencies have stretched the drastic provisions of the Act far beyond the intent of Congress, and converted what it intended to be a prohibition of racial discrimination into a mandate for racial integration.

By so doing, HEW, EEOC, and other federal executive agencies have arrogated to themselves dictatorial powers, and are exercising them daily throughout our nation to impose their notions on states, subdivisions of states, educational institutions, industries, labor organizations, and individuals.

[32] 391 U.S. 430, p. 433, footnote 2. The *Green Case* is analyzed with candor, courage, and correctness by Lino A. Graglia in his *Disaster By Decree, The Supreme Court Decisions On Race And The Schools* (Chapter 5), which was published by the Cornell University Press and merits reading by all Americans who abhor judicial tyranny.

[33] *Alexander* v. *Holmes County Board of Education*, (1969) 396 U.S. 19. See, especially, headnote 1 of the report of this case in 24 L.Ed.2d, pp. 19, 20.

[34] Lino A. Graglia: *Disaster By Decree*, Chapters 1–6, pp. 1–103.

[35] *Swann* v. *Charlotte-Mecklenburg Board of Education*, (1965) 243 F. Supp. 667 affirmed 369 F.Ed 29 (1966).

[36] *Monroe* v. *Board of Commissioners*, (1968) 391 U.S. 450, which adjudged a "free transfer" plan to be invalidated by the equal protection clause, reinforces the holding of the *Green Case* that the desegregation of public schools demands that school children be robbed of their freedom, and demonstrates the falsity of any claim that federal courts which enter desegregation orders are not applying the clause to individuals in violation of its express declaration. In it, the Court declares: "We do not hold that 'free transfer' has no place in a desegregation plan. But like 'freedom of choice', if it cannot be shown that such a plan will further rather than delay conversion to a unitary, nonracial, nondiscriminatory school system, it must be held unacceptable." By these words, the Court makes a mockery of "freedom." No human being has any "freedom" if he has to exercise it according to the dictates of government.

[37] *Swann* v. *Charlotte-Mecklenburg Board of Education*, (1970) 431 F.2d., 138, 147.

[38] Judge McMillan's ruling in the *Swann Case* is reported in 311 F.Supp. 265 (1970), and the ruling of the Circuit Court vacating it in 431 F.2d 138 (1970).

[39] Lino A. Graglia: *Disaster By Decree*, Chapter 5, p. 59.

[40] In enacting Title IV of the Civil Rights Act, Congress was exercising its constitutional power to regulate *de jure* segregation in state schools. It was not usurping the power to regulate *de facto* integration in them. These assertions, I maintain, are established by both the language and legislative history of the Title. As a member of the Senate, I spent virtually every minute in that body while it was considering Title IV and heard virtually every word spoken by any Senator concerning it. By so doing, I acquired knowledge of the Act's legislative history first hand. After the Supreme Court granted certiorari to review the *Swann Case*, I joined Ernest F. Hollings, of South Carolina, and Representa-

tive Charles R. Jonas, of North Carolina, in filing with it as *amici curiae* a brief in behalf of the Chalotte-Mecklenburg Classroom Teachers. As uncompensated attorneys for them, we insisted that the exclusion of students from their neighborhood schools and their forced busing for integration violated the equal protection clause. In preparing the brief I made a meticulous study of the legislative history of Title IV. I was shocked by the Supreme Court's use of the *de facto* argument to invalidate a valid act of Congress, and made a second meticulous study of the legislative history of Title IV to determine whether the Supreme Court's insupportable argument had any basis whatever.

[1] By ignoring Title IV of the Act in the *Green Case* and nullifying it in the *Swann Case*, the Supreme Court exhibited its determination to impose the personal notions of its members in respect to matters having racial implications upon the people of our country, anything in the Constitution and laws of the United States to the contrary notwithstanding.

This is undoubtedly a drastic assertion. Its truthfulness is fully corroborated, however, by these additional decisions of the Supreme Court:

a. *South Carolina* v. *Katzenbach*, (1966) 383 U.S. 301.

b. *Katzenbach* v. *Morgan*, (1966) 384 U.S. 641.

c. *Jones* v. *Alfred H. Mayer Co.*, (1968) 292 U.S. 409; *Sullivan* v. *Little Hunting Park, Inc.*, (1969) 396 U.S. 229; *District of Columbia* v. *Carter*, (1973) 409 U.S. 418 (dicta); and *Tillman* v. *Wheaton-Haven Recreation Association*, (1973) 410 U.S. 431.

d. *Johnson* v. *Railway Express Agency*, (1975) 421 U.S. 454; *Runyon* v. *McCrary*, (1976) 427 U.S. 160; *McDonald* v. *Santa Fe Trail Transportation Company*, (1976) 427 U.S. 160.

e. *United States Steel Workers of America* v. *Weber*, (1979) 443 U.S. 193.

These decisions have been hailed in some quarters as enlightened judicial achievements. It would be more consonant with truth to call them amazing judicial performances. In each of them the Supreme Court committed linguistic mayhem or judicial verbicide on words of the Constitution, or words of an Act of Congress, or on words of both to reach their amazing rulings.

The explanation of these rulings is to be found in a story which may be apocryphal. Representative Timothy J. Campbell, who had been sent to the House by Tammany, sought to persuade President Grover Cleveland to sign into law a pet bill which he had induced Congress to pass. The President demurred on the ground the bill was unconstitutional. Congressman Campbell responded to the President's objection with this rhetorical question: "What's the Constitution between friends?"

When all is said, the Supreme Court did constitutional evil in these rulings to achieve ends it deemed beneficial to blacks and the country. These decisions were not concerned with the assignment of students to state schools. For this reason, I hold my comments on them to a minimum.

To understand the drastic impact of two of them, *South Carolina* v. *Katzenbach*, and *Katzenbach* v. *Morgan*, upon constitutional government in America, it is necessary to understand what the Constitution decrees concerning the power to prescribe qualifications for voting.

The power to prescribe qualifications for voting for state officers is reserved to the state by the Tenth Amendment. The power to prescribe qualifications for voting for federal officers is conferred upon the state and denied to Congress by these provisions of the Constitution: Article I, Section II, Clause 1; Article II, Section I, Clause 2; and the Seventeenth Amendment.

The constitutionality of the highly praised, but completely devious, Voting Rights Act of 1965 was upheld in *South Carolina* v. *Katzenbach*. In reaching this astonishing decision, the Supreme Court was compelled to make and did make these rulings.

a. That the absolute prohibition of congressional bills of attainder embodied in Article I, Section IX, Clause 3, and the due process clause of the Fifth Amendment afford no protection to a state, or its officers, or its citizens in their corporate or collective capacity.

b. That the power of Congress to enforce by appropriate legislation the Fifteenth Amendment's prohibition of racial discrimination in voting confers upon that body the autocratic authority to suspend for at least 5 years the constitutionally guaranteed powers of politically selected Southern States to prescribe qualifications for voting for both state and federal officers.

c. That the constitutional doctrine of the equality of the states is a worthless shibboleth which is effective only at the precise moment of a State's admission to the Union, and does not prevent Congress from robbing a state thereafter of constitutional powers other states exercise and thus reducing it to the status of an inferior state.

d. That Article III, Section II, Clause 2, empowers Congress to close to the politically selected Southern States condemned by the bill of attainder violative of due process all federal courts in the land except the United States District Court for the District of Columbia, and to vest in that faraway court exclusive jurisdiction of all cases in which the condemned states seek relief from the autocratic provisions of the Act.

South Carolina v. Katzenbach is irreconcilable with *United States v. Lovett*, (1946) 328 U.S. 303, and Ex Parte Milligan, (1866) 4 Wall. (U.S.) 2, 120–121.

The *Lovett Case* rightly invalidated a congressional bill of attainder applying to federal executive officers suspected of subversive leanings. The *Milligan Case* rightly ruled that the Constitution is an unalterable law for rulers and people alike at all times and under all circumstances, and that no notion involving more pernicious consequences was ever invented by the wit of man than that any of its provisions can ever be suspended.

Consistency may be either a jewel or the hobgoblin of little minds and fools. But it is neither to Supreme Court Justices.

The Supreme Court adjudged in *Katzenbach v. Morgan* that the power vested in Congress by Section 5 of the Fourteenth Amendment to enforce the equal protection clause by appropriate legislation confers on Congress the contradictory power to nullify the equal protection clause. In that case the Supreme Court made a ruling irreconcilable with the provisions of the Constitution governing the power to prescribe qualifications for voting, and its own sound interpretation of equal protection clause in *Lassiter v. Board of Education of Northampton County*. (1959) 360 U.S. 35. It declared that Section 5 of the Fourteenth Amendment empowered Congress to do these things:

a. To nullify a New York law which established a qualification for voting, namely, literacy in the English language, which was in harmony with the equal protection clause.

b. To substitute for the nullified New York law a federal qualification for voting, which Congress was forbidden to establish by all of the provisions of the Constitution governing the power to prescribe qualifications for voting.

The opinion which undertakes to rationalize this linguistic mayhem or judicial verbicide is intriguing, despite the disconsolation it gives to those who, like Chief Justice Marshall, believe the Supreme Court ought to interpret the Constitution to mean what it says.

It is simply this: When Congress exercises its power to legislate under Section 5 of the Fourteenth Amendment, the Supreme Court cannot inquire whether the congressional legislation offends the equal protection clause. It is limited to determining whether the legislation is calculated to prevent the state from violating the equal protection clause in the future.

Americans who cherish local government ought to pray that Congress will not carry the illogical ruling in *Katzenbach* v. *Morgan* to its logical conclusion. If it did, Congress would prevent all future violations of the equal protection clause by enacting legislation denying states the power to make, enforce, and interpret laws.

The Supreme Court ruled in *United States Steel Workers* v. *Weber* that an employer in an industry covered by Title VII of the Civil Rights Act of 1964 is authorized by it to discriminate in favor of black employees and against more senior white employees, notwithstanding Title VII expressly forbids all racial discrimination in all industries covered by the Title.

Jones v. *Alfred H. Mayer Company* may be described as the bellwether of the decisions cited in subdivisions 3 and 4. It was decided in 1968, and the other decisions merely follow its indefensible lead.

Undoubtedly the decision in the *Mayer Case* and the decisions which follow it have committed the most monstrous linguistic mayhem or judicial verbicide on the Constitution and Acts of Congress in the annals of America.

By these forbidden processes, the Supreme Court Justices have arrogated to Congress and themselves virtually unlimited power to punish every individual who refuses to make a contract with or to sell property to another individual anywhere in America if his refusal is motivated by racial discrimination or racial preference. In so doing, they reflect their purpose to eradicate by constitutional and legal perversions racial prejudice and racial preferences from the minds and hearts of Americans.

To confer their newly invented power on Congress and themselves, the Justices revamp the history and objectives of the Thirteenth Amendment and the Civil Rights Act of 1866 (42 U.S.C. Sections 1981, 1982); place upon that Amendment and that Act constructions totally repugnant to every word in them; and repudiate sound Supreme Court decisions of the past which span a period of 100 years and demonstrate the invalidity of the new construction.

It is worthy of note that some of the litigants argued for the same distorted construction of the Constitution in the Civil Rights Cases of 1883. The Supreme Court wisely rejected their argument by observing that these litigants were "running the slavery argument into the ground."

The Supreme Court further declared in those cases: "When a man has emerged from slavery, and by the aid of beneficient legislation has shaken off the inseparable concomitants of that state, there must be some stage in the progress of his elevation when he takes the rank of a mere citizen, and ceases to be the special favorite of the laws, and when his rights, as a citizen or a man, are to be protected in the ordinary modes by which other men's rights are protected." (109 U.S. 3, 27 L.Ed. 835, 844.)

One of America's most profound constitutional scholars, Charles Fairman, makes some cogent comments on the Mayer Case in his illuminating book "Reconstruction And Reunion 1864–88, Part I." This book is Volume VI of the *History of the Supreme Court of the United States*, which is being financed by the Oliver Wendell Holmes Devise.

Fairman states that in the Mayer Case, the Supreme Court "appears to have had no feeling for the truth of history" and "allowed itself to believe impossible things." (p. 1258)

To illustrate what "believing impossible things" is, Fairman invokes Chapter 5 of "Through the Looking Glass" by Lewis Carroll, the creator of Alice in Wonderland, and recounts the colloquy which occurs between Alice and the Queen after the Queen had been telling Alice how to remember "things that happened the week after next."

"I can't believe it," said Alice.

"Can't you?" the Queen said with a pitying tone. "Try again: draw a long breath, and shut your eyes."

Alice laughed. "There's no use trying," she said, "one can't believe impossible things."

"I daresay you haven't had much practice," said the Queen. (pp. 1298–1299, footnote 160.)

I cite and quote these observations of Fairman by the permission of The Macmillan Company, which holds the copyright of his book.

Disciples of linguistic mayhem or judicial verbicide glibly assert it proves that the Constitution is a living document. Not so. It proves that the Constitution is dead, and that Americans are being governed by the personal notions of Supreme Court Justices rather than by constitutional precepts.

Nobody denies the good intentions of the Justices. They undoubtedly believe their linguistic mayhems or judicial verbicides are superior to the handiwork of the Founding Fathers.

[42] Among the multitude of decisions adjudging that Congress has the power under Article III to define the jurisdiction of federal courts inferior to the Supreme Court are these: *Palmore* v. *United States*, (1973) 411 U.S. 389; *South Carolina* v. *Katzenbach*, (1966) 383 U.S. 301; *Sears, Roebuck & Co.* v. *Mackey*, (1956) 351 U.S. 427; *Lockarty* v. *Phillips*, (1943) 319 U.S. 182; *Plaquemines Tropical Fruit Co.* v. *Henderson*, (1898) 170 U.S. 511; *Ames* v. *Kansas ex rel Johnston*, (1884) 111 U.S. 449; and *Cary* v. *Curtis*, (1845) 3 How. (44 U.S.) 236. Among the many cases holding that Congress has the power under Article III to regulate the appellate jurisdiction of the Supreme Court are these: *United States* v. *Klain*, (1872) 13 Wall. (80 U.S.) 128; *Re Yerger*, (1869) 8 Wall. (75 U.S.) 85; *Ex Parte McCardle*, (1868) 7 Wall. (74 U.S.) 506; *Daniels* v. *Chicago R.I.R. Co.*, (1865) 3 Wall. (70 U.S.) 250; *Ex Parte Vallandigham*, (1864) 1 Wall. (68 U.S.) 243; and *Durousseau*, (1810) 6 Cr. (10 U.S.) 307.

BLEEDING THE FROST BELT

Mr. DIXON. Mr. President, today I again rise to speak to the issue of the imbalance in the flow of Federal dollars back to the States of the Midwest and Northeast.

Sadly, Mr. President, this chronic practice of inequity in the distribution of Federal dollars will continue unabated if current budget proposals are adopted without careful consideration of the effects on the older industrial areas of the Northeast and Midwest.

At this time I ask unanimous consent to have printed in the RECORD excerpts from a Chicago Sun-Times editorial which speaks to this serious problem.

There being no objection, the editorial was ordered to be printed in the RECORD as follows:

[From the Sun-Times, Mar. 26, 1981]

BLEEDING THE FROST BELT

Almost a half century has passed since President Franklin D. Roosevelt began a massive recovery program for the chronically poor South and the undeveloped West. The richer states of the North paid the bill.

With their tax dollars, the Midwest and the Northeast built ports, dams, water projects, highways, military bases and rural electrification projects in the Sun Belt.

Times changed, but federal policies did not.

States in this region are suffering from high unemployment, aging plants, a shrinking tax base, impoverished schools and ailing transit systems, yet still they are subsidizing the boom in the South and the West.

From 1975 to 1979, the Midwest and Northeast sent the U.S. Treasury $165 billion more in taxes than it got in federal spending. During the same period, the Sun Belt got $112 billion more than it paid in taxes.

No state was bled as heavily as Illinois: In those five years it sent Washington $31.4 billion more than it got. And, despite its great industrial capacity, it ranks 45th among the states in per capita defense spending.

A new analysis of the Reagan budget by the bipartisan, Washington-based Northeast-Midwest Institute concludes it will aggravate the imbalance in federal spending and rapidly accelerate industrial decline in urban areas like Chicago. Some of its findings:

The administration proposes only modest reductions in huge, wasteful water projects in the South and West, including the $3 billion Tennessee-Tombigbee plan to close a portion of the Mississippi River. Yet there is no help for the aging water supply systems of the Midwest and Northeast.

Massive cuts in mass transit and rail subsidies will rob the Midwest of one of its major assets in the competition for industry. But highway programs that feed growth in developing areas will tool along virtually untouched—reaching $9 billion a year by 1983, three times as much as transit aid.

This backward approach is repeated in proposals to gut home weatherization and energy research projects. Both will be felt most severely in the Midwest and Northeast. Meanwhile, the administration ignores the exorbitant taxes energy-rich states extract for their oil, gas and coal. Texas alone will reap $33 billion in oil taxes from 1980 to 1990, most of it squeezed from the Midwest and Northeast. Congress has clear authority to whittle or even ban these state taxes.

Reagan wants to kill one federal program that is creating jobs and stimulating private investment in older cities (the Economic Development Administration) and slash a second (Urban Development Action Grants). Together, their annual cost is far less than annual spending on Sun Belt water projects.

RECEIPT OF THE ANNUAL REPORT OF THE OFFICE OF INSPECTOR GENERAL FOR THE DEPARTMENT OF HEALTH AND HUMAN SERVICES

Mr. THURMOND. Mr. President, as the President pro tempore of this body, I have received the annual report of the Office of Inspector General for the Department of Health and Human Services for the calendar year 1980. This report, which has been submitted pursuant to section 204(a) of Public Law 94–505, is available for review by my colleagues in my office.

RECEIPT OF THE 1980 ANNUAL REPORT OF THE ENERGY INFORMATION ADMINISTRATION OF THE DEPARTMENT OF ENERGY

Mr. THURMOND. Mr. President, as the President pro tempore of this body, I have received the annual report of the Energy Information Administration for the calendar year 1980. This report, which has been submitted pursuant to provisions of part B, section 57(a)(2) of the Federal Energy Administration Act of 1974, is available for review by my colleagues in my office.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. PERCY, from the Committee on Foreign Relations, without amendment:

S. Res. 107. An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 786; to the Committee on the Budget.

By Mr. PERCY, from the Committee on Foreign Relations, with an amendment in the nature of a substitute:

S. 786. A bill to provide for continuing U.S. participation in the International Development Association, to provide for U.S. participation in the African Development Bank, and for other purposes (Rept. No. 97–36).

EXECUTIVE REPORTS OF COMMITTEES

As in executive session, the following executive reports of committees were submitted:

By Mr. PACKWOOD, from the Committee on Commerce, Science, and Transportation:

J. Lynn Helms, of Connecticut, to be Administrator of the Federal Aviation Administration.

(The above nomination reported from the Committee on Commerce, Science, and Transportation, with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

ORDER FOR STAR PRINT—SENATE REPORT 97–35

Mr. GORTON. Mr. President, I ask unanimous consent that a star print of Senate Report 97–35 be made.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR STAR PRINT—S. 787

Mr. KENNEDY. Mr. President, I introduced the Energy Productivity Act of 1981 on March 24, 1981.

The title incorrectly describes the tax credit as "nonrefundable." In fact, title II of the legislation makes the credit refundable.

I ask unanimous consent that the bill be printed to change the term "nonrefundable" to "refundable" in the title.

The PRESIDING OFFICER. Without objection, it is so ordered.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and

second time by unanimous consent, and referred as indicated:

By Mr. BUMPERS (for himself and Mr. PRYOR):

S. 859. A bill to amend the mineral leasing laws of the United States to provide for uniform treatment of certain receipts under such laws, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. QUAYLE:

S. 860. A bill for the relief of Sylvester G. Schneider; to the Committee on the Judiciary.

By Mr. PACKWOOD (for himself, Mr. BRADLEY, Mr. HEINZ, Mr. MATSUNAGA, Mr. MOYNIHAN, Mr. PRYOR, Mr. COCHRAN, and Mr. RIEGLE):

S. 861. A bill to amend the Social Security Act to provide for a 6-year demonstration program of comprehensive community-based noninstitutional acute and long-term care services for the elderly and disabled; to the Committee on Finance.

By Mr. ARMSTRONG:

S. 862. A bill to amend the Potato Research and Promotion Act; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. DOLE (for himself, Mr. HEFLIN, and Mr. DECONCINI):

S. 863. A bill to establish a uniform law on the subject of bankruptcies; to the Committee on the Judiciary.

By Mr. EAGLETON (for himself, Mr. PERCY, Mr. MATHIAS, Mr. ROTH, Mr. CHILES, Mr. SASSER, Mr. PRYOR, Mr. LEVIN, and Mr. SARBANES):

S. 864. A bill to amend the Accounting and Auditing Act of 1950 to require ongoing evaluations and reports on the adequacy of the systems of internal accounting and administrative control of each executive agency; to the Committee on Governmental Affairs.

By Mr. PRYOR (for himself and Mr. BUMPERS):

S. 865. A bill to amend the Small Business Act to provide that any change in regulations affecting the disaster loan provisions of such act shall not apply to applications for disaster loan assistance received before the effective date of the change; to the Committee on Small Business.

By Mr. BAUCUS (for himself and Mr. TSONGAS):

S. 866. A bill to improve congressional oversight of Federal programs and activities by requiring greater specificity in setting program objectives, by requiring continuing information on the extent to which programs are achieving their stated objectives, by requiring periodic review of new authorizations of budget authority and tax expenditures, and for other purposes; to the Committee on the Budget and the Committee on Governmental Affairs, jointly, pursuant to the order of August 4, 1977.

By Mr. MOYNIHAN:

S. 867. A bill to amend the Internal Revenue Code with respect to the tax treatment of Americans abroad; to the Committee on Finance.

By Mr. HEINZ (for himself, Mr. GARN, Mr. INOUYE, Mr. WILLIAMS, Mr. CRANSTON, and Mr. TSONGAS):

S. 868. A bill to amend the Export-Import Bank Act of 1945 to authorize the Bank to engage in the use of extraordinary measures of export finance to counter and ultimately discourage the use of such measures by other major trading countries; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. DODD:

S. 869. A bill to place restrictions on military assistance and sales to El Salvador; to the Committee on Foreign Relations.

By Mr. STEVENS (for himself and Mr. MURKOWSKI):

S. 870. A bill to amend the Alaska Railroad Act to direct the Secretary of Transportation to sell the Yukon River barge service to the city of Nenana, Alaska; to the Committee on Commerce, Science, and Transportation.

By Mr. COCHRAN:

S. 871. A bill to simplify trade procedures regarding sales of U.S. products abroad, and for other purposes; to the Committee on the Judiciary.

By Mr. CHAFEE (for himself, Mr. DOLE, Mr. HEINZ, and Mr. DANFORTH):

S. 872. A bill to amend title 38, United States Code, to extend the period of Vietnam era veterans' eligibility for readjustment counseling and related mental health services; to the Committee on Veterans' Affairs.

By Mr. BENTSEN:

S. 873. A bill to strengthen Federal programs and policies for combating international and domestic terrorism; to the Committee on Foreign Relations.

By Mr. GORTON (for himself, Mr. JACKSON, Mr. MCCLURE, and Mr. METZENBAUM):

S. 874. A bill to provide for additional protection of steelhead trout as a game fish, and for other purposes; to the Select Committee on Indian Affairs.

By Mr. HAYAKAWA (for himself and Mr. CRANSTON):

S. 875. A bill to authorize the generation of electrical power at Palo Verde Irrigation District Diversion Dam, Calif.; to the Committee on Energy and Natural Resources.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. BUMPERS:

S. 859. A bill to amend the mineral leasing laws of the United States to provide for uniform treatment of certain receipts under such laws, and for other purposes; to the Committee on Energy and Natural Resources.

(The remarks of Mr. BUMPERS appear earlier in today's RECORD.)

By Mr. PACKWOOD (for himself, Mr. BRADLEY, Mr. HEINZ, Mr. MATSUNAGA, Mr. MOYNIHAN, Mr. PRYOR, Mr. COCHRAN, and Mr. RIEGLE):

S. 861. A bill to amend the Social Security Act to provide for a 6-year demonstration program of comprehensive community-based noninstitutional acute and long-term care services for the elderly and disabled; to the Committee on Finance.

NONINSTITUTIONAL ACUTE AND LONG-TERM CARE SERVICES FOR THE ELDERLY AND DISABLED ACT

Mr. PACKWOOD. Mr. President, I am introducing today, with Senator BRADLEY, a bill designed to create a new title XXI under the Social Security Act. The purpose of this bill will be to establish a 10 statewide demonstration program to test over a 6-year period the implementation of an organized system of noninstitutional long-term care services. This legislation is designed to assist persons 65 and over, and persons who are disabled. I am also pleased that Senators HEINZ, MATSUNAGA, MOYNIHAN, PRYOR, COCHRAN, and RIEGLE are original sponsors of this legislation.

No one questions the fact that the current health care system in this country is not adequately meeting the needs of millions of Americans. One of the greatest problems, which has been ignored both by the administration and the Congress, is the need for a comprehensive community-based noninstitutional long-term care system for the elderly and disabled. This need, which has long plagued the country, has been ignored both because of its complexity and cost. At present, the issue remains unresolved.

WHAT IS LONG-TERM CARE?

Long-term care is defined here as a range of health and social services needed or utilized by elderly and disabled persons over a prolonged period of time.

Historically, long-term care services have been delivered through institutional settings, regardless of the level of skilled care involved. As a result, older persons would frequently be placed in chronic care hospitals or nursing homes.

Long-term health care services should concentrate on, encourage, and emphasize the continual functional independence of an individual and his or her ability to function with existing impairments and disabilities. Such services are, in part, designed to prevent premature and unnecessary placement in a nuring home.

Elderly people often are institutionalized because the noninstitutional services they need do not exist, and because their economic and social situation is such that they cannot afford to remain in their own home and not necessarily because they require such care.

This problem is compounded by the institutional design of the current system. Once an individual reaches age 65, his or her chance is one/four of entering a nursing home. This chance increases to one/two when an individual reaches age 85.

PROBLEMS OF THE CURRENT SYSTEM

While it is understood that both medicare and medicaid programs have a definite bias toward placing an individual in a hospital or nursing home, medicare offers only one program to assist seniors and persons with disabilities to avoid premature placement in a nursing home—the home health care program.

Yet, the eligibility for this program contains restrictions that force people into hospitals before they can qualify for home health care.

The medicaid program presents yet another problem. Expenditures for nursing home care under the medicaid program have increased from approximately $800 million in 1967 to $6.4 billion in 1977, and are expected to increase to $11 billion by 1981.

During this 10-year period—1967–77—the number of nursing recipients has more than doubled. Further, while in 1964, 14.7 percent of persons age 85 and over were in nursing homes, in 1974, 25.3 percent of the 85-and-over population were in nursing homes. This problem is compounded by the fact that an estimated 10 to 25 percent of nursing home residents do not require the level of care provided, but cannot reenter the community because of—

First, the lack of supportive services necessary to assist them.

Second, a shortage of affordable housing in the community.

Third, the absence of any savings available to the individual, most of

which has been used to pay for nursing home care.

Fourth, the inadequacy of the individual's family's financial resources to provide assistance, due in part to cost and responsibility.

Fifth, the inability of a spouse to provide assistance often attributable to the fact that prolonged institutionalization of one spouse often prepared the remaining community spouse for entry into a nursing home.

Another important point to consider is that persons who are institutionalized will become increasingly less capable to care for themselves the longer they remain in a nursing home. In a recent report from the General Accounting Office, various factors influence an individual's placement into a nursing home, particularly in the medicaid program. For example:

First, there are presently no formal prescreening systems established to assess whether a patient entering a nursing home could be maintained in the community.

Second, current medicaid eligibility policies create financial incentives to use nursing home care rather than noninstitutional community-based services.

Third, for elderly persons eligible for medicaid who do not receive community-based long-term care services because of restrictive State medicaid programs, these eligible persons must enter a nursing home to receive long-term care services.

Fourth, the lack of adequate financial assistance for community long-term care services has had a detrimental effect on many elderly persons who do not want to enter a nursing home.

Fifth, once entering a nursing home, the likelihood of the individual returning to the community is reduced because individuals exhaust their income and assets to qualify for medicaid, and their attempt to return to the community becomes increasingly difficult.

One of the major problems with the current sociohealth care system is that it places people into specific entitlement groups. Those eligible for medicare are one entitlement group, those who qualify for medicaid represent another, and those eligible for title XX are yet another.

While it is true that there may be limited overlap among the different entitlement programs, for the most part what we have established is a social and medical care system for the elderly and disabled that separates people by age or income class. Therefore, while persons 65 and over are eligible for both medicare and medicaid, only very low-income seniors can qualify for medicaid, and thus benefit from both programs.

Yet, despite much public discussion and debate about the problems of long-term care, there has not been a serious legislative attempt to initiate an effective, noninstitutional, long-term care system since the implementation of medicare and medicaid. Rather than genuine reform, one finds incremental changes to a system which neither operates effectively nor efficiently.

This history of long-term care reform has resulted in a lack of available community-based, long-term care services for those in need. Also it has contributed to an unjustified increase in nursing home populations.

Another problem with the current long-term care system is the fact that too little attention has been focused on the role of the family in providing long-term care services. The characteristics of the American family today have changed dramatically from almost a decade ago. For example:

The divorce rate has doubled between 1955 and 1975.

The number of single-parent families has grown.

There is an increased trend toward labor force participation of women.

While families were once active as caretakers, many have assumed the role of a caresifter; that is, the family determines what amount of care they will provide to a senior based on the family's needs and not necessarily on what the senior needs.

GROWTH OF NURSING HOME EXPENDITURES

One of the primary problems in the area of long-term care has been the growth of nursing homes costs, as well as the number of persons who are inappropriately placed in such institutions. As mentioned earlier, it is estimated that somewhere between 10 and 40 percent of those residing in skilled nursing facilities do not require that level of care. This problem, combined with the fact that in fiscal year 1979, 44 cents out of every medicaid dollar went toward the payment of nursing home care which is reflected in a table I shall include at the end of my remarks, demonstrated that expenditures in this area have become a major governmental responsibility.

In two recent papers prepared by the staff from the Health Care Financing Administration for the National Commission on Social Security, two important points were raised:

First, medicaid's role in financing nursing home services nationally is particularly significant. In 1977, 48 percent (623,000) of all nursing home residents used medicaid funds as their primary source of payment. Of the 1977 total national nursing home bill of $18.4 billion, medicaid paid $6.2 billion. This represented 47 percent of all spending and 86 percent of public spending for nursing homes in 1977; and, second, in contrast, medicaid paid $179 million for home health services, less than 1 percent of total medicaid expenditures.

Thus, while Congress originally designed the medicaid program to spend a small portion of its funds on long-term care services—nursing homes—due to congressional and State government liberalizations, the program is now the primary payer for such services.

LONG-TERM CARE COSTS

The principal factors that have stagnated the growth and development of a community-based noninstitutional long-term care system has been both cost and financing. When medicaid began providing benefits in July 1966, it was assumed that financing for the program was sound. However, Congress found it necessary to increase medicare taxes by some 25 percent in order to meet hospital cost increases beyond what had been anticipated. This occurred less than 2 years into the program.

When medicaid conferees met in 1965, the cost of the medicare hospital insurance program was estimated to reach $4 billion in fiscal year 1974. In contrast, the actual expenditures for that year were $8.1 billion. While a portion of this $8.1 billion was attributable to benefit liberalizations enacted after the 1965 estimate was calculated, the impact of these changes was small. Therefore, it is not unfair to say that the 1965 estimates for fiscal year 1974 were almost 100 percent off.

Similarly, estimates of Federal costs for the medicaid program were also low. For example, it was estimated in fiscal year 1972 that the Federal cost for medicaid would be $1.7 billion. The actual costs for that fiscal year were $4.36 billion. Thus, it can be seen how underestimates by the Social Security Administration of the Department of Health, Education, and Welfare actuaries have caused congressional Members to become extremely cautious when examining new health-care initiatives.

Yet, despite this knowledge, Congress continued expansion of the medicare and medicaid programs. This has only added to the costs and confusion, and created a greater dependency upon the Federal Government.

FINANCING LONG-TERM CARE SERVICES

With respect to the issue of financing, it must be understood that the Federal Government cannot and should not be considered the only payer. Rather, alternate ways of financing institutional and noninstitutional services must be examined. Specifically, we must:

First, examine the present tax system, both State and Federal, to determine if changes could be made to assist and encourage families to help care for an elderly and disabled individual;

Second, determine if there is a way for private health insurance to begin to provide coverage of both institutional and noninstitutional long-term care services;

Third, analyze whether private employers who offer health insurance coverage to their employees presently provide long-term care benefits as part of that package of benefits, and in addition, assess the impact of requiring employers to offer certain long-term care benefits; and

Fourth, explore the possibilities of allowing individuals to establish separate individual health insurance (IHA) accounts, a concept similar to individual retirement accounts (IRA).

Because of the need to examine financing options which would not involve or would minimumly involve Federal funds, and considering the absence of a comprehensive national data base on noninstitutional long-term care services, the responsible step that should now be taken at this time from both a fiscal and research perspective, is to pursue

a long-term care approach that would establish such a national data base and also allow the Congress time to examine different program reimbursement and financing options.

Some attempts were made by the previous administration to address this problem; however, in one particular instance $1.5 million was distributed among 15 States as a means of encouraging them to develop a State plan on long-term care. The irony here is that there has not been and presently does not exist a Federal long-term care strategy. The time for taking a band-aid approach as an answer to this issue must stop now.

Based on the experience of underestimating the costs of the medicare and medicaid programs, the direction that I believe we must take now is one of caution. However, it is important that caution is now confused with inaction. For these reasons and those stated throughout, Senator BRADLEY and I have chosen the title XXI approach. The following pages will outline the specifics of the proposal.

TITLE XXI

The purpose of the legislation is to establish a new title XXI under the Social Security Act. This program would establish a 10 statewide demonstration program, to test over a 6-year period the implementation of an organized system of noninstitutional acute and long-term care services, both health and social services for persons 65 and over, and persons who are disabled.

For too long, Congress has been passing legislation that would establish separate entitlement programs for different population subgroups with little or no coordination. For example, there are various noninstitutional active long-term care benefits that persons with disabilities are eligible to receive that elderly persons who may have similar needs are not eligible for and vice versa. This kind of categorical approach has only hindered the ability of seniors and disabled persons to survive outside a nursing home setting. The approach suggested under title XXI is generic in design—that is, providing all noninstitutional acute long-term care services under one title and therefore eliminating much, if not all, of the overlap and duplication that now exists.

WHO IS ELIGIBLE?

The following outlines those persons who would be eligible for benefits under this title. Specifically, any person who is:

Age 65 and over; or

Disabled and who qualified for benefits under title II, XVI, or XVIII of the Social Security Act; or

Who is disabled and is eligible for medical assistance under a State's medicaid program.

BENEFITS

Under the title XXI program, the benefits package would include:

Intermittent nursing care.

Physical, speech, and occupational therapy.

Homemaker-home health aide services

Adult day services.

Respite services.

Case coordination.

Home help services.

Two important points must be addressed here. First, persons who are eligible to receive services under this title will not be able to receive these same services under "any" other program. Second, because this is a demonstration program, some States will be given greater flexibility through the demonstration program to provide different services than those presently listed. Such an approach is similar, in part, to what the State of New York is doing under their nursing home without walls program.

ASSESSMENT AND SCREENING

The title XXI demonstration program requires the establishment of a preadmission screening and assessment team (PAT). It is the purpose of a PAT to determine what kinds of services are necessary for a client to receive. The PAT also has the responsibility of developing a plan of care for each client, and periodically reviewing the needs of the individual.

As part of the demonstration, different team compositions will be tested. For example, utilizing a physician and a nurse, or a nurse practitioner and a physical therapist, or other kinds of PAT compositions to allow for appropriate testing. This is done to insure that there is not an "over" medical bias in the PAT capacity, and to also examine the costs of utilizing different PAT compositions in conducting both the assessment and care plan development.

Another important part of the PAT's responsibility under title XXI program requires that each person, both public and private-pay clients before entering a nursing home, be screened and assessed by the PAT to determine if such institutional care is necessary.

The title XXI proposal will require the PAT to work with hospital discharge planners—when possible—prior to the release of a patient to a SNF or ICF to make sure that individual does not enter a SNF or ICF unless absolutely necessary. While we ought not to prohibit private-pay clients from entering nursing homes, we can offer them alternatives to nursing home care that exist in the community.

REIMBURSEMENT METHODOLOGY

As part of the title XXI demonstration, three different reimbursement methodologies will be tested:

First, fee schedules.

Second, prospective reimbursement.

Third, capitation payments.

COPAYMENTS

Under the title XXI program, a copayment system will be tested for individuals participating in the program.

Such a copayment system will work as follows:

First, all persons who become qualified for medicaid will not be required to make any copayments;

Second, all persons with incomes of $12,000 or below will be eligible to receive 10 free visits before they begin to make copayments; and

Third, all persons with incomes above $12,000 will be required to make copayments to this program beginning with the first visit.

Title XXI represents that important step forward. Even though we are in the midst of the President's economic recovery plan, it is still possible to move forward on a comprehensive proposal such as we are suggesting. Without the kind of information that a title XXI demonstration would yield, we simply will not have the answers we need.

Mr. President, this legislation will give the Congress the needed data and information it needs. In addition, I believe this proposal will yield information on how to best correct some of the problems of fraud and abuse we presently face in the area of home health care.

Finally, Mr. President, I ask unanimous consent that the bill and the table referred to earlier be printed in full in the RECORD.

There being no objection, the bill and the table were ordered to be printed in the RECORD, as follows:

S. 861

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Noninstitutional Acute and Long-Term Care Services for the Elderly and Disabled Act".

NONINSTITUTIONAL ACUTE AND LONG TERM CARE SERVICES FOR THE ELDERLY AND DISABLED

SEC. 2. The Social Security Act is amended by adding at the end thereof the following new title:

"TITLE XXI—NONINSTITUTIONAL ACUTE AND LONG-TERM CARE SERVICES FOR THE ELDERLY AND DISABLED

"PURPOSE OF TITLE

"SEC. 2101. (a) It is the purpose of this title—

"(1) to provide a comprehensive system of noninstitutional health, developmental, and social services for individuals with chronic disabilities, to ensure that such individuals are assisted in remaining in their own homes or communities, and therefore avoid unnecessary placement of such individuals in institutional facilities, and, where possible, to allow individuals in such facilities to return to their communities;

"(2) to test three different methods of reimbursement in order to determine the most cost-effective and efficient way of providing the services available under this title;

"(3) to assess the impact of the services provided under this title in aiding families in caring for individuals eligible for benefits under this title, and, to the extent possible, to determine if the provision of such services has encouraged such families to forestall placement of such individuals in nursing homes or other institutional facilities; and

"(4) to assess how systems serving both the elderly and the disabled can be combined in a coordinated and consolidated generic approach, thus eliminating the fragmented categorical design of the current long-term care system.

(b) It is not the purpose of this title to replace assessment systems, particularly those in place and being utilized by various disability programs.

"SCOPE OF BENEFITS

"SEC. 2102. (a) Each eligible individual (as determined under section 2103) shall be entitled to the following benefits:

"(1) Home health services.

"(2) Homemaker-home health aide services.

"(3) Adult day services.

"(4) Respite care services for up to 14 days, or 336 hours, in any calendar year.

"(5) Service coordination.

"(6) Home help services.

"(7) Other services which the Secretary determines may be of value to aged or disabled individuals, which shall be provided on a demonstration basis in one or more States to eligible individuals.

"(b) For purposes of this title—

"(1)(A) The term 'home health services' means the following items and services furnished to an individual which are furnished by a home health agency, by a center or agency for the handicapped, or by others under arrangements with them made by such entity, under a plan developed, approved, and periodically reviewed by a preadmission screening and assessment team (PAT) (as defined in section 2104) which items and services are, except as provided in clause (vi), provided on a visiting basis in a place of residence used as such individual's home—

"(i) part-time or intermittent nursing care provided by or under the supervision of a registered professional nurse;

"(ii) physical, occupational, or speech therapy;

"(iii) medical supplies (other than drugs and biologicals), and the use of medical appliances, while under such a plan;

"(iv) drugs and biologicals necessary for the control of a disability (as determined under subparagraph (E));

"(v) in the case of a home health agency which is affiliated or under common control with a hospital, medical services provided by an intern or resident-in-training of such hospital under a teaching program of such hospital approved as provided in section 1861(b)(6) of this Act; and

"(vi) any of the foregoing items and services which are provided on an outpatient basis, under arrangements made by the home health agency, at a hospital, skilled nursing facility, or intermediate care facility, or at a rehabilitation center (within the meaning of section 1861(p)) which meets such standards as may be prescribed in regulations, and—

"(I) the furnishing of which involves the use of equipment of such a nature that the items and services cannot readily be made available to the individual in such place of residence, or

"(II) which are furnished at such facility while he is there to receive any such item or service described in division (I), but not including transportation of the individual in connection with any such item or service unless such transportation is included on a demonstration basis as authorized under subsection (a)(7);

excluding, however, any other item or service if it would not be included under section 1831(b) if furnished to an inpatient of a hospital.

"(B) The term 'home health agency' means a public agency or private organization, or a subdivision of such an agency or organization, which—

"(i) is primarily engaged in providing skilled nursing services and other therapeutic services;

"(ii) has policies, established by a group of professional personnel (associated with the agency or organization), including one or more physicians and one or more registered professional nurses, to govern the services (referred to in clause (i)) which it provides, and provides for supervision of such services by a physician or registered professional nurse;

"(iii) maintains clinical records of all patients;

"(iv) in the case of an agency or organization in any State in which State or applicable local law provides for the licensing of agencies or organizations of this nature, (I) is licensed pursuant to such law, or (II) is approved, by the agency of such State or locality responsible for licensing agencies or organizations of this nature, as meeting the standards established for such licensing;

"(v) has in effect an overall plan and budget that meets the requirements of section 1861(z); and

"(vi) meets such other conditions of participation as the Secretary may find necessary in the interest of the health and safety of individuals who are furnished services by such agency or organization.

"(C) The term 'social or health organization' means any organization or agency providing, directly or indirectly, social or health services to individuals eligible to receive services under this title.

"(D) The term 'center or agency for the handicapped' means—

"(i) a single- or multipurpose facility the function of which is to assist individuals having physical, mental, developmental, or emotional impairments to become more functional members of the community by providing programs or services which may include (but are not limited to) recreation, education, health care, social development, independent living, and physical rehabilitation (but excluding any facility the primary function of which is to provide residential care on a 24 hours per day basis); or

"(ii) any agency certified or licensed by the State as being an agency designed to assist individuals eligible for services under this title to reach their maximum level of independence.

"(E) The term 'desirability' means (i) inability to engage in any substantial gainful activity by reason of any medically determinable physical or mental impairment which can be expected to result in death or has lasted or can be expected to last for a continuous period of not less than 12 months (or, in the case of a child under the age of 18, a medically determinable physical or mental impairment of comparable severity), or (ii) blindness (as defined in section 216(i)(1)).

"(2)(A) The term 'homemaker-home health aide services' means services provided by a homemaker-home health aide who meets training guidelines specified by the State, or by a center or agency for the handicapped, to an individual, which are designed to maintain or increase the personal care of such individual and his home (not including the structure of the home) in a manner which promotes the functional independence of the individual and to avoid the need for institutionalization. Such services shall include—

"(i) personal care services designed to assist such individual in the activities of daily living such as bathing, exercising, personal grooming, and getting in and out of bed; and

"(ii) household care services such as maintaining a safe living environment, light housekeeping, and ensuring good nutrition (including the purchase and preparation of food).

"(B) The term 'homemaker-home health aide agency' means a separate agency, or a program which is part of a multi-purpose agency (including a county or local health department, a family or child welfare service agency, a multi-purpose senior center, a center or agency for the handicapped, or any similar agency), which meets guidelines specified by, and is approved by, the State as being capable of providing homemaker-home health aide services as defined in subparagraph (A).

"(3) The term 'adult day services' means services provided (other than care provided for the primary objective of providing medical services) on a regular basis, but less than 24 hours per day, in a multipurpose senior center, rehabilitation center, center or agency for the handicapped, or any other facility which meets guidelines specified by, and is approved by, the State, which are provided to an individual who is in need of social, training, or developmental activities during the daytime hours because of a functional impairment but does not require institutionalization, and which are provided for the purpose of assisting such individual to maintain a maximum level of independence. Such services may include (but are not limited to) provision of health care, recreation and educational activities, physical and vocational rehabilitation, and social, developmental, or independent living services.

"(4) The term 'respite care services' means services for an individual who is unable to care for himself on a full-time basis, which are provided on a temporary basis to such individual to provide relief for the person who normally cares for such individual. Such services shall be provided by persons who have met specific training guidelines specified by the State, and who are employed by a local public health department, a local agency participating in a State program established under title XX of this Act, a certified home health agency, a homemaker-home health aide agency, a center or agency for the handicapped, or any agency or organization which meets guidelines specified by the State for agencies which provide services described in the preceding sentence. Such services shall, when necessary and appropriate, be provided in addition to other services under this title to ensure that such individual receives a coordinated system of services designed to help that individual reach a maximum level of independence and to lessen such individual's dependence upon the individual who normally cares for him.

"(5) The term 'service coordination' means services, provided to an individual who has a developmental or other disability, which will assist such individual in gaining access to necessary social, medical, health, educational, and other services, including—

"(A) follow-along services which insure, through a continuing relationship between an agency or provider and such individual and the individual's family or guardian, that the changing needs of such individual and family relating to such disability are recognized and appropriately met; and

"(B) services which provide support to such individual, access to and coordination with appropriate service providers, information relating to available programs and services, and monitoring of such individual's progress.

"(6) The term 'home help services' means household care services (not including care of the structure of the home) such as maintaining a safe living environment, light housekeeping, and ensuring good nutrition (including the purchase and preparation of food), provided by an individual who meets such training requirements as may be developed by the State and approved by the Secretary.

"(7) The term 'institutional facility' means a hospital, a skilled nursing facility, or an intermediate care facility as those terms are defined for purposes of titles XVIII and XIX of this Act.

"ELIGIBILITY FOR BENEFITS

"SEC. 2103. (a) Every individual who resides in a State in which this title is in effect and who—

"(1) has attained age 65, is a resident of the United States, and is either a citizen or an alien lawfully admitted for permanent residence;

"(2) is disabled and is eligible for benefits under title II, XVI, or XVIII of this Act;

"(3) is disabled and is eligible for medical assistance under a State plan approved under title XIX of this Act; or

"(4) was an eligible individual under this title by reason of paragraph (2) or (3) but ceased to meet the requirements of such paragraph, but only if it is determined by a PAT designated under section 2104 that—

"(A) loss of benefits under this title would seriously jeopardize such individual's ability to continue to live in a noninstitutional community residence, and

"(B) such individual's income is not sufficient to allow him to provide for himself a reasonable equivalent of the services available to him as an eligible individual under this title;

is an eligible individual for purposes of this title.

"(b) Certification of eligibility under this section shall be made by the Secretary.

"PREADMISSSION SCREENING AND ASSESSMENT

"SEC. 2104. (a)(1) No eligible individual as defined under section 2103 shall be eligible to receive any benefits under this title, or any long-term care benefits under title XVIII of this Act, or any long-term care under a State plan approved under title XIX or XX of this Act, unless such individual has been screened and assessed in accordance with the provisions of this title, and has a plan of care (as defined in this section) under which the provision of such care or benefits is determined to be appropriate.

"(2) The purpose of such assessment and screening is to provide, through the use of a preadmission assessment and screening team (PAT), a thorough evaluation of each individual's health status, functional capabilities, and, where appropriate, home and family environment, to determine the types and frequency of services required by such individual in order to assure the achievement of the maximum level of independence by such individual, consistent with the availability and accessibility of such services in the community, and to include a plan for patient education to assure that such individual and his family understands what services are being provided to him, and why they are being provided.

"(b)(1) The PAT services shall be provided to every eligible individual. Such individual's physician shall be a member of the PAT whenever possible, and shall, in any event, be consulted with and kept informed by the PAT with respect to the plan of care developed by such team for such individual and shall be consulted as appropriate while the plan of care is implemented to ensure successful implementation. Other professionals involved in providing care to such individual shall be consulted with and kept informed by the PAT with respect to the plan of care. Such screenings and assessments shall include the following:

"(A) An initial screening to determine the need for and appropriateness of any acute or long-term care provided for or reimbursed under this title, or any long-term care provided for or reimbursed under title XVIII, XIX, or XX of this Act, that may be required by the individual at the time of initial referral.

"(B) The preparation of a plan of care for the individual based upon a thorough assessment of the individual's health status and functional capabilities. Such plan of care shall determine those acute and long-term care services (if any) which are most appropriate for the individual. Payment under this title shall not be made for any services unless such services are approved in the plan. Payment under title XVIII, and under State plans approved under title XIX or XX of this Act, shall not be made for any long-term care services unless such services are approved in the plan. Such plan shall also indicate the types of services required by such individual, the frequency of such services, and the frequency of reassessments by the PAT. Any change in the type or frequency of the services provided under the plan of care shall be preceded by a reassessment of such individual by the PAT. The PAT shall cooperate with any other person providing medical, health, social, or other services relevant to such individual's plan of care to ensure that other services appropriate to meeting the long-term care needs of such individual shall be incorporated into such plan of care so as to ensure maximum functional independence for the individual, and any change in such plan of care shall require agreement as to such change between the PAT and such other persons. If no such agreement can be reached, final authority for the plan of care shall rest with the PAT.

"(C) An ongoing assessment of the individual's status and appropriate update of the plan of care. An initial review of the plan of care shall be made within 30 days after the initiation of the plan of care and ongoing assessments shall be made at such times as the PAT determines to be necessary, but not less often than every six months for any individual aged 65 or over. Assessments shall be made in cooperation with any agency providing services to such individual under this title.

"(D) Supplying the individual or his representative with a list of all providers of services in the area who are qualified to provide services under this title which such individual may require, and, if such individual is unable to contact such a provider, contacting such a provider on behalf of such individual. In developing the plan of care, the PAT shall utilize, when possible and appropriate, services provided by volunteers, to ensure that such volunteer services are continued whenever possible.

"(E) Referral to any other appropriate services specifically designated for the elderly or disabled and available to such individual in his community, and coordination with community mental health centers with respect to services provided under the Mental Health Systems Act.

"(F) The collection, at the time the PAT performs the assessments and screenings, of relevant information with respect to such individuals for the purpose of developing a national data base. Such information shall include functional ability at the start of care, functional ability after care, and, to the extent possible, the extent and type of involvement by family and friends in the care of such individual. Such data shall remain confidential and be used to make comparisons with respect to the average number of visits required, the average length of a visit, the average cost per visit, the average cost per individual and per case, and any other information deemed necessary. Such data shall be broken down by demographic factors, health status, services provided, and other procedural factors as the Secretary determines to be appropriate.

"(G) In the case of an individual who is being discharged from an institutional facility, an assessment of such individual's place of residence in the community when appropriate and necessary; and such assessment shall be made in coordination with the discharge unit of such facility.

"(2) Such screenings and assessments shall be provided by a preadmission screening and assessment team (PAT) designated under subsection (c) without charge to the individual.

"(3) Except in the case of an individual who is a resident in an institutional facility, such screenings and assessments may be provided in the individual's place of residence, or, if the individual is capable of traveling to the location of the PAT, at such location.

"(c)(1) The Governor of each State shall designate the State agency or agencies which shall administer or supervise the administration of the PAT program in such State, and if more than one agency is so designated, the Governor shall determine the parts of such program which each shall administer and shall ensure cooperation among such agencies. Agencies so designated may include the State's department of health (or equivalent agency), the State agency designated under the State plan under title XIX of this Act, the State's department on aging (or equivalent agency), the State's department on mental retardation or developmental disabilities, the State's department for social services, or the State's department for the blind or visually handicapped. Such agency or agencies designated by the Governor shall coordinate the designation of preadmission screening and assessment teams (PAT) in as many areas of the State as such agency or agencies, and the Secretary, determine to be necessary. Such agency or agencies shall designate entities, in those areas, which shall be responsible for establishing the PAT. Such entities may include the State agency designated under the State plan approved under title XIX or XX, an area agency on aging, the discharge planning unit of a hospital, a local government's department of health, a rural health clinic, a health maintenance organization (HMO), a center or agency for the handicapped, a home health agency, or any similar entity, if such entity meets the requirements of this title for a PAT.

"(2)(A) The members of a preadmission screening and assessment team (PAT) may be full- or part-time employees of the entity establishing the PAT or may operate under contractual arrangements with the entity which will ensure the availability of appropriate personnel to conduct the required screenings and assessments.

"(B) The Secretary shall determine the composition of the PAT, and such composition shall initially vary in different States in order to assess the effectiveness of each such composition. In some States each PAT shall consist of at least—

"(i) a physician, who shall be the individual's personal physician or, if the individual has no personal physician or if such personal physician is unable or unwilling to participate in the PAT, shall be a physician designated by the entity establishing the PAT,

"(ii) a registered nurse or nurse practitioner, and

"(iii) a social services worker.

"(C) In other States the Secretary shall test other combinations of professionals as the members of a PAT in order to determine the most efficient and cost-effective mode of conducting preadmission screening and assessment. Such professionals may include, where necessary and appropriate, any of the following:

"(i) Any of the professionals listed in subparagraph (B).

"(ii) A physical, occupational, or speech therapist.

"(iii) A qualified professional in the field of mental retardation or developmental disabilities.

"(iv) a qualified professional in the field of blindness or visual impairment.

"(v) A volunteer senior citizen advocate.

"(vi) A volunteer advocate for the disabled.

"(vii) A qualified professional in the field of social work.

"(viii) Such other professionals as the PAT may determine to be necessary.

"(D) Any individual who is a member of, or consultant to, a PAT, shall meet such training requirements as may be developed by the State and approved by the Secretary.

"(E) In any case where a rural health

clinic has been designated as a PAT, a physician assistant or nurse practitioner (as defined in section 1861 (aa) (2)) may be a member of such PAT instead of a physician.

"(3) The plan of care for each individual shall be developed and agreed upon by the PAT and such individual (or such individual's representative where appropriate).

"(4) Each PAT within a State shall collect data with respect to individuals receiving services under this title or referred for other services by the PAT, utilizing a statewide uniform assessment instrument. Each State shall determine the type of uniform instrument it will use, but such instrument must contain at least the information required under subsection (b)(1)(F) and must be approved by the Secretary.

"(d) The Secretary shall reimburse any designated preadmission screening and assessment team (on a per visit basis), and any State, for the reasonable costs incurred by such PAT or State in carrying out its duties under this title. The per visit reasonable cost for providing services under this title shall be determined on a State-by-State negotiated rate basis between the Secretary and the appropriate State agencies, but the Secretary shall make the final determination of such rates.

"(e) Each PAT shall submit two copies of the plan of care developed by such PAT for an eligible individual to the Secretary, or the carrier (if any) having an agreement with the Secretary with respect to services provided to such individual, for the purpose of assisting the Secretary or the carrier to verify, prior to payment, that all bills submitted for services provided to such individual are for services consistent with the plan of care and authorized by the PAT.

"(f) If a State fails to carry out its duties under this title, the Secretary shall assume such duties and shall designate preadmission screening and assessment teams in such State.

"COPAYMENTS BY ELIGIBLE INDIVIDUALS

"SEC. 2105. (a) Subject to the provisions of subsection (b), copayments for any eligible individual shall be determined as follows:

"(1) Any eligible individual whose income is at or below the income level which would qualify such individual for benefits under the State plan approved under title XIX for the State in which he resides for a calendar year, if such individual were otherwise qualified for such benefits, shall not be required to make any copayment under this title for such calendar year.

"(2) Any eligible individual who does not meet the requirements of paragraph (1) who has an income for any calendar year which is less than $12,000, shall be required to make copayments with respect to benefits received under this title for services in an amount equal to 20 percent of the reimbursable amount (as determined under section 2106 (a)) for any such services received in such calendar year in excess of 25 visits.

"(3) Any eligible individual who does not meet the requirements of paragraph (1) who has an income for any calendar year which is $12,000 or greater, shall be required to make copayments with respect to benefits received under this title for services other than respite care services in an amount equal to 20 percent of the reimbursable amount (as determined under section 2106(a)).

"(b)(1) No eligible individual shall be required to make copayments under subsection (a) in any calendar year which are in excess of the applicable percent of his income for such calendar year as determined under the following table:

"Income:	*Applicable percent*
$0 to $3,500	0
$3,501 to $5,000	1
$5,001 to $8,500	2
$8,501 to $10,000	3
$10,000 to $15,000	4
$15,001 to $20,000	5
$20,001 to $30,000	6
$30,001 to $40,000	7
$40,001 or over	8

"(2) For purposes of this subsection the term 'income' means income as determined under section 1612(a) of this Act.

"(3) All income determinations under this title shall be made by the Secretary.

"(4) The Secretary shall collect such copayments as may be appropriate and shall deposit the amounts collected into the Federal Long-Term Care Trust Fund established under this title.

"PAYMENT OF BENEFITS

"SEC. 2106. (a)(1) The Secretary shall pay, on behalf of each eligible individual who incurs expenses for services with respect to which benefits are payable under this title, amounts as determined under paragraph (2), as the Secretary may determine to be appropriate.

"(2) For the purpose of demonstrating the feasibility and effectiveness of alternative methods of reimbursement under this title, the Secretary shall provide that such reimbursement be made on the basis of a fee schedule, a capitation basis, or on a prospective basis. Such methods of reimbursement shall be developed jointly by the Secretary and the appropriate State agencies as determined by the Governor. Such reimbursement shall reflect urban and rural differentials and shall be adjusted periodically to reflect changes in costs. Proposed methods of reimbursement shall be submitted to each unit of general purpose local government to allow providers in such area 30 days for comment. Such proposals shall be accompanied by an explanation of how the method was determined. The State shall issue final reimbursement methods within 60 days after reviewing and evaluating public comment received with respect to such methods after they have been approved by the Secretary.

"(3) The amount which may be paid under this title for adult day services in any State under paragraph (2) may not exceed 75 percent of the amount paid for intermediate care facility services under the State plan of such State approved under title XIX, as determined on a daily, monthly, or annual basis as the Secretary determines to be appropriate

"(b) No payment shall be made to any person under this title unless there has been furnished such information as may be necessary in order to determine the amounts due such person under this title for the period with respect to which the amounts are being paid, or for any prior period.

"(c) No payment may be made under this title with respect to any service provided to an individual unless such service is approved by a preadmission screening and assessment team in accordance with section 2104.

"(d) No payment shall be made to any person under this title unless such person agrees that the amount paid under this title shall be the full charge for such service, and that the eligible individual shall not be required to make any payment to such person for such service.

"USE OF CARRIERS AND STATE AGENCIES

"SEC. 2107. (a)(1) The Secretary may enter into agreements with carriers for the purpose of administering the benefits available under this title in the same manner in which such agreements are entered into under section 1842 for purposes of administering part B of title XVIII, to the extent consistent with the provisions of this title.

"(2)(A) Any agreement entered into under paragraph (1) shall provide that the carrier will transmit copies of all bills submitted for payment for services under this title to the PAT having responsibility over the plan of care for the individual with respect to whom such services were rendered.

"(3) Any person submitting a bill directly to the Secretary for payment for services under this title shall submit a copy of such bill to the PAT having responsibility over the plan of care for the individual with respect to whom such services were rendered.

"(b) The Secretary shall make an agreement with any State which is able and willing to do so, in the same manner as under section 1864, under which an appropriate State agency shall make determinations as to whether an agency or organization meets the requirements of this title as a provider of services.

"FEDERAL LONG-TERM CARE TRUST FUND

"SEC. 2108. (a) There is hereby created on the books of the Treasury of the United States a trust fund to be known as the 'Federal Long-Term Care Trust Fund' (hereinafter in this section referred to as the 'Trust Fund'). The Trust Fund shall consist of such gifts and bequests as may be made as provided in section 201(i)(1), and such amounts as may be deposited in, or appropriated to, such fund as provided in this title.

"(b) With respect to the Trust Fund, there is hereby created a body to be known as the Board of Trustees of the Trust Fund (hereinafter in this section referred to as the 'Board of Trustees') composed of the Secretary of the Treasury, the Secretary of Labor and the Secretary of Health and Human Services, all ex officio. The Secretary of the Treasury shall be the Managing Trustee of the Board of Trustees (hereinafter in this section referred to as the 'Managing Trustee'). The Administrator of the Health Care Financing Administration shall serve as the Secretary of the Board of Trustees. The Board of Trustees shall meet not less frequently than once each calendar year. It shall be the duty of the Board of Trustees to—

"(1) hold the Trust Fund;

"(2) report to the Congress not later than the first day of April of each year on the operation and status of the Trust Fund during the preceding fiscal year and on its expected operation and status during the current fiscal year and the next 2 fiscal years;

"(3) report immediately to the Congress whenever the Board is of the opinion that the amount of the Trust Fund is unduly small; and

"(4) review the general policies followed in managing the Trust Fund, and recommend changes in such policies, including necessary changes in the provisions of law which govern the way in which the Trust Fund is to be managed.

The report provided for in paragraph (2) shall include a statement of the assets of, and the disbursements made from, the Trust Fund during the preceding fiscal year, an estimate of the expected income to, and disbursements to be made from, the Trust Fund during the current fiscal year and each of the next 2 fiscal years, and a statement of the actuarial status of the Trust Fund. Such report shall be printed as a House document of the session of the Congress to which the report is made.

"(c) It shall be the duty of the Managing Trustee to invest such portion of the Trust Fund as is not, in his judgment, required to meet current withdrawals. Such investments may be made only in interest-bearing obligations of the United States or in obligations guaranteed as to both principal and interest by the United States. For such purpose such obligations may be

acquired on original issue at the issue price, or by purchase of outstanding obligations at the market price. The purposes for which obligations of the United States may be issued under the Second Liberty Bond Act, as amended, are hereby extended to authorize the issuance at par of public-debt obligations for purchase by the Trust Fund. Such obligations issued for purchase by the Trust Fund shall have maturities fixed with due regard for the needs of the Trust Fund and shall bear interest at a rate equal to the average market yield (computed by the Managing Trustee on the basis of market quotations as of the end of the calendar month next preceding the date of such issue) on all marketable interest-bearing obligations of the United States then forming a part of the public debt which are not due or callable until after the expiration of 4 years from the end of such calendar month; except that where such average market yield is not a multiple of one-eighth of 1 per centum, the rate of interest on such obligations shall be the multiple of one-eighth of 1 per centum nearest such market yield. The Managing Trustee may purchase other interest-bearing obligations of the United States or obligations guaranteed as to both principal and interest by the United States, on original issue or at the market price, only where he determines that the purchase of such other obligations is in the public interest.

"(d) Any obligations acquired by the Trust Fund (except public debt obligations issued exclusively to the Trust Fund) may be sold by the Managing Trustee at the market price, and such public-debt obligations may be redeemed at par plus accrued interest.

"(e) The interest on, and the proceeds from the sale or redemption of, any obligations held in the Trust Fund shall be credited to and form a part of the Trust Fund.

"(f) The Managing Trustee shall transfer to the Trust Fund on a periodic basis amounts from the Federal Hospital Insurance Trust Fund and the Federal Supplementary Medical Insurance Trust Fund in accordance with the provisions of section 2109.

"(g) There shall be transferred on a quarterly basis to the Trust Fund from the general fund of the Treasury the amounts withheld from payments to States under title XIX of this Act as required under section 2110.

"(h) The Secretary of Health and Human Services shall deposit into the Trust Fund all copayment amounts collected under section 2105.

"(i) There are authorized to be appropriated for each fiscal year to the Trust Fund such additional sums as may be necessary to ensure that sufficient funds are available in the Trust Fund to make all payments provided for by this title.

"(j) The Managing Trustee shall pay from time to time from the Trust Fund such amounts as the Secretary of Health and Human Services certifies are necessary to make the payments provided for by this title. and the payments with respect to administrative expenses in accordance with section 201(g)(1).

"TRANSFER OF FUNDS FROM TITLE XVIII TRUST FUNDS

"SEC. 2109. There shall periodically be transferred to the Federal Long-Term Care Trust Fund, from the Federal Hospital Insurance Trust Fund and from the Federal Supplementary Medical Insurance Trust Fund, as the secretary determines to be appropriate, amounts which the Secretary estimates to be the amounts which would have been expended from such Trust Funds for services defined in section 2102 during such period if this title had not been enacted.

"REDUCED PAYMENT TO STATES FOR LONG-TERM CARE SERVICES

"SEC. 2110. (a) The amount of the payment for each fiscal year under title XIX of this Act to be made to any State which participates under this title shall be reduced by an amount equal to—

"(1) 99 percent of the amount expended by such State for fiscal year 1980 under its State plan approved under title XIX for services defined in section 2102 provided to individuals who were, at the time they received such services, individuals described in section 2103(a); minus

"(2) the amount reimbursed to such State with respect to such services by the Federal Government under section 1903 for fiscal year 1980.

"(b) An amount equal to the amount of the reductions made under the provisions of subsection (a) shall be deposited into the Federal Long-Term Care Trust Fund in accordance with the provisions of section 2108.

"REGULATIONS OF SECRETARY

"SEC. 2111. The Secretary shall issue regulations as may be necessary to carry out the provisions of this title. Such regulations shall, to the extent feasible and consistent with this title, be coordinated with regulations issued under titles XVIII, XIX, and XX of this Act.

"ADMINISTRATIVE PROVISIONS

"SEC. 2112. Except where otherwise provided, the Secretary shall carry out the provisions of this title in the same manner as the Secretary is authorized to carry out the provisions of title XVIII of this Act, and any individual or other person shall have the same rights with respect to determinations made by the Secretary as are provided under title XVIII.

"PARTICIPATING STATES

"SEC. 2113. (a) This title shall be in effect only in ten States selected by the Secretary, which shall consist of one State in each of the ten regions of the Department of Health and Human Services.

"(b) With respect to eligible individuals residing in such States, no services or benefits which are services or benefits described in section 2102(a) may be provided to such individuals under any other program funded in whole or in part by Federal funds.".

MEDICARE AMENDMENTS

SEC. 3. (a) Title XVIII of the Social Security Act is amended by adding at the end thereof the following new section:

"COORDINATION WITH TITLE XXI

"SEC. 1884. Notwithstanding any other provision of this title, no payment shall be made under this title to or on behalf of an individual who is an eligible individual under title XXI of this Act—

"(1) for any service defined in section 2102 of this Act; or

"(2) for any extended care services unless such individual undergoes a preadmission screening and assessment as provided in section 2104 of this Act, and the need for such services has been approved under such individual's plan of care under such section 2104.".

(b) Section 1861(e) of such Act is amended—

(1) by striking out "and" at the end of paragraph (8);

(2) by redesignating paragraph (9) as paragraph (11); and

(3) by inserting after paragraph (8) the following:

"(9) provides an adequate referral service for patients with respect to services available to them under title XXI of this Act;

"(10) provides that every patient who is an eligible individual under title XXI of this Act, prior to discharge from such institution, shall be screened and assessed by a preadmission screening and assessment team designated under such title XXI if the physician attending such patient determines that such patient requires any services provided under such title XXI; and".

(c) Section 1861(j) of such Act is amended—

(1) by striking out "and" at the end of paragraph (14);

(2) by redesignating paragraph (15) as paragraph (17); and

(3) by inserting after paragraph (14) the following new paragraphs:

"(15) provides an adequate referral service for patients with respect to services available to them under title XXI of this Act;

"(16) provides that every patient who is an eligible individual under title XXI of this Act, prior to or upon admission to such institution, shall be screened and assessed by a preadmission screening and assessment team designated under such title XXI for the purpose of determining if care in such institution is appropriate for such individual; and".

MEDICAID AMENDMENTS

SEC. 4. (a) Section 1902(a) of the Social Security Act is amended—

(1) by striking out "and" at the end of paragraph (42);

(2) by striking out the period at the end of paragraph (43) and inserting in lieu thereof "; and"; and

(3) by inserting after paragraph (43) the following:

"(44) (A) provide that no service defined in section 2102 of this Act shall be provided or paid for under the State plan for any individual who is an eligible individual under title XXI of this Act; and

"(B) provide that no long-term care services shall be provided or paid for under the State plan for any individual who is an eligible individual under title XXI of this Act unless such individual has undergone a preadmission screening and assessment as provided in section 2104 of this Act, and the need for such services has been approved under such individual's plan of care under section 2104.".

(b) Section 1903 of such Act is amended by adding at the end thereof the following new subsection:

"(s) The amount otherwise payable under the preceding provisions of this section for each fiscal year shall be reduced as provided in section 2110 of this Act for States participating in title XXI.".

(c) The first sentence of section 1905(c) of such Act is amended by striking out "and" before "(4)" and by inserting before the period at the end thereof the following: ", (5) provides an adequate referral service for patients with respect to services available to them under title XXI of this Act, and (6) provides that every patient who is an eligible individual under title XXI, prior to or upon admission to such institution, shall be screened and assessed by a preadmission assessment and screening team designated under title XXI of this Act for the purpose of determining if care in such institution is appropriate for such patient".

SOCIAL SERVICES AMENDMENTS

SEC. 5. Section 2003(d)(1) of the Social Security Act is amended—

(1) by striking out "and" at the end of subparagraph (J);

(2) by striking out the period at the end of subparagraph (K) and inserting in lieu thereof "; and"; and

(3) by inserting after subparagraph (K) the following:

"(L)(i) provide that no service defined in section 2102 of this Act shall be provided or paid for under the State plan for any individual who is an eligible individual under title XXI of this Act; and

"(ii) provide that no long-term care services shall be provided or paid for under the State plan for any individual who is an eligible individual under title XXI of this Act unless such individual has undergone a preadmission screening and assessment as provided in section 2104 of this Act, and the need for such services has been approved under such individual's plan of care under section 2104.".

LIMITATION ON FEDERAL PARTICIPATION IN CAPITAL EXPENDITURES WITH RESPECT TO PROVIDERS OF SERVICES UNDER TITLE XXI

SEC. 6. (a)(1) Section 1122(a) of the Social Security Act is amended by striking out "title V, XVIII, and XIX" and inserting in lieu thereof "titles V, XVIII, XIX, and XXI".

(2) Section 1122(d)(1) of such Act is amended by striking out "titles, V, XVIII, and XIX", by striking out "titles V, XVIII, and XIX", and by inserting in lieu thereof in each instance "titles V, XVIII, XIX, and XXI".

(3) Section 1122(d)(2) of such Act is amended by striking out "title V, XVIII, or XIX" and inserting in lieu thereof "title V, XVIII, XIX, or XXI".

(4) Section 1122(e) of such Act is amended by striking out "titles V, XVIII, and XIX" and inserting in lieu thereof "titles V, XVIII, XIX, and XXI".

(b) Section 1122 of such Act is amended by adding at the end thereof the following new subsection:

"(j) For purposes of this section the term 'health care facility' includes any entity providing services for which payment may be made under title XXI, and the term 'capital expenditure' includes the establishment of any such entity providing services for which payment may be made under title XXI without regard to the dollar amount involved.".

EFFECTIVE DATES; REPORTS

SEC. 7. (a) The amendments made by this Act shall become effective on January 1, 1982 and shall remain in effect until December 31, 1987.

(b)(1) The Secretary of Health and Human Services shall monitor the effect of the amendments made by this Act with respect to any changes in the utilization of inpatient services, any changes in the utilization of the various types of services provided under titles XVIII, XIX, XX, and XXI of the Social Security Act, and any other trends in costs or utilization rates of various services, and shall also test and evaluate the effects of implementing a copayment requirement beginning with the first visit as compared to a copayment requirement under such title XXI beginning after twenty-five visits. The Secretary shall submit an interim report to the Congress with respect to such monitoring not later than January 1, 1984, and a final report not later than January 1, 1988.

(2) The Comptroller General of the United States shall also conduct an ongoing evaluation of the effect of the amendments made by this Act with respect to utilization of services, and shall submit an interim report to the Congress with respect to such evaluation not later than January 1, 1984, and a final report not later than January 1, 1988.

(3) The reports submitted under paragraphs (1) and (2) shall each include a recommended strategy for implementing title XXI of the Social Security Act on a national basis, with particular emphasis on implementation at the State and local levels. Such reports shall include—

(A) an analysis of potential obstacles to such implementation;

(B) suggested legislative changes which may be necessary to ensure effective and efficient implementation; and

(C) a detailed plan for such implementation.

(4) The Office of Management and Budget shall prepare an analysis of the budgetary impact of the implementation of such title on a national basis, and shall submit an interim report to the Congress with respect to such analysis not later than January 1, 1984, and a final report not later than January 1, 1988.

GROWTH IN MEDICAID NURSING HOME EXPENDITURES

	In billions of dollars			Title 19 per dollar SNF/ICF cost

Mr. BRADLEY. Mr. President, I am pleased to join Senator PACKWOOD as well as Senators HEINZ, MATSUNAGA, MOYNIHAN, PRYOR, COCHRAN, and RIEGLE in introducing today a bill to create a new title—title XXI—of the Social Security Act. The purpose of this legislation is to demonstrate the feasibility of a comprehensive system of noninstitutional long-term-care services for the aged and disabled. Our emphasis here is on noninstitutional, for our intent is to insure that those Americans who are aged 65 and over and those who are disabled are assisted in remaining as functionally independent as possible in their own communities.

It has become increasingly obvious, Mr. President, that we must revise our policies governing the provision of services to those who require long-term care. Placing people in nursing homes may be appropriate in certain cases; but just as frequently such placements can have adverse social and economic effects on our elderly and disabled citizens, on our health care system, and on the public budget. This is especially true when the only reason people are in nursing homes is because adequate services are not available in their own community.

The evidence of the past 15 years of increasing nursing home usage at increasing public cost suggests the need for reevaluating our current long-term-care policies and programs. A look forward to the next two decades would seem to compel such a reevaluation. First, the United States is undergoing significant demographic change in the age composition of its population. Both the absolute numbers and the proportion of the population over 65 are on the rise. This year there are more than 25 million men and women over 65 years of age; by the year 2000, this number will rise to more than 32 million. In percentage terms, 9.8 percent of the population in 1970 was over 65; this figure rose to 11.2 percent in 1980 and is projected to be 12.2 percent by 2000. About 15 percent of these elderly are either bedridden or require assistance in the basic functions of daily living. As the post-World War II baby boom ages, the need for a comprehensive and efficacious long-term-care system will become more acute.

The pressures on our long-term care system created by an aging population will be compounded by the shifting composition of the labor force. As more women and young people enter the work force, the component of long-term care formerly supplied by the family will decrease. Public and private initiatives will be required to facilitate the working family's efforts to care for its aged and disabled members without having to resort to institutionalization.

The growth in the population in need of some long-term care services, combined with the absence of an effective system of noninstitutional long-term care, has already led to seriously inadequate living situations for many elderly and disabled individuals. First, a significant number of needy aged and disabled do not receive publicly provided services of any kind; they are unknown by our official systems of health and social services, coping as best they can. Some are doing well, with the help of friends and family; some are not. Many others are insufficiently or inappropriately served in hospitals and nursing homes. Finally, substantial numbers of individuals are overserved in their present locations. Nearly 1 million Americans are now residents of nursing homes, even though leading health experts estimate that thousands of them—anywhere from 10 to 25 percent—do not need this level of care. Moreover, because nursing homes are crowded with individuals who could more appropriately be served in noninstitutional settings, these same nursing homes do not have room for thousands of chronically impaired patients who are forced to remain in even more expensive acute care hospital beds. In both instances, the Government, through medicare and medicaid, pays a substantial portion of an unnecessarily costly bill.

The costs of this inefficient use of our institutional services are extremely high, from both a social and financial standpoint. Individuals placed in institutions suffer a variety of costs: They are uprooted from their homes, they are severed from normal contact with their family, friends, and community. They experience a serious loss of personal independence and the dignity and self-esteem which accompany it. In many cases there is even a loss of life-long possessions. I believe strongly that whenever possible such institutionalization and its disruptive effects should be avoided.

From a monetary standpoint, unnecessary nursing home placement also has a negative impact. The alarming escalation in the costs of nursing home care is an increasingly onerous burden on both the individual and the Government. In 1978, $8.8 billion in public money was spent on nursing home care; this figure will become $11 billion in 1981. In far too many cases individuals enter institutions as nonmedicaid private patients and then, shortly after, their resources depleted, they become medicaid eligible. The current portion of the Federal medicaid budget that goes to financing nursing home care is over 40 percent. Long-term care is the fastest growing part of medicaid. In 1970, only 25 per-

cent of medicaid funds went to nursing home payments.

The search for alternatives to inappropriate institutionalization is not made easy by the current confusion of programs and lack of a clear strategy which encourages and facilitates noninstitutional care. Both medicare and medicaid, for instance, have a strong institutional bias in the services they fund and the situations in which these services will be covered. Some services are paid for only if provided in a hospital or nursing home, but not in the individual's own home. Existing long-term care services are supported by differing funding streams and have widely ranging administrative arrangements, eligibility requirements and benefits. This fragmentation means that services for older and disabled people in need of long-term care will vary from community to community and State to State; they may be multiple, parallel, overlapping, noncontinuous or even not provided at all. The common denominator is confusion.

In seeking a clearer strategy for noninstitutional long-term care, we have focused on two questions:

How can we keep individuals out of hospitals and nursing homes when an institution is not needed?

How can we, at the same time, provide care to individuals in their homes or their communities and help them lead as independent lives as possible through support and self-care?

In title XXI, we are proposing an approach which we think may offer answers to these questions.

Under title XXI, noninstitutional long-term care services currently provided under medicare, medicaid, or social services—titles XVIII, XIX, and XX of the Social Security Act—would be combined and would be supplemented with certain additional services to create a more comprehensive set of community-based long-term care services. Home health care, homemaker-home health aides, adult day care, and respite care services would be covered. Any person who is aged 65 or over or who is disabled would be eligible for title XXI services.

The needs of each individual for services will be evaluated by a preadmission screening and assessment team (the PAT), composed of health and social service professionals. The purpose of the PAT is to devise a plan of care specifically tailored for each individual. The PAT's will also assist the individual in obtaining needed services and conduct periodic reassessments to update care. The PAT's will especially seek to divert persons away from skilled and intermediate nursing facilities and hospitals to community-based care whenever a less restrictive and less institutional level of care is more appropriate.

While the Federal Government will assume most of the costs of title XXI services, a copayment system will be tested for individuals participating in the program, in recognition of the very real need to control the long-term care budget. Those individuals whose incomes qualify them for medicaid will be exempt from copayments; those with incomes at $12,000 or less will be eligible for a specified number of free services before they begin to make copayments; and those with incomes above $12,000 will make copayments beginning with the first service. Thus the individual's share will be based entirely on his or her ability to pay.

As you can see, title XXI is a very ambitious program. Even as I have great hopes for the title XXI approach, our bill has been fashioned with the awareness that its concepts must be fully tested and that changes will likely be made as we proceed with its implementation. With this in mind, the bill we are introducing today calls for a 6-year, 10-State demonstration of the title XXI program.

The experience of these 10 States will provide Congress with the information upon which subsequent decisions can be based. By designing title XXI as a demonstration, we expect to be able to learn which program features, which provisions and conditions, best meet the needs of older and disabled Americans before embarking on the program nationwide. We know too little about the level of demand that may exist for these services, too little about the costs and financing arrangements and too little about the organizational aspects of screening and assessment teams and service delivery mechanisms. For these reasons, we have opted for a 6-year demonstration project on a sufficiently large scale so we will be able to recommend to our colleagues at the end of that time the adoption of a well-tested and well-proved concept as national policy.

Title XXI is not an entirely untested or unproved concept, however. We have found encouragement in the diverse projects now underway in various parts of the country which share numerous features with our title XXI legislation. They have demonstrated, each in different ways, that we can do a much better job in providing comfortable, safe and normal environments for the aged and disabled, and that we can do so in a cost-effective way. For many, a greater independence can be achieved through accessibility to a rather simple set of services and supports. If we can provide in the community a range of services which can help the elderly and disabled meet their needs for limited or temporary assistance, we will enrich their lives and our own as well.

In closing, I must again stress that institutional care is expensive, and that unnecessary institutional care is wasteful of both dollars and lives. Society's overreliance on and overuse of nursing homes has serious adverse economic, psychological and social effects on the elderly and disabled, their families and those third party payers, including the Federal Government, and ultimately the taxpayer, who share these burdens.

Mr. President, for these compelling reasons, I urge my colleagues to join us in support of this worthy and much overdue piece of legislation.

Mr. MOYNIHAN. Mr. President, I am pleased to join Senators PACKWOOD and BRADLEY in cosponsoring the Non-Institutional Acute and Long Term Care Services for the Elderly and Disabled Act of 1981. This legislation will create a new title XXI under the Social Security Act with the express purpose of establishing 10 statewide demonstration projects to implement and coordinate a system of noninstitutional long-term-care services for our chronically ill elderly and disabled citizens.

The idea of providing home health care services to elderly and disabled persons is not new. Indeed, organized home care services have existed in the United States since the last quarter of the 18th century. But real impetus for such activities has come only in the last two decades. During this latter period of development, there was a good deal of discussion about definitions. Should the health professions refer to "organized" or "coordinated" home care services? According to the Public Health Service's survey of coordinated home care programs, "coordinated" won out. The new accepted definition of home care is this:

> A coordinated home care program is one that is centrally administered, and that through coordinated planning, evaluation, and follow-up procedure provides for physician-directed medical, nursing, social, and related services to selected patients at home.

Essentially, this definition serves the purpose of this legislation. What is new is that we propose to assure these services on a statewide systematic basis with general Federal guidelines while leaving the "how to" up to those 10 chosen States.

It is more than interesting that today we suggest a return to a practice that was the norm 50 years ago. Again I quote from the Public Health Service's report:

> Until the emergence, in the last 50 years, of the hospital as the core for the provision of services for major illness, the home was the locale for medical treatment. The well-to-do patient rarely thought of going to the hospital and was treated at home by the physician, with the day-to-day care often the responsibility of the family. The attitude that only the poor or homeless went to the hospital was reflected in one of the three principles set forth by the Boston Dispensary in 1976. They established the first home care program stating: "Those who have seen better days may be comforted without being humiliated, and all the poor receive the benefit of a charity. The more refined as it is the more secret". Thus the Dispensary would provide the home care, and the needy could avoid the social stigma attached to institutional care.

Times have changed. We no longer view the hospital in this light. We all know of the CAT scanner and other sophisticated equipment used in our most prestigious institutions. We know this, and we want this. Hospitals now are places to make us well, and they are more convenient for doctors caring for their patients. However, in spite of our new view of the hospital, the question remains whether we all need this level of care: It is costly, and someone must pay for that CAT scanner and all the wonderful lifesaving equipment and highly trained personnel that we all want, and unfortunately may one day need. After all, our lives could depend upon it.

At the same time health care costs and available data provided by organizations, such as the New York Statewide Professional Standards Review Council,

Inc. and its 16 professional standards review organizations (PSRO's) in their two 1-day censuses taken in 1979 and 1980, do give us pause. The 1979 1-day census taken in 285 New York hospitals showed 3,961 people awaiting placement to lower levels of care for an average of 53 days at $200 per day (statewide average) to the medicare and medicaid programs. On February 28, 1980, the situation had worsened: 239 hospitals had 4,424 patients in acute care beds who did not require that level of care, an increase of 12 percent over the 1979 1 day census. The average length of stay was now 74.3 days, an increase of more than 57 percent over 1979. In 1980, the taxpayers and patients, through medicare and medicaid spent $240 million on unnecessary acute care services to maintain patients at levels that were determined to be inappropriate by the PSRO's. All of these patients required lower levels of care in skilled nursing homes, intermediate care facilities, and home care programs.

In my State, which has so often been the model for innovative health care programs, we recognized the backlog in our hospitals as well as the shortage of skilled nursing beds for these patients. In response to this need, a new law was passed establishing the "Nursing Home Without Walls" State demonstration program. The chairman of the New York State Senate Health Committee stated at the time:

> Many elderly were placed in nursing homes prematurely either because families could no longer care for them or the care available in the community was inadequate. Rather than meet the increasing demand for long term care through construction of more nursing homes, thus paying for bricks and mortar, available funds would be more appropriately directed toward provisions of patient care. It has been determined that approximately 20 percent of the cost of residential health facility care is allocated to capital costs. The physical and psychological benefits to the patient, as well as the fiscal benefits dictated the development of this alternative, non-institutional method of providing long term care.

New York State initially approved nine programs to participate in the home health care demonstration project serving the medicaid eligible population. The program has continued to grow.

Fortunately, the legislation that I am supporting today will go beyond the medicaid-only population. In addition to title XIX beneficiaries, who are disabled and eligible for medical assistance, persons 65 or older and disabled people qualifying for benefits under titles II, XVI, or XVIII can receive benefits under this program. All current noninstitutional home health care services under titles XVIII, XIX, and XX of the Social Security Act will be combined under the same act creating a new title XXI. Prospective clients will receive a comprehensive assessment and screening to determine which services they need to maintain or improve their health. Various reimbursement methods such as the prospective methodology used in the New York State program, will be used to test the program's ability to contain costs. In a period of rapidly rising health care costs, this 6-year demonstration will give us information that we need in providing health care for an aging population.

● Mr. PRYOR. Mr. President, I am pleased to join today with Senator PACKWOOD and others in cosponsoring legislation which provides for a 6-year demonstration program of noninstitutional long-term care services for the elderly and disabled.

Over the last two decades, definite progress has been made in the development of programs for the elderly. We have witnessed the establishment of a vast network of community-based programs such as multipurpose senior centers. We have also seen, throughout the years, the steady growth and expansion of nursing home facilities and services. Initiatives in most recent years have sought to refine the networks already set in place.

Unfortunately, Mr. President, while we have worked toward expansion of social services to the elderly, and have sought and achieved notable improvements in nursing homes throughout the country, we have consistently neglected to address what has now become a glaring gap in our long-term care policy. And we are now long overdue in establishing a comprehensive long-term health care policy for our Nation.

The cost of nursing home care services is the fastest growing category of all health expenditures. Expenditures for nursing home care services (combined public and private) in 1979 was just under $18 billion. If we are to continue our present health care delivery system without making the needed changes it is estimated that by 1990 combined public and private expenditures will reach $76 billion.

There is no doubt that a great deal of these nursing home care expenditures could be avoided—if there were some alternative to such costly institutional care. For this reason, it is imperative that we target our energies toward developing services between the two extremes that I mentioned earlier. It is in this middle section along the continuum of care where we must expand such things as home health services, homemaker home health aide services, adult day services, respite care, and many other invaluable services.

One provision of this bill which I know will have a dramatic effect upon the reduction of unnecessary institutionalization is the requirement, as a condition for participation in the medicare and medicaid programs, that all patients be screened before entering a nursing home to determine whether or not such care is really necessary.

I say that I know this provision will reduce unnecessary institutionalization, and in turn nursing home expenditures, because in 1978, during my days as Governor of Arkansas, we instituted a small project with these same requirements, hoping it would divert people from being inappropriately admitted into nursing homes. The results were dramatic. During a 5-month pilot period, 534 persons were referred for nursing home care through the regular social service channels. Two hundred and thirty of them were diverted through the preadmission screening process. Admittedly, this was a very modest project. But it certainly impressed upon me the difference a program such as this can make.

For these reasons, Mr. President, I am proud to join in cosponsoring this bill, and would like to commend Senators PACKWOOD and BRADLEY, my distinguished colleagues, for their efforts on behalf of the elderly and disabled of our country.●

● Mr. RIEGLE. Mr. President, I rise to state my cosponsorship for a bill introduced by my colleague, Senator PACKWOOD—the Non-Institutional Acute and Long-term Care Services for the Elderly and Disabled Act. This urgently needed legislation would amend the Social Security Act to provide a new title XXI, establishing a 6-year demonstration program of comprehensive, community-based, noninstitutional acute and long-term-care services for individuals aged 65 and over, and those with chronic disabilities.

There is nothing more debilitating and painful to a person who requires medical treatment than a long period of hospitalization or placement in an intermediate-care facility or related nursing institution. This long-term institutional placement is not only painful for the individual who must suffer the isolation from family, friends, and community activities; this experience also brings suffering upon the individual's family and friends who lose the opportunity to maintain contact with their loved ones. During this era of family fragmentation and rapid community change, we need to make every possible effort to insure that our health policies provide optimal services, are cost effective, and, also, encourage the integrity of families throughout the Nation.

One major purpose of this legislation is to provide eligible individuals a range of benefits that would minimize the time they need to spend away from their families in long-term-care facilities.

These services include home health, and homemaker health aide services, adult day care services and other benefits which will increase the likelihood of the aged and the disabled to be treated at home, in their communities.

In addition, this legislation has another important purpose. The act will mandate adequate assessment of individuals who must be placed in long-term care facilities to insure that these decisions are made in a careful and knowledgeable way. While it is true that some individuals are best cared for in an institutional context, there is nothing more tragic and wasteful than inappropriate institutionalization. It should be noted that nothing in this act will interfere with already existing assessment procedures that agencies utilize to determine the best service option for a given individual. Rather, this act will mandate the necessity of an adequate screening and evaluation procedure in localities where this critical decision-making is not already systematically utilized.

In considering the merits of this proposed legislation, my colleagues should also recognize the cautious, incremental nature of this act. The bill calls for a 6-

year demonstration period during which the feasibility of this comprehensive approach to long-term care in noninstitutional settings can be fully evaluated. During this interval we will assess the costs and efficiency of this new approach, and will then be in a realistic position to improve, expand, change, or reconsider long-term care services. For example, three different methods of reimbursement will be utilized by this act, to determine the most cost-effective and efficient way of providing services under title XXI.

Further, while the Congressional Budget Office has estimated that this bill may cost an additional $200 million, their estimates do not include offsets in other costs to the Federal Government. From 1966 to 1975, nursing home expenditures rose more than 500 percent. If this legislation is passed, the Federal Government may save considerably more than the cost of this program in inappropriate placements in long-term care, and in utilizing the family as a natural caring agent for the aged and the disabled. I emphasize again, that this proposal is a carefully designed experiment, that will permit us to test the benefits of a new comprehensive approach to long-term care in a realistic and cautious manner. Apart from the obvious humanitarian merits of this bill, I urge you consider the potential financial savings that may result. At this time of fiscal restraint, we must nevertheless be willing to support new initiatives that have a likely prospect of providing answers to difficult, and expensive problems.

Consolidating programs in a limited number of demonstration projects will offer an opportunity to test the merits of a coordinated approach to long-term care services. I urge your enthusiastic support for this proposal.●

● Mr. HEINZ. Mr. President, I am very pleased to join today with my distinguished colleagues Mr. PACKWOOD, Mr. BRADLEY, and others in introducing legislation to institute a critically needed system of community-based, long-term-care services. This legislation would create a new title XXI under the Social Security Act and will be tested through a 6-year demonstration program in 10 States.

The chairman of the Senate Special Committee on Aging, I am especially aware of the existing inaccessibility and barriers to appropriate noninstitutional care services for older Americans. These difficulties are also experienced by millions of younger disabled citizens. And the families of all are traumatically affected.

Mr. President, despite the billions of public dollars being currently spent on long-term care services—principally under the medicare, medicaid, and title XX programs—the needs of millions of individuals and families persistently fail to be met. Although hard evidence regarding unmet need is difficult to obtain, CBO estimates that in 1976, 1.4 to 2.2 million adults went without necessary home health care or day care, and by 1985, that estimate is expected to rise to 2.9 to 4.3 million.

The problems in the current system—or more appropriately, the current nonsystem—abound.

The present nonsystem of long-term care is highly fragmented, both in terms of financing and service delivery. A multitude of programs and agencies at the Federal, State, and local levels are involved in long-term care. HHS lists 26 different Federal programs that provide resources for persons with long-term-care needs. These 26 programs fund similar services as well as different services, but each has its legislatively mandated eligibility requirements, benefit coverage, regulations for provider participation, administrative structures, and service-delivery mechanisms. But all 26 operate fairly independently at each level of government.

The present nonsystem of long-term care is strongly biased in favor of institutional care. In 1978, 39.2 percent of medicaid expenditures—the principal source of public funding for long-term care—went for institutional care, while 1.1 percent was spent for home health services.

For the millions of families that wish to contribute to the care of a functionally impaired family member, there exists few supports to assist them in their efforts. To the contrary, the heavy financial burdens that individuals and families must bear under the current nonsystem encourages them to institutionalize their needy family member in order to receive financial and service assistance.

Because programmatic biases and barriers for families, many persons with some needs for long-term care receives inappropriate and unnecessary levels of care. CBO has estimated that at least 10 to 20 percent of all skilled nursing facility patients and 20 to 40 percent of all intermediate care facility residents are probably receiving unnecessarily high levels of care.

The current nonsystem of long-term care has created wide variations in long-term care services across the States. For example, the State of New York alone accounts for 81.2 percent of all home health service expenditures, and 58.3 percent of institutional long-term care services. On the other hand, Mississippi consumes only 0.1 percent of home health expenditures, and 1.8 percent of institutional long-term care services.

Costs of the current nonsystem of long-term care have been skyrocketing. From fiscal year 1965 to 1977, national expenditures for nursing home care alone grew from $1.3 billion to $12.6 billion, an increase of 869 percent. In more relative terms, national expenditures for nursing home care have grown from 3.3 percent of all national health expenditures in fiscal year 1965 to 7.8 percent of all national health expenditures in fiscal year 1977.

Mr. President, the bill we are introducing today would establish a very important service delivery model and provide some vital information upon which to proceed to address the critical concerns I have outlined. Title XXI would provide an array of less costly, and, we believe, more appropriate types of services for older and disabled Americans in need. Plans of care would be developed for each eligible client in order to insure that clients receive the most necessary and appropriate services for their needs. Most importantly, the title XXI demonstration would test three different reimbursement methodologies to discern the most cost effective way to finance these important services.

I do, however, have some concerns with this proposed title XXI legislation. Cost estimates of the long-term health care demonstration program are $1.2 billion for a 6-year period. It is my view that the Congress should undertake floor consideration of such costly legislation only after there has been a chance to observe the results of the current efforts to reduce spending and cut taxes. Should these efforts have their expected results, the economy will be revitalized, which will provide us with the added revenues to make new important programs more feasible.

In addition, there is a substantive reason to move very carefully and deliberately on the title XXI legislation. Just this past September, the Department of Health and Human Services awarded $12 million to 27 States to test new systems for providing long-term care health and social services to elderly and disabled Americans. As the Congress takes action on the title XXI legislation, we must be sure that we are not duplicating these channeling grants, or any other ongoing efforts.

Mr. President, I commend my distinguished colleague from Oregon and his staff for the vast amount of thorough, thoughtful effort devoted to the development of this legislation. This bill represents an extremely important step toward addressing some of the gravest, security-threatening problems facing many older and disabled Americans today.●

By Mr. ARMSTRONG:

S. 862. A bill to amend the Potato Research and Promotion Act; to the Committee on Agriculture, Nutrition, and Forestry.

POTATO RESEARCH AND PROMOTION ACT OF 1981

● Mr. ARMSTRONG. Mr. President, today I am introducing amendments to the Potato Research and Promotion Act of 1971. It established the National Potato Promotion Board and gave it the authority to assess potato producers up to 1-cent per hundredweight to fund advertising and marketing programs, export promotion, and research and development assistance

Although that assessment rate has remained constant since 1971, the consumer price index has risen over 100 percent. In order to continue providing this important marketing and research assistance, the National Potato Council feels it is necessary to change the method by which the assessment is calculated. This bill will allow the council to assess potato producers no more than one-half of 1 percent of the immediate past 10-year average price received by growers, as reported by the U.S. Department of Agriculture. This formula change will link the assessment to the value of potatoes themselves, rather than set it at an arbitrary level which inflation rapidly erodes.

Like the original assessment formula, this new formula will have to be approved by growers in a referendum; even then support is expected to be very strong. More than 97 percent of growers participate in the current program and, at the last annual meeting of the potato council, there was enacted a resolution of support for the new formula. The Potato Promotion Board has been of great assistance to growers in the past 10 years. It has created an industrywide merchandizing program, educated consumers with award-winning advertising, promoted potato exports and made important accomplishments in the area of potato research and development.

Mr. President, I urge my colleagues to join with me in supporting this measure, the text of which is reproduced here for their convenience, and I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 862

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Potato Research and Promotion Act of 1981."

REQUIRED TERMS IN PLANS

Section 308(e) of the Potato Research and Promotion Act (7 U.S.C. 2671) is amended by striking out all existing language and substituting the following: Providing that the board shall recommend to the Secretary and the Secretary shall fix the assessment rate required for such costs as may be incurred pursuant to subsection (d) of this section: *Provided*, That the rate of assessment for fiscal year 1982 and each year thereafter shall not exceed one-half of 1 percent of the immediate past ten year United States average price received by growers as reported by the United States Department of Agriculture.

REQUIREMENT OF REFERENDUM

Section 314 (7 U.S.C. 2623) of the Potato Research and Promotion Act is amended by the addition of the following statement: The failure of potato producers to approve an amendment to any Potato Research and Promotion plan shall not be deemed to invalidate the plan existing at the time amendments are being voted upon.●

By Mr. DOLE (for himself, Mr. HEFLIN, and Mr. DECONCINI):

S. 863. A bill to establish a uniform law on the subject of bankruptcies; to the Committee on the Judiciary.

UNIFORM BANKRUPTCY LEGISLATION

Mr. DOLE. Mr. President, the Senator from Kansas rises today to introduce on behalf of Mr. HEFLIN and Mr. DECONCINI and himself a bill making technical amendments to the Bankruptcy Reform Act of 1978. This bill, with some technical corrections, has the same provisions as S. 658, the technical amendments bill considered in the 96th Congress. Such provisions passed the Senate three times by unanimous consent last Congress.

Passage of the technical amendments bill is needed immediately to reduce the adverse and severe ramifications already plaguing the Nation's bankruptcy courts since the 1978 Bankruptcy Code went into effect.

I ask unanimous consent that the text of this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 863

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

TITLE I—AMENDMENTS TO TITLE 11 OF THE UNITED STATES CODE

SECTION 1. (a) Section 101(2)(D) of title 11 of the United States Code is amended by striking out "or all" immediately after "business".

(b) Section 101(8)(B) of title 11 of the United States Code is amended by striking out the colon at the end thereof and inserting a semicolon in lieu thereof.

(c) Section 101(9)(B) of title 11 of the United States Code is amended by inserting "348(d), 502(e)(2)," immediately after "section".

(d) Section 101(14) of title 11 of the United States Code is amended by inserting "and" immediately after "trust,".

(e) Section 101(24) of title 11 of the United States Code is amended by striking out "stock broker" and inserting "stockbroker" in lieu thereof.

(f) Section 101(26)(B) of title 11 of the United States Code is amended—

(1) in clause (i), by striking out "the kind specified in subparagraph (A)(i) of this paragraph; and" and inserting "a kind specified in subparagraph (A)(i) of this paragraph; or" in lieu thereof; and

(2) in clause (ii), by striking out "separate" each place it appears and inserting "nonpartnership" in lieu thereof and by striking out "the kind specified in subparagraph (A)(ii)" and inserting "a kind specified in subparagraph (A)(i) or (A)(ii)" in lieu thereof.

(g) Section 101 of title 11 of the United States Code is amended—

(1) by redesignating paragraphs (35), (36), (37), (38), (39), and (40) as paragraphs (36), (37), (38), (40), (41), and (42) respectively; and

(2) by adding immediately after paragraph (34) the following new paragraph:

"(35) 'securities clearing agency' means person that is registered as a clearing agency under section 17A of the Securities Exchange Act of 1934 (15 U.S.C. 78q-1), or whose business is confined to the performance of functions of a clearing agency with respect to 'exempted securities', as defined in section 3(12) of such Act (15 U.S.C. 78c(12)) for the purposes of such section 17A;".

(h) Section 101(36)(A)(xii) of title 11 of the United States Code, as so redesignated, is amended by striking out "is the subject of a registration statement" and inserting "is required to be the subject of a registration statement" in lieu thereof.

(i) Section 101(36)(B)(iii) of title 11 of the United States Code, as so redesignated, is amended by striking out "commodity" the second place it appears.

(j) Section 101(36)(B)(vi) of title 11 of the United States Code, as so redesignated, is amended—

(1) by striking out "certificate specified in clause (xii) of subparagraph (A)" and inserting "certificate of a kind specified in subparagraph (A)(xii)" in lieu thereof; and

(2) by striking out "the subject of such a registration statement" and inserting "required to be the subject of a registration statement" in lieu thereof.

(k) Section 101 of title 11 of the United States Code is amended by inserting immediately after paragraph (38), as so redesignated, the following new paragraph:

"(39) 'State' includes the District of Columbia and Puerto Rico, except for the purpose of who may be a debtor under chapter 9 of this title;".

(l) Section 101(41) of title 11 of the United States Code, as so redesignated, is amended to read as follows:

"(41) 'stockbroker' means person—

"(A) with respect to which there is a customer, as defined in section 741 of this title; and

"(B) that is engaged in the business of effecting transactions in securities—

"(i) for the account of others; or

"(ii) with members of the general public, from or for such person's own account;".

(m) Section 101(42) of title 11 of the United States Code, as so redesignated, is amended by striking out the period and inserting "; and" in lieu thereof.

(n) Section 101 of title 11 of the United States Code is amended by adding at the end thereof the following new paragraph:

"(43) 'United States', when used in a geographical sense, includes all locations where the judicial jurisdiction of the United States extends, including territories and possessions of the United States.".

SEC. 2. Section 102(8) of title 11 of the United States Code is amended by striking out "continued" and inserting "contained" in lieu thereof.

SEC. 3. (a) Section 103(c) of title 11 of the United States Code is amended by striking out "stockholder" and inserting "stockbroker" in lieu thereof.

(b) Section 103(d) of title 11 of the United States Code is amended by striking out "except with respect to section 746(c) which applies to margin payments made by any debtor to a commodity broker or forward contract merchant".

SEC. 4. (a) Subsections (a)(1), (b)(1), and (c)(1) of section 108 of title 11 of the United States Code are each amended by striking out "and" each place it appears and inserting "or" in lieu thereof.

(b) Subsections (a), (b), and (c) of section 108 of title 11 of the United States Code are each amended by inserting "nonbankruptcy" immediately after "applicable" and immediately after "entered in a".

(c) Section 108(a) of title 11 of the United States Code is amended by inserting ", or any person to whose rights the trustee succeeds," immediately after "debtor".

(d) Section 108(c) of title 11 of the United States Code is amended by—

(a) Inserting after "bankruptcy court" the following: "or for taking other collection action, including levy,".

(b) Adding a new subsection (d) to read as follows:

"(d) If applicable law or an agreement suspends the period of limitation for assessing a tax liability of the debtor as of the commencement of a case under this title, such suspension shall not expire before 90 days following the earlier of—

"(1) termination or expiration of the stay under section 362 of this title, or

"(2) the date, determined under sections 362(b)(9) and 505(c) of this title, after which assessment of such tax liability is permitted.".

(c) Adding a new subsection (e) to read as follows:

"(e) If applicable law fixes a period for filing a petition or otherwise commencing an action in the United States Tax Court, or in a similar judicial or administrative forum under State or local law, and if any such act is stayed under section 362 of this title, such period shall not expire before 60 days after termination or expiration of the stay with respect to any such petition or action.".

SEC. 5. (a) Section 109(a) of title 11 of the United States Code is amended by striking out "in the United States," the first place it appears.

(b) Section 109(c)(5)(D) of title 11 of the United States Code is amended by striking

out "preference" and inserting "transfer that is avoidable under section 547 of this title" in lieu thereof.

(c) Section 109(d) of title 11 of the United States Code is amended by striking out "stockholder" and inserting "stockbroker" in lieu thereof.

SEC. 6. Section 303(b) of title 11 of the United States Code is amended by inserting "against a person" immediately after "case".

SEC. 7. Section 303(j)(2) of title 11 of the United States Code is amended by striking out "debtors" and inserting "debtor" in lieu thereof.

SEC. 8. Section 321(b) of title 11 of the United States Code is amended by striking out "a case" and inserting "the case" in lieu thereof.

SEC. 9. Section 322(b)(1) of title 11 of the United States Code is amended by inserting "required to be" immediately after "bond".

SEC. 10. (a) Section 326(a) of title 11 of the United States Code is amended by inserting "of this title" immediately after "7 or 11".

(b) Section 326(d) of title 11 of the United States Code is amended to read as follows:

"(d) The court may deny allowance of compensation for services or reimbursement of expenses of the trustee if the trustee failed to make diligent inquiry into facts that would permit denial of allowance under section 328(c) of this title or, with knowledge of such facts, employed a professional person under section 327 of this title.".

SEC. 11. Section 328(a) of title 11 of the United States Code is amended by striking out "unanticipatable" and inserting "not capable of being anticipated" in lieu thereof.

SEC. 12. (a) Section 329(a) of title 11 of the United States Code is amended by striking out "and" the first place it appears and inserting "or" in lieu thereof.

(b) Section 329(b)(1) of title 11 of the United States Code is amended by striking out "trustee" and inserting "estate" in lieu thereof.

SEC. 13. Section 330(a) of title 11 of the United States Code is amended——

(1) by striking out "to any parties in interest and to the United States trustee"; and

(2) in paragraph (1), by striking out "time, the nature, the extent, and the value of such services" and inserting "nature, the extent, the value of such services, the time spent on such services" in lieu thereof.

SEC. 14. Section 326(a) of title 11 of the United States Code is amended by striking out "but not in excess of $20,000, and one percent on any amount in excess of $50,000".

SEC. 14A. Section 330(b) of title 11 of the United States Code is amended by striking out "$20" and inserting in lieu thereof "$45".

SEC. 14B. Section 330 of title 11 of the United States Code is amended by adding at the end thereof the following new paragraph:

"(c) In a case under chapter 13 of this title the compensation paid to the trustee serving in the case shall not be less than $10 per month during the administration of the plan.".

SEC. 15. Section 341 of title 11 of the United States Code is amended to read as follows:

"§ 341. Notice

"There shall be given such notice as is appropriate, including notice to any holder of a community claim, of an order for relief in a case under this title.".

SEC. 16. (a) Section 342 of title 11 of the United States Code is amended to read as follows:

"§ 342. Meetings of creditors and equity security holders

"(a) In a case under chapter 7 or 11 of this title, within a reasonable time after the order for relief in a case under this title, there shall be a meeting of creditors.

"(b) In a case under chapter 13 of this title, the court may order a meeting of creditors.

"(c) The court may order a meeting of any equity security holders.

"(d) The court may not preside at, and may not attend, any meeting under this section."

(b) The table of sections for chapter 3 of title 11 of the United States Code is amended by striking out the items relating to sections 341 and 342 and inserting in lieu thereof the following:

"341. Notice.
"342. Meetings of creditors and equity security holders.".

SEC. 16A. Section 343 of title 11 of the United States Code is amended—

(1) by striking out "341(a)" and inserting "342" in lieu thereof; and

(2) by striking out "examiner" the last place it appears and inserting "examine" in lieu thereof.

SEC. 17. Section 344 of title 11 of the United States Code is amended by inserting "or in accordance with such regulations as may be promulgated by the Attorney General" immediately before the period.

SEC. 18. Section 345 of title 11 of the United States Code is amended by adding at the end thereof the following new subsection:

"(c) All entities with which such moneys are deposited or invested are authorized to deposit or invest such moneys as may be required under this section.".

SEC. 19. (a) Section 346(c)(2) of title 11 of the United States Code is amended by striking out "operation" and inserting "corporation" in lieu thereof.

(b) Section 346(f) of title 11 of the United States Code is amended by deleting "State or local".

(c) Section 346(g)(2) of title 11 of the United States Code is amended by striking out ", as adjusted under subsection (j)(5) of this section,".

(d) Section 346(j) of title 11 of the United States Code is amended by striking out paragraphs (3), (4), (5), (6), and (7).

SEC. 20. Section 347(a) of title 11 of the United States Code is amended by striking out "under chapter 129 of title 28" and inserting "under section 725 of title 31" in lieu thereof.

SEC. 21. Section 348(b) of title 11 of the United States Code is amended by striking out "means" and inserting "refers to" in lieu thereof.

SEC. 22. Section 349(b) of title 11 of the United States Code is amended—

(1) in paragraph (1)(B), by striking out "522(i)(2)" and inserting "522(h)(2)" in lieu thereof; and

(2) in paragraph (2), by striking out "522(i)(1)" and inserting "522(h)(2)" in lieu thereof.

SEC. 23. Section 350(b) of title 11 of the United States Code is amended by striking out "a" and inserting "A" in lieu thereof.

SEC. 24. Section 361(1) of title 11 of the United States Code is amended by inserting "a cash payment or" immediately after "make".

SEC. 25. (a) Section 362(a) of title 11 of the United States Code is amended—

(1) by inserting "and section 365 of this title" immediately after "of this section";

(2) in paragraph (1), by inserting "action or" immediately after "other"; and

(3) in paragraph (3), by inserting "or to exercise control over property of the estate" immediately after "estate" the second place it appears.

(4) in paragraph (8) by striking "court concerning the debtor" and inserting in lieu thereof "court or similar administrative or judicial forum under State or local law, concerning the debtor".

(b) Section 362(b) of title 11 of the United States Code is amended—

(1) in paragraph (3), by inserting "or to the extent that such act is accomplished within the period provided under section 547(e)(2) of this title" immediately after "title";

(2) in paragraph (4) by striking out "or" following "police" and inserting "and" in lieu thereof;

(3) in paragraph (6), by striking out "that are" and inserting "regarding" in lieu thereof, by striking out "commodity" immediately after "forward", and by inserting immediately before the semicolon the following: ", or, under subsection (a) of this section, of the setoff of any mutual debt and claim of a commodity broker, forward contract merchant, stockbroker, or securities clearing agency against the debtor for a margin payment, as defined in section 741 or section 761 of this title, or settlement payment arising out of a commodity contract, as defined in section 761 of this title, forward contract, or securities contract, as defined in section 741 of this title, against cash, a security, or other property held by such commodity broker, forward contract merchant, stockbroker, or securities clearing agency to margin, guarantee, or secure such commodity contract, forward contract, or securities contract";

(4) in paragraph (7), by striking out "said" and inserting "the" in lieu thereof and by striking out "or" the last place it appears;

(5) in paragraph (8), by striking out the period and inserting a semicolon in lieu thereof; and

(6) by adding at the end thereof the following new paragraphs:

"(9) under subsection (a) of this section, of the filing of any continuation statement or the refiling of any notice of a Federal tax lien required by nonbankruptcy law properly filed under such law before the date of the filing of the petition; or

"(10) under subsection (a) of this section, of the presentment of a negotiable instrument and the giving of notice of and protesting dishonor of such an instrument.".

(c) Section 362(c)(2)(B) of title 11 of the United States Code is amended by striking out "and" and inserting "or" in lieu thereof

(d) Section 362(d)(2) of title 11 of the United States Code is amended—

(1) by inserting "under subsection (a) of this section" immediately after "property" the first place it appears; and

(2) in subparagraph (B), by inserting "in a case under chapter 11 of this title or to an effective plan in a case under chapter 13 of this title, as the case may be" immediately after "reorganization".

(e) Section 362(e) of title 11 of the United States Code is amended—

(1) in the first sentence by inserting "the conclusion of" immediately after "pending"; and

(2) by striking out the last sentence and inserting in lieu thereof the following: "The court shall order such stay continued in effect pending the conclusion of the final hearing under subsection (d) of this section if there is a reasonable likelihood that the party opposing relief from such stay will prevail at the conclusion of such final hearing. If the hearing under this subsection is a preliminary hearing, then such final hearing shall be commenced not later than thirty days after the conclusion of such preliminary hearing.".

(f) Section 362(f) of title 11 of the United States Code is amended by striking out "The" and inserting "Upon request of a party in interest, the", and by inserting "with or" immediately after "court,".

SEC. 26. (a) Section 363(a) of title 11 of the United States Code is amended by inserting "whenever acquired" immediately after "equivalents" and by inserting "and includes the proceeds, products, offspring,

rents, or profits of property subject to a security interest as provided in section 552(b) of this title whether existing before or after the commencement of a case under this title" immediately after "interest".

(b) Section 363(b) of title 11 of the United States Code is amended—

(1) by striking out "(b)" and inserting "(b)(1)" in lieu thereof; and

(2) by adding at the ending thereof the following new paragraph:

"(2) If notification is required under subsection (a) of section 7A of the Clayton Act (15 U.S.C. 18a) in the case of a transaction under this subsection, then—

"(A) notwithstanding subsection (a) of such section, such notification shall be given by the trustee; and

"(B) notwithstanding subsection (b) of such section, the required waiting period shall end on the tenth day after the date of the receipt of such notification, unless the court, after notice and hearing, orders otherwise.".

(c) Section 363(e) of title 11 of the United States Code is amended—

(1) by inserting ", with or without a hearing," immediately after "court"; and

(2) by striking out the last sentence.

(d) Section 363(f)(3) of title 11 of the United States Code is amended by striking out "such interest" the second place it appears and inserting "all liens on such property" in lieu thereof.

(e) Section 363(h) of title 11 of the United States Code is amended by striking out "immediately before" and inserting "at the time of" in lieu thereof.

(f) Section 363(j) of title 11 of the United States Code is amended by striking out "compenation" and inserting "compensation" in lieu thereof.

(g) Section 363(k) of title 11 of the United States Code is amended by striking out "if the holder" and inserting "the holder of such claim may bid at such sale, and, if such holder" in lieu thereof.

(h) Section 363(l) of title 11 of the United States Code is amended—

(1) by striking out "conditions" and inserting "condition" in lieu thereof;

(2) by striking out "a taking" and inserting "or the taking" in lieu thereof; and

(3) by striking out "interests" and inserting "interest" in lieu thereof.

(i) Section 363(n) of title 11 of the United States Code is amended—

(1) by striking out "void" and inserting "avoid" in lieu thereof;

(2) by striking out "voiding" and inserting "avoiding" in lieu thereof; and

(3) by amending the last sentence to read as follows: "In addition to any recovery under the preceding sentence, the court may grant judgment for punitive damages in favor of the estate and against any such party that entered into such an agreement in willful disregard of this subsection.".

(j) Section 363 of title 11 of the United States Code is amended by adding at the end thereof the following new subsection:

"(o) In any hearing under this section—

"(1) the trustee has the burden of proof on the issue of adequate protection; and

"(2) the entity asserting an interest in property has the burden of proof on the issue of the validity, priority, or extent of such interest.".

SEC. 27. (a) Section 365(b)(2)(A) of title 11 of the United States Code is amended by inserting "or an insider" immediately after "the debtor".

(b) Section 365(c)(1)(A) of title 11 of the United States Code is amended—

(1) by striking out "the trustee" and inserting "an entity other than the debtor or the debtor in possession" in lieu thereof; and

(2) by inserting "by virtue of the nature of such contract or least" immediately before ", whether".

(c) Paragraphs (1) and (2) of section 365(d) of title 11 of the United States Code are each amended by striking out "In" and inserting "Notwithstanding section 108(b) of this title, in" in lieu thereof.

(d) Section 365(d)(2) of title 11 of the United States Code is amended by inserting ", subject to the court's approval," immediately after "trustee" the first place it appears.

(e) Section 365(e) of title 11 of the United States Code is amended—

(1) in paragraph (1), by striking out "or lease" each place it appears and inserting ", lease, or applicable law" in lieu thereof; and

(2) in paragraph (2), by striking out "the trustee" and inserting "an entity other than the debtor or the debtor in possession" in lieu thereof.

(f) Section 365(f)(3) of title 11 of the United States Code is amended by inserting a comma immediately after "applicable law".

(g) Section 365(h)(1) of title 11 of the United States Code is amended by striking out "treat the lease" and inserting "treat such lease" in lieu thereof.

(h) Section 365(h)(2) of title 11 of the United States Code is amended by inserting "under such lease" immediately after "debtor".

(i) Section 365(h) of the United States Code is amended by addition of the following new subsection.

"(3) In the event that the leasee shall elect to treat the lease under this subsection as terminated any subleasee, leasehold mortgagee or similarly situated entity may elect to succeed to the right of the leasee to remain in possession.".

(j) Section 365(i)(2)(A) of title 11 of the United States Code is amended by striking out the comma after "may" and by inserting "under such contract" immediately after "debtor".

(k) Section 365(j) of title 11 of the United States Code is amended by inserting "to or for the benefit of the debtor" immediately before the period at the end thereof.

SEC. 28. Section 366(a) of title 11 of the United States Code is amended by inserting "of the commencement of a case under this title or" immediately after "basis".

SEC. 29. Section 501(d) of title 11 of the United States Code is amended by inserting "502(e)(2)," immediately before "502(f)".

SEC. 30 (a) Section 502(a) of title 11 of the United States Code is amended by inserting "general" immediately before "partner".

(b) Section 502(b) of title 11 of the United States Code is amended—

(1) by inserting "(e)(2)," immediately after "subsections";

(2) by inserting "in lawful currency of the United States" immediately after "claim" the second place it appears;

(3) in paragraph (1), by striking out ", and unenforceable against" and inserting "and" in lieu thereof;

(4) in paragraph (2), by inserting "other than unmatured interest due to an original issue discount of less than one-half of 1 percent of the stated redemption price at maturity multiplied by the number of full years from the date of original issue to maturity" immediately after "interest";

(5) by striking out paragraph (3) and redesignating paragraphs (4), (5), (6), (7), (8), and (9) as paragraphs (3), (4), (5), (6), (7), and (8) respectively;

(6) in paragraph (3), as so redesignated, by inserting "the" immediately after "exceeds";

(7) in paragraph (5), as so redesignated, by striking out "the claim" and inserting "such claim" in lieu thereof, by striking out the comma after "petition", and by inserting "or 523(a)(6)" immediately after "523(a)(5)";

(8) by amending paragraph (6), as so redesignated, to read as follows:

"(6) if such claim is the claim of a lessor for damages resulting from the termination of a lease of real property, such claim exceeds—

"(A) without acceleration, the greater of—

"(i) the rent reserved for the rental year during which such termination occurs; or

"(ii) 15 pecent of the rent reserved for the remaining term of such lease, not to exceed the rent reserved for the three years commencing with the rental year during which such termination occurs; plus

"(B) any unpaid rent due under such lease, without acceleration, on the earlier of—

"(i) the date of the filing of the petition; or

"(ii) the date on which such lessor repossessed, or the lessee surrendered, the leased property;"; and

(9) in paragraph (7), as so redesignated, by inserting "the claim of an employee" immediately before "for damages" by striking out "and" in subparagraph (A)(i) and inserting "or" in lieu thereof, by striking out "the" the first place it appears in subparagraph (B) and inserting "any" in lieu thereof, and by inserting a comma immediately after "such contract" in subparagraph (B).

(c) Section 502(c) of title 11 of the United States Code is amended—

(1) in paragraph (1), by inserting "the" before "fixing" and by striking out "closing" and inserting "administration" in lieu thereof; and

(2) in paragraph (2), by inserting "right to payment arising from a" immediately after "any" and by striking out "if such breach gives rise to a right to payment".

(d) Section 502(d) of title 11 of the United States Code is amended by striking out "section 542, 543, 550, or 553 of", by striking out "section 522(f), 522(h), 544, 545, 547, 548, 549, or 724(a) of", and by striking out "section 522(i), 542, 543, 550, or 553 of".

(e) Section 502(e)(1) of title 11, United States Code, is amended—

(1) by striking out "and (b)" and inserting ", (b), and (c)" in lieu thereof and by striking out the commas immediately before and immediately after "or has secured";

(2) in subparagraph (B), by inserting "or disallowance" immediately after "allowance"; and

(3) in subparagraph (C), by striking out "requests subrogation" and inserting "asserts a right of subrogation to the rights of such creditor" in lieu thereof, and by striking out "to the rights of such creditor".

(f) Section 502(h) of title 11 of the United States Code is amended by striking out "522(i)" and inserting "522" in lieu thereof.

(g) Section 502(i) of title 11 of the United States Code is amended to read as follows:

"(i) There shall be allowed a claim for any tax liability arising from payment from the estate of a claim for wages, salaries, or commissions, including vacation, severance, or sick pay, whether or not a proof of such claim is filed.".

(h) Section 502(j) of title 11 of the United States Code is amended to read as follows:

"(j) A claim that has been allowed or disallowed may be reconsidered for cause. A reconsidered claim may be allowed or disallowed according to the equities of the case. Reconsideration of a claim under this subsection does not affect the validity of any payment or transfer from the estate made to a holder of an allowed claim on account of such allowed claim that is not reconsidered, but if a reconsidered claim is allowed and is of the same class as such holder's claim, such

holder may not receive any additional payment or transfer from the estate on account of such holder's allowed claim until the holder of such reconsidered and allowed claim receives payment on account of such claim proportionate in value to that already received by such other holder. This subsection does not alter or modify the trustee's right to recover from a creditor any excess payment or transfer made to such creditor.".

SEC. 31. Section 503(b) of title 11 of the United States Code is amended—

(1) by striking out the comma immediately after "be allowed";

(2) in paragraph (1)(B)(i), by inserting "or required to be collected or withheld from another with respect to any payment made by or to the estate" immediately after "estate";

(3) in paragraph (1)(C), by striking out the comma immediately after "credit", and by inserting "incurred by the estate" immediately after "paragraph";

(4) in paragraph (2), by inserting "(a)" immediately after "330";

(5) in paragraph (3), by inserting a comma immediately after "paragraph (4) of this subsection";

(6) in paragraph (3)(C), by striking out the comma immediately after "case";

(7) in paragraph (5), by striking out "and" immediately after the semicolon;

(8) in paragraph (6), by striking out the period and inserting "; and" in lieu thereof; and

(9) by adding at the end thereof the following new paragraph:

"(7) the actual, necessary expenses, other than compensation and reimbursement specified in paragraph (2) of this subsection, incurred by a committee appointed under section 1102 of this title.".

SEC. 32. Section 505(a) of title 11 of the United States Code is amended—

(1) in paragraph (1), by inserting "or liability of an entity for" immediately after "or legality of" and by striking out ", whether or not paid, and whether or not contested before and adjudicated by a judicial or administrative tribunal of competent jurisdiction" and inserting "or paid" in lieu thereof;

(2) in paragraph (2)(A), by inserting "or liability of an entity for" immediately after "or legality of" and by striking out "or legality" and inserting ", legality, or liability" in lieu thereof; and

(3) in paragraph (2)(B)(i), by striking out "and" and inserting "or" in lieu thereof.

(4) by adding a new paragraph (3) to read as follows:

"(3) Notwithstanding subparagraph (B) of this paragraph, the court may offset against a claim for, or request for payment of, a tax liability any counterclaim with respect to such tax liability for the same taxable period, event, act (or failure to act) to which the claim or request for payment relates, and may, where appropriate, order a net credit or refund to be made to the estate. The preceding sentence shall not apply if, at the commencement of the case under this title, the debtor had filed suit for refund relating to such taxable period, event, act (or failure to act), and if the stay on continuation of such suit is terminated under section 362 of this title.".

SEC. 33. (a) Section 506(a) of title 11 of the United States Code is amended to read as follows:

"(a) An allowed claim of a creditor either secured by a lien on property in which the estate has an interest or that is subject to setoff under section 553 of this title is a secured claim to the extent of the value of such lien or to the extent of the amount subject to setoff, as the case may be, and, except to the extent that such creditor does not have recourse under any agreement or applicable nonbankruptcy law against the debtor on account of such claim, is an unsecured claim to the extent that the value of such lien or the amount so subject to setoff is less than the amount of such allowed claim. For the purpose of this subsection, value shall be determined in light of the purpose of the valuation and of any disposition proposed for such property and in conjunction with any hearing on disposition or use or on a plan affecting such creditor's interest.".

(b) Section 506(b) of title 11 of the United States Code is amended by inserting "for" immediately after "provided".

(c) Paragraphs (1) and (2) of section 506(d) of ttile 11 of the United States Code are amended to read as follows:

"(1) such claim was disallowed only under section 502(b)(5) or 502(e) of this title; or

"(2) such claim is not allowed secured claim due only to the failure of any entity to file a proof of such claim under section 501 of this title.".

SEC. 34. (a) Section 507(a) of title 11 of the United States Code is amended—

(1) in paragraph (3), by inserting a comma after "severance";

(2) in paragraph (4), by striking out "employee benefit plans" and inserting "an employee benefit plan" in lieu thereof.

(3) in paragraph (4)(B)(i), by inserting "each" immediately after "covered by";

(4) in paragraph (6), by inserting "only" immediately after "units";

(5) in paragraph (6)(A), by amending clauses (ii) and (iii) to read as follows:

"(ii) assessed within 240 days before the date of the filing of the petition; or

"(iii) not assessed before the commencement of the case but not prohibited, at the time of the commencement of the case, from being assessed under the applicable statute of limitations, other than a tax or customs duty of a kind excepted from discharge solely under section 533(a)(1)(B) or 523 (a)(1)(C) of this title;"; and

(6) in paragraph (6)(D), by striking out "earned from the debtor" and inserting ", or paid" in lieu thereof and by striking out "whether or not actually paid before such date,".

(b) Section 507(b) of title 11 of the United States Code is amended to read as follows:

"(b) Notwithstanding section 726(b) of this title, if the trustee provides, under section 362, 363, or 364 of this title, adequate protection of the interest of an entity other than the estate that has an interest in property of the estate or if the court finds that there is adequate protection of such interest by a lien on such property and if, not withstanding such protection, the holder of such interest has a claim allowable under section 503(b)(1) of this title arising from the stay of action against such property under section 362 of this title, from the use, sale, or lease of such property under section 363 of this title, or from the granting of a lien under section 364(d) of this title, then such holder's allowable claim shall have priority over every other claim of a kind specified in subsection (a)(1) of this section.".

(c) Section 507(c) of title 11 of the United States Code is amended by striking out "shall be treated the same" and inserting "has the same priority" in lieu thereof.

(d) Section 507(d) of title 11 of the United States Code is amended to read as follows:

"(d) If a claim of a kind specified in subsection (a)(3), (a)(4), (a)(5), or (a)(6) of this section is held by an entity other than the original holder of such claim, then such claim is entitled to priority under each such subsection, as the case may be, but only to the extent of the value actually transferred to or for the benefit of such original holder on account of the transfer of such claim by such original holder.".

SEC. 35. (a) Section 509(a) of title 11 of the United States Code is amended by striking out "subsections (b) and" and inserting "subsection (b) or" in lieu thereof, and by inserting "against the debtor" immediately after "a creditor".

(b) Section 509(b)(1) of title 11 of the United States Code is amended by striking out "of a" and inserting "of such" in lieu thereof.

(c) Section 509(c) of title 11 of the United States Code is amended by striking out "section 509 of this title" and inserting "this section" in lieu thereof.

SEC. 36. Section 510(b) of title 11 of the United States Code is amended to read as follows:

"(b) For the purpose of distribution under this title, a claim arising from rescission of a purchase or sale of a security of the debtor or of an affiliate of the debtor or for damages arising from the purchase or sale of such a security shall be subordinated to all claims or interests that are senior to the claim or interest represented by such security.".

SEC. 37. (a) Section 521(1) of title 11 of the United States Code is amended to read as follows:

"(1) file a list of creditors and, unless the court orders otherwise, a schedule of assets, liabilities, and equity interests, and a statement of the debtor's financial affairs;".

(b) Section 521(3) of title 11 of the United States Code is amended by inserting ", whether or not immunity is granted under section 344 of this title" immediately after "estate" the second place it appears.

SEC. 38. (a) Section 522(a)(2) of title 11 of the United States Code is amended by inserting ", or with respect to property that becomes property of the estate after such date, as of the date such property becomes property of the estate" immediately after "petition".

(b) Section 522(b) of title 11 of the United States Code is amended to read as follows:

"(b) Notwithstanding section 541 of this title, an individual debtor may exempt from property of the estate either—

"(1) property wherever located of a kind specified under subsection (d) of this section, unless the State law that is applicable to the debtor under paragraph (2) of this subsection specifically does not so authorize; or

"(2) any property or interest of the debtor in property, as of the date of the filing of the petition, to the extent that such property or interest is exempt or not subject to process or levy under Federal law, other than subsection (d) of this section, or is exempt or not subject to levy by a creditor, of only the debtor, on a simple contract whether or not such a creditor exists, under State or local law that is applicable on the date of the filing of the petition at the place in which the debtor's domicile has been located for the 180 days immediately preceding the date of the filing of the petition, or for a longer portion of such 180-day period than in any other place.".

(c) Section 522(c) of title 11 of the United States Code is amended to read as follows:

"(c) Unless the case is dismissed, property exempted under this section is not liable during or after the case for any debt of the debtor that arose, or that is determined under section 502 of this title as if such debt had arisen, before the commencement of the case, except—

"(1) a debt of a kind specified in section 523(a)(1), 523(a)(5), or 523(a)(6) of this title; or

"(2) a debt secured by a lien that is—

"(A)(i) not avoided under subsection (f) or (g) of this section or under section 544, 545, 547, 548, 549, or 724(a) of this title; and

"(ii) not void under section 506(d) of this title; or

"(B) a tax lien, notice of which is properly filed, whether or not such lien is avoided under section 545(2) of this ttile.".

(d) Section 522(d)(3) of title 11 of the United States Code is amended by striking out "that are".

(e) Section 522(e) of title 11 of the United States Code is amended—

(1) by striking out "exemptions" and inserting "an exemption" in lieu thereof;

(2) by striking out "with respect to such claim against property that" and inserting "to the extent of such claim with respect to property" in lieu thereof;

(3) by striking out "or (h) of this section to avoid a transfer, under subsection (g)" and by inserting ", (g), (h)," in lieu thereof; and

(4) by striking out "to exempt property, or under subsection (i) of this section to recover property or to preserve a transfer,".

(f) Section 522(f) of title 11 of the United States Code is amended—

(1) by striking out "exemptions" and inserting "an exemption" in lieu thereof; and

(2) in paragraph (2)(A), by inserting "jewelry, or" immediately after "crops,", and striking out ", or jewelry that are" after "musical instruments".

(g) Section 522(g) of title 11 of the United States Code is amended to read as follows:

"(g) Notwithstanding any waiver of an exemption, the debtor may avoid a transfer or recover a setoff of property of the debtor and exempt such property under subsection (i) of this section, whether or not the trustee attempts to recover such property or avoid such transfer, if—

"(1)(A) such transfer is avoidable by the trustee under sections 544, 545, 547, 548, 549, 724(a) of this title, or recoverable by the trustee under section 553 of this title;

"(B) such transfer was not a voluntary transfer of such property by the debtor; and

"(C) the debtor did not conceal such property; or

"(2) such transfer is in satisfaction of a lien of a kind specified in subsection (f)(2) of this section.".

(h) Section 522(h) of title 11 of the United States Code is amended to read as follows:

"(h)(1) The debtor's power to avoid a transfer or recover a setoff under subsection (f) or (g) of this section is subject to the limitations of section 550 of this title to which the trustee's power to avoid such a transfer or recover such a setoff under this title is subject.

"(2) Notwithstanding section 551 of this title, a transfer avoided or property recovered by the trustee or by the debtor may be preserved for the benefit of the debtor, if—

"(A)(i) such property otherwise would be exempt under subsection (i) of this section;

"(ii) such transfer was not a voluntary transfer of such property by the debtor; and

"(iii) the debtor did not conceal such property; or

"(B) such transfer is of a kind specified in subsection (f) of this section.".

(i) Section 522(i) of title 11 of the United States Code is amended to read as follows:

"(i) The debtor may exempt under subsection (b) of this section property disencumbered or recovered under subsection (f), (g), or (h) of this section to the extent the debtor could have exempted such property under subsection (b) of this section had such property not been encumbered, transferred, or set off.".

(j) Section 522(j) of title 11 of the United States Code is amended to read as follows:

"(j) The debtor may exempt a particular kind of property under subsection (i) of this section only to the extent that such exemption, plus the debtor's already claimed exemption of the same kind of property under subsection (b) of this section, does not exceed the limitation specified for such kind of property in subsection (b) of this section.".

(k) Section 522(k) of title 11 of the United States Code is amended—

(1) in paragraph (1), by striking out "(g)" and inserting "(i)" in lieu thereof; and

(2) in paragraph (2), by striking out "(h)" and inserting "(g)" in lieu thereof, and by striking out "or of recovery of property under subsection (i)(1) of this section,".

(l) Section 522(l) of title 11 of the United States Code is amended by striking out ", or may claim property as exempt from property of the estate" and by inserting after the second sentence thereof the following new sentence: "In the event of the debtor's death, a dependent of the debtor may claim property as exempt from property of the estate.".

SEC. 39. (a) Section 523(a) of title 11 of the United States Code is amended—

(1) in paragraph (2), by striking out "obtaining" each place it appears, and by striking out "refinance of credit," and inserting "refinancing of credit, to the extent obtained" in lieu thereof;

(2) in paragraph (3), by striking out "(6)" each place it appears and inserting "(7)" in lieu thereof;

(3) by amending paragraph (5) to read as follows:

"(5) to a spouse, former spouse, or child of the debtor, for support of such child, but not to the extent that such debt includes a liability designated as support unless such liability actually is in the nature of support;";

(4) by redesignating paragraphs (6), (7), (8), and (9) as paragraphs (7), (8), (9), and (10), respectively; and

(5) by inserting after paragraph (5) the following new paragraph:

"(6) to a spouse or former spouse of the debtor for alimony to, maintenance for, or support of such spouse, but not to the extent that such debt includes a liability designated as alimony, maintenance, or support, unless such liability actually is in the nature of alimony, maintenance, or support;".

(b) Section 523(b) of title 11 of the United States Code is amended by striking out "(8)" and inserting "(9)" in lieu thereof.

(c) Section 523(c) of title 11 of the United States Code is amended by inserting "of a kind" immediately after "debt" the first time it appears, and by striking out "(6)" each place it appears and inserting "(7)" in lieu thereof.

SEC. 40. (a) Section 524(a) of title 11 of the United States Code is amended—

(1) by striking out "any act" each place it appears and inserting "an act" in lieu thereof; and

(2) in paragraph (2), by inserting a comma immediately after "recover", by inserting "wherever located and by whomever held, whether directed toward the debtor or any other entity, and" immediately after "property of the debtor,", and by inserting ", except to the extent provided under section 522(c) of this title" immediately after "waived".

(b) Section 524(c)(4)(B)(ii) of title 11 of the United States Code is amended by striking out "redemption under section 722 of this title" and inserting "the terms and conditions of redemption by the debtor" in lieu thereof.

(c) Section 524(d) of title 11 of the United States Code is amended—

(1) in paragraph (1)(B)(ii), by inserting "and" immediately after the semicolon; and

(2) in paragraph (2), by striking out "subsection" the second time it appears and inserting "section" in lieu thereof.

SEC. 41. Section 525 of title 11 of the United States Code is amended by inserting "the" immediately before "Perishable".

SEC. 42. (a) Section 541(a) of title 11 of the United States Code is amended—

(1) by striking out "under" the second place it appears;

(2) by inserting "and by whomever held" immediately after "located";

(3) in paragraph (3), by inserting "329(b), 363(n)," immediately after "section";

(4) in paragraph (5), by striking out "An" and inserting "Any" in lieu thereof; and

(5) in paragraph (6), by striking out "and" and inserting "or" in lieu thereof.

(b) Section 541(c) of title 11 of the United States Code is amended—

(1) by inserting "in an agreement, transfer instrument, or applicable law" immediately after "provision"; and

(2) in paragraph (1)(B), by striking out "the taking" and inserting "taking" in lieu thereof and by inserting "before such commencement" immediately after "custodian".

(c) Section 541(d) of title 11 of the United States Code is amended by inserting "(1)" immediately after "(a)".

(d) Section 541(e) of title 11 of the United States Code is repealed.

SEC. 43. Section 542(e) of title 11 of the United States Code is amended by inserting "to turn over or" immediately before "disclose".

SEC. 44. (a) Section 543(a) of title 11 of the United States Code is amended by inserting ", product, offspring, rents, or profits" immediately after "proceeds".

(b) Section 543(b) of title 11 of the United States Code is amended—

(1) in paragraph (1), by inserting "held by or" immediately after "debtor", and by inserting ", product, offspring, rents, or profits" immediately after "proceeds"; and

(2) in paragraph (2), by inserting ", product, offspring, rents, or profits" immediately after "proceeds".

(c) Section 543(c) of title 11 of the United States Code is amended—

(1) in paragraph (1), by inserting "or proceeds, product, offspring, rents, or profits of such property" immediately after "property"; and

(2) in paragraph (3), by inserting "that has been" immediately before "approved".

(d) Section 543 of title 11 of the United States Code is amended by adding at the end thereof the following new subsections:

"(e) For purposes of this section, custodian shall not include an assignee under a general assignment for the benefit of the debtor's creditors that was appointed or took possession more than 120 days before the date of the filing of the petition, but the trustee or the court may nevertheless, and at any time, require such an assignee to file an accounting as set forth in subsection (b)(2) of this section.

"(f) For purposes of subsection (e), the term 'general assignment for the benefit of the debtor's creditors' means an assignment which is for the benefit of all of the debtor's creditors.".

SEC. 45. (a) Section 544(a) of title 11 of the United States Code is amended—

(1) in paragraph (1), by inserting "such" immediately after "obtained";

(2) in paragraph (2), by striking out "; and" and inserting "; or" in lieu thereof; and

(3) in paragraph (3), by inserting ", other than fixtures," immediately after "property", and by inserting "and has perfected such transfer" immediately after "purchaser" the second place it appears.

SEC. 46. Section 545 of title 11 of the United States Code is amended—

(1) in paragraph (1)(A), by striking out "is" immediately after "debtor";

(2) in paragraph (1)(C), by striking out "appointed" and inserting "appointed or authorized to take" in lieu thereof; and

(3) in paragraph (2), by striking out "on the date of the filing of the petition" each place it appears and inserting "at the time of the commencement of the case" in lieu thereof.

SEC. 47. (a) Section 546(a) of title 11 of the United States Code is amended in paragraph

(1) by striking out "and" and inserting "or" in lieu thereof.

(b) Section 546(b) of title 11 of the United States Code is amended by striking out "the trustee under section 544, 545, or" and inserting "a trustee under sections 544, 545, and" in lieu thereof.

(c) Section 546(c) of title 11 of the United States Code is amended—

(1) by striking out "the trustee" and inserting "a trustee" in lieu thereof;

(2) by striking out "right" the first place it appears;

(3) by inserting "of goods" immediately after "seller" the first place it appears;

(4) by striking out "of goods" immediately after "business," and inserting "that has sold goods" in lieu thereof; and

(5) in paragraph (2), by inserting "the" immediately after "if", and by striking out "an administrative expense" and inserting "a claim of a kind specified in section 503(b) of this title" in lieu thereof.

(d) Section 546 of title 11 of the United States Code is amended by adding at the end thereof the following new subsection:

"(d) Notwithstanding sections 544, 545, 547, 548(a)(2), and 548(b) of this title, the trustee may not avoid a transfer that is a margin payment, as defined in section 741 or 761 of this title, deposit, or settlement payment, made by or to a commodity broker, forward contract merchant, stockbroker, or securities clearing agency, that is made before the commencement of the case, except under section 548(a)(1) of this title.".

SEC. 48. (a) Section 547(a) of title 11 of the United States Code is amended—

(1) in paragraph (2), by inserting "including proceeds of such property," immediately after "law,"; and

(2) in paragraph (4), by striking out ", without penalty" and by inserting "without penalty" immediately after "payable".

(b) Section 547(b) of title 11 of the United States Code is amended by striking out "of property of the debtor" and inserting "of an interest of the debtor in property" in lieu thereof.

(c) Section 547(c) of title 11 of the United States Code is amended—

(1) in paragraph (2)(A), by inserting "by the debtor" immediately after "incurred";

(2) in paragraph (3), by striking out "of" the first place it appears and inserting "that creates" in lieu thereof;

(3) in paragraph (3)(B), by inserting "on or" immediately after "perfected" and by striking out "such security interest attaches" and inserting "the debtor receives possession of such property" in lieu thereof; and

(4) in paragraph (5), by striking out "of" the first place it appears and inserting "that creates" in lieu thereof and by striking out "all security interest" and inserting "all such security interests" in lieu thereof.

(d) Section 547(d) of title 11 of the United States Code is amended—

(1) by striking out "A" and inserting "The" in lieu thereof;

(2) by inserting "an interest in" immediately after "transfer of";

(3) by inserting "to or for the benefit of a surety" immediately after "transferred"; and

(4) by inserting "such" immediately after "reimbursement of".

(e) Section 547(e) of title 11 of the United States Code is amended:

(1) by amending paragraph (1) to read as follows:

"(1) For the purposes of this section, a transfer of property is perfected when either a bona fide purchaser from the debtor of real property, other than fixtures, or a creditor on a simple contract, against whom applicable law permits such transfer to be perfected, cannot acquire an interest in such real property or a judicial lien on personal property that is superior to the interest of the transferee."; and

(2) in paragraph (2)(C)(i), by striking out "and" and inserting "or" in lieu thereof.

(f) Section 547 of title 11 of the United States Code is amended by adding at the end thereof the following new subsection:

"(g) For the purposes of this section, the trustee has the burden of proving the avoidability of a transfer under subsection (b) of this section, and the creditor or party in interest against whom recovery or avoidance is sought has the burden of proving the nonavoidability of a transfer under subsection (c) of this section.".

SEC. 49. (a) Section 548(a) of title 11 of the United States Code is amended—

(1) in paragraph (1), by striking out "occurred" and inserting "was made" in lieu thereof; and

(2) in paragraph (2)(B)(ii), by inserting "or a transaction" immediately after "engaged in business".

(b) Section 548(b) of title 11 of the United States Code is amended by striking out "the debtor" each place is appears and inserting "such debtor" in lieu thereof.

(c) Section 548(c) of title 11 of the United States Code is amended—

(1) by inserting "or may retain" immediately after "lien on"; and

(2) by striking out ", may retain any lien transferred,".

(d) Section 548(d)(1) of title 11 of the United States Code is amended by striking out "becomes so far" and inserting "is so" in lieu thereof by striking out "such transfer could have been" and inserting "applicable law permits such transfer to be" in lieu thereof, and by striking out "occurs" and inserting "is made" in lieu thereof.

(e) Section 548(d)(2)(B) of title 11 of the United States Code is amended by striking out "or forward contract merchant" and inserting ", forward contract merchant, stockbroker, or securities clearing agency" in lieu thereof and by striking out "761(15)" and inserting "741 or 761" in lieu thereof.

SEC. 50. (a) Section 549(a) of title 11 of the United States Code is amended—

(1) by striking out "(b) and (c)" and inserting "(b) or (c)" in lieu thereof; and

(2) in paragraph (2)(A), by inserting "only" immediately after "authorized".

(b) Section 549(b) of title 11 of the United States Code is amended—

(1) by inserting "the trustee may not avoid under subsection (a) of this section" immediately after "involuntary case,";

(2) by striking out "that occurs" and inserting "made" in lieu thereof;

(3) by striking out "is valid against the trustee to the extent of" and inserting "to the extent" in lieu thereof; and

(4) by inserting "is" immediately before "given".

(c) Section 549(c) of title 11 of the United States Code is amended to read as follows:

"(c) The trustee may not avoid under subsection (a) of this section a transfer of real property to a good faith purchaser without knowledge of the commencement of the case and for present fair equivalent value unless a copy or notice of the petition was filed, where a conveyance of such real property may be recorded to perfect such transfer, before such transfer is so perfected that a bona fide purchaser of such property, against whom applicable law permits such transfer to be perfected, could not acquire an interest that is superior to the interest of such good faith purchaser. A good faith purchaser without knowledge of the commencement of the case and for less than present fair equivalent value has a lien on the property transferred to the extent of any present value given, unless a copy or notice of the petition was so filed before such transfer was so perfected ".

(d) Section 549(d)(1) of title 11 of the United States Code is amended by striking out "and" inserting "or" in lieu thereof.

SEC. 51. (a) Section 550(a) of title 11 of the United States Code is amended—

(1) by inserting "363(n)," immediately before "544";

(2) by inserting "553(b)" immediately after "549,"; and

(3) in paragraph (2), by striking out "immediate or mediate transferee of" and inserting "subsequent transferee of" in lieu thereof.

(b) Section 550(b)(2) of title 11 of the United States Code is amended by striking out "immediate or mediate" and inserting "subsequent" in lieu thereof.

(c) Section 550(d) of title 11 of the United States Code is amended—

(1) in paragraph (1)(A), by inserting "or accruing to" immediately after "by";

(2) in paragraph (1)(B), by striking out "value" and inserting "the value of such property" in lieu thereof;

(3) in paragraph (2), by striking out subparagraphs (D) and (E) and inserting in lieu thereof the following:

"(D) payment of any debt secured by a lien on such property that is superior or equal to the rights of the estate; and"; and

(4) in paragraph (2), by redesignating subparagraph (F) as subparagraph (E).

(d) Section 550(e)(1) of title 11 of the United States Code is amended by striking out "and" and inserting "or" in lieu thereof.

SEC. 52. Section 551 of title 11 of the United States Code is amended by striking out "but only with respect to property of the estate".

SEC. 53. Section 552(b) of title 11 of the United States Code is amended—

(1) by inserting "522," immediately after "506(c),";

(2) by striking out "a secured party enter" and inserting "an entity entered" in lieu thereof; and

(3) by striking out "except to the extent" and inserting "except to any extent" in lieu thereof.

SEC. 54. Section 553(b)(1) of title 11 of the United States Code is amended—

(1) by striking out "or 365(h)(1)" and inserting ", 365(h)(2), or 365(1)(2)" in lieu thereof.

SEC. 55. (a) Subsections (a) and (b) of section 554 of title 11 of the United States Code are each amended by inserting "and benefit" immediately after "value".

(b) Section 554(c) of title 11 of the United States Code is amended to read as follows:

"(c) Unless the court orders otherwise, any property scheduled under section 521(1) of this title not otherwise administered at the time of the closing of a case is abandoned to the debtor and administered for purposes of section 350 of this title.".

(c) Section 554(d) of title 11 of the United States Code is amended by striking out "section (a) or (b) of".

SEC. 56. (a) Chapter 5 of title 11 of the United States Code is amended by adding at the end thereof the following new section:

"§ 555. Defenses of the estate

"The estate shall have the benefit of any defense available to the debtor as against any entity other than the estate, including statutes of limitation, statutes of frauds, usury, and other personal defenses. A waiver of any such defense by the debtor after the commencement of the case does not bind the estate.".

(b) The table of sections for chapter 5 of title 11 of the United States Code is amended by adding at the end thereof the following new item:

"555. Defenses of the estate.".

SEC. 57. The table of sections for chapter 7 of title 11 of the United States Code is amended by striking out "Succesor" in the item relating to section 703 and inserting "Successor" in lieu thereof.

(1) by inserting "held" immediately after "meeting of creditors"; and

(2) by striking out "341" and inserting "342" in lieu thereof.

(b) Section 702(c) of title 11 of the United States Code is amended—

(1) in paragraph (1), by inserting "of a kind" immediately after "claims"; and

(2) in paragraph (2), by inserting "a" immediately after "for".

(c) Section 702(d) of title 11 of the United States Code is amended by striking out "subsection (c) of".

SEC. 59. Section 703(b) of title 11 of the United States Code is amended by striking out "specified in section 701(a) of this title. Sections 701(b) and 701(c) of this title apply to such interim trustee" and inserting "and subject to the provisions of section 701 of this title" in lieu thereof.

SEC. 60. Section 704 of title 11 of the United States Code is amended—

(1) in paragraph (1), by striking out "up";

(2) in paragraph (7), by striking out "with the court and"; and

(3) by amending paragraph (8) to read as follows:

"(8) file interim reports, as circumstances justify, of the condition of the estate and make and file a final report and account of the administration of the estate with the court.".

SEC. 61. Section 705(a) of title 11 of the United States Code is amended by striking out "under section 341(a)" and inserting "of creditors held under section 342" in lieu thereof.

SEC. 62. Paragraphs (1) and (2) of section 707 of title 11 of the United States Code are each amended by striking out "and" and inserting "or" in lieu thereof.

SEC. 63. Section 722 of title 11 of the United States Code is amended to read as follows:

"§ 722. Redemption

"(a) The debtor may redeem property under the provisions of section 524(c) of this title or subsection (b) of this section.

"(b) An individual debtor may, whether or not such debtor has waived such right, redeem from the holder of a lien that secures a dischargeable consumer debt, tangible personal property intended primarily for personal, family, or household use, if such property is exempted under section 522 of this title or has been abandoned under section 554 of this title, by paying in cash such holder at the time of redemption before the case is closed the amount of such holder's allowed secured claim.".

SEC. 64. (a) Section 723(a) of title 11 of the United States Code is amended by striking out "title" and inserting "chapter" in lieu thereof.

(b) Section 723(c) of title 11 of the United States Code is amended—

(1) by striking out "such case" each place it appears and inserting "such partner's case" in lieu thereof;

(2) by striking out "be property" and inserting "by property" in lieu thereof.

(3) by striking out "726(a)" and inserting "726" in lieu thereof; and

(4) by striking out "the kind" and inserting "a kind" in lieu thereof.

SEC. 65. (a) Section 724(b) of title 11 of the United States Code is amended—

(1) by striking out "and" the first place it appears and by striking out "taxes" and inserting "a tax" in lieu thereof;

(2) in paragraph (1), by striking out "such tax lien" and inserting "the lien securing such tax claim" in lieu thereof;

(3) in paragraph (2), by striking out "claims" and inserting "any holder of a claim of a kind" in lieu thereof;

(4) in paragraph (3), by inserting "tax" immediately after "allowed" and by striking out "that is";

(5) by redesignating paragraphs (5) and (6) as paragraph (6) and (7), respectively, and by inserting immediately after paragraph (4) the following new paragraph:

"(5) fifth, to any holder of a claim of a kind specified in sections 507(a)(1), 507(a)(2), 507(a)(3), 507(a)(4), and 507(a)(5) of this title, to the extent that such claim is not paid under paragraph (2) of this subsection;";

(6) in paragraph (6), as so redesignated, by striking out "fifth" and inserting "sixth" in lieu thereof, by inserting "tax" after "allowed", and by striking out "tax" immediately after "such" the third place it appears; and

(7) in paragraph (7), as so redesignated, by striking out "sixth" and inserting "seventh" in lieu thereof.

(b) Section 724(c) of title 11 of the United States Code is amended by striking out "creditor" and inserting "holder of a claim" in lieu thereof and by striking out "creditors" each place it appears and inserting "holders" in lieu thereof.

(c) Section 724(d) of title 11 of the United States Code is amended by striking out "whose priority" and inserting "the priority of which" in lieu thereof and by inserting "if such lien were" immediately after "the same as".

SEC. 66. Section 725 of title 11 of the United States Code is amended by inserting "of property of the estate" immediately after "distribution".

SEC. 67. (a) Section 726(a) of title 11 of the United States Code is amended—

(1) in paragraph (2)(A), by inserting ", 501(b), or 501(c)" immediately after "501(a)", and by adding "or" immediately after the semicolon;

(2) by striking out paragraph (2)(B) and redesignating paragraph (2)(C) as paragraph (2)(B);

(3) in paragraph (2)(B), as so redesignated, by inserting ", 501(b), or 501(c)" immediately after "501(a)";

(4) in paragraph (3), by inserting ", 501(b), or 501(c)" immediately after "501(a)", and by striking out "(C)" and inserting "(B)" in lieu thereof; and

(5) in paragraph (5), by inserting "or contract" immediately after "legal" and inserting "whichever is greater" immediately after "rate".

(b) Section 726(b) of title 11 of the United States Code is amended—

(1) by striking out "a particular paragraph" and inserting "each such particular paragraph" in lieu thereof; and

(2) by striking out "administrative expenses" each place it appears and inserting "a claim allowed under section 503(b) of this title" in lieu thereof, and by striking out "have" and inserting "has" in lieu thereof.

(c) Section 726(c) of title 11 of the United States Code is amended—

(1) in paragraph (1), by striking out "Administrative expenses" and inserting "Claims allowed under section 503 of this title" in lieu thereof; and

(2) in paragraph (2), by striking out "Claims other than for administrative expenses" and inserting "Allowed claims, other than claims allowed under section 503 of this title," in lieu thereof.

SEC. 68. (a) Section 727(a) of title 11 of the United States Code is amended—

(1) in paragraph (6)(C), by striking out "property" and inserting "properly" in lieu thereof;

(2) in paragraph (7), by inserting ", under this title or under the Bankruptcy Act," immediately after "another case"; and

(3) in paragraph (8), by inserting a comma immediately after "371".

(b) Section 727(c)(1) of title 11 of the United States Code is amended by inserting "the granting of a" immediately after "to".

(c) Section 727(e)(2)(A) of title 11 of the United States Code is amended by striking out "and" and inserting "or" in lieu thereof.

SEC. 69. (a) Section 728(c) of title 11 of the United States Code is amended by striking out the comma immediately after "taxable income".

(b) Section 728(d)(2) of title 11 of the United States Code is amended by inserting "otherwise" immediately after "is", and by striking out "otherwise immediately after "partner".

SEC. 70. Section 741 of title 11 of the United States Code is amended—

(1) in paragraph (2)(A), by striking out "holds" and inserting "has" in lieu thereof and by striking out "business as a stockbroker" and inserting "such debtor's business as a stockbroker," in lieu thereof.

(2) in paragraph (2)(B), by striking out "holds" and inserting "has" in lieu thereof;

Section 902(2) of title 11 of the United States Code is amended by striking out "title, legal or equitable, to real property against which has been levied a special assessment or special tax" and by inserting "legal or equitable title to real property against which a special assessment or special tax has been levied" in lieu thereof.

SEC. 86. Section 903(2) of title 11 of the United States Code is amended by striking out "to" the first place it appears.

SEC. 87. Chapter 9 of title 11 of the United States Code is amended by striking out "SUBCHAPER II" and inserting "SUBCHAPTER II" in lieu thereof.

SEC. 88. (a) Section 921(c) of title 11 of the United States Code is amended by striking out "an" and inserting "any" in lieu thereof, and by striking out the comma after "petition" the second place it appears.

(b) Section 921 of title 11 of the United States Code is amended by redesignating subsections (e) and (f) as subsections (d) and (e), respectively.

(c) Section 921(d) of title 11 of the United States Code, as so redesignated, is amended by striking out "subsection (d)" and inserting "subsection (c)" in lieu thereof.

SEC. 89. (a) Section 922(a)(1) of title 11 of the United States Code is amended by inserting "a" immediately before "judicial", and by inserting "action or" immediately before "proceeding".

(b) Section 922(b) of title 11 of the United States Code is amended by striking out "and

(g)" and inserting "(g), and (h)" in lieu thereof.

SEC. 90. (a) Section 927(a)(4) of title 11 of the United States Code is amended by striking out "if" and inserting "failure of" in lieu thereof, and by striking out "is not" and inserting "to be" in lieu thereof.

(b) Section 927(b) of title 11 of the United States Code is amended by inserting "of a plan under this chapter" immediately after "confirmation".

SEC. 91. Section 943(b) of title 11 of the United States Code is amended—

(1) in paragraph (4), by striking out "to be taken"; and

(2) by amending paragraph (5) to read as follows:

"(5) except to the extent that the holder of a particular claim has agreed to a different treatment of such claim, the plan provides that on the effective date of the plan each holder of a claim of a kind specified in section 507(a)(1) of this title will receive on account of such claim cash equal to the allowed amount of such claim; and".

SEC. 92. Section 945(a) of title 11 of the United States Code is amended by striking out "execution" and inserting "implementation" in lieu thereof.

SEC. 93. Section 1102(b)(1) of title 11 of the United States Code is amended by striking out "order for relief" and inserting "commencement of the case" in lieu thereof.

SEC. 94. (a) Section 1103(b) is amended—

(1) by inserting "having an adverse interest" after "entity"; and

(2) by adding at the end thereof the following: "Representation of one or more creditors of the same class as represented by the committee shall not per se constitute the representation of an adverse interest.".

(b) Section 1103(c) of title 11 of the United States Code is amended—

(1) in paragraph (3), by striking out "recommendations" and inserting "determinations" in lieu thereof, and by inserting "or rejections" immediately after "acceptances"; and

(2) in paragraph (4), by striking out ", if a trustee or examiner, as the case may be, has not previously been appointed under this chapter in the case".

SEC. 95. Section 1105 of title 11 of the United States Code is amended by striking out "estate, and" and inserting "estate and of the" in lieu thereof.

SEC. 96. Section 1106(b) of title 11 of the United States Code is amended by inserting ", except to the extent that the court orders otherwise," immediately before "any other".

SEC. 97. Section 1107(a) of title 11 of the United States Code is amended by inserting "serving in a case" immediately after "on a trustee".

SEC. 98. Section 1108 of title 11 of the United States Code is amended by inserting ", on request of a party in interest and after notice and a hearing," immediately after "court".

SEC. 99. Section 1111(b) of title 11 of the United States Code is amended to read as follows:

"(b)(1) Except where property of the estate that secures a claim is sold subject to section 363(k) of this title, abandoned under section 554 of this title, or surrendered to the holders of such claims, or is to be sold, abandoned, or surrendered under the plan—

"(A) a claim secured by such property shall be allowed or disallowed under section 502 of this title the same as if the holder of such claim had recourse against the debtor on account of such claim, whether or not such holder had such recourse, unless the class of which such claim is a part elects, by at least two-thirds in amount and more than one-half in number of allowed claims of such class, to be governed by subparagraph (B) of this paragraph; and

"(B) unless the aggregate value of the interests in such property of the holders of such claims is inconsequential, the class may elect, as provided under subparagraph (A) of this paragraph, that such claims of such class, whether or not the holders of such claims had recourse against the debtor and notwithstanding section 506(a) of this title, are secured claims to the full extent that such claims are allowed.

"(2) The provisions of paragraph (1)(A) of this subsection are limited to the purposes of this chapter and such paragraph does not in any other way alter, affect, or create any right or liability of any other entity.".

SEC. 100. (a) Section 1112(a) of title 11 of the United States Code is amended—

(1) in paragraph (2), by striking out "is an involuntary case originally commenced as an involuntary case under this chapter" in lieu thereof; and

(2) in paragraph (3), by striking out "on other than" and inserting "other than on" in lieu thereof.

(b) Section 1112(b) of title 11 of the United States Code is amended—

(1) in paragraph (5), by inserting "a request made for" immediately before "additional"; and

(2) in paragraph (8), by striking out "and" and inserting "or" in lieu thereof.

SEC. 101. (a) Section 1121(c)(3) of title 11 of the United States Code is amended by striking out "the claims or interests of which are" and inserting "of claims or interests that is" in lieu thereof.

"(b) The trustee shall—

"(1) perform the duties specified in sections 704(2), 704(4), 704(6), and 15704 of this title; and

"(2) dispose of, pursuant to regulations issued by the Attorney General, moneys received or to be received in a case under chapter XIII of the Bankruptcy Act.".

TITLE II—AMENDMENTS TO TITLE 28 OF THE UNITED STATES CODE

SEC. 201. Section 151(c) of title 28 of the United States Code is amended by inserting a comma immediately after "suit".

SEC. 202. (a) Section 152 of title 28 of the United States Code is amended by adding at the end thereof the following:

"In recommending individuals to the President for appointment as bankruptcy judges, the Judicial Council of each circuit shall follow standards and procedures promulgated by the Judicial Conference of the United States. Such standards and procedures shall contain provision for public notice of all vacancies of bankruptcy judgeships. Further, such standards and procedures shall ensure that the Judicial Council gives due consideration to all qualified individuals, regardless of race, color, religion, sex, or place of national origin.".

(b) The Congress—

(1) takes notice of the fact that less than 2 per centum of bankruptcy judges are women, less than 3 per centum of bankruptcy judges are blacks, and only one bankruptcy judge is of Hispanic origin; and

(2) suggests that the President, in selecting individuals for nomination to bankruptcy judgeships created by this Act, give due consideration to qualified individuals without regard to race, color, sex, religion, or national origin.

SEC. 203. Section 155(a) of title 28 of the United States Code is amended to read as follows:

"(a) In each district having more than one bankruptcy judge, the judge in regular active service who is senior in continuous time of active service and under seventy years of age shall be the chief judge of the bankruptcy court, except that the age limitation shall not apply until April 1, 1984. If all the bankruptcy judges in regular active service are seventy years of age or older the youngest shall act as chief judge until a judge has been appointed and qualified who is under seventy years of age, but such a judge may not act as chief judge until he has served as a bankruptcy judge for one hundred and eighty days.".

SEC. 204. Section 158 of title 28 of the United States Code is amended by striking out "Court" and inserting "Bankruptcy court" in lieu thereof.

SEC. 205. (a) Section 160(a) of title 28 of the United States Code is amended by striking out "each circuit" and inserting "such circuit" in lieu thereof.

(b) Section 160 of title 28 of the United States Code is amended by adding at the end thereof the following new subsections:

"(d) A panel may exercise the powers of a bankruptcy court.

"(e) A single judge of a panel may enter an order if irreparable damage will result if such order is not entered. Such order shall remain in force only until the hearing and determination by the panel of three judges.".

SEC. 206. (a) Section 294(c) of title 28 of the United States Code is amended by striking out "district or bankruptcy judge" and inserting ", district, or bankruptcy" in lieu thereof.

(b) Section 294(d) of title 28 of the United States Code is amended by striking out "district judge or bankruptcy judge" and inserting "district, or bankruptcy judge" in lieu thereof.

SEC. 207. Section 295 of title 28 of the United States Code is amended by inserting a comma immediately before "district, or".

SEC. 208. Section 451 of title 28 of the United States Code is amended—

(1) in the first undesignated paragraph by inserting "and appellate panels created under section 160 of this title" before the period;

(2) in the first and third undesignated paragraphs by striking out "and" the second place it appears in each such paragraph and inserting a comma in lieu thereof and by striking out ", the judges of which are entitled to hold office for a term of 14 years", and

(3) in the third undesignated paragraph by striking out "Congress," and inserting "Congress" in lieu thereof and by striking out "and judge" and inserting "and judges" in lieu thereof.

SEC. 209. Section 456 of title 28 of the United States Code is amended—

(1) in the fourth undesignated paragraph by inserting a comma immediately after "district"; and

(2) in the fifth undesignated paragraph, by striking out the semicolon immediately after "each district judge" and inserting a comma in lieu thereof.

SEC. 210. Section 569(a) of title 28 of the

United States Code is amended by inserting "court" immediately after "of the bankruptcy".

SEC. 211. Section 571(b) of title 28 of the United States Code is amended by striking out "United States marshals, under regulations prescribed by the" and by striking out the comma immediately after "Courts".

SEC. 212. Sections 581(a) and 582(a) of title 28 of the United States Code are each amended by inserting ", without regard to the provisions of title 5 governing appointment in the competitive civil service," after "appoint".

SEC. 213. (a) Section 586(a) of title 28 of the United States Code is amended—

(1) in paragraph (5), by striking out "and" immediately after the semicolon;

(2) in paragraph (6), by striking out the period and inserting "; and" in lieu thereof; and

(3) by adding at the end thereof the following new paragraph:

"(7) administer oaths to and take the testimony of witnesses called to testify at meetings under title 11 or appoint a designee to so act.".

(b) Section 586(b) of title 28 of the United States Code is amended by striking out "trustee" the third place it appears and inserting "trustees to serve as standing trustee" in lieu thereof.

(c) Section 586(e)(2) is amended—

(1) by inserting "made to entities entitled" immediately after "payments" the first place it appears;

(2) in subparagraph (A), by striking out "of" and inserting "received by" in lieu thereof and by striking out "upon all payments" and inserting "of all such payments made" in lieu thereof;

(3) in subparagraph (B), by inserting "fee fixed under paragraph (1)(B) of this subsection" immediately after "the percentage"; and

(4) in subparagraph (B)(i), by striking out "individual" and inserting "individual's" in lieu thereof.

SEC. 214. Section 587 of title 28 of the United States Code is amended by adding at the end thereof the following: "The positions of such trustees shall not be in the Senior Executive Service.".

SEC. 215. (a) Section 604(a) of title 28 of the United States Code is amended—

(1) in paragraph (10), by striking out "(17)" each place it appears and inserting "(18)" in lieu thereof;

(2) by redesignating paragraph (17) as paragraph (18);

(3) by redesignating paragraph (13), as added by section 225(a)(2) of the Act of November 6, 1978 (92 Stat. 2549), as paragraph (17);

(4) by redesignating paragraph (14), as redesignated by section 225(a)(1) of the Act of November 6, 1978 (92 Stat. 2549), as paragraph (13); and

(5) by inserting immediately after paragraph (13) the following new paragraph:

"(14) Pursuant to section 1828 of this title, establish a program for the provision of special interpretation services in courts of the United States;".

(b) Subsection (f) of section 604 of title 28 of the United States Code, as added by section 225(b) of the Act of November 6, 1978 (92 Stat. 2549), is redesignated as subsection (h) and is amended by striking out "or remove a trustee appointed from the panel".

SEC. 216. Section 634(a) of title 28 of the United States Code is amended by inserting a comma after "salaries" the first place it appears and by striking out "rates for" and all that follows through "as amended" and inserting "an amount fixed in accordance with section 225 of the Federal Salary Act of 1967, subject to adjustment in accordance with such Act and section 461 of this title" in lieu thereof.

SEC. 217. (a) Section 773(c) of title 28 of the United States Code is amended by striking out "a circuit" and inserting "an appellate" in lieu thereof, and by striking out the parentheses around "but presents a substantial question".

(b) Section 773 of title 28 of the United States Code is amended by adding at the end thereof the following new subsection:

"(d) Court reporters appointed under this section shall be appointed in accordance with all of the standards and procedures applicable to appointments under section 753 of this title and shall be governed by the rules and regulations applicable to court reporters appointed under section 753 of this title. Mechanical means of recording proceedings may include stenomask, and contract reporters may be used in lieu of or in addition to court reporters appointed under this section. The Director of the Administrative Office of the United States Courts may negotiate contracts without regard to section 3709 of the Revised Statutes (41 U.S.C. 5).".

SEC. 218. (a) Section 1293(a) of title 28 of the United States Code is amended by striking out "decisions" and inserting "judgments, orders, and decrees" in lieu thereof.

(b) Section 1293(b) of title 28 of the United States Code is amended—

(1) by striking out "an appellate panel created under section 160 or";

(2) by striking out "district court of the United States" and inserting "district court of the United States," in lieu thereof; and

(3) by inserting ", and of appeals from interlocutory orders and decrees of an appellate panel created under section 160 of this title, a district court, and a bankruptcy court, but only by leave of the court of appeals to which the appeal is taken" immediately before the period.

SEC. 219. Section 1334(c) of title 28 of the United States Code is amended by striking out "that section" and inserting "this section" in lieu thereof.

SEC. 220. (a) Section 1471(a) of title 28 of the United States Code is amended by striking out "subsection" and inserting "subsection" in lieu thereof.

(b) Subsections (c) and (e) of section 1471 of title 28 of the United States Code are each amended by striking out "commenced" and inserting "pending" in lieu thereof.

(c) Section 1471(c) of title 28 of the United States Code is amended by inserting "or a proceeding arising under title 11 or arising in or related to a case under title 11" immediately after "title 11".

(d) Section 1471(d) of title 28 is amended by striking out "a district court or".

(e) Section 1471(e) of title 28 of the United States Code is amended by inserting ", and of all property, wherever located, of the estate in such case" immediately before the period at the end thereof.

SEC. 221. Section 1472(1) of title 28 of the United States Code is amended by striking out "principle" and inserting "principal" in lieu thereof.

SEC. 222. (a) Section 1473(a) of title 28 of the United States Code is amended by striking out "Except" and inserting "Notwithstanding any Act of Congress that confers venue in a specific district and except" in lieu thereof.

(b) Section 1473(c) of title 28 of the United States Code is amended by striking out "section" the first place it appears and inserting "subsection" in lieu thereof.

SEC. 223. Section 1481 of title 28 of the United States Code is amended by inserting "(a)" before "A" and by adding at the end thereof the following new subsection:

"(b) A contempt punishable by a bankruptcy court includes any act that is in violation of a stay under title 11.".

SEC. 224. Section 1482(b) of title 28 of the United States Code is amended by striking out "judgments, orders," and inserting "orders" in lieu thereof.

SEC. 225. Section 1827(i) of title 28 of the United States Code is amended by striking out "referee in bankruptcy" and inserting "bankruptcy judge" in lieu thereof.

SEC. 226. Section 1871(a) of title 28 of the United States Code is amended to read as follows:

"(a) Grand jurors in district courts and petit jurors in district courts and bankruptcy courts appearing pursuant to this chapter shall be paid the fees and allowances provided by this section. The requisite fees and allowances shall be disbursed, on the certificate of the clerk of the district court or of the clerk of the bankruptcy court, by the clerk of the district court in accordance with the procedure established by the Director of the Administrative Office of the United States Courts. Attendance fees for extended service under subsection (b) of this section shall be certified by the clerk of the district court only upon the order of a district judge or by the clerk of the bankruptcy court only upon the order of a bankruptcy judge.".

SEC. 227. Section 1923(b) of title 28 of the United States Code is amended to read as follows:

"(b) The docket fees of United States attorneys shall be paid to the clerk of the district court, the docket fees of United States trustees shall be paid to the clerk of the bankruptcy court, and all such fees shall then be paid by the clerks into the Treasury.".

SEC. 228. Section 1930(a)(1) of title 28 of the United States Code is amended by striking out the period after $60 and inserting "in the case of a single filing and $100 in a joint case" and by inserting a new (5) to read as follows: "For any proceeding in any case under title 11, $15.".

SEC. 229. Section 1962 of title 28 of the United States Code is amended by inserting "or bankruptcy court" immediately after "district court".

SEC. 230. Section 1963 of title 28 of the United States Code is amended—

(1) in each paragraph, by inserting "or bankruptcy court" immediately after "district court" the first place it appears;

(2) in the first sentence of the first undesignated paragraph, by inserting "with the clerk of the district court or the bankruptcy court, whichever is appropriate" before the period at the end thereof;

(3) by striking out "where registered" and inserting in lieu thereof "where entered".

(4) by adding at the end thereof the following new undesignated paragraph:

"An order of discharge or an order of confirmation in a case under title 11 which has become final may be registered in any other district by filing in the office of the clerk of the bankruptcy court of that district a certified copy of the order and when so registered shall have the same effect as an order of the bankruptcy court of the district where so registered and may be enforced in like manner.".

SEC. 231. Section 1964 of title 28 of the United States Code is amended by inserting "or bankruptcy court" immediately after "district court" each place it appears.

SEC. 232. Section 2075 of title 28 of the United States Code is amended by striking out "in cases under title 11" and inserting "in cases under title 11 and in proceedings arising under title 11 or arising in or related to cases under title 11" in lieu thereof.

SEC. 233. Section 2256(1)(C) of title 28 of the United States Code is amended by inserting "or under title 11" immediately after "title".

SEC. 234. (a) Section 1914 of title 28 of the

United States Code is amended by striking out subsection (d).

(b) The District of Columbia Code is amended—

(1) in section 15–701(a), by striking out "clerk of the United States District Court for the District of Columbia,";

(2) in section 15–703—

(A) by striking out "(b)" and subsection (a); and

(B) in the catchline of such section by striking out "Deposit for costs; security" and inserting in lieu thereof "Security";

(3) in section 15–704—

(A) in subsection (a) by striking out "(a)" and by striking out "United States District Court for the District of Columbia" and inserting in lieu thereof "the Superior Court of the District of Columbia"; and

(B) by striking out subsection (b);

(4) by striking out section 15–706;

(5) in section 15–712 by striking out "Any District of Columbia Court" and inserting in lieu thereof "The Superior Court of the District of Columbia and the District of Columbia Court of Appeals"; and

(6) in the analysis of sections for chapter 7 of title 15, by striking out the item relating to section 15–706.

TITLE III—AMENDMENTS TO THE ACT OF NOVEMBER 6, 1978

SEC. 301. The title of the Act entitled "An Act to establish a uniform Law on the Subject of Bankruptcies", approved November 6, 1978 (Public Law 95–598; 92 Stat. 2549) (hereinafter in this title referred to as the "Act") is amended to read as follows: "An Act to establish a uniform law on the subject of bankruptcies".

SEC. 302. The Act is amended by inserting after the enacting clause the following: "That this Act may be cited as the 'Bankruptcy Reform Act of 1978'.".

SEC. 303. Section 216 of the Act is amended by striking out "record" and inserting "records" in lieu thereof.

SEC. 304. Section 222 of the Act is amended by striking out "assistance" and inserting "assistants" in lieu thereof.

SEC. 305. Section 232 of the Act is repealed.

SEC. 306. Section 308(f)(3) of the Act is amended by striking out "C" and inserting "(C)" in lieu thereof.

SEC. 307. Section 402(c) of the Act is amended—

(1) by striking out "210," and inserting "205, 206, 207, 211, 213," in lieu thereof;

(2) by inserting "226," immediately after "225,"; and

(3) by inserting "248" immediately after "246,".

SEC. 308. (a) Section 403(a) of the Act is amended by striking out "this Act" and inserting "the provisions of this Act other than this subsection and subsections (b) and (d) of this section" and by striking out "the Act" and inserting "such provisions".

(b) Section 403(b) of the Act is amended by inserting "or after" immediately after "on".

(c) Section 403(e) of the Act is amended to read as follows:

"(e) Notwithstanding subsection (a) of this section—

"(1) the amount by which a fee exceeds $100.000 may not be charged under section 40c(2)(b) of the Bankruptcy Act in a case in which the plan is confirmed after September 30, 1979;

"(2) after September 30, 1979, all moneys collected for payment into the referees' salary and expense fund in cases filed under the Bankruptcy Act shall be collected and paid into the general fund of the Treasury; and

"(3) any balance in the referees' salary and expense fund in the Treasury on October 1, 1979, shall be transferred to the general fund of the Treasury and the referees' salary and expense fund acount shall be closed.".

SEC. 309. (a) Section 404(b) of the Act is amended to read as follows:

"(b) The term of a referee in bankruptcy who is serving on the date of enactment of this Act is extended to and expires on March 31, 1984, or when his sucessor takes office, and such person shall have the title United States bankruptcy judge. During the period commencing on October 1, 1979, and ending on March 31, 1984 (hereinafter in this title referred to as 'the transition period'), unless a bankruptcy judge is certified to be not qualified by the Chief Judge of the Circuit Court after a finding that such judge is not qualified is made by a merit screening committee established under subsection (c) of this section, such judge shall serve in the court of bankruptcy continued under subsection (a) of this section to which such United States bankruptcy judge was appointed, in the manner prescribed by this title. Section 8335(a) of title 5 of the United States Code shall not apply to United States bankruptcy judges during the transition period. During the transition period, United States bankruptcy judges shall be exempt from annual sick leave laws and regulations.".

(b) Section 404(c) of the Act is amended by striking out the first sentence and inserting in lieu thereof the following new sentence: "There shall be established for each judicial district a merit screening committee composed of the president or the designee of the president of the State bar association, the president or designee of the president of a local bar association for the area within the judicial district wherein a referee in bankruptcy maintains his official headquarters and the dean, or designee of the dean, of an accredited law school, if any, located within the judicial district or State, and if no such law school exists, then a lay member selected by the chief judge of the United States district court for the judicial district wherein the referee in bankruptcy maintains his official headquarters."

(c) Section 404(d) of the Act is amended by striking out "41,".

(d) Section 404(e) of the Act is amended by inserting immediately after the first sentence the following new sentence: "Bankruptcy judges for the district shall decide where the headquarters office of the clerk of the bankruptcy court shall be located.".

(e) Section 404 of the Act is amended by adding at the end thereof the following new subsections:

"(h) During the transition period, the powers granted under section 2071 of title 28 of the United States Code shall be exercised by the United States bankruptcy court of a district, exclusive of the district court of such district, for the purpose of promulgating local rules of procedure to be applicable in cases and proceedings before a United States bankruptcy judge of such court, and such powers shall be exercised for such purpose by the appellate panels created under section 160 of title 28 of the United States Code to be applicable in appeals before such an appellate panel.

"(i) During the transition period, section 155 to the extent it does not displace a designated chief judge, and sections 156, 157, 158, and 159 of title 28 of the United States Code, contained in section 201 of this Act, and the amendment contained in section 210 of this Act, shall apply to the courts of bankruptcy continued under section 404(a) of this Act the same as such amendments apply to the United States bankruptcy courts established under section 201 of this Act.".

SEC. 310. (a) Section 405(a) of the Act is amended—

(1) by striking out "such cases" the first place it appears and inserting "in all cases under title 11 or arising in or related to a case under title 11 pending during the transition period" in lieu thereof; and

(2) in paragraph (1)(C), by inserting ", except as provided in subsection (c) of this section" immediately before the period at the end thereof.

(b) Section 405(c)(2) of the Act is amended by inserting "240," immediately after "238,".

(c) Section 405(d) of the Act is amended by striking out "248" and inserting "247" in lieu thereof.

SEC. 311. Section 406(b) of the Act is amended by inserting immediately after the first sentence the following new sentence: "The recommendations may provide for a bankruptcy judge to serve in more than one contiguous judicial district or circuit.".

SEC. 312. Section 407(c) of the Act is amended by striking out "332" and inserting "333" in lieu thereof.

SEC. 313. Section 408 of the Act is amended by adding at the end thereof the following new subsection:

"(d) During the transition period, section 604(h) of title 28 of the United States Code does not apply to bankruptcy courts for districts listed in section 581(a) of such title.".

SEC. 314. Section 409(a)(1) of the Act is amended by striking out "September 30, 1983" and inserting "March 31, 1984" in lieu thereof.

TITLE IV—AMENDMENTS TO OTHER ACTS

SEC. 401. Section 19 of the Commodity Exchange Act (7 U.S.C. 24) is redesignated as section 20 of such Act.

SEC. 402. Section 4(e) of the Perishable Agricultural Commodities Act of 1930 (7 U.S.C. 499d(e)) is amended—

(1) by inserting "under the Bankruptcy Act or been a debtor in a case filed under title 11 of the United States Code or received a discharge in such case" immediately after "bankrupt" the first place it appears; and

(2) by inserting "under the Bankruptcy Act or which has been a debtor in a case filed under title 11 of the United States Code" immediately after "bankrupt" the second place it appears.

SEC. 403. (a) Section 6(d) of the Securities Investor Protection Act (15 U.S.C. 78fff(d)) is amended by striking out "section 16(5)(A)" and inserting "section 16(4)(A)" in lieu thereof.

(b) Section 8(e)(4)(C) of such Act (15 U.S.C. 78fff2(e)(a)(4)(C)) is amended by striking out "section 9(a)(5))" and inserting "section 9(a)(4)" in lieu thereof.

SEC. 404. Section 605(a)(1) of the Fair Credit Reporting Act (15 U.S.C. 1681c(a)(1)) is amended by inserting ", except for cases under chapter 13 or chapter XIII as the case may be, which antedate the report by more than 6 years" immediately after "year".

SEC. 405. Section 151 of title 18 of the United States Code is amended by striking out 'mean" and inserting "means" in lieu thereof.

SEC. 406. Section 424(b)(3)(B) of the Federal Mine Safety and Health Act of 1977 (30 U.S.C. 934(b)(3)(B)) is amended by striking out "the Bankruptcy Act" and inserting "title 11 of the United States Code" in lieu thereof.

SEC. 407. Section 3468 of the Revised Statutes of the United States (31 U.S.C. 193) is amended by adding at the end thereof the following new sentence: "This section does not apply, however, in a case under title 11 of the United States Code or in a case arising in or relating to a case under such title.".

SEC. 408. At the end of section 456(a) of the Social Security Act, add the following:

"(b) A debt which is a child support obligation assigned to a State under section 402(a)(26) is not released by a discharge in bankruptcy under the Bankruptcy Code or Bankruptcy Act.".

SEC. 409. Section 1961(1)(D) of title 18 of the United States Code is amended by inserting "or a case under the Bankruptcy Act" after "title 11."

TITLE V—RELATED PROVISIONS OF LAW

SEC. 501. Nothing in any provision of Federal or State law shall operate to prevent, stay, or otherwise prohibit a stockbroker or securities clearing agency from exercising a contractual right to liquidate a securities

contract or to cause the liquidation of a securities contract, nor shall any court issue any order preventing, staying, or otherwise prohibiting the exercise of such contractual right, unless such order is authorized under the provisions of the Securities Investor Protection Act of 1970 (15 U.S.C. 78aaa et seq.) or is required because of a threat to the national security. As used in this section, the term—

(1) "contractual right" includes, but is not limited to, a right set forth in a rule or bylaw of a national securities exchange, a national securities association, or a securities clearing agency; and

(2) "securities contract" means a securities contract as defined in section 741 of title 11 of the United States Code.

SEC. 502. No provision of Federal or State law shall operate to prevent, stay, or otherwise prohibit a commodity broker or forward contract merchant from exercising a contractual right to liquidate a commodity contract or forward contract, or to cause the liquidation of a commodity contract or forward contract, and no court may issue any order preventing, staying, or otherwise prohibiting the exercise of such contractual right unless such order is required because of a threat to the national security. As used in this section, the term—

(1) "contractual right" includes, but is not limited to, a right set forth in a rule or bylaw of a clearing organization or a contract market or in a resolution of the governing board thereof; and

(2) "commodity contract" means a commodity contract as defined in section 761 of title 11 of the United States Code.

SEC. 503. During the period beginning on the date of the enactment of this Act and ending on April 1, 1984, the amendments contained in sections 222, 223, 224, 225, 226, and 236 shall apply to courts of bankruptcy continued by section 404(a) of the Act of November 6, 1978 (Public Law 95–589; 92 Stat. 2549).

SEC. 504. This Act may be cited as the "Bankruptcy Amendments Act of 1980".

SEC. 505. (a) Section 3 of the Military Personnel and Civilian Employees' Claims Act of 1964, as amended (78 Stat. 767, as amended; 31 U.S.C. 241), is amended as follows:

(1) By striking out "$15,000" in subsection (a)(1) and inserting in place thereof "$25,000".

(1) By striking out "$15,000" in subsection (b)(1) and inserting in place thereof "$25,000".

(b) The amendments provided in subsection (a) of this section shall apply to claims based upon damage to, or loss of, personal property which occurs after the date of the enactment.

By Mr. EAGLETON (for himself, Mr. PERCY, Mr. MATHIAS, Mr. ROTH, Mr. CHILES, Mr. SASSER, Mr. PRYOR, Mr. LEVIN, and Mr. SARBANES):

S. 864. A bill to amend the Accounting and Auditing Act of 1950 to require ongoing evaluations and reports on the adequacy of the systems of internal accounting and administrative control of each executive agency; to the Committee on Governmental Affairs.

FINANCIAL INTEGRITY ACT OF 1981

● Mr. EAGLETON. Mr. President, I introduce today legislation intended to strengthen the internal accounting and administrative controls maintained by Federal agencies. This is not exactly a glamorous subject, but it is a vitally important area. Retiring Comptroller General Elmer Staats has called internal controls the "first line of defense against fraud, waste, and program abuse," and he is entirely right.

I introduced this legislation in the last Congress, along with Senators PERCY and MATHIAS. I am pleased that those Senators are again cosponsoring the legislation, along with Senators ROTH, CHILES, PRYOR, SASSER, LEVIN, and SARBANES. The number of cosponsors demonstrates a growing awareness of how serious the Federal Government's vulnerability to fraud, waste, and mismanagement is, and that improved internal controls could play an important part in the battle against those afflictions.

Beginning with the revelations about GSA in mid-1978, the public has been bombarded continually with headlines reporting the staggering level of fraud, waste, and mismanagement in Federal programs. In one stunning revelation, the Inspector General at Health, Education, and Welfare estimated that between $6.3 billion and $7.4 billion was misspent annually at his Department as a result of fraud, abuse, and waste—at a minimum. Surveying the entire landscape, an official of the General Accounting Office, knowledgeable in this area, estimated in 1978 that fraud in Federal programs ranged from $12 to $15 billion annually to perhaps as high as $25 billion.

This level of fraud, program abuse, and just plain waste in Federal programs is unacceptable. We cannot permit the squandering of billions of dollars at this time of double-digit inflation and scarce budetary resources. It fuels the fires of inflation. It robs Federal resources which might otherwise be available to meet legitimate—even pressing—needs. It promotes understandable public cynicism about all Federal programs, eroding support for these activities.

There is no miracle cure to these problems. A government as large as ours will never be perfectly administered, and there is a morally bankrupt, but widely held notion that stealing from the Government is somehow less bad than stealing from an individual.

But there are significant steps that can be taken to improve the situation, to insure that Federal programs are administered vigilantly, and those who hold and seek Federal office have an obligation to devise constructive approaches and solutions to the problem.

At about the same time that the GSA scandal was making daily news, a GAO report stated that poor internal controls are the No. 1 problem in Federal Government agencies. A preoccupation with detecting fraud and waste after the fact obscured the possibility that weakness in internal controls may have opened the door to abuses in the first place. As Mr. Staats has stated:

> Important as the detection of fraud, abuse and error is, detection should not be our primary concern as government managers. Our prime concern should be directed toward constructing systems of management control that will prevent fraud and abuse, make it more difficult, and decrease the likelihood of error and waste.

Horror stories where fraud, waste, and mismanagement can be directly attributed to inadequate internal controls abound. For example:

Over $25 million has been paid out erroneously because of internal control weaknesses in the supplemental security income program (GAO Report, August 9, 1979).

The Department of Justice cannot adequately monitor the collection of debts because its management information system does not provide accurate and comprehensive data on such debts (GAO Report, October 25, 1979).

An IG audit of logistics operations—office supply, warehousing, and purchasing—at one NASA installation disclosed a need for several improvements in basic internal controls. Major problems were that supplies were being procured at substantially higher prices than were available through GSA, and the inventory records and supply activity data were not being adequately maintained (NASA IG report for period ending September 30, 1979).

According to the IG in the Department of Commerce, internal controls in the Bureau of the Census payroll system were inadequate to prevent duplicate payments or identify fictitious employees. Neither was the system adequate to handle the volume of transactions projected in the 1980 census year (DOC IG report for period ending September 30, 1979).

A special audit by Inspectors General of 17 agencies, released in March 18, 1980, hearings before Senator CHILES' Subcommittee on Open Government, indicates that over the last 10 years, Washington-based Federal agencies bought $1.2 billion worth of new office furniture even though $373 million worth of new or slightly used furniture was in storage. Agencies have no management systems to determine what furniture they have on hand before buying new items. The audit also revealed that agencies spent $36 million on new furniture in the preceding 4 months despite a freeze imposed on such purchases by OMB and GSA.

These cases where the wrongdoing or problem was detected represent only the tip of the iceberg. The Comptroller General pointed to the existence of the iceberg in no uncertain terms testifying before the Senate Appropriations Committee early in 1979:

> Based on our work we believe that all of the agencies visited are vulnerable to fraud and abuse. This is because Federal headquarters, regional offices, and other field locations and grantees have inadequate internal controls over their operations. As a result, there is insufficient assurance that Federal funds spent at these locations are spent for the purposes intended. In fact, during our testing of selected internal control systems, we found Federal funds and equipment that had been abused and misused at most locations visited.

GAO reports a total of 130,000 cases of fraud and other illegal acts alleged against 21 major agencies in the 2½ years ending March 31, 1979. The Comptroller General has stated that these problems occur because of the lack of adequate internal controls over particular tasks that must be performed. Surely, sound internal controls could have greatly reduced this number.

There is a pressing need to return to basics: Strong integrated systems of accounting and administrative controls

to insure that Government employees know what to do and do it effectively, that funds are spent for what is intended, that maximum return is received for every dollar, and that services are delivered as promised.

In recent years, Congress has devoted considerable effort to making corporations and other private entities more accountable for their actions. In response to revelations concerning corporate bribery abroad, Congress enacted the Foreign Corrupt Practices Act. FCPA obligated the chief executive officers of corporations to verify that their corporations maintained internal control systems adequate to insure that such misuse of corporate funds was not occurring. Federal agency heads must be similarly accountable. It is necessary to convince Federal managers that the responsibility to deliver funds and services carries with it the obligation to do so in a financially responsible way. This requires blasting loose some ingrained attitudes. As Mr. Staats has said:

The reason internal control systems are in a state of disrepair is that top management has devoted most of its concern and emphasis to delivering funds and services and that effective controls over tasks and functions which lead to the delivery of these funds and services has had a low priority. Because of top management's insufficient concern for internal controls, middle management reflects this same indifference.

The legislation we introduce today would change that approach significantly. It provides that the head of each agency would be required by December 31 of each year, beginning in December 1982, to report on the adequacy of the agency's systems of internal accounting and administrative control. GAO and OMB are required to establish the format for such reports and, more importantly, to provide guidelines for performing control evaluations.

The agency heads would be required to certify that the agency's internal accounting and administrative control systems provided reasonable assurances that the objectives of internal accounting and administrative control as specified in the legislation were achieved. Any material weaknesses which prevent the agency head from expressing an unqualified opinion that those objectives were achieved must be identified and the plans and schedule for remedying those material weaknesses described in detail.

I am under no illusion that imposing these reporting requirements on agency heads will solve all the problems which have led to fraud and waste in Federal programs. However, if this legislation were enacted, I expect that the agency heads would assume more formal responsibility for the quality of the agency's internal accounting and administrative controls, with resulting improvements in agency operations likely from top to bottom. Enacting this legislation would also reflect Congress' recognition that the internal controls of Federal agencies are too important to be left to the accountants and auditors; literally billions of dollars are at stake, and the issue demands the attention of top management in the executive branch as well as the continuing oversight of Congress.

Mr. President, I ask unanimous consent that the text of the legislation be printed in full in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 864

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Financial Integrity Act of 1981".

FINDINGS AND POLICY

SEC. 2. (a) The Congress hereby finds that—

(1) fraud, waste, and mismanagement have caused a serious crisis of confidence in Federal Government programs and agencies;

(2) fraud and errors in Federal programs are more likely to occur from a lack of effective systems of internal accounting and administrative control in the Federal agencies;

(3) effective systems of internal accounting and administrative control provide the basic foundation upon which a structure of public accountability must be built;

(4) effective systems of internal accounting and administrative control are necessary to provide assurance that Federal assets and funds are adequately safeguarded as well as to produce reliable financial information for the agency;

(5) systems of internal accounting and administrative control are necessarily dynamic and must be continuously evaluated and where necessary improved; and

(6) reports regarding the adequacy of the systems of internal accounting and administrative control of each Federal agency are necessary to enable the executive branch, the Congress, and the public to evaluate the agency's performance of its public responsibilities and accountability.

(b) It is hereby declared to be the policy of the United States that—

(1) each Federal agency must maintain effective systems of internal accounting and administrative control as a integral part of its management practices;

(2) the systems of internal accounting and administrative control of each Federal agency shall be evaluated on an ongoing basis and when detected, weaknesses must be promptly corrected; and

(3) all levels of management of the Federal agencies must involve themselves in assessing and strengthening the systems of internal accounting and administrative control to minimize fraud, errors, abuse, and waste of Government funds.

DEFINITIONS

SEC. 3. As used in this Act:

(a) The term "President" means the President of the United States.

(b) The term "Comptroller General" means the Comptroller General of the United States.

(c) The term "Director" means the Director of the Office of Management and Budget.

SEC. 4. Section 113 of the Accounting and Auditing Act of 1950, as amended (31 U.S.C. 66a), is amended by adding at the end thereof the following new subsection:

"(d)(1) To ensure that the requirements of subsection (a)(3) of this section are fully complied with, the head of each executive agency, which the Director determines to be covered by this subsection, shall prepare a report stating an opinion on the adequacy of the agency's systems of internal accounting and administrative control by Decemebr 31, 1982, and by December 31 following the end of each fiscal year thereafter.

"(2) The reports shall be signed by the head of each executive agency and addressed to the President. Such reports shall also be made available to Congress and the public.

"(3) By December 31, 1981, the Comptroller General, in consultation with the Director, shall establish a system of reporting and a general framework to guide the agencies in performing evaluations on their systems of internal accounting and administrative control. The Comptroller General, in consultation with the Director, may modify the format for the report or the framework for conducting the evaluations from time to time as deemed necessary.

"(4) Internal accounting and administrative controls are to be defined by the Comptroller General, and shall provide reasonable assurances that—

"(i) all obligations and costs were in compliance with applicable law;

"(ii) all funds, property, and other assets were safeguarded against waste, loss, unauthorized use, or misappropriation; and

"(iii) all revenues and expenditures applicable to agency operations were properly recorded and accounted for to permit the preparation of accounts and reliable financial and statistical reports and to maintain accountability over the assets.

Any inadequacy or material weaknesses in an agency's systems of internal accounting and administrative control which prevents the head of the agency from stating that the agency's systems of internal accounting and administrative control provided reasonable assurances that each of the objectives specified above were achieved shall be identified and the plans and schedule for correcting any such inadequacy described in detail.

"(5)(A) The Inspector General of an executive agency or, if no Inspector General exists for an agency, the head of the internal audit staff, shall receive and investigate any allegation that an employee of the agency provided false or misleading information in connection with the evaluation of the agency's systems of internal accounting and administrative control or in connection with the preparation of the annual report on the systems of internal accounting and administrative control.

"(B) If, in connection with any investigation under subparagraph (A), the Inspector General or the head of the internal audit staff, as appropriate, determines that there is reasonable cause to believe that false or misleading information was provided, he shall report that determination to the head of the agency.

"(C) The head of the agency shall review any matter referred to him under subparagraph (B) and shall take action under chapter 76 of title 5, United States Code, or such other disciplinary or corrective action as he deems necessary.".●

● Mr. SASSER. Mr. President, I rise to state my support for S. 864, The Financial Integrity Act of 1981, which I am cosponsoring. My congratulations to my distinguished colleague, Senator TOM EAGLETON, for introducing this bill to require Federal agency heads to take the responsibility for the adequacy of their agency's management control system and to make annual reports on it.

Now, more than ever before, when we in the Congress are in the throes of a budget-cutting fervor unequaled in our history, every effort should be made to achieve savings through good husbandry of the available resources. To quote Congressman JACK BROOKS, the distinguished sponsor of similar legislation in the House:

Management accountability has appeal to both ends of the political spectrum. Those

who want to make severe cuts in the Federal budget view improved management as one means of making those cuts, while the beneficiaries of the programs that might be cut view better management as a means of reducing their losses.

There is plenty of room for improvement in management control. A GAO study, released last August, showed that weaknesses in the internal control of the agencies can be blamed for billions of dollars that are lost annually through fraud, waste, and abuse.

The internal controls suggested by the GAO study amount to basic good management principles. In a New York Times article, reporter Steve Lohr noted:

These weaknesses, the GAO suggests, can be corrected without the application of complex management systems or fancy computer technology. Rather, the use of even rudimentary accounting and auditing procedures would greatly help. For instance, the agency found that at some Health Services Administration offices, mail containing cash receipts was collected, logged in and processed by one person. Having more than one person count the money contained in cash-holding envelopes is probably the simplest possible kind of control; it is the example almost always used to illustrate to beginning auditing students what internal control is." (New York Times, March 29, 1981: "The Big Push Is On To Make Government Watch Its Money")

One of the more spectacular examples of a breakdown in internal control is the case of the Urban Mass Transit Administration accounting clerk who managed to embezzle $800,000 by routinely adding his own name to the list of vouchers for payment which UMTA submitted to the Department of Treasury. That clerk would still be merrily driving Lincoln Continentals and giving large loans to his friends at the office if it had not been for an alert banker. The embezzler was regularly depositing large Federal checks, in amounts ranging between $55,000 to $315,000, in his bank account. It was the bank, not the agencies involved, that blew the whistle.

This case of fraud in the Federal agencies could have been avoided if internal control procedures had been instituted. The accounting clerk responsible for preparing the vouchers should not have had access to them after the certifying officer signed them. The officer doing the signing should have been more careful. And the vouchers themselves should have been marked so that additional entries could not be made. Yet, because simple procedures like these were not followed, $800 thousand slipped out of the control of the agencies responsible for the money.

The legislation introduced by Senator EAGLETON today, with my cosponsorship, seeks to strengthen the internal controls maintained by the Federal agencies. It is one more check against fraud, waste, and abuse in Government programs. Its objectives are similar to several other initiatives I have sponsored, including the GAO hotline, a successful effort offering a nationwide, toll-free number that concerned citizens can call to report instances of fraud and wrongdoing.

Legislation I have cosponsored, S. 591, to establish better procedures for the collection of outstanding debts owed the Federal Government, is another means of conserving resources through better management. I believe that these two bills go hand-in-hand in the effort to eradicate fraud, waste, and abuse through tighter controls.

We are already too far behind the private sector in instituting such basic management controls. Keeping an eye on the bottomline has not been the primary concern of the Government manager charged with delivering muchneeded services. However, the time has come for government to take a leaf from the ledger of private business, insofar as it is possible. Then more of our precious resources can go into the programs, where they belong.

The introduction of the Financial Integrity Act of 1981 is a step toward tightening up the management of Federal programs throughout the Government. I am pleased to support this legislation.●

● Mr. ROTH. Mr. President, I rise in support of the Financial Integrity Act of 1981. I commend Senator EAGLETON, the distinguished ranking member of the Governmental Affairs Committee, for his initiative in developing this legislation.

I believe this legislation, if implemented effectively, can help to improve the management of Federal programs and strengthen agency accounting systems. The bill has as its primary objective the improvement of internal agency control systems to prevent fraud, abuse, and waste in Government. The underlying premise of the bill is that inefficient or wasteful spending should be, to the greatest extent possible, prevented before it is allowed to happen. Greater efforts must be made to reduce to a minimum the opportunities for fraudulent activity and the ineffective financial procedures which exist in many Federal agencies. A little more care in designing agency administrative mechanisms can yield a great deal more savings down the road.

Mr. President, I view improvements in the efficiency of Government as a vital corollary to spending restraint. Simply stated, the Government must do more with what it has, and the elimination of fraud, abuse, and waste will make that possible. The Governmental Affairs will be considering a number of initiatives this year designed to improve the management of Federal programs. We plan to carefully consider the Financial Integrity Act and I look forward to working with the distinguished ranking member of the committee on the bill.●

By Mr. PRYOR (for himself and Mr. BUMPERS):

S. 865. A bill to amend the Small Business Act to provide that any change in regulations affecting the disaster loan provisions of such act shall not apply to applications for disaster loan assistance received before the effective date of the change; to the Committee on Small Business.

EQUITY FOR DISASTER RELIEF LOAN APPLICANTS

● Mr. PRYOR. Mr. President, today I am introducing on behalf of myself and Senator BUMPERS, legislation which amends the Small Business Act to insure equitable treatment of all applicants who have applied for loans under the emergency disaster relief program of that act. This bill provides that any change in regulations affecting the disaster loan provisions of this act would not apply to applications for disaster loan assistance received before the effective date of the change.

Let me take a minute to tell my colleagues about the recent actions which have prompted me to introduce this bill. As many of you may know, much of the United States was stricken by a devastating drought last summer. Many of our Nation s farmers suffered significant losses from this drought. The Small Business Administration declared much of the Southern region of the country a disaster area and implemented a disaster relief program.

The deadline for disaster relief applications was February 18, 1981. Almost a month later, on March 11, after some loans had been approved and funded, the Office of Management and Budget instructed the Small Business Administration to withhold further funding for disaster loan applications not yet approved.

Subsequently, on March 19, a new set of regulations governing disaster loans was issued by the Small Business Administration. The new rules reduced the amounts of physical disaster loans to not more than 60 percent of verified loss, imposed a credit elsewhere test on business disaster loans and limited economic injury loans to $100,000.

Mr. President, farmers in Arkansas—the State most severely affected by last summer's drought—as well as farmers in other affected States were caught completely by surprise since they had virtually been assured that this money would be forthcoming as a source of capital for planting this year's crop.

These farmers had met SBA's deadlines, filed their applications in good faith and were assured by everyone they talked to, including local SBA officials, that although approvals and funding might be a slow process, the money would eventually be forthcoming to fund approved loans.

These farmers had evidently read the same SBA literature that I had on the program. Nowhere could I find it written that the loans would be disbursed on a "first-come, first-served basis" as is the case with these loans.

The lack of employees to process the applications in a timely manner was not the fault of the farmers and yet they are being penalized for this, I am afraid.

Mr. President, in introducing this amendment I do not intend to argue the pros and cons of these new regulations, but rather point to the injustice done many farmers nationwide when the rules are changed in the middle of the game.

I have talked with many farmers lately who are in limbo about their future. Even if they should qualify for funding, they are not at all sure that the 60 percent will be enough to carry them through the year. Some who had arranged for temporary bridge loans at high interest rates to see them through until their SBA loan was approved, now

find themselves unable to pay this loan back and still unable to plant a crop.

Mr. President, 16,000 farmers may seem like a minute number of people to help. But, Mr. President, I am not sure just how often this country can afford to turn their backs on the small farmers. Someday there will not be 16,000 farmers left in this country to raise the food and fiber upon which we depend.

Mr. President, I urge quick action on this bill.●

By Mr. BAUCUS (for himself and Mr. TSONGAS):

S. 866. A bill to improve congressional oversight of Federal programs and activities by requiring greater specificity in setting program objectives, by requiring continuing information on the extent to which programs are achieving their stated objectives, by requiring periodic review of new authorizations of budget authority and tax expenditures, and for other purposes; to the Committee on the Budget and the Committee on Governmental Affairs, jointly, pursuant to the order of August 4, 1977.

LEGISLATIVE OVERSIGHT ACT OF 1981

● Mr. BAUCUS. Mr. President, it is clear that this Congress will be judged by its ability to reform the complicated and, in many cases, unresponsive Federal bureaucracy. Citizens in my State of Montana and across the country are bewildered, frustrated, and just plain angry with the Federal Government. They have found it to be cumbersome, insensitive to their needs, and unable to respond to problems that often demand immediate attention.

I ran for the Senate in part because I believe the Federal Government can be reformed—that it can perform its essential functions without intruding upon the lives of citizens and the prerogatives of States. We must—and we can—abolish outdated agencies, eliminate excessive and anticompetitive regulations, reduce bureaucratic redtape, and design responsive programs.

To accomplish this critical task, Congress must focus more attention on its oversight responsibilities. In the past couple of years, there has been a flurry of congressional oversight activity. The last Congress saw several dozen oversight bills and hundreds of investigations. On the surface, it appears that the 96th Congress lived up to its billing as "the oversight Congress."

However, we must look beyond the impressive numbers, the raw statistics of oversight. We need to examine the quality of oversight, not merely its quantity. We must decide what we expect to accomplish in the conduct of oversight and how we are to judge our successes and failures.

In the 97th Congress, we will consider a variety of proposals to harness the Federal bureaucracy. Indeed, we could become the "regulatory reform Congress" if we seize this important opportunity.

We will consider some version of sunset—the notion that agencies and their programs will automatically cease to exist unless renewed by Congress.

We will examine the legislative veto—which would permit Congress to overturn specific agency regulations.

We will evaluate the requirement for regulatory analysis—a procedure which would force agencies to justify their regulations in public.

Properly drafted, all these regulatory reform proposals have merit. But, I fear they will not accomplish their ambitious goals. They share a common weakness in that they do not establish specific performance standards for the agencies. This is the problem I seek to correct with sunrise legislation.

Sunrise is relatively simple to implement and monitor. Under my legislation, cosponsored by Senator TSONGAS, proposals for new budget authority and new or increased tax expenditures would have to be accompanied by a statement of the planned objectives and annual accomplishments of the proposal. In addition, each agency administering such a program would have to supply an annual report indicating whether the agency is meeting its objectives.

In preparing the annual report, each agency would be required to emphasize the costs and accomplishments of its program, comparing its achievements with those of similar programs in and out of the Federal Government.

To assist agencies in preparing reports required by the act, the Comptroller General would compile a catalog of interrelated Federal programs—comparing costs, examining duplication, and identifying obsolescence.

Finally, the bill specifies that no agency authorization—for new budget or spending authority or new tax expenditures—may be for a period exceeding 5 years.

I urge my colleagues to join with me in support of this needed aspect of regulatory reform.●

By Mr. MOYNIHAN:

S. 867. A bill to amend the Internal Revenue Code with respect to the tax treatment of Americans abroad; to the Committee on Finance.

EXPATRIATES' TAX ACT OF 1981

● Mr. MOYNIHAN. Mr. President, the bill I am introducing today is the "Expatriates' Tax Act of 1981." It would cut taxes for Americans working abroad.

Today, an American citizen living in another country must pay taxes both to his country of residence and to the United States. We give him credit, to be sure, for most—but not all—of the taxes he pays to other countries. But we are the only OECD nation that insists that all of its citizens pay tax, wherever they reside. We are the only OECD nation whose citizens are subject to some double taxation. British, West German, French, and Japanese citizens are not.

Studies suggest that this practice depresses U.S. exports. Chase econometrics estimated last year that potential exports from the United States have been reduced by 5 percent, a figure that is disputed by economists at the Treasury Department.

But the debate about exports misses the essential point. The point is our tax laws are unfair. An American who lives abroad derives some benefit from his citizenship. But he does not make the same use of the Federal Government and of its services as a citizen who lives in this country; therefore, he should not have to pay as much in tax.

My bill provides an "80-percent exclusion;" 80 percent of an expatriate's income would be free from U.S. tax. The other 20 percent that is taxed would be taxed at low rates, as if that were the individual's entire income.

The bill applies only to income from foreign sources. But all income—including pensions—is covered, not just "earned income" as in other proposals.

To qualify for the exclusion, an American must be a "bona fide resident" of a foreign country, or he must have spent at least 330 full days abroad during a 12-month period.

Those are the essential provisions. There are details that I should mention. First, a taxpayer would be denied tax credits and ordinary deductions that should be charged against the income that is excluded. That means, for example, that a taxpayer could not claim all of his foreign tax credits; 80 percent of them are due to income that the United States does not tax.

But the exclusion would be optional. An American living in Sweden who decides he would be better off with a full foreign tax credit and no exclusion would be free to ignore the exclusion. He may save taxes by doing so.

Second, the bill does not apply to military men, foreign service officers, Peace Corps volunteers and other Federal workers. I gave this considerable thought, but decided that one cannot say about a soldier in Greece, for example, that he is not using the Federal Government to the extent that he would here. The Army base in Greece is indistinguishable from Army bases in North Carolina and Texas.

In addition, Government workers are not "expatriates." And there is a long history of treating them differently. Their overseas allowances are exempted from tax under section 912 of the Code. My bill would retain that section.

Third, the bill would take effect in 1981.

Mine is not the only bill on this subject. The Finance Committee voted last August to let any expatriate exclude his first $50,000 each year from tax. The $50,000 must be "earned income" and it must be from "export-related services," or the individual must live in a developing country.

But my bill has two virtues that the others do not. It is simple. There is no distinction between "earned" and "unearned" income. There is no need to figure out what the taxpayer does for a living or where he lives.

Also, some bills would let taxpayers choose either a flat dollar exclusion or a series of hardship allowances found in the tax laws under section 913. I would offer everyone an 80-percent exclusion and repeal section 913.

Another virtue: with my bill, Congress need not come back periodically and make adjustments for inflation. An 80-percent exclusion adjusts itself. Not so with a flat dollar exclusion: if inflation

is just 8 percent a year, $50,000 3 years from now will be worth only $39,691.

Obviously, this is important to the expatriate. It is also important to Congress, because it takes time to reopen each Code provision and debate about whether to amend it.

That is my bill.

Mr. President, I ask unanimous consent that the text of it be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 867

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Expatriates' Tax Act of 1981".

SEC. 2. PARTIAL EXCLUSION FOR INCOME FROM SOURCES OUTSIDE THE UNITED STATES.

(a) IN GENERAL. Section 911 of the Internal Revenue Code of 1954 (relating to income earned by individuals in certain camps) is amended to read as follows—

"SEC. 911. INCOME FROM SOURCES OUTSIDE THE UNITED STATES.

"(a) GENERAL RULE.—There shall be excluded from taxation under this subtitle 80 percent of the income that a U.S. citizen

"(1) receives from sources within a foreign country or countries

"(2) during the portion of the taxable year that he meets the eligibility requirements of subsection (b).

"(b) ELIGIBILITY.—A U.S. citizen is eligible for the exclusion if

"(1) he establishes to the satisfaction of the Secretary that he is a bona fide resident of a foreign country, or

"(2) during any period of 12 consecutive months, he is outside the United States, its possessions and territories for at least 330 full days.

"(3) LIMITED WAIVER.—If, in the opinion of the Secretary,

"(i) a U.S. citizen is forced by war, civil unrest or similar conditions to return to the United States before he has met the requirements of this subsection, and

"(ii) the citizen could reasonably have been expected to have met those requirements,

then he shall be eligible for the exclusion for the period during which he was abroad.

"(c) EXCLUSION DOES NOT APPLY TO U.S. GOVERNMENT EMPLOYEES.—This section does not apply to income that is paid by the United States or any agency thereof to military or civilian officers or employees of the United States, or for service as a Peace Corps volunteer or volunteer leader.

"(d) DEDUCTIONS AND CREDITS DISALLOWED.—No deduction or credit against tax shall be allowed to the extent that it is properly allocable to income that has been excluded from tax under this section.

"(e) EXCLUSION OPTIONAL.—A U.S. citizen may elect to ignore the exclusion and to pay tax in any year as if there were no exclusion. The election shall be made in such manner as the Secretary may prescribe by regulation."

(b) CONFORMING AMENDMENTS.

(1) Section 7701(a) of the Internal Revenue Code (relating to definitions) as amended by adding a new paragraph at the end—

"(38) EARNED INCOME.—The term 'earned income' means wages, salaries or professional fees, and other amounts received as compensation for personal services actually rendered, but does not include that part of the compensation which represents a distribution of earnings or profits rather than a reasonable allowance as compensation for the personal services actually rendered. In the case of a taxpayer engaged in a trade or business in which both personal services and capital are material income-producing factors, under regulations prescribed by the Secretary, a reasonable allowance as compensation for the personal services rendered by the taxpayer, not in excess of 30 percent of his share of the net profits of such trade or business, shall be considered as earned income."

(2) Sections 37(e)(9)(B), 63(e)(2), 105(h)(3)(B)(v), 879(a)(1), 1303(c)(2), 1304(c)(3), and 1348(b)(1)(A) are amended by striking out "section 911(b)" and inserting in lieu thereof "section 7701(a)(38)".

(c) CLERICAL AMENDMENTS.

(1) The table of sections for subpart B of part III of subchapter N of chapter I of such Code is amended by striking out the item relating to section 911 and inserting in lieu thereof the following:

"Sec. 911. Income from sources outside the United States."

(2) Section 43(c)(1)(C)(i) is amended by striking out "relating to income earned by individuals in certain camps outside the United States" and inserting in lieu thereof "relating to income from sources outside the United States".

(3) Sections 1302(b)(2)(A)(i), 1304(b)(1), 1402(a)(8), 6012(c), and 6091(b)(1)(B)(iii) are each amended by striking out "relating to income earned by employees in certain camps" and inserting in lieu thereof "relating to income from outside the United States".

SEC. 3. REPEAL OF DEDUCTION FOR CERTAIN EXPENSES OF LIVING ABROAD.

(a) IN GENERAL. Section 913 of such Code (relating to deduction for certain expenses of living abroad) is hereby repealed.

(b) CLERICAL AMENDMENTS.

(1) The table of sections for subpart B of part III of subchapter N of chapter 1 is amended by striking out the item relating to section 913.

(2) Section 43(c)(1) is amended, by striking out ", 913," as it appears in the title, by inserting "or" after the comma at the end of subparagraph (i), and by striking out subparagraph (ii).

(3) Section 6091(b)(1)(B)(iii) is amended by striking out "section 913 (relating to deduction for certain expenses of living abroad),".

SEC. 4. EFFECTIVE DATE.

The amendments made by this Act shall apply with respect to taxable years beginning after December 31, 1980.●

By Mr. HEINZ (for himself, Mr. GARN, Mr. INOUYE, Mr. WILLIAMS, Mr. CRANSTON, and Mr. TSONGAS):

S. 868. A bill to amend the Export-Import Bank Act of 1945 to authorize the Bank to engage in the use of extraordinary measures of export finance to counter and ultimately discourage the use of such measures by other major trading countries; to the Committee on Banking, Housing, and Urban Affairs.

COMPETITIVE EXPORT FINANCING ACT OF 1981

● Mr. HEINZ. Mr. President, financing is a vital part of any national export strategy. Particularly in the developing world, which receives 40 percent of our exports, financing has become a more critical factor in securing a sale than price, quality, and reliability of delivery.

The multilateral trade negotiations, concluded in 1979, have increased opportunities for U.S. exporters by clarifying the rules of the game which define and limit unfair trade competition. One major area of competition, however, remained outside the coverage of the Tokyo round of trade agreements. The United States did not attempt to have officially subsidized export credits included under the subsidies code, because it was claimed that such a subsidy was being handled within the OECD (organization for economic cooperation and development) export credit arrangement.

The arrangement, however, is little more than a gentlemen's agreement which has done little to restrain subsidies and predatory practices in export financing by our trade competitors. The current minimum rate of 7.75 percent is absurdly low in a period which the prime rate has been averaging 10 points higher. Still worse, the arrangement does not effectively cover the most predatory of all export credit practices, "mixed credits," which are a device through which foreign aid and export credits are combined to offer rates even lower than the minimum set in the arrangement. Countries such as Mexico and Argentina recently have been offered "mixed credits," so it would be difficult to argue that such credits serve a legitimate foreign aid function. Indeed, U.S. law expressly forbids this practice. Yet, it is an increasingly popular credit package among OECD exporters—particularly the French.

For 3 years the U.S. Government has been trying to negotiate a new, more sensible and workable international arrangement on officially supported export credits. And for 3 years our good faith efforts have been rebuffed.

In 1980 the issue of subsidized export credits was raised repeatedly in international forums by the Secretary of State and the Treasury Secretary. Finally, at the July economic summit conference in Venice, President Carter was able to obtain a commitment from his counterparts to satisfactorily resolve the question by the end of the year. Regrettably, that promise proved empty, as the December OECD conference on official export credits broke up with no progress whatsoever having been made.

The European Community under the Treaty of Rome is bound to speak with one voice on all trade issues when negotiating with nonmembers of the EC. But since all decisions within the EC must be reached by consensus, any obstinate member can exercise a veto over EC negotiating positions. Historically, on the issue of export credits, the French have exercised the veto. That was the case in December, as a French hard line against any sort of a comprehensive new arrangement prevailed.

Particularly when viewed from the perspective of the Venice summit commitment to resolve the issue, the OECD talks were a tremendous disappointment. The interest rate floor remains at 7.75 percent, without even the modest increase to 8.55 percent, which was at one time a part of the EC proposal. There was no progress on the U.S. proposal to revise the guidelines on "mixed credits." There was not even a commitment to try

to resolve these issues at the next meeting in May.

I believe that our trade competitors—and the French Government in particular—have refused to reach an agreement to end the cutrate and cutthroat competition in the subsidized export credits because they have concluded that the United States is not serious about defending its legitimate interests in the international trade arena.

Mr. President, the bill I introduce today, together with Senators GARN INOUYE, WILLIAMS, and CRANSTON, will provide Eximbank with resources to meet the predatory export credit subsidies of our foreign competitors. The $1 billion authorized for the purpose of meeting such competition should serve to disabuse our trade competitors of any illusions they hold about our seriousness.

I am sure that I speak for my colleagues when I say we would prefer to see a firm, workable international agreement to end unfair official export credit subsidies. And that is our purpose.

Mr. President, this bill is designed to foster negotiations. It would not take effect for 1 year after adoption, and the effective date could be postponed another 6 months if the President determines that an effective international agreement is near conclusion.

As I said in a recent letter to the President:

> The $1 billion authorized by this bill would be a dramatic signal to our export competitors that we are dead serious when we say that we want to end predatory financing once and for all. I would hope . . . that our allies—particularly the French—would see the logic and advantage of reaching a firm, workable agreement to end wasteful export credit subsidies. But I firmly believe that the best way to convince them of our seriousness is not with more rhetoric but with action—by putting subsidy money into our own export credit program if no agreement is reached. In other words, the best way to bring peace to the export credit arena is by making clear our willingness to wage an export credit war as the alternative to an agreement.

Mr. President, I sincerely hope this bill achieves its objective. There is really no justification for the current cutthroat and cut-rate competition in export credit subsidies. It is foolish. It is destructive of trust and amity among trading partners. Yet it persists. Hopefully, the message of this legislation will be heard abroad: That Congress is unwilling to accept continued foot-dragging and obstructionism on the part of our trade competitors, that now is the time for serious negotiations.

Mr. President, I ask unanimous consent that my letter to the President, the bill, and the section-by-section analysis be printed in the RECORD.

There being no objection, the bill, the section-by-section analysis, and the letter were ordered to be printed in the RECORD, as follows:

S. 868

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Competitive Export Financing Act of 1981".

SEC. 2. (a) The Congress hereby finds that—

(1) there is a growing tendency by the major trading partners of the United States to resort to the use of predatory financing arrangements to gain competitive advantage for their exporters;

(2) other major trading countries have been unwilling to negotiate an end to such practices and have rejected a series of United States proposals to strengthen provisions of the International Arrangements on Export Credits; and

(3) as a consequence of the unsuccessful conclusion of the export credit negotiations within the Organization for Economic Cooperation and Development in December 1980, measures to strengthen programs of the Export-Import Bank of the United States are required to insure continued United States export competitiveness and to bring other major trading countries back to the bargaining table for serious negotiations.

(b) It is the purpose of this Act to provide the authority for the Export-Import Bank of the United States to engage in the use of extraordinary measures of export finance to counter and ultimately discourage the use of such measures by other major trading countries.

SEC. 3. Section 2(b)(1)(A) of the Export-Import Bank Act of 1945 is amended by inserting after the third sentence thereof the following: "The Bank shall provide programs of export finance which are comparable in structure to those extraordinary official export credit measures offered by the principal countries whose exporters compete with United States exporters. Pursuant to such programs, the Bank shall offer export credit on rates, terms, and conditions competitive with those offered by other major trading countries. The Bank, at its discretion, shall use such programs to meet foreign official export credit competition until such time as the use of extraordinary measures of official export credit financing is proscribed in international agreements to which the United States is a party. For the purpose of this subsection, the term 'extraordinary measures of official export credit financing' shall include, but not necessarily be limited to, programs of highly concessional mixed credits, local cost financing, foreign currency financing, and lines of credit arrangements.".

SEC. 4. (a) There are authorized to be appropriated without fiscal year limitation, not to exceed $1,000,000,000 to achieve the purposes of the amendment made by section 3 of this Act.

(b) Within sixty days after section 3 of this Act becomes effective, and annually thereafter, the Export-Import Bank of the United States shall report to the Congress as to whether any additional appropriations or increases in overall commitment authority or annual ceiling levels are necessary to achieve the purposes of the Act.

SEC. 5. Section 3 shall take effect twelve months after the date of enactment of the Act. The President may defer the effective date of section 3 for an additional period of not to exceed six months if (1) he determines that international agreements have or will be concluded which put United States and foreign exporters in a substantially equal competitive position with respect to official export finance, and (2) he reports to Congress prior to and following such deferral period as to progress achieved in negotiating an end to predatory export financing.

SECTION-BY-SECTION ANALYSIS

Section 1 provides that the legislation may be cited as the Competitive Export Financing Act of 1981.

Section 2 contains Congressional findings concerning the use by foreign governments of predatory financing practices, the failure of negotiations to limit such practices, and the need to strengthen the programs of the Export-Import Bank to insure continued U.S. export competitiveness. Section 2 further states the purposes of the Act to be to authorize the Bank to use extraordinary export finance measure to counter and ultimately to discourage the use of such measures by other countries.

Section 3 would amend the Export-Import Bank Act to require the Bank to provide export finance programs comparable in structure and competitive in other respects to the extraordinary official export credit measures offered by foreign competitor countries. The Bank would be authorized, at its discretion, to use such programs to meet extraordinary measures of official export credit financing, including, but not limited to, programs of highly concessional mixed credits, local costs financing, foreign currency financing and lines of credit, until the use of such financing is proscribed in international agreements to which the United States is a party.

Section 4 would authorize an appropriation of $1 billion to the Bank to achieve the purposes of section 3, and would require the Bank to report annually to Congress on the need for appropriations or increases in authority in order to achieve the purposes of the Act.

Section 5 provides that section 3 would take effect 12 months after enactment of this Act unless the President deferred the effective date an additional 6 months by determining that international agreements have or will be concluded which put U.S. and foreign exporters in a substantially equal competitive position with respect to official export finance, and reporting to Congress prior to and following such deferral period as to progress achieving in negotiating an end to predatory export financing.

U.S. SENATE,
Washington, D.C., March 19, 1981.

The PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: While I support the economic program you submitted to Congress, I believe it is important that the full consequences of the proposed budget cuts be clearly understood so that other appropriate actions can be taken. One cut which particularly concerns me is the proposed reduction in the direct credit authority of the Export-Import Bank, although I believe there are a number of ways in which we can ameliorate the consequences of that proposal.

The importance of exports in improving our national economic picture is often ignored in policy discussions, and therefore it would be useful to review a few key facts.

We can point with pride to the fact that U.S. merchandise exports have grown twice as fast as the gross national product since 1972. As a result, the ratio of exports to GNP rose from 4.2 percent in 1972 to 7.5 percent in 1979. U.S. imports grew equally as fast, however, increasing in importance relative to GNP from 5.1 percent to 8.7 percent in the same years. Because imports have expanded since 1972 from a higher base than exports, the trade deficit has expanded sharply, with an aggregate deficit over the past five years exceeding $110 billion.

Our nation can ill-afford to relent in the fierce competition for international market share. During the decade of the 1970's, our share of world industrial exports (outside the U.S.) declined from over 21 percent to 17.5 percent. This was the most serious loss for any major industrial exporter, including the United Kingdom.

While Export-Import Bank financing is used in only 7 percent of our exports (compared to 35 percent for the Japanese and 29 percent for the French official export credit facilities), it can be critical in protecting our basic comparative advantage and market position in key high technology industries. Currently, the United States is losing significant numbers of exports to foreign subsidized industries, including aerospace, nu-

clear and conventional power generators, and machine tools. Particularly in the developing world, which received 40 percent of our exports, financing has become a more critical factor in securing a sale than price, quality, and reliability of delivery.

I am concerned, therefore, that inadequate credit limits for the Export-Import Bank over the next few years will do irreparable harm to the competitiveness of key U.S. industries. Since the Eximbank's credit restraint is not likely to be shared by our trade competitors, a number of consequences can be expected.

In order to take advantage of foreign export credit support, U.S. companies are likely to adopt one or more of the following strategies: (1) a shift to foreign procurement for major components of large capital goods; (2) long-term, off-shore subcontractor relationships, particularly in the case of airframe and aircraft engine manufacturers, and, (3) a shift to off-shore facilities for entire projects, which many multinational manufacturing and construction companies already have and more are likely to acquire.

What these likely corporate strategies add up to is a significant loss of U.S. jobs and tax revenue. Ironically, although large corporations are recipients of the majority of Eximbank support, it is the smaller U.S. subcontractors who are likely to be hurt the most. Boeing, for example, placed nearly $6 billion in subcontracts for parts and equipment to 3500 subcontractors and suppliers in 44 states during 1979. Approximately $3 billion of those purchases were for foreign aircraft sales.

The Congressional Budget Office has estimated that every $1 billion in export sales generates 40,000 to 50,000 jobs. The complement to that calculation is that every 50,000 unemployed Americans costs the Treasury $1 billion in lost revenue and transfer payments.

The French Government understands those calculations only too well. The OECD has estimated that France committed $2.34 billion to export credit subsidies in 1980.

Since 1978 the United States Government has been negotiating within the OECD to reach a multilateral agreement to end the cut-rate and cutthroat competition in officially-subsidized export credits. The aim has been to set new market-related minimum interest rates for government-supported export credits and to limit predatory export financing practices.

In 1980, that effort nearly bore fruit: every OECD country except France was ready to agree to a major strengthening of the International Arrangement on Export Credits in a way which would sharply reduce export subsidies. Unfortunately, the structure of the European Community enabled France alone to block such a step.

Mr. President, export credit subsidies are a wasteful burden on taxpayers in all major nations. We should be continuing our efforts to reach an international agreement to that end. But we need leverage to achieve that objective. To reduce Eximbank credits at this time, without some other compensatory action on our part, would be a signal to our foreign competitors that the United States is no longer serious about obtaining an international agreement and is not willing to press other countries, particularly France, on the point by matching their credit offers.

I would no more counsel unilateral disarmament as an approach to negotiating trade issues with our allies than I would recommend it for dealing with the Russians on global security; yet that is precisely what we are doing.

The OECD negotiations on export credit resume in May, and it is essential that we have the resources to maintain a strong position.

Bearing all these considerations in mind, including your credit limits for the Export-Import Bank, I would suggest the following strategy to strengthen the hand of our negotiating team:

(1) The United States Eximbank ought to pursue a strategy of derogating on term from the export credit Arrangement, with particular targeting on French export sales. The original Arrangement was basically a trade-off for the United States in which it gave up the advantage of its ability to finance long-term obligations in the U.S. bond market in return for a European and Japanese agreement to set minimum interest rates at a reasonable level; that is, not to subsidize. Obviously, the non-subsidy floor of 7.75 percent in 1976 is no longer a non-subsidy in 1981. In the meantime, the U.S. has maintained its export credit maturities at 10 years. One vehicle to get leverage, therefore would be to derogate and extend maturity on a selected basis on export cases where we are in competition with the French.

We also ought to try, to the degree possible, to concentrate available Exim credit to cases where we are in direct competition with the French. Both of these measures are designed to put significant pressure on the French, with the view of getting them to agree to reducing export credit subsidies.

(2) During the recently concluded Tokyo Round of Multilateral Trade Negotiations, the United States did not attempt to have officially-subsidized export credits included under the Subsidies Code, because it was claimed that such a subsidy was being handled within the OECD export credit Arrangement. However, with the failure of the European Community—particularly the French—to bargain in good faith on this issue, I believe a strong case should be made that subsidized official exports credits are an unfair trade practice that adversely affects us in third markets and that our government should seriously consider bringing a case against the offending parties, particularly the French, pursuant to Articles XXII and XXIII of the GATT and Section 301 of the Trade Act of 1974 as amended by the Trade Agreement Act of 1979.

(3) On March 26 I intend to introduce the Competitive Export Financing Act of 1981 which would authorize the appropriation of a special billion dollar contingency fund to be available for the Export-Import Bank's use in matching predatory export credit offers by U.S. trade competitors if no international agreement barring subsidy financing is reached within one year. The effective date could be further postponed another six months if the President determines that an effective international agreement is near conclusion.

The $1 billion authorized by this bill would be a dramatic signal to our export competitors that we are dead serious when we say that we want to end predatory financing once and for all. I would hope that this money will never have to be appropriated, that our allies—particularly the French—would see the logic and advantage of reaching a firm, workable agreement to end wasteful export credit subsidies. But I firmly believe that the best way to convince them of our seriousness is not with more rhetoric but with action—by putting subsidy money into our own export credit progam if no agreement is reached. In other words, the best way to bring peace to the export credit arena is by making clear our willingness to wage an export credit war as the alternative to an agreement.

Mr. President, I sympathize with your desire to cut the budget and to reduce the level of federal borrowing. But, I also believe that exports are simply too important to the U.S. economy to be left exposed to predatory financing ploys by our trade competitors. To reduce Eximbank's credit limit without also taking steps to induce our trade competitors to do likewise would be counterproductive to the long-range goals of employment and balanced growth for our economy which we both share.

I urge you to endorse the strategy I have suggested. I stand ready to assist you in every possible way to insure that your trade policy, as well as your economic policy, is a success.

Sincerely,

JOHN HEINZ.●

By Mr. DODD:

S. 869. A bill to place restrictions on military assistance and sales to El Salvador; to the Committee on Foreign Relations.

EL SALVADOR ASSISTANCE ACT OF 1981

● Mr. DODD. Mr. President, I introduce today a bill to place restrictions on military assistance and sales to El Salvador. I am concerned that our policy toward this nation has been cast heavily in terms of Soviet-American relations rather than in terms of the future course of El Salvador itself.

Under this legislation, U.S. military assistance and military advisers would be continued only if the President were to certify that five conditions are met. The bill requires the President to certify that the Salvadoran Government:

First, is not engaged in a consistent pattern of gross violations of internationally recognized human rights;

Second, has achieved substantial control over its own security forces, so as to bring to an end the indiscriminate torture and murder of Salvadoran citizens by these forces;

Third, is making continued progress in implementing essential economic and political reforms, including the land reform program;

Fourth, is committed to the holding of free elections at an early date; and

Fifth, has demonstrated its willingness to negotiate an equitable political resolution of the conflict with opposition groups.

I believe that much of the concern voiced by the American people about our involvement in El Salvador stems from its elevation to extraordinary prominence as a crisis before we have either a Latin America policy or a full team of sub-Cabinet leadership at the State Department.

I support the effort to restrict and eventually halt the flow of arms from the Soviet Union and Cuba to El Salvador. But external intervention is only part of the problem. The other part is the future of El Salvador, both as a nation and as a Central American neighbor of the United States.

The bill I introduce today addresses the latter question. I believe that Americans are concerned about human rights and the behavior of security forces in El Salvador. They care about social and economic reform and about sincere pursuit of political negotiations. They want to know that our involvement is as much directed toward the internal improvement of life in El Salvador as it is toward keeping out Soviet and Cuban influence.

Mr. President, I believe that the certifications required by this bill are consistent with policy statements offered by the Reagan administration. The mail I receive and the people I speak with con-

vince me that these points must be explicitly stated. As we work with the Duarte government, both the American people and the people of El Salvador will be the better for the understanding made clear in this resolution. These five points are a fair contract setting forth our terms of involvement.

With certification on these five points, we can pursue our assistance to El Salvador with the confidence that our intents are explicit. Without certification the legitimacy of U.S. assistance is in question, and deserves review by the Congress. If El Salvador is to be a symbol preceeding the fleshing-out of the Reagan foreign policy, it should be a clear and well-perceived symbol, worthy of our support.●

By Mr. STEVENS (for himself and Mr. MURKOWSKI):

S. 870. A bill to amend the Alaska Railroad Act to direct the Secretary of Transportation to sell the Yukon River barge service to the city of Nenana, Alaska; to the Committee on Commerce, Science, and Transportation.

ALASKA RAILROAD ACT AMENDMENT

Mr. STEVENS. Mr. President, I send to the desk a bill amending the Alaska Railroad Act to facilitate sale of the Alaska Railroad's barge service to the City of Nenana, Alaska.

This bill is necessary to implement a July 1980 decision of the Federal Railroad Administration (FRA) which directed the Alaska Railroad (ARR) to dispose of its barge fleet on the Yukon and Tanana Rivers. The Federal Railroad Administration, the Alaska Railroad, and the State of Alaska all support this legislation. The barge line supplies critical transportation service to this remote region of Alaska, and prompt consideration is necessary so that there is no interruption of service this spring. This legislation will also help to insure the city's ability to receive the necessary "Certificate of Convenience and Necessity" from the ICC.

Mr. President, this bill impacts an isolated part of the country, but in a big way. This measure is of primary importance to the people of the Tanana and Yukon River basins because there are no other freight services available to them.

I urge the prompt consideration of this legislation.

By Mr. COCHRAN:

S. 871. A bill to simplify trade procedures regarding sales of U.S. products abroad, and for other purposes; to the Committee on the Judiciary.

TRADE PROCEDURES SIMPLIFICATION ACT OF 1981

o Mr. COCHRAN. Mr. President, with our Nation's trade deficit hovering in recent years near the $30 billion mark, it is imperative that we seize upon every opportunity to encourage more American businesses to export. Exports are a vital part of our American economy, but we are falling further and further behind in our efforts to compete for profits in foreign markets.

Even though the United States remains the world's largest trading nation, with combined imports and exports of almost $394 billion in 1979, our share of the growing world trade market is declining annually. Only 10 percent of 250,000 American manufacturers currently export. Less than 1 percent of these firms control 80 percent of the export market. This leaves a tremendous untapped export potential made up of medium- and small-sized companies, many of which are deterred by Government obstacles to foreign trade. The Federal Government ought to be trying to help those who want to sell goods overseas rather than frustrating their efforts through confusing Government regulations. Especially during this time of high unemployment, we need to explore every alternative to increase job opportunities. Additional exports offer us such an opportunity; for each $1 billion in new exports, about 40,000 jobs are created.

Without question, the United States can increase its share of the export market through increased participation by small- and medium-sized businesses. To encourage them to venture into the export sector, the Federal Government must provide firm and precise guidelines as to what is and is not permitted in terms of economic activity overseas.

In past years, the application of antitrust laws to exporters has in many instances acted as an export barrier. One of the most consistent criticisms has been that no real guidelines exist to inform businesses of what is and is not permitted in the export sector.

To this end, I am introducing today the Trade Procedures Simplification Act of 1981. This bill is designed to help remove the uncertainty and confusion generated by extraterritorial application of our antitrust laws.

The lack of information about permissible export activity has discouraged many small businesses from getting into the export business. The basic aim of the Trade Procedures Simplification Act of 1981 is to encourage the issuance of comprehensive directions by the Department of Justice indicating its enforcement intentions concerning broad areas of export activity, keyed to specific product sectors and country markets. These disclosures would be available upon petition, and prosecution of those exporters who are conducting business in reliance on such directions would be prohibited. In addition, the Department of Commerce would provide legal assistance, for a reasonable fee, to smaller companies wishing to petition the Justice Department for such directions.

To insure business compliance with the directions, the Attorney General may seek an injunction when he determines that the exporter is acting outside the scope of the directions, when circumstances under which the directions were issued have substantially changed, or when he determines that the directions were issued upon inaccurate or fraudulent information. Congressional oversight is insured by requiring the Justice and Commerce Departments to report annually to Congress on all actions taken pursuant to this act as well as problems and suggested improvements in its operation.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 871

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Trade Procedures Simplification Act of 1981."

FINDING AND CONCLUSIONS

SEC. 2. (a) The Congress finds that—

(1) the unpredictable and conflicting nature of antitrust enforcement and interpretation by United States agencies has caused unnecessary confusion among exporters as to the scope of legitimate overseas activities;

(2) the antitrust laws relating to export sales are extremely complex; yet most small- and medium-sized companies likely to export do not as a practical matter have access to specialized legal advice in this area;

(3) the application of antitrust laws to exporting activities does not reflect critical differences in competitive conditions among various country markets for different products;

(4) the extension of court-made rules developed in the context of domestic commerce to overseas activities does not always reflect the intent of antitrust legislation, and needlessly inhibits legitimate needed export sales; and

(5) United States agencies applying antitrust laws to export sales do not sufficiently coordinate interpretation and enforcement practices among themselves, or with other agencies responsible for foreign policy, international trade policy, export promotion, and international monetary policy.

(b) The Congress concludes that—

(1) exporters should not be subject to conflicting demands by diverse United States agencies applying antitrust laws extraterritorially;

(2) United States agencies enforcing antitrust laws should help reduce uncertainty by informing small- and medium-sized companies in a clear, direct, and inexpensive manner, of conduct and structural arrangements which will not be subject to antitrust prosecutions if associated with the export of particular products or services to specific country markets during specified time periods;

(3) legal interpretations and enforcement practices associated with the application of antitrust laws to export activities, as well as the economic consequences of such interpretations and practices, should be communicated to Congress and the public in a timely and effective manner;

(4) conduct and structural arrangements of United States exporters which materially expand overseas sales should be permitted: *Provided,* That they do not have a substantial negative impact on our commerce with foreign nations or otherwise conflict with basic substantive principles and objectives of existing antitrust laws; and

(5) legal interpretations and enforcement practices associated with the application of antitrust laws to export activities should be developed in concordance with considerations underlying foreign relations, international trade and monetary policy, national security, and export promotion.

DEFINITIONS

SEC. 3. For purposes of this Act—

(1) The term "structural arrangement" means a situation or course of action that affects the pattern of ownership or control in industry.

(2) The term "conduct" means a practice that may affect domestic competition but does not directly affect the structure of ownership or control in industry.

(3) The term "disclosure" means a statement published by the Attorney General or the Assistant Attorney General for the antitrust division under section 5(a) describing conduct and structural arrangements relating to export sales that will not be subject to criminal or civil prosecution under the antitrust laws.

(4) The term "antitrust laws" means the Sherman Act, the Federal Trade Commission Act, the Clayton Act, and any other Acts in pari materia.

STUDIES BY ATTORNEY GENERAL

SEC. 4. (a) The Attorney General, in consultation with the Secretary of Commerce and the heads of other United States agencies with enforcement responsibility under the antitrust laws, shall conduct studies to determine whether—

(1) the conduct and structural arrangements employed in various countries by various types and sizes of United States businesses to expand exports conflict significantly with basic antitrust principles; and

(2) a more liberal enforcement policy for overseas activities than would be appropriate for domestic transactions would impede thorough implementation of the legislative intent of the antitrust laws.

(b) On the basis of studies carried out under subsection (a), or other information available to the Department of Justice, the Attorney General shall identify conduct and structural arrangements associated with particular types of export sales which the Attorney General determines would not warrant criminal or civil prosecution under the antitrust laws by the Department of Justice.

(c) The initial studies made under subsection (a) shall be completed within one year after the date of enactment of this Act and shall be updated annually.

PROCEDURES

SEC. 5. (a) The Attorney General shall—

(1) publish a description of conduct and structural arrangements identified pursuant to section 4(b) as not meriting criminal or civil prosecution under the antitrust laws and shall make the published description available to all potentially interested exporters; and

(2) establish procedures to assure a prompt response to—

(A) petitions from individual exporters or classes of exporters for the issuance of descriptions under paragraph (1); and

(B) petitions from an individual exporter or group of exporters for the issuance of a statement of civil and criminal enforcement intentions concerning specific conduct in which the petitioner proposes to engage, or structural arrangements the petitioner proposes to establish, in connection with exports.

(b) The Secretary of Commerce may intervene at any time to request that the Attorney General publish a description under subsection (a)(1) with respect to conduct or structural arrangements or to reconsider a description published under such subsection. Within thirty days after receiving such a request from the Secretary, the Attorney General shall take whatever action he determines to be appropriate with respect to the request and inform the Secretary of the determination and action taken. The action of the Attorney General shall be final and shall not be subject to judicial review.

(c) The Attorney General shall establish appropriate forms and procedures for the purpose of—

(1) communicating disclosures issued under subsection (a) to affected parties;

(2) informing exporters of specific actions they must take to obtain disclosures pursuant to subsection (a), or to be deemed covered by disclosures made pursuant to subsection (a)(2);

(3) determining actions exporters have taken in reliance on such descriptions; and

(4) identifying problems associated with discharging the evaluation, disclosure, and monitoring functions authorized under this Act.

(d) Upon request, the Secretary of Commerce may, on a reimbursement basis, provide legal assistance to existing and potential exporters who are unable to obtain specialized antitrust counsel. Such assistance shall be limited to assistance in obtaining enforcement intention disclosures provided for under subsection (a)(2).

(e) Agency proceedings and agency actions (as defined in paragraphs (12) and (13), respectively, of section 551 of title 5, United States Code) under this Act shall not be subject to subchapter II of chapter 5 of title 5, United States Code (other than sections 552, 552a, and 552b).

COMPLIANCE BY EXPORTERS

SEC. 6. (a) Notwithstanding any other provision of law, an exporter shall not be subject to civil or criminal prosecution under the antitrust laws by any Federal agency if—

(1) the exporter, or group of exporters, notifies the Attorney General, pursuant to procedures established under section 5(c)(2), that the exporter or group intends to engage in conduct or to establish structural arrangements which have been designated by the Attorney General as conduct or structural arrangements not subject to civil or criminal prosecution under the antitrust laws, and the Attorney General does not object to the proposed conduct or arrangement within thirty days and inform such exporter, or group of exporters, of the specific reasons why the proposed conduct and structural arrangements are not covered by disclosures made pursuant to section 5(a); or

(2) the exporter requests a statement of civil and criminal enforcement intentions concerning a particular transaction pursuant to section 5(a)(2)(B), and within sixty days after the date of the request—

(A) receives an approval from the Attorney General, or

(B) does not receive an objection in writing from the Attorney General to the transaction setting forth the specific reasons why the transaction is in conflict with specific provisions of the antitrust laws.

(b) Whenever the Attorney General objects to proposed conduct or structural arrangements under paragraph (1) or (2) of subsection (a)—

(1) the Attorney General shall notify the exporter or group of exporters of such objections within thirty days (sixty days in the case of a request described in paragraph (2) of such subsection) of receiving notification regarding the proposed conduct or structural arrangements and shall notify the exporter or group of exporters involved that they may request that a hearing be held on the objections to the proposed conduct or structural arrangement;

(2) the exporter or exporters involved shall notify the Attorney General within fifteen days after receiving the objections if they wish to have a hearing;

(3) the Attorney General shall conduct any such hearing within thirty days after the date on which the request for a hearing under paragraph (2) is received by the Department of Justice;

(4) such hearing shall continue for no more than thirty days; and

(5) the Attorney General shall make the disclosure determination within fifteen days after the completion of such hearing, notify the exporter or group of exporters of the determination, and publish the determination.

(c) A determination by the Attorney General under subsection (b) shall be final and shall not be subject to judicial review.

INJUNCTIONS

SEC. 7. The Attorney General may request any United States district court to issue an injunction regarding a disclosure under section 5(a)(2) of this Act, when the Attorney General determines that—

(1) the activity of the exporter or group of exporters is acting outside of the scope of the disclosure;

(2) the circumstances under which the disclosure was issued have substantially changed; or

(3) the disclosure was issued upon inaccurate or fraudulent information.

REPORTS AND DISCLOSURES

SEC. 8. On December 31 of each year, the Attorney General, the Secretary of Commerce, and the heads of other United States agencies directly affected by disclosures under this Act shall each file with the Congress, and make public, a detailed report of—

(1) all actions by the appropriate department or agency, or by other interested public and private parties, taken pursuant to this Act;

(2) any problems associated with the implementation of this Act;

(3) the specific plans of the appropriate department or agency to carry out its responsibilities (if any) under the Act in the next fiscal year; and

(4) any recommendations for amendment of this Act.

By Mr. CHAFEE (for himself, Mr. DOLE, Mr. HEINZ, and Mr. DANFORTH):

S. 872. A bill to amend title 38, United States Code, to extend the period of Vietnam-era veterans' eligibility for readjustment counseling and related mental health services; to the Committee on Veterans' Affairs.

VIETNAM VETERANS' READJUSTMENT COUNSELING LEGISLATION

Mr. CHAFEE. Mr. President, today, I am introducing a bill to extend the period of Vietnam veterans' eligibility for readjustment counseling and related mental health services.

The purpose of this legislation is simple. It extends, from September 30, 1981, to September 30, 1984, the eligibility for veterans who served on active duty during the Vietnam era to seek readjustment counseling. Thus, it represents a 3-year extension of this program.

In my judgment, there are a number of compelling reasons why this program should be extended beyond the current expiration date of September 1981:

Although this program was established on a trial basis under Public Law 96-22 in June 1979, many of the so-called storefront rehabilitative facilities have been in operation for less than 18 months, and have not yet been able to provide their unique services to troubled Vietnam-era veterans;

The posttraumatic stress syndrome, which this program is designed to address, can manifest itself as many as 10 years after combat experience, making it reasonable to extend this program approximately 10 years beyond May 1975, when the last combat soldier was withdrawn from Vietnam;

Funded at about $12 million per year, this program is one of the least expensive in the veterans' budget category;

In my State of Rhode Island, and elsewhere in the country, the Vietnam veterans' readjustment counseling program is one of the most popular and deserving programs now offered veterans of the Vietnam conflict; and

At a time when the military is plagued with manpower problems, and the All-Volunteer Force is facing increasing problems in getting the quantity and quality of recruits needed, it is essential that we meet our obligations to the last war's veterans as a symbol of this Nation's commitment to its soldiers, sailors, and airmen.

Mr. President, it is my understanding that the Senate Budget and Veterans' Affairs Committees have restored an estimated $25 million deleted from the administration's budget request specifically to insure that this program is extended 1 additional year beyond the September 1981 delimiting date. This is certainly welcome news. I believe my colleagues have acted with both wisdom and compassion on this matter.

Nonetheless, in my judgment, the Vietnam-era veterans' readjustment counseling program and the Vietnam veterans' centers provide a sufficiently important service to veterans of our longest and most controversial war that the program and the centers deserve additional time to accomplish their worthy purpose. I urge my colleagues to keep the faith with the tens of thousands of Vietnam veterans who suffered deep psychological wounds from their experience in the Vietnam war by extending the readjustment counseling program through September 1984.

BRIEF HISTORY OF PROGRAM

Mr. President, the Vietnam-era veterans' readjustment counseling program, also referred to as Operation Outreach, was brought into being under Public Law 96-22 in June 1979. This comprehensive piece of legislation included authority for the Veterans' Administration (VA) to provide readjustment counseling and related mental health services to any veteran who served on active duty during the Vietnam era—that is, between August 1964 and May 1975.

The purpose of the counseling program is to provide psychosocial readjustment counseling for Vietnam-era veterans. The counseling program, conducted from Vietnam vet centers, is primarily directed at Vietnam combat veterans, and represents an attempt to help the veteran reenter the society from which he or she has withdrawn.

Nationwide, there are 9.8 million Vietnam-era veterans, 2.5 million of whom served in Vietnam. Approximately 700,000 of this number saw intense combat which resulted in over 57,000 being killed and over 400,000 wounded. In the State of Rhode Island, there are 55,000 Vietnam-era veterans, 17,000 of whom served in Vietnam. It has been estimated that 20 percent of the veterans who were in Vietnam are experiencing some sort of readjustment problems today, as a result of their experience in Vietnam.

Readjustment problems for the Vietnam veteran include interpersonal relationship problems, employment problems, family problems and problems in coping with daily life. Research on Vietnam veterans suggests that one in four is clinically depressed, 70 percent continue to have nightmares about Vietnam and 40 percent were divorced within 6 months of their return. The suicide rate for Vietnam veterans is 33-percent higher than their peer group, whereas the homicide rate is the same as the peer group, contrary to the media image of the Vietnam veteran.

Although the Vietnam-era veterans' readjustment counseling program was established almost 2 years ago, many of the 91 storefront counseling centers scattered across the country were not established and functioning until early or mid-1980. For example, in my State of Rhode Island, the vet center in Pawtucket did not commence operation until May 1980. Although the program has experienced extraordinary success in this short period of time—the Rhode Island center run by Wayne Smith and Bill Kelly has dealt with over 600 cases—the numbers of Vietnam-era veterans seeking readjustment counseling is increasing rather than decreasing. In short, the program simply has not had enough time to accomplish its purpose.

POSTTRAUMATIC STRESS SYNDROME

Mr. President, the purpose of the Vietnam-era veterans' readjustment counseling program, and of the vet centers, is to deal with a little understood malady known as posttraumatic stress syndrome. Medical research to date reveals that approximately 500,000 veterans of Vietnam are to this day markedly impaired by the aftereffects of their war experiences.

The core symptoms of this psychological condition are similar to those which were felt by thousands of veterans of World War II and Korea: Nightmares, depression, anxiety and fear, and severe detachment from others. For some individuals, this syndrome also includes alcohol or drug abuse, and physical condi- alcohol and drugs, as well as to arrests.

Just this month, the VA completed an 8-year, $2 million study conducted by a New York-based research team which showed that exposure to combat had a direct relationship to current abuse of alcohol and drugs, as well as to arrests, medical problems and stress-related emotional problems. The study's authors stated that—

> A decade after the peak years of the war, those who actually served in Vietnam are plagued by significantly more problems than their peers.

Among other things, the study discovered that:

While 70 percent of the veterans went back to school after leaving military service, only 20 percent of those who had served in Vietnam completed work for college degrees and only 7 percent of the black veterans completed college;

White-collar jobs were found by only 50 percent of the Vietnam veterans, while 54 percent of the veterans from the same era and 69 percent of the nonveterans had found white-collar jobs;

Unemployment was found to be a phenomenon affecting mainly black veterans. Over their postservice careers, black Vietnam veterans had more than three times as much unemployment as white Vietnam veterans. Moreover, black Vietnam veterans were found to have twice as much unemployment as black veterans who did not serve in Vietnam;

A total of 24 percent of the Vietnam veterans who had been involved in heavy combat were later arrested for criminal offenses, while 10 percent of those with light combat experience in Vietnam were later arrested. A total of 17 percent of other veterans from the Vietnam-era were later arrested and 14 percent of the nonveterans; and

The degree of alcoholism, drug abuse, medical and psychological problems attributable to Vietnam combat was found to be "statistically significant."

It is my understanding that one of the unique features of post traumatic stress syndrome is the fact that it has a long term or "delayed" form. What this means is that a combat veteran may return from overseas and go about his daily business for up to 10 years without showing any manifest symptoms of post traumatic stress. Time does not reduce his or her need for counseling, however, it simply postpones it. This is why it is essential that we give the readjustment counseling program and the vet centers the additional time they need to deal with this disabling syndrome.

Mr. President, the State of Rhode Island sent 17,000 of her sons and daughters to fight in Vietnam. Two hundred of these paid the ultimate price for their service to their country, and died in that far-off land. An additional 153 Rhode Island veterans of the Vietnam war have died since they saw combat in that conflict. Many of these veterans died of causes which can be linked directly to their service in Vietnam, and I believe it is extraordinary that our small State has lost almost as many Vietnam veterans after the war as it did during the war. These startling figures demonstrate the need for the vet centers and for readjustment counseling.

COST OF THE PROGRAM

Mr. President, it is clear that there is a national need for fiscal austerity, and veterans must be willing to share the burden of program budget cuts as much as anyone else. I support most of President Reagan's proposed budget cuts, and I share all of his concerns about cutting Federal expenditures.

However, in proposing that the Vietnam-era veterans' readjustment counseling program not be funded beyond September 1981, I believe that the administration has made a big mistake. It seems evident that there is a genuine need for this program. It also seems apparent that with a price tag of about $12 million per year, this is one of the least expensive programs in the veterans' budget category.

In the State of Rhode Island, this program employs three people, and costs $90,000 per year. With an average of 600 cases to date and 1,000 visits, this program costs $150 per case and $90 per visit. It is my understanding that the national

average cost per case and per visit is $320 and $99 respectively. While these costs are somewhat higher than Rhode Island's costs, they are still modest amounts to pay. Furthermore, with increased efficiencies being introduced into the Vietnam-era veterans' readjustment counseling program, the VA anticipates that costs per visit will probably be reduced to about $70 in the coming year.

We are not funding a vast bureaucracy here, and we are not paying for extensive facilities. What my bill does is to extend the readjustment counseling program and the vet centers for just 3 more years.

POPULAR AND DESERVING

Mr. President, earlier in my remarks, I referred to the Vietnam veterans' readjustment program as popular and deserving. In support of this statement, I shall include in the RECORD at the conclusion of my remarks articles from the New Paper and the Providence Journal, as well as two recent items from the Washington Post which explain better than I can just what this program does for the people it serves.

Having read over these articles, I think it is fair to say that the war in Vietnam was unlike any other war in our history. It was unpopular, controversial, and long.

It was a war that we were expected to win with technology and force, but we did not. It was a guerrilla war which was more intense and vicious than conventional warfare. With firefights and booby-traps, no one was safe or secure at any time. The Vietnamese who was your ally during the day could easily become your enemy at night. Vietnam was a poor people's war. Twenty-two percent of infantry units were black or hispanic but only 11 percent of the support units were black or hispanic.

The purposelessness of the war was reinforced by the fact that it was a 12-month war for everyone. The message to the Vietnam veteran was that the war was not important enough to stay and fight for longer than 12 months. In Vietnam, 75 percent of the Vietnam veterans thought the war was wrong or questionable. The homecoming of the Vietnam warrior was quite different from the soldiers in other wars. It was possible to leave Vietnam and, 72 hours later, to be at home; and you came home alone. The social or family atmosphere that was present on return ranged from indifference to outright hostility toward the returning soldier.

The special problems of the Vietnam veteran are related to the uniqueness of the Vietnam war. Vietnam veterans have had the experience of war, the brutalization and emersion in death and dying plus the additional stresses mentioned above which most veterans of World War II and Korea did not suffer.

The services offered at the Vietnam veterans' centers are specifically designed to deal with the problems of the Vietnam veteran. They include Outreach, counseling, and referral for Vietnam veterans and their families. Counseling includes individual, group and family counseling, and is directed at short-term rather than extended psychotherapy.

In my judgment, the cancellation of this program at this time, or placing it back into a department of the VA, represents a failure to understand the special nature of the Vietnam war and the special needs of the Vietnam veterans. It seems to me that the Vietnam veteran has earned the right to several additional years of readjustment counseling in a program that is specifically tailored to his or her needs.

KEEPING THE FAITH

In concluding my remarks, Mr. President, I would like to observe that this Nation's All-Volunteer Force has been challenged as never before with the problem of attracting young men and women of the quality and in the quantity that we need to keep our defenses strong.

In recent months, this Congress, and this country, have expressed an increasing willingness to expend vast sums of money to attract young people into the military services. My colleagues and I have introduced a number of bills designed to produce qualified recruits through the promise of educational, monetary and other incentives.

If I were a young person considering enlistment in the military services today, however, I would be very skeptical of the inducements offered by this Nation to its military personnel if I saw that the veterans of the last war were not adequately provided for. In my judgment, the manner in which we treat our veterans of previous wars will have great bearing on the decisions of those whom we are asking today, and whom we may have to ask in the future, to shoulder the burden of our Nation's defense.

Thus, beyond the legal and moral obligations we have to our Vietnam veterans, we have a practical obligation to keep the faith and provide them with the assistance they need to recover from the stresses of their wartime experiences.

Mr. President, as a combat veteran of World War II and of Korea, I know better than most that "in war, there are no unwounded." We have an obligation to assist those who were psychologically wounded, just as we do to help those who were physically wounded, as a result of their military service to their Nation in wartime. For these reasons, I urge my colleagues to support this bill, and to extend the Vietnam-era veterans' readjustment counseling program through September 1984. I ask unanimous consent that the text of the bill and the articles referred to earlier be printed in the RECORD.

There being no objection, the bill and the articles were ordered to be printed in the RECORD, as follows:

S. 872

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 612A(a) of title 38 is amended by striking out "two years after the effective date of this section" and inserting in lieu thereof "before September 30, 1984".

[From the Washington Post, Mar. 26, 1981]

AMERICA'S MOST DESERVING VETERANS

When we suggested that the administration might round up some of its sacred cows for a more rigorous program of diet and exercise, we singled out the budget for veterans' programs. Only a fraction of these funds goes to the especially deserving—the victims of combat. Worse yet, while billions are still to be spent on ailments and benefits that have no connection with active military service, the administration plans to kill the one small program that is reaching out to help America's most desperate combat veterans—the mentally shocked men and women still haunted by the horrors of Vietnam.

As described in an Outlook report by staff writer Myra MacPherson, these troubled veterans have found personal relief in a basic program of storefront vet centers. There, in the company of each other, a chemistry similar to that of Alcoholics Anonymous meetings has worked to soothe stresses that have resisted other rehabilitation efforts. There are 91 of these modest little meeting rooms, most of them manned by fellow Vietnam veterans who have known firsthand the trauma of coping, during and after, with an unpopular war.

They have known all along what was pointed out just this week in a $2-million, eight-year study: that the veterans of combat in Vietnam are plagued by significantly more emotional, social, educational and job-related problems than those who were not in battle. They have known, too, that the women in this war have been suffering from the same delayed stress syndrome: flashbacks, depression, alienation, guilt.

The penny wisdom of closing these counseling centers is obvious: You are talking here about $30 million at most, when nearly $8 billion will be spent next year on a veterans' hospital system that provides free care for any ailment, service-connected or not; and when another $4 billion will be spent on pensions for veterans with no service-connected disabilities. With all this federal fat around for the trimming, why kill a program so financially insignificant that it doesn't even show up in the main federal budget book but means so much to so many genuinely deserving combat veterans?

There are bipartisan efforts under way in Congress to rescue the counseling centers. Sen. Gary Hart (D-Colo.) and Rep. Margaret M. Heckler (R-Mass.) have been pressing for inclusion of the money and so far, so good: The Senate Budget Committee has approved funds for the program, and the full Senate should uphold that action; the House Budget Committee is scheduled to take up the matter today, and here, too, this proposal deserves solid support.

PRISONERS OF PEACE

(By Chris Vaughan)

Last Thursday night, a single car accident claimed the life of a Rhode Island man.

Road conditions were not a factor: it was not raining, nor was it snowing. Visibility was good. Yet Wayne Smith could not be too surprised, because the man was a Vietnam veteran.

Smith, a counselor at the Vietnam Veterans Center in Pawtucket, knows the figures. The victim became part of a startling statistic: over 66,000 Vietnam veterans have died since coming home, roughly 10,000 more than the number of soldiers killed in America's 13-year presence in Vietnam.

Wayne Smith understands the numbers because he has been a part of it. He is a veteran of a year's tour of duty as a combat medic in Vietnam, a position associated with a life expectancy of "about three hours," according to Smith, who was never wounded in battle.

He also understands why the single car accident that took a man's life last Thursday was probably not completely accidental. Wayne Smith understands because he too was a victim of Vietnam after the fact.

Unlike a significant percentage of the esti-

mated 500–700,000 Vietnam Veterans who suffer from a similar delayed stress disorder. Smith has beaten back the depression and anger of his Vietnam experience to become a valuable member of society. It wasn't easy—he had to defeat a drug habit and spend three years in prison following his return—but relatively early access to readjustment counseling put him on the path to a bachelor's degree in psychology and a new life.

His worries are not over; he is reluctant to start a family after having been exposed in combat to the defoliating chemical Agent Orange, which is suspected of causing genetic disorders. But he has a job (40 percent of combat vets are unemployed) and he is still alive (Vietnam vets have a suicide rate 25–30 percent higher than the rest of their age group).

Smith's job with the Vietnam Veterans Center, one of 91 storefront-style out-reach centers that have sprung up nationwide following a successful 10-year fight for federal funding, is in jeopardy. When President Reagan revealed his budget last week, the relatively paltry $10 million allocated to Vietnam veterans this year was not included.

That means the 91 "Operation Outreach" centers will close, and the 50,000 veterans and significantly affected relatives, spouses and girlfriends currently utilizing the services of the readjustment clinics will have to find help elsewhere.

Yet they may not be the biggest losers. "When the center is gone, it's all the vets who've never been to Pine Street (the center's location) who're gonna be the real losers," says veteran Robert Guyer, whose life was "set in a straighter line" by group counseling at the Rhode Island Vietnam Vet Center.

Indeed, the readjustment counseling has not been around long enough to attract the attention of many veterans experiencing what psychologists call "post traumatic stress disorder"—recurring anxiety over Vietnam-related events—and Vietnam veteran advocates say the program has not been given a fair chance to demonstrate its value.

"We'll be damned if we're going to let them get away with it," proclaims Bobby Muller, director of Vietnam Veterans of America. "I think we can count on a tremendous groundswell of response from the American people . . . I will not even consider the possibility that (the outreach centers) are going to go away."

Muller's response alone will not keep the centers open, however, and Smith is resigned to what he sees as a "return to business as usual" thinking on the part of the government: "It appears definite that the Reagan administration is going to terminate this program, just like many others."

Smith is philosophical about the defeat. "I'm not going to have any trouble getting a job. Nor will the other staff members (Lou-Ann Nixon and fellow counselor and veteran William Kelly) but I feel extremely bad for all the vets in need of this kind of counseling."

In essence, the counseling provides vets with an opportunity to talk about their experiences and release the anger they feel—dangerous, self-directed anger that results in suicides and mysterious single car accidents.

"These rap groups are the strongest tool we have in dealing with stress," says Smith. "These men need to share the pain, to share the horrors, to get past it and share the growth process of human development."

"All it takes is to put Vietnam and their experiences into the proper perspective. People come back and have a real need to talk about what's going on, what has happened to them."

"It used to be I'd have strong anxiety problems—I'd blow up in a minute," recalls Vet Center client Guyer. "But the center got me out of that. They helped put me together again."

Guyer identified a syndrome many veterans of America's longest war complain of: no one wants to talk about Vietnam. John Montgomery, a lawyer who served 14 months in an artillery unit in Vietnam, had no problems readjusting to American society, but he too is irked by this.

"When I came back and had some interviews with law firms I put my Vietnam experience on my resume to explain the two-year gap," he said. "Nobody asked about Vietnam. Not one. It's like a big national embarrassment. It bothers me that nobody asked about it."

America's apparent indifference to the plight of Vietnam veterans is part of the problem, as vets see it. A bumper sticker displayed in Smith's office at the Pawtucket center summarizes the sentiment: "The Vietnam Vet: First the Draft, Now the Shaft."

"Once again, after a series of other setbacks, Vietnam vets are being denied the chance to reintegrate with society," Smith laments. "These men are very sensitive to this political system. Most love this country and most are extremely loyal. And, unfortunately, most will continue to withdraw within themselves.

"It's no accident that there have been more deaths among Vietnam vets since Vietnam than there were in the war."

Operation Outreach has been an unqualified success in Rhode Island—as far as it goes. The "great majority" of the Vet Center's patrons are doing well, Smith says, and no one who has visited the local vet center has committed suicide. Yet seven Vietnam veterans died in Rhode Island in January. Smith thinks the Vet Center could have helped them. No one will ever know.

And no one will know what the national program would do, since it is apparently doomed. Only an intense lobbying effort can salvage Operation Outreach, says Muller, who has identified readjustment centers as the "number one priority" of the lobbying effort being led by Rep. Tom Daschle, chairman of the Congressional Caucus of Vietnam-era veterans.

"We're going to start by neutralizing the administration to assure that if we're successful legislatively, we're not going to have a veto," Muller says. "They've taken away not part of the program, but everything. '00 percent. They've got to give us something."

If any concessions at all are gained, the readjustment centers will be first in line. In budget cutting times, it is difficult to predict who will prevail. If the outreach centers are abolished, Vietnam veterans must turn to the Veterans Administration, which suffers from its association with the government in the minds of Vietnam vets, who have come to mistrust the system that made them outcasts.

"Vietnam veterans do not generally think of the VA as a friend," Smith notes. "Some believe there is animosity from older (World War II- and Korea-era) vets. My sense is that there is just indifference. People don't care."

[From the Washington Post, Mar. 15, 1981]

PULLING THE RUG FROM UNDER VIETNAM VETS AGAIN

(By Myra MacPherson)

Bruce is 33 but he looks ancient. Deep circles; a thin, gaunt face. And of course, the mouth. It is wired together. Bruce, drunk, carefully picked up a gun one night, sat on the john and tried to blow his brains out. The bullet went through his neck and twisted and came out, shattering his jaw.

The Vietnam veteran grew up in Los Angeles, mostly alone, from a broken family. His one interest was art. "I had taken the entrance exams to art school but I decided to go in the service. It was just something you had to do."

After he returned home, Bruce developed cancer, Hodgkin's disease. Today he wonders about Agent Orange: "Hill 327 was stripped while I was there. I watched them spray every morning."

The cancer has been in remission for several years but Bruce, who went back to art school and got a good graphics job with a top advertising agency, eventually slid into alcohol and lost his job. One night he decided that all was pointless.

Today, eight months after his suicide attempt, Bruce has moved into a steady Thursday night rap group at a Vet Center in Los Angeles. Doctors are reshaping his jaw. One recent night, speaking through the bizarre-looking face guard doctors have fashioned for his jaw, Bruce told a group of wide-eyed college students about a war that is ancient history to them.

For years Bruce resisted blaming Vietnam for any of his problems. "I thought it was a cop-out." Only recently did he realize he had to talk out the past so that he could get on with the future.

"I had a lot of pent-up feelings against the government; how they're doing nothing on Agent Orange. It's very hard for me to become some rah-rah member of a group. I'm essentially a loner. But I have this drive to go to those Thursday night sessions. If those centers go, I would survive but I could name at least five guys who might not. They are the one place vets can let it all out with other vets."

Bruce has stopped drinking; smokes only a little pot. "I now feel I want to live." He pauses. "I don't want to 'X' it. . ."

The men who come to the storefront Vet Centers across the country are in their thirties: average age, 33. Some still have the look of easy youth; others stare from haunted, old men's eyes. They are survivors of Vietnam—our nation's most unpopular, troubled and divisive war—and, most crucially, survivors of their hassled and hapless homecoming.

Last week, outrage raced coast to coast in 91 counseling centers. For 10 years veteran activists had fought for psychological readjustment help. Finally, in 1979, Congress came through. Most of the centers are barely a year old.

Skeptical Republicans on Ronald Reagan's transition team toured several centers and ended up recommending that they be given a chance. But now Reagan is axing them—his Office of Management and Budget called for obliterating them by September—even as the President pins medals on Vietnam veterans, an act many of them see as a flag-waving attempt to prime another generation of youths for new, massively funded military adventures.

Just as the lavish homecoming for the hostages returning from Iran surfaced smouldering anger among Vietnam veterans, two crucial and intertwined resentments are reflected in the outrage of many veterans at the gutting of their centers. One is a deep distrust of the government. "If they close in September, this will be viewed as another instance of the government lying to them," says William Mahedy, a former Army chaplain in Vietnam who now runs the Vet Center in San Diego.

The veterans' second, equally deep-seated resentment is aimed at their antiwar collegiate peers who evaded the war and now turn their backs on them. David Stockman, OMB's program-cutting wunderkind, is just their age, 34. He spent the war in Harvard's divinity school—which conveniently carried a 4–D deferment—but never entered the clergy. "That son of a bitch," muttered a highly decorated former paratrooper, now an attorney. "There he was yelling, 'Hell no, we won't go,' but making no sacrifices for his beliefs, and now he's gutting our programs."

As federal funding goes, the $12 million

annual readjustment counseling program—operated through the Veterans Administration but away from its facilities—is barely enough to stock the centers with styrofoam coffee cups. But the veterans where hardly in a position to quibble when Congress appropriated funds for "Operation Outreach" in 1979. After all, Congress had rejected the proposal four times previously.

The overall cuts in the VA's budget are modest compared to other agencies'. The White House fact sheet stresses there will be no reduction in medical personnel serving patients directly and no reduction in compensation payments for the service-connected disabled. However, the Vietnam veteran stands to lose not only the psychological readjustment counseling programs but also job development programs and Legal Services aid. "All these cuts leave the Vietnam veterans without any government-supported advocacy programs," contends David Addlestone, director of the National Veterans Law Center.

The VA itself feels the Vet Centers are expendable and argues that it is not cutting anything, merely withdrawing its pre-Reagan request to extend them. Although the pilot programs were originally funded for two years, the intent of the legislation was to review them in September for one year's further funding. The Reagan budget would kill them off without any review. The centers have seen 40,000 veterans and, as one center leader said, "More are coming out of the woodwork all the time."

There are 9 million Vietnam-era veterans. Of these, 2.5 million served in Vietnam. Even the VA, for years insensitive to their psychological problems, estimates that half a million of those veterans suffer emotional problems in varying degrees.

There is a fancy name for what troubles so many veterans—Post Traumatic Stress Disorder. The Diagnostic and Statistical Manual, the bible for psychiatrists, now recognizes it as a legitimate disorder.

The stress was caused in large part by coming home to a hostile and indifferent society. Antiwar sentiment at home made this war unique in American history. The veteran faced "the antagonism and hostility of an entire people who, almost without knowing it, confused the warrior with the war," says Charles Figley, a social psychologist, Vietnam vet and leading expert on the delayed stress of veterans.

The problem was acute for those who returned from Vietnam to college campuses at the height of the antiwar demonstrations. Even the most successful today tell of being ridiculed by professors and peers.

Fred Downs, who wrote a critically praised book, "The Killing Zone," and works for the VA, lost an arm in Vietnam. One day as riots swirled around campus, he was walking to class when an antiwar demonstrator noticed his hook. "Did you lose your hand in Vietnam?" Downs replied yes.

"Serves you right," said the student.

Many became closet veterans. "We were the fascist pigs, scorned by the girls," said one. The major sexual-favors slogan of the time said it all: "Girls only say 'yes' to boys who say 'no.' "

There is a pervasive myth that Vietnam veterans are crybabies, asking for special programs not afforded past GIs. But in fact, there was extensive and prolonged treatment for the millions of World War II GIs who returned with war neuroses. A 1955 National Academy of Sciences study stated that one in three World War II veterans suffered some neurotic problems (as compared to one in four Vietnam vets). Congress passed laws providing large-scale psychiatric counseling, both federally administered and community-based. And according to the VA's official history, the program was successful "because it met with the wholehearted cooperation of local, county and state medical services throughout the nation."

Today many of the minorities and unskilled, promised a trade by the Army, face chronic unemployment. They returned when times were hard and jobs scarce. For several years after Vietnam, the GI bill was greatly inferior to that for World War II and Korean vets.

Congress, mirroring the public's attitude, treated the veterans' special needs with yawning indifference. Unlike the returned heroes of World War II who won elective office, only a handful of their generation now in Congress (the 82 members born since 1942) had any service. Just five saw combat.

One of them, Don Bailey (D-Pa.), fiercely hawkish says, "There are Vietnam veterans who have not succumbed to humiliation as a price for acceptance in society; who do not feel that in order to be accepted by this nation they must criticize what they did in Southeast Asia."

Others came home doves, feeling the war was a total waste, but still doing a burn at the way society treated them. The centers are often filled with young men who couldn't wait to sign up at 18, hell bent to "kill a Commie for Christ." Death and destruction in a war that quickly held no meaning for them turned many into cynics. They returned saying, "It don't mean nothin'."

"I call Vietnam an undigested lump of life," says William Mahedy, the San Diego Vet Center leader. "It just does not digest in the system. And that is what we at the centers are attempting to do."

Tim is a handsome, younger Robert Redford, a successful builder and struggling Hollywood actor with several national commercials to his credit.

A year ago he came to the center. He could not understand his depressions, his inability to stick to anything. Through the center, Tim began to realize his resentment at society.

"Hey, I was good at what I did. In any other war I would have been a hero." He felt no guilt. "Wait a minute. Well, maybe. . . ." There was that one Sunday morning. A group of monks were threading through the jungle in saffron robes. Tom radioed permission to shoot. The response was that he could do what he wanted. After all, there had been stories that the Viet Cong sometimes dressed as monks. Tim turned his helicopter and shot. "I looked down—and I saw one of them crawling away from his leg. I said, 'That's enough.' " Only 10 years later did he confront that episode. "It was wrong. I can finally say it now."

Soul music fills the D.C. center on Pennsylvania Avenue SE, just a few blocks from the Congress which long ignored special bills for Vietnam veterans.

Dennis, red-haired, in his Amoco windbreaker, races in on a work break from the gas station. "I was disabled and I haven't collected on my money. I tried for six years to get it straightened out. I come here and in two hours they did more for me than any of those people at the VA did in six years."

Leon, a black from Pittsburgh, has a deep voice and has worked in broadcasting. "If they didn't have the Vet Center experience I'd probably be in jail." Out of work, he smolders with hatred at the "white system." Talking about it at the center was instant therapy. He remained on as a volunteer counselor. The other day he got a job offer from a local radio station.

One CETA worker, about to lose his job in the budget cuts, sits with a group across the street at Johnny's Cool Breeze Restaurant. "I was shunned by the friends I grew up with because I came out of the service with $1,000 to show for three years. They're all buying homes, finished grad school and now I don't even have a job. I'm three years behind and I'm not ever going to catch up."

During the war, the government proudly reported that combat stress was down this time around. Any grunt will quickly give you one reason: "We were stoned."

James, at the Cool Breeze, said, "I wasn't on nothin' when I went there but in Vietnam you had a choice: getting high on hard drugs or hard liquor. Heroin was plentiful, falling out of trees. You see someone get blown away and, hey, you smoke some OJs [marijuana, of very strong quality in Vietnam] and hey, man, that's cool."

Leon: "We use to make pillows out of it. Fill up our back packs with reefer in its natural form. Them weeds was all over."

Unlike their collegiate counterparts, who also routinely got high, many came back addicted. The Army and, for a long time, the VA did little to recognize the problem or to help.

Jack McCloskey, a wounded and decorated veteran leader of the San Francisco Vet Center, says body counts are a recurring subject in his rap sessions. "They would set up competition. The company that came in with the biggest body count would be given in-country R & R [rest and recreation] or an extra case of beer. Now if you're telling a 19-year-old kid it's okay to waste people and he will be rewarded for it, what do you think that does to his psyche? Over there it was orders. Now, years later, they are reflecting on it."

Larry hides behind his sunglasses, never taking them off. ("I'm better now; I used to wear hats all the time.") He has a master's degree, two laboring jobs and is trying to sort out his life.

"I never talked about the war before," he says in a San Diego center, "because there was no solution. The dynamics of the war were such that we never came out of it well.

"We created a sick child."

They are mavericks, the men who run the centers. Most have some psychological training. All centers have at least one veteran. They do not fit easily into clinicians' white coats or bureaucratic pigeonholes. This is both their strength and weakness. They have the vital rapport with veterans but often lack the ability to administer in a way that pleases the VA's bureaucrats.

"Body counts," sighs Angel Almedina, in New York. "They're back to body counts." He rebels at having to make out reports. What they lack in expertise, the center men make up in irreverence and a fervent commitment that rivals "MASH's" Hawkeye.

Almedina grew up in a Harlem barrio ("I'm just a spic from Harlem, honey,"). He is barely 5 feet 3, with long, curly hair. In Vietnam he developed a drug habit. Almedina rolls up his sleeve and displays an arm the color and texture of a Madame Tussoud wax figure. "Look, baby, no marks. Been clean since '72."

Almedina talks street talk to guys who know no other language. "A dude comes in the other day. The VA sent him to us. Said he was hopeless. Never talked. We gave him space, let him go. He was with blacks and Latinos and he felt at home. Now you can't shut him up."

Across the country, in Los Angeles, is Shad Meshad, who pioneered the Vet Center concept a decade ago. He turned down the job of directing the VA program, but runs the West Coast region.

A medical service officer in Vietnam, Meshad was shot down in a helicopter. "I split my head. I was scalped." Meshad pulls back the bangs he wears to hide the scars. "I could feel my whole face slipping. Like an old basset hound, my face just kind of fell down. I tied a bandana around it to hold it up."

Years of painful operations on his head

and back, six months of "terrible readjustment problems," turned Meshad into a zealot for the veterans. "You know the $12 million for the centers? I figured it out. That was about what it cost for 12 minutes of firepower back in Vietnam in 1969," he says caustically.

There is some inevitable ego tripping and hyperbole in Vet Center leaders, but for the most part they have functioned well in one very crucial, neglected area. It is that amorphous ability to make "contact," to reach people when others cannot. It is the same mysterious value that Alcoholics Anonymous has for people who went through years of psychiatry to no avail and then became faithful AA converts.

It is a quality that seems lost on the present VA administration. Reagan has not even appointed a head of that lumbering institution to date.

One VA spokesman, Stratton Appleman, says, "We figure the centers aren't that productive." Appleman, career Air Force for 23 years, shows no enthusiasm for the centers. "When people need psychological help they can certainly get it from the VA."

Center supporters argue that the VA dumps a lot of their patients on the centers and that the reason the centers were needed in the first place is that the VA makes no attempt at outreach. They claim that one-third of VA physicians are foreign-trained, that much of the personnel are not Vietnam veterans and that in may cases there is resistance to the concept of delayed stress.

Some Vietnam veterans feel the centers call attention to only the troubled. "Most veterans are functioning, productive members of society," says William Jayne, a former Marine rifleman. "Operation Outreach—which I see as a 'too little, too late' program—may be very helpful in some cases, but what bothers me most is that the program seems flawed by its predisposition to view the veterans as helpless, hapless victims."

The Vet Centers will not go away without a fight. For the first time, both public sentiment and lobbying clout is turning toward the Vietnam veteran. The American Legion—once anathema to turned-off Vietnam vets—is now on their side as Vietnam veterans sign up as members.

Bills were, in fact, voted out of the House Veterans Affairs Committee last week for a two-year extension of the Vet Centers.

James Webb, a Vietnam combat veteran and author of the Vietnam novel "Fields of Fire," is minority counsel for the House committees. "My hope," he says, "is that all the members who called at the time of the hostages and said, 'Is there something we can do for the Vietnam veteran?' will realize this is at least one small place where they can put their money where their mouth is."

In the '60s, 16 million young Amricans beat the draft through student deferments, exemptions, legal technicalities and systematic evasion. Vietnam was a class war—and the blue collar and ghetto soldiers of yesterday do not forget.

The talk in many centers is of another draft. Veterans are divided. Some are for it as the only fair way out of the grossly inequitable volunteer Army. Others—including blacks and Latinos who were drafted the last time—are sending another message.

Angel Almedina sits with a group of Vietnam veterans in Manhattan's West End bar, near Columbia University. Twelve years ago, all was unrest there—sit-ins, occupying dean's offices, marches, demonstrations. Now all is quiet. Two young men, with bookbags and peach fuzz, drink beer. The Vietnam veterans suddenly look very, very old.

"For the next war," says Almedina, nodding to the college students, "he don't go and he don't go." Then he looks across the counter. "The guy making the pizza, he go; the guy in the kitchen washing dishes, he go."

The argument for the draft is a good one: If everyone has to go, senators' sons and bank presidents' sons, maybe that will slow down the next involvement.

"But hey, man," says one black yet, "it just ain't gonna happen. The ones with pull ain't gonna go."

America lost the upper middle class in the Vietnam War. They may have lost the working class today. The legacy of Vietnam veterans—unemployment, psychological problems—is a far greater deterrent, some believe, than a new souped-up GI bill is an incentive for joining.

Spending billions for hardware while cutting programs for Vietnam veterans is hardly the way to sell a whole new generation on signing up for the next Big One.

[From the Providence (R.I.) Journal, Mar. 8 1981]

LONELY, ANGUISHED VETERANS FIND THE VIETNAM WAR IS NEVER OVER

(By Wayne Worchester)

Paul Hart clenched his fists and squeezed them hard. The skin across his knuckles went white and his forearm began to shake.

"I have this rage," the young man said. "This anger that I don't know what to do with.

"I'd like to step into that room there, where all those people are, and just shout, y'know? I'd like to say, 'Hey. Stop what you're doing, you sons of bitches. Stop and listen. Look at me. Me. I am a Vietnam veteran. I fought for you. I damned near got killed for you. You owe me. Goddammit! You owe me.' "

"What do they owe you? What do you want from them?"

"I want them to say, 'Thank you.' That's it. I want to hear, 'Thank you.' "

He stopped then. He opened his fists, and the anger in his eyes turned quietly to sadness. "Then I want it to be like it was," Hart said. "I want to feel normal again, like I did before I went to Nam."

For Paul Hart and thousands of combat veterans like him, the war in Vietnam is not over.

It has only moved to private fronts and become the stuff of vivid nightmares and flashbacks, a source of anger and frustration, a cause of long bouts of depression, loneliness, a sense of worthlessness and a feeling of alienation.

Clinically the problem is known as post-traumatic stress disorder, a delayed response to extraodinary stress, not just to the pressures of combat, but to the entire experience of Vietnam and its aftermath.

It was a unique and intensely personal war, and it generated some unique and intensely personal problems.

DEROS, the Date of Expected Return from Overseas System, helped make it so. The system was unique to the war in Vietnam. Every soldier sent there after the earliest years of the conflict knew before he left exactly when he would return—not when the war was over; not when his company was relieved in the field; but when he had done his job for just one year. For each soldier the war in Vietnam had a definite beginning and a definite end. In many respects, that made it his war, and at an average age of about 19—a period of adolescence in which his personality, his sense of himself as an individual, was still developing—it was his own lonely problem.

A soldier trained with one group of strangers, then went to war with other strangers, and when the DEROS said it was time go home, he went home, not with the men he fought beside and befriended, but with more strangers from other units who happened to have the same departure date. He left Vietnam the way he went there, quickly and abruptly.

"This was a war in which you could literally go from firefight to fireplace in 24, 48 or 72 hours," said one combat veteran. "That in itself was too much. There was no effort made to help vets come to grips with what we had been through. There was no support. None of the guys you'd lived with and fought side by side with were there with you trying to become civilians again. There was no buffer against the shock of fighting in the bush on Wednesday and being home on Saturday. It was a logical extension of the DEROS."

"All you had to do," said Paul Hart, "was hold it all in, suppress everything that was going on inside you. Don't flip out. Keep body and soul together. Keep you mouth shut, and it would end."

"At some point, every Vietnam vet has to deal directly with what happened to him," said Michael Manoog Kaprielian, a combat veteran. "You can only keep it in for so long. Something triggers it, sooner or later.

"I'd gotten a degree last May and prepared my resume and sat down with a career counselor. She looked at the resume and said, 'This period here, 1969–1973 with the Navy and the years when you served in Vietnam and were cited for bravery and all that. I think for that period, you should just put down 'military service.' I really wouldn't mention Vietnam."

"That's what did it for me. It forced me to stop and think about what had happened and what's still going on," Kaprielian said. "I've been preoccupied with the whole thing. I've seen every movie about Vietnam; read every book and most of the major news coverage of the war and the issues involved.

"As Vietnam veterans, we are a reminder of an era that the country would rather not remember, and we've been made to feel personally ashamed for that.

"There's been this convenient media image of the Vietnam veterans in which he is one of two stereotypes. He's either whacked out on drugs or he's a time-bomb. No middle ground. People tend not see us as individuals who went through hell and are trying to find a way to lead a normal life.

"That image is what the career counselor was reacting to. She was trying to help me by getting me to disavow a portion of my life. I am not proud of our role in Vietnam. But I am damned proud that I survived it.

"The thing is, we're all veterans of Vietnam to one degree or another," he said. "People who've written books about the turmoil of the '60s and early '70s note that many, many of the people who were involved in the era, protesting it, working against the war, think of themselves as survivors, too.

"You see, you didn't have to be in the military to be affected by Vietnam. It was a national experience. Everyone has a reaction to it. I think we're really just beginning to understand the ramifications of that. What everyone wants is to be able to forget about it or at least put it where they don't have to look at it.

"It's as though the entire country had a candid picture taken of itself and then decided that it didn't really like the way the picture looked. No way are we going to let that picture into the family album."

A study by the military in 1969 concluded that while battle-induced mental disorder—combat fatigue—claimed one United States soldier in every 10 in World War II, only one soldier in 100 was affected during the Vietnam war.

In World War II, the incidences of combat fatigue declined as combat drew to a close and the war neared an end. But as the Vietnam war began to wind down early

in the 1970s, the incidences of combat-induced disorders began to increase, and after the war ended, the number of cases began to rise dramatically.

A two-year study done for the Disabled American Veterans called The Forgotten Warrior Project estimated that by 1978 approximately 500,000 Vietnam veterans—roughly half of all those who served in combat—had begun to show related symptoms of stress that were profound enough to seriously impair their lives.

The statistics bear that out:

The suicide rate among Vietnam veterans is approximately 33 percent higher than it is for the general population. In fact, one study done in 1979 and quoted in literature from the Disabled American Veterans organization says the number of veterans who have killed themselves since the end of the war surpasses the total of more than 58,000 who died in combat in Vietnam.

Of those veterans who married before going to Vietnam, 38 percent were divorced within six months of their return.

The number of Vietnam veterans hospitalized for alcoholism or drinking problems has more than doubled in the past seven years.

The Forgotten Warrior Project also predicted that the number of combat-disorder victims would continue to increase until 1985 and that unless some program were devised to help them, the symptoms of delayed combat stress—the nightmares and flashbacks, the anger, frustration, loneliness, depression and alienation—would, for many veterans, become an almost unchangeable part of their personalities.

In 1979, after eight years of wrangling with politicians who kept tacking unrelated riders and amendments to pertinent veterans' legislation, advocates finally got an $11.2-million program called Operation Outreach through Congress.

The program provides for 91 community-based counseling and referral centers staffed with Vietnam combat veterans intimately familiar with the problems that beset their colleagues.

The Vet Center in Rhode Island is located at 72 Pine St., Pawtucket. Since last May, when the center opened, its four-member staff has had contact with between 2,000 and 3,000 Vietnam vets from Rhode Island and Southeastern Massachusetts.

In his final budget, former President Carter requested that Operation Outreach be extended for two years beyond its expiration date this September and that the program be given an annual $12.4 million operating budget, plus $11.2 million to cover annual contract fees.

Most recent reports indicate that the Reagan administration is considering scrapping the program in its efforts to pare the federal budget.

"That's all we need," said Paul Hart. "I read that and I picked up the newspaper and threw it. One more kick in the teeth, you know?"

"I was in the Army," he said. "I'd joined to fight for my country, and that was what I was going to do. I was 18 and right out of high school in 1969. I volunteered for the infantry and then I volunteered to walk point, you know? Lead man, the first one into it.

"I was okay for a while, but then it got to me. I got too wound. Too nervous and tight, you know? Too paranoid. That's how it was. That's the way I had to be over there to survive. Never knew who the enemy was. Or where he was. He could be 15 feet away and you might not know it. He could be next to you and you wouldn't recognize him.

"Sometimes a woman or a kid would be rigged up with an explosive. That kind of thing. There were times when the enemy would take women and children and try to use them as a shield. If I was on point and something moved, I shot it. One time, I sprayed the bush and killed two 12-year-old boys. That's how it was over there.

"I wasn't as worried about saving my own neck as I was about the guys behind me. Their lives depended on how sharp I was up front. Life expectancy of a point man in the bush in Vietnam was what? Matter of minutes? Seconds? Something like that. I'd walked point for almost six months. And I couldn't take it any more.

"One of the guys had wanted to walk point, so we traded jobs. I lugged his M79 grenade launcher. He got killed.

"Later, in Tai Nin, a green captain was walking point and he took us right into an enemy bunker complex.

"Twelve of us were wounded: B-40 rockets. Three were killed. We were stuck there for 18 hours—18 hours—from about 3 in the afternoon until 9 in the next morning—and, God, it was murder. I wanted to get at them. I was out of it, just waiting there in the dark. We dug in, and I stood up by my foxhole all night long with a claymore plunger in my hand hoping to hell some of 'em would cross the wires and set off a trip flare so I could trigger the mines. All night I waited for the * * *. I'd been wounded in the ankle and they'd killed some of my buddies. But nothing happened. Nothing. We got air support and cover in the morning, and we got out.

"Sometimes . . . sometimes, I think I'd like to go back, you know? Finish it. Get it done, the way they should have let us. There were times when we were told we weren't supposed to load our weapons for a particular patrol. There were freefire zones, and then zones that were part of the war but that you couldn't fight in. Like it was some kind of game we were dying in. Sometimes, I think I'd pay $10,000, if I had $10,000, just to be able to go back there with an M16."

Hart left combat and hobbled around on crutches at a military base for several months finishing his tour of duty in Vietnam. "There was 'incoming' all the time. We were always being rocketed. It was like still being in the war, but not being able to fight back, you know?"

Hart said that during exit processing at a military base in California, "The medical staff told us, 'If you've got any problems we want to hear about them, but in most cases it's going to mean you'll be here with us for anywhere from two weeks to three or four months.'

"By the time I got to California, all I wanted to do was go the rest of the way home. I mean, this close to it, I wasn't going to mess up my chances. So I kept my mouth shut like everyone else, and two days later I was back home in Rhode Island.

"The plane put down at Green Airport, and I just sat there. Everybody got off but me. I wasn't even sure where I was. I could see my parents inside the terminal, you know? But I couldn't move. The stewardess finally came back and told me I had to leave. I got off the plane and just looked around. At the sky and the ground—I wanted to kiss the ground. I was real glad to be back, but there was no big welcome. Just my parents.

"I'd expected to be treated like a hero, but they saved that for the hostages. I had fought for my country. I'd been there when I was needed, but there were no brass bands and ticker-tape parades and speeches.

"Instead, we've been called baby-killers and murderers and we've been spit on. Yeah, literally. Happened to me in a bar a while after I was home. I was with a couple high-school friends. They got me out of there in a hurry.

"I'd been home a while. It was near the Fourth of July, 1970, and I was driving down the road in my town with a friend and some kid lit off a big firecracker, an M-80 or something. I let go of the wheel and dove to the floor of the car. My friend grabbed the wheel. I thought I was in a firefight again."

"I've never left Vietnam. Not really. Maybe some day I will. I hope so. I've lost jobs because I couldn't get along with the bosses. I've been divorced. Crowds get me wound up. I have a hard time in traffic, you know? I see somebody who's Oriental and I tighten up; the palms of my hands get all sweaty and I'm right back in the bush.

"The Vet Center was a help. There are guys there, other vets, who understand what Vietnam was all about. You don't have to explain what it was like. And I go to the Vets Hospital for therapy and medication all the time now.

"I get some disability comp for my ankle, but the government keeps telling me I don't qualify for compensation under post-traumatic stress disorder. There was this rule that the problems had to be identified within a year of leaving the military, but nobody told us about that when it mattered.

"After, I had interviews with Army shrinks and everything. They kept saying that any problems I had were because of my ankle.

"Fact is, they don't want to spend the money, and they don't want to know about the problems. They want to forget about Vietnam. So do I, but I can't. Not yet."

Neither can John Colter. But he has found a place, a perspective, for his experiences in Vietnam. But then, his war in Vietnam was different and so was he.

At 24; Colter was older than most who went to Vietnam. He was married and already a veteran with three years of Army service behind him. "I'd been out of the service since 1964. I thought what we were doing in Vietnam was right. I was dead wrong, in retrospect, but I believed all of the crap at the time, and I thought maybe I'd become a career soldier."

Colter went on active duty in January, 1967, early in the war. He trained with a group of highly motivated men, a unit of the Army Air Cavalry, went to war with them and probably would have returned with them. As it happened, he came back alone after only about two months in Vietnam. He was severely wounded and that kept him at a stateside military hospital for six months. "It made a helluva difference, looking back at it," Colter said, "because I didn't go directly from combat to home like most guys did."

Colter was the first man in his unit to be hurt. A single enemy soldier about 120 feet below Colter's reconnaissance helicopter fired his machine gun at the aircraft. Seventy-nine bullets hit the helicopter and left holes like ragged stitching on a steel boot. Three of the 79 punched a 2½-inch diameter hole through Colter's right thigh, severing the sciatic and tibia nerves. The result was what's known as "drop foot." Colter needs a leg brace to hold his foot perpendicular to his leg. Two major operations and a protracted period of physical therapy failed to correct the disability.

But convalescence did keep Colter at a military hospital for about six months before he was discharged, so his transition from military life to civilian was more gradual than it was for Paul Hart and the majority of veterans.

"This was the early part of the war, too," Colter said. "Public opinion on Vietnam still was sharply divided, but not like it was going to be. And Vietnam wasn't a war that we had lost yet. Some guys from a veterans' post near the hospital would come down and take a couple of us out once in a while and get us tanked up.

"There were a couple of instances of criticism because of Vietnam, but I just said to myself, 'What the hell? I don't have to sink to their level,' and I walked away.

"Most of the time, it wasn't like that. If anything, it was almost the opposite. No

brass bands and parades or anything, but I remember walking into a deli in New York. I was wearing my leg brace, you know, and I was in uniform because I was staying at the hospital and still hadn't been discharged. But I walked in at noon when the place was packed. People were three deep at the counter and I'd get served first. Try to pay and you couldn't. Somebody'd already covered it.

"Bars were the same way. Just stop in quietly and order a beer, and before you know it, there's three or four beers there: Everybody's wanting to buy and the problem is how to get out of the place without getting loaded.

"It was nice, in that respect.

"My major complaint is that I wasn't counseled in any way," Colter said. "I would like to have been warned about the sorts of problems to expect.

"Nobody told me that because of the brace I wouldn't be able to walk on the beach with my kids. Or that I wouldn't be able to chase a kite with them. Those are little things," Colter said, "but dammit, they really get to you.

"I got divorced and went through a long period of anger, frustration and self-pity, and I was working on a pretty good drinking problem. There's a hotel room I can think of that has a real deep gash in one of its walls because of that. I'd been drinking and I was in one of my moods. I pulled the brace off my leg and threw it at the wall as hard as I could.

"The problems I had were predictable," Colter said, "and yet all any medical staff ever told me was, 'Don't worry about the brace. Your pants will cover it.'

"It's all a sonofabitch, and most of us don't get through it without help from somebody. I was lucky, in a lot of respects. Timing. The hospital. And some good friends. And I've spent some time with other vets in rap sessions at the center in Pawtucket.

"You do learn to live with it, but you don't forget any of it."

When a car backfires, Colter still jumps.

When the spring rain falls in torrents, he thinks about the monsoon in Southeast Asia.

And he has the same nightmare three or four times each month.

Each time, he wakes from his sleep pummeling and flailing the air. He is back on a green knoll in Vietnam trying to get out of his helicopter. The enemy soldier's 79 bullets had brought it down.

When the chopper lurched from the sky, the door gunner fell and let go of his weapon. Colter sees it still, a vision from the same nightmare: An AR-15 automatic rifle sticking straight up in an obscure green hillside.

The pilot and door gunner were left dazed and defenseless by the crash. Colter tried to stand, and it was only then that he realized he had been hit. "I slipped and crawled down the side of the helicopter, carrying my AR-15, and I tried to stand up, but I kept falling down. I don't know whether the guy was firing at me. I just don't remember. It all happened too fast. I stayed there on my belly, prone, about 100 feet away, and let go."

Colter's gunfire ripped through the enemy soldier in a ragged line that started in the dirt at the man's feet, ended in the air over his head, and left him collapsed in a lifeless pile of blood, flesh and bone.

The tension slipped from Colter then and he began to shake in a backwash of adrenalin. And pain. "That's when it really started to hurt," Colter said. "When it was over."

By Mr. BENTSEN:

S. 873. A bill to strengthen Federal programs and policies for combating international and domestic terrorism; to the Committee on Foreign Relations.

OMNIBUS ANTITERRORISM ACT OF 1981

● Mr. BENTSEN. Mr. President, the world continues to be plagued by acts of senseless violence. Last weekend another act of international terrorism took place in Bangkok and yet another American citizen was wounded. Earlier last weekend another airplane was hijacked and 8 of our citizens were among the 50 hostages taken. This kind of wanton attack on the citizens of this country, or of any nation, has to be brought to a halt and brought to a halt now. Today I am introducing my Omnibus Antiterrorism Act of 1981 to do something to prevent the reoccurrence of this kind of needless and merciless violence.

Mr. President, there have been more than 3,000 terroristic acts committed since 1968, 2,700 people have been killed and 6,000 wounded or hurt. In the aggregate these statistics make it appear that the problem has gotten out of control and that terrorists think they can attack innocent people wherever and whenever they want. A problem of international scope, such as this one, requires a unified policy for our own country and that will also provide leadership for other countries of the world. My bill provides for just such action.

But no national policy is going to deter any international terrorist unless it includes some provisions to make it clear that we intend to deal with them as they planned to deal with innocent people. My bill includes a provision which sets forth the terms under which the court can lock up a person charged with an act of terrorism, prior to their trial. Any person who undertakes, or plans to undertake, an act which is violent or dangerous to human life and is related to assassination, murder, sabotage, or kidnaping, ought to be prepared to wait in jail for action on their case.

I believe that every person in this country is entitled to due process of law but I also believe that any person who espouses their clear intentions to take violent action cannot be routinely set free to carry out their threats. I believe that if a person claims they are going to engage in such behavior we ought to believe what they say and stop them from carrying out that threat and killing or injuring innocent human beings.

While current Federal law provides penalties for the actual acts of terrorism, my bill will establish penalties for clear threats or plans to carry out terroristic acts. Whoever knowingly, willfully and maliciously, or with reckless disregard for the safety of human life, threatens to do a felonious act and who has an apparent determination and will to carry out the threat, can be fined, imprisoned or both.

The Members of the Senate may remember that in the spring of 1977, 12 terrorists virtually held our Nation's Capital hostage for 3 days. A news reporter was killed, a member of the City Council was shot and wounded and more than 120 people were held at gunpoint during the siege. Twelve people planning this kind of attack might have been stopped if we had prosecuted them for their plans. If we had, at least one man would still be alive and, with the penalties I recommend, these heinous criminals would still be in jail for the plan. As it is, even after a conviction on eight counts of armed kidnaping, conspiracy to commit armed kidnaping and assualt with a deadly weapon, at least one of these men is today walking the streets again. I do not want to ever see this kind of ludicrous situation arise again.

My bill also sets penalties for aircraft sabotage. It seems that terrorists have taken to kidnaping aircraft in order to make their demands known. I intend to fine these people up to $10,000 and lock them behind bars for 20 years if they damage, disable, or interfere with the operation of any aircraft. My bill would provide for the same penalties for the destruction of air navigation facilities or acts against crew members or passengers of an aircraft. I want the people who are planning this kind of violence to know precisely what will await them if they ever try to carry out their threats.

As I said earlier, we are dealing with an international problem here and it will take broader measures to be effective against international terrorism. My bill provides for a "hit list" of countries that support international terrorism. If a country chooses to support this kind of violence then we ought to make it clear that they are going to have to pay a price for it.

The first thing we will do, when a state is placed on this list, is immediately cancel the visas of students of that country who are studying in America. I am sick and tired of seeing those students, invited into our country to share in our educational system and to share our wealth and hospitality, turning right around and kicking us in the face. I am tired of those students protesting our Government, disrupting our citizens lives, and making us look like fools. If they are so convinced that they are right I will be the first to defend their rights to say what they believe. But if they are not citizens of our country then let them go back home and say it.

Placing a country on the list will also allow the President several other options for action, depending on the circumstances surrounding the support the country offers. First, the President can immediately withdraw all foreign aid to that country. He is given the authority to stop all checks that are not yet in the mail and to insure that no more are written until they get off the list. He can also cancel any pending or existing sales, credits, or guarantees of defense materials. He can cancel any current or future export licenses for commodities or technical data with military potential and he can withdraw any duty-free status extended to a country. America has long been supplying the world with goods and services from paper clips to ships. And we will remain committed to doing so, but only to those countries who join in the fight against the rising tide of international terrorism. Give these countries the choice: Take the terrorists, or take our aid.

My plans go further, Mr. President. Since so many of these incidents get their start from airports with inadequate security standards, I propose that we take things into our own hands and start to independently assess the adequacy of security at foreign airports. My bill requires DOT to survey foreign airport security and to report to Congress. Where we find inadequate precautions we will notify the appropriate country and give them 60 days to get up to standard. If they do not we will post the names of these airports in all American airports and the Secretary of Transportation will be authorized to withdraw the operating authority of U.S. airlines to that airport.

In order to encourage foreign countries to get up to standard, this bill authorizes DOT to give technical assistance to the foreign country but also allows us to receive reimbursement for our expenses in doing that.

My legislation also helps coordinate Federal action on terrorism by providing a report, developed by the administration, on the state of our ability to deal with terroristic incidents. Further, after a new incident does occur, the President is to provide a report to the Congress, on the adequacy of our response to the action and to recommend legislation to alleviate further incidents arising from the same circumstances.

Again, since this is an international problem, the proposed legislation encourages the President to seek international agreements to assure more effective international cooperation in combatting terrorism and allows him to offer substantial U.S. assistance in developing such agreements.

Mr. President, I fear that if we do not take steps, and take them soon, that the twisted minds of those people who plan these inhumane acts of senseless violence will sense that they are free to act at will. My bill will signal to them that the retribution will be sure and swift and that those countries who might have given them refuge will be placed on notice that the United States of America will not tolerate any more support for them. I hope the Senate will act quickly on my bill so that we can turn this situation around.●

By Mr. GORTON (for himself, Mr. JACKSON, Mr. MCCLURE, and Mr. METZENBAUM):

S. 874. A bill to provide for additional protection of steelhead trout as a game fish, and for other purposes; to the Select Committee on Indian Affairs.

DECOMMERCIALIZATION OF STEELHEAD TROUT

Mr. GORTON. Mr. President, the bill I am introducing today—the Steelhead Trout Protection Act—will provide the protection from commercial exploitation that our Nation's finest game fish deserves.

For roughly 50 years, the State of Washington treated steelhead trout exclusively as a game fish and enforced its laws on that subject almost without exception. In 1974, a Federal district court limited that enforcement to non-Indians. Since that date, with increased commercial fishing by treaty Indians, the steelhead harvest has not only declined substantially, but the cost of enforcing a dual system has exceeded the entire gross value of the commercial Indian steelhead catch.

Mr. President, steelhead is basically a sea-run form of the rainbow trout which migrates to the ocean where it feeds for 1 to 4 years before returning to its parent stream to spawn. Most wild steelhead in Washington State spend 2 years in a stream, reaching a size of 6 to 8 inches, before making their ocean journey. After spending 2 years in the food-rich marine environment, most steelhead return as 6- to 8-pound adults. A few fish may remain in the ocean for 3, or even 4 years, reaching adult sizes of over 30 pounds.

There are two major races of steelhead found in the State of Washington. Winter-run steelhead enter freshwater as adult fish from November through June, peaking in numbers in December and January. They inhabit most streams in western Washington which drain into Puget Sound or the Pacific Ocean. Summer-run steelhead usually enter freshwater as adult fish from May through September, although a few leave the ocean as early as February and may remain in the parent stream up to a full year before spawning. Summer-run steelhead are found in limited numbers in some Puget Sound and coastal rivers and in larger numbers in the Columbia River system.

Steelhead are highly prized by sports fishermen and are considered to be the finest trophy trout. There are approximately 130,000 anglers who fish for steelhead in the State. These anglers fish an average of 4.54 days to catch one steelhead and spend $103.47 in pursuit of each steelhead creeled, according to 1977 harvest data.

There are approximately 180 streams with fishable populations of steelhead, but only 35 major streams provide an annual harvest of over 1,000 fish each.

Few steelhead are caught in the ocean by recreational or commercial fishermen. The fisheries for this species usually takes place in the parent stream, where they are so avidly sought by recreational fishermen.

In 1925 steelhead were classified as "game fish" by the State legislature, thus prohibiting their commercial catch in freshwater. In 1933, when the present Department of Game was formed, renewed efforts were made by sportsmen and conservationists to make steelhead a game fish in both fresh and saltwater.

This was accomplished by the newly formed Game Commission which prohibited the commercial taking or sale of steelhead.

In 1974, Federal district courts in both Oregon and Washington held that treaty tribes have a right to harvest half of the salmon and steelhead. It permitted treaty Indian fishermen to commercially fish for, and sell, steelhead trout in the State of Washington. That decision was modified by the Supreme Court in 1979 without affecting the treaty Indian right to fish commercially for steelhead.

The Federal Government itself spent over $700,000 last year simply to help manage the resulting dual system. Those costs are greater than the commercial value of the resource being caught by the Indians. That value is small when compared to the far greater harvest of salmon. Moreover, the management system is unable to divide the harvest on an equal basis between treaty tribes and the sportsmen. The following table shows the steelhead harvest division for seven major rivers in western Washington during the 1979–80 fishing season:

River	Indian	Non-indian
Elwah	1,346	153
Hoh	2,994	1,526
Nisqually	1,599	2,764
Queets	2,298	473
Quileutee	5,864	4,708
Quinault	4,207	160
Skagit	4,199	3,152

My bill would, first of all, decommercialize steelhead trout—that is it would designate steelhead as a national game fish and make its commercial interstate transportation illegal under Federal law. Second, the bill puts all fishermen in the State on an equal footing, making State laws and regulations governing the harvest, transportation and sale of steelhead applicable to treaty Indian fishermen, just as they are to every one else. Thus, the bill addresses the problem completely, cutting off the entire commercial market and allowing the State to prohibit the commercial gillnet fishery.

Mr. President, I would like to point out that this bill in no way affects the tribes treaty rights of access to fish at their usual and accustomed places (United States against Winans), nor can treaty fishermen be required to pay general State licensing fees to engage in the fishery (Tulee against Washington).

Furthermore, I do not believe that a taking of any treaty right results from this bill. As the U.S. Supreme Court clearly pointed out, the tribes' treaty right is only for that quantity of anadromous fish that will provide them with a "moderate standard of living." This bill does not affect the tribes' rights to commercially harvest the far more abundant salmon resource or affect their ability to obtain a moderate standard of living from their treaty share of salmon. Nevertheless, a section has been added to the bill to address any claim of a taking.

It is important to note that this bill provides the States the flexibility to recognize unique or hardship situations that treaty tribes might find under this bill. The bill allows the States to enter into written agreements with a tribe to establish different laws or regulations as to the taking and possession—but not sale—of steelhead trout by tribal members on Indian reservations.

Mr. President, the sportsmen who seek steelhead trout have waited long enough. The steelhead resource itself has waited long enough. This is simply not a species which is appropriate for commercial harvest or sale. This bill recognizes these facts—it makes steelhead the national game fish that it should be, available to all people on an equal basis.

By Mr. HAYAKAWA (for himself and Mr. CRANSTON):

S. 875. A bill to authorize the generation of electrical power at Palo Verde Irrigation District Diversion Dam, California; to the Committee on Energy and Natural Resources.

PALO VERDE IRRIGATION DISTRICT, CALIFORNIA

Mr. HAYAKAWA. Mr. President, I am introducing today together with my colleague from California, Senator CRANSTON, legislation that will permit the Palo Verde Irrigation District in California to construct a hydroelectric generating plant at the Palo Verde Diversion Dam on the Colorado River. The Water and Power Resources Service constructed the dam in 1957 to replace an aging, temporary structure which the district used to divert water from the Colorado to irrigate its more than 100,000 acres in the Palo Verde Valley in southern California.

In those days of energy abundance, it was not practical to include generating facilities at small, low-head dams so the authorizing legislation retained the exclusive right to develop the energy potential with the Federal Government. Today, as we make every effort to declare our independence from foreign energy resources, it is essential that every promising source be developed, particularly when that source is clean, pollution-free hydroelectric power.

While this is a small plant, producing perhaps 50 to 60 million kilowatts of energy each year, the many possibilities of constructing these small plants throughout the United States will make significant inroads on the necessity of purchasing foreign petroleum.

This legislation will specifically permit the Palo Verde Irrigation District to utilize the Palo Verde Diversion Dam and any necessary related facilities for the development, generation, transmission, and disposal of electric power and energy notwithstanding the provisions of the 1954 legislation which retained the exclusive right in the United States. The district has already retained engineering consultants to undertake the study and design of the project and the Water and Power Resources Service has advised us that they have no objection to the district's proposal.

We strongly support the district's plans and hope that it can be considered quickly by Congress so they can proceed without delay.

ADDITIONAL COSPONSORS

S. 267

At the request of Mr. INOUYE, his name was added as a cosponsor of S. 267, a bill to amend title 28, United States Code, to provide that the Federal tort claims provisions of that title are the exclusive remedy in medical malpractice actions and proceedings resulting from federally authorized National Guard training activities, and for other purposes.

S. 270

At the request of Mr. SCHMITT, the Senator from Missouri (Mr. DANFORTH), the Senator from Wyoming (Mr. SIMPSON), the Senator from Indiana (Mr. LUGAR), and the Senator from Alabama (Mr. HEFLIN) were added as cosponsors of S. 270, a bill to amend the Communications Act of 1934 in order to encourage and develop marketplace competition in the provision of certain radio services and to provide certain deregulation of such radio services, and for other purposes.

S. 351

At the request of Mr. WALLOP, the Senator from Idaho (Mr. SYMMS), the Senator from Oklahoma (Mr. NICKLES), and the Senator from Minnesota (Mr. BOSCHWITZ) were added as cosponsors of S. 351, a bill to amend the Federal Mine Safety and Health Amendments Act of 1977 to provide that the provisions of such act shall not apply to the surface mining of stone, clay, and sand work.

S. 360

At the request of Mr. WEICKER, the Senator from North Dakota (Mr. BURDICK) was added as a cosponsor of S. 360, a bill to amend the Internal Revenue Code of 1954 to improve productivity and employment by promoting capital investment in small business, and for other purposes.

S. 391

At the request of Mr. CHAFEE, the Senator from Oklahoma (Mr. NICKLES) was added as a cosponsor of S. 391, a bill to amend the National Security Act of 1947 to prohibit the unauthorized disclosure of information identifying agents, informants, and sources and to direct the President to establish procedures to protect the secrecy of these intelligence relationships.

S. 613

At the request of Mr. THURMOND, the Senator from South Dakota (Mr. ABDNOR) was added as a cosponsor of S. 613, a bill to amend section 1951 of the United States Code, and for other purposes.

S. 622

At the request of Mr. INOUYE, the Senator from California (Mr. CRANSTON) was added as a cosponsor of S. 622, a bill to control the export of hazardous wastes.

S. 664

At the request of Mr. CHILES, the Senator from Oklahoma (Mr. BOREN), and the Senator from Arizona (Mr. DECONCINI) were added as cosponsors of S. 664, a bill to amend section 481(d) of the Foreign Assistance Act of 1961.

S. 732

At the request of Mr. NUNN, the Senator from Oklahoma (Mr. BOREN) was added as a cosponsor of S. 732, a bill to insure the confidentiality of information filed by individual taxpayers with the Internal Revenue Service pursuant to the Internal Revenue Code and, at the same time, to insure the effective enforcement of Federal and State criminal laws and the effective administration of justice.

SENATE JOINT RESOLUTION 10

At the request of Mr. HUDDLESTON, the Senator from Kansas (Mr. DOLE), the Senator from Missouri (Mr. EAGLETON), the Senator from West Virginia (Mr. RANDOLPH), the Senator from Nebraska (Mr. EXON), the Senator from Virginia (Mr. HARRY F. BYRD, JR.), the Senator from Oregon (Mr. HATFIELD), the Senator from New Jersey (Mr. WILLIAMS), the Senator from Indiana (Mr. QUAYLE), and the Senator from Delaware (Mr. BIDEN) were added as cosponsors of Senate Joint Resolution 10, a joint resolution to establish a Commission on Presidential Nominations.

SENATE JOINT RESOLUTION 12

At the request of Mr. INOUYE, the Senator from New Mexico (Mr. DOMENICI), the Senator from Iowa (Mr. GRASSLEY), and the Senator from Kansas (Mr. DOLE), were added as cosponsors of Senate Joint Resolution 12, a joint resolution to authorize and request the President to designate November 14 of each year as "Operating Room Nurses Day."

SENATE CONCURRENT RESOLUTION 9

As the request of Mr. DOMENICI, the Senator from Nevada (Mr. CANNON) was added as a cosponsor of Senate Concurrent Resolution 9, a concurrent resolution revising the congressional budget for the U.S. Government for the fiscal years 1981, 1982, and 1983.

At the request of Mr. DOMENICI, the Senator from Ohio (Mr. METZENBAUM) was withdrawn as a cosponsor of Senate Concurrent Resolution 9, supra.

AMENDMENT NO. 27

At the request of Mr. GLENN, the Senator from New York (Mr. MOYNIHAN) was added as a cosponsor of amendment No. 27 proposed to Senate Concurrent Resolution 9, a concurrent resolution revising the congressional budget for the U.S. Government for the fiscal years 1981, 1982, and 1983.

AMENDMENT NO. 29

At the request of Mr. BUMPERS, the Senator from Maryland (Mr. SARBANES), the Senator from Arkansas (Mr. PRYOR), the Senator from Michigan (Mr. RIEGLE), the Senator from Nebraska (Mr. EXON), the Senator from Arizona (Mr. DECONCINI), the Senator from Vermont (Mr. LEAHY), and the Senator from Missouri (Mr. EAGLETON) were added as cosponsors to Amendment No. 29 intended to be proposed to Senate Concurrent Resolution 9, a concurrent resolution revising the congressional budget for the U.S. Government for the fiscal years 1981, 1982, and 1983.

SENATE RESOLUTION 107—ORIGINAL RESOLUTION REPORTED WAIVING CONGRESSIONAL BUDGET ACT

Mr. PERCY, from the Committee on Foreign Relations, reported the following original resolution, which was referred to the Committee on the Budget:

S. RES. 107

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to the consideration of S. 786, a bill authorizing United States participation in the Sixth Replenishment of the Resources of the International Development Association ("IDA"), authorizing United States participation in the African Development Bank ("AFDB"), and for other purposes. Such waiver is necessary to allow the authorization of appropriations for fiscal year 1981 for the first installment of the United States contribution to the Sixth Replenishment of the Resources of the International Develop-

ment Association and the first portion of the United States subscription to the capital stock of the African Development Bank.

Compliance with section 402(a) of the Congressional Budget Act of 1974 was accomplished prior to May 15, 1980, by the action of the Committee on Foreign Relations in reporting S. 2422, a bill containing authorization language identical to that contained in S. 786. S. 2422 was passed by the Senate on June 16, 1980, by a vote of 53 to 24, but due to the failure of the House of Representatives to take final action on S. 2422, the legislation has had to be reintroduced in the 97th Congress and reconsidered by the Committee on Foreign Relations and the Senate. The Committee on Foreign Relations reaffirmed its decision taken in 1980 by ordering S. 786 reported favorably with amendments conforming the bill to S. 2422 as passed by the Senate on June 16, 1980. In order for the Senate to proceed to consider S. 786, it is necessary to waive the requirement that S. 786 have been reported prior to May 15, 1980.

Authorization of appropriations for fiscal year 1981 is necessary in order for the United States to participate in the Sixth Replenishment of IDA prior to the commencement of fiscal year 1982. The internationally negotiated replenishment of IDA cannot become effective without congressional authorization of the full United States contribution and appropriation of the first installment of the United States contribution. Fourteen other donor nations provided temporary advance contributions to IDA pending completion of United States legislative action on IDA–VI, enabling IDA to continue lending through March 1981.

Other donors have stated that they will provide no additional "bridge financing" until United States legislative action is completed. Administration testimony states that prompt congressional action is necessary in order to avoid a lapse in IDA lending and potentially severe impacts on United States foreign policy and the international economy.

Authorization of appropriations for fiscal year 1981 is also necessary in order for the United States to join the African Development Bank when other non-African countries join, which is expected to occur in May. If the United States is not prepared to join when other non-African countries are admitted to membership, the United States will be unable to name a United States citizen to the Board of the AFDB and United States companies, which currently win about 9 per centum of AFDB financed procurement, will lose the opportunity to bid for procurement financed by AFDB, until after the United States joins the Bank.

NOTICES OF HEARINGS

SUBCOMMITTEE ON ENERGY REGULATION

Mr. HUMPHREY. Mr. President, for the information of the Senate and the public I would like to announce a change in the scheduling of a public hearing before the Subcommittee on Energy Regulation.

The hearings previously scheduled for Wednesday, April 22 and Thursday, April 23, 1981, on amendments to the Powerplant and Industrial Fuel Use Act are rescheduled for Friday, April 24, 1981, beginning at 9:30 a.m. in room 3110 of the Dirksen Senate Office Building.

Those wishing to testify or who wish to submit written statements for the hearing record should write to the Committee on Energy and Natural Resources, Subcommittee on Energy Regulation room 3104, Dirksen Senate Office Building, Washington, D.C. 20510.

For further information regarding the hearings, you may wish to contact Mr. Howard Useem or Ms. Marilyn Burkhardt at 224–5205.

SUBCOMMITTEE ON HOUSING AND URBAN AFFAIRS

Mr. LUGAR. Mr. President, Senator GARN and I would like to announce the first set of hearings for the Housing and Urban Affairs Subcommittee on the reauthorization housing programs.

The hearings will be held in room 5302 of the Dirksen Senate Office Building:

10 a.m., April 7, the Federal role in home finance. An exploration of the Federal role in secondary financing markets, alternative mortgage instruments, FHA mortgage insurance and meeting the home finance needs of the eighties.

9 a.m., April 21, reauthorization hearing. General testimony on the issues to be considered in the housing amendments of 1981 by Secretary Pierce and others.

9 a.m., April 22, assisted housing. Consideration of various proposals to reform the section 8 program and the other Federal subsidized housing programs.

9 a.m., April 23, regulatory reform. A discussion of the ways in which regulation increases the cost of housing, of the manner in which Federal regulation has reduced the effectiveness of the community development block grant program, and methods for reducing the cost of compliance with Federal regulations.

9 a.m., April 24, housing block grants. An exploration of the opportunities offered by housing block grants.

We invite interested parties to submit testimony for the record.

SUBCOMMITTEE ON FOREIGN AGRICULTURE POLICY

Mr. BOSCHWITZ. Mr. President, I wish to announce that hearings have been scheduled before the Agriculture Subcommittee on Foreign Agricultural Policy on the subject of U.S. agricultural exports. Agricultural exports have been one of the bright notes in our balance of trade picture, and the subcommittee has invited distinguished representatives of business and commodity groups to give an overall perspective of the U.S. agricultural export business, and what they foresee in the future for an increased export volume.

The hearings will be held on Wednesday, April 8, beginning at 10 a.m., in room 324, Russell Building. Anyone wishing further information should contact Denise Alexander of the Agriculture Committee staff at 224–0014.

ADDITIONAL STATEMENTS

THE ECONOMIC WISDOM OF ARTHUR OKUN

● Mr. KENNEDY. Mr. President, a year ago last month, the death of Arthur Okun deprived the Nation of one of its most brilliant and articulate economists.

At the time of his death, Mr. Okun had virtually finished the manuscript of a major new analysis of our economic crisis. That manuscript was prepared for publication by his colleagues at the Brookings Institution, and has just been published.

Mr. Okun's book, "Prices and Quantities," is a major contribution to our better understanding of the complex economic issues we are facing this year. I believe his analysis will be of interest to all of us, and I ask that an announcement by the Brookings Institution summarizing highlights of the publication may be printed in the RECORD.

The announcement follows:

[From the Brookings Institution, Mar. 26, 1981]

"ARTHUR OKUN'S LAST STUDY EXPLAINS FAILURE OF TRADITIONAL POLICIES TO CURB INFLATION"

During the past decade, efforts to manage aggregate demand have done little to slow inflation even in times of economic slack. It seems clear that economists' traditional assumptions about short-run wage and price flexibility are no longer valid for most of the industrial world, since inflation remains quite unresponsive to shifts in macroeconomic policy. What is going on?

Before his untimely death in March 1980, Arthur M. Okun had nearly completed a comprehensive study of key aspects of stagflation that have defied explanation by either Keynesian analysis or monetarist and "rational expectations" models. Brookings will publish the 367-page study, titled Price and Quantities: A Macroeconomic Analysis, on March 26. Some highlights follow.

Okun addresses the most critical controversy in modern economics: Why do wages and prices respond so sluggishly to changes in market conditions? This failure to respond quickly and easily to monetary and fiscal restraint is what makes inflation so stubborn and so painful to reduce.

One school of thought emphasizes the responsibility of inflationary expectations, built up through a long history in which monetary and fiscal policy failed to exert the necessary discipline over markets. While not denying a role to such expectations, Okun provides a comprehensive analysis of why it is in the very nature of wages and prices in most modern labor and product markets not to respond easily and quickly to changes in economic conditions. When demand falls in those markets, it is output rather than prices and wages that declines. Okun documents the microeconomic foundations that underlie the inertia of inflation. He concludes that demand restraint must be supplemented by an incomes policy and other devices to speed up the inherently sluggish response of wages and prices.

Okun depicts a world in which administered prices cover most of the economy. They are basically cost-oriented, made by adding a markup to cost. Rather than an evil manifestation of monopoly, these cost-oriented prices represent an efficient adaptation of society to a world of thousands of complex products with varying characteristics. Continuous shopping for absolutely the best bargain doesn't pay. Consumers build up loyalty to and knowledge about particular supplies. Suppliers in turn keep customers by treating them fairly, and treating them fairly means closely relating prices to costs. Paradoxically, in a world of free markets it is not good business to charge all this market will bear.

In such a world, a slump offers a businessman little incentive to search for bargain-hunters. He knows that if he finds them he will not be able to hold onto them when times improve. Similar incentives to maintain long-run customer relations keep a businessman from trying to squeeze out the last penny during a boom. As a result, cost-oriented markup pricing holds down inflation in its early stages. It makes inflation slow to start but also hard to stop.

This is all the more true in labor markets, where employers and employees have investments in each other and in the job. Costs incurred for training and experience pay off best for both parties only if the worker con-

tinues to work for the same employer. Personnel managers in both union and nonunion shops look to the long run. They recognize that taking advantage of a weak labor market by cutting wages below the accepted norm will earn a high quit rate and rapid turnover when the labor market tightens. As a result, firms often keep more workers than they need during a slump in sales. If things get worse, they will lay off low-seniority workers and close the hiring window rather than cut back on wages, even without a union to force them.

The implicit contract that avoids wage-cutting is an efficient means of cementing career relationships between workers and employers. It embodies fairness, reflected in wages following other wages and wages responding to the cost of living. But again, it makes inflation very hard to uproot once it has started.

Okun characterizes the implicit contracts in both career labor markets and customer product markets as an "invisible handshake." While such business practices are efficient for firms, they complicate management of the economy as a whole. The growing importance of implicit contracts has increased the number of markets in which wages and prices are insensitive to short-run changes in the demand for labor and goods. In these circumstances, restrictive monetary and fiscal policies have the undesired effect of reducing output and increasing unemployment while doing little to slow inflation.

Americans use dollars as their score-keeping system, their planning and costing system, and their means of setting prices. There is only one objective way for a business to find a cost, and that is to learn what it has already paid out. Historical costs are the only kind of measure an accountant can deal with. But they become inappropriate in an inflationary world.

As people realized that the world had become inflationary and that even recessions would not drive inflation down, they began to adapt their institutions and practices. We saw not only a shift to so-called LIFO inventory accounting but also a shift to LIFO pricing. Automobile prices that had been keyed to the model year now change monthly and weekly. Firms that had accepted fixed-price orders for products a year or two in advance, or even decades in the case of Westinghouse, abandoned that practice.

We began to index. With cost-of-living escalators in wage contracts and with even prices geared to the cost of living, the CPI—with all its mortgage and medical care weights—has become an alternative to the dollar yardstick. But without confidence in the stability of money, our economic system could never have progressed beyond the primitive stage of barter. The cost of inflation is impairment of that confidence and a retrogression toward barter—a crawl away from money.

Because indexing guarantees that inflation that gets into one part of the system will spread through the rest all the faster, any such adaptation to inflation is not a cure but part of the disease. Prompt and comprehensive indexing throughout the economy is an impossibility. Partial indexing in most circumstances contributes to inflation and in all circumstances makes it more inequitable.

Indexing of wages is sometimes recommended as a way to improve equity. That argument ignores the fact that if workers are granted indexed wages, the prices of the goods they produce will respond much more to any acceleration of consumer prices. Disturbances in the real incomes of workers who are not indexed will be magnified. Everyone who gains assurance of keeping up with the cost of living adds to the price level risk of those who remain uninsured. Thus, indexing creates a hot potato that can be passed from one group to another but cannot be cooled off.

Because indexing offers no escape from inflation, public policy must aim at stabilizing the value of money and resolving the conflict between stable prices and maximum production. Okun rules out supply-side economics as a useful solution, however important it may be from other standpoints. The links in the chain of supply-side effects—from increased capital formation, to increased productivity, to competition that lowers prices, and to the consequent feedback on wages—are too long and too fractional to affect the inflation rate by substantial amounts, even over a five-year period. Okun suspects that curbing inflation would do more to revive productivity than a direct stimulus to productivity could do to slow inflation.

He recommends a diversified attack on inflation built around fiscal-monetary restraint, microeconomic actions affecting prices and costs, and incomes policies. Fiscal-monetary policies should aim to slow the growth of nominal GNP along a path consistent with slowing inflation. Taken alone, such a commitment would slow wage increases or price markups only very gradually, but it would support bond prices, reduce the attractiveness of gold and real estate as inflation hedges, and otherwise help renew confidence in money.

The second part of a diversified strategy would cut into inflation through the government's microeconomic actions that directly affect prices and costs. Payroll taxes on employers, for example, work as hidden sales taxes on consumers. Like sales taxes, they add to prices. So do floors on agricultural prices, on pay for workers on government contracts, and regulatory floors on some transportation prices. Changes in these taxes and price floors do not simply produce one-time changes in the price level. They work themselves into the CPI and are perpetuated through the wage-price spiral.

Finally, Okun concludes that some form of incomes policy—or a series of incomes policies—will be necessary if inflation is to be tamed during the 1980s. In his judgment, tax-based incomes policies stand attractively on a middle ground between moral suasion and wage-price controls. Even the most wisely conceived tax-based incomes policy would be subject to leakages and to significant administrative costs. But Okun would expect it to shine as a paragon of efficiency in comparison to the social costs of unemployment and slack as a cure for chronic inflation.●

A KANSAN REASSURES THE NATION: DR. DENNIS S. O'LEARY

● Mr. DOLE. Mr. President, on Monday afternoon, the work of this body came to a sudden halt. The Senator from Kansas joined his colleagues off the Senate Chamber to watch television, and the horrifying events of that day. One by one they were reported. Understandably, some parts of the story were changed or contradicted, as others were sadly confirmed.

That evening, a numbed American public awaited the definitive medical report on our President, James Brady, Secret Service Officer Timothy J. McCarthy, and District of Columbia Policeman Thomas Delahanty. With his natural grace, professional demeanor, and unfailing patience, Dr. Dennis O'Leary, the dean of clinical affairs at George Washington University Hospital, reassured a distressed nation.

Dr. O'Leary grew up in Fairway, Kans., a suburb of Kansas City. He later attended Harvard College, and Cornell Medical School and has had an unusually distinguished career. Before his tenure at George Washington University Hospital, Dr. O'Leary was the director of the Coagulation Research Laboratory at Walter Reed Army Medical Center.

Needless to say, we Kansans are proud of the way Dr. O'Leary has handled himself in a difficult and necessarily high-profile situation. Yesterday morning the Kansas City Star published an insightful story on the doctor, and I ask that this article be printed in the RECORD.

The article follows:

DOCTOR'S EXPERTISE PUT HIM IN FRONT OF CAMERAS

(By Robert Engleman and Mark Fraser)

WASHINGTON.—Out of the anonymity of academic medicine emerges Dr. Dennis S. O'Leary, Shawnee Mission High School Class of '56, calm eye in a hurricane of national emergency and, for the moment at least a hot media property.

As a spokesman for George Washington University Hospital, where President Ronald Reagan is hospitalized along with two others who were wounded in Monday's assassination attempt, O'Leary has come off as if he were the president's press secretary instead of James Brady, who lies in the hospital with a critical head wound.

What struck a host of network commentators Monday afternoon was how this 43-year-old hospital medical director could walk into a lecture room full of seething Washington media—which had gone for hours with little information on the wounded president of the United States—and satisfy almost everyone with his informational delivery.

"Good job," presidential aide Lyn Nofziger told O'Leary after the news briefing. Friends called that night to tell him he had been "awesome."

It was not as if he had never spoken publicly before. O'Leary told The Kansas City Times on Tuesday afternoon in his first newspaper interview since the Reagan shooting. The debate team at Shawnee Mission was "a very good one," after all, and the hospital had had some media relations before someone tried to shoot the president.

O'Leary's father, Ted O'Leary, was a reporter for The Times in the 1940s and now writes book reviews for The Star. He also serves as a Midwestern correspondent for Sports Illustrated.

By coincidence, the elder O'Leary's first job was as a basketball coach at George Washington University, where his son now holds a top administrative post.

"This place is very crisis-oriented," Dennis O'Leary said. "We've been involved in every local disaster in the last 10 years. Maybe someday there'll be a mess-up, but so far nobody's let us down here."

Still, there never has been anything quite like Monday afternoon, when O'Leary and other hospital officials were interrupted at a routine meeting by a telephone caller relating the assassination attempt and the president's arrival at the university hospital.

"We all made a beeline for the emergency room, where the resuscitative effort was already under way," O'Leary said.

As dean of clinical medicine at the teaching hospital, O'Leary's assignment Monday was coordinating the four surgeons who worked on the president. In a meeting later Monday afternoon with White House aides Edwin Meese, James Baker and Nofziger and Sen. Paul Laxalt of Nevada, it was decided that only a physician could exode sufficient authority to satisfy the waiting media, and O'Leary was the only one with a complete picture of all the injuries and life-saving efforts.

"I've always known the major lecture hall, Room 101, but I had never seen it like this," O'Leary said of his nervous entrance into the makeshift press room. Reporters and equipment people were especially testy, he said, because they had not been allowed into the hospital and had been told nothing about the president's condition.

"I felt like I had stepped onto the planet Mars," O'Leary said. "There was this sea of 150 to 200 people, every one of them with some piece of equipment—cameras, flashbulbs, boom mikes, tripods. They were spread out in front of me 100 degrees. It was dazzling."

The White House had suggested prepared notes but O'Leary said: "That's not my style. It wouldn't have sounded as authentic."

Later, the doctor was glad to get positive reviews of the performance, but at the time, he said. "My goal was to begin it and finish it and not blow it too bad."

The new conference was so impressive to those who watched that at least one medical colleague said he fears it will hasten the day that the university loses O'Leary to some larger job.

"My fear is that at some point he'll end up with a national position," said Dr. Bryan Arling, who worked under O'Leary in the early 1970s. "He's that superior. He's just a superstar."

O'Leary laughed off that idea and said that he likes the hospital job and that only "something very special" would be able to take him away from George Washington University.

His wife, Dr. Margaret O'Leary, works at the hospital as an intern, though she is expecting a child within weeks. O'Leary has three other children by a former marriage.

He said he and his wife would like to make their home in the Midwest someday. His wife also is a Midwesterner, from Indiana.

"It's a superb city," O'Leary said of Kansas City. "I'd really like to live in the Midwest again."●

THE EMERGING FOREIGN POLICY OF THE REAGAN ADMINISTRATION

● Mr. METZENBAUM. Mr. President, on March 30, in an address to a meeting of the Jewish National Fund, Senator EDWARD KENNEDY raised a series of very important issues with regard to the emerging foreign policy of the Reagan administration.

Senator KENNEDY questioned the wisdom of our providing military assistance to a government in El Salvador that has failed to apprehend the killers of American nuns and labor union officials.

He expressed profound skepticism about an approach to South Africa that opens the way for Soviet gains in the rest of the African continent.

He spoke out strongly against alining this Nation once again with antidemocratic regimes in Latin America and elsewhere and he expressed his outrage at attempts in this body to play off poor children in America against the hungry people of the world.

But Senator KENNEDY's main theme was the administration's confused, contradictory, and counterproductive beginnings in the crucial area of Middle East policy.

Senator KENNEDY said:

The new administration has already done the wrong thing. They have embarked on the most excessive rearmament of the enemies of Israel in modern times. They have sent mixed signals on the Camp David peace process, claiming to support it while acquiescing in European efforts to undercut it. And instead, of a policy for energy security, the administration is pursuing a policy of increasing dependence on foreign oil.

Mr. President, I believe that Senator KENNEDY's thoughtful remarks should be brought to the attention of the Senate.

The statement follows:

ADDRESS OF SENATOR EDWARD M. KENNEDY, MARCH 30, 1981

Thank you, Rabbi Berkowitz.

This occasion has a special meaning for me. It is a privilege to be with so many friends at the 80th Anniversary assembly of the Jewish National Fund. And it is a particular privilege to meet with you in New York, which brings back many happy memories.

A year ago, in my presidential campaign, I had the honor to visit Rabbi Berkowitz and to appear before his congregation. I shall never forget that afternoon and the thousands who joined us in his beautiful temple. We shared our hopes for the country and our dreams for peace in the Middle East.

And two days later, in the New York primary, we won one of the greatest victories of our campaign. I was thinking of Rabbi Berkowitz, of so many of you, and of people like you when I recalled the poet's words at the Democratic convention in New York City and said: "What golden friends I had."

I also remember that day, fifteen years ago, when the Jewish National Fund dedicated the John F. Kennedy monument and Peace Forest in the Judean hills above Jerusalem. In 1975, I went to Israel to visit that monument again. I walked through the forest. I saw the miracle of that magnificent memorial—of millions of trees reaching out across Eretz Israel and stretching their branches under the sky of Zion. The living memorial of the Peace Forest commemorates not only the life of my brother, but the ideals for which he stood and the unbreakable bond between our two nations in which he so deeply believed. All those who contributed to the forest have heard and heeded the words of Leviticus: "Ye shall come into the land and ye shall plant."

I have an abiding admiration for the cause of the Jewish National Fund and your commitment to the Land of Israel. You have helped to transform the hard, unyielding rock and the wind-swept desert into acre after acre of fertile soil and mile after mile of flowing canals. Your work is truly God's work as you fulfill the ancient promise to Abraham and give beauty and bounty to the Holy Land of the Bible. As Rabbi Berkowitz has written: "No such attachment of a people to a land exists anywhere in the world. The relationship is unprecedented and without analogy. How can one understand or explain it? Perhaps the answer lies in the Bible, the first written record of the Union of Israel, the land and the people."

We meet this morning at a time of concern over the direction of our government's policy in the Middle East and in almost every other region of the world.

Before discussing the Middle East, let us look across the globe.

In El Salvador, the Administration has embarked on an unconditional military adventure that is clearly unnecessary and unwise.

We all oppose the shipment of arms into El Salvador from countries that are actual or potential adversaries of the United States. But we must not let their transgressions trap us in a wider war.

I believe we should halt all American military aid to El Salvador until strict conditions are met. There must be a complete investigation of the brutal murders in recent weeks of the American missionaries and two American labor representatives in El Salvador. There must be progress toward a negotiated solution. And there must be effective guarantees against any military coup. American aid must not be misused to maintain the power of a military dictatorship in El Salvador.

We must condemn the violence and the terror from whatever quarter they may come. But we must never give our support to a regime that stands by, while American nuns and American labor organizers are beaten and killed.

In other parts of Latin America, the Administration has put the United States on the side of the repressive regimes and ruthless dictatorships. That is wrong in principle, and it will not work as policy. I oppose the Administration's abandonment of human rights. We must never surrender America's heritage as "the last best hope" of people everywhere yearning to be free.

In Africa, the Administration has announced their plan to lift the Congressional ban on covert American involvement in Angola's civil war. And they have aligned themselves publicly with the Apartheid government of South Africa. Their policies are not only insensitive. They are inconsistent and they will prove to be ineffective.

How can any Administration that sees the Soviet Union as a threat adopt a policy toward South Africa that invites new Soviet advances into Angola and all the rest of Africa?

I oppose the Administration's sudden new detente with South Africa. That policy is an insult to all Americans who care about civil rights and human freedom. And I oppose any Administration plan to honor the leaders of South Africa with a state visit to the United States.

On foreign aid, we saw a cruel attempt last Friday on the Senate floor by supporters of the Administration to pit the sick and the hungry of the world against the school children of America. I do not believe that food should be a weapon of foreign policy or of budget policy. The economic condition of the United States is difficult but it is not so desperate that we must worsen the worst sufferings of our fellow human beings. We need not take crusts of bread from the hands of starving families in Africa and Asia in order to provide school lunches for children in America. That sort of false and selfish trade-off has never been American policy in the past, and I do not intend to let Senator Jesse Helms make it our policy for the future. America must be, as it has always been, a generous and not a callous country.

Nowhere are the stakes of foreign policy greater than in the Middle East.

Four days from now, the Secretary of State will travel to Egypt, Israel, Jordan and Saudi Arabia. Yet seldom in the last generation has there been greater uncertainty about American policy in that region of the world.

It is time for the United States to be clear about its objectives in the Middle East. And it is time for the United States to carry out these objectives consistently, reliably and effectively.

First, we must assure the security and prosperity of Israel, our strongest friend and surest ally in the entire region. We cannot and must not jeopardize Israeli security by supplying offensive arms to its mortal enemies.

Second, we must promote peace and stability in the Middle East. Israel and Egypt are strategic cornerstones in the broader peace we must seek. The Camp David Accords are a historic achievement. We cannot and must not set them aside in a futile effort to appease those sworn to an unholy war against the Holy Land of Israel. Nor can we allow the Soviet Union or its surrogates to undermine a just and lasting peace in the Middle East.

Third, we must achieve full energy security for ourselves and our allies, by reducing and finally eliminating the crushing burden of our dependence on foreign oil. We cannot and must not indenture ourselves indefinitely to the Arab oil barons, and open ourselves and our allies to Arab oil blackmail.

On each of these issues, the new Administration has already done the wrong thing.

They have embarked on the most extensive rearmament of the enemies of Israel in modern times. They have sent mixed signals on the Camp David peace process, claiming to support it while acquiescing in European efforts to undercut it. And instead of a policy for energy security, the Administration is pursuing a policy of increasing dependence on foreign oil.

Today energy security equals national security. Only by putting our energy house in order can we free our foreign policy from OPEC pressure. Only an energy-secure America can do what is in America's true interest. Only an energy-secure America can do what is right for the security of Israel and the Middle East.

The lesson of Iran is clear. We must assure our security and end our energy dependence before new and unpredictable events catch us short and unprepared again.

Energy security begins at home—with obvious steps that can and should be taken now. We must do all we can to cut our consumption of oil. Instead the Administration has decided to cut our conservation and solar programs. They want a deep slash of 75 percent in programs that could save 25 times as much oil as the nuclear subsidies they favor. I oppose the Administration proposal to increase nuclear subsidies while neglecting energy conservation.

Next, we must fill the Strategic Petroleum Reserve without delay to protect against sudden cutoffs of foreign oil—and our allies must do the same. If that reserve was filled, we could face the Arabs without flinching. This Administration has apparently decided to leave storage domes in Louisiana unfilled. That is a reckless gamble with out national security. The Administration must be on notice: we will not settle for a strategic reserve in name only that could sustain America's economy for only 20 days. There can be no retreat from that commitment.

We must also work with the less developed nations of the world to find new sources of oil. The World Bank has proposed a program of oil exploration outside the Middle East. It was wrong for the Administration to kill that program—and it is wrong to treat endless price increases as the substitute for a sound energy policy.

Energy independence is more than a matter of our own national security. On it will ultimately depend our hopes for peace and stability in the Middle East.

Those hopes are very much in danger now.

I oppose the Reagan Administration's decision to sell advanced military equipment with obvious offensive capability to Saudi Arabia. I agree with Rabbi Berkowitz that "submitting to Saudi Arabia's demands can only prove dangerous to Israel's security, perilous to the cause of Middle East peace, and hazardous to America's strategic interests."

I voted against the sale of 62 sophisticated F–15 fighter aircraft in 1978, because they would endanger the security of Israel. In fact, the F–15 sale generated so much concern that the Carter Administration promised explicitly to draw the line there—and never to increase the offensive capability of aircraft in the Saudi arsenal. Without those assurances, Congress would surely have disapproved the sale.

A new Administration must not repudiate the solemn obligations of the United States Government. We are not talking about some technical "enhancement" of the F–15. We are talking now about the most advanced Sidewinder missiles and about extra fuel tanks which would permit the Saudi F–15's to range far wider to attack the territory of Israel.

And we now learn that there is even more to come. The Administration is considering aerial refueling capabilities and AWACS planes to give Saudi Arabia not just early warning of attack, but a command platform in the air that could guide attacks against Israel. America must never give the Saudis or any other nation the power to defeat Israeli air defenses. And I pledge to oppose absolutely the AWACS plane sales to Saudi Arabia.

The Administration is pursuing a policy based on a false premise. More arms cannot buy or bribe the Arab states into a peace settlement in the Middle East. Just two weeks ago, two Saudi newspapers reacted to criticism of the latest arms deal by admitting—and I quote—that "the Saudi government does indeed plan to equip its army in order to liberate the plundered lands."

The Reagan Administration claims that it is pursuing an anti-terrorist strategy. Then let them stop selling offensive arms to Saudi Arabia, which spends nearly $400 a million a year to finance the terrorists of the PLO—and only last week gave the PLO another $27 million for joining the Taif declaration of holy war against Israel.

The Administration claims that it wants peace in the Middle East. Then let them stop selling offensive arms to Saudi Arabia, which fiercely opposes the Camp David peace process.

Instead of giving the Saudis a needless offensive military capability, we must recognize their real security needs. We must pursue a stable, independent and pro-western Saudi Arabia, but our relationship with the Saudis cannot be a one-way street. We are entitled to expect Saudi cooperation and not rejection of the peace process. We are entitled to expect the reality, not a charade, of oil price restraint and oil supply reliability in the Middle East.

Saudi Arabia does face an external threat from the Soviet Union, South Yemen and possibly Iran and Iraq. I support American supplies of the defensive arms to meet this threat. But of this we must be certain: that the defensive arms we supply to Saudi Arabia, Egypt, or other Middle East states must always be aimed in the right direction—and never against Israel.

That must be our policy on arms—and that must be our policy on oil. We must never barter the future and freedom of Israel for a barrel of Saudi oil.

Finally, the United States must reaffirm and revitalize its own commitment to the Camp David peace process. We must not permit our allies to undermine that process. The latest European initiative on the Middle East, as Abba Eban reminds us, can only encourage a radical hard line among the Palestinians. The PLO must never play a role in the negotiations until it has renounced absolutely and forever the oath to destroy Israel.

American policy must not only reject the wrong route to a negotiated peace. We must also reopen the right road to peace.

I call upon the Reagan Administration to appoint without delay a new special negotiator to succeed Sol Linowitz and to press ahead now with the discussions mandated by the Camp David Accords. At this time of change and turbulence in the Middle East, we cannot afford protracted delays in those negotiations. This week, on his trip to the Middle East, Secretary Haig must give his unequivocal endorsement of the Camp David process to Israel and to Egypt.

In a few weeks, Jews will be celebrating the Passover ceremony, teaching their children again of the liberation of the Jewish people. It is a dream as ancient as Moses and as modern as David Ben Gurion. It is a dream that still lives everywhere in Israel and in the John F. Kennedy Peace Forest, which stands on the ground where Jewish Freedom Fighters stood and died opposing Roman oppression two thousand years ago. Four times in the Book of Exodus, the pledge of liberty is made to the people of Israel. And four times during the Passover Seder, a cup of wine is raised to symbolize that pledge.

This year, when the cup is raised, let us renew our convenant with Israel and our own pledge of peace.

For peace is all that Israel asks.

Peace, as the prophet Micah wrote, so that "they shall sit, every man under his vine and under his fig-tree, and none shall make them afraid."

Peace, as the Torah teaches, so that "the desert shall rejoice and blossom as the rose . . . and they that wait upon the Lord shall renew their strength."

Let us pledge to pursue that peace together. Let us seek the age-old dream as a guiding star. Let us raise the cup of Passover, and say for all time: "Next year in Jerusalem." ●

NICARAGUA

● Mr. ZORINSKY. Mr. President, I view the administration's announcement regarding the issue of assistance to Nicaragua as a very positive act. It is finally the administration's acceptance of the principle that indeed it is in the best interests of the United States to furnish economic assistance to Nicaragua.

My colleagues may be wondering about what they have just heard from me, given my well-known position on Nicaragua. They may be wondering about such a statement, especially on the morning after the announcement of the administration's suspension of assistance because of the determination that Nicaragua is involved in assistance to the guerrilla left in El Salvador. The explanation is relatively simple.

The announcement in reality is nothing new. It is merely a continuation of the suspension of the $15 million in assistance announced several weeks ago, pending the State Department's further monitoring of developments. Of course, I could question why the determination is being made at this particular point in time when the State Department now openly admits that it has "no hard evidence of arms movements through Nicaragua during the past few weeks," and that the Nicaraguan response to U.S. efforts to get them to halt support of the guerrillas has been "positive."

I would rather, however, not dwell on this negative aspect of the questionable timing and evidence and concentrate on what I see as the very positive developments with regard to our present and future relationship with Nicaragua. The administration, by yesterday's action, is leaving the door open for further assistance to Nicaragua in recognition of the stake we have in helping the moderate forces in Nicaragua steer their nation on a pluralistic political and economic course.

By making the determination, the administration could have demanded immediate repayment of $40 million in loans but it did not. Another positive development is that the State Department is going to monitor the situation for the purpose of determining the resumption of assistance. The administration also is considering the resumption of other development assistance as well as vitally needed Food for Peace funds. Finally, for fiscal year 1982, the administration is proposing over $33 million in

economic assistance. All this is indicative that the administration's action coincides with the objectives that I fought so long and hard to attain in our Nicaragua policy. U.S. assistance funds are an important instrument to strengthen the moderate and democratic forces such as the private sector, that exist and continue to function in Nicaragua. If I and many of my colleagues on both sides of the aisle, had not been making these points last year, it would not have been possible for the State Department to have come to this position today. No doubt we are using the carrot in the case of Nicaragua, but the State Department has finally realized that the carrot cannot be allowed to decay to the point where it becomes valueless with regard to our policy interests.

I know that yesterday's announcement is being heralded by certain Senators as a final cutoff of funds to Nicaragua. They have worked hard to self-fulfill a prophecy that Nicaragua will go down the road to Marxism and ally itself firmly with Cuba.

This is indeed what will happen if we pull the rug out from under our friends in Nicaragua. But I have been contending, and now I am happy to see more resolve in the State Department on this point, that support of the moderate sectors of Nicaraguan political and economic life is a major tenet of our relationship with Nicaragua. The mechanism for supporting and strengthening this moderate sector is through the economic assistance program. Sixty percent of our foreign assistance to Nicaragua goes to the private sector so that the economic and political system has a chance of staying on a pluralistic course.

It is a constant struggle for these people in Nicaragua. They are locked in a struggle with radical elements who want to steer the Nicaraguan revolution to the far left. The private sector and other moderate elements have not given up and we cannot give up on them. They are staying in the battle and so should we through our economic support.

Yes, I see some very positive developments over what might be initially interpreted as a negative act by the State Department. I urge the administration to keep its objective focus on Nicaragua so that economic assistance, in all its facets, can quickly be resumed. That clearly is in the best interests of the United States in Nicaragua as well as in the entire Central American region.●

SUSPENSION OF AID TO NICARAGUA

● Mr. PELL. Mr. President, the administration's decision to officially suspend the remaining $15 million in economic assistance to Nicaragua causes me to question both the rationale and the timing of the action. The decision to invoke the legislative restrictions on assistance contradicts what the administration, both privately and publicly, has been saying in the past months with regard to Nicaragua's activity in El Salvador.

Administration officials have acknowledged that the flow of arms from Nicaraguan territory has slowed perceptively and that the Nicaraguan Government has taken concrete measures against those supporting the guerrillas.

Even yesterday's announcement by the State Department acknowledged that the United States has "no hard evidence of arms movements through Nicaragua during the past few weeks," and that the Nicaraguan response to U.S. pressures to stop assistance to the guerrilla left has been "positive."

If the administration was so certain that the Nicaraguans were that deeply involved in the flow of arms to the Salvadoran insurgent movement, why was the determination not made in those hectic days of January and early February?

Taking this action at this particular point in time when the Nicaraguans are obviously cooperating with us certainly is not in the best interests of the United States.

I realize that the administration's action is not all negative. The U.S. Government could have called for the repayment of $40 million in loans but it did not.

Furthermore, I am encouraged that the State Department has indicated that it will continue to monitor the situation with the intention to resume assistance, pending continued improvement of the situation. The indication that the administration is considering the resumption of Food for Peace and other development aid shortly is another hopeful sign.

This is the approach we should be taking. We need more of the carrot than more of the stick. We need to continue to support our friends in Nicaragua, those in the private sector and the others who are determined to see Nicaragua take a moderate pluralistic course.●

INTERVIEW WITH PAUL MAYCOCK

● Mr. KENNEDY. Mr. President, I would like to bring to the attention of my colleagues an excellent interview with Paul Maycock in a recent issue of Solar Times.

Mr. Maycock was formerly director of the Department of Energy's Photovoltaic Division. He was an excellent administrator in that position and I am optimistic that, under his leadership, the Renewable Energy Institute will develop into an effective, responsible voice of the renewable energy industry.

The interview with Mr. Maycock follows:

INTERVIEW WITH PAUL MAYCOCK

(As director of DOE's Division of Photovoltaic Energy Systems, Paul Maycock managed the nation's PV programs and acquired the reputation of a free-wheeling orator who would ride the lecture circuit in the cause of photovoltaics. Recently Maycock left DOE to take up the reins of the fledgling Renewable Energy Institute where he hopes to convert the concept of renewable energy from a social issue to a business commodity. He recently completed a book with Edward Stirewalt entitled: "Photovoltaics: Sunlight to Electricity in One Step" which is being published by Brick House. Interviewed by Solar Times correspondent Lyndon Stambler, Maycock spoke with candor concerning photovoltaic activities in this country.)

SOLAR TIMES. What are the most promising PV technologies?

MAYCOCK. The near term will continue to be sliced single crystal silicon. Next is the semicrystalline process being developed at Solarex, Crystal Systems in Boston, and Wacker in Germany. Instead of making a large single crystal, a large multi-crystal is produced and sliced. That cuts the crystal cost about in half. It also cuts the energy consumption significantly. If you can use a less pure material, the raw material cost can be cut by a factor of five. Solarex has announced a silicon purifying facility that makes solar grade silicon—not semiconductor grade—that will be cast into blocks and made into semicrystalline arrays.

SOLAR TIMES. PVs are competitive in remote areas. What are the main obstacles to making PVs competitive in the U.S.?

MAYCOCK. We have a very efficient utility system, using low cost coal that is heavily subsidized by the government, low cost nuclear heavily subsidized by the government, and oil. Assets were created with energy when it was cheap. Now, as utilities look at their new capacity, they find a new nuclear facility costs them 12c a kilowatt hour, a coal facility is 12c, and oil is 20c or 30c. They then look at renewables. They're finding that photovoltaics, wind, and other sources will break even in the next five years for central generation. The reason it is not competitive now is that we do not have large numbers of people using diesel generation for power. I'm not talking about backup diesel generators at a hospital or in someone's basement. I'm talking about diesel generators that run two-thirds of the time. And there are 10-million of those operating around the world, burning fuel at an average price of $2.50 a gallon.

SOLAR TIMES What about people who say PVs are a 21st century technology?

MAYCOCK. Some people are ignorant. Let me give them the benefit of a doubt. Often times they are referring to a 20% penetration and having it be as viable as coal or nuclear for baseload. They are not addressing the international market at all. They do not accept the concept of the distributed market at all. And if you take that bias, then they're correct. If you say: "When will photovoltaics have 20% of the central utility power in the United States and be fully economic against coal and nuclear?" it is a 21st century technology. But they're forgetting all the other markets that already are economic. Right now the first utility-owned and fully economic photovoltaic system will be about 1988. It will probably occur in California.

SOLAR TIMES. There are many approaches to cell production. Which applications will the different kinds of cells have?

MAYCOCK. I think it's analogous to the computer world. Four generations of IBM computers now are being used. You're going to have a mix of technologies. You can buy cadmium sulfide today. You can buy ribbon today. You can buy semicrystalline and you can buy single crystal. Low efficiency, very low cost devices will be used where you have low cost indigenous labor for installation and low cost land. You go to high efficiency where you have maximum cost of land, maximum labor, and so on. There's always going to be a group of conservatives who are going to buy the tried and true old thing. And there's going to be a group of entrepreneurs who will buy the new. We'll see about five generations of product before we get to the end point.

SOLAR TIMES. What is the time frame?

MAYCOCK. I envision roughly three cycles. The present cycle is all silicon with some crystallinity. This first cycle will peak between now and 1985. Starting about 1983, you will see concentrators and films beginning to get market share. They'll peak between 1983 and 1988. Then the last cycle will start around 1985 with very efficient concentrators; 25 to 40% efficient. And inexpensive 15% films. The silicon single crystal will disappear and it will be films and concentrators. That will be the pot of gold.

SOLAR TIMES. Do you think that a lot of companies are taking a wait-and-see attitude toward PV development?

MAYCOCK. If you call putting $40-million a year into PVs wait-and-see. There really are two approaches. One is to go all the way to the market place and gain market share right now. Clearly Lindmayer is doing that at Solarex. Arco appears to be playing that strategy. They're shipping a megawatt this year. There's another strategy that says, spend a lot of money, but be sure you've got the technical hook for the next generation. That appears to be what Solar Power is doing. Now the second phase is the group of companies that are investing heavily but are not aggressively marketing for market share. They're turning away orders. That's Mobil-Tyco. Motorola has purposely kept its plant at a very small capacity while it learns about the market. The third strategy is curiosity. Look around, spend some money, and watch for the real breakthrough. An example, which most people don't even know about, is Eastman Kodak. Eastman has several professionals working on film devices. Their minimum sized plant will be a gigawatt because films come out that way.

SOLAR TIMES. Will it be easy to enter the market later on?

MAYCOCK. Take Westinghouse as an example. Been doing research on dendritic web forever; had one or two pullers getting pretty good quality web; pretty good throughput; and if you run it through the computer it looked cheaper than anything else. What did they do? They said if we could take a couple utilities—and they went to four—and get them to give us a long term commitment to buy at a price and performance, we don't need any other customers. So they announced with Southern Cal Edison and PG&E a 10 year program to produce 25 gigawatts a year. Twenty-five nuclear reactors a year worth with only two customers. That gives management a real warm feeling.

SOLAR TIMES. You talk about the effect of concentration on the industry. Can you comment on that?

MAYCOCK. At the moment it's not concentrated, but it will go through the 300 company proliferation and then collapse back down to a handful of key players. This is a commodity. You're not going to have more than five players with 80% of the market when we get to $10-billion a year. I'm talking about array manufacturers.

SOLAR TIMES. What kind of market penetration do you see in the U.S. by 1990?

MAYCOCK. It's awfully hard to forecast. It will probably be about one-fifth of a quad. By the mid 1990's it will be between one and five quads.

SOLAR TIMES. Who are the cell producers, what share of the market do they have, and who will be the winners?

MAYCOCK. The latter I can't predict, but the producers and their market shares are listed in my book. It's rapidly changing.

Right now Solarex is number one and Arco and Solar Power are a close number two. Number three is pretty hard to pin down. There are a lot of companies with very similar production levels. It's hard to measure the newcomer Semix. It's a genuine independent company, with an independent product and it will probably be number three by next year. The one I have a hard time sorting out is the real production capacity of Mobil-Tyco. I believe they shipped 200 KW last year—that's much more that most people would allow—and that they're capable of shipping a megawatt this year. Capacity additions are coming: Solarex has announced 25 MW. Semix has annonuced 25 MW. Capacity additions are coming at two or three times the market. If very many companies do that, were virtually assured that the market's going to double every year as forecast. The mix is going to change very quickly.

SOLAR TIMES. What about people who say at the Renewable Energy Institute and how will you bridge DOE and REI?

MAYCOCK. The same sort of goals that I had for photovoltaics. I want to have a no nonsense spokesperson for all of the renewable options. But I do not want to distort their present cost, their present capabilities, or their present problems. I want to treat it as a business venture. I think if we do that we can get around the antinuclear mystique, the environment mystique, and some of the things that obviously are going to bother the Reagan Administration. The reason I wanted to do it through a non-profit research institute was because that is something other than the government doing it and I think that's what the Reagan Administration is saying: all right industry, put up or shut up.

SOLAR TIMES. Many people have commented on the social impact of solar. Is anyone listening?

MAYCOCK. Not as much as the Amory Lovins of the world would want you to. I think it's primarily indicated by the fact that I can't find a representative who got elected on solar energy. And if the people were listening to the solar advocates, there would be a half dozen representatives who got elected on the cause of solar energy. There are very few true solar advocates around in the Congress. Ottinger is one of the few that genuinely appears to be a solar advocate. Gary Hart appeared for awhile that he might be, but he's more defense spending than he is solar. If the advocates were getting through, you'd expect that advocacy to show up in the representative part of the government, and it hasn't shown yet.●

THE INACCURACY OF CONGRESSIONAL BUDGET OFFICE FORECASTS

● Mr. JEPSEN. Mr. President, in recent days we have heard a lot of talk from the Congressional Budget Office about the implausibility of the Reagan administration's forecast of how the economy will respond to its economic program.

I would like for my colleagues to keep in mind that when the CBO criticizes the administration's economic forecasts it speaks from a forecasting record which is hardly noteworthy. According to a recent study of CBO's forecasting record by the U.S. Chamber of Commerce, CBO's forecasting record is very poor indeed. For this reason, I would urge my colleagues to take CBO's criticisms of the President's economic forecast with a very large grain of salt.

The study follows:

AN EVALUATION OF THE CONGRESSIONAL BUDGET OFFICE FORECASTS

INTRODUCTION

The economic forecasts made by the Congressional Budget Office (CBO) have over the past few years served as a major, if not the single most important basis for the assumptions governing the conduct of public policy, particularly in the fiscal and monetary areas. Nevertheless, the CBO's forecasts have exhibited a very poor record, not only in terms of their ability to track actual developments, but also by comparison with other major forecasting models. Furthermore, the origins of this problem clearly lie in the theoretical assumptions used by the CBO, which are clearly not commensurate with recent developments in economic theory, or empirically tenable given the actual performance of the economy.

THE CBO'S FORECASTING RECORD

Table 1 (Appendix) summarizes the record of CBO forecasts made one year in advance, for real growth, inflation, unemployment and the size of the Federal budget. It is evident that the CBO has consistently underpredicted the inflation rate, while typically overpredicting real output. Only in FY 1977 did the CBO overpredict the inflation rate. Otherwise, a comparison of the forecasts and actual results shows that the CBO predicted a steady-state rate of inflation in the 5% range for FY 1978–79, and predicted a gradually rising inflation rate only after marked price volatility had made the steady-state inflation assumptions obsolete. The dubiousness of the CBO's inflation forecasts becomes even more graphic when earlier predictions made in 1976 of a steady state 6% inflation extending into the early 1980's are compared with actual developments. Although the CBO was operating with an assumption of constant inflation over the course of the business cycle, what actually took place in 1976–80 was a period of intermittent growth accompanied by continously accelerating inflation.

Similarly, the CBO forecasts have tended to consistently overpredict the rate of real GNP growth. As with the inflation forecasts, predictions made one year in advance (Table 1) are somewhat more accurate than long term forecasts (Tables 2 and 3). Nevertheless, even CBO forecasts made one year in advance assumed much stronger GNP growth than actually occurred.

The CBO errors with respect to unemployment are somewhat less consistent than their errors with respect to inflation and real output growth. In several instances, the CBO overpredicted the unemployment rate (Table 1, FY 1979 and FY 1981). However, more usually, the CBO underpredicted the unemployment rate, which is to be expected given its corresponding overestimations of GNP. In Tables 2 and 3, the long term forecasts for the unemployment rate are revealed to be too low in every year. The CBO was, of course, not the only forecaster to go off-track in predicting unemployment, since the dramatic increases in labor force participation especially among women and minorities during the late seventies were largely unforseen, and inherently almost impossible to predict.

Given the assumptions that were made about inflation, real output growth and unemployment, it is hardly surprising that the CBO underpredicted the size of the Federal budget in all but one of the forecasts reported in Table 1 through 3. The only instance in which the CBO overpredicted the budget (Table 1, FY 1977) is also anomalous in other respects, since in this simulation the CBO also overestimated the inflation rate; a lower than expected inflation rate would slow the upward pressure on the Federal budget because of the resulting lower outlays on indexed programs and inflation-sensitive expenditures such as government purchases. For every other forecast except this one, however, pretty much the opposite process appears to have biased CBO estimates downward. Because of underprediction of inflation, the CBO also underpredicted outlays in inflation-sensitive areas. Similarly, because of underprediction of unemployment the CBO underestimated outlays on transfer payments, and because of overprediction of GNP the CBO overestimated the size of the tax base. In the long term forecasts (Tables 2 and 3) the CBO's record was particularly weak, with forecast errors approaching the $100 billion mark. In addition to its inability to accurately track secular trends in the Federal budget, the CBO also failed

to take into account further upward pressure on expenditures stemming from discretionary outlays.

It is also significant that the CBO's forecasting record has been noticeably poorer over the past few years than those of the major econometric forecasting services, Data Resources, Wharton EFA and Chase Econometrics.

THEORETICAL ASSUMPTIONS

To a large degree, the CBO's forecasting track record is tracable to the nature of the theoretical assumptions in the model. In essence, the CBO's model is a neo-Keynesian "accelerator" model in which investment and real output growth are fundamentally determined by changes in aggregate demand. Demand-led growth assumptions in turn have a series of implications for macroeconomic policy. In particular, the CBO's assumptions strongly support the concept of countercyclical demand management through fiscal and monetary expansion; several CBO reports specifically recommend increases in outlays to compensate for the slackening of nongovernmental demand. Furthermore, the underlying thrust of many CBO reports has been to recommend increases in Federal spending ratified by loose monetary policies by the Federal Reserve Board. The forecasts based on these policy recommendations have typically been associated with rising real output growth, investment, decreasing unemployment and a stable steady-state inflation rate.

The policy experience of the 1970's, however, strongly undermines the empirical basis of the CBO's theoretical assumptions. On two occasions, in 1972–73 and in 1977–79, the United States experimented with reflationary monetary and fiscal strategies, which were clearly commensurate with the basic policy framework advocated by the CBO. However, neither experience was particularly successful. In 1972–73, the reflationary policies achieved a temporary impressive surge in the real growth rate, which reached 11% during the first quarter of 1973, but the boom ultimately proved unsustainable. By the latter part of 1973 the economy was feeling the effects of the fiscal-monetary "overheating": the 1972 boom was rapidly tapering off in the face of overbuilt inventories and pervasive financial instability. The second experiment in reflation, under the Carter Administration, proved even less successful. Demand-expansive monetary and fiscal policies starting in 1977 were associated with a decrease in the growth rate, following an initially strong recovery after the 1974–75 recession, and accelerating inflation which probably contributed to the depression of the growth rate.

Not only does the historical record fail to justify the CBO's sanguine prognostications, the adverse ancillary implications of heavy spending are almost totally ignored. Crowding out—the tendency of the public sector to absorb an increasing share of total resources, and the corresponding tendency of the Treasury to cut into capital markets to finance the deficit are largely absent in the CBO's economic scenario. Taxflation, the tendency of inflation to accentuate individual tax burdens, is only accorded lip service. Although the CBO acknowledges the existence of fiscal drag caused by excessive taxation, among its listed policy choices has been to counteract the effects of fiscal drag through higher governmental deficits.

Interestingly enough, the effects of tax cuts and higher governmental expenditure on the economy are assumed to be roughly co-equal in CBO reports, presumably because they allegedly exert the same multipliers on aggregate demand.

In the CBO's framework, equal dollar amounts of increased spending and reduced taxes exert essentially the same stimulative effects on the economy. The entire pantheon of negative effects on GNP of higher spending through higher interest rates and other channels is not visible in the CBO model, nor are the greater increases in investment stemming from reductions in tax rates.

Given the theoretical advances made in these areas over the past few years, the CBO appears to have been living in an anachronistic world in which economic theory was halted at its level of the early sixties, and never progressed beyond the accelerator models that were current at that time.

In sum, the CBO has not acquired a strong record for reliability and this in itself traces back to the presence of any number of unrealistic assumptions in their model. Under the circumstances, policy makers in charge of decisions about the budget would do well to take the views of other forecasters into consideration.

MAKING THE ALL-VOLUNTEER FORCE WORK: A NATIONAL SERVICE APPROACH

● Mr. ARMSTRONG. Mr. President, Prof. Charles Moskos of Northwestern University has long been regarded as perhaps the most knowledgeable military sociologist in the United States. His most recent paper, entitled: "Making the All Volunteer Force Work: A National Service Approach," presented at an evening dialog at the Woodrow Wilson International Center March 19, will cement that reputation further.

I do not agree with all the points Professor Moskos makes in his paper. But I am convinced that it is the most significant contribution yet to the dialog on the future of the All-Volunteer Force. Senators can gain much from reading it. I ask that it be printed in the RECORD.

The presentation follows:

MAKING THE ALL-VOLUNTEER FORCE WORK: A NATIONAL SERVICE APPROACH

(By Charles C. Moskos)

Since January 1973 the United States has sought to accomplish what it has never attempted before—to maintain over two million persons on active military duty, along with an expanded reserve force, on a voluntary basis. Nine years after the end of conscription, the all-volunteer force (AVF) has been analyzed, attacked, and defended in a seemingly endless series of books, reports, articles, and Congressional hearings. The commentators tend to divide into two groups. On the one side, there are those who convey the belief that the AVF is a success which requires only incremental changes in management policies and recruitment incentives. On the other hand, there are those who see little prospect of a viable defense force short of returning to a form of compulsory military service. I place myself in neither camp.

I will present a viewpoint of military manpower anchored in the concept of voluntary national service. This contrasts with the policies of both the systems analysts-cum-econometricians, who have been the architects of the present AVF, and the bring-back-the-draft traditionalists, who are coming more into the forefront. A national service AVF is premised on the moral and practical desirability of a socially representative military force. To put it in somewhat pretentious terms, I am arguing for a paradigmatic shift in our understanding of the AVF.[1]

Let us turn briefly to the facts of the AVF experience. The most important, but least commented upon, effect of the shift to the AVF has been the sharp decline in active-duty force levels, from over 2.6 million in the early 1960s to slightly over two million in 1981. To maintain an active-duty force even at this reduced level, with attendant understrength units, the military must recruit between 350,000 and 400,000 enlisted persons annually. One in three service entrants do not complete initial enlistments for reasons of job inaptitude, indiscipline, personality disorders, and the like. On top of this attrition, desertion rates are double those of pre-Vietnam levels. A growing number of skilled technicians are leaving the military; retention of qualified people in the career force has become an acute problem. Army reserve components are hundreds of thousands below the manpower requirements set by Congress.

In addition to quantitative problems, there are qualitative concerns in manning the AVF. A few illustrative facts should suffice. In 1964, the last year before the war in Vietnam, 39 percent of military entrants placed in mental aptitude categories I and II compared with 26 percent in 1980. In 1964, 15 percent placed in category IV, the lowest level from which the military can recruit, compared with 33 percent in 1980. Less than half of the Army's male recruits in 1980 came in with a high school diploma. The college-educated enlisted man has virtually disappeared. Since the draft ended, the proportion of young marrieds in the junior enlisted force has about doubled. The growing number of enlisted marrieds is all the more noteworthy in that it runs directly counter to national patterns, where the clear trend is toward later marriage.

Representational concerns have also been raised about the AVF. The various services differ in their racial composition. In 1980, blacks accounted for 29.2 percent of the Army, 20.2 percent of the Marine Corps, 14.0 percent of the Air Force, and 10.1 percent of the Navy. These percentages include both officers and enlisted personnel. A disproportionately white officer corps with a disproportionately minority enlisted component will be one of the sociological considerations in the military leadership of the 1980s. The issue of racial content has been most prominent in the Army, the largest of the services. Blacks made up 11.8 percent of Army enlisted personnel in 1964, 17.5 percent in 1972, and 32.5 percent in 1980. Total minority content in the Army's enlisted ranks in 1980 comprised 40.8 percent.

It is a well recognized fact that the educational levels of blacks in America have trailed behind those of whites. But the intersection of race and education is quite different among entrants in the all-volunteer Army. Since the end of the draft, the proportion of non-prior service male entrants with a high school diploma has been 64 percent for blacks compared with 53 percent for whites. In point of fact, today's Army enlisted ranks is the only major arena in American society where black educational levels surpass those of whites, and by a significant degree. Whereas the black soldier seems fairly representative of the black community in terms of education and social background, white entrants of recent years are coming from the least educated sectors of the white community. In other words, the all-volunteer Army is recruiting not only a disproportionate number of minorities, but also an unrepresentative segment of white youth, who are more uncharacteristic of the broader social mix than are our minority soldiers.[2]

The rising minority content in the Army actually masks a more pervasive shift in the social class bases of the enlisted ranks. There can be no question that since 1973 the Army has undergone a social transformation in its enlisted membership. The real question is how high-powered commissions, well-financed studies, and Department of Defense assessments come up with the opposite conclusion.[3] To foster policies that accentuate the tracking of lower-class youth into the military, especially the ground combat arms, is perverse. This is not to argue that the make-up of the enlisted ranks be perfectly calibrated to the social composition of the larger society, but it is to ask what kind of a society excuses its privileged from serving in its military.

The military has always recruited large numbers of youth, of all races, who had no real alternative job prospects. It will always continue to do so. But present trends toward labeling the Army as a recourse for America's underclasses are self-defeating for the youth involved, precisely because they counter the premise that military participation is one of broadly based national service. Whatever successes the military had as a remedial organization for deprived youth were largely due to the armed forces being legitimated on other than overt welfare grounds, such as national defense, patriotism, citizenship obligation, even manly honor. In other words, those very conditions peculiar to the armed forces which serve to resocialize poverty youth toward productive ends depend directly upon the military not being defined as a welfare agency or an employer of last resort. It will be increasingly difficult for the AVF to avoid such a characterization, even if unfair, unless enlisted membership reflects more of a cross-section of American youth.

It can no longer be a question that the enlisted ranks of the AVF are much less representative of middle-class youth than the military of the peacetime draft era. It is, however, another kind of question whether this is good, bad, or irrelevant.

The strongest evidence bearing upon the

Footnotes at end of article.

effects of social background on soldierly performance deals with enlisted attrition. The striking finding is that high school graduates are twice more likely than high school dropouts to complete their enlistments. Most revealing, this finding changes little when mental aptitude is held constant. Analyses of enlisted evaluation reports show the same pattern. High school graduates significantly outperform high school dropouts; higher mental health levels do better than lower mental levels, but education is a much better predictor than mental level. Studies of unauthorized absences and desertions show such behavior is most likely to occur among those with the least education, coming from broken homes, and having been in trouble with the law before service entry.[4] The evidence is also clear that on measures of enlisted productivity, higher educated service members do better in low skill jobs as well as in high skill jobs.[5]

The crucial aspect of military manpower is the effect of social composition on combat performance. From an historical standpoint, the evidence is clear that military participation and combat risks in World War II were more equally shared by American men than in either the wars of Korea or Vietnam. (The draft per se is thus no guarantee that there will be class equity in military participation.) In fact, soldiers in World War II reflected a higher socio-economic background than that of the general population. More to the point, careful studies of combat soldiers in World War II and the Korean War showed that, in the aggregate, soldiers with higher education were rated as better fighters by peers and immediate supervisors.[6] Surveys of AVF soldiers report high levels of disaffection from the military system (comparable to what was found among military prisoners in World War II!)[7] One researcher concluded that the AVF was drawing from the most socially alienated segments of the youth population, thereby raising questions of soldierly commitment in the event of hostilities.[8]

By no means does being middle class or educated make one braver or more able. There are many outstanding members in the AVF who come from impoverished backgrounds. But our concern must also be with the chemistry of unit cohesion which requires an optimum blend of talents and backgrounds. Research evidence serves to confirm the observations of commanders and NCOs who remember the draft period; middle-class and upwardly mobile youth enriched the skill level and commitment of military units in peace as well as in war.[9]

REVIEWING THE OPTIONS

A marketplace philosophy underpinned the rationale of the 1970 Report of the President's Commission on an All-Volunteer Force ("Gates Commission Report").[10] A pattern was set and adopted by which primary reliance for manning the AVF was to be determined by supply and demand variables in the labor force. This implied a redefinition of military service away from an institutional format to one more and more resembling that of an occupation.[11]

Whether under the rubric of systems analysis or econometrics, such a redefinition of military service is based on a set of core assumptions. First, there is no analytical distinction between military systems and other systems, especially no difference between cost-effectiveness analysis of civilian enterprises and military services. Second, military compensation should as much as possible be in cash, rather than in kind or deferred (thereby allowing for a more efficient operation of the marketplace). Third, military compensation should be linked as much as possible to skill differences of individual service members. Fourth, social cohesion and goal commitment are essentially unmeasurable (thereby an inappropriate object of analysis). Fifth, if end-strength targets are met in the AVF, notions of citizenship obligation and social representativeness are incidental concerns.

The fixation on end-strength figures is the hallmark of the econometric approach to military manpower. It is disconcerting to hear manpower policymakers assert attrition is not a problem as long as end-strength goals are reached. This has led the Department of Defense to adopt a sieve model of recruitment. Those who cannot perform are screened after service entry on the grounds this is more cost-effective than denying enlistment to some who might perform. This ignores the tremendous organizational costs on the military system caused by excessive personnel turbulence, not to mention the human costs of accepting and then expelling marginal recruits. It is perplexing when policymakers attribute the difficulties of the AVF to Congressional mandates raising accession standards, rather than reexamining their own agnosticism on the correlation between quality of service members and mission performance.

Even on its own terms, there are serious questions as to the efficacy of an econometric approach to the AVF. Large raises in military pay for lower enlisted personnel, a central Gates Commission recommendation, were the principal rationale to induce persons to join the AVF. This has turned out to be a double-edged sword, however. Youth surveys show that pay motivates less-qualified youth (for example, high school dropouts and graduates with poor grades) to join the armed services, but has a negligible effect on college-bound youth.[12] Any policy based on increases in pay to the lower enlisted will only aggrevate the present trend to recruit at the margin. The paradox is that this "front loading" of compensation toward the junior ranks has dramatically compressed the pay scale of the enlisted force. Once upon a time NCOs measured their incomes and perquisites against those of the soldiers they led, and felt rewarded; now they see a relative decline of status within the service and compare their earnings against civilians, and feel deprived.

The solution to the AVF's manpower problems will not be found in "catch-up" across-the-board pay raises. There is some question as to whether or not military pay—especially at the junior enlisted level—has in fact lagged behind civilian wages over the recent past.[13] We are also confronted with the anomaly that retention was higher in the pre Vietnam era when the real buying power of the career force was less than what it is today. It must also be kept in mind that service benefits and entitlements cannot be maintained at present levels if military salaries are to be competitive with civilian wages. The heightened concern of military members with compensation in recent years, moreover, can be attributed at least in part, to the overtly monetary emphasis that has prevailed in the implementation of the AVF.

What about management steps that could be taken to improve manpower utilization within the all-volunteer framework?[14] Unfortunately, few proposals in this vein—a kind of sub-optimal approach—address the core issue: getting young qualified men into the combat arms and related tasks. Neither lowering physical or mental standards, nor increasing the number of women, nor greater reliance on civilian personnel or older military personnel, suit the imperatives of the combat arms, warships, and other deployable units.

Underlying many of the difficulties of the AVF is a source of enlisted discontent that had no real counterpart in the peacetime draft era. This is post-entry disillusionment resulting from unrealistic expectations as to what the military would offer. The peacetime draftee never held high expectations on what he would encounter and therefore was not unpleasantly surprised; indeed, he might often—at least in hindsight—find the Army favorable on its own terms. In all-volunteer recruitment, a consistent theme has been on the self-serving aspects of military life—that is, what the service can do for the recruit in the way of pay and training in skills transferable to civilian jobs. Post-entry disillusionment speaks directly to the excessive attrition rate. The irreconcilable dilemma is that many assignments—by no means exclusively in the combat arms—do not have transferability to civilian jobs.

The difficulties of the AVF have led to renewed talk of restoring conscription. A return to the draft would pose anew the question of who serves when most do not. Under present manpower requirements, less than one in five males would be drafted or otherwise serve in the military. If women were to be drafted, the proportion of youth serving would, of course, be smaller. One of the factors that operated favorably for the peacetime draft during the 1950s was that, because of the small youth cohort (the maturing "Depression babies") and the large size of the active force, over three-quarters of eligible men served in the military. This fostered a legitimization of the peacetime draft. In actuality, a higher proportion of men were drafted in the peacetime 1950s than during the Vietnam War.

To have a workable conscription also requires a national consensus as to its need, especially within the relevant youth population. Such a consensus does not presently exist, even in the wake of events in Iran and Afghanistan. A draft could lead to turbulence on college campuses, and make ROTC units again an object of attack. Moreover, if compulsion is used, many will attempt to avoid induction, which will bring other problems. Even under a seemingly "fair" lottery system, decisions would have to be made which will corrode the induction system. These would include determination of conscientious objection and ersatz physical disabilities. That the rate of non-compliance under the reintroduced draft registration of 1979 will probably never be known does not inspire confidence in the probability of an equitable system of conscription.[15]

In any event, only a small and, by definition, unlucky minority would ever be called to serve. Although I am one of those former draftees who look upon conscription as a moral good, a bungled draft would leave us in worse straits than even the undesirable status quo In a peacetime situation, we must make the AVF work rather than find ourselves embroiled in a debilitating draft controversy

NATIONAL SERVICE AND THE AVF

The central issue remains: Is there a way to meet military manpower needs without direct compulsion or excessive reliance on cash inducements for recruits? I believe there is. First, link federal aid for higher education to a program of voluntary national service, including military-reserve duty or civilian work. Second, introduce a GI Bill for the AVF. Third, construct a two-track military personnel and compensation system which differentiates between a short-term volunteer and one who make a long-term commitment. The interactive effect of these proposals deal with the "three R's" of military manpower: recruitment, retention, and the reserves. The total costs of these proposals could easily be contained within present federal outlays, and would probably be lower.

The framework advanced here departs from the systems analysis and labor substitution approaches to the AVF. The starting point is not how are empty spaces to be filled, but rather how can a substantial number and cross-section of American youth serve their country. To stretch a little and to

Footnotes at end of article.

borrow from the fashionable economic terms of the moment, I am suggesting a supply-side rather than a demand-side model of military manpower. Or, to phrase it yet another way, how can we obtain the analogue of the peacetime draftee in the all-volunteer era? The AVF, if it is to survive, must attract those middle-class and upwardly-mobile American youth who would find a temporary diversion from the world of school or work tolerable, and perhaps even welcome.

Educational Benefits in Conflict with the AVF. The major barriers to more effective recruitment have been the elimination of the GI Bill in 1976 and concurrent expansion of federal assistance to college students. Congress has created a system of educational benefits which offers more to those who do not serve their country than to those who do. Under the Veterans Educational Assistance Program (VEAP), which replaced the GI Bill, the government matches, within prescribed limits, voluntary contributions made by service members. It is estimated that governmental expenditures for VEAP will be under $90 million annually. But, for 1980 alone, federal aid to college students exceeded $5.2 billion.

The funds allocated to civilian students in major assistance programs in 1980 (in billions) were: Pell Grants (formerly Basic Educational Opportunity Grants), $2.444; Supplemental Educational Opportunity Grants, $0.370; College Work-Study Program, $0.550; National Direct Student Loans, $0.301; and Guaranteed Student Loans, $1.609. With passage in 1978 of the Middle Income Student Assistance Act (MISA), eligibility for Pell Grants can extend to families earning $27,000 annually. Also under MISA, there is no need requirement for the Guaranteed Student Loan Program. The Work-Study Program is becoming a major source of graduate student support. A college student who can establish self-supporting status, moreover, is eligible for most federal assistance programs. Such governmental policies can hardly be thought of as part of a poverty program. In effect, we have created a GI Bill without the GI.

It is surprising that no public figure thought to tie such student aid to any service obligation on the part of the youths who benefit. A program of voluntary national service should be introduced on a step-by-step basis over the next five years. In the interim, those who enlist in military reserve units or perform a term of civilian service would have priority for federal aid to college students; in time, participation in such national service would become a prerequisite for eligibility for federal post-secondary school assistance. Only persons medically exempt from national service would not be held to this standard.

The preferred conditions of such national service should be broad but light, rather than narrow but heavy. The aim is for inclusiveness in youth participation but maximum decentralization and minimum costs. The following is set forth as one way to meet these standards. To be eligible for federal post-secondary educational or job training aid, a youth would be required to serve a short period—say three months—in an unpaid capacity. Most likely, recruitment into labor intensive tasks would be handled by voluntary associations, welfare agencies, nonprofit institutions, schools, hospitals and the like. Tasks should be in pursuits for which there is a demonstrable need, but that otherwise are not being performed.[18] National service could also entail self-selected tasks, for example, driving the aged to medical or shopping facilities.

Decisions as to whether or not a specific task would meet service criteria would be the responsibility of local national service boards, whose members themselves are volunteers (albeit not youth). Salaries would be received only by clerical help at regional board levels and staffers at a headquarters office. The decentralized system of the old selective service boards is the obvious parallel.

To go a step farther, one can envision a state of affairs whereby national service, an earned attribute, would replace ascribed characteristics, such as race or sex, as the basis of affirmative action. At the least, persons who complete national service ought to have priority in federal employment. It may be that we can come to a realization that many of the things we need as a nation we can never afford to buy. If we are to have them, we must give them to ourselves.

Provisions of a GI Bill for the AVF. Concurrent with linking federal educational assistance beyond high school to national service, we should introduce post-service educational benefits for members of the AVF along the lines of the GI Bill following World War II. In this way maximum federal educational benefits will be allotted to those who serve on active duty. A person who enlists in the armed forces and honorably completes an obligated period of active duty would receive three academic years of educational support for two years of service, and four academic years of support for three years of service. The entitlements of an AVF GI Bill would include the costs of tuition and fees up to $2,500 per academic year, and a subsistence stipend of $250 per month.[17] Such entitlements would also require an appropriate reserve obligation, say three or four years, following active duty.

The maximum direct costs of such an AVF GI Bill would probably be under $1.25 billion a year.[18] There would also be substantial countervailing reductions in the net costs thanks to a lower attrition rate, smaller recruitment outlays, an end to combat arms bonuses and VEAP, and, most likely, fewer lower-ranking service members with families.[19] With these savings, the net costs of a GI Bill would be under $.5 billion annually—less than a sixth of present federal expenditures for college-assistance programs. Moreover, because members will not be eligible for GI Bill benefits until completion of at least two years of active duty, there will be no outlays whatsoever in the first phase of an AVF GI Bill. In point of fact, the initial two years of a GI Bill program will result in considerable savings in the military manpower budget.

It is a virtual article of faith among manpower analysts that bonuses are a more cost-effective enlistment tool than a GI Bill. Yet estimates are that one billion dollars annually would be required in enlistment bonuses to meet the new accession standards set by Congress.[20] Even if costs are comparable, a GI Bill is still to be preferred over enlistment bonuses. Whereas a GI Bill carries with it the positive symbolism of one of America's most successful social programs, enlistment bonuses crassly emphasize the cash-work nexus. A GI Bill recipient can receive his or her entitlement only after completion of honorable service, while there is no practical way to recover bonus money from one who fails to complete an enlistment. In theory and practice, enlistment bonuses are inextricably linked with the strategy of recruiting at the margin; a GI Bill, in theory certainly, in practice to be determined, seeks to attract youths heretofore not in the recruitment pool. Enlistment studies do consistently show that GI Bill type incentives hold greater attractiveness than enlistment bonuses among high school youth.[21] One way out of the conundrum of enlistment bonuses versus GI Bill may simply be to offer enlistees an either/or choice.

One argument against the GI Bill is that it will reduce retention among first termers the military would like to see remain in the service. It should be noted, however, that career retention problems have been aggrevated since the end of the GI Bill in 1976. Special career provisions in conjunction with a GI Bill would complement, not undermine, career incentives.[22] A cash-out feature might be offered in lieu of GI Bill benefits at the time of reenlistment. A career soldier's GI Bill might be passed on to family members. Or a career soldier can use his GI Bill to take a "sabbatical" involving an engineering or science curriculum for future technical work in the military. Unlike straight GI Bill benefits which should be funded by the Veterans Administration, funding of in-service educational programs properly falls within the defense budget.

Two general principles should always be kept in mind in appraising recruitment and retention proposals. First, recruitment incentives must be kept as simple as possible (almost as much for the recruiter's sake as for the recruit). The other side of "flexibility" in GI Bill proposals is complications for potential enlistees. Second, reenlistment incentives can be fairly involved with many choice points. One will never go wrong overestimating the grasp career service members have of compensation packages.

Citizen Soldier and career soldier: Complementary Roles. The definition of military service in the all-volunteer context needs overhauling as much as does the machinery of military recruitment. The armed services can set up a two-tier personnel and compensation system recognizing a distinction between a "citizen soldier" and a "career soldier." (Soldier as used here refers, of course, to sailors, airmen, and marines.)

The career soldier would initially enlist for a minimum of four years.[23] He or she would receive entitlement and compensation in the manner of the prevailing system, but there would be significant pay increases at the time of the first re-enlistment and throughout the senior NCO grades. The basic premise of the career track is to decompress enlisted pay scales. Many career persons would be trained in technical skills, though others would make up the future cadre in a variety of military specialities. In certain skill areas with extreme shortages, extra reenlistment bonuses will be required. The establishment of diverse GI Bill options for the career force has already been mentioned. The career force must also be given adequate housing and food allowances and reimbursement for government-ordered travel. Steps such as these would go a long way toward the retention of the experienced and trained personnel required for a complex and technical military force.

The citizen soldier would enlist for two years of active duty (the term of the old draftee) and be assigned to the combat arms, low-skill shipboard duty, aircraft security guards, routine maintenance, clerical work, and other labor-intensive positions. Except for clerical work, these are the kind of assignments in today's AVF where recruitment shortfalls, attrition, and desertion are most likely to occur. Active-duty pay for the citizen soldier would be lower—say by one third—than that received by the career soldier of the some rank. Other than the GI Bill, the citizen soldier would receive no entitlements such as off-base housing or food allowances. This would reduce the frequency of marriage and single parents at junior enlisted levels and restore unit cohesion in the barracks. Because there would be no presumption of acquiring civilian skills in the military, the terms of such service would be honest and unambiguous, thus alleviating a major source of post-entry discontent in the AVF. A college or graduate education, or vocational training, in exchange for two years of active duty would be the means to attract highly qualified soldiers who can learn quickly, serve effectively for a full tour, and then be

Footnotes at end of article.

replaced by similarly qualified recruits. There is also the consideration that lower-paid citizen soldiers might make a generous GI Bill more politically acceptable to the public and Congress.

One feature of the two-track system presented here is that, because of the higher active-duty compensation in the career track, some of the two-year joiners will opt for the longer commitment once in the service. This will further reinforce retention in the career force. But the overwhelming number of citizen soldiers will undoubtedly leave active duty after two years and, if they take advantage of the GI Bill, go on to the reserves—a preferred outcome. For without much greater reliance on prior-service personnel, there seems to be no way to salvage Army reserve components in an all-volunteer context. The dominant econometric model of the AVF relies on the mistaken notion that long initial enlistments are always to be preferred over short enlistments. Thirty-six percent of all enlisted entrants in 1964 signed for four or more years compared with 61 percent in 1980. Yet with the high attrition rate, the personnel turnover is greater now than it was in the peacetime draft era.[24]

We do not want to be so overwhelmed with data, so bedeviled with rival sets of numbers, that the key policy choices are hardly understood, much less addressed. It appears that as the Defense Department's technical competence to deal with personnel data expands, its actual ability to deal with manpower issues declines. The grand design is to make governmental subsidies of higher education consistent with the ideal that citizen obligation ought to become part of growing up in America. Such a realization would also clarify the military's role by emphasizing the larger calling of national service. The architects of the present AVF have failed to consider these kinds of issues, but we must.

[13] It has become part of accepted wisdom that civilian pay raises have exceeded those of the military during the later part of the 1970s. A report of the General Accounting Office (GAO), however, states enlisted pay has increased faster than civilian pay (based on indexes of hourly wages in manufactures); from 1976 to 1980, enlisted military pay increased 45 percent versus 28 percent for civilians. GAO, *Preliminary Analysis of Military Compensation Systems in the United States and Five Other Countries*, FPCD–81–21 (dated December 31, 1980), p. 6. Similary, it has often been stated that hundreds of thousands of military families are eligible for food stamps. A GAO report, however, estimates that for 1980 only 19,700 military members were potentially eligible for food stamps. GAO, "Military Personnel Eligible for Food Stamps," FPCD–81–27 (GAO letter to Senator Sam Nunn, dated December 9, 1980).

[14] Martin Binkin and Shirley J. Bach, *Women in the Military* (Brookings Institution, 1977); Martin Binkin with Herschel Kanter and Rolf H. Clark, *Shaping the Defense Civilian Work Force* (Brookings Institution, 1978); and Martin Binkin and Irene Kyriakopoulos, *Youth or Experience: Manning the Modern Military* (Brookings Institution, 1979).

[15] The Selective Service System claimed 93 percent of 3,880,000 registrants registered during the 1980 first phase. A GAO report concurred that the Selective Service figures were "reasonable." GAO, *Evaluation of the Recent Draft Registration*, FPCD–81–30, dated December 19, 1980. A careful reading of the report, however, leads to a less sanguine interpretation. (1) GAO states 91 percent of potentials registered. (2) Of these, 98 percent were valid registrations. (3) Of these, 92 percent were traceable (based on a sample who gave telephone numbers). Thus, 10.8 percent of potential registrants were non-registrants or non-valid registrants (419,816 persons); and 18.0 percent were non-registrants, non-valid registrants, or non-traceable registrants (696,664 persons).

King, *Achieving America's Goals: The All-Volunteer Force or National Service*." Report prepared for the Committee on Armed Services, U.S. Senate, 95th Cong., 1st sess. (GPO: 1977; Congressional Budget Office, *National Service Programs and Their Effects on Military Manpower and Civilian Youth Problems* (GPO: 1978); and Potomac Institute, *National Youth Service: What's At Stake* (Washington, D.C.: Potomac Institute, 1980).

[17] Over a half dozen "GI Bill" bills have been introduced in the 97th Congress. Only the Armstrong-Bennett bill contains a tuition feature, thereby retaining a key element of the GI Bill of World War II. The tuition and stipend amounts proposed in this paper are adopted from the Armstrong-Bennett bill. My proposal differs only in that a reserve requirement is included for GI Bill eligibility.

[18] The sum of $1.25 billion for total annual costs of the proposed AVF GI Bill is based on the following calculations. The sum to be given to each person who uses the GI Bill is estimated at an average of $10,000 per veteran. This was the estimate given by the Veterans Administration for S. 2020, a G.I. Bill introduced in the 96th Congress which contained more generous entitlements than the Armstrong-Bennett bill of the 97th Congress. *Hearings before the Committee on Veterans Affairs*, U.S. Senate, 96th Congress, 2nd sess., June 19, 1980, p. 25.

Comparative costs of the World War II GI Bill are informative. The GI Bill of that era paid up to $500 per academic year for tuition, fees, and books plus a $75 monthly stipend for a single veteran. The costs of the World War II GI Bill came to about $2,500 per veteran (2,232,000 participants at a total

cost of $5.5 billion). See, Keith W. Olson, *The GI Bill, the Veterans, and the Colleges* (University Press of Kentucky, 1974), p. 59. Multiply this sum by four to take inflation into account, and we also come up with a figure close to $10,000.

In steady-state recruitment for a two million active-duty force, about 375,000 enlistees are required annually (less if attrition were lowered). About sixty percent of first termers—or 225,000 persons—will leave active duty under honorable conditions. Assume half of these—or 112,500 persons—will matriculate in college (a proportion higher than the national average). $10,000 times 112,500 approximates $1.25 billion.

Note all assumptions err on the side of greater than probable costs. An informal study by the Congressional Budget Office requested by Senator Sam Nunn on an earlier and more generous GI Bill proposal concluded costs would be $.945 billion annually. "Appraisal of Professor Moskos' Version of a Proposed AVF GI Bill," draft paper, dated April 18, 1980.

[19] Potential countervailing reductions in the annual costs of an AVF GI Bill include:

Attrition Savings: (50,000 fewer attritees at savings of $10,000 each), $500,000,000.

Recruitment Savings in Recruitment of the Active Force: (50,000 high quality enlistees—category IILA. HSG—at savings of $2,000 each), $100,000,000.

Termination of VEAP and Enlistment Bonuses, $100,000,000.

Other Savings: (lower reserve recruitment outlays; less loss time for unauthorized absences and desertions; fewer soldiers with dependents), $50,000,000.

Total, $750,000,000.

[20] Congressional Budget Office, *Resources for Defense* (GPO: Jan. 1981, p. 87.

[21] The table below is based on a 6,000 survey sample of high school youth and is adopted from *Youth Attitude Tracking Study*, Spring 1980 (Washington, D.C.: Market Facts). The higher the score, the greater the indicated propensity to enlist.

Incentive	Quality index[1]			Race	
	High	Medium	Low	Black	White
Current pay	1.25	1.49	1.56	1.43	1.43
$200 month pay raise	1.64	2.11	2.01	1.96	1.91
$5,000 bonus	2.05	2.15	2.12	2.07	2.18
Current VEAP	1.80	1.97	1.91	1.90	1.92
Noncontributory VEAP	1.94	2.03	1.96	1.99	1.99
1-yr tuition for 1-yr service[2]	2.09	2.21	2.09	2.55	2.12

[1] Based on composite index of high school grades and number of math/science courses taken.
[2] Survey conducted fall, 1978. Question item not included in spring, 1980, survey.

Surveys of undergraduates at Northwestern University (private and predominantly white) and Morgan State University (public and predominantly black) in 1980 found that a four-year GI Bill—full tuition and $500 monthly—in exchange for two years of military service had greater enlistment appeal than $2,500 monthly recruit pay. An insightful discussion on the relative value of post-service educational benefits and high recruit pay is Bachman, Blair, and Segal, *op. cit.*, pp. 145–148.

In order to determine the effectiveness of educational benefits as enlistment incentives, Congress authorized the recruiting commands to conduct an experiment during 1980–81. Recruiters in specified locales will be able to offer qualified enlistees a non-contributory and generous post-service educational package, for example ($1,200 for tuition and $300 monthly for subsistence) for each year of an enlistment.

At least two difficulties present themselves in trying to generalize from the results of this "test" to the appeal of an AVF GI Bill. First, a local enlistment campaign even with an "ultra-VEAP" can never match the positive symbolism of a simple, across-the-board, and nationwide GI Bill.

Second, an operational difficulty is posed by the requirement that only high school graduates who score in the top half of the mental distribution are eligible for the new educational benefits. This means in practice that the recruiter, lest he disappoints and loses a potential regular enlistee, is hesitant to mention the new educational offerings until after he knows the candidate's aptitude score. Caught in a classic minimax bind, the recruiter pushes the new educational package only to those candidates who would probably have come in the door anyway. Paradoxically, then, precisely because the test program is limited to high quality youths, it cannot be widely used to tap the new pool of recruits for whom it was intended.

[22] An educational package available in one of the test areas described above is that if the enlistee chooses to reenlist, he would have three options regarding his educational benefits: (1) keep the entitlement until leaving the service, (2) receive a lump sum equal to 60 percent of the dollar value of the entitlement, or (3) transfer all or part of the entitlement to a spouse or dependent.

[23] Coming at the same problem from another direction, William Schneider, Jr., proposes a two-layer system consisting of five-to-eight year enlistees with only a small number of these entering the career force. See, Schneider, "National Defense," in Eugene J. McAllister, ed., *Agenda for Progress* (Washington, D.C.: Heritage Foundation, 1981), pp. 31–32. My proposal addresses the excessive attrition rate which Schneider ignores. Schneider's proposal has the advantage of addressing the burgeoning costs of military retirement. One could conceive of a three-tier personnel system which combines features of both proposals: (1) two-year enlistees for labor intensive work at low salary but with GI Bill benefits, (2) four-to-eight year enlistees with good salaries who would be the yeomanry of the enlisted force, and (3) a small number of career NCOs with retirement entitlements.

[24] It is estimated that personnel turnover is 10 percent higher in the AVF era than during the draft era of the early 1960s. Congressional Budget Office, *The Costs of Defense Manpower* (GPO: January, 1977), p. 24.●

NORTHERN IRELAND ARMS EMBARGO

● Mr. D'AMATO. Mr. President, I come before this body today to reaffirm my stand against resuming the sale of U.S.-manufactured weapons to the Royal Ulster Constabulary (R.U.C.) in Northern Ireland. It is my belief that lifting the ban before a full review of the situation has been completed would be incorrect.

On February 24 of this year I conveyed my thoughts on this subject to President Reagan. I indicated to the President that my recent visit to violence-torn Northern Ireland had afforded me an opportunity to meet with representatives of both sides of the issue and to realize that a peaceful solution to the problems there must be our main objective. I further called on the administration to continue the ban on arms sales while a peaceful settlement was sought.

Mr. President, the White House has emphasized that the President, too, desires a peaceful solution to the unrest that overshadows Northern Ireland and its people. The Reagan administration is holding to the policy of not approving licensing for the sale of handguns to the Royal Ulster Constabulary.

It is clear we must look toward an equitable solution which promotes peace and which all parties involved in the conflict can accept as fair. It is my hope today that this body will do all within its power to support the Reagan administration on this very vital international issue.●

ASSASSINATIONS OF TURKISH DIPLOMATS

● Mr. THURMOND. Mr. President, I rise today to condemn the savage acts of terrorism accredited to the so-called Secret Liberation Army of Armenia against Turkish diplomats.

Mr. President, with the recent assassination attempt against President Reagan, there has been considerable comments made against such acts of violence. Therefore, I would like to take this opportunity to remind my colleagues in the Senate of the vicious attacks that have been made on Turkish diplomats in recent years.

Since 1974, 17 Turkish diplomats and/or their family members have been murdered in cold blood. Instances of such killings have occurred in Europe, Australia, and—I regret to report—in the United States as well. In 1973, a Turkish Vice-Consul was assassinated in Los Angeles. In addition, on October 12, 1980, a building owned by the Turkish delegation of the United Nations was bombed. A few weeks later a travel agency belonging to an American citizen of Turkish descent was also bombed. In both bombing cases, the Secret Liberation Army of Armenia claimed responsibility.

Mr. President, the pro-Soviet attitude of members of this terrorist organization is a matter of great concern to me. It would appear that the Secret Liberation Army of Armenia may well belong on the list of terrorist organizations reportedly receiving Soviet backing, as well as Soviet blessings. At an April 1980, press conference in Beirut, Lebanon, representatives of the Secret Liberation Army of Armenia used a completely Marxist vocabulary, and espoused virulent anti-American slogans.

Mr. President, I ask that an article which appeared in the March 1, 1981, edition of the Christian Science Monitor be printed in the RECORD at the conclusion of my remarks.

The article follows:

TURKEY'S VICTIMS OF TERRORISM

Turkey is understandably dismayed that its allies do little more than shrug their shoulders when Turkish diplomats abroad fall victim to terrorist gunmen, who identify themselves as Armenians.

This has happened no fewer than 16 times since a Turkish vice-consul in Los Angeles was assassinated there in 1973. The most recent killings were earlier this month in Paris, where two diplomats from the Turkish Embassy to France were gunned down.

Turks note that most of the Western world—and not only the Western world—kept alive its protest for the entire period that US diplomats were held hostage in Iran. Why (they ask) is there no similarly sustained protest when Turkish diplomats,

entitled to the same immunities as the Americans in Tehran, are killed with barbarous regularity? Why do not the host governments (they ask further) react more vigorously to track down, apprehend, and punish the murderers?

For the Turks, it is all the harder to understand when the host governments are fellow members of NATO. Turkey, astride the straits which give the Soviet Navy access to the Mediterranean and the oceans beyond, is vital to the alliance. If the proposed increase in US military aid for Turkey is any indication, Turkey is also earmarked for an important role in US security plans for Southwest Asia—which includes the Gulf.

It follows that Soviet interests are served by anything that: (1) drives a wedge between Turkey and its North American and European allies; (2) helps strengthen the isolation of Turkey with which its historical past of Ottoman imperialism burdens it; or (3) contributes to the internal destabliization of the modern Turkish state. Interestingly Moscow has remained silent about the assassinations. There is no evidence that they were actually Soviet-organized, but the Soviets doubtlessly count the net effect as a plus for them.

There are others, too, who probably rub their hands. These include: the most fanatically right-wing Greeks and Greek Cypriots, whose anti-Turkish prejudice from the past is kept alive by the Turkish occupation of part of Cyprus; Kurdish nationalists, who harbor a long grievance for the discriminatory way (they claim) the Kurds (or "mountain Turks") are treated in eastern Turkey, and the most fanatical Palestinians who resent Turkey's diplomatic relations with Israel.

The shadowy gunmen—who boast over the telephone of belonging to the Secret Armenian Army for the Liberation of Armenia—are apparently pursuing a vendetta over half a century old. They want vengeance for the documented suffering of Armenians at Ottoman Turkish hands, particularly during World War I. Armenians everywhere tend to keep that cruel memory alive. But Armenians as a worldwide community are not, to their credit, advocates of terrorism. Least of all against innocent diplomats of a generation not even born as long ago as World War I.●

BUD SELIG, OF THE MILWAUKEE BREWERS: B'NAI B'RITH'S SPORTSMAN OF THE YEAR

● Mr. KASTEN. Mr. President, it is not often that one can see sports celebrities, public officials, leading clergymen, top journalists, and even a newly returned hostage hero all gathered on the same platform to pay tribute to a man who is none of those things.

But that happened recently in Milwaukee.

The outpouring of gratitude and affection was directed at Allan H. "Bud" Selig, president of the Milwaukee Brewers Baseball Club, who was presented the International B'nai B'rith Sportsman of the Year Award for his distinguished contributions to the world of sports.

Hundreds of Milwaukeeans turned out to say "thank you" to the man who brought baseball back to their city—and in the process raised $60,000 to further B'nai B'rith's youth activities.

All this rather amazed Bud Selig, who is so modest and unassuming that he refuses to let his picture or biography appear in the Brewers' Guide.

"Imagine anyone paying $100 to see me," Selig said when he learned the testimonial dinner was a sellout. "I wouldn't even pay half that to see myself."

But if it were not for Bud Selig, baseball-loving Milwaukeeans would be faced with dreary springs and summers without their favorite pastime. From the time in 1965 when the Milwaukee Braves were moved to Atlanta, the young auto dealer refused to believe that Milwaukee could—or would—do without major league baseball.

He worked tirelessly to bring baseball back to Milwaukee—even persuading the Chicago White Sox to play several games in Milwaukee County Stadium in 1968.

In 1970, Bud Selig and his partners were able to achieve their dream by buying the Seattle Pilots for $11 million and moving the American League franchise to Milwaukee as the Brewers.

It was a tough struggle for several years. The team played badly; attendance was dismal.

But by 1978, the team—and the fans—came alive. The Brewers have been—and are—real pennant contenders. Spring and summer once again are euphoric times in Milwaukee.

That is why Bud Selig's friends came to cheer when B'nai B'rith made him their sportsman of the year.

As Bud Lea, sports columnist for the Milwaukee Sentinel, wrote recently:

A successful owner of an automobile dealership, Selig didn't need a baseball team to get his kicks. He got into sports because he wanted to bring major-league baseball back to Milwaukee, the city he loved. He has become successful because he is a competitor in his own business and likes the thrill of a contest.

Bud Selig's story is a true American success story. I am proud to relate it, and proud too that a close friend of mine has been singularly honored for the great good he has done for his community, both on the field and off.

Mr. President, I ask that several newspaper editorials pertaining to this award be printed at this point in the RECORD.

The editorials follow:

[From the Milwaukee Journal, Feb. 17, 1981]

SLUGGER SELIG

Many staunch Brewer fans are dreaming of a pennant this year, none more so than Allan (Bud) Selig, president of the Milwaukee Brewers. And if skill and tenacity bring a championship to Milwaukee, none on the club will deserve more credit than Selig.

For in more ways than one can count, the energetic, cigar chomping Selig is the Milwaukee Brewers. He is the tireless worker who was determined to return major league baseball to Milwaukee when others were ready to give up. He is the man who has shepherded a "Keystone Kops" expansion team into a consistent pennant contender. He personifies the axiom that what goes on off-the-field is often as important to a team as what happens on the field.

Thus, it is fitting that the leaders of professional baseball and the International B'nai and B'rith service organization will honor Selig Thursday as the 1981 Sportsman of the Year. It's a high honor for a leader who consistently hits a very long ball.

[From the Milwaukee Sentinel, Feb. 25, 1981]

A BENEFICIAL TRIBUTE

The International Sportsman of the Year award given to Allan (Bud) Selig by the B'nai B'rith Foundation last Thursday night no doubt will have an honored place in the Milwaukee Brewer president's trophy room.

Like a Frank Merriwell of the front office, Selig overcame overwhelming odds and through herculean efforts was a powerful force in one of baseball's biggest victories—bringing a major league team back to a city that had been abandoned by the big leagues.

But an even more significant reward for his service to the community and the state will be passed on to hundreds of boys and girls.

Proceeds from the dinner, at which 750 persons paid $100 a plate to honor Selig, will be used to help finance B'nai B'rith youth programs throughout the state, among them, a youth leadership camp at Mukwonago.

It's a worthy cause and Selig is a model of leadership worthy of emulation.

SELIG DISPLAYED COURAGE

(By Bud Lea)

Courage is a lonely road, and each man must plot his own steps.

The tough guys will tell you that courage is walking into a left hook for the privilege of returning the compliment. Or standing all alone in the middle of a football field and watching a punt hang over your head while a wave of tacklers comes pressing straight at you.

Mention ownership of a professional sports franchise, and nobody talks about courage. The smart guys will tell you that baseball owners are rich and spoiled people who are in it only for their own ego gratification.

Those who have followed the history of the Milwaukee Brewers can tell you that courage is more than muscle. And it begins with Bud Selig.

Selig and his Teams, Inc., partners bought the bankrupt Seattle Pilots in 1970 for $11 million, which at that time was the highest price ever paid for a major-league franchise.

Opening day in Milwaukee was not exactly the social highlight of the 1970 baseball season. When it was time to put up or shut up, Andy Messersmith and the California Angels mowed down the Milwaukee Brewers, 12–0, before 32,237 curious customers at County Stadium.

"I remember looking out on the field that day and saying, 'Oh, my God, what have we done?,'" Selig recalled Thursday. "We were bad. We were really bad. We had inherited a bankrupt expansion club. We had no front office.

"Two years later, it was even worse. Our attendance dipped to 600,000. I was worried that we might not make it in 1972. It was scary. That's when we needed a lot of courage, a lot of vision, a lot of dreams. That's all we had."

Selig's nickname became Budget, not Bud, and he spent seven years of agonizing frustration trying to make ends meet. He worked day and night trying to sell Milwaukee and Wisconsin fans on the idea that his Brewers could step in where the Braves had stepped out. It was a hard sell. The Brewers were not loved. Not until they won.

"I finally felt a great amount of satisfaction in 1978," Selig continued. "I still remember driving home after a Saturday night game with the New York Yankees. It was the night Larry Hisle hit two home runs off Rich Gossage, and we beat the Yankees. We had a standing-room-only crowd. All of a sudden, after all of those years of mediocrity, we were the talk of the baseball world. We had the town turned on. I couldn't believe this was happening. I guess I was in shock."

Selig is a fan, not an owner, according to Dick Hackett, the team's marketing director. "He lives and dies with every game," Hackett said. "When he listens to the games on the radio, he looks so worn out that you would have thought he played the game. In the early years, he saw something that he

wasn't proud of, and it nearly drove him crazy."

Cecil Cooper called Selig a legitimate fan who knows the game. "I've sat up there with him when I was injured, and he really gets into a game," the Brewers first baseman said. "I think that's good."

A successful owner of an automobile dealership, Selig didn't need a baseball team to get his kicks. He got into sports because he wanted to bring major-league baseball back to Milwaukee, the city he loved. He had become successful because he is a competitor in his own business and likes the thrill of a contest.

Ego trip? Well, you won't find Selig's biography in the Brewers' media guide. "He won't let me use it," said Brewers publicity director Tom Skibosh. "He said Harry Dalton deserves the credit for putting together a winner here."

You'd think Selig would be packing his bags for spring training in Arizona and taking full advantage of being boss of the Brewers, but he is not. Selig will get ready for the season working from his stadium office.

Selig, the man who brought baseball back to Milwaukee, was honored Thursday night as B'nai B'rith's international sportsman of the year at the Marc Plaza Hotel. Baseball Commissioner Bowie Kuhn was there. So was Howard Cosell, Gov. Dreyfus, Mayor Maier, County Executive O'Donnell, and an old friend, former Green Bay Packer great Willie Davis.

The proclamations and honors were handed out left and right, and a capacity crowd of 750 turned out for the $100-a-plate affair.

It was a deserving honor for Bud Selig. If it hadn't been for him, the game between the Policemen and Firemen would have been the biggest attraction each summer at County Stadium.●

AT LONG LAST SOME GOOD NEWS ABOUT PROGRESS ON THE VA'S AGENT ORANGE STUDY

● Mr. CRANSTON. Mr. President, section 307 of Public Law 96–151—the Veterans' Health Programs Extension and Improvement Act of 1979—mandated the VA to conduct an epidemiological study of veterans who were exposed to agent orange in Vietnam. The Director of the Office of Technology Assessment (OTA) has a mandated responsibility, pursuant to subsection (a)(2)(b)(ii) of that section, to report periodically to the appropirate committees of the Congress on the status of the OTA's approval of the protocol for the VA's agent orange study.

Regrettably, Mr. President, the reports submitted prior to yesterday by the OTA Director described a situation in which—because a protest was lodged against the VA's initial action to solicit a contractor to design the protocol for the study—the OTA had made no progress because there was no protocol to consider. However, yesterday I received the most recent report of the OTA Director dated April 1, 1981, which stated that the VA, after being totally cleared by the GAO on February 2, 1981, with respect to the protest—as I reported in a statement in the RECORD on February 6, 1981, 2050–2053, has made great progress with respect to reconsidering the original bids and will very likely be able to negotiate the contract for the study's design within the next 2 weeks. My colleagues should note that the Director indicates that the VA will include, as a condition of this contract, an instruction that the preliminary work on the study's design be completed within 90 days of the award of the contract.

Thus, I believe that we finally have reason to be encouraged that we will be making tangible progress toward finding answers to the very compelling concerns of Vietnam veterans who are worried about how their exposure to agent orange in Vietnam may be affecting their health today. Finally, the process that the Congress envisioned when the VA's agent orange study was mandated in December of 1979 is beginning.

This truly is good news for Vietnam veterans and the concerned public.

Mr. President, I ask that the OTA Director's letter be printed in the RECORD at this point.

The letter follows:

OFFICE OF TECHNOLOGY ASSESSMENT,
Washington, D.C., April 1, 1981.

Hon. ALAN CRANSTON,
Ranking Minority Member, Committee on Veterans' Affairs, U.S. Senate, Washington, D.C.

DEAR SENATOR CRANSTON: I am writing to you as part of the Office of Technology Assessment's responsibilities under P.L. 96–151, the Veterans' Administration Health Resources and Programs Extension Act of 1979. Under the provisions of the Law, I am to inform appropriate Committees of the Congress about progress being made in the Veterans' Administration's epidemiologic study of possible long-term health effects suffered as a result of exposure to phenoxyacid herbicides (Agent Orange) in Vietnam.

An initial step in the VA study is the placing of a contract for its design. VA initiated that process more than one year ago, but progress was slowed by a protest entered against the Agency's procedure. The General Accounting Office was directed by a court to investigate the bid protest, and in January the GAO decided in favor of the VA.

By the time the challenge had been resolved, a long period of time had passed since the original bids had been prepared. VA was concerned that some of the bidders might no longer want to compete for the contract or that changes in personnel might have made some bidders unable to satisfy the requirements of the contract. Additionally the passage of time meant that cost estimates would have to be revised. After the GAO decision, VA contacted the bidders and asked for information about interest, personnel, and costs. All of the bidders responded that they remain interested in being considered for the contract.

The original submissions from the bidders were reviewed last year by a panel of Federal experts. VA has distributed the bidder's original submissions plus the reviewing panel's comments plus the most recent submissions to the panel members. The panelists are being asked to consider whether or not the new submissions should change the ranking or the numerical scores of the bidders. VA expects that the panel will decide about ranking and scores within the next two weeks, and that the Agency will then be able to negotiate the contract.

The contract will ask for completion of a preliminary study plan within 90 days. The preliminary plan will then be reviewed by a number of organizations, including OTA. Dr. Richard Remington, Dean of the School of Public Health, University of Michigan, last year agreed to serve as chairman of an OTA panel to review the study plan. I am pleased that Dr. Remington remains willing to serve. He and the OTA will be prepared to select additional panel members when we have a better idea about when the plan is to be made available.

After this long delay, it is encouraging to see the process moving along. I want the OTA to be as helpful as possible in this important matter, and if you have any questions about its role please call me or Michael Gough of the OTA Health Program.

Sincerely,

JOHN H. GIBBONS.

DEWITT WALLACE

● Mr. MOYNIHAN. Mr. President, on last Monday evening, March 30, DeWitt Wallace died of pneumonia at his home in Mount Kisco, N.Y. Though not especially well known to most Americans, I dare say that almost every literate person in this country, indeed in the world, has on occasion read, enjoyed, and profited from Reader's Digest, which Mr. Wallace founded in February 1922.

We have become so accustomed to having Reader's Digest at hand that we can scarcely think of doing without it. The idea of condensing articles and publishing them in a handy and readable magazine now appears to be nothing more than commonsense, a thought that would come to anyone's mind. But when Mr. Wallace first thought of doing such a thing in 1918, his idea was treated with something less than enthusiasm, and even with a little scorn.

But Mr. Wallace knew that his idea was sound. He had faith in himself, and he had the courage, business savvy, and good old-fashioned pluck to proceed on his own, taking his idea and transforming it into an immensely successful business. Today his magazine has a monthly press run of 30.5 million, published in 16 languages, and sold in 163 nations.

Mr. Wallace was more than an editor and businessman. He was a distinguished citizen, a patriot, a philanthropist, and a man with an active interest in politics. He was the friend of two Presidents, and an enthusiastic supporter of the Republican Party. Through the Reader's Digest Foundation, which Mr. Wallace established, he gave generously to scores of charities and institutions.

We mourn the passing of Mr. Wallace. He stands as proof that this country of ours is indeed a land of opportunity for those who seize it. He was a truly distinguished American, a great New Yorker. We will remember him always.

Mr. President, a very intriguing and beautiful piece about Mr. Wallace appeared in the New York Times of April 1. I ask that it be printed in the RECORD.

The article follows:

DEWITT WALLACE, FOUNDER OF READER'S DIGEST, IS DEAD

(By Alden Whitman)

DeWitt Wallace, who conceived and edited a pocket-sized magazine that as Reader's Digest became the most widely read magazine in the world, died of pneumonia at his home in Mount Kisco, N.Y., on Monday night at the age of 91.

Founded in February 1922 amid predictions from editors that it would never last, Reader's Digest was an immediate success. Today its circulation is 30.5 million copies a month to more than 100 million readers in 163 countries. In February it come out with its first Hindi edition, bringing to 16 the num-

ber of languages in which the magazine is published.

Its editorial formula of condensing significant articles from other publications that provide in each issue a pleasing mixture of inspiration, humor, sex, science and self-improvement was frequently criticized as culturally middle-brow and socially conservative.

Far from disputing the assessment, Mr. Wallace found it just, and argued that it expressed the American mind.

UPLIFTING READERS' LIVES

He also insisted that the magazine sought to uplift and ameliorate the lives of its readers and conditions in their countries. As examples, he cited its campaign for safe automobile driving, for family planning, for a public attack on venereal diseases and against cigarette smoking. The admitted emphasis in articles on these subjects, as in most Digest articles, was on individual enterprise.

On a less controversial plane was Mr. Wallace's conviction that most readers in the fast-paced society developing out of World War I had neither the time nor the inclination to pursue long and involved articles, no matter how important. The policy he pioneered in the Digest—brief articles, short sentences, simple words—was adopted by others in the United States and abroad.

Neither Mr. Wallace nor his wife and cofounder, Lila Bell Acheson Wallace, imagined that their handiwork would make them millionaires. They formed the Reader's Digest Association, splitting the stock 51 percent for Mr. Wallace and the rest for his wife.

Mrs. Wallace, who served as the magazine's co-chairman from 1922 until 1973, was at his bedside when he died.

SPENT HEAVILY ON MAGAZINE

Over the years the association's two stockholders became millionaires many times over and spent vast sums on the magazine, its subsidiaries and its employees in order to hold down their tax liabilities.

In addition, the Wallaces, who had no children, gave away, through the Reader's Digest Foundation, handfuls of money to charities and institutions that they deemed worthy. They also disposed of some of their association stock to key executives.

The precise dimensions of the Wallace fortune were never made public, but it was sufficient to permit benefactions of $10 million here and there, plus a splendid home in Westchester County and a superb collection of modern art held in the Digest's name.

Despite his eminence as an editor, publisher and shaper of opinion, Mr. Wallace shied away from fame. As a result, he was an almost shadowy figure outside the Digest. There, however, his presence was keenly felt, for the magazine was an extension of its proprietor and his curiosity about the commonplaces of life. This curiosity was the source of "— And Sudden Death," one of the Digest's most widely read articles.

ORIGIN OF FAMOUS ARTICLE

Driving about Westchester County one afternoon, Mr. Wallace stopped in an Armonk garage and asked its owner, in the course of conversation, whether he had seen any bad auto wrecks lately.

"He told me plenty," Mr. Wallace recalled of the garage man's gruesome tales. Fascinated, the editor got in touch with J. C. Furnas, already at work on a traffic article for the Digest, and ordered him to do a dramatic piece on the necessity of safe driving.

The result was a grim and grisly article published in the issue of August 1935. Proofs were sent to 5,000 publications, many of which reprinted it. The Digest circulated four million reprints. It did much to establish the magazine as a public-interest periodical.

One of Mr. Wallace's earliest prescriptions for the Digest was that it contain "articles of lasting interest." One such turned out to be "The Facts Behind the Cigarette Controversy," published in July 1954. The first of several pieces on the relationship of cigarettes and lung cancer, it created an enormous stir and led other publications to devote space to the subject.

One of those ultimately affected was Mr. Wallace. A heavy smoker who had given up numerous times, he became convinced that he should really stop what he called "this dastardly habit." And he did.

AMID BOOKS AND PRAYERS

William Roy DeWitt Wallace was born in St. Paul on Nov. 12, 1889, the fifth child of the Rev. Dr. James Wallace, president of the Presbyterian-related Macalester College, and Janet Davis Wallace, a minister's daughter. The boy, whose first condensation was to shorten his name from William Roy DeWitt, was reared amid books and family prayers.

Scholastic aptitude, however, eluded him, as he concentrated on sports in his youth. After two indifferent years at Macalester, which he entered in 1907, DeWitt, who had further shortened his name to Wally, transferred to the University of California at Berkeley.

In the interval between Minnesota and California, the youth worked in an uncle's bank at Monte Vista, Colo. Reading the current magazines in the fall and winter of 1910–11, he kept a card file of the high point of articles that interested him. That was the genesis of Reader's Digest.

The idea that articles could be digested for profit took further root after two years at Berkeley—he did not get a degree—and four years as a sales-letter writer in the book division of the Webb Publishing Company in St. Paul.

PRINTED A BOOKLET FOR FARMERS

Observing that the United States Department of Agriculture and its bureaus produced excellent free pamphlets for farmers, he left his job at the age of 23, borrowed some money and printed his own booklet, an annotated listing of these publications that he entitled "Getting the Most Out of Farming."

Mr. Wallace sold his self-help booklet to banks for distribution to their farmer-depositors. While he was peddling his wares to banks in the West—he marketed 100,000 of his 120-page booklets—the notion of digesting magazine articles came to him.

He was unable to do anything about it until after World War I, in which he was wounded while serving with the Army in France. In what proved to be a fortuitously long recovery from the wound, he practiced pruning magazine articles and realized how easily they could be trimmed.

Back in St. Paul as a civilian in the spring of 1919, Mr. Wallace spent six months getting up a dummy issue of Reader's Digest. It contained 31 articles from a variety of magazines, including "Is Honesty the Best Policy?" "The Art of Opening a Conversation" and "How to Regulate Your Weight."

EARLY OFFER WAS REJECTED

Full of enthusiasm, Mr. Wallace dispatched copies of his advertisingless dummy to publishers in the East. He was willing to give the Digest to anyone who would keep him as editor, but his offer was rejected as ridiculous.

Only William Randolph Hearst was slightly encouraging, saying that the magazine might in time circulate 300,000 copies a month. Mr. Wallace was discouraged and put his dummy aside to work as a publicity man for Westinghouse.

Meanwhile, he became engaged to Lila Bell Acheson, a clergyman's daughter and the sister of a college friend. Attractive, capable and ambitious, she renewed her fiance's interest in the Digest, and when he was dismissed by Westinghouse in an economy wave, he took up the magazine project.

Soliciting subscriptions by mail, he wrote to teachers and clubwomen. By the time he and Miss Acheson were married in October 1921, he had $5,000 in provisional subscriptions, enough to put out the first issue.

The Wallaces opened an office under a Greenwich Village speakeasy at 1 Minetta Lane and shaped the contents of Volume I, Number 1. It contained 31 articles, many from the dummy issue of 1920. Although the magazine was amateurish by current standards, it drew praise from readers, and additional subscriptions. By 1926, there were 30,000 subscribers; three years later, the figure reached 290,000.

For the first several years, Mr. Wallace was the magazine's only condenser. To keep overhead down, his "office was the New York Public Library, where he laboriously boiled down magazine articles in longhand.

The cribbing cost him nothing since permission to reprint was readily given. John Bainbridge, a Wallace biographer, quoted one editor of the period as explaining, "We figured he was just another guy with a crackpot idea." Other editors believed that it was good publicity to get an article, albeit heavily cut, into the Digest.

In the 1930's, however, when the Digest's circulation rose markedly above a million, editors were less willing to be charitable, and Mr. Wallace began paying for reprint rights. Also in the 30's, Mr. Wallace began planting magazine articles that the Digest would later abstract. About the same time, the editor started commissioning original articles for his magazine from staff writers called "roving editors."

Within a year of the Digest's start, the Wallaces moved its office to a garage in Pleasantville, in Westchester County, near the magazine's present site in Chappaqua. In the shift to Chappaqua, the magazine built a Georgian-style brick headquarters building that reflected the Early American architectural and decorating tastes of Mr. Wallace.

Mr. Wallace was a conservative Republican, close to Presidents Dwight D. Eisenhower and Richard M. Nixon, and the Digest reflected his attitudes, which were strongly anti-Soviet Union and anti-Communist. He employed a number of prominent anti-Communists, including Stanley High, Max Eastman and Eugene Lyons.

The Digest at first contained no advertising and, indeed, often warned its readers about the possibility of chicanery in advertising claims. By 1955, however, rising production costs obliged Mr. Wallace either to increase the subscription price or to accept ads. He chose the latter, although barring liquor and tobacco advertisements.

Descriptions of Mr. Wallace varied. His wife once told a group of editors that he was unpredictable. Most people called him shy.

"Yes, shy like a bulldozer," one editor remarked.

LEARNED HOW TO FLY

He was also frugal. Memos to staff members often arrived on the back of a used envelope. He clicked off unused lights. For years he drove a rather battered car. His one travel extravagance was a private plane, which he learned to fly and in which he cruised, usually at 2,000 feet, while gathering editorial thoughts.

Mr. Wallace disliked social life. His idea of a night out was to escort his wife and a few guests to the opera. He preferred to entertain at home, where his dinner parties were quiet and elegant and usually involved his editors and their families.

The Wallaces lived in a three-story house of native stone set on a hillside overlooking Byram Lake in Mount Kisco. Called High Winds, it was designed by Mrs. Wallace. There was a stone tower on the 100-acre estate where Mr. Wallace maintained an office that he used when he was not at the Chappaqua headquarters.

Mr. Wallace underwent abdominal surgery at the Columbia-Presbyterian and Medical Center about three weeks ago.

Besides his wife, he is survived by his 96-year-old brother, Robert, who lives in Bradenton, Fla. A private memorial service will be held Monday.

Mr. Wallace was once asked what he thought might be a fitting epitaph. He replied:

"The final condensation."●

THE HUMBLE U.S. SOYBEAN

Mr. COCHRAN. Mr. President, there has been a good deal of discussion lately concerning limitations on automobile imports from Japan. Numerous proposals are floating around the Hill—some call for "voluntary" restrictions, some would mandate such restrictions. There apparently is some disagreement within the administration about the desirability of any restrictions, and certainly there is disagreement here in Congress.

I am concerned about the effect that any mandatory controls would have on our position as the world leader in international trade. We are the world's largest trading nation. In 1979, we had combined imports and exports of $394 billion. This comprises some 17.9 percent of our GNP and constitutes a major factor in our economic well-being.

We must, therefore, consider all of the repercussions which might flow from restrictions on automobile imports.

An article appeared in the Christian Science Monitor recently which addreses the possible effect that auto restrictions would have on our soybean and other agricultural exports to Japan which deserves our careful attention.

I ask that the article be printed in the RECORD.

The article follows:

HUMBLE U.S. SOYBEAN BETTER MONEYMAKER THAN A TOYOTA

(By Jonathan Harsch)

Soybeans, along with such derivative as tofu, miso, and tempeh, may still sound foreign to American supermarket shoppers. Yet today it would be hard to call any product more American than the soybean.

Based on booming sales at home and abroad, or on the industry's firm commitment to free-market principles, the versatile bean ranks as a serious rival to apple pie as a symbol of America.

But soybean producers warn that unless this country practices the free trade it preaches, the soybean bonanza may be lost. Specifically, they warn against using import controls to protect the U.S. automobile industry because such controls would likely bring retaliatory measures against major U.S. exports, such as soybeans.

The producers point out—in the words of one spokesman—that is dealing with Japan, the European Community, and Scandinavia, "while we have a $9 billion trade deficit in autos . . . our trade surplus in agricultural products exceeds $14 billion."

Despite such impressive earnings, soybeans growing in their long rows, with two or three small round beans per shriveled pod, may look like so many weeds to the uninitiated. But soy oil is used in more than 80 percent of all U.S. margarine, cooking oil, and salad oil. Since extracting a pound of soybean oil yields 4.7 pounds of high-protein meal as a byproduct, this "bonus" is widely used to improve the quality of baked goods and boost the protein content of a great variety of foods. And as if that weren't enough, it also is used around the world in livestock feed.

The cash value of the US soybean crop also makes it a key American product rather than a foreign curiosity. Despite being a relative newcomer to the US crop list, last year's soybean harvest was worth more than $15 billion, making it the largest cash income-earner for US farmers.

Soybeans also are the leading agricultural export commodity, accounting for $8.6 billion of last year's $40.5 billion in US agricultural exports. Soybean exports are expected to double over the next 10 years, giving them a still-larger share of the trade as world food demands escalate due to both population growth and demand for higher-protein diets.

Yet soybean producers are worried about the future, seeing the chief threat coming from government interference with free-market forces.

The soybean's newcomer status has worked to its advantage in one important way, according to producers. Unlike more traditional farm products, soybeans remain almost entirely free of government "meddling." Production has never been complicated by the target price, reserve, or set-aside programs used to adjust supply and prices for other farm commodities.

"The soybean industry in America has evolved around a free world market," American Soybean Association president Frank Ray told the Senate Agriculture Committee recently. "The basic laws of supply and demand in the world marketplace have signaled farmers when to increase production, and we feel those laws should be allowed to continue to work in the future."

To keep soybeans unencumbered by government programs, Mr. Ray is asking Congress to enact a new provision in the 1981 farm bill to prohibit the US Department of Agriculture from imposing restrictions that "would interfere with normal soybean marketing." He also is pressing for congressional action to prevent the government from imposing selective embargoees on agricultural exports—such as the current Soviet grain embargo.

To keep pace with world demand, the 630,000 US soybean producers last year contributed $7.8 million to fund private research and market-development activities. But they add that the government must increase rather than cut its own programs to expand foreign markets. The way to reduce costly income-support payments to American farmers, say soybean producers, is to return to spending 0.3 percent of annual agricultural export value on expanding markets overseas—rather than the government's present 0.1 percent, which leaves the US far behind its major competitors.●

CIGARETTE SAFETY ACT—S. 51

● Mr. CRANSTON. Mr. President, on January 6, 1981, I, along with Senator TSONGAS, reintroduced the Cigarette Safety Act, S. 51. The bill would give the Consumer Product Safety Commission the ability to address the leading cause of fire deaths and fire injuries in this country—forgotten cigarettes. On the average, cigarette-caused fires result in 44 deaths and 112 injuries every week.

No one is more aware of these statistics than the doctors and nurses which specialize in burn care. For this reason, I am particularly pleased to share with my colleagues the endorsement the American Burn Association has given to this legislation. The association is holding its annual meeting this week in Washington, D.C.

The text of the association's endorsement follows:

AMERICAN BURN ASSOCIATION ANNOUNCES SUPPORT OF BILLS TO REDUCE CIGARETTE TOLL

WASHINGTON, D.C.—The American Burn Association has announced its support of pending legislation intended to reduce the incidence of cigarette-related fires in the United States.

ABA support of the Cigarette Safety Act of 1981 was announced by Charles E. Hartford, M.D., President of the national organization of burn care specialists, at the Association's 13th Annual Meeting, taking place this week at the Sheraton Washington Hotel. In announcing support of the Act, Dr. Hartford noted his group's hopes that passage of the legislation would reduce the nation's annual toll from smoking-related burn injury, estimated at over 2,000 deaths, 5,800 injuries and $200 million in economic losses.

The proposed law, introduced as S. 51 by Senator Alan Cranston (D-CA) and as HR 1854 by Representative Joseph Moakley (D-MA), would mandate the Consumer Product Safety Commission to develop a performance standard for cigarettes to reduce their capacity for igniting fires in upholstered furniture and mattresses. Preliminary research by the National Bureau of Standards' Center for Fire Research indicates that certain changes in cigarette construction characteristics may reduce ignition propensity, while other studies point to alterations in the content of cigarette paper as a promising approach.

"The nation's 10 burn centers are all too familiar with the devastating injuries that can result from fires ignited by dropped cigarettes", commented Dr. Hartford in reporting the ABA's endorsement. "We feel that the Consumer Product Safety Commission should have the opportunity to determine whether these tragedies can be reduced through the development of an appropriate standard."

Over 1200 burn care specialists from the United States, Canada, Latin America and overseas are in Washington this week to share clinical expertise and research findings on the treatment and prevention of severe burn injury, the third leading cause of accidental death in the United States. Since its creation in 1967, the American Burn Association has developed a membership of over 2,000 physicians, nurses, physical and occupational therapists and others involved in burn care, education and prevention.●

THE AFL–CIO ON U.S. SERVICE EXPORTS

● Mr. INOUYE. Mr. President, the AFL–CIO has long been acutely sensitive to the international competitiveness of the United States. While I have not always agreed with its proposals to halt the declining competitiveness of American industry, I believe that it must be conceded by everyone that it understood better than most groups the international economic trends which more than a decade ago signaled the end of U.S. industrial primacy and that it tried to do something about it. Wisely, organized labor did not fall prey to the academic tendency to dismiss the significance of trade and balance-of-payments deficits but rather it comprehended immediately that the trend was ominous and would be long lasting.

On February 17, 1981, the AFL–CIO issued policy resolutions on various international economic issues. Of particular interest to me was the fact that it ad-

dressed for the first time the matter of services in international trade.

The trade in services, or invisibles as they are commonly called, was in large part responsible for the slim current account surplus the United States enjoyed last year in spite of another terrible deficit in the merchandise account. Only recently has the service sector begun to receive the attention its economic significance warrants, and even now very little research has been undertaken on this subject.

Addressing this important issue, the AFL–CIO made the following point:

The proclamation of U.S. service industries and service jobs should be a major goal of international negotiators, and clear definitions of the service goals and analysis of the service impact should receive wide public debate before any multilateral negotiations go forward.

I concur completely with this information.

I am particularly interested in the services issue because last year I introduced S. 3003, the Service Industries Development Act, to strengthen the domestic service sector and to promote U.S. service exports. There were 2 days of hearings on this bill, and I intend to reintroduce it in the near future to stimulate further discussion of service exports.

I ask that the statement of the AFL–CIO on the international trade in services be printed in the RECORD.

The statement follows:

STATEMENT

The U.S. steel industry has been suffering from a series of import assaults throughout the past two decades. A variety of restraint mechanisms were put in place for basic steel, and for specialty steel. Industry, labor and government efforts have led to international discussions at the Organization for Economic Cooperation and Development and to a series of import relief attempts. A trigger price mechanism was applied with some success and extended last year. Specialty steel was so damaged by imports that a quota was instituted and, in 1980, a "surge" mechanism was used to restrain the sudden upsurge of imports. Fabricated steel failed to get much attention, but provisions for monitoring have been made.

In 1980, employment in the steel industry fell to the lowest levels since the Depression as a result of recession, technological change and continued high levels of imports. Tripartite efforts have sought capital and technological improvements and the unions support modernization and improvements in the places where plants now exist.

SERVICES

Services have begun to gain new attention because the international balance of payments includes capital flows and many payments that are not for goods. These short-term payments are lumped together into a category called "services." Transportation payments for airlines and shipping are traditional concerns of unions. Because of the exportation of jobs, unions have raised questions about the use of foreign carriers for many years. Now, as international companies seek to expand operations abroad in banking, insurance, films, hotels, building and construction, credit card operations and a host of other "services"—the billions of dollars involved become a major concern for the United States.

Services are covered by the Trade Act of 1974 and 1979, but few negotiations have been concluded except on a bilateral basis on specific problems. Definitions of "services" are hazy and conflicting, and the use of the term as a catch-all has led to confusion about U.S. income from services. Transportation—both shipping and airlines—have been in deficit in most of the 1970s. The reason for the surplus in "services" is that capital flows—income largely from profits of oil companies abroad—are a major item.

Job exports may accompany great gains in income from services. Foreign investment, for example, may lead to the right to foreign-accrued dividends. Higher-priced oil has not increased U.S. jobs, even though dividends for global oil companies have boosted the service account in the balance of payments. American seamen know that exports of jobs accompanies foreign-flag shipping, while the "U.S." owners make profit gains. Similar experiences occur in runaway films and runaway jobs in all types of industries.

Many service efforts are not only job-producing but also create benefits for the U.S. and its companies abroad. But U.S. companies face fierce competition, both at home and abroad from foreign, often state-owned, service industries. There is a clear national interest in promoting and protecting U.S. service industries.

Some service industries, such as computer industries and credit card companies, are already the subject of international negotiations. When the companies protested that more and more countries are interfering with the transfer of information across national lines, the U.S. began to participate in negotiations on "transborder data flows." This has become a complicated issue, usually discussed in international trade and payments terms about "free trade" and "protection." The economic problems of the companies are acute.

But the issues of privacy, national security and other problems affecting non-trade functions, however, have a political and social impact that international trade negotiations fail to weigh adequately. The impact on labor has been ignored, because it is virtually impossible to quantify the results or the relationships. But in the new technological world of telecommunications and transborder data flows, labor has an interest that should be identified clearly and taken into consideration.

Section 301 of the Trade Act of 1974 specifically provides for action by the U.S. whenever a foreign government's practices create unjustifiable or unreasonable barriers to U.S. commerce. This provision was used successfully, for example, on a bilateral basis in an insurance case in Korea and unsuccessfully in an insurance case against the Soviets. The U.S. has few restrictions, while other countries have many and are adding to them. Thus, the need for a clearer understanding of the implications of service negotiations is essential.

The United States should try to solve short-term service industry problems promptly on a bilateral basis. The U.S. should define the terms and study the problems of international service interchange before it engages in any overall negotiations. The promotion of U.S. service industries and service jobs should be a major goal of international negotiators, and clear definitions of the service goals and analysis of the service impact should receive wide public debate before any multilateral negotiations go forward.

GENERALIZED SYSTEM OF PREFERENCES

Under Title V of the Trade Act of 1974, more than $20 billion in imports of products and parts of products from 140 developing countries and territories received special zero tariff status in the past five years. In 1980, more than $6 billion in imports of products were granted special zero tariff privileges or "preferences." At an average tariff rate of 9 percent, that amounts to about $540 million worth of foreign aid.

The purpose of the program was to help development by aiding poor countries to become competitive in trade. Mutual benefits for the U.S. and the developing countries were supposed to be determined. Studies show, however, that the preferences continue long after industrialization and competitiveness have been achieved by newly industrialized countries. Meanwhile, domestic industries already suffering from import injury are further damaged.●

THE APPOINTMENT OF FRANK WHETSTONE

● Mr. BAUCUS. Mr. President, it is with the greatest pleasure that I bring to the attention of my colleagues in the Senate the appointment of Frank Whetstone, a native Montanan, to the International Boundary Commission. I am very happy with this event for several reasons: First, of course, I am glad to see national recognition of Montanans by appointment to key posts in the executive branch of Government. Second, Frank Whetstone's reputation for ability and integrity is known to all his friends and acquaintances—and those not fortunate enough to fall in that category should know him by that reputation. Third, I am very pleased to see a Montanan appointed to a key post regarding our relations with Canada.

My State borders on three Canadian provinces, and the trade and flow of people across that border is enormous. Now a Montanan will have responsibility for that border. It is a big responsibility, but Frank Whetstone I know is up to it and will fulfill his duties with enthusiasm, efficiency, and fairness.

I want to congratulate Frank for his appointment. The administration is to be commended for making an excellent choice.●

DIABETES: THE THIRD LARGEST KILLER DISEASE

● Mr. BAUCUS. Mr. President, I wish to focus your attention today on one of the most serious afflictions of the American people, diabetes mellitus, our Nation's third leading cause of death by disease.

Recent years have brought unprecedent advancements in medical science, especially in the area of diabetes research. This does not mean that the effort should be relaxed. Instead, a more intense, accelerated program is required if this world wide affliction is to be obliterated.

Diabetes is an affliction of relatively low visibility whose full seriousness must be brought into clear focus. Its tragic impact upon Americans is not adequately recognized today, nor the immediacy of the need to provide relief brought into perspective.

Here are a few startling statistics about this serious affliction:

Over 10 million Americans and their families are directly affected by this disease, 22,000 of whom live in Montana;

Over 300,000 Americans die each year because of diabetes and its complications;

Diabetics are 25 times more prone to blindness than nondiabetics;

Diabetics are 17 times more prone to kidney disease than nondiabetics, and

Diabetics are twice as prone to heart disease than nondiabetics.

As you can see, diabetes robs many citizens of their lives and deny many more of the opportunity to live fully and productively.

Its prevalence is increasing at a rate of 6 percent each year. Of all Americans born today who live to be 70, 1 in 5 will suffer its ravages.

There is no cure, although treatment with special diet, exercise, medication, and insulin has extended their average life expectancy. Research has yet to discover its cause, even though it is now known to be genetically transmitted.

Clearly we face a long, difficult fight in overcoming this affliction. To overcome it, we will need to fully support a coordinated Federal effort in research, treatment, education, and, ultimately, prevention.

Congress has responded to this health threat by passing legislation establishing the National Diabetes Advisory Board. The Board's purpose is to advise and assist both Congress and the Secretary of Health and Human Services in the implementation of a long-range plan to combat the disease. The plan expands and assures coordination of the national research effort and accelerates the development of programs for diabetes control.

Also, through the combined efforts of many dedicated individuals and organizations, including the members and leaders of the American Diabetes Association and the Juvenile Diabetes Foundation, effective diabetes research, treatment and control programs have been established.

The framework for a coordinated effort has been set into place. This work must be pushed forward, obstacles must be removed. One of these is the critical need for adequate research facilities and resources. Without these even the best biomedical research facilities will be unable to work, and treatment programs of life and death importance to millions will be further delayed.

I strongly urge my colleagues to maintain and strengthen their support for this vital work.●

A BAD USE OF THE RECIPROCITY PRINCIPLE

● Mr. PELL. Mr. President, in the conduct of American foreign affairs, the principle of reciprocity has broad validity. International economic pacts, for example, inevitably require mutual concession. And arms control negotiations can succeed only through the acceptance of comparable limits on each side. But the reciprocity principle is not absolute. Only one principle is: That U.S. foreign policy should be shaped to serve American national interests, broadly defined.

Yesterday, the administration denied permission to a foreign visitor—Georgi Arbatov, the Soviet Union's leading specialist on United States-Soviet relations—to extend his visit in the United States for the purpose of participating in a scheduled television debate on the respected public affairs program, "Bill Moyers' Journal." Two other prominent Soviet officials were to take part, along with three knowledgeable Americans, including our colleague, Senator SAM NUNN. In announcing this decision, a State Department spokesman invoked the reciprocity principle, pointing to the Kremlin's unwillingness to allow American officials comparable access to Soviet television.

Mr. President, one cannot deny that the Soviet Union is a closed society. That indeed is the source of conflict in United States-Soviet relations. Were the Soviet Union open and democratic—as an open society must inevitably be—the relationship between the two superpowers would undoubtedly be far less fraught with danger, and perhaps even friendly. But we must deal with facts as they are. The Soviet Union is a stern authorization society, which admits of little diversity in viewpoint and which is unlikely to be altered in the slightest by the curtailment of Mr. Arbatov's visit. Meanwhile, the administration has given the impression of acting in a petty fashion; and the American people, who pay for a strong national defense to protect a free society in which debate can occur, have been denied the opportunity to witness what would surely have been an instructive discussion. It seems fair to caution that in the process of defending ourselves against the Soviets, we should also be sure not to emulate them.

I ask to have printed in the RECORD an article from today's New York Times describing this incident.

The article follows:

STATE DEPT. DENIES VISA EXTENSION, KEEPING RUSSIAN FROM TV DEBATE

(By Bernard Gwertzman)

WASHINGTON, April 1.—The Reagan Administration has denied a visa extension to the Soviet Union's leading expert on the United States to keep him from participating in a televised debate, State Department officials said today.

The officials said that the decision, cleared with Secretary of State Alexander M. Haig Jr., was made yesterday in response to Moscow's refusal to allow American representatives to appear on Soviet television.

"BILL MOYERS' JOURNAL" AT ISSUE

The Soviet official, Georgi A. Arbatov, who is head of the Institute of United States and Canadian Studies and a member of the Communist Party's policy-making Central Committee, has been in the United States since March 25 on a visa that expires next Sunday.

He had applied for an extension so that he and two other Soviet public figures could appear in a Soviet-American debate on April 10 on the "Bill Moyers' Journal" program over the Public Broadcasting Service.

Yesterday, the Soviet Embassy and Mr. Moyers were informed by the State Department of the decision not to renew Mr. Arbatov's visa.

Mr. Arbatov, reached by phone in Atlanta where he was speaking to a foreign policy group, said the whole affair was "ridiculous."

"I didn't want to impose myself on anyone," he said. "I didn't invite myself to Bill Moyers's show. Now I understand a bit more about the policies of the new Administration than I knew before."

He said that he wanted to avoid overexposure on this trip and had declined invitations to such network programs as "Issues and Answers" produced by ABC News, "Face the Nation" by CBS News and "Today" by NBC News.

It was not clear, Mr. Arbatov said, whether the Moyers show would now go on. According to a Soviet Embassy official, the State Department said two other participants who were still in Moscow could still come, but it was uncertain whether they would.

The three Americans who were to take part in the program are: Senator Sam Nunn, Democrat of Georgia; William G. Hyland, a specialist on the Soviet Union formerly employed by the Central Intelligence Agency and later by the State Department and the National Security Council; and Strobe Talbott, diplomatic correspondent for Time magazine.

Mr. Moyers said that he had been in touch with officials in the State Department for several weeks about the planned debate and that the decision to prevent Mr. Arbatov from appearing "can only confirm my impression that they want to keep this debate off the air."

"THIRD-RATE AND PARANOIAC"

"It is a petty action that results in senior American officials acting as if they were bureaucrats in a third-rate, paranoiac, totalitarian country," he said. "Of course, the Soviets don't allow Americans to run around their country meeting the public and press. They are a closed society intolerant of any opinion except the official view of reality."

He said that a senior State Department official had told him that "they simply want to get Arbatov out of this country because he's been receiving so much coverage for his views."

"I replied that the department was cutting off its nose to spite its face because this was the one event in Arbatov's visit in which he would be challenged by three authoritative and knowledgable Americans who are not afraid to stand up to Soviet propaganda," Mr. Moyers said.

"In these dangerous times both sides should welcome every opportunity to air our differences," he added. "Unfortunately the mentality of the 1950's is loose in the State Department today, a mentality that leads us to act like our adversaries instead of like Americans."

A producer for Mr. Moyers said that it was uncertain what would now happen. There is consideration, she said, to having the Soviet participants debate by satellite from Moscow.

On the Soviet side, Mr. Arbatov was to be joined by Mikhail A. Milshtein, a retired general who is an arms control expert in Mr. Arbatov's institute, and Vitaly I. Kobysh, a journalist who is on the staff of the International Information Department in the Central Committee.

STATE DEPARTMENT GIVES REASON

A State Department spokesman, in giving the reason for refusing to extend Mr. Arbatov's visa, said:

"Soviet officials, including Dr. Arbatov, have made frequent appearances on American television in recent weeks. Americans have no access to Soviet television or other Soviet media. Our embassy in Moscow has repeatedly asked that our charge d'affaires, Jack F. Matlock Jr., be allowed to appear on Soviet television. But so far without success.

"Given the lack of reciprocity, we consider it inappropriate to grant the visa extension to Dr. Arbatov solely for the sake of another television appearance."

Another State Department official said Soviet officials had made at least 13 television appearances in the United States in recent weeks.

The news of the refusal to extend Mr. Arbatov's visa came as Ambassador Anatoly F. Dobrynin met with Mr. Haig for the second time in a week on overall relations. It was not known whether the Arbatov matter was raised.

In another reciprocity gesture, Mr. Dobrynin was barred by the Reagan Administration from having his limousine drive into

the State Department garage, a practice permited him in the past but not to other ambassadors who arrived for appointments. Mr. Dobrynin arrived today at the regular diplomatic entrance.●

AUTHORIZATION FOR SENATORS TO INTRODUCE BILLS, RESOLUTIONS, AND STATEMENTS, AND COMMITTEES TO FILE REPORTS TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent that on Friday, April 3, 1981, between the hours of 9 a.m. and 5 p.m., Senators may be permitted to introduce bills, and submit resolutions and statements and committees to file reports.

The PRESIDING OFFICER. Without objection, it is so ordered.

AUTHORIZATION FOR THE VICE PRESIDENT, THE PRESIDENT PRO TEMPORE, AND THE ACTING PRESIDENT PRO TEMPORE TO TAKE CERTAIN ACTION DURING RECESS

Mr. BAKER. Mr. President, I ask unanimous consent that during the recess of the Senate over until Friday, April 3, and Tuesday, April 7, messages from the President of the United States and the House of Representatives may be received by the Secretary of the Senate and appropriately referred and that the Vice President, the President pro tempore and the acting President pro tempore be authorized to sign duly enrolled bills and resolutions.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECESS UNTIL 11 A.M. TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent that, when the Senate completes its business today, it stand in recess until the hour of 11 a.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECESS FROM TOMORROW UNTIL TUESDAY, APRIL 7, 1981 AT 11 A.M.

Mr. BAKER. Mr. President, I ask unanimous consent that, when the Senate convenes on tomorrow, it immediately stand in recess until the hour of 11 a.m. on Tuesday, April 7, 1981.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS UNTIL 11 A.M. TOMORROW

Mr. BAKER. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the order previously entered, that the Senate stand in recess until 11 a.m. tomorrow.

The motion was agreed to; and at 7:41 p.m. the Senate recessed until tomorrow Friday, April 3, 1981, at 11 a.m.

CONFIRMATIONS

Executive confirmations confirmed by the Senate April 2, 1981:

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Philip D. Winn, of Colorado, to be an Assistant Secretary of Housing and Urban Development.

Emanuel S. Savas, of New Jersey, to be an Assistant Secretary of Housing and Urban Development.

DEPARTMENT OF TRANSPORTATION

Arthur E. Teele, Jr., of Florida, to be Urban Mass Transportation Administrator.

DEPARTMENT OF JUSTICE

Carol E. Dinkins, of Texas, to be an Assistant Attorney General.

D. Lowell Jensen, of California, to be an Assistant Attorney General.

Theodore B. Olsen, of California, to be an Assistant Attorney General.

EXTENSIONS OF REMARKS

SALVADORAN REFUGEES

HON. ANTHONY TOBY MOFFETT
OF CONNECTICUT
IN THE HOUSE OF REPRESENTATIVES

Thursday, April 2, 1981

● Mr. MOFFETT. Mr. Speaker, because of the violence in El Salvador, thousands of Salvadorans are seeking refuge in the United States. The following article outlines the fate of many of these refugees in their attempts to lead a more secure and safe life in the United States. The article is from the March 2, 1981, New York Times.

The article follows:

U.S. RETURNS ILLEGAL IMMIGRANTS WHO ARE FLEEING SALVADOR WAR

(By John M. Crewdson)

LOS ANGELES, March 1.—Refugees from the fighting in El Savador are streaming into the United States in ever greater numbers, in many cases having sold all they own to finance the difficult, expensive and illegal journey from their Central American homeland. But they are being sent home again nearly as fast as they are captured, to what many of them fear may be mistreatment or death.

Lawyers working in behalf of the Salvadorans say that, in an effort to keep them from clogging the overloaded immigration system, the Immigration and Naturalization Service sometimes does not tell the refugees that they have the right to have a deportation hearing or to seek political asylum, or it intimidates them into foregoing these procedures.

One Mexican immigration official in Tijuana said last month that some of the Salvadorans apprehended in this country had simply been sent back across the border by American officers.

A spokesman for the United States immigration service, Verne Jervis, said that this practice would be illegal but denied that it was going on. Mr. Jervis said that while there "might be some violations" by local offices of the service, he was unaware of widespread trampling on the Salvadorans' rights.

In the fiscal year that ended in September, 11,792 Salvadorans were apprehended by the immigration service, up from 7,890 four years before. Border Patrol Agents estimate that for every illegal alien they catch, from two to five others manage to evade detection, which would place the number of new arrivals at 25,000 to 60,000 a year.

The Salvadorans are only one small group among the uncounted people entering the United States illegally south of the border. But they are the only ones for whom church groups and others are seeking a temporary haven in this country. Unlike the hundreds of thousands of Mexicans who commute here each year to work, the Salvadorans are driven not by poverty but by war, and for them the prospect of returning home holds far more anguish.

In January, alarmed by an unconfirmed report that some refugees sent home in December had been murdered by right-wing "death squads" shortly after they arrived in San Salvador on Christmas morning, 42 Salvadorans at the immigration service's detention facility in El Centro, Calif., 150 miles southeast of here, released a statement saying they had begun a hunger strike to underline their appeal for asylum from "the political situation which presently exists" in El Salvador.

The report of the Christmas murders, which has gained currency among Salvadoran exiles in this country, remains unconfirmed. But many of those knowledgeable about conditions in El Salvador say there is little doubt that some number of those sent home by the immigration service have been killed, as victims of random violence if not as specific targets of the left or right.

"It just stands to reason," said Millard Arnold, who was deputy assistant Secretary of state for human rights in the Carter Administration. "The odds are some of them are going to be killed."

Prof. Blase Bonpane, a sociologist and Latin American expert at California State University here, went further. "There is no doubt in my mind that somewhere between 5 and 10 percent of those who are returned are executed, because the Government had something on them, a member of a union or something," he said.

Some of the refugees, among them teachers and trade unionists, say their names have appeared on what purport to be "death lists" circulated by various right-wing "terror squads." But United States immigration officials say most of those they apprehend seem to be associated with no political faction. "They've seen the fighting," said one, "but they're generally uninvolved in it. They're just frightened."

Whatever their reasons for leaving, the identities of those who are caught once they arrive here are made known to the Salvadoran Government. Before they can be "repatriated," at a cost to the Federal Government of about $300 apiece, officials of the immigration service said, the refugees are interviewed by the Salvadoran Consul General in Los Angeles to confirm their nationality. When they arrive home, according to Professor Bonpane, they are interviewed again and asked "to give some kind of explanation" for having left the country. He said he had seen films of such interviews, adding that "the level of abuse is frightening."

A spokesman for the United States Embassy in San Salvador said that he had heard many reports of mistreatment or killing of Salvadorans returned from the United States, but that he had no evidence that any of the reports were true. But Mr. Arnold said the State Department had repeatedly asked the embassy whether it could confirm or disprove the reports and was told, "No one really knows, the situation is so chaotic."

REPORTS OF PEOPLE MISSING OR DEAD

Among the Salvadorans in this country, it seems, almost everyone knows, or has heard of, someone who has been sent back and is now missing or dead. Mario Vasquez, a Los Angeles lawyer representing a 27-year-old Salvadoran mechanic who has been awaiting deportation at El Centro for 13 months, said his client had received a letter from his mother reporting that two friends sent back to El Salvador a few weeks earlier had been killed.

Such reports are spread mainly through the mail and by word of mouth, but there are also occasional telephone calls from home. It was such a call to a refugee at El Centro, from someone who had been detained there whom he knew only as "Carlos," that provided the Salvadorans with their first account of the rumored Christmas massacre.

The rumor swept through the camp and was passed on to a reporter for El Diario, the Spanish-language newspaper in New York City, which published a brief account Jan. 4. It was later picked up by other Spanish-language newspapers, but none of the published reports contained any confirmation.

Documents of the Immigration and Naturalization Service made available to The New York Times showed that a group of 25 Salvadorans left here Dec. 24 aboard Western Airlines Flight 746, spent the night at the Mexico City airport and arrived in San Salvador on Christmas morning aboard a Costa Rican airliner. Twelve of the Salvadorans were returning under orders of deportation and the rest as "voluntary returnees."

BODIES ALONG THE ROAD

"Carlos," the man who telephoned El Centro with news of the incident, was said to have been among those aboard the plane who somehow escaped death, and the list of passengers includes three persons with that first name. The man reportedly said he had returned to the airport the morning after his arrival and had recognized the bodies of some of his fellow passengers lying along the road.

The immigration service rejected a request by The New York Times, made under the Freedom of Information Act, for the home addresses of those who returned on Christmas Day, saying it was concerned that any inquiries in El Salvador about their well-being might jeopardize their lives.

As is true of all illegal aliens, no one knows how many Salvadorans are living in the United States. Community services officials here estimate that there are 100,000 to 300,000 in the Los Angeles area alone, and there are also sizable Salvadoran communities in San Francisco and the District of Columbia.

The flow of refugees abated somewhat last summer, after the deaths from dehydration of 13 Salvadorans who had crossed the border into Arizona without sufficient water, a case that was widely reported in El Salvador. But immigration officials say the refugees are once again arriving at a rapid pace.

The route they follow leads through Guatemala and Mexico, which as a result are now confronted with illegal immigration problems of their own, and the journey is an expensive one. Rings that specialize in smuggling Salvadorans charge from $1,000 to $1,700 for passage to Los Angeles and $500 more for a trip to the East Coast. Because they come with the intention of remaining here until the Salvadoran conflict

is resolved, many of the refugees sell their houses and personal possesions to pay their way. If they are captured and returned home, there is often nowhere for them to go.

Not many of the refugees appear to be applying for political asylum, which requires a showing that the applicant has a specific reason to fear that he will be harmed upon returning home, for example because of membership in a particular political group. The immigration service has no reliable figures, but some estimates place the total number of applicants as low as 400.

Even though there may be more who could meet the criteria for asylum, the great majority of the refugees are probably not qualified under a strict interpretation of the rules requiring a threat of political persecution. "They say they left because they don't want to take sides," said John Weis, an El Centro lawyer who has many refugees among his clients. "But they're caught in the middle, and they feel that they're in real danger."

STATUS OF TEMPORARY REFUGE

United States law also provides, however, for giving temporary refuge to aliens unable to return home because of "civil war or catastrophic circumstances." Such status has been conferred at different times on citizens of Vietnam, Laos, Uganda and, most recently, on Nicaraguans after the fall of the Government of President Anastasio Somoza Debayle. Last fall, President Carter ordered the admission of more than 150,000 Cubans and Haitians who had landed in Florida in boats.

A coalition of Congressmen, religious organizations and other groups, among them the National Council of Churches, the United States Catholic Conference and the American Civil Liberties Union, has been urging the State Department to follow the same policy in admitting the Salvadoran refugees. In a letter to Secretary of State Edmund S. Muskie in January, the coalition quoted Phillip Sargisson, the Central American representative of the United Nations High Commission on Refugees, as having declared that "anyone who comes out of El Salvador today deserves refugee status."

When the Carter Administration left office, according to Millard Arnold, the former State Department official, it was "very, very close to working out a compromise" that would have allowed the Salvadorans to remain here temporarily, not through any official action but simply by not sending them home.

The plan was endorsed, he said, by the department's human rights bureau, after reports that more than 10,000 people of El Salvador's 4.5 million people had been killed there last year, a figure Mr. Arnold termed "an enormous number of deaths in a country that size." But he said that it was rejected by other State Department officials concerned that it might suggest that the United States, which had been pushing for a political settlement of the Salvadoran conflict, "did not have faith in the ability of the Salvadorans to resolve their own problems."

There were also concerns, he said, that such a policy might lead to a still greater influx of refugees, and that the arrangement would be "difficult to police" since it might be impossible to distinguish Salvadoran citizens from other Central and South Americans.

Of the nearly 12,000 Salvadorans arrested last year, only 2,378 were formally deported, suggesting that a large number were returned through what the immigration service calls "voluntary departure," an agreement by an illegal alien to return home without demanding the deportation hearing, with its expensive and time-consuming appeals process, to which he is entitled. Without a large number of voluntary returns, immigration experts agree, the overloaded adjudication system would quickly collapse.

The immigration service is required to provide all those it arrests with a written notice of rights, including the right to free legal counsel. But lawyers working with the Salvadorans say they are convinced that the options are not being fully explained by immigration officials.

REASONS FOR RETURNING QUESTIONED

"I.N.S. would like people to return voluntarily without going through the system," said Mr. Weis, the El Centro lawyer. Another lawyer, William H. Steiner of Los Angeles, questioned why so many Salvadorans were agreeing to return home voluntarily "When they've risked their lives and spent their life savings to go 2,500 miles to get here."

"It's a safe assumption," he said, "that they were forced back."

Mr. Steiner said he had seen some voluntary departure agreements signed with an "X" by Salvadorans who could neither write nor read what they were signing. In "practically every case," Mr. Weis said, his clients withdrew their agreements to return home after being told of the available alternatives.

There are also accounts of instances in which the advice of rights has been followed by what Mr. Steiner termed "mental coercion." "They're told if they want a hearing or asylum they'll have to stay in jail, or that their relatives will be arrested," he said.

"You'll get an overzealous border guard who says, 'You either go back or we'll lock you away for the rest of your life,'" Mr. Arnold said. "So the poor fellow elects to go back."●

WELCOMES UMC YOUNG REPUBLICANS

HON. WENDELL BAILEY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 2, 1981

● Mr. BAILEY of Missouri. Mr. Speaker, it was my great pleasure to meet on March 24 with 18 young college Republicans from the University of Missouri at Columbia. These YR's were in Washington to attend the 1981 Young Republican Leadership Conference sponsored by the Young Republican National Federation and to participate directly in seminars and discussions ranging from practical politics to polling to foreign and economic policy.

I found these young men and women inordinately well informed, concerned, and involved citizens. Meetings such as I had with these college students confirm my optimism for the future of our Nation and highlight the quality of leadership which will guide our democracy into the 21st century.

As I am sure we will be hearing a lot more in the years to come from these student leaders, I am pleased to share their names with my colleagues:

Susan L. Hutchison, Terry L. Inman, Robert E. Riesmeyer, Jeanne L. Early, Sue L. Goller, Patricia M. Becker, Lisa K. Dale, Ken Long, Janet S. Placek, Jane M. Gilbert, Jeffrey D. Byrne, Bruce Singer, Penelope Nixon, David Barklage, Bryan L. Forbis, Josh Zahn, Gretchen Collins, and Doug Butler.●

FIRST CONGRESS OF THE INTERNATIONAL PHYSICIANS FOR THE PREVENTION OF NUCLEAR WAR

HON. HAMILTON FISH, JR.

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 2, 1981

● Mr. FISH. Mr. Speaker, today I would like to bring to the attention of my colleagues the social, economic, and psychological consequences of a nuclear war as viewed by the First Congress of the International Physicians for the Prevention of Nuclear War. This is the last proceeding of the first congress which I will place in the CONGRESSIONAL RECORD.

I believe that the physicians have been very perceptive in their conclusions regarding the psychological impact on individuals who live in the threatening context of a possible nuclear war. The desensitivity and disbelief which individuals adapt in order to cope with the possibility of a nuclear war help explain why there is not greater fear of such an occurrence. I am hopeful that the efforts of the international physicians will bring greater awareness to the public of the awful consequences of a nuclear war.

The concluding remarks of the first congress remind us that a nuclear war is not inevitable and that rational men can find other means to settle differences. As the physicians note, war is a product of the mind which can be created and prevented by a selective use of the human functions of thought and action.

The material follows:

THE SOCIAL, ECONOMIC, AND PSYCHOLOGICAL COSTS OF THE NUCLEAR ARMS RACE AS RELATED TO HEALTH NEEDS

PREFACE

The health of mankind is inseparably connected with social, economic, and psychological strengths. The greatest risk of the arms race to health is that it increases the likelihood of nuclear war. Even without such a war, precious human, social, medical, and economic resources are presently diverted unproductively to the nuclear arms race, and this diversion adversely affects health.

SOCIAL COSTS

Any social undertaking of the magnitude of the arms buildup is bound to affect social structure and social values, regardless of the bases on which that society is built. In par-

ticular, activities develop which generate further pressure for more arms and thus establish a dangerous cycle. Moreover, as the scale of effort increases relative to the size of the social institutions and strength of values around it, these become subverted and re-oriented to reflect the same unproductive and impoverishing priorities and values inherent in the building of arms.

ECONOMIC COSTS

Consideration of economic issues ranges beyond the special expertise of physicians. However, we believe that they cannot be completely ignored. The diversion of a major portion of the world's economic resources for armaments increases the likelihood of nuclear war that would result in death and disability for much of the world's population. This is the ultimate health cost of the arms race, and would devastate economic and social organization. The arms build-up weakens the application of existing knowledge, technology, and resources to the prevention and treatment of health problems that currently affect large numbers of the world's population. The arms race increasingly burdens much of the world's population who live in less developed countries. These countries can least afford to use their scarce resources for arms and will suffer grave health and social consequences in doing so. Of greatest importance is that use of economic resources for armaments diminishes development of knowledge, technology, and manpower that could address global ecological and overpopulation problems. The strains these problems place on the world's limited resources will result, if not resolved, in dire health consequences, and in themselves increase the likelihood of a nuclear war.

PSYCHOLOGICAL COSTS AND EFFECTS

As physicians we can speak about human psychological responses with confidence based on our professional knowledge and experience. Nuclear arms have created a new reality for humanity with profound and widespread psychological effects. The consequences of the use of nuclear weapons defy human comprehension because of the enormity of their destructiveness. This danger grows steadily more acute as nuclear weapons production continues. Studies indicate among other effects, that living in this threatening context is undermining confidence in the possibility of a meaningful personal future. Further studies are needed of the psychological impact of the nuclear arms race upon various groups both in societies which possess nuclear weapons as well as in those that do not.

Living with the possibility of imminent annihilation in a massive nuclear exchange creates an unprecedented threat to individual human beings. Not only does one have to deal with the possibility of one's own agony or sudden death, but one must also confront the potential destruction of all that one loves—humanity itself—forever.

We have identified several psychological mechanisms which can have short term adaptive value for the individual in protecting himself from such disturbing emotions as terror and guilt. At the same time these defense mechanisms increase the likelihood that nuclear war will actually occur by impairing realistic perspectives of those who possess nuclear arms. This prevents the development and use of measures that could take control of the arms race.

(1) Avoidance. The problem is regarded as too big to handle, too overwhelming, too technical. We leave it to others, to the leaders and the experts, to solve. We become numbed and turn away.

(2) Drawing upon old ways of thinking. In the face of the terror evoked by an adversary we seek security as humanity has traditionally done through developing ever more dangerous weapons in increasing numbers, and from spurious notions of strength dominated by false concepts of winning and losing. Such thought patterns have become outmoded by the realities of nuclear weapons.

(3) Fear and impulsivity. The climate of terror created by the super power confrontation engenders a vicious cycle of fear and mistrust. Fear destroys the capacity for rational thinking and adaptive discrimination and promotes panic-driven, impulsive actions. Such actions provoke fear and similar panic responses in adversaries that further escalate the danger of conflict.

(4) Perceptual distortion. As a response to threat, regression to archaic thinking patterns occurs that divides the world into percepts of total goodness and total evil. An adversary comes to be perceived as an enemy that is completely evil, a process which impedes the discovery of areas of common purpose, and reduces the ability to deal realistically with actual threat or danger from this or other sources.

(5) Dehumanization. In order further to justify our hostility toward the adversary we deny to its leaders and people any human value or worthy motives. The distorted perception of human beings as inanimate objects tends to remove inhibitions against destroying them. The impersonality of graphs and pins on targets, or charts of megatonnage and throw weights (in fact the whole obscene jargon of the nuclear weapons race), destroys not only the appreciation of the humanity of an adversary, but one's own humanity as well.

CONCLUDING REMARKS

War is not an inevitable consequence of human nature. War is a result of interacting social, economic and political factors; it has been a social institution widely used over time to manage conflicts.

To argue that wars have always existed and that this social phenomenon cannot be eliminated ignores history, which has demonstrated a human capacity to change institutions and practices which are no longer useful or are socially destructive. Slavery, cannibalism, dueling, and human sacrifice are among the practices which the human race has recognized to be improper and has abandoned.

The genocidal nature of nuclear weapons has rendered nuclear war obsolete as a viable means for resolving conflict. Because inter-group tensions and conflicts are innate and thus inevitable, effective means for conducting and resolving conflict are indispensable. Human beings have developed and widely used such methods as avoidance/withdrawal, assertive non-violent behavior, unilateral initiative inviting reciprocation, competitive coexistence, negotiation, arbitration, and cooperation.

Rationality and foresight are unique human characteristics which have enabled individuals and groups to override primitive responses, to anticipate future consequences of behavior and, to choose courses of action which offer maximal ultimate benefit.

Wars begin in the mind, but the mind is also capable of preventing war.●

RADIO FREE EUROPE'S POLISH LANGUAGE SERVICE

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 2, 1981

● Mr. DERWINSKI. Mr. Speaker, on March 18, I was privileged to hear the testimony of Mr. Zygmunt Michalowsky, Director of the Polish Service of Radio Free Europe, before the Subcommittee on International Operations. Mr. Michalowsky's words were eloquent and moving; he described the development of the present political events in Poland and the role of RFE in reporting the news of these events to the people of Poland.

Two-thirds or more of the adult population of Poland—approximately 16 million people—listen more or less regularly to Radio Free Europe and the rest know of the broadcasts by word of mouth, Mr. Michalowsky said. It is not always understood that RFE and Radio Liberty, its sister radio which broadcasts to the U.S.S.R., are actually surrogate radio stations of the countries they cover. They provide internal news to the populations of the Eastern Communist countries denied to them by their governments. News from and about Poland, as Mr. Michalowsky pointed out, comprises 65 percent of the content of the Polish Service of RFE.

To illustrate the effect of RFE's broadcasts to Poland, Mr. Michalowsky brought with him from Munich an issue of an unofficial publication, widely distributed in factories in southern Poland, entitled "The Bulletin of Lower Silesia." This publication was dated July 1980, when the strikes began to spread in Poland, and gave the daily schedule of RFE broadcasts. It contained the following introduction:

> RFE is the only radio station carrying full information service concerning our country. Irrespective of whether we agree with RFE commentaries or not, the radio station is often the only source of information about all that is really going on here.

RFE reports local news, Mr. Michalowsky pointed out, fills in omissions in the official media and describes foreign reactions to Polish events. It has emphasized from the outset that negotiation rather than force is the way to solve labor and social conflicts and that "one must govern with the people and not against them." RFE also repeats innumerable "samisdat" publications which have made their way out of Poland.

Mr. Charles Ablard, Acting Chairman of the Board for International Broadcasting, which oversees RFE and RL, also testified on March 18. He paid homage to the Polish Service of RFE by quoting two Polish Commu-

nist Party officials. A spokesman for the central committee, according to Mr. Ablard, explained last December official efforts to relax domestic censorship, by saying:

We want the people of Poland to know not only from Radio Free Europe what is going on.

More recently, according to Mr. Ablard, a former member of the Polish Communist Party Politburo, Mr. Grudzien, former party chief of Katowice Province in southern Poland, disclosed publicly that he had first learned last summer of the outbreak of strikes elsewhere in Poland from RFE broadcasts.

Mr. Michalowsky and Mr. Ablard's examples of testimonials on the efficacy of Radio Free Europe were most instructive. Their testimony reinforced my belief that these radios—RFE and RL—are extremely powerful forces in the radio war which we are waging with the Soviet Union and its Communist allies. I think if you could have heard the testimony, you would have agreed.●

THE UNITED STATES AND THE LAW OF THE SEA

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 2, 1981

● Mr. GILMAN. Mr. Speaker, several weeks ago, we learned that the administration called for a full policy review of the U.S. position in the Conference on the Law of the Sea and that the administration abruptly dismissed several experts from the U.S. delegation's leadership. These two events occurred on the eve of the opening of the 10th session of the Conference that opened in New York at U.N. headquarters on March 10. Many of us had looked forward to this session of the Conference to resolve the few remaining issues in the text of the draft convention. That text consists of more than 300 articles and reflects substantial consensus among the 150 participating states.

Therefore, the effects of these abrupt changes in the U.S. Government's position in regard to the Conference have been of great concern to me and have had a severe impact upon the morale of the Conference.

Mr. Alan James, a retired U.S. Foreign Service officer and consultant to the Department on the Law of the Sea Conference has provided an excellent and thoughtful discussion of the impact of the changes in U.S. posture on the Conference in his March 25 article in Newsday, "Let's Get Up Steam for the Law of the Sea." I commend this article to the attention of my colleagues and request that the full text of the article be inserted at this point in the RECORD.

LET'S GET UP STEAM FOR THE LAW OF THE SEA

(By Alan G. James)

When the 10th session of the 3rd United Nations Conference on the Law of the Sea opened in New York March 9, delegates from more than 150 participating countries were jittery and despondent.

Last summer in Geneva the conferees—with the United States concurring—had agreed that the 10th session should see the conclusion of negotiations and the adoption of a convention on all the uses of ocean space. But delegates were stunned to learn from the press, on the eve of the session, that the United States would not agree to the adoption of a convention at the New York meeting, and that Ambassador George H. Aldrich, acting head of the U.S. delegation, and other professionals on the delegation had been dismissed by the Reagan administration.

Reactions of delegates ranged from concern that the United States intended to scuttle the longest, largest, most complex and possibly most important diplomatic negotiations in postwar history, to uncertainty about how far the Reagan administration would go in repudiating the bipartisan policies of four previous presidents who had committed the United States to achieving a widely acceptable comprehensive treaty on the Law of the Sea.

The abrupt and unexpected change in leadership of the U.S. delegation disturbed delegates deeply, because personal relationships are, arguably, more important at this conference than at other international negotiations. One factor that has facilitated progress has been the mutual trust and respect that the really influential delegates have developed for each other over many years.

During 3½ years as chief negotiator on seabed mining issues and as deputy to Ambassador Elliot Richardson, Aldrich earned the respect and admiration of the conference for being a tough, fair, and resourceful negotiator. Supporters and antagonists of U.S. positions alike were, therefore, chagrined to learn that he had been discharged, particularly at this late stage.

No one contests the prerogative of the new U.S. administration to review the bidding or to put a new man in charge of the delegation. But virtually all delegates—friends of the United States, and those who have been our toughest opponents—were appalled by the clumsiness and poor timing of the decisions.

Actually, the incoming administration had been put on notice last November that the 10th session would begin on March 9. Yet it allowed three months to pass before addressing either the substance of the negotiations or the major associated personnel question of who would succeed Richardson. A little more concern for coherent diplomatic procedure would have ensured that at least the most pressing decisions concerning our participation in these important international negotiations were taken deliberately and in good time.

There is no doubt that the administration sacked these officials despite their effectiveness because it felt they were closely identified with an international list (albeit hardheaded) approach to the law of the sea. It is also evident that the administration deemed them unable or undisposed to execute its policies. All Americans should be disturbed by the assumption that a career public servant is incapable of executing the policies of the government because he worked closely with the outgoing administration, especially in such a bipartisan matter as the Law of the Sea.

This assumption strikes at the heart of the concept of an apolitical professional service—a concept fundamental to good government. To react to pressure from special interests like the seabed mining lobby by firing officials whom it does not consider sufficiently responsive to its own interests sets an even more dangerous precedent.

At United Nations headquarters in New York, negotiations and meetings are taking place, but at dead slow speed. Delegates are waiting to learn what the United States is prepared to talk about. There seems to be a disposition on the part of the developing countries of the Group of 77 and other delegations to make the best use of the session under the circumstances. But the U.S. delegation is in a state of confusion and without clear guidance.

The text that delegates had hoped to put in final form in New York this spring is a long, complex document of more than 300 articles and eight annexes. Being a delicate balance of interlocking compromises that attempts to reconcile the divergent interests of coastal states, maritime states (those with substantial merchant and naval fleets) and landlocked states, the text is not, of course, a perfect document. But it goes a long way toward protecting vital U.S. interests.

It ensures right of unimpeded passage for U.S. warships and aircraft through straits (such as Gibraltar, Hormuz and Molucca), archipelagos and the 200-mile exclusive economic zones of coastal states. Our exclusive right to oil, natural gas and fish within 200 miles of our coasts is fully safeguarded. The agreed definition of the continental shelf ensures that we will have sovereignty over all mineral resources as far out as our continental shelf extends—which could be up to 500 miles.

Other provisions for protecting the marine environment (for example, our coastal waters), for the conduct of marine scientific research and for peaceful settlement of disputes arising out of the convention are, by any objective standard, to our net national advantage. The provisions of the draft convention offer a better prospect for a rule of law on the seas than has been known for centuries.

The most controversial part of the draft convention concerns the proposed regime of mining the deep seabed. There, at depths of 18,000 feet or more, lie nodules—potato-sized objects rich in the ores of nickel, cobalt, and manganese—in quantities sufficient for possibly centuries of consumption by U.S. industry.

The seabed mining system is a carefully crafted compromise between the two original extreme positions. The market-economy industrial countries, which would put up all the money for the mining, preferred maximum freedom from international control. The poorer Group of 77 wanted all mining to be conducted by an international body. The compromise is known as the "parallel system." Under it, private companies and an "enterprise," the operating arm of the proposed International Seabed Authority, would each be empowered to conduct mining in separate sites under the general regulation of the authority.

The original U.S. strategy had been to complete satisfactorily the negotiations on a number of key issues, agree to the adoption of a convention, then sign it and encourage others to do so, withholding ratification until a Preparatory Commission had fin-

ished its work on the rules, regulations and procedures of the International Seabed Authority and the United States could make a final judgment on the workability of the system. Meanwhile, it was hoped, the other provisions of the convention—navigation, resource exploitation rights, pollution prevention measures and the like—would ripen into customary international law, thus building precedents that would protect U.S. interests in the oceans, even if a treaty never came into force.

This sensible plan has been put in limbo by the U.S. decision to delay the negotiations. If this postponement is intended to permit a serious examination of the negotiations, however tardy, well and good. The conference can be put in motion again.

But there is an understandable fear at the conference and among U.S. law-of-the-sea experts that the review is simply a pretext of ultra-nationalists to scuttle the treaty. The Reagan Administration has promised that the review will be carried out in good faith and without preconceptions. We hope that it will also be expeditious. Let us also hope that those conducting it will take a broad approach, weighing the totality of U.S. interests in the oceans, unswayed by the pleadings of any special-interest groups.

Let us hope, too, that they will decide that the negotiations are worth pursuing and that a good-faith effort should be made to improve the seabed mining provisions while holding firm on the many other provisions that are so clearly in our interests. If further negotiations should prove that we cannot achieve a seabed mining regime that protects our economic interests and encourages investment, that is one thing. But the effort should be made. Going it alone is a prescription for trouble. For underdeveloped nations, which believe that the mineral resources of the deep seabed belong to all, might be angered by unilateral exploitation of them. In retaliation, they might take over U.S. assets.

The United States originally advocated a conference on the law of the sea to protect our vital national interests now and for a long time to come—not for idealistic notions about world government, but for calculated reasons of state. The political, economic and technological developments in the 1960s that led us to try to find ways to stop pollution and overfishing and remove threats to the freedom of movement of our military forces are as relevant today as then.

If realism and objectivity guide those conducting the U.S. policy review, the worst fears of delegates to the Law of the Sea Conference will have been proved groundless. Since U.S. national interests must always transcend lesser considerations, those of us who have been associated with the long effort to produce a charter for the seas, as well as those still so engaged, must do whatever we can to ensure a result that truly promotes U.S. national objectives on the oceans of the world.●

HOMEOWNERSHIP AND MORTGAGES

HON. BRIAN J. DONNELLY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 2, 1981

● Mr. DONNELLY. Mr. Speaker, today I have filed three bills intended to put and keep homeownership within the reach of more families.

The first of the bills will make more money available for home mortgages. It will allow banks and thrift institutions to establish a new category of savings account. Money placed in these accounts may be invested solely in mortgages on owner-occupied houses. To attract savings, the interest on these accounts will be tax free.

The second bill will permit savings and loan associations to offer "reverse annuity mortgages." This is specifically intended to assist retired and widowed homeowners who now must sell their homes or obtain a conventional mortgage if they hope to gain access to the equity in their property. With a reverse annuity mortgage, the lending institution uses the value of the loan to obtain an annuity for the homeowner. The annuity will return a steady income, either for a fixed number of years or for life. The reverse mortgage would be paid off when the house is sold, either by the homeowner or by his estate.

The third bill provides a refundable tax credit to tenants for the portion of their rent that is paid in local property tax. This is an issue of basic fairness. Renters have been excluded from the property tax credit only because their tax is paid indirectly. Besides correcting a serious inequity in our tax laws, passage of this bill should assist renters in saving for the down payment on a house if they decide to buy. It will also diminish the tax incentives for condominium conversions which are driving so many tenants out of their present homes.

Owning a home was until recently a standard part of the American dream. Economic conditions have turned that dream into a nightmare for young and old alike. The program I have introduced today will help restore that dream without creating new expensive programs or bureaucracies.●

CONGRESSWOMEN'S CAUCUS LOOKS AT THE BUDGET CUTS

HON. PATRICIA SCHROEDER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 2, 1981

● Mrs. SCHROEDER. Mr. Speaker, a number of individuals and organizations have requested information from the Congresswomen's Caucus on the impact of President Reagan's budget cuts on women.

The Women's Research and Education Institute (WREI) of the Congresswomen's Caucus has done such an analysis. I thought my colleagues would be interested in seeing how the budget cuts in AFDC, medicaid, food stamps, child nutrition, and fuel assistance will affect women.

PRELIMINARY ASSESSMENT OF THE IMPACT ON WOMEN OF THE ADMINISTRATION'S PROPOSED BUDGET

INTRODUCTION

This paper provides highlights of an evaluation of the impact on women of the fiscal year 1982 budget revisions, most of which involve a reduction in budget outlays. (A more complete report will follow.) These revisions are designed to slow inflation, stimulate the economy, and promote private saving and investment. Strengthening national defense is another primary goal. Whether the objectives of the budget revisions will be realized is beyond the scope of this paper. Instead, it focuses on cuts in program areas that disproportionately affect women, especially older women.

Millions of women will be seriously affected by proposed cuts in the broad areas of (1) education, training, employment and social services; (2) health; (3) income security; and (4) the administration of justice. Poor, near-poor, and minority women and their children will be hardest hit. In fact, a disproportionate share of the budget reductions are directed at programs in which women have a heavy investment. Fully one-third of the $44 billion reduction in budget outlays come from just two program areas—health and income security—that are largely designed to meet the needs of poor people. Women predominate among the poor; for every 100 men with incomes below the poverty level, there are 140 women. At the upper ages, the differences are more extreme: for every 100 poor older men (65 plus) there are 232 women.

Although some programs, largely defense, are targeted for increased expenditure, women will not experience any appreciable gains from those programs. Jobs may be created by increased outlays for defense; however, they are not likely to be jobs for which a significant number of women—particularly poor women—are now qualified.

Following is a program-by-program review of reductions that will disproportionately affect women.

It should be stressed that, in many cases, information on the impact of these cuts is seriously deficient. Neither the Administration, the Congressional Budget Office, appropriate government agencies nor groups affected by these cuts have been able to assess adequately the nature or the magnitude of the potential impact of some cuts. This weakness is especially apparent with respect to the minimum Social Security benefit. There are no available data on the characteristics of a large percentage of minimum beneficiaries, the income distribution of minimum beneficiaries, the contribution that the minimum benefit makes to financial well-being, or the number of persons who would be forced into poverty by its elimination.

Informed judgment about the appropriateness of other proposed cuts is impossible because of the lack of adequate information.

AID TO FAMILIES WITH DEPENDENT CHILDREN (AFDC) (IN FUNCTION 600)

AFDC is a state-administered welfare program that provides cash benefits to needy families with dependent children. The maximum is determined by states, under federal guidelines. The Federal Government provides matching funds for benefits and administration.

Among the Administration proposals are the following:

Count the income of all household members in determining benefits;

Require states to establish "workfare" programs under which beneficiaries must work in return for AFDC payments;

Limit child-care expense deductions; standardize work-related expenses; reform earned income disregards;

Require states to determine AFDC benefits based on previous actual income.

Impact on women

Reductions in AFDC outlays will most definitely affect women. Over ninety percent (93%) of the AFDC recipients are women and their children. Over 80 percent of all single parent households are headed by women; one third of these households are in poverty. According to Administration estimates, 400,000 families would lose all AFDC benefits; 258,000 families would have their benefits reduced. (These families account for one-sixth of all AFDC families.) Not only will these families lose all, or part of their AFDC families, but many of them will lose Medicaid benefits, as well, because they live in states where eligibility for Medicaid is predicated on eligibility for cash assistance.

Comment: The vast majority of AFDC recipients have incomes lower than the current poverty level. Reducing AFDC benefits, as proposed, would reduce program expenditures; however, some savings would be offset by increase in the cost of other programs, namely food stamps and subsidized housing.

Through these changes, the Administration aims to determine welfare needs more accurately, reduce fraud and abuse, eliminate payments to higher income families, and improve incentives to work. The proposed reductions, however, will not necessarily accomplish these objectives without drastically affecting the well-being of many women and children.

Presumably, the persons forced off the AFDC rolls are to enter the workforce. It is worth noting that almost 40 percent of all poverty-level female headed families with no husbands present had some work experience in 1979. The large majority of these women (69%) were service workers, including private household workers, or clerical and sales workers.

The money that these women earned was obviously inadequate to support them and their families, or they would not be poor. It is unrealistic to expect that many women will be able to offset a loss of AFDC benefits by additional earnings. Some may be able to increase the number of hours worked, but the low-paying occupations in which most of them work offer little opportunity for economic advancement. Moreover, employment opportunities for non-working poverty-level female householders are typically slim. These women tend to have few job-related skills; should they be able to find employment, it will be largely in unskilled and low-paying occupations.

The "workfare" requirement will do little, if anything, to promote the private-sector employability of those AFDC recipients who lack education and skills. There is no evidence that work relief programs have facilitated a significant transfer to paid employment. Rather, this requirement is regarded by many as a punishment for receiving AFDC benefits.

MEDICAID (IN FUNCTION 550)

Medicaid, a joint federal and state program, is designed to provide medical assistance to low-income persons who cannot afford medical care. States must extend eligibility to recipients of cash benefits from AFDC and SSI. In addition, they may provide Medicaid assistance to other groups. Eligibility criteria and services are state-determined; hence, there is wide variability among states in Medicaid programs.

The Administration proposes to place a cap on future increases in federal Medicaid outlays. Federal expenditures for 1981 would fall $100 million below the current estimate for 1981. Expenditures would be increased by five percent in 1982 and thereafter adjusted according to cost-of-living increases. States would be permitted to change reimbursement levels and modify criteria for eligibility and the range of services.

Impact on women

The cap on federal Medicaid expenditures will shift much of the burden for medical care to states and localities. About half of the states now face deficits in Medicaid programs. Thus, there seems to be little doubt that states and cities will be forced to tighten eligibility requirements and cut back on services.

Women and their children will be hard hit by cuts in Medicaid. Older women may suffer greatly. In 1979—

61 percent of all Medicaid recipients—or 11 million people—were women;

34 percent of all Medicaid recipients were under age 15;

36 percent of all households covered by Medicaid were headed by a female with no spouse present. Another 19 percent were nonfamily households headed by a woman;

Females 65 and older comprise 6 percent of the total population, but 12 percent of the Medicaid population. About 2.1 million Medicaid recipients were older females;

Nursing home care is the largest single health liability for older persons (AARP/NRTA). If long-term care costs are cut, the impact on older women, who comprise the large majority of the nursing home population, may be especially severe. Medicaid covers about 60 percent of the daily expenditures for nursing home care. (About 40 percent of all Medicaid expenditures go for nursing home care.)

Comment: Low-income persons will still require medical care, even with a cut-back in services. Currently, the medical needs of the indigent are not being met, and the inadequacy of care will be greater if states are unable to compensate for reduced federal expenditures. Medicaid presently serves just 39 percent of the population living below the poverty level. Only 34 percent of all older females living in poverty are covered by Medicaid.

If states introduce more restrictive eligibility criteria, the working poor may be most affected. At the present time, only 21 percent of the population with incomes between 100 and 125 percent of the poverty level are covered by Medicaid. Many of these are the working poor. Should states decide to provide Medicaid services only to recipients of public assistance, persons in this income range could lose their Medicaid benefits. It is unlikely that they would be able to afford adequate medical care on their own.

The impact of the proposed Medicaid cuts should also be considered in the context of proposed cuts in AFDC, which are discussed elsewhere in this paper. It is women who will be most drastically affected by the double whammy of losing AFDC benefits and, as a result, also losing Medicaid benefits.

The long-term costs of Medicaid cuts do not appear to have been considered by the Administration. Future demands on medical services can be expected if indigent people do not receive prompt and preventive medical attention. Such costs may more than offset the Medicaid savings.

FOOD STAMPS (IN FUNCTION 600)

Food Stamps subsidize the food purchases of households that have a net income below the poverty level and assests of less than $1500. The Administration proposes, among other changes, to lower the gross income eligibility to 130 percent of the poverty level, reduce food stamp allotments for those families whose children get free school lunches, and use monthly and retrospective accounting. Some 2 to 3 million people (400,000 to 600,000 families by CBO estimates) may be dropped from the food stamp rolls if these proposals are enacted.

Impact on women

Six out of 10 food stamp households are headed by women, many of whom are elderly. Women would thus be clearly affected by food stamp reductions. For example, households with school-aged children, 5 to 18—which would lose more in benefits than most other groups—account for over half of all recipient households, according to the latest census figures. These households are generally headed by females with no husband present.

CHILD NUTRITION (IN FUNCTION 600)

Child nutrition programs include the national school lunch programs, the breakfast program, the special milk program, child care and summer feeding programs, and special nutrition programs. The Administration proposes eliminating or substantially cutting most federal child nutrition programs.

Impact on women

As many as 700,000 women may be eliminated from Women, Infant and Child (WIC) programs that provide food packages to pregnant low-income women, infants and children. (100,000 women are currently on the waiting list for WIC programs.)

About 1.6 million children may be affected by the reductions in the national school lunch programs. (Another 360,000 would be affected by cuts in the breakfast program.) This cut may also have a disproportionately heavy impact on women. Households with a female head and no husband present comprise 26 percent of all households but 48 percent of all households with a free or reduced price school lunch. Reducing subsidies for school lunches will force an increase in school lunch prices. According to the National Urban Coalition, the working poor who qualify for reduced price lunches would have to pay 60 cents per lunch instead of 20 cents. Many households, especially those with several children, may not be able to afford this increase.

Comment: Reducing outlays for meal programs has short-, and long-term consequences. In the short-run, there may be hungry and undernourished children. The consequences may be especially evident in the long run, when the costs of providing medical care to the inadequately nourished, particularly those dropped from WIC programs, become evident.

FUEL ASSISTANCE (IN FUNCTION 600)

The Administration proposes consolidating funding for energy assistance into a block grant and cutting the budget by 25 percent. This cut would reduce average fuel assistance benefits at a time when energy

costs are soaring. The full impact of these revisions depends largely on how states respond and may, therefore, vary significantly among the states.

The National Urban Coalition warns of an increase in the number of households with utility bills greater than their monthly income during heating months. The consequences of this development could be disastrous, especially among the elderly who risk hypothermia from the cold.

Impact on women

The Fuel Assistance Program was designed to help the poor meet their heating needs; because 58 percent of all households below the poverty level are headed by females with no spouse present, any reduction in fuel assistance could be expected to affect women disproportionately. How many fuel assistance recipients are women, however, is not known.●

TRIBUTE TO VERY REV. INNOCENT LOTOCKY

HON. DENNIS M. HERTEL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 2, 1981

● Mr. HERTEL. Mr. Speaker, I wish to pay tribute to the Very Reverend Innocent Lotocky, OSBM, whom Pope John Paul II has named bishop of the Ukrainian Rite Catholic Diocese of Chicago. Bishop Lotocky was consecrated on March 1, 1981, in Rome, Italy.

Bishop Lotocky was pastor of Immaculate Conception of the Blessed Mary Parish in Hamtramck, Mich., and local superior of the order of St. Basil the Great, OSBM, since 1962. He now serves from the diocese seat in Chicago; the Diocese of Chicago includes the State of Michigan and extends westward to the coast.

Bishop Lotocky was born November 3, 1915, in Ukraine. He studied for the priesthood at the Basilian Monastery in Krechov, Ukraine; at Krystynopol, Ukraine; and in Czechoslovakia, where he was ordained in 1940. He completed his doctoral dissertation in Vienna in 1945.

Since his arrival in the United States in 1946, Bishop Lotocky has served as: Master of novices, provincial superior of the American province, and as a parish pastor in New York and Chicago.

I know the American people, including the nearly 1 million Ukrainian Rite Catholics in the United States and the approximately 15,000 in the Detroit area, will join me in extending sincere congratulations and warmest wishes for well-being.●

ECONOMICS WITHOUT HUMANITY EQUALS RETRENCHMENT

HON. ANTHONY TOBY MOFFETT

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 2, 1981

● Mr. MOFFETT. Mr. Speaker, I think I speak for a majority of Democrats when I say we are willing to accept the magnitude of the cuts recommended by President Reagan. The outstanding difficulty we have with his program, however, is that some of the cuts are immensely difficult to justify on the basis of cost effectiveness or basic social justice. We believe it is possible and appropriate to shape a budget which satisfies the test of cost-benefit analysis and which is consistent with the dictum of St. Matthew:

That you have done unto the least of these, my brother, you have done unto me.

The Reagan budget removes some of the inequitable subsidies from the Federal budget—attacking farm price supports, advocating highway, airport, and bargeway user fees, and the like. We will all benefit from this shift in philosophy. Other cuts do not stand up well to even the most casual examinations. One example:

President Reagan seeks to cut the women, infants, and children's program which provides a pregnant, needy woman with $395 per year of nutritional supplements. The alternative, of course, is spending $500 per day for hospital monitoring of low birth weight babies, whose conditions are caused by mothers whose diets are inadequate.

Regrettably, the Reagan budget has singled out the poor and the most vulnerable in a variety of areas—low-income energy assistance, health care for the poor, the nutrition programs—where Government service represents both compassion by the Nation and a wise social investment in the future. These programs often represent the difference between an individual living on the margin, and his complete disappearance as a contributor to society.

The Reagan budget, once you get past the philosophical overlay, is a retrenchment on our commitment to those people. It is economics without humanity, cuts which will haunt us in the months and years to come.

Mr. Speaker, one of the most eloquent analyses of the Reagan budget appeared last Sunday in the New York Times. I urge the Members from both parties to read these thoughtful comments. We can find true fat in the budget without the massive retreat called for by the Reagan/Stockman doctrine. I hope we have the heart and decency to rearrange the priorities contained therein:

[From the New York Times, Mar. 29, 1981]

CHARITY

What has Ronald Reagan declared war on? If, as first appeared, the enemy is America's economic straits, then many of us, suspending neutrality or partisanship, are willing to enlist. But increasingly we're dogged by the suspicion that he also has another enemy in mind: the philosophy of social justice this country has evolved over the last 50 years.

"I don't think people are entitled to any services," says Budget Director Stockman. Martin Anderson, the President's chief domestic adviser, says, "People are quite benevolent. That's good. But it's quite a different thing for people to demand that they have a right to a certain amount of income or services." And elsewhere the Administration says that services chopped out of the Federal budget can be supplied by the states, or business or volunteers.

In other words, there is no such thing as social obligation. There is only charity—someone else's charity. If that is the Administration's philosophy, it deserves to be denounced.

First, some semantic business. Standing alone, the budgeteers' word "entitlements" certainly does sound arrogant. The poor are not constitutionally entitled to any services they deem necessary. But there are some things people should not have to beg for.

Food, for instance, or safe housing, or a lawyer when there's trouble. Would Mr. Stockman or Mr. Anderson deny a sick person access to a hospital emergency room? Surely not. Is that an entitlement to medical services? Call it what you will.

Americans are a generous people, exceedingly generous. Carl Bakal has written that our collective private philanthropy comes to about $180 a day for each man, woman and child in the nation. In Canada, it's $35. There is a vast role for private philanthropy; there may even be a case for enlarging it. Maybe, when Federal job programs are chopped back, industry could help pick up the slack. Maybe, when funding for legal services is eviscerated, private law firms could step in. Maybe. But two problems get in the way.

If this idea of charity, of supplanting Federal social justice with private voluntary action, is sincere, then why does the Administration not pursue it?

The genial host, corporate persuader and Great Communicator in the White House needs no lessons in stimulating the private sector. Has he invited the heads of the 100 biggest companies to the White House to encourage them to create a private job program large enough to offset his budget cuts? Has he assembled partners from large law firms and urged them to provide surrogate legal services?

No. Which raises the suspicion that his Administration is much less interested in proving theories than in abandoning social welfare altogether.

Even if the Administration now injected action into this theory of voluntarism, it would not suffice.

Deep down, society knows that. Consider jobs. Franklin Roosevelt wrote to a friend in 1934 that "I cannot say so out loud yet, but I hope to be able to substitute work for relief." In 1965, Lyndon Johnson and Henry Ford II launched their then-celebrated, soon-forgotten JOBS program. Richard Nixon, Gerald Ford and Jimmy Carter all had similar ideas. One after another, under

the pressure of this merger or that retrenchment, they disappeared.

But assume that a voluntary jobs program could work. How much more can voluntarism do, generally? Federal spending constitutes three-fourths of the total spent for social welfare. Even if Mr. Reagan could mobilize every one of the 800,000-odd charitable institutions, he could not begin to replace Government's role in providing services that help people ranging from alcoholics to lactating mothers.

The Federal Government has undertaken so many services because society has learned that the states alone cannot combat hunger, that volunteers alone cannot provide minimal medical care. Society has turned to the Federal Government because it is the logical place to address such needs, through the organization of voluntary programs like VISTA, or the Foster Grandparent program that Mrs. Reagan has taken to heart.

That Washington is the logical place doesn't mean it is necessarily efficient, or effective, or even humane. But to say "no entitlements," or "let the states do it," or "let the private sector do it" is a barely varnished way of saying "Don't do it." And that is not a war against inflation. It is a war against the poor.●

STEELHEAD TROUT PROTECTION ACT

HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 2, 1981

● Mr. BONKER. Mr. Speaker, I rise today to introduce legislation designed to protect steelhead trout, one of the great game fish in the United States. Several States have traditionally recognized the tremendous game fish characteristics and recreational value of steelhead. These States currently ban the commercial harvest of steelhead trout and require that such fish be taken only with sport fishing equipment. Such a prohibition formerly was in effect in the Pacific Northwest. In 1974, *United States* v. *Washington*, the so-called Boldt decision, changed that. This decision made it possible for Indians to net between 45,000 to 55,000 steelhead commercially—thus denying sportsmen the right to sport fish for this exciting game fish.

I believe the Federal Government has an obligation to address this situation. Congress, in enacting the Black Bass Act, intended to assist the States in the enforcement of States statutes which prohibit the commercial taking of any species of game fish.

These Federal court decisions, allowing the commercial netting of steelhead trout by the tribes have had detrimental effects on sport fishing, on the economy of the affected States, and on the ability of those States to manage the species effectively and uniformly.

That is why I today am introducing the Steelhead Trout Protection Act.

This legislation allows a State to prohibit the commercial taking of steelhead both on and off Indian reservations, so that all fishermen are treated in a like manner. It also allows a State to enter into a written agreement with an Indian tribe to establish different regulations as to the taking of steelhead by tribal members on reservation land, thus giving the States the flexibility to allow Indian fishing for ceremonial and subsistence purposes.

The Indian tribes are given the authority to license sport fishermen who wish to fish for steelhead on the tribes' Indian trust land or in waters within the exterior boundary of the tribes' reservation. They also are given authority to enforce regulations on tribal lands. The tribes, however, would not be allowed to regulate the taking of steelhead in a manner inconsistent with State law.

This legislation is not intended to work a hardship on tribal fishermen. The rights of tribes to license and manage fees to sports fishermen on Indian lands may well be more valuable to the tribes than the current commercial fishery for steelhead.

The U.S. Court of Claims has been given exclusive jurisdiction to hear any cases based on any alleged taking of Indian treaty rights. Any such claim resulting from this legislation may be filed by an affected Indian treaty tribe. In considering the value of such a claim for compensation, the Court of Claims shall reduce the value of any commercial fishery by the new right to license sports fishermen.

I believe the tradeoff for tribes will adequately compensate them. This legislation is fair, and is designed to protect one of our great natural fish resources.

I hope my colleagues will join me in this effort.●

THE SUFFERING REFUGEES

HON. MIKE LOWRY

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 2, 1981

● Mr. LOWRY of Washington. Mr. Speaker, yesterday I joined a number of my colleagues in addressing the problem of violence in El Salvador. Today, I would like to say a few words about some of the victims of the violence. Much has been said about the more than 10,000 deaths in El Salvador in 1980. That figure is, indeed, shocking and tragic. It is shocking and tragic that every day more people are killed—that the war has not stopped even if we do not read about it as often as we used to.

Regrettably, there are thousands more victims of the violence in El Salvador. These men, women, and children—young and old—live with the memories of their lost family members and of their former ways of life. Reports of 80,000 to 110,000 within El Salvador are heard. In addition, some 300,000 Salvadorans have fled to Honduras in the past 2 years. These people tell of villages being burned, people being tortured, homes destroyed, family members being hunted. The number of people involved and the conditions upon which they are forced to exist wrenches the hearts of all of us.

Assessing guilt is not my aim here. Often drawing attention to a problem in a graphic way can serve as a catalyst for change. Surely, our sending military arms and advisers is not improving the plight of these people—nor is it drawing them any closer to a resumption of their former lives.

This tragic situation is addressed in the following article from the April 1981, World Press Review which I would like to add to my comments.

THE SUFFERING REFUGEES—A WAR'S FORGOTTEN VICTIMS

(By Luiz Fernando Emediato)

Dulce Nombre de Maria may never forget the scene of her father's death: his chest torn open, the blood flowing, and her mother screaming. Dulce Nombre de Maria (Sweet Name of Mary) is barely five years old, but she might as well have lived a century in hell. At a wretched refugee center in San Salvador operated by the Roman Catholic Church, she doesn't react when one of the 500 other children calls her over to play. Dulce's mother, in the strong voice of a woman hardened by suffering, recalls how her husband was tortured for hours before he died.

These are innocent victims of war—wives, young children, and aged parents of guerrillas. Some of them are peasants chased off their lands. After roaming the countryside, fleeing war and death, they have found the weak protection of the Church. Because El Salvador is not officially at war these destitute people are not eligible for aid from international institutions such as the United Nations.

Diplomats estimate that there are 100,000 to 110,000 war refugees in El Salvador. The Government puts the number at 80,000, about half of whom are being helped by the Red Cross. The rest are either under the protection of the Church or still wandering. In the past two years 300,000 Salvadorans have fled to Honduras. But the most persecuted group—some 4,000 who are linked, related, or sympathetic to the guerrillas—are still in San Salvador, under protection of the Ecumenical Salvadoran Association for Humanitrian Service and Aid, a Church agency.

Theirs is the country's major refugee center, located in the San José de la Montana seminary, until recently the seat of the Archdiocese of San Salvador. Now the Apostolic Administrator, Don Arturo Rivera y Damas, has moved elsewhere, causing fear among the refugees because the bishop's presence had assured them a degree of protection. Every morning and afternoon Government agents or right-wing commandos appear at the gates to see if they recognize any of the new arrivals.

The first group of refugees came to the seminary in March 1980. They were welcomed by Archbishop Oscar Arnulfo Romero, who was assassinated seventeen days later. He is venerated as a saint, and his tomb in the cathedral is covered with notes thanking him for miraculous cures and divine favors. The number of refugees at the seminary began to grow after Msgr. Romero's death and has continued to swell in direct proportion to repression by the Armed Forces and the paramilitary groups, principally in rural areas.

Some twenty babies have been born in the seminary—without medical assistance because doctors who used to care for the refugees ended their service after right-wing vigilantes killed one of them and threatened the others. There is no medicine, and children suffer from diarrhea, worms, measles, chickenpox, colds, and mycosis. There is rarely any milk; only beans. There is no running water, and there are no beds.

A member of the Church's refugee agency reports, "So far only three countries have sent help—England, Holland, and Germany. Some private institutions, such as Caritas and the World Council of Churches, have also helped. But we need more aid, especially food and medicine." There is little hope for relief unless a state of civil war is declared.

A Church volunteer reports that the refugee centers have been raided. She recalls that the President of the military-civilian junta, in a radio speech, called the centers "sanctuaries for subversives." Then, she says, "they came and dragged away a refugee—just a boy—and beat the priest who tried to protect him. The boy was found dead later."

The guerrillas' offensive, which began in January, split the Salvadoran Church in two. The most prudent Church officials pulled back, while the boldest formed the Msgr. Romero People's Church Coordinating Committee (CONIP), which the junta subsequently accused of being in league with leftist guerrillas. Only after considerable prodding does Don Rivera y Damas talk about the split. "If we remain divided," he says, "we end up helping those who seek a disunited Church."

He will not venture a guess concerning the outcome of the bloody conflict between the Left, the Right, and the Government. But he is sure of one thing: Although the guerrilla offensive was ineffective, it wasn't defeated. "The violence will continue with widespread sacrifice and suffering. As long as there is injustice there cannot be peace."●

ENTERPRISE DEVELOPMENT AND TARGETED TAX CUTS

HON. HENRY J. NOWAK

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 2, 1981

● Mr. NOWAK. Mr. Speaker, a great debate is taking place today across our Nation about the efficacy of targeted tax cuts designed to aid the development of small- and medium-sized firms in distressed areas. I recently reintroduced a refined version of my bill, H.R. 390—the Job Expansion and Urban Development Act of 1981, which is one of the targeted approaches being discussed.

Underlying the targeting strategy is the belief that while broad-based, across-the-board tax incentives are needed to speed investment and increase productivity in our business community as a whole, at the same time we must provide special, supplemental incentives to meet the special needs of our older central cities.

However, of the various bills introduced to achieve this targeting effect all mainly address the need for tax code changes. It is becoming increasingly apparent, as this debate unfolds, that this approach is too narrow and ignores the dynamics of enterprise development.

Deregulation and tax reduction alone cannot spur enterprise development in distressed areas. Deregulation and tax reduction alone cannot and should not entirely replace urban economic development programs designed to provide funds for infrastructure and up-front capital for the purchase of plant and equipment and for working capital.

Targeted tax incentives should be a supplement to our economic development diet, not the whole meal.

The Enterprise Development Act of 1981 (H.R. 2965)—the successor to my H.R. 390—which I have introduced this week seeks to provide a more balanced approach to our urban economic revitalization efforts.

Title I of this act would insure the continuity of the Economic Development Administration's (EDA) role in urban revitalization by consolidating the EDA authorities under the Public Works and Economic Development Act of 1965. This consolidation would enable EDA to continue its broad range of economic development activities, patterned after the current title IX programs targeted to areas suffering from long-term economic deterioration.

Under title IX, eligible areas devise a local economic development strategy, subject to EDA approval. EDA then commits itself, in effect, to single or multiyear block grant funding to the local agency for implementing the plan. Title IX works well, as a device for targeting limited Federal aid to areas of need while giving localities control over their destinies.

The title IX strategy is consistent with President Reagan's belief in both the block grant approach and the need for returning more responsibility to localities.

From my own experience with a title IX effort in Buffalo and western New York, I know that this can work. The operative agency, the Erie County Industrial Development Agency, with EDA assistance, has created a Regional Development Corp. to conduct a revolving loan program.

This is geared toward providing financial assistance to growth-oriented industrial and high technology firms to help them supplement funding from the private marketplace.

In the Buffalo area, the RDC leveraged $4 million in EDA money, for instance, to generate $17.2 million in private financing to 22 locally controlled small manufacturers. This resulted in the retention or creation of 1,038 jobs.

I believe EDA—particularly in its title IX efforts—has proven itself to be too valuable an economic development tool to totally eliminate, as the administration has suggested. However, title I of my bill (H.R. 2965) would provide a compromise alternative by retaining the best EDA tools while scaling down its annual budget by more than 50 percent.

The funding provided by title I of my bill, when coupled with the targeted tax incentives in title II, represent a coherent, streamlined approach to urban economic revitalization.

For example, H.R. 2965 also amends the Small Business Investment Act of 1980 to encourage small business investment companies (SBIC's) to invest in small firms located in targeted job expansion zones. SBIC's can now borrow money from the Small Business Administration at a ratio of 3 to 1 or 4 to 1 public to private dollars. My bill would enable them to invest on a 4 to 1 or 5 to 1 basis, with the SBA coordinating and monitoring lending to smaller firms located within the zones.

The targeting criteria for establishing the zones in H.R. 2965 are similar to the criteria in H.R. 390, but more restrictive. The criteria include levels of poverty, unemployment, lag in per capita income and job lag.

The tax portion of H.R. 2965 is identical to H.R. 390, except the refined version provides an incentive to firms which establish employee stock ownership plans (ESOP's). Due to various tax provisions, ESOP's help firms raise capital and allow employees to get a piece of the action. The net result can lead to higher productivity and investment. H.R. 2965 allows firms to deduct an amount equal to 50 percent of the total compensation paid all its employees, if such amount is used to purchase securities to he held by the ESOP trust.

The other tax incentives included in H.R. 2965 would:

First, stimulate new investment by providing increased depreciation allowances.

Second, provide a 5-percent investment tax credit on new structures placed in service by a qualified business in a targeted zone. This will encourage new construction and business and development.

Third, increase the amount of used property eligible for the investment tax credit from $100,000 to $400,000.

Fourth, provide for a 25-percent investment tax credit on the rehabilitation of commercial buildings.

Fifth, help startup companies through a refundable investment tax credit of up to $100,000.

Sixth, expand the present targeted jobs tax credit to stimulate training and employment of the long-term, hard-core unemployed residents of economically deteriorated cities.

Mr. Speaker, I believe H.R. 2965 is a sound, integrated approach to enterprise development in distressed areas.

The combination of EDA title IX seed moneys and the tax incentives will go a long way toward providing small- and medium-sized firms with capital needed for growth and also stimulate construction and building rehabilitation in our older communities.

The scenario would result in a not-so-vicious circle: Smaller firms and startup firms—which generate the most new jobs in our economy—will be encouraged as funds are made available for infrastructure improvements and access to low cost capital loans is assured.

The refundable investment tax will immediately improve internal cash flow generation.

As the firms begin to prosper and make profits, the other tax incentives will encourage investment in new/used equipment, new/rehabilitated buildings. Firms will receive a job tax credit for hiring additional employees and these employees may benefit from stock ownership if the firms utilize an ESOP to purchase machinery or buildings.

This package of investment tools in H.R. 2965 recognizes the facts of life about the birth and maturation of business enterprises in distressed areas. I believe it offers an important, unique and somewhat revolutionary approach to one of the most intractable problems confronting our Nation—revitalizing chronically distressed urban areas.●

POOR TREATMENT OF GOVERNMENT EMPLOYEES WILL HURT REAGAN'S POLICIES

HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 2, 1981

● Mr. BARNES. Mr. Speaker, in last Sunday's Washington Post Haynes Johnson wrote an exceptionally fine column about the misguided Government policies which constantly harass top-flight Federal personnel and encourage them to abandon public service. In the President's efforts to combat waste, he gives short shrift to the talent that exists already within Government—talent which is crucial if he hopes to implement his policies.

I include the Haynes Johnson column in the RECORD for the information of my colleagues. It gives us something to think about as we deal with issues affecting Federal employees in this Congress, and cuts through the simplistic rhetoric that we hear so often.

The article follows:

[From the Washington Post, Mar. 29, 1981]

EMPLOYE FRUSTRATION DRAINING BEST BRAINS OUT OF GOVERNMENT

(By Haynes Johnson)

We've been through waste and fraud week, another president's attempt to capitalize on the public's fed-up feeling about government. And, yes, to do something about it.

Ronald Reagan's team says its campaign against waste and fraud will be led by a new group, "The President's Council on Integrity and Efficiency." Despite that stern Prussian-like title, the effort is worthy and the internal governmental problem real enough. But this highly publicized Reagan campaign, no less than others ordered by his presidential predecessors, masks a greater form of governmental waste.

What's happening inside the government today presents a problem worse than waste and more serious than fraud. The evidence points to a tragic breakdown of the government service itself. If the voices this reporter has been hearing recently are correct, the nation faces a governmental crisis all the more dramatic and damaging because it seems so little understood or discussed. Even though it has been building for years, you don't hear presidents warning about this crisis. They are, you see, part of the problem.

The waste I'm talking about involves the loss of many of the government's best people; the crisis comes from the deterioration of morale and rising frustration at all levels of the U.S. workforce.

Last week the president of the largest union representing federal employes talked openly about a confrontational mood among his membership that could lead to wildcat strikes and slowdowns throughout the government. Even top management officials are discussing the possibility of forming executive unions. A sense of anger and anxiety comes through conversations with government employes of both high and low rank. And the flow of talent out of the government continues.

Stop any top U.S. official on the streets of Washington these days, one of them says, and ask when that person will complete the 25 years of service making him eligible for early retirement. "He'll immediately tell you, not down to the year or the month—but to the exact day," this official remarks. "I think the government is heading down the road to a disaster. Within five years the group of supergrade people that are now betweeen the ages of 50 and 60 will all be gone. The best of them are gone already. . . . The next president of the United States will turn to his top government people and say, 'Do this,' and he'll find no one able to get it done."

That respected official, who entered government service under Eisenhower, found himself rather startled at the apocalyptic tone of his remarks, "but I just can't find any cause to feel other than deeply dismayed today." In that, he seems sadly typical of many others.

From New Year's Day through the first week in March, the federal Office of Personnel Management received 38,000 retirement papers from federal employes—twice the average monthly rate of retirements, according to the Bureau of National Affairs.

A government study completed before the new year provides disturbing evidence of the rapid departure rate in the government's key managerial echelon—officials who oversee two million civilian employes, a budget of more than $600 billion, and whose decisions have a profound effect on all American citizens.

"The retirement rate for career employes at the Executive Level V pay ceiling," the study says, "has increased from 17.6 percent of those eligible to retire during the 12 months ending in March 1978 to an astonishing 57.1 percent during the 12 months ending in March 1980."

Not even the dullest set of statistics about federal retirements can cloak an ominous trend—unless, that is, you are among those who believe all U.S. bureaucrats are as bad as recent presidential candidates have depicted them and think the answer to the woes of govenment is to dismantle it all.

The problem inside the government extends into every area of the workforce. "The bottom line is morale is very low and frustration is very high," says Kenneth Blaylock, national president of the American Federation of Government Employes, the largest federal workers' union. "Government employes—and that includes managers—feel they've been kicked and kicked and kicked.

. . . Now they're forced to pay the price again with a 4.8 percent pay raise in a time of 12 percent inflation and cuts in retirement benefits."

His point about pay and benefits touches a sore nerve among all federal employes. A special commission that recently completed a study of executive government salaries found a direct link between low pay and increasing difficulties of attracting and retaining outstanding people for top U.S. positions.

The commission also found that salaries of key U.S. officials in the three branches of government have fallen dramatically behind the corresponding managerial groups in private business. In addition, in most cases Congress has not allowed annual increases called for in a salary-cost-of-living act for top officials, placing those people sigificantly behind what they had promised legally. "The resulting compression of salaries," the commission adds, "has created the anomalous situation in which up to seven tiers of management are now being paid identical salaries."

The complaints about pay and benefits are real enough, but the grievances within the government are more serious than economic issues—and they go beyond the present emotional state of fears, rumors and resentments spurred by the Reagan administration's blueprint for federal hiring freezes, pay caps, reductions in force and slashing or junking of government programs and agencies. Another top U.S. official, whose work has drawn praise from a number of presidents, both Democrat and Republican, and who is now highly placed within the White House operation, says we are approaching the end of "a decade of despondency for bureaucrats." He fears the period ahead could worsen.

Ronald Reagan was not the first candidate to run against the bureaucracy and then have to lead it as president. Richard Nixon and Jimmy Carter sounded similar themes, and encountered similar problems in power. Reagan's presidential task is even more delicate, for it is his fate to preside

over the government at a time when respect for public officials has declined even further and the concept of public service continues to generate greater expressions of public cynicism.

Reagan's gifts for conciliation and leadership will be put to a critical test in his handling of the federal workforce. He can attempt to inspire it and begin rebuilding a national sense of public service or he can witness a further disintegration in an already dispirited federal establishment. Before Reagan took office, a veteran bureaucrat, Bertrand M. Harding, who headed the National Civil Service League, said he hoped the new president and his people would put aside all their campaign rhetoric about "faceless bureaucrats." As he said, "for better or worse, these 'faceless' persons belong to the president and for the moment are all the glue he has to keep the government together."

The danger is the glue is coming unstuck.●

LANTOS LAUDS CARPENTER'S BRAVERY

HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 2, 1981

● Mr. LANTOS. Mr. Speaker, America is shocked and saddened by the senseless violence which continues in our political process. As an American by choice, I recognize the need for accessible leadership. But, this type of violence undermines the very pillars which support our democratic form of government. I join with my colleagues from both sides of the aisle in a call to eliminate this cancer on the American soul.

There is an actor in this tragedy who played a heroic role in subduing the would-be assassin. He is a man who deserves our thoughts and prayers as he remains hospitalized in Georgetown University Hospital. I am speaking of Mr. Alfred Antonucci, a citizen who demonstrated tremendous courage in the confusion of Monday's events. Mr. Antonucci is a decent American who has worked in the labor movement since the thirties. He is a man committed to his country and to his union. As the business agent and president of Carpenters Local 1750, of Cleveland, Ohio, he knows the realities of life as a hard working citizen. On Monday he demonstrated the most noble aspects of the American character.

I would urge all of my colleagues to join with me in applauding the courage of this fine citizen. For those of us who may not be aware of the actions of Mr. Antonucci, I enclose the following article from the Wednesday morning edition of the New York Times:

MAN WHO TACKLED SUSPECT IS ILL

WASHINGTON, March 31.—Alfred Antonucci, an Ohio labor official who was apparently among the first people to tackle John W. Hinckley Jr., the man charged with the attack on President Reagan, was hospitalized with severe chest pains two hours after the incident.

Mr. Antonucci, who was in fair condition today at Georgetown University Hospital, is a 68-year-old carpenter from the Garfield Heights section of Cleveland and a member of the Building and Construction Trades Department of the American Federation of Labor and Congress of Industrial Organizations.

Eileen Antonucci, his daughter-in-law, said in a telephone interview from Aurora, Ohio, that Mr. Antonucci had said that he was roughed up in the melee that followed the assassination attempt. She said that Secret Service agents and local police officials later questioned her father-in-law for about an hour and a half.

President Reagan was leaving the Washington Hilton Hotel, where he had spoken to the labor union group when he was wounded. Mr. Antonucci and a friend had arrived at the hotel too late to hear the President and were standing outside as Mr. Reagan left.

"He said the guy was standing right in front of him with his hands in his pocket," the daughter-in-law said. She said that she and her husband, Dominic, first learned that Mr. Antonucci had tried to subdue Mr. Hinckley from friends who had recognized him from television film of the assassination attempt.

"My husband went down to Washington this morning," she said. "I talked to him at 11 A.M. while he was at the hospital and he said that his father is still very emotional every time he starts to talk about it."

Christina Puc, a spokesman for the hospital, said Mr. Antonucci was admitted there at 5:23 P.M. yesterday after he complained of chest pains.

"He was apparently suffering from cardiac arrhythmia," she said, referring to an irregularity in the rhythm of the heartbeat. "He is in fair condition. Only his immediate family is permitted to see him."

Mr. Antonucci's wife, Joan, who was with him at the labor union gathering, visited her husband in the hospital.●

NATURE OF EL SALVADOR GUERRILLAS

HON. THOMAS M. FOGLIETTA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 2, 1981

● Mr. FOGLIETTA. Mr. Speaker, on March 2, 1981, the Washington Star printed an article about a small group of political prisoners in El Salvador. It is poignant in its description of the manner in which these people became involved in the leftist activity which is destroying their country, their homes, and their families.

Becasue I believe it may help put in perspective the composition of the people against whom the U.S.-aided government in El Salvador is warring, I would like to call it to the attention of my colleagues and hereby submit it for consideration today. The underlining for emphasis is my own.

FOR SALVADORAN PEASANTS, WAR IS MATTER OF SURVIVAL

(By Bernard Diederich)

They stood on the stage of the auditorium of the 4th Brigade, a green-painted camp surrounded by new high barbed-wire fence and concrete watch-towers in a little barren valley misnamed el paraiso, paradise.

And for these emaciated, barefoot peasants, many of them suffering from sores and illnesses, the camp of the Salvadoran military in the Northern Department of Chalatenango bordering with Honduras was paradise after what they had been through.

The government said they had been part of the leftist movement trying to overthrow the government. An officer pointing to the dejected looking collection of this country's peasantry, 52 men and women and 30 children, said, "They are guerrillas."

The government calls them arrepentidos, repenters, and a local newspaper said they had surrendered at La Reina, a small town in the hills a dozen miles away, because they were "tired of fleeing in the mountains after their leaders had abandoned them."

The peasants on the stage tell a story of this guerrilla war. Their concern was sheer survival, they insist. Unfortunately for many, the way in which they choose to survive often is translated into a political affiliation without any idea of its ideological content. They are pressured by right and left. Some, like the people on the stage, become tired of fleeing and give up.

Peasants on both political sides move from village to village seeking shelter and food until there is no longer any place to go. None of these people on the stage appeared to be politicized. Each said in a quiet voice. "We just want peace and work."

Victor America, 34, looked 50. "I had hardly any land. I just grew a little corn." His wife with vacant eyes nursed their seventh child and said in a hardly audible voice, "The subversives, they took the last of our corn. We have nothing." One of her daughters had open sores on her head.

Arturo Mendez Vasquez was silenced by his handsome white-haired wife, the mother of 10 children, who said, "We just want peace, nothing more, just peace." An officer, not unfriendly, even sympathetic, asked a young man, a son of Mendez, "You were a militiaman, right?" Like most of these peasants he was quick to please and nodded his head. His mother said quietly, "No he wasn't."

One old man with calloused hands who didn't even know his age said, "We are tired of fleeing through the hills and starving. The subversives made us cut wood and fetch water, and the woman had to make tortillas."

A young man said none of them bore arms in the hills. "They promised us arms, but they didn't give us any." Added another youth, "Maybe they didn' trust us."

There was no way of knowing whether they were telling the truth. The peasants have learned that survival can mean saying the right thing at the right time.

Their admitting to be members of the BPR told more about their situation. The BPR, Revolutionary Popular Bloc, was founded in 1975 as a mass organization and grew rapidly among trade unions and peasants. The BPR enjoyed its greatest strength in the impoverished countryside, but when this non-guerrilla organization, which was aided by the Jesuit priests, linked up in the late 1970s with the guerrillas to the FPL—Popular Liberation Forces—the poor peas-

ant members automatically became members of that leftist force.●

AMENDING THE FEDERAL AIRPORT ACT

HON. ADAM BENJAMIN, JR.

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 2, 1981

● Mr. BENJAMIN. Mr. Speaker, I am introducing legislation today to amend section 16 of the Federal Airport Act of November 25, 1947.

The Federal Airport Act of 1947 deeded land to the city of Gary, Ind., to be used for airport purposes. The Gary airport now proposes to convey a portion of its land to the Indiana Toll Road Commission for construction of the Cline Avenue South Interchange which fulfills responsibilities invoked by Public Law 95-599 and Public Law 96-106.

Section 16 of the 1947 Federal Airport Act provides that the land could only be used for airport purposes or it would automatically revert to Federal ownership.

This bill releases the city of Gary from that condition and authorizes the Secretary of Transportation to approve conveyance of the land to the Indiana Toll Road Commission.●

U.S. DEPORTATION OF EL SALVADORANS

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 2, 1981

● Mr. BROWN of California. Mr. Speaker, despite the efforts of many of us here in Congress, this administration continues to send military aid to the junta of El Salvador. Thus, we are, in effect, aiding the continuation of the violence there.

Many El Salvadorans have been fleeing that violence torn country, crossing the borders into neighboring Honduras, and also coming north to the United States. Instead of empathizing with their plight, the United States has seen fit to deport them, without due process, back to the very circumstances they fled.

I urge my colleagues to review the following article and to consider their actions should they be confronted with a similar situation:

[From the Newsletter of the Religious Task Force on El Salvador, January-February 1981]

SALVADORANS IN DANGER OF DEPORTATION

Human rights activists share increasing concern over the plight of illegal Salvadoran refugees who have fled political repression. At least 500,000 undocumented Salvadoran aliens are now living in the United States with new arrivals daily. Most of these refugees are landless peasants who have exchanged "plows for mops and trays" as they perform service jobs in areas around Washington, DC, Los Angeles, and San Francisco. The Immigration and Naturalization Service is engaged in a concerted effort to deport these people back to their violence-torn country.

As evidence of internal political repression mounts, pressure has been exerted upon the Immigration and Naturalization Service and the State Department to grant these refugees "extended voluntary departure" status. On April 24, members of Congress wrote acting Secretary of State Warren Christopher that he "advise the Attorney General and the Commission of Immigration to halt the deportation of Salvadoran nationals until stability returns to that suffering country."

The State Department's response was to praise the moderate, reformist military dominated junta and to state that "special treatment can not be justified at this time" for Salvadorans.

According to the Immigration and Naturalization Service Operating Instructions, guidelines exist to authorize the extension of departure time for aliens when compelling humanitarian factors would make deportation unconscionable. Consequently, persons who receive extended voluntary departure are entitled to receive work authorization and certain government benefits. The use of this permission, however, has reflected how U.S. policy would prefer to view the internal strife in other countries, rather than a realistic view. For example, Cubans who fled to the U.S. in hopes of a better life were considered political refugees, while Haitians, subject to torture and well-documented repression in their country, have been treated as refugees and deported. Nicaraguans who supported former President Somoza received extended time in the U.S. while those who fled Somoza's regime were allowed less than a month of asylum here.

Many of the Salvadorans presently in the United States have fled from their country to escape possible death for demanding social changes—redistribution of the wealth, higher wages, and basic human rights. The U.S. government continues to deport them despite protests of human rights organizations and immigration law offices which testify that deportees are often taken into custody upon their return for questioning and face possible arrest or worse by the government.

It seems clear that U.S. immigration policy is being interpretated with geo-political, rather than Humanitarian considerations, especially since 10,000 Salvadorans have been assassinated in the past year.●

VOLUNTEER SPIRIT CHARACTERIZES SIERRA MADRE IN LIBRARY EXPANSION

HON. JOHN H. ROUSSELOT

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 2, 1981

● Mr. ROUSSELOT. Mr. Speaker, we all express our appreciation to those who get funding without the Government's help.

As a matter of fact I say "fantastic." When the citizens of Sierra Madre, a city in my district, found their library to be lacking in size and serving capacity, expansion seemed to be the answer. But there also seemed to be no money to do that.

When seeking funds for this expansion they found that, with the passage of proposition 13, the amount of money available to the library from the city was significantly reduced. The limited funds that the city does have are already allocated to several major maintenance projects related to the library's roof and heating/air-conditioning system.

It became obvious, then, that any funds for an expansion program have to come from the community itself. This was an appropriate approach in keeping with the volunteer spirit that characterizes Sierra Madre. In fact, Sierra Madre's very first library was built in 1887 with $3,000 raised entirely by voluntary contributions from 40 families.

This early library continued to be operated by a citizen's association until 1910 when it was turned over to the city. The Sierra Madre Room Group was organized in 1980 to develop plans for raising funds to expand the library.

Even with declining budgets, the community's use of the library continues to expand. In the past 25 years the number of volumes has gone from 18,000 to 47,000 and periodicals subscribed to have escalated from 79 to 180. This current fund drive will make it possible to meet present and future needs with increased efficiency.

I am sure that my colleagues will join me in applauding the citizens of Sierra Madre for their community serving efforts. In this time of national economic strife with the need of restraint in the growth of tax spending, Sierra Madre is a shining example of American determination and certainly warrants recognition.●

IN SUPPORT OF DR. ERNEST W. LEFEVER

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 2, 1981

● Mr. DERWINSKI. Mr. Speaker, confirmation of Dr. Ernest W. Lefever's nomination as Assistant Secretary of State for Human Rights and Humanitarian Affairs will be considered shortly by the Senate. Support for his candidacy is growing. I am placing in the CONGRESSIONAL RECORD, an endorsement of Dr. Lefever from the Committee for a Balanced Human Rights Policy, Box 432, Rockville, Md. 20850, as part of the committee's statement of purpose.

The committee's statement reads as follows:

STATEMENT OF PURPOSE

The Committee for a Balanced Human Rights Policy was established to promote a balanced, constructive and responsible human rights policy consistent with the interests of the United States and the Free World.

One of the promises made by President Reagan in the course of his campaign was that the direction of U.S. foreign policy in the area of human rights would be changed. Polls had indicated widespread concern by the American people that human rights considerations had been allowed to influence and even determine policy toward Third World and allied countries—often in a manner inconsistent with U.S. and Free World security interests. Questions were raised by a substantial segment of the American electorate concerning an apparent "double standard" in the application of human rights policy. While numerous voices were raised—both inside and outside the government—in protest of violations in certain pro-Western Latin American, African and Asian countries, little public outcry was heard concerning such outrages as were occurring in Cambodia, Ethiopia, Cuba, Eastern Europe, the Soviet Union and other countries subject to Marxist rule.

Responding to these concerns, and in fulfillment of the popular mandate he received on November 4, 1980, President Reagan has designated Dr. Ernest W. Lefever as Assistant Secretary of State for Human Rights and Humanitarian Affairs. Dr. Lefever, we believe, is fully qualified to restore balance in the nation's human rights policy, and will implement policies and programs designed to strengthen human rights around the world consistent with the freedom and independence of the United States and its allies.

DR. LEFEVER: A LIFETIME DEVOTED TO HUMAN RIGHTS

Dr. Lefever is founder and president of the Ethics and Public Policy Center of Washington, D.C., an independent research organization.

He received a B.D. and Ph.D. in Christian ethics from Yale University, spent six summers as a volunteer in work camps serving the needs of slum children in Philadelphia, unemployed persons in Kansas and migratory laborers on the West Coast—long before such social and civil rights work became fashionable.

In 1942, he helped relocate the first Japanese-Americans from a California internment center. For three years after World War II, he was a field director for the World's YMCA, helping resettle prisoners of war.

In 1948, 1949 and 1966, he visited Czechoslovakia, Hungary, the Soviet Union, Poland and East Germany. Reflecting on his visits to Eastern Europe and the Soviet Union, Dr. Lefever has noted "a deplorable tendency in America to forget, overlook, or downplay the Eastern European victims of Communist oppression. For this reason, I favor a balanced human rights policy which addresses itself in the first instance to the most grievous and brutal assaults on human dignity and freedom."

An ordained minister for 40 years, Dr. Lefever has visited over 85 countries, has written or edited 14 books on morality, ethics and foreign policy, and has lectured widely at home and abroad.

DR. LEFEVER'S STATEMENT ON HUMAN RIGHTS, MARCH 6, 1981

I am committed to pursue a vigorous and humane foreign policy. Human rights are an inescapable concern in all our foreign policy deliberations. Human freedom and dignity are most seriously violated by direct and indirect aggression, the imposition of foreign control on other people, external subversion, genocide and terror. Totalitarian Communist states are the greatest violators of the full range of human rights. Soviet-bloc regimes not only brutalize their own people, but some of them are exporting their repressive system by subversion and terrorism.

The U.S. Government should use all appropriate means needed to defend and extend freedom, including private persuasion, public condemnation and withholding of trade, which may be necessary and consistent with our security and that of our allies.

We Americans may not always agree on methods, but we are united in our commitment to enlarging the frontiers of freedom and respect for human rights around the world.

ANALYSIS OF DR. LEFEVER'S HUMAN RIGHTS POLICY

Dr. Lefever is clearly committed to deepening and broadening the concept of human rights around the world—both among friends and adversaries. As the Washington Star has accurately pointed out, "Dr. Lefever considers human rights the heart of American foreign policy."

However, Dr. Lefever recognizes that their are gradations of repressiveness among countries, just as there are gradations of good and evil. His belief, in accordance with that of an overwhelming majority of Americans, is that the implementation of a human rights policy should, first and foremost, be consistent with the freedom and independence of the U.S. and its Free World allies.

Consistent with this belief, he has written in "Policy Review" that "the greatest threat to human rights comes from messianic totalitarian regimes whose brutal grip brooks no opposition." He has written critically of the manner in which "human rights activists" have tended "to underestimate the totalitarian threat to the West * * *. In their preoccupation with the minor abridgement of certain rights in authoritarian states, they often overlook the massive threat to the liberty of millions * * *. It would be a great irony if Washington in the name of human rights were to adopt a policy that would deliver 35 million largely free South Koreans into virtual slavery."

It is interesting to note that Dr. Lefever's adversaries, in their recent statement of oppostion to his confirmation, have found this balanced and realistic "worldview" a premary point of concern and disagreement with Dr. Lefever. To wit:

"Ernest Lefever's opposition to 'the human rights standard' rests on his conviction that the greatest threat to peace and freedom in the world today comes from Soviet-backed totalitarianism."

One can only conclude that those adversaries believe that Chile, El Salvador and the Republic of the Philippines are the "greatest threat to peace and freedom in the world today."

But Dr. Lefever's concern about human rights extends to countries other than those of the Marxist bloc. He concurs fully with Ambassador Jeane Kirkpatrick that in relations with friendly, although authoritarian regimes struggling against subversion by totalitarian forces, "U.S. policy could effectively encourage this process of liberalization and democratization * * * aimed at producing gradual change * * *" Such a policy, according to Dr. Lefever, should first and foremost "advance human rights by strengthening our resolve and our resources to defend our allies who are threatened by totalitarian aggression and subversion;" secondly, should make use of "quiet diplomatic channels at appropriate times and places;" and, thirdly, through the maintenance of "a regional stability conducive to responsible political development and mutually beneficial economic intercourse * * * broaden the range of cultural and political choice."

In conclusion, it is clear from Dr. Lefever's written and spoken statements that he is deeply committed to "enlarging the frontiers of freedom and respect for human rights around the world." That, in doing so, he will recognize Soviet-backed totalitarianism as the most dangerous threat to human rights, and that he will seek to liberalize and reform regimes allied to us through diplomatic suasion and joint political and economic intercourse and development. This policy, we believe, is one that is balanced, consistent with U.S. and Free World interests and in accordance with President Reagan's commitments and position on human rights.

WE ENDORSE

The individuals and organizations listed below are representative of over 20 million Americans concerned with the nation's human rights policy. Many of them trace their ancestry to countries presently under Marxist totalitarian control, or subject to subversion by Soviet-backed forces. Consequently, they have had a consistent and continuous record of interest and advocacy of human rights for all peoples suffering under repressive regimes.

It is our belief that Dr. Ernest W. Lefever has dedicated his life towards those selfsame principles of freedom, democracy and independence on which this country is based. Dr. Lefever, in our opinion, is eminently qualified to assume the position of Assistant Secretary of State for Human Rights and Humanitarian Affairs.

We extend our endorsement to Dr. Lefever and urge the Members of the Senate to unanimously confirm Dr. Lefever's appointment.

Dr. Edward Yambrusic—President, National Confederation of American Ethnic Groups (17 national groups; 33 National and State organizations).

Dr. Mikulas Ferjencik—President, Czechoslovak National Council of America.

John Hebling—German American National Congress.

Istvan Gereben—Executive Secretary, Coordinating Committee of Hungarian Organizations in North America (representing 15 national organizations).

Dr. Igor Glagolev—Director, Association for Cooperation of Democratic Countries.

Dr. Yuri Olkhovsky—Congress of Russian Americans, Inc.

John J. Kossiak—President, Byelorussian Congress Committee of America.

Dr. John B. Genys—Lithuanian American Council, Inc.

Dimiter Baharoff—President, Bulgarian National Front in the U.S.

Dr. Valentina Kalynyk—President, Americans to Free Captive Nations.

Gunars Meierovics—American Latvian Association in the U.S.A., Inc.

Cecilia Bros—President, American Ethnic League.

Laszlo Pastor—Chairman, Executive Committee, American Hungarian Federation.

Dr. Julian Hutnyk—President, Carpathian Alliance.
Maido Kari—Estonian American National Council.
Rev. Baan Vitez—President, World Federation of Hungarian Freedom Fighters.
Dr. Mychajlo Kushnir—Organization for Defense of Four Freedoms for Ukraine.
Dr. Alexander Ronnet—President, Romainian American National Congress.
Albert Karali—President, Coalition for a Free Russia.
M. Karkaj—President, Ukrainian Committee of America.
Dr. George Radojevich—President, Serbian American Committee.
Dr. Le Phuoc Sang—President, American Coalition of Asian Pacific Organizations.
Dr. Laszlo Varga—President, Federation of Free Hungarian Jurists.
Prof. Andrew Ehrenkreutz—President, North American Studies Center for Polish Affairs.
W. Rostrigin—President, Cossack American Nationalists in the U.S.
Dr. Konstanty Hanff—President, "Wolna Polska".
Quac Vien Bieu—President, Chinese American Committee for Social Justice.
Dr. A. Bonifacie—President, Croatian National Association.
Dr. Doan Le Phoung Hoang—Secretary General, Indochinese American Coalition for Human Rights.
Ulana Mazurkevich—President, Human Rights for Ukraine Committee.

Eugene Gymesy Kasas—President, World Federation of Hungarian Artists.
Baothong Minh—United Community of Boat People.
Ha Cong Minh—Hao Buddhist Community for National Restoration of Vietnam.
Dr. Istvan Eszterhas—Chairman, Committee of Hungarian Liberation.
Paul Fenchak—President, Ukrainian Education Association, Inc.
Prof. Anthony Bouscaren—Chairman, Syracuse Captive Nations Committee.
Frank Simko—President, Hungarian Freedom Fighters Federation, New York Chapter.
John Basarab—Director, Ukrainian National Information Service.
Prof. Askold Skalsky—Editor, "News from Ukraine".
Dr. Walter Dushnyck—Editor, "The Ukrainian Quarterly."
Alexandra Schwed—Ukrainian Anti-Defamation League of Philadelphia.

Many of the organizations listed above include nationwide chapters and affiliates too numerous to list—totalling over 1000 organizations. Organizations are listed for identification purposes.●

SUPPORT OF PRESIDENT REAGAN'S BLOCK GRANT PROGRAM

HON. ELDON RUDD

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 2, 1981

● Mr. RUDD. Mr. Speaker, those of us who are truly interested in righting the economic ills of our Nation by restoring sound fiscal policies, are concerned by the number of voices we hear crying out about the number of needy Americans who they say will be left out in the cold if the President's program for consolidating categorical social welfare grants into block grants is approved. Nothing could be further from the truth.

The fact is that although the President's budget sharply slows the rate of growth of social welfare programs, the actual spending levels recommended for fiscal years 1981 and 1982 Health and Human Services' budgets exceed those of previous years. Funds will be consolidated and delivered for apportionment by the States according to their specific priorities. How anyone can call this sensible move toward direct Government insensitive is incomprehensible. It seems more accurate that those who are loudly protesting that people will suffer from this move, are really bent on unraveling the administration's package solution to soaring social welfare spending.

A chart of the growth in Federal spending for social programs shows a dramatic incline during the last decade. Between 1970 and 1980, outlays went from approximately $90 billion to more than $300 billion for welfare programs. No one believes that this increase is due to corresponding growth in the number of people requiring assistance. This huge debt has been the result of shortsighted liberal spending policies which have fostered an amalgamation of federally administered programs which seek to blanket the Nation's social concerns at an outrageous cost to the taxpayers. With the last election, the taxpayers have signaled that their limit of tolerence has been exceeded.

Meeting critical social needs while cutting administrative costs is the goal, and consolidation of 40 categorical grants into 4 block grants addressing basic objectives will save more than $1 billion in administrative funds. I wholeheartedly support the President's budget proposals, specifically the block grant programs, as consistent with his promise to protect essential social programs while carrying out the mandate of the people to limit the influence of the Federal Government and reduce the growth of Government spending.●

SALVADORANS TELL OF FEAR

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 2, 1981

● Mr. GARCIA. Mr. Speaker, as the violence and instability in El Salvador continues, the real victims in that country's battle become more apparent: its people. The campesinos, the shopkeepers, the laborers, and the teachers are caught in a power struggle over which they have no control. They are the byproducts of a faltering society. Many Salvadorans have, therefore, been forced to leave their country for political reasons. I do not believe that it is fair to turn back these refugees because they do not have proper documentation, at least not until they have pleaded their cases before the U.S. Government. They must be given due process. For the benefit of our colleagues, Mr. Speaker, I insert in the RECORD a copy of an article from the Los Angeles Times regarding this issue.

SALVADORANS TELL OF FEAR

(By Laurie Becklund and Paul Nussbaum)

More than a dozen Salvadorans who have applied for political asylum in the United States have been staging an intermittent hunger strike since Jan. 1 at a U.S. Border Patrol detention camp in El Centro "to dramatize our plight," a member of the group said Wednesday.

Members of the group said in telephone interviews that they have refused many of their meals to demonstrate their fear of being returned to violence-wrached El Salvador, and to demand reduced bonds and speedier hearings.

Harry Malone, the U.S. Immigration and Naturalization Service official in charge of detention and deportation at the camp, said he had received a statement from the group demanding that their asylum hearings be speeded up but he denied that any detainee had consistently refused to eat. "Everybody's at lunch right now," he said.

The Salvadorans described the hunger strike as "intermittent," saying that everyone was eating or abstaining from meals as he chose.

The protest was set off by a telephone conversation one of the Salvadorans in El Centro had with a friend who had been flown back to El Salvador at Christmas on a routine deportation flight.

"He said he saw bodies alongside the highway to the airport in San Salvador the next morning and that he recognized some of them from the flight," said Ricardo Hernandez, 20.

Hernandez said he left El Salvador in December after he was fired from his factory job during a strike and threatened by a factory manager when he sought severance pay. "He told me he was the brother-in-law of a junta member and he had the power to have people killed," Hernandez said.

About 9,500 persons have died in El Salvador during the past year because of political violence.

Lawyers representing the men held press conferences in San Diego and Los Angeles to demand that "the men be treated as

human beings and not as criminals." They said the men's bonds, set at $2,000 to $4,000, should be lowered to allow their release.

Because formal deportation hearings, particularly political asylum cases, can take months or years, the attorneys said, their clients want to work to support their families in El Salvador while their cases are being processed.

"We are not criminals," said Mauricio Castellanos, 30. "I am a professional man and was about to receive my license to practice law. But there are others here who were in the National Guard, or teacher's unions, or farmers. We're all afraid to go back—that much we have in common.

"And we all feel like dogs in a cage. We can't work. We can't go back. We can't do anything."

Because of increasing violence in El Salvador, church and lawyers groups have pressed the Carter Administration to grant what is termed "extended voluntary departures" to all Salvadorans in the United States. That status, which was granted to Iranians after the overthrow of the Shah Mohammed Reza Pahlavi and to Nicaraguans before the fall of dictator Anastasio Somoza, would allow them to stay here until the danger in El Salvador diminishes.

When a delegation of U.S. Roman Catholic bishops met with President Carter Dec. 22, the delegation reported that Carter had promised to consider the matter. However, a few hundred Salvadorans a week continue to be returned to El Salvador from Los Angeles alone, an immigraton official said.●

U.S. CONTRIBUTIONS TO THE PLO

HON. CHARLES E. SCHUMER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 2, 1981

● Mr. SCHUMER. Mr. Speaker, I would like to bring to the attention of the House a serious breach of commitment by the Reagan administration in formulating its foreign policy. If this is really an administration committed to stamping out global terrorism, then why does the administration's State Department authorization bill allow U.S. payments to the United Nations to be funneled to the Palestinian Liberation Organization?

From the beginning of this administration we have been told that the fight against international terrorism would be a top priority. The previous administration's excessive concern for human rights had contributed to the erosion of America's power in the world. The new emphasis on stamping out international terrorism was hailed as the key to reversing this decline. No terrorist act would go unnoticed, and none would be ignored.

Given this well-publicized position, it is hard to understand why the administration's bill omits a provision added by the Congress to the last State Department authorization bill, which prohibited any distribution of U.S. funds to U.N. organizations that are merely fronts for PLO activities—namely, the Committee on the Exercise of the Inalienable Rights of the Palestinian People, and the Special Unit on Palestinian Rights.

Although the administration's bill has been introduced in the Senate, the House Foreign Affairs Committee is drawing up its own bill. I have already introduced a separate bill which will make permanent the prohibition on distribution of U.S. funds to the PLO. I strongly urge the Foreign Affairs Committee to incorporate this prohibition in its bill. Should the committee report a bill that does not contain such a provision, I will offer the prohibition as an amendment at the appropriate time. My colleague from New York, Senator MOYNIHAN, will introduce a similar amendment in the Senate next week.

I need not remind the Members of this body of the terrorist practices of the PLO. This is an organization which bombs schoolhouses and gladly takes credit for it. It is an organization which has as its foremost goal the elimination of an entire country and its people. To allow U.S. money contributed to the United Nations—an organization that is supposed to be dedicated to world peace—to be funneled to such a terrorist gang would be unconscionable.

Is this any way to fight international terrorism?●

THE PLIGHT OF SALVADORAN REFUGEES

HON. WILLIAM R. RATCHFORD

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 2, 1981

● Mr. RATCHFORD. Mr. Speaker, as the horrible civil strife in El Salvador drags on, many have found it easy to ignore the very human factor in this affair. Every day large numbers of Salvadorans have sought to enter the United States out of fear that they and their families are no longer safe under the repressive Duarte regime.

Rightwing elements in that violence torn nation have undertaken systematic acts of physical abuse and murder against many individuals or organized groups perceived to be a threat to the central government. Death squads regularly roam the cities and the countryside in pursuit of those on their hit list that are to be eliminated or tortured. The story of one such targeted individual is captured in the following statement recently released by the Council on Hemispheric Affairs. This Government, Mr. Speaker, must be prepared to assist the unfortunate victims of this violent conflict forced to flee their homeland.

The story of Tulio Mendoza Figueroa and the many like him is but further evidence of a government unable or unwilling to restrain elements in its armed forces bent on ruthless violence. As a nation unalterably commited to the protection of human rights, we can no longer condone or foster this unfortunate situation.

Mr. Speaker, I insert the following statement of the Council on Hemispheric Affairs into the CONGRESSIONAL RECORD:

STATEMENT OF THE COUNCIL ON HEMISPHERIC AFFAIRS

An estimated 30,000 Salvadorans have fled to the United States since the beginning of 1980. Most of them arrive with little or no money and are forced to enter the country illegally, as it is nearly impossible for them to obtain visas. Having fled the mounting political violence and the threat from rightwing death squads in El Salvador, the U.S. is deporting them at an estimated rate of 400 per month from the Los Angeles area alone.

The case of Tulio Mendoza Figueroa, a school teacher who fled his home on December 26, when he learned his name was on the "hit list" of a local death squad, is typical of many refugees arriving in the U.S. Mendoza was a member of ANDES (Asociacion Nacional de Educadores Salvadorenos), the major teachers' union in El Salvador. The teaching profession, like every other which attempts to organize to protect its rights, has been subjected to brutal repression by the armed forces and by the right wing death squads. Mendoza's only crime was to have been a member of ANDES, which like almost all the other independent unions has joined the opposition umbrella group.

Mendoza and two other teachers learned from a former student, who held his teachers in high esteem, that they were to be killed. The student who warned them was a member of the death squad which was to have carried out the murders. The three hurriedly left the country with Mendoza's family, travelling by bus through Guatemala into Mexico. Unable to find work and running short of money, Mendoza left his family in Guadalajara and pushed north with the other two. The three were arrested by the U.S. Border Patrol while attempting to cross near Tijuana, and were told that unless they signed an agreement to return to El Salvador voluntarily, they would spend a year in jail and "suffer a lot." Having run out of money, and without any knowledge of U.S. law, they signed.

A rumor reached the detention center where they were being held that of the 60 Salvadorans who had been sent back at Christmastime, 42 had been killed by the security forces upon arrival. Terrified, the detainees tried to annul their "voluntary" agreements and contracted lawyers in the community. It was only then that Mendoza learned that, by law, the Immigration and Naturalization Service (INS) must provide all those arrested with written notice of their rights, which include the right to a deportation hearing, the right to seek political asylum, and the right to legal counsel. By signing the "voluntary" agreement, they had forfeited these rights and could be sent back to El Salvador.

This is exactly what happened to Mendoza's two friends. Unable to raise the bond money required for more than one of them, the detainees elected Mendoza to be released so that he could publicize the plight of the refugees. Mendoza was released pending a hearing (he was able to retract the de-

parture agreement) on his request for political asylum. He says his two friends were sent back to San Salvador on February 12. He has not heard from them since.

Mendoza and his compatriots in this country are convinced that if forced to return, they would be killed, or at best forced underground. The official INS procedure for all returnees is to make their identity known to the Salvadoran government, and then to fly them back to San Salvador. In El Salvador, they are subjected to a government interview to determine why they left the country.

One American university professor, who has seen films of these interviews, describes the level of abuse as "frightening," and said that "there is no doubt in my mind that somewhere between 5% and 10% of those who are returned are executed, because the government had something on them, a labor union or something." Millard Arnold, a former State Department official, says, "It just stands to reason. The odds are that some of them are going to be tortured or killed." Despite the mounting evidence of danger, the deportations continue.

U.S. immigration law provides for the safety of foreign nationals endangered by "civil war or catastrophic circumstances" in their home countries. Under this provision, the State Department could issue a blanket exemption from immigration requirements for Salvadoran refugees. Many of these refugees, like Mendoza, have specific reasons (membership in a "hostile" labor union, etc.) to fear political retribution should they return, and would thus be eligible for political asylum. Others who left because they feared the growing violence would affect them could be protected by being granted what the INS terms "extended voluntary departures," which would allow them to remain until the danger at home has lessened. The U.S. seldom before has sent refugees back into a situation of civil war, where they face grave dangers. The treatment of Salvadorans is almost unprecedented, but apparently not without motive.

In the case of El Salvador, political considerations arising from the Reagan administration's near-paranoia about alleged communist influence in Central America have overruled humanitarian concerns, with the result that innocent civilians are being sent back to almost certain persecution, if not to their deaths. Requests for blanket "extended voluntary departures" must originate with the State Department. But State thus far has consistently ignored pleas by a coalition of members of Congress, religious organizations and other civic groups, as well as from its own Human Right Bureau, to grant the Salvadorans refugee status.

The United States has, of course, been generous in offering asylum to refugees from communist and other "unfriendly" governments (in the past, the "extended departure" provision has been applied to refugees from Vietnam, Laos, Iran and—most recently—Nicaragua), because in doing so it confirmed the evil nature of these nations. But to admit refugees from El Salvador that are equally deserving of asylum would seriously undermine the already controversial position the U.S. has taken in support of the military-civilian junta there. It would be tantamount to conceding what opponents of the U.S. policy have claimed all along—that the ruling junta in fact condones many of the human rights abuses occurring there, and is guilty of persecuting its own citizens.

It appears that the much vaunted Reagan "consistency" in foreign policy has taken another blow from its own morally inconsistent manner of implementation. By making a distinction between refugees from so-called communist nations and from allies who are nominally anti-communist, the U.S. is blatantly ignoring the humanitarian intent of the Refugee Act of 1980, which states that ". . . . it is the historic policy of the United States to respond to the urgent needs of persons subject to persecution in their homelands."●

TRIBUTE OF THE BOY SCOUTS OF AMERICA

HON. WALTER E. FAUNTROY

OF DISTRICT OF COLUMBIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 2, 1981

● Mr. FAUNTROY. Mr. Speaker, last year more than 2 million Cub Scouts in the United States joined in celebrating the golden anniversary of the Cub Scout program of the Boy Scouts of America.

The Cub Scout program was officially instituted in 1930 in order to provide for younger boys the fun of home centered activities which would involve their families and friends. The objectives of the Boy Scouts of America and cub scouting for boys 8 through 10 are character development, citizenship training, mental and physical fitness, and fun and adventure. During the golden anniversary year, the 30 million Cub Scouts joined the program to participate in the excitement and life-lasting experience of scouting.

The scouting movement has been active in the Washington, D.C. area since scouting, as developed by Lord Baden-Powell in England, arrived in America in 1910. The first scouting constitution and bylaws for the area were adopted in 1911. The local council was incorporated on May 12, 1922, as the District of Columbia Council, subsequently changed to the National Capital Area Council. Since its beginning the council has organized scouting to fully involve parents, leaders and organizations in the District of Columbia and nearby Virginia and Maryland.

Early records of the National Capital Area Council indicate Cub Scout packs were organized beginning in 1930 and the growth of this younger boy program has continued to the present time. At the end of 1980, over 27,000 Cub Scouts were registered in the Washington, D.C., region. They participate in activities in 734 packs located in 17 counties between Fredericksburg, Va., the District of Columbia, and Frederick, Md.

Cub scouting has not severed its ties with the past and has continually evolved to keep up with the ever-changing needs of America's boys and their families. Historical material regarding the early activities of Cub Scouts in the National Capital Area Council is currently being researched. Some Cub Scout packs are developing a history of their packs which material can be preserved for the future, and many units which have been in operation for decades—some over 40 years—are trying to locate former members. Such research has developed information, such as the Cub Scout pack formed at Fort Myer, Va., in April 1931, which was a mounted unit.

Activities during the golden anniversary to help Cub Scouts celebrate their 50th birthday included hundreds of celebrations on the unit level and program events to help them remember the past, consider the present, and plan for the future.

This same enthusiasm continues in the 51st year of cub scouting. As a former scout, I am proud to endorse and support the scouting program. I invite you to join me in saluting the Cub Scouts of America for their contributions to helping strengthen our communities, and indeed our Nation.●

SPACE, PROGRESS AND DEFENSE

HON. STEPHEN L. NEAL

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 2, 1981

● Mr. NEAL. Mr. Speaker, as the United States prepares to launch its first Space Shuttle, it is time, I think, to take stock of our space program and the need to continue it. The cost of the program over the years has been a subject of some criticism, and there are now among us those who consider it a luxury we can ill afford.

But as we continue to consider the part space exploration and utilization should have in our national priorities, I believe we must look beyond those blinding dollar marks in the sky, as it were, and reflect on the advisability, if not the necessity, of maintaining our leadership in this technology.

I was very much interested by two articles which appeared on the same day, March 22, in the Washington Post and the Washington Star. The Post article, by Henry Fairlie, dealt with the Space Shuttle and its relation to the future of the National Aeronautics and Space Administration. The Star commentary, by Lt. Gen. Daniel Graham, U.S. Army, retired, was based on an interview in which the general discussed space-age warfare.

I commend the two articles to my colleagues and insert them in the RECORD at this point:

[From the Washington Post, Mar. 22, 1981]

WHERE IS THE SPACE SHUTTLE TAKING US?

(By Henry Fairlie)

There was television, of course, in Europe in the 15th century. Since there was televi-

sion, there was a "Today Show." It advertised itself with the slogan, "We are in the Dark Ages. Now make light of them."

On the morning of Aug. 3, 1492, it carried the ususal kind of interviews: "What and what not to tell the priest at confession" and "Why serfs shouldn't jog on empty stomachs." But between them, that morning, was something unusual. "Kit Columbus sails from Palos today," said Joanna Paulina, a nun whom the church had put in charge of the program after the beatification of St. Barbara.

Grouchy merchants all over Europe turned away to gaze at their rancid medieval butter melting into the holes of their fork-split medieval muffins. "Haven't their Most Christian Majesties something better to spend their money on?" they grumbled. "It probably all comes out of the taxes which we now pay to Castile." And their rancorous medieval wives agreed.

It is not different today with the Space Shuttle.

No matter that their children were then playing with models of the Nina, the Pinta and the Santa Maria in their filthy medieval bath water: "Sixty Minutes" the Sunday before had exposed the fact that all three ships were unseaworthy, and it was an article of faith of the church that "Sixty Minutes" was infallible. Had not Danielus Ratherasmus, a tense monk, said that Columbus could not reach the Indies?

The first flight of the Space Shuttle, two weeks from now, will be an extraordinary event. Yet where it is not just greeted with a yawn, people seem to be like jackals, hoping that it will nosedive to earth.

One ought not to have to argue, at this late hour, the importance of man's exploration of space. Both its immediate and practical results and its far-reaching if unforeseeable consequences are already and will be dramatic. They have already changed our lives, even just in the technological spinoffs. They will radically alter our concept of ourselves. In the exploration of space, we are driving very deep.

It is put very simply in NASA's own description of its mission, as prescribed by Congress, in its 223-page Program Plan, 1981-1985, which deserves anyone's study. "Space science deals with the most fundamental questions we can ask about ourselves, our origins and our destiny. Who are you? Where did we come from? Where are we going? Are we alone?"

Who does not pause at those questions, and especially at the last? It is not too much to say that, in the exploration of space, science is asking questions about God. I can even forgive George Will his occasional choice of dinner guests because he is one of the few commentators who is intellectually and even spiritually alert to the depth of the concerns to which we are reaching as we journey into space.

Again one can turn to NASA's own description of its mission. It "seeks to understand the origin and evolution of the universe." The questions to which it reaches are "at the core of human concern since the most primitive times." Those questions are exact. "What are the size, scope and structure of the universe? What is our place in it? How did it begin? Is it unchanging or does it evolve; and will it have an end?" One has only to ask: In what other program, prescribed and funded by Congress, are such questions put? Put with the real hope of finding the answers now, outside "the dirty basement windows of the atmosphere?"

But let us stay with the shuttle. It is too easy to think of it only as a toy. After all, it's a bus. But even simply as a bus, consider where it will take us.

Part of NASA's mission is its life sciences program. This program seeks, among other things, "to ensure the health, safety, well-being and effective performances of humans in space." The furtherest purpose of this program is that it will "ultimately break human dependence on earth's environment." Space will become a habitable place for us.

My own application to be on the first shuttle which will carry reporters into space is treated with a clear if affectionate lack of seriousness. Gentle references to my age, and to the fact that an open-heart patient may not be the best risk up there, leave me with no answer. Yet if I am really to be "at large," what lesser place should be my beat? I should be on that bus.

But if we are to understand what the shuttle means, there are more immediate functions to ponder. Unless David Stockman has his way, 1984 will be an astonishing year.

The exploration of space will by then be beginning to accelerate. One need not mention here every new adventure which will be started. It is enough just to say, for example, that the fourth, fifth, sixth and seventh spacelabs will be launched. But among the new initiatives will be the launching of the space telescope.

This will be the first permanent observatory in space. It will be the most powerful telescope ever built. It will be put into orbit, and it will be long-lived. It will be serviced by the shuttle.

If one thinks of the telescopes available to Galileo, it is not less than breathtaking to think of this telescope, 2.4 meters in diameter, traveling around in space, and again outside our dirty basement windows. It could not be put into orbit, and given its long life to do its amazing work, if a shuttle did not service it. And in 1984 also the third shuttle is meant to be available.

But there is, of course, much more than the shuttle will do. The first shuttle this year, if all goes well, will carry a large-format camera up. This camera will "provide stereoscopic, panchromatic imagery, with a resolution of approximately 10 meters." But the essential point is that all of NASA's missions—including the scientific and the technological, including the observation of earth, of our environment and sources of energy—cannot be carried much further without the shuttle.

The shuttle is only one element in the regular space transportation system which is now to be developed. The whole system includes the spacelabs, the shuttle and the "inertial upper stage." This last may simply if inadequately be described as a boost to the shuttle when it is already up. It will extend its range. We may think of Columbus as he gazed with his trained seaman's eye at his three vessels, adjusting their sails for their uncharted voyage and wishing for an inertial upper stage atop the rigging.

The extent and complexity of NASA's programs is barely known or understood by most people. Even if one takes only the 13 spacelabs which are supposed to be launched by 1985, each will serve one of the individual programs in NASA's several missions.

From the life sciences mission to the astrophysics mission to the earth observation mission, all affecting our immediate lives as well as man's furthest futures, it is these which the space transportation system will carry out. To imagine continuing the exploration of space with no shuttles is to imagine flying on a commercial airline with no ground crews to service its planes.

If you still are not interested in the largest questions which are being asked in space, then you can at least come down to earth with a sharp bump. Among the many missions which NASA undertakes is the development of the advanced aircraft we will use here: "to improve the usefulness, performance, speed, safety and efficiency of civil and military aircraft vehicles, and to preserve U.S. leadership in aeronautical science and technology." This program will next year begin the development of the technology, for example, needed for fire-resistant material which will reduce the dangers of aircraft crashes.

That would seem to be a program whose impact is immediate enough to us all.

And if the shuttle does indeed nosedive to earth two weeks from now? We ought not to smirk at the disaster. We ought to consider what would be one of its causes. The space program depends on the long-range development of the most sophisticated technology. It has for years now been subject to erratic funding and arbitrary cuts in its budget. If the shuttle crashes, it will be our fault.

Columbus had to go begging round the courts of a still medieval Europe to find the funding for his first journey. When he was at last given it by Isabella and Ferdinand, it cost them the same as one of their court balls. Our vision sometimes seems to be as narrow as 500 years ago.

[From the Washington Star, Mar. 22, 1981]

Moving Into Space-Age Warfare

(By Daniel Graham)

Lt. Gen. Daniel Graham, USA retired, was director of the Defense Intelligence Agency until 1976. He served as a defense adviser to Ronald Reagan during the presidential campaign. He is co-chairman of the Alliance for Peace Through Strength, an adjunct of the American Security Council.

This is excerpted from an interview with journalist Dan Gregory.

Gregory: The plan selected by President Carter for deploying MX missiles has come under attack. Your views?

Graham: The problem is that MX is the grotesque child of bad strategy. It's grotesque to take a missile that's designed for counterforce—that is, to hit certain of the most dangerous Soviet weapons before they can hit you—and then deploy it in a system that is supposed to absorb all the effects of those weapons before you fire. That's a grotesquery, from a military standpoint.

And then to put $50-60 billion into that grotesquery is absolutely stupid. The MX deployment scheme should be rejected, not because its going to endanger the pronghorn antelope or the desert tortoise, but because it is the final offspring of very bad strategy.

They say we need the MX to protect because the Minuteman has become vulnerable. If I were a Minuteman missile I wouldn't consider the MX to be doing much about my vulnerability. How do you protect the Minuteman from its vulnerability? Well, the best thing to do is to defend. Get some kind of effective defense. How best to do that is the way that puts the most doubt in the Soviet general staff's mind: With a space-born defense.

Look at it this way. What do you do by putting out more things for the Soviets to shoot at? That's what you do with MX. There's one missile and you go to great ex-

pense to move it around to 23 different places that it might fire from. The worst problem you give the Soviets, assuming they can't figure out where the missile is, is that they have to shoot at 22 more things than they would have liked to have to shoot at. How do they solve that problem? They add 44 more warheads to their inventory—because two warheads dedicated to each one of those targets will insure—85, 90 percent insure—that it will be destroyed. So the Soviets have a pure arithmetic problem, the way we've been going about things.

But look what happens if you add an active defense. Now, I'm not talking about a perfect one that says "no missiles hit the ground," but just one that takes out any significant portion, say 10, 20 per cent of the Soviet striking force. Now the Soviets don't know how many of their warheads would get through and, what's worse for them, they don't know which ones would get through. And now you've got a formula that's not straight arithmetic, it's all full of permutations, combinations, and probabilities, which sharply reduces any assurance in the Soviet general staff's mind that they could attack MX or our bombers or our submarines in port with any assurance. And that doubt in the mind of the aggressor is the essence of deterrence, so that's how you repair your deterrent.

Q: Even as it came into being, many people accepted MAD (mutually assured destruction) only as a stop-gap until improved technology would provide something more concrete in the way of strategic protection. Is MAD now obsolete or is it becoming so?

A: There was about a year in the history of man when MAD looked like it might work. And even Khrushchev thought so for awhile. But it only lasted for a year that there was any possibility of MAD working because then technology began to make these weapons usable in a true military fashion rather than in the sort of "I'm going to blow up your city if you blow up my city," context.

Yes, we are at a real watershed in military affairs. If the United States does not change its strategic framework of thinking about these things, and allows the contest to remain in that technical area where the Soviets have learned how to compete very well and, as a matter of fact, beat us in those technologies because their mass more than makes up for what small technical advantages we have, then the Soviets are bound to win it. They're bound to win that contest and their strategic superiority over the United States will grow.

We must recognize the strategic watershed we have reached and put together a new strategic framework that is compatible with both the historical situation and the technical situation we're in today. If we don't do that I'm afraid we're not going to succeed and we're just going to fall further and further behind the Soviets.

If the Reagan administration's budget is simply a matter of incremental add-ons to all the various programs in the Pentagon, many of which—all of them were conceived within the framework of bad strategy (some of them are still good even though conceived within the framework of a bad strategy) but if that's all we do, just add to programs already going instead of making those fundamental changes required, we can wind up after five years or a decade of putting tremendous funds into those programs being worse off than we are today.

Q: You have predicted a major change of emphasis in this country's nuclear strategy within the decade, away from . . .

A: Away from straight destructive nuclear offensive capability to a sophisticated combination of defense and offense. And if done properly it is my contention that it's going to be cheaper than trying to meet the Soviets in the "mass" contest for masses of missiles and masses of airplanes and masses of ships and so forth. We've got to end-run them technologically but that we won't do unless we change the strategic framework in which we think.

I told you that within 10 years we will change. The problem is that if we don't change soon enough within the 10 years we are going to continue to allow the Soviets advantages that are going to be very detrimental to the Western world and the United States.

We can establish a space-borne defense against Soviet nuclear threats quicker, with less money and with more popular support than we can do anything else to change the strategic balance. I see signs all over now that we're likely to go in that direction provided we can overcome a lot of bureaucratic turfguarding and program managers' biases toward ongoing programs.

Q: You are referring to laser satellites?

A: I am referring to a thorough-going space effort which would involve some small, manned military vehicles in space that are multipurpose, could do a number of things including defending the installations we already have in space, satellites and so forth, inspecting Soviet satellites, destroying Soviet satellites if necessary, and intercepting some portion of a Soviet attack force using high-powered chemical lasers.

In addition, there is the possibility of what really constitutes a highpowered one-shot laser minefield. It's a satellite that you put up in the way of a Soviet attack that would shoot down great numbers of Soviet missiles and warheads if they tried to fire at us, a satellite that you could put up in times of danger.

I would couple the whole thing with the first steps toward acquiring solar energy platforms which would allow us, on an unlimited basis, to acquire power that's not dependent upon the OPEC nations or, as a matter of fact, upon any non-replenishable source of carbon fuels.

All of these things in a package are well within our technical grasp and if we do it we will re-establish strategic superiority over the Soviet Union or anybody else, and, furthermore, help to solve other basic strategic problems in the United States, such as our energy problem.

Q: You're talking about a radical departure. And the Soviets are ahead of us in anti-satellite technology.

A: In the application of space technology to military matters they lead us because they have been doing this and they have an anti-satellite capability. The technology that they're using is relatively primitive, it's no problem in terms of sheer technology. But they're ahead of us in applying the available technology to the problem of attacking objects in space.

We can overcome that very quickly and go well beyond them, and move the contest in a number of ways that even the most dovish American ought to agree with me are good.

One is, you move the contest with the Soviets out of the realm of sheer mass of offensive capability, into the high-technology arena where the United States should be able to and, I am convinced, will be able to stay ahead of the Soviets, and that's in a contest to control cislunar space.

Secondly, you reduce the urge to constantly stockpile more and more offensive nuclear weapons which, I understand, is a great problem for many.

The third thing is, you move the first and perhaps the only battle in a future central war into outer space where you're not blowing off chunks of the face of the planet.

But from a strictly military point of view, the greatest advantage is that you force the Soviets to compete with the United States in an arena in which they compete badly, and that is in high technology.

Somebody is going to establish a strategic superiority in space. The Soviets know that. They're working on it very hard. And we, with far better tools at hand to establish that dominion, have failed to do so. And we must—because if we don't, they will and from then on, whoever controls that high ground of space is going to have a tremendous edge, no matter what other level of confrontation occurs.●

ALLIES NEED TO INCREASE THEIR DEFENSE EFFORTS

HON. JAMES A. COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 2, 1981

● Mr. COURTER. Mr. Speaker, over the past decade, we have watched the Soviet Union, our principal adversary, make immense strides in furthering their global interests at the expense of Western security. The massive Soviet buildup in tanks, aircraft, naval vessels, and strategic weapons, coupled with their outrageous behavior in Afghanistan and use of proxy forces in the Third World, requires a strong and united Western response, especially at a time when Poland is threatened. Unless our country, along with our NATO allies, Japan, and other pro-Western nations, take meaningful actions to bolster their defenses, the Soviets may win, not necessarily through war, but by outright intimidation. The "Finlandization" of Western Europe is surely a top Soviet goal.

Mr. Speaker, our Nation has borne the brunt and cost of defending the free world, since the end of World War II. Our Nation, with its Armed Forces and National Treasury, continues to underwrite the West's security. We devoted 5.2 percent of our GNP to the defense of the free world in 1980 and spent nearly 25 percent of our national budget in the areas of defense and international security assistance. Despite pledges from our allies of a 3-percent increase in real terms in their defense budgets, very few came even close to attaining that important goal. This trend cannot continue. Nothing is more dear or costly than defending one's independence and liberty. The primary ingredient is the national will to do so.

Mr. Speaker, I would like to submit for the RECORD an article that addresses the subject of allied defense expenditures, written by an outstanding defense analyst, Dr. Wayne Schroeder

of the Heritage Foundation. I believe that he makes some cogent points with regard to this issue that we can all learn from.

ALLIES NEED TO INCREASE DEFENSE EFFORTS

Although it appears inadvisable for the Reagan Administration to pressure them at this time, Japan and members of the NATO Alliance must assume greater responsibility for their own defenses, either physically or financially, according to analysts at The Heritage Foundation.

"Certainly, our allies cannot be expected at this time to raise their real growth in defense spending up to an order of magnitude approaching that of either the Soviet Union or their American ally," the defense experts write in the current issue of National Security Record.

"However, the U.S. (should) seek from its allies a consensus as to the seriousness of the Soviet threat, the inadequacy of past plans and programs, and a commitment to increase their defense burden gradually—in spite of economic stringencies, which the U.S. also faces."

Paying for their collective security has been a growing point of contention in recent years between the nations of the West, the Heritage analysts say. "Throughout the past three years, the commitment of NATO's allies to the defense of Western Europe has been gauged in terms of whether or not they were meeting the 1978 pledge to a three percent annual real growth in defense spending. By late 1980, however, it became apparent that due to low economic growth, high inflation, and budgetary constraints, most of our European allies would fail to meet the three percent real growth pledge in 1981."

"Rather than couching the NATO defense spending issue for our European allies primarily in terms of whether they are meeting an arbitrary, fixed percentage increase in defense spending each year, U.S. policy should seek to define exactly what areas in the NATO Long-Term Defense Plan and in European defense programs are in need of increased funding, and adopt an approach which squarely states European defense spending will have to rise far above the three percent real growth level."

While financial problems may plague Western Europe, Japan has no such economic justification for its posture, with its five percent annual inflation rate, a $14 billion trade surplus, an auto industry that is overwhelming Detroit, and an expanding volume of overseas investment. Because its July 1980 pledge to increase defense spending by 9.7 percent was substantially reduced in December, Japan's new defense budget will barely compensate for inflation, the Heritage analysts say.

The analysts conclude, "It is true that many Western nations are now in a period of great economic difficulty. Unfortunately, there is no assurance that these difficulties will soon pass away—indeed, they may worsen before they get better. The true measure of leadership for the U.S. is to act now—in the midst of a critical economic and budgetary crisis of its own—to increase substantially its defense spending and revise * * * security policies. * * * Such action will signal to our allies that we are serious about redressing the military imbalance, and that they, too, can join in this task, provided the political will exists to do so."

National Security Record is published monthly by The Heritage Foundation, a Washington-based public policy research institute.

COMPARATIVE DEFENSE SPENDING FOR THE 10 WEALTHIEST WESTERN NATIONS

Nation	As percent of GNP	1980 U.S. dollars (in billions)
United States	5.2	142.7
United Kingdom	4.9	24.4
France	3.9	20.2
Netherlands	3.4	5.2
West Germany	3.3	25.1
Belgium	3.3	3.7
Australia	2.8	3.9
Italy	2.4	6.6
Canada	1.7	4.2
Japan	0.9	9.0

●

IT IS TIME FOR A CONFERENCE OF THE INDUSTRIAL DEMOCRACIES

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 2, 1981

● Mr. MICHEL. Mr. Speaker, over 1 year ago I called for the formation of a conference of the industrial democracies in which questions of mutual interest could be discussed and debated. I based that idea on the fact that although we have such forums as NATO, the United Nations, and regional organizations, there is at present no international group, composed of members sharing basic political and economic values where economic, political, military, social, and philosophical matters can be discussed.

We need such a conference. A recent article in the Wall Street Journal tells why.

At this point I insert in the RECORD, "Discord in the West—Economic Difficulties Beyond Arms Budgets Strain NATO Alliance" from the Wall Street Journal, April 1, 1981:

DISCORD IN WEST—ECONOMIC DIFFERENCES BEYOND ARMS BUDGETS STRAIN NATO ALLIANCE

(By Eric Morgenthaler)

BRUSSELS.—In a sprawl of low buildings on the outskirts of town are the headquarters of the North Atlantic Treaty Organization. It is the administrative center of the Western defense alliance, a sort of transatlantic Pentagon.

These days, however, many of the people inside are sounding more as though they worked in a transatlantic Treasury. They are talking of inflation and unemployment interest rates and oil prices, social security and welfare, trade and aid, and the problems of spurring economic growth.

Their talk is anything but idle. Many analysts in Europe and the U.S. think that such pocketbook issues may well be among the most important—and most divisive—problems facing the NATO alliance over the next decade.

"Economic policy is vital, and it relates directly to our security policy," says a senior economist at NATO. "A successful economic policy may have to be the very basis of a resurgent defense policy."

That possibility matters to the United States as it tries to persuade the NATO allies to increase their defense spending at a time when their sluggish economies are forcing many of them to slash popular social programs. But the problem goes beyond the question of spending, or not spending, on defense: It involves a thicket of economic strains that threaten, many Westerners feel, to weaken and divide the alliance for years to come.

GUNS AND BUTTER

Those strains start with the age-old quandary of guns versus butter, a choice that many European countries, with their expanding economies, haven't really had to confront since the post-World War II period.

The strains extend to such globally sensitive issues as trade with the Soviet bloc (which is more important to Europe than to the U.S.) and reliance on Middle East oil (the Europeans are more dependent on it). There also are a number of intra-alliance issues, ranging from competing interest rates and possibly protectionism to the fact that the unhappy economic climate is pitting ally against ally in a fierce race for shrinking world markets.

"The main point is there is going to be a hell of a lot of hassle on a number of economic issues," says David Watt, director of the London-based Royal Institute of International Affairs.

Mr. Watt believes that because of such problems as the slowdown in Western growth, the continuing fallout from the oil-price jumps since 1973, the weakness of the dollar in recent years and "the rather clumsy handling of all these issues by the Carter administration," Washington faces a much more difficult situation than the last two or three administrations have had.

A COMPLICATING FACTOR

Its task is complicated by Europe's being stronger and more assertive, both economically and politically, than it used to be. "If you compare it with the '50s or '60s, the whole situation has changed," says Helmut Hubel, who is with the German Foreign Policy Research Institute, a think tank in Bonn. "The economic strength of the European states has grown so much."

The world view of many European states also has changed—and moved somewhat away from the American vision of things. "There's a real problem of a divergence of opinion on what are the underlying trends in world affairs—one of which is The Threat," says Gregory Flynn, assistant director of the Paris-based Atlantic Institute for International Affairs.

The threat, of course, is that from the Soviet Union. The Europeans call for continued emphasis on strategic-arms limitation and other elements of detente while Washington seems to be putting detente on the back burner in favor of an arms buildup.

"What America sees frequently as Europeans' being unwilling to carry their share of the defense burden," Mr. Flynn says, is precisely what the Europeans see as their right to have more of a say in alliance policy making.

DIFFICULT TRADEOFF

The argument over sharing the burden is exacerbated by Europe's economic troubles. These days, more money for guns, which is what Washington seems to want from the Europeans, could well mean less money from butter. But for a European politician, whose countrymen have long been accus-

tomed to the butter of benevolent social programs, that trade-off isn't as easily made as it might be for an American.

"I don't think people in Europe would understand having to cut back social-welfare programs in order to make more money available for defense spending," says a defense planner in Bonn. "In Europe, much more than in the U.S., we need a sound, stable social atmosphere to prepare people for defense expenditures."

For decades now, the countries of Europe have built their extensive and popular range of social programs on the assumption of ever-increasing economic growth. Now that growth is trailing off, says one senior American diplomat, those programs have become "an albatross" and "an intense political handicap" for many European leaders. They also are a large problem for those who would raise defense outlays.

"For the past 30 years or so, you were able to combine the other priorities in public expenditure with defense," observes Christoph Bertram, director of the London-based International Institute for Strategic Studies. But today, he adds, "the perimeters of economic experience which have governed European society for 30 years are no longer valid"—and that means hard questions over public spending.

"At a time when you are trying to combat recession and fight inflation by reducing public expenditures, you can't keep the defense budget untouched," Mr. Bertram says. Because many Western leaders are trying to do precisely that, he suggests, "defense, by trying to be a sacred cow at a time when everything else is being cut, is risking becomeing more and more controversial."

Aside from the basic differences over defense spending, there are other economic friction points that could hamper NATO's ability to act cohesively in a crisis, analysts warn. One that is often mentioned, but whose significance is hotly disputed, is the trade ties between Western Europe and the Soviet bloc.

"It's very difficult, because we have to combine a lot of conflicting objectives," says a foreign-ministry official in Paris. "In West Germany and France, there is a view that through trade, the Eastern-bloc societies are changing. It's a very protracted process, but it may lead to some evolution in those societies." Thus, trade with the Soviet bloc "isn't a purely economic question" for France, he says. "It's more a political one."

But that doesn't reassure the Americans. Most recently, they have voiced considerable concern as negotiations have proceeded over a proposed 3,600-mile pipeline to deliver Soviet natural gas to Western Europe.

A MATTER OF LEVERS

What worries the U.S. is that if the transaction goes through, the Soviets by 1990 could be providing 10% to 12% of the natural-gas needs of the West European nations outside Scandinavia—30% in West Germany's case.

"There's always some suspicion in the U.S. that our trade with the Soviet Union could be a lever for the Soviets against us," says Mr. Hubel of the institute in Bonn. "But we think it's also a lever for us against the Soviets. It's a two-way commitment, a measure for stabilization. The Soviets could sell us gas, but they're highly interested in our technology—they really need it."

Wherever one stands on East-West trade, it's clear why it's an issue that affects NATO. But there are other issues where the link may be less obvious, for they involve trade or relations between the NATO countries themselves.

Many of those controversies are the stuff of everyday global economic life—disputes over a country's monetary or trade policy, say, or over the subsidizing of troubled industries—and in times of healthy growth, they usually don't cause much of a stir. But during an economic slowdown such as the current one, as countries everywhere scramble globally for business to save jobs at home, such spats can become major political rows.

Thus, officials in several European countries now and complaining loudly about high U.S. interest rates—which, they say, are luring investors' funds away from Europe. "One reason we are so slow in recovering economically is the tremendously high interest rates in the U.S.," says W. F. van Eekelen, under minister of defense in the Netherlands. He adds, however, that "NATO really isn't set up to handle that sort of debate."

CARLUCCI'S SPEECH

Washington seems determined to try to reassert U.S. leadership—in defense, as well as in economic affairs. It made that clear a few weeks ago with a tough call from Frank C. Carlucci, deputy secretary of defense, for the NATO allies to follow the Reagan lead and increase their defense outlays.

"The United States cannot be expected to improve and strengthen U.S. forces in Europe unless other allies increase their own contribution to the combined defense effort," Mr. Carlucci told a defense conference in Munich. "Nor can the United States, unaided, bear the burden of promoting Western interests beyond Europe."

Although there is confusion in Europe over just what Washington wants in the way of spending, it is already apparent that most European nations, faced with their own deep economic worries, aren't in any hurry to meet the administration's call.

"I think Carlucci is misreading Europe if he thinks tough talk is making a great impression," says Klaas de Vries, a socialist member of the Dutch Parliament, a long time defense-spending critic and chairman of the Parliament's defense committee. "It was a very insensitive speech. And it focuses the attention of the Europeans far more on determining what their own priorities are than it induces them to follow the leader."

Which is simply one way of saying that—for political, economic and social reasons—difficult times lie ahead for the NATO alliance. A senior American diplomat has another way of saying it. As the U.S. gears up to sell its allies on greater defense spending, he observes, "one has the net impression that it is going to be the same —— old tired, uphill battle."●

KANSAS STATE UNIVERSITY WILDCATS

HON. JIM JEFFRIES

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 2, 1981

● Mr. JEFFRIES. Mr. Speaker, many of you may have seen the March 23, 1981, issue of Sports Illustrated which features Rolando Blackman of the Kansas State basketball team on the front cover.

The Kansas State Wildcats have always been noted for their speed and agility despite the size of the players and have the reputation of a team not to be taken lightly.

The Wildcats have indeed made this year an exciting season for sports fans of my district, and even though the Kansas State Wildcats did not make the final four to qualify for the NCAA title, I would like to extend my congratulations to them for advancing as far as they did and praise them for the valiant try.

Under the direction of Coach Jack Hartman for the past 11 years, the Kansas State Wildcats have certainly proven not only to Kansas but to the Nation that they are contenders and will undoubtedly be back again. Good luck next year, Jack, and congratulations on a fine 1980-81 season.

For the benefit of my colleagues who did not see the Sports Illustrated story, the article follows:

K-State coach Jack Hartman's squad is in his image—quiet, colorless, collected; a friendly hardware dealer camouflaging the mind of a crafty terrorist. Down by 12 points against San Francisco, Hartman had replaced his struggling star, Rolando Blackman, with Brazil's own Eduardo Galvao, who despite being called "Edweirdo" by his teammates, was instrumental in the Wildcats' 64-60 victory. Then, against Oregon State, Hartman went from Edweirdo back to Rolando, who showed his appreciation by sinking the gamer with two seconds left.

Before that happened Kansas State plugged along 10 points in arrears until 6' 7" Center Ed Nealy and his backup, Les Craft, wore down Johnson and forced him into fouls and turnovers so that the 'Cats could proceed on a 16-6 tear and tie the game at 48 with 3:23 to play, precisely the point at which Johnson fouled out for the 51st time in his career. "We were working our butts off," said Craft. Not to mention Johnson's, a feat of some magnitude.

Now it was a chess game between masters. And, as Miler said, "You don't beat a Jack Hartman team making mistakes. They're too smart." Miller elected to slow things down, but the Wildcats fouled Charlie Sitton, who, being a rookie, missed on the one-and-one. Kansas State then held the ball down to 10 seconds when Blackman, the Olympian from Brooklyn, backed Mark Radford to the baseline, where they were joined by Blume. "He made a good strong move and I cut him off," said Radford. "Then he made another strong move."

It was the second one—Blackman spinning in the air from 16 feet, swish—that did it. "I had the good release," Blackman said. "I wasn't even aware that anyone was on me. It was just me and the rim."●

AN ANALYSIS OF THE REAGAN BUDGET—PART I

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 2, 1981

● Mr. McDONALD. Mr. Speaker, now that the dust is settling on President Reagan's budget proposal and time for analysis of some of the actual figures

has transpired, a picture is developing which does not portend a hopeful future, through we all certainly wish the contrary were true. The distinguished economist, Murray Rothbard, recently published an article entitled "The Reagan Budget Fraud" in the World Market Perspective, March 19, 1981, issue. Mr. Rothbard is a key member of the Austrian school of economics. Although he is perhaps subject to criticism for support of what might be termed extreme libertarian views with an antidefense bias; nevertheless, his analysis is one that is excellent in scope and depth. I strongly commend it to the attention of my colleagues. The following is the first part of the article that is to appear in a two-part series:

THE REAGAN BUDGET FRAUD

(By Murray Rothbard)

"Reagan New Deal," and "Reagan Revolution!" proclaim the headlines. As the media prattle on about "massive tax and budget cuts" and an "historic" change in American politics rivalling that of FDR, conservatives are mobilizing for a great confrontation while liberals organize for a last-ditch defense of the millions of poor who are supposed to be thrown out into the street. Both sides can relax, however. For there is no Reagan Revolution. There is no budget cut; there is no tax cut. The whole brouhaha is sound and fury, signifying nothing. Nothing is happening.

THE BUDGET CUT THAT IS NOT

The myth propounded by the Reagan Administration is that he has proposed a "massive" budget cut for fiscal 1982 amounting to a whopping $41.6 billion. Even at face value, no sensible person could possibly refer to such a piddling 5.6 percent cut (from a total spending of $736.9 billion) as "massive" or historic. We might be entitled to say, however, that such a cut would be a nice, if hardly earth-shaking "new beginning." But there is no cut. For estimated total federal spending for fiscal 1981 is $655.2 billion; President Reagan's proposed 1982 budget comes to $695.3 billion, which, in my old-fashioned arithmetic, amounts to a $40.1 billion or 6.1 percent increase, not a cut.

When is a cut not a cut? In the old days, before the voodoo semantics of public relations entered the fray, a "budget cut" meant exactly that: a cut in the budget from one year to the next. Thus, President Eisenhower cut his first full year's budget from $74.3 billion in fiscal 1953 to $67.8 billion in fiscal 1954—a real, genuine cut of $6.5 billion or 8.7 percent. That, in old-fashioned parlance, was a budget cut.

The Reagan flim-flam, in contrast, takes not Mr. Carter's last budget, but Carter's projected increase for fiscal 1982, as the point of reference. Carter had projected an increase from his estimated $657.8 billion in fiscal 1981 to $729.7 billion in 1982, and the Reagan "cuts" are made out of the proposed increase.[1] In other words, Reagan is in no honest sense "cutting the budget"; he is merely increasing the budget at a lower rate than Mr. Carter had proposed. The "budget cut" is a fraud. No one at the time called the first Eisenhower budget a "revolution"; in fact, liberals hailed Eisenhower for preserving the New Deal-Fair Deal and conservatives at the time attacked him bitterly for the same reason. Yet, if Reagan had only cut the budget to the same degree as the self proclaimed "moderate" Eisenhower, he would have weighed in with a $600.6 billion budget, not his "historic" $695.3.

In fact, a better gauge of the sincerity of Mr. Reagan's budget-cutting is to compare his 1982 budget with the last full Carter budget, for fiscal 1980 (Oct. 1, 1979–Sept. 30, 1980). We would then be contrasting the last budget under Carter's complete control with the first one totally under President Reagan. Estimated total spending for fiscal 1980 was $579.6 billion. This gives us a $115.7 billion increase over the last two years, or a 10 percent annual budget increase of Reagan over Carter. That's a "cut"?

FORFEITING 1981

Before analyzing the 1982 Reagan budget in more detail, we should not completely skip over the Reagan stepchild, 1981. The new President, after all, has eight months out of fiscal 1981 to cut this year's budget; one would think that was plenty of time. Indeed, before taking office, Reagan promised faithfully to institute his income-tax cut retroactive to January 1, and his young Galahad of a budget-cutter, David Stockman, was talking about a $14 billion cut in the fiscal 1981 budget. All that is now forgotten: the tax cuts have been put forward to July 1, and the budget cuts proposed for 1981 have been pared to a scarcely discernible $2.6 billion.[2]

Indeed, the true role of the Reagan Administration in relation to the free market and conservatism was presaged in early February. Hardly was the new President installed when the Reagan team persuaded most of the conservative Republicans in Congress, many of whom had voted against increases in the public debt limit all their lives, to go along with Reagan's proposed $50 billion increase in the limit. It was rather pitiful to see hardened anti-debt Congressmen say that since they trusted Mr. Reagan to cut the budget, they would reluctantly vote to give him a chance. In this way, politics triumphs over principle. Is the destiny of the Reagan Era to be the killer of the hard-money dream?

THE $3–6 BILLION BOO-BOO

In a way, it was merely a funny incident, but it also chillingly revealed the political-bureaucractic mentality at work. Scarcely a week after President Reagan had delivered his February 18 State of the Union message, the Administration discovered that Stockman, their budget wunderkind, had somehow mislaid $3 to $6 billion from the Carter 1982 estimates, and that therefore they would have to "cut" that much more from the increase to come in at their target of $695.5 billion. The humor comes from the embarrassment and the continued insistence of the Reagan aides that, for political reasons, the President could not have admitted any uncertainty in the seeming precision of his budget figures. As his press secretary put it, "If the trumpet sounds an uncertain note, then who can prepare for battle? Who indeed? But if the trumpet really is uncertain, and it only fakes certainty, what happens when the mistake and the pretense are uncovered? Won't things then be much worse? But of course politicians, in their relentless scramble for advantage in today's news, are ever heedless of tomorrow. We the people have to pick up their pieces.

The chilling aspect is the instant cover up and ruthless buckpassing reminiscent of the Watergate era. When the boo-boo surfaced, everyone in the White House hastened to put the blame on Stockman. "Those are Dave Stockman's numbers." Each aide, plus of course the President, must be protected at all times. And yet, as Harry Truman once said, "The buck stops here"—in the Oval Office. It was Reagan's message, Reagan selected his advisers, and therefore he must shoulder the blame. Or is President Reagan's role in this administration merely to be a "good communicator" to be trotted out to soft-soap the American public?

THE 1982 BUDGET

The first thing to be said about the proposed 1982 budget is that nothing is abolished. Most programs have their rate of increase reduced; a few programs are really cut; and a few more are increased even over the Carter projections. But nothing is really abolished, not even the Council on Wage and Price Stability, a totally ineffective agency which always served as a sinister threat of wage-price controls hanging over the market. Certainly, the wage-price monitoring program has been abolished, but the cut of $1.5 million and the firing of 135 employees hardly makes a dent in the swollen federal bureaucracy.

Abolition serves a purpose even greater than the massive budget cuts that would follow. For a mere cut, even a large cut, keeps the bureaucracy in place, ready for a later comeback. Parkinson's Law decrees that any bureaucracy tends to grow and grow, unless checked sternly by outside forces—for example, by slashing its budget. But if an agency is abolished, the bureaucracy disappears and will no longer serve as a nucleus for future raids on the taxpayer.

During his campaign, Ronald Reagan promised to abolish two new and calamitous Cabinet departments: the Department of Education and the Department of Energy; all that is conveniently forgotten. The mammoth synfuel boondoggle remains, though some of its functions will be shifted out of the Energy Department.

Let us take just one of the 83 programs where the Reagan Administration has trumpeted its "cuts"—the widely and justly hated food stamp program. Food stamps have been accelerating rapidly and monstrously over the last decade: from $551 million in fiscal 1970 to $5.5 billion in fiscal 1978 (a tenfold increase in eight years) to $8.7 billion two years later. The 1981 food stamp budget is estimated at $10.95 billion; Reagan's 1982 proposal is $10.45 billion. This piddling 4.6 percent cut is in sharp contrast to the Administration's phony selfproclaimed 16.2 percent decrease, which again comes from using Carter's projected 1982 figure instead of actual 1981 expenditures. Moreover, if we compare Reagan's 1982 food stamp budget to the last full Carter figures of 1980, we get a 10 percent annual increase in food stamp expenditures from Carter to Reagan.

Not only that: if we take the projected figures for the rest of the Reagan era, we get a food stamp expenditure of $11.06 billion in

[1] Even on its own terms, the Reagan budget only "cut" by $34.4 billion, not $41.6; the other $7.2 billion were simply tacked on arbitrarily by the Reagan people to the Carter proposals to provide for allegedly "adequate defense." So we have a minor fraud within a larger one.

[2] Once again, the officially estimated cut is padded by Reagan's tacking on an arbitrary $1.3 billion for "adequate defense" before counting his own cut.

fiscal 1985, a 5.8 percent increase over fiscal 1982. So that instead of food stamps being cut further, we are to eliminate the measly cut over 1981 by the year 1983, and then food stamps will continue growing. This is the Reagan Revolution?

But again: the Reagan Administration's phony figures enable it to claim a healthy 20.3 percent cut in food stamp spending by 1985—because it persists in using as a reference point what Carter's budget would have been. For how many years can we continue to blame Jimmy Carter for current heavy spending? When does President Reagan become accountable?

When tackling food stamps, of course, the Reagan forces would be facing two sets of powerful enemies: the highly paid class of social workers, bureaucrats, and other professional "friends of the poor"; and the untouchable farmers, as well as retail stores, all of whom are heavily subsidized by this ten-plus billion dollar boondoggle.

The press has given some attention to the Sacred Seven, programs where Reagan has not even dared to reduce the Carter increases for 1982. Total annual cost to the taxpayer of the Sacred Seven programs is a colossal $210 billion. Leading the pack is Social Security, at an annual cost of $140 billion—an inherently fraudulent program that was sold to the public as old age "insurance." In reality Social Security imposes a regressive double tax on the poor, first to "contribute" to a fund which is quickly dissipated, and then to pay the tax on the ever-greater benefits. The program is widely recognized as bankrupt, yet not a thing is being done to get us out from under it. Moreover, the alleged "savings" of $1.7 billion from abolishing minimum monthly payments and payments to young adult students, turns out, when we cut through the familiar phony reckoning, to be an actual increase for these programs of $19.1 billion in 1982. Overall, Social Security payments rose by 14.3 percent last year; the reason is that these benefits are indexed for inflation, courtesy of the taxpayer—a courtesy not extended to other pensioners or wage-earners across the country.

Another "social safety net" untouched by Reagan is the $45.4 billion Medicare program, which is responsible for much of the enormous increase in medical and hospital costs that plague all of us except the elderly recipients of the program.

Still another Reagan sacred cow is the veterans' benefit program, most of which aids veterans with non-existent disabilities. As recently as 1975, then Congressional aide David Stockman denounced the fact that many Congressmen "openly admit to holding their noses when the annual $12 billion is appropriated for the Veteran's Administration"; the difference is that the annual sum, by now doubled to $25 billion, is now sequestered by Stockman as an untouchable program. This despite the fact that the VA runs with notorious inefficiency the largest hospital system in the Western world.

Because of its $3-6 billion boo-boo, the Reagan Administration is finally biting the bullet and proposing an $800 million cut in Veterans Administration programs. But should we be grateful for this belated 3 percent cut, when Professor Cotton Lindsay, a leading young economist, has shown that $8.2 billion—over ten times that amount—could be saved next year on veterans' programs if the benefits were merely limited to those the law had intended to help?

Some sacred cows are apparently so untouchable that they were not even listed as such by government or media. The outrageous tobacco price-support and acreage restriction program remains untouched—apparently in deference to North Carolina's Senator Jesse Helms. The Defense Department budget increases right away by $5.8 billion, with promises of much more to come. I am not stressing this area since the Reagan campaign had always promised big defense increases. But are we to assume that this huge area, marked throughout by extraordinarily inefficient cost-plus programs, includes no waste whatsoever?

A particularly aggravating, and extremely costly, untouchable program is federal employee pensions. Not only is federal pay high and tenure secure, but civilian government employees may retire after 30 years and immediately start collecting their hefty pensions, regardless of age. Military employees have an even sweeter deal: they can start collecting pensions after only 20 years' service. What is more, while most of us can't have our pensions indexed for inflation, government pensioners have their payments adjusted twice yearly as the cost of living rises. It is true that Reagan's State of the Union Message proposed reducing this inflation adjustment to once yearly, to match the Social Security recipients, but, as one budget-cutting Reagan aide admitted: "We won't really push for the change. Some things are just for show."

The particularly aggravating thing about government pensions is that they thwart the democratic process. One of the best features of democracy is that it allows the public to kick the rascals out—to get politicians and bureaucrats they don't like out of the public trough. But with automatic pensions in place, we no longer have that luxury. We simply can't get rid of any of them.

Another disquieting feature of the budget is a tendency to proclaim "savings" to the taxpayer only by placing higher costs on the public in other ways. Thus, $100 million is to be "saved" on the Coast Guard by levying compulsory fees on boat owners. A fee is another form of tax. More importantly, Reagan proposes to reduce by $630 million the subsidy to the U.S. Postal Service. But the allegedly "independent" Postal Service will simply offset this by raising postal rates unconscionably or by eliminating Saturday mail service, which they have been itching to do for a long time. So are we to lose as letter-writers what we save as taxpayers? Yet there is no sign from this Administration of the truly free-market and budget-saving solution: to dismantle the hideously costly and inefficient Postal Service altogether, and to allow private firms to carry the mail—a service that is now unfortunately illegal.

Finally, little is being done by the Reagan budget-cutters about many free-spending federal items that are, conveniently, off-budget, and therefore not subject to Congressional scrutiny. In addition to the $55 billion deficit announced by Jimmy Carter for 1981, there is a no less than $47 billion deficit being spent on "off-budget programs" such as the Federal Financing Bank, and on "government-sponsored enterprises" such as numerous mortgage loan programs.

THE TAX CUT THAT ISN'T

Just as the budget cut is a myth, so is the alleged "tax cut." The media have been ballyhooing the tax program as the acid test for "supply-side" economics: taxes of the wealthy have been cut drastically, say the media, and we'll see whether savings, investments and productivity increase dramatically as a result.

The problem with this common judgment is everything: taxes are not being cut, and the wealthy are getting less of a tax break than anyone else. The highly publicized 10 percent across-the-board income tax cut next year, for example, is by no means across-the-board. An individual making $200,000 a year will receive only a 3.4 percent cut; the $10,000 person will get a 15.3 percent reduction. A big problem is that the top-bracket tax on dividends and interest was not cut from 70 percent to 50 percent as Reagan had promised.

It is true that Reagan projects a $45 billion reduction in income taxes in 1982 as a result of the scheduled cuts. However, these reductions will be more than offset by two unpublized but crucial items: the rise in Social Security taxes, and "bracket creep," by which inflation moves us all into higher brackets, there to be socked by a higher tax. Social Security tax and bracket creep will more than offset any cuts, so that tax receipts will rise by $50 billion in 1982.

The Reagan Administration has failed to deliver on its promise to index our taxes so as to avoid bracket creep. It has also failed to cut at all the disastrous capital gains tax or the corporate income tax. How can savings and investment increase substantially while these crippling taxes are still in place and intact?

True, a more accelerated depreciation will now be permitted, and this is welcome relief. But the benefits will be concentrated on the old highly capitalized industries with long-lived capital; the modern, new and progressive industries which have the greatest potential for growth have already been depreciating at the new maximum rates. They should have been aided by the government, at long last, permitting any rate of depreciation that a firm deems to be appropriate.

Moreover, the President leaves intact one of President Carter's worst innovations: the misnamed "windfall profits tax" on oil, which is really a steeply graduated excise tax on crude oil at the wellhead. How are we supposed to achieve self-sufficiency in crude oil production when this tax will be operating with crippling effect? The Administration answer to this betrayal is: "We need the money." Indeed.

Some tax rates are actually going up. The already ailing airline industry especially will get hit. The federal tax on aviation fuel will be more than doubled to 20 percent, the tax on airline passenger tickets will be nearly doubled to 9 percent, and a new tax of 5 percent will be slapped on air-freight. Every airline passenger and shipper will soon be suffering the effects.

The Reagan program is not a tax cut, and it is not a test of "supply-side" economics. It is a sham. As the President admitted in his State of the Union Message, referring to the much-vaunted three-year, 30 percent income tax cut, "It's only a reduction in the tax increase already built into the system."●

EL SALVADOR: THE VICTIMS OF VIOLENCE

HON. GERRY E. STUDDS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 2, 1981

● Mr. STUDDS. Mr. Speaker, in yesterday's CONGRESSIONAL RECORD, I and many of my colleagues discussed the question of violence in El Salvador. Today, we want to talk about the thousands of victims of that violence.

More than 12,000 people have been killed in El Salvador since the military and the Christian Democratic Party assumed control of the junta in January of last year. Tens of thousands more have been forced to seek shelter in refugee camps located within El Salvador itself, across the northern border in Honduras, or in other parts of Central America. In addition, Salvadorans have come in increasing numbers to the United States in search of temporary safety from the violence and danger at home.

Last January, I traveled to Honduras, along with Representatives ROBERT EDGAR and BARBARA MIKULSKI, to examine first hand the effect which the current situation in El Salvador has had on the Salvadoran people, and on other countries in Central America. The U.N. High Commission on Refugees estimates that more than 20,000 Salvadoran refugees now live in Honduras, surviving on food provided by international relief agencies and on the charity of Honduran peasants who are desperately poor themselves.

Representatives MIKULSKI and EDGAR traveled to the border region, itself, to talk to many of these refugees, and found them living in conditions of terrible malnutrition and poverty. Similar conditions exist in refugee camps within El Salvador.

Last year, the American public was shocked to learn of the discovery of more than a dozen bodies in the Arizona desert; bodies of Salvadorans seeking refuge from the violence of their own country. Today, Salvadorans make up the second largest group of individuals entering the United States illegally. Unlike many others from around the hemisphere, they are motivated not simply by a desire to seek improvement in their own economic status, but instead many are coming because they fear their lives are in danger at home. Many have found their names, or the names of friends, on the lists of people targeted for death. They know, far better than others, that death can come in El Salvador quickly, irrationally, and from almost any source. The fear of many about returning home is genuine, and no one familiar with the violence of El Salvador can suggest there is no basis for such a fear.

To date, the response of the current administration to the victims of violence in El Salvador has been to urge the European Economic Community to delay sending food to refugees in El Salvador—because some of it might be eaten by guerrillas—and to continue deporting hundreds of Salvadorans monthly to an uncertain fate at home.

I submit that the United States can and should do better. A nation that can afford to send millions of dollars worth of guns to an outlaw military can afford to send large quantities of food and medicine to comfort those fleeing the violence which is, in large measure, perpetrated by that military; and a nation as large and as wealthy as ours can afford at least as well as Costa Rica and Mexico to provide shelter and safety for those who fear they may lose their lives if they return to El Salvador.●

A RATIONAL ALTERNATIVE TO SYNFUELS

HON. BARBARA A. MIKULSKI

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 2, 1981

● Ms. MIKULSKI. Mr. Speaker, the words "district heating" or "cogeneration" are new to many Americans. Cogeneration is an alternative to the usual way of generating electricity by producing two products: electricity and higher temperature heat. District heating is a form of cogeneration which refers to a pipeline network which connects residential, commercial, and industrial buildings and utilizes a single thermal energy source to meet three needs: Hot water, space heating, and process steam needs. District heating is used widely in Europe, the Soviet Union, and Japan. It is now used by about a third of the Swedish and Danish populations, serves 70 percent of Soviet urban heat demand, and is supplied in West Germany through 474 central heating networks. There are estimates that district heating, if implemented in the United States now, could save 1 to 2.5 million barrels of oil or natural gas equivalent a day by the year 2000. A number of utilities in the United States are exploring or implementing projects: Northern States Power in two cities in Minnesota; Detroit Edison in Detroit, Mich.; United Illuminating in Bridgeport, Conn.; Pepco in Washington, D.C.; Public Service Electric & Gas in northern New Jersey; Philadelphia Electric Co. in Philadelphia, and many municipal utilities in small communities.

The article I am inserting today from the Baltimore Sun of February 2 will be of interest to everyone who is interested in energy conservation and as the author, Neal Peirce terms district heating, "A Rational Alternative to Synfuels."

A RATIONAL ALTERNATIVE TO SYNFUELS

WASHINGTON.—Here is a perfect example of how the Reagan administration could curb wasteful, inflationary government spending, assure a more stable U.S. energy future and channel more investment and jobs into hard-pressed urban centers.

First: Follow the counsel of Office of Management and Budget Director David Stockman and "throttle back" on the incredibly expensive synthetic fuels subsidy program. Congress last year authorized synfuels development at an initial $20 billion, with a suggestion of $68 billion more later.

Second: The administration could encourage, with minimal federal money, a proven, century-old technology called district heating—a method which could eventually provide low-cost heat and hot water and cooling to the vast majority of America's homes and businesses.

National support for synfuels is thin. Westerners rightly fear coal and oil shale exploitation that would pollute their air, consume scarce water supplies and promote energy boom towns for which they would have to provide most of the expensive new public facilities. Easterners foresee a massive diversion of scarce capital out of their economically pressed region. Environmentalists bemoan a program that would inject cancer-causing chemicals into the atmosphere. Last year Mr. Stockman characterized synfuels as a "multi-billion dollar program (that) would not appreciably ease our energy problems."

District heating, by contrast, had an old-style American entrepreneurial birth 104 years ago when an inventive Lockport, New York, tinkerer named Birdsill Holly decided it would be a smart, economic idea to produce steam that could do double duty—to heat buildings and run the pumps of fire engines. So he built a boiler in his basement, ran steam pipes across his neighbors' lawns to the fire station and down Chestnut Street to nearby homes.

District heating flowered for a few decades in America, to a peak of about 150 systems in 1909. Then it tapered off as oil and gas for individual building heating became cheap and plentiful. Its remnants may be found today on college campuses and military bases and in a handful of aged city steam systems.

But the Europeans, we are now reminded by the Council for International Urban Liaison, took district heating seriously. It now supplies one-third of all space and water heating needs in Scandinavia. The Soviet Union has 67 times our installed district heating capacity. Most modern systems employ hot water, a system now considered more economical, practical and safer than steam.

Today, by various scientific estimates, 50 to 90 percent of U.S. heating and hot water needs, plus considerable air conditioning, could be satisfied by district heating. Immense investments in water pipes would be required to hook up the country's homes and businesses. But the costs would be a fraction of the trillion-dollar-plus capital demands of a full-scale synfuels development.

"If you add up the total amount of waste energy produced by all the electric power plants in the country," says Damascus, Maryland, district heating expert Theodore Taylor, "there's more than enough waste energy to heat the entire United States." The reason: The kinetic energy derived

from an electric turbine represents only 30 percent of the energy potential of a conventional fuel burn. The remaining energy is released as steam or hot water. Yet if recaptured in pipes, in the process called cogeneration, 85 to 90 percent efficiency of the fuel is achieved. And hot water can be economically transported for distances of up to 20 miles.

Cities or suburbs could build their own power plants to burn coal or garbage and transfer the hot water produced by pipelines to their residents. Homes and businesses could use the hot water in lieu of hot water heaters, and also circulate it through radiators for heating, or through radiators with forced air systems for the same effect.

District heating systems could save the equivalent of 55 percent of the country's current oil imports by 2000, supporters say. Unlike synfuels, the technology is of a proven, "off the shelf" variety. And since the systems would require thousands of semi- and low-skill jobs to build, they would create jobs for people where they live—in the cities—instead of creating intense demand for workers and scarce scientists to build questionable synfuel facilities in isolated Appalachian coal or Western oil shale areas. Finally, district heating would make older cities more economical, competitive places to live and do business.●

JEWISH HERITAGE WEEK

HON. WALTER E. FAUNTROY

OF THE DISTRICT OF COLUMBIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 2, 1981

● Mr. FAUNTROY. Mr. Speaker, it was with enthusiasm that I joined my distinguished colleague from New York, Congressman JOSEPH ADDABBO, as a cosponsor of House Joint Resolution 155, to authorize and request the President to issue a proclamation designating May 3 through May 10, 1981, as Jewish Heritage Week.

House Joint Resolution 155 passed last Thursday, March 26, 1981, and signals this body's commitment to the mutual respect and understanding for all peoples and cultures which is so necessary in making the ideals of America a reality.

The passage of House Joint Resolution 155 had particular meaning for me as I listened to a prayer rendered at a tribute dinner given for me by my constituents this past weekend. In the prayer, Dr. Michael Berenbaum, of the Jewish Community Council of Greater Washington, gave thanks to God for the tolerance and pluralism that is and must continue to be our blessing in America.

Mr. Speaker, I now bring this prayer to the attention of my colleagues. It is a prayer symbolic of America and one which embodies the message of Jewish Heritage Week:

PRAYER OF DR. MICHAEL BERENBAUM

It is perhaps only in America that I as a Jew can pray out of the tradition of the rabbis of the people of Israel for a Christian minister who is my representative in Congress, despite the knowledge that we have and will continue to disagree about how to achieve many of the same goals that we share as precious. Yet we strive together to build a society of justice and integrity, of compassion, and beneficence, one that is sensitive to the needs of the poor, open to the pluralistic traditions, free of racism and bigotry of any kind from which both of our peoples have suffered so brutally in the past and present. On God and God of our ancestors I pray that we join for the sake of your name in kindling light in a world of darkness, hope where there is despair, unity where there is division, compassion where there is self-centeredness, healing where there is sickness. And if we do not succeed in full, grant meaning to our struggle together.

This is a time of peril in our Nation's history, an hour of reassessment, a period of searching and division, yet also one of opportunity and promise. In this moment in history, the responsibility not only of high office, but of real leadership to his people, has fallen upon this Congressman and minister of God.

Grant him the wisdom to realize what is right, the power to achieve that which is good, the humility to know that thou alone art judged, and the sensitivity to bring us all together in the future.

Teach him to seek unity rather than division, to combine the passion born of the knowledge of injustice with the compassion which is kindled by the knowledge of Thee. Guide him to seize the opportunity and to assume the responsibility of healing in an hour of malaise, to give vision in a time of darkness and to retain hope for the poor and underprivileged in a moment of despair.

God, we ask You to guide this Congressman and minister to unite people who have historically known the anguish of suffering who could sing in the fields of slavery by the promise of redemption, who have understood full well the meaning of indignity and injustice by death and destruction, and the hope of the promised land. Let our history of suffering unite us rather than divide us. Let the passion for justice that we share, born in the injustice we experienced in isolation, be a force which brings us together for a common task rather than one that separates us in the pockets of division created by the sensitivities that our histories have developed.

United our voices in condeming violence, terrorism, and hatred, the mindless murder of children whether in Atlanta or Maalot—but let us be certain that the tone of our voices and the content of our words do not encourage more violence and give comfort to those who are its source. As your profit Jeremiah has said:

"Let not the wise man glory in his wisdom, neither let the mighty man glory in his might, let not the rich man glory in his richness, but let him that glory in this that he understandeth and knoweth. Me, that I am the Lord that exercises mercy, justice, and righteousness for in these things I delight sayeth the Lord." (IX: 22)

The power has been given; the opportunity is now to offer that which we have in your service in justice, with mercy and in the quest for righteousness. We pray that we will prove equal.●

THE INFANT NUTRITION RESOLUTION

HON. TOM HARKIN

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 2, 1981

● Mr. HARKIN. Mr. Speaker, today my distinguished colleague from New York, Congressman BENJAMIN GILMAN, and I are introducing a House resolution expressing support for the World Health Organization's (WHO) and UNICEF's International Code of Marketing of Breast Milk Substitutes. The purpose of the WHO-UNICEF code is to contribute to the provision of safe and adequate nutrition for infants, by the protection and support of breast feeding. The code also seeks to insure the proper use of breast milk substitutes when they are necessary or desired.

This code deserves our strong support for one basic reason—it exemplifies the concern of the American people for improving the health and well-being of infants throughout the world. Children raised under conditions of poverty and poor sanitation are, of course, particularly vulnerable to the disease and high rates of malnutrition associated with improper bottle feeding. In the words of James Grant, executive director of UNICEF:

In the crucial first few months of life, breast-feeding is usually the young child's life-line. And the recent drift toward the bottle feeding of babies, a drift for which the industrialized world has provided both the example and the means, has cost tens of thousands of young lives * * *.

In part, the campaign for breast feeding must also be a campaign to regulate those who promote and sell commercial infant formula to mothers who do not need it, cannot afford it, and are unable to safely use it.

In addition, the WHO-UNICEF code deserves our support because it offers us the chance to promote self-reliant development in the Third World and enhance U.S. relations with developing countries—who are very deeply committed to enactment of the code—without spending an extra dime of the taxpayers money. Many of our European allies are also quite strongly committed to the code; indeed, at present only the United States seems to be in doubt as to the importance of the code.

Many of my colleagues are undoubtedly aware of the tragic increases in infant malnutrition, disease, and morbidity which are associated with bottle feeding under the unsuitable socioeconomic conditions which are prevalent in the Third World. Nonetheless, let me briefly summarize the situation as it has unfolded in the last few years.

Breast milk has historically been the sole source of nutrition for newborn infants. Even with the addition of

solid weaning foods at an age of approximately 6 months, breast feeding has traditionally been continued as an important supplementary source of nourishment for up to 2 years or more. Modern science has been unable to improve upon or even duplicate the life-giving properties of human milk, and it remains the optimal source of infant nutrition, in all circumstances, for the first 6 months of life. The chemcial composition of breast milk contains a host of anti-infective properties, which protect infants against allergies and disease. Breast feeding also provides a unique emotional bond between the baby and the nursing mother, and, according to many health professionals, a relatively effective means of child spacing. In our country, infant formulas have, in general, supplied an adequate, if not completely comparable, substitute for women who choose not to breast feed. The same cannot be said for most areas in the developing world, where unsanitary water supplies, lack of refrigeration and sterilization equipment, illiteracy and extreme poverty make such products unsuitable for safe use.

In recent years, however, health workers, nutritionists, church workers, development specialists, and international health agencies have called attention to the rapidly increasing substitution of artificial formula products for breast milk, in precisely the unfavorable socioeconomic conditions where its use is most hazardous. Numerous studies bear out these observations, as well as the significantly higher rates of malnutrition, disease and death among bottle-fed babies. According to Dr. Halfdan Mahler, Director-General of WHO:

> Evidence from the Third World indicates that infants breast fed for less than six months, or not at all, have a mortality five to ten times higher in the second six months of life than those breast fed for six months or more.

Misuse of commercially prepared formulas commonly occurs when contaminated water supplies are mixed with the powdered formula, negating its potential benefits. One study in Chile found that nearly 80 percent of the bottles examined were seriously contaminated. Illiteracy, inadequate knowledge of hygiene, and instructions that are frequently in foreign languages make written instructions on product labels worthless. Purchasing a sufficient quantity of infant formula in areas where proverty is rampant often requires 30 to 70 percent of the family's income. A report from Barbados revealed that 80 percent of bottle feeding mothers were diluting formula to make a 4-day supply stretch anywhere from 5 days to 3 weeks. Dr. Derrick Jelliffe, a prominant pediatrician with years of experience in developing countries and currently a professor at UCLA's School of Public Health, estimates that the misuse of artificial feeding methods results in approximately 10 million unnecessary cases of malnutrition or death each year.

Why are so many Third World mothers abandoning the costless and nutritionally superior method of breast feeding in exchange for the expensive and dangerous practice of artificial feeding?

Scientists cite several causes, including urbanization, changing social attitudes, and an increased number of women working outside the home. Perhaps the most predominant factor, however—and certainly the most avoidable—is the aggressive and inexcusable mass promotion of formula by the infant formula industry. Posters, product labels, and billboards sell the image of a healthy, well-nourished infant to a population whose desire for a higher standard of living erroneously persuades them to make misguided decision. Free samples distributed indiscriminately in maternity wards and clinics encourage abandonment of the traditional practice of breast feeding. Resuming the lactation process when the supply of free promotional samples expires can be difficult, and often impossible.

Donations from the formula industry of needed equipment and cash for medical institutions,—as well as a variety of personal gifts for doctors, nurses, and administrators—compels a sense of obligation. In an effort to reciprocate, health workers and medical institutions often display and disseminate promotional materials, thereby granting artificial feeding the de facto seal of approval of the highly respected health community. Company employed mothercraft nurses or medical representatives, often clothed in uniforms deceptively similar to that of hospital personnel, make special visits to new mothers, who are often unaware that their primary purpose is to sell their company's product. Otherwise well-intentioned salespeople, motivated at least in part by bonuses and commissions, frequently misjudge the ability of their customers to use infant formula safely.

Despite such excesses in promotion and the subsequently high rate of product misuse, withdrawal of breast milk substitutes from the market is not the answer. A small percentage of women are physically unable to breast feed, and all women deserve the right to choose their preferred means of feeding. But in the interests of infant health, the choice should be an informed one. Informed choice is currently very difficult to achieve because of the success of one-sided promotional campaigns initiated by the infant formula industry.

No one can hold the formula industry responsible for the unfortunate conditions which prevail in developing countries. But the aggressive, high-powered promotion of a product so predictably damaging when used under poverty conditions is not justifiable. Our economic system is based on the premise of private enterprise supplying the needs of consumers—but not on the creation of such needs through misleading propaganda.

Church, consumer, nutrition, and health organizations have recognized the importance of this issue and brought it to the attention of industry and governments. While such communication has resulted in some modifications of industry practices, self-regulation has proven insufficient to the task of developing appropriate marketing policies. Third World governments, lacking funds and sophisticated regulatory apparatus, often feel somewhat helpless and isolated facing foreign-based multibillion-dollar companies, which appear to have the support of their own governments in Europe, North America, and Japan. To those in search of a workable solution, it became clear that the issue needed to be addressed in the international arena.

In October of 1979, the World Health Organization and UNICEF held a 4-day meeting on infant and young child feeding in Geneva, Switzerland. This landmark meeting brought together experts in nutrition and medicine, and representatives of member governments, international organizations, the infant formula industry, and consumer groups, for the purpose of summarizing existing knowledge about infant feeding and discussing what steps could be taken to decrease malnutrition and infectious diseases. The meeting passed, by consensus, a far-reaching series of recommendations, calling for a halt to most types of infant formula promotion and for the implementation of measures to facilitate the practice of breast feeding and the use of appropriate—low-cost, locally produced—weaning foods. The recommendations have since been endorsed by the executive boards of WHO and UNICEF and by numerous respected domestic health organizations, including the American Medical Association and the Academy of Pediatrics.

While maintaining a public show of cooperation with WHO and UNICEF, the formula industry soon began to voice its opposition to various restrictions implicit in the recommendations of the October meeting. In various statements, including early 1980 testimony before the House Subcommittee on International Economic Policy and Trade, industry spokespersons began to distance themselves from the guidelines set forth by WHO and UNICEF. It became clear to concerned health personnel and member governments that the World Health Organization

needed to develop the 1979 recommendations into a formalized code of conduct

At the May 1980 World Health Assembly, nearly 60 governments spoke strongly in favor of a marketing code. A resolution calling upon the Secretariat of WHO to draft such a document was passed without dissent. Over the next 8 months the staffs of WHO and UNICEF convened numerous consultative sessions with member nations, scientists, industry, and church and consumer groups, refining and redrafting the proposed code in light of the comments of all parties. A final draft version of the code was presented to the January 1981 WHO executive board meeting, where it was passed by unanimous consent. The board's current 30 nation membership includes Great Britain, France, Canada, Norway, New Zealand, and the Netherlands.

The final draft now goes to the World Health Assembly this May for final ratification. It is significant to note that the code lacks any mechanism for enforcement, relying entirely on the moral suasion of recommending to member governments that they enact its provisions into their respective domestic laws or regulatory frameworks—as appropriate in keeping with the "social and legislative framework" of each nation. The board's resolution does make clear, however, that the adoption of an international code represents only a bare minimum step among the range of measures needed to adequately respond to what is acknowledged by virtually everyone—excepting the infant formula industry—to be a major health hazard and a cause for needless suffering by large numbers of infants. James Grant of UNICEF again sums up the need for the WHO-UNICEF code succinctly and convincingly:

> If implemented by governments, and observed by the commercial world, [the WHO-UNICEF Code] might mean that infants in many developing countries need not fall victim to the fashion for bottle feeding.

Grant concludes:

> If all of us in the international community who are working to promote and protect the practice of breast feeding are successful, we will save one million infant deaths each year in the eighties.

It is with both sadness and some astonishment that I note that the three leading American manufacturers of infant formula do not appear to share the concerns of the international health community. Abbot Laboratories, Bristol-Myers, and American Home Products have recently announced their intention to lobby for U.S. Government opposition to the WHO-UNICEF code. This is quite disturbing to me—both because of my longstanding confidence in the American business community's willingness and ability to act responsibly, and because of the frequently repeated statements by the companies in question that they would cooperate with and abide by the WHO-UNICEF initiatives.

Because the U.S. infant formula industry has chosen, in my opinion, irresponsibly, to oppose ratification of the WHO-UNICEF code, my colleague Mr. GILMAN and I are introducing this House resolution, expressing the sense of Congress that the United States should support and vote in favor of the code at next month's World Health Assembly. The resolution also calls for U.S. representatives to the WHA to oppose any weakening amendments which might be offered—none are expected—to encourage the American formula companies to abide by the code and to encourage other governments to call on their formula manufacturers to similarly respect the code. Finally, the resolution calls for cooperation with developing countries in their efforts to develop health standards and programs designed to implement the objective of this code.

Passage of this resolution would send a simple but very clear message that Americans remain firmly and fully committed to combatting world hunger, malnutrition, and disease. I urge my colleagues to join with Mr. GILMAN and myself in cosponsoring this resolution and in insuring its early passage.●

WELCOME TO OUR NEWLY NATURALIZED AMERICANS

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 2, 1981

● Mr. GILMAN. Mr. Speaker, it is with sincere pleasure that I congratulate the 159 Rockland County residents of New York's 26th Congressional District who have recently chosen to become citizens of the United States, with all of the privileges, freedoms, and responsibilities that American citizenship entails.

Our Hudson Valley region in New York State is proud of its newest citizens and I invite my colleagues to join in welcoming the following newly naturalized Americans and extending to them our best wishes for a happy and prosperous life in their new homeland:

Annamma Joy Abraham, Fredy Rafael Abreu, Edward Niiapa Adom, Dora Felicity Adom, Rose Aghshikian, John Alexandra, Maria Perez Alpert, Aracelis Agustina Arias, Subhashini Reddy Bandaru, Ramon Eligio Bare, Elsa Mercedes Baret, Louis Carlos Battiata, Roberto Arcenas Batuigas, Immacula Belizaire, Gerard Hilarion Bellevue, Harpreet Singh Bhalla, Rafiq Bidewy, Sharon Lee Borgatti, Justine Marie Boursiquot, Samuel Brach.

Marie Gladysse Cajuste, Rosemarie Carioscia, Mayra Elena Castillo, Amrose Chand, Aurora Chantel, Pei-Chun Chiang, Mary Teresa Fitzgerald Chownes, Jennifer Antoinette Condon, Rose Marie Corriolant, Birgitt Culver, Ann Marie DeLeo, Delias Demande, Ramona Diaz, Wesner Dorvelus, Antonio Ampoon Dugaduga, Jean Marc Duroseau, Paul Esperance, Elimelech Fixler, Dvora Rivka Fixler, Sonia Parrenas Floresca, Gloria May Forrest, Winbert Forrest, Rita Fruntino.

Monica Garcia, Edline Marie Garland, John William Garrigan, Marie Marielle Garrigan, Maria Georgescu, Edith Grunhut, Luz Marina Gutierrez, Dieter Hans Hartmann, Barbara Ywk-Kuen Ip, Yury Ismestieff, Deenamma Jacob, Sammi Pacco Joseph, Annakutty Kallukulam Josphkunju, Mathai Joy, Moishe Katz, Zaka Ullah Khan, Samuel Kis, Leah Kis, Berta Kolonski, Lydia Kozuhar-Novikov.

Helena Kukla, John Kurian, Catalina Scalona Lagrimas, Yolette Lecorps, Kay Kyung Ui Lee, Kenneth Kiho Lee, Aizik Leibovitch, Pearl Leibovitch, Alla Levit, Vladimir Gregory Levit, Thomas Linares, Quetlie Linse, Juana Maria Liranzo, Jean Uyan-Rong Liu, Lily Liu, Trinidad Salome Lopez, Jayanti Mahapatra, Angelo Maida, Santiago Marquez, Ramon Martelo.

Filomena Martinez, Anna Mathurin, John McGee, Anne Mesida Mesidor, Josephine Antonio Miranda, Reynaldo Vinluan Miravite, Cesar Ismael Munoz, Sarvejit Mohan Narang, Sergei Nemchinov, Myong Cha Nivans, Jacques Demosthene Noel, Rivka Ostreicher, Brian Owens, Eduardo Evidente Pavon, Juan Antonio Payan, Jose Odalis Pena, Angela Altagracia Pena, Monette Pierre, Robert Pierre-Antoine.

Vincent Pileggi, Angela Quattrochi, Carol Dawn Reddy, Edgar Edmundo Restrepo, Beresford Alton Robinson, Jeannie Rodriguez, Jose Miguel Rojas, Aron Rubin, Judith Samet, Luis Manuel Santana, Rolando Villaroman Santiago, Carmen Marquez Santiago, Fe Caridad Encarnacion Sarangay, Ignazio Scaglione, Gaby Schettini, Galina Schuetz, Donna Schwartz, Miriam Senderowitz, Aruna Jay Shah, Suhag Shashikant Shah,

Nordchi Schmuel David Silber, Frances Soliveres, Rivky Spitzer, Alma Lidora Stewart, Herman Barrington Stewart, Ramy Sultan, Allan I-Luen Sun, Liberacion Alconis Tamondong, Jacob Tapiero, Anita Tapiero, Octavie Tarte, Annamma Thomas, Chu-Yuan Ting, Bella Aquino Tomelden, Serge Valbrun, Jose Manuel Vargas, Marcos Antonio Vargas, Flora Eduvijes Velastegui, Domenico Vicario, Themistocles Christos Vrachnos.

Vasiliki Vrachnos, Esther Wagner, Pinchas Yechezkal Wagner, Elisabeth Walentin, Christel Gertrud Wegner, Haddassa Weis, David Weis, Henney Weis, Eliandra Ester Shand West, Irma Pagayunan Wierer, Lai Mei Au Yeung, Theodoros Ziotis, Triantafyllia Ziotis, Gemil Zulme, Robert Zusman.●

RESTORING TAXPAYER'S FAITH IN THE AMERICAN SYSTEM

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 2, 1981

● Mr. PHILIP M. CRANE. Mr. Speaker, it has become increasingly obvious over the past several years that the American people are tired of financing government overregulation and waste with their tax dollars. Mr. W. David

Stedman, chairman of the board of Stedman Corp. in Asheboro, N.C., is an active and eloquent proponent of tax relief at all government levels. A letter Mr. Stedman recently wrote to the Honorable Dan K. Moore, chairman of the Governor's Blue Ribbon Study Commission on Transportation Needs and Financing in North Carolina, is an excellent illustration of the philosophy that will restore the taxpayer's faith in the American system of government.

DEAR GOVERNOR MOORE: I am sorry that I am unable to be present Wednesday for the report of your Commission of Transportation Needs and Financing. I have, however, read the report carefully. I compliment you and the members of your Commission on all the hard work you have done and on your personal commitment to the welfare of this state. I have no doubt that much work needs to be done on the highway system as your Commission has so ably pointed out.

As important as all this is, I would like to suggest, however, that the real priority issue confronting North Carolinians is not transportation but the level of taxation. The tax burden of North Carolina citizens cannot be isolated to state taxes only. These same people also carry the burden of city, county and federal taxes. This total tax burden now consumes approximately forty-four percent of the average person's income. Just how much are the citizens willing to pay for the cost of government? I shall have to let other citizens speak for themselves, but as for me I am unalterably opposed to any further increase in the tax burden of our citizens. I refer to the percent of our income represented by the total tax burden.

In the medieval days, the feudal lords required that the serfs work forty percent of their time for the state. Obviously, we are already working forty-four percent of our time for government. So great is this problem that I have come to the position that no matter how worthwhile any new program is, if it increases the tax burden as a percentage of income, it must be either denied or other expenses in government must be curtailed to make room for it. In fact, I think it is essential that the tax burden be decreased through the years to come rather than increased further.

Now, accepting as fact that our highways do need the attention which your Commission proposes, the question is, "How do we get it done without further increasing our taxes?" May I suggest two alternatives:

1. Raise taxes on gasoline and perhaps other items as suggested in your report and lower taxes elsewhere by a compensating amount.

2. Continue the gasoline and related taxes as are, combine the highway fund with the general fund, set priorities of expenses as needed and cut the budget elsewhere to accommodate these priorities.

One can take the position that the net result of either of these two alternatives is to shift the burden of the cost of the highway program back to the people through the general fund and thereby ignoring the "user pays" principle, a principle long utilized in connection with the highway fund.

I think, therefore, the time has come when we should re-examine the "user pays" principle. While it is basically a fine concept, I have come to the conclusion that the term is one used mostly for convenience when talking about highway expenditures. Consider the following:

1. The people of North Carolina probably participate more completely in the use of the state highways and roads than any other item of state expense. Even those who don't own cars pay through the fares of public transportation. The "user pays" principle is reasonably approached by the very nature of this situation; i.e., general use by everybody of the state road system.

2. We seem to apply the "user pays" principle when it suits our convenience, as in the highway fund, but don't apply it where it doesn't suit this convenience, as in the higher education fund. Whereas most of our citizens use our highways in one form or another, less that twenty-five percent go to our state universities and colleges. Yet all citizens are taxed for the benefit of the relative few who do go to these state supported institutions. It is also important to note that the cost of this higher education is greater than the highway fund. If the "user pays" principle were used in this very significant budget item of higher education, the university system as we know it would probably be destroyed. We simply could not afford the massive higher education system we now have. How is it we can justify forcing people who never would or can go to college to pay the cost of others who do go? Yet we do it. I believe it is clear that a general tax for everbody to support the highway system, which is used by nearly everyone, is much fairer than a general tax to support our system of higher education which is used by only one fourth of our citizens.

3. The same argument can also be applied to our system of community colleges and technical schools.

4. The same argument, although in a lesser degree, can also be applied to our general education program. There are many people in this state who do not have a high school education, but who are paying taxes to keep up the system for those who do use it. Even here, the "user pays" principle does not work completely either.

To get back to my earlier point, the overriding consideration in the whole picture is the excessive level of tax burden our people now carry. This must be reduced rather than increased. I support good maintenance and proper expansion of our highway system and urge that we put these items into a priority structure with other items of importance and work it all out within our present total tax structure. Otherwise, I cannot in good conscience, accept it, and I don't believe the people of North Carolina will accept it either.

In my opinion, there is a way to do it without increasing our taxes if we only have the will to do it. Surely we shall have to cut back on other things, but if the priorities tell us that this is the thing to do, then so be it.

Thank you again, Governor, for your commitment and hard work in this matter. Please know that I love North Carolina, too, and will do everything in my power to support those programs and causes which I believe are to the ultimate best interest of our citizens.

Sincerely,

W. D. STEDMAN.●

LEGAL SERVICES: REGULATIONS FOR WHAT?

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 2, 1981

● Mr. MICHEL. Mr. Speaker, in all the discussion about the President's decision to cut funds for Legal Services, there has not been much said about the view of society that those who run this agency bring to their task. Walter Pincus of the Washington Post recently disclosed the fact that Legal Services is proposing regulations that would enforce a perverse philosophy on the taxpayer.

At this point I wish to insert in the RECORD, "Legal Service Corp. Suits Itself, Waves Red Flag at Reagan" by Walter Pincus, the Washington Post, March 30, 1981.

LEGAL SERVICES CORP. SUITS ITSELF, WAVES RED FLAG AT REAGAN

(By Walter Pincus)

"They have put a gun to their head and pulled the trigger."

That was the way one conservative caller last week described the comprehensive civil rights regulations proposed earlier this month by the Legal Services Corp. and published in the March 23 Federal Register (page 18055).

They include all the rules that drive Reagan conservatives crazy—nondiscrimination against homosexuals, requirements for bilingual employes, affirmative action plans to guarantee employment of women and minorities at levels that reflect "appropriate labor force characteristics," and inclusion of drug addiction and alcoholism as diseases that would qualify someone as being a "handicapped person" and, thus protected from discrimination.

LSC, you must remember, is the nonprofit corporation that supports legal services for the poor by distributing $300 million in federal grants and contracts to local organizations, which use the money to pay for lawyers and other legal specialists in almost every county across the nation.

President Reagan has long had a distaste for the federally supported legal services program, and his administration, as part of the budget-cutting effort, has marked LSC for elimination next year.

An LSC official conceded that the agency's board was aware that the proposed regulations, developed before the White House termination plan was announced, would be a red flag for the Reaganites. But LSC decided to put the rules out for comment anyway because "this was our position."

The purpose of the proposed rules, according to the notice, "is to prevent discrimination by legal services programs supported in whole or in part by Legal Services Corp. funds in the delivery of services or in employment. . . ."

The proposed rules, which for the most part codify procedures in effect since LSC's establishment in 1974, add a prohibition against discrimination by reason of "sexual orientation." That phrase, an LSC official said, refers to homosexuals.

The agency, she added, decided to prohibit discrimination against homosexuals because similar policies have been adopted by

the District of Columbia and other state and local entities.

The rules, however, also bar recipients of LSC funds from having "any contractual or other relationship" with other agencies or organizations including "labor unions, (or) organizations providing or administering fringe benefits to employees of the recipient . . ." if the agencies discriminate against specified groups, including homosexuals.

That provision, according to my outraged caller, "would eliminate the Catholic Church groups." Not so, according to the LSC official, and if it did, the rule would be altered. "That is why we have put it out for comment."

Another provision that's bound to draw criticism is one that says a recipient of LSC funds cannot "make a preemployment inquiry as to whether an applicant is a handicapped person or as to the nature of or severity of a handicap except where the examination or inquiry is related to an essential job function."

What about drug addiction and alcoholism, which LSC includes as characteristics of a certain kind of "handicapped person"? On first blush, the LSC official said a lawyer certainly could be questioned, but there was doubt about other job applicants.

Fund recipients under the rules would be required to provide bilingual employes, "not limited to clerical positions" in "any area where 5 percent of the eligible population are members of a minority language group." They also must provide informational literature in the appropriate languages and post signs in those languages. The percentage requirement was taken from the federal voting rights law, which requires ballots to be bilingual in areas where 5 percent of the population speaks a language other than English.

Grant recipient that have 50 or more employes must have an affirmative action plan approved by LSC's director of office of equal opportunity. Before producing such a plan, the recipient must, "determine if underutilization on the basis of race, national origin or sex occurs in any job category or unit of its workforce" using a formula supplied by LSC.

Its plan must include "goals and timetables to correct underutilization of women and minorities." In those instances where a recipient is found to have an employe "workforce or segment of the workforce not on parity with the relevant labor market," approval of higher authorities would be needed before any vacancies were filled.

In the Carter years, LSC's rules would have raised a few eyebrows; today they may hasten the lowering of the boom.●

RED SMITH ON HANDGUNS

HON. JONATHAN B. BINGHAM

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 2, 1981

● Mr. BINGHAM. Mr. Speaker, Red Smith, who is probably the dean of American sportswriters and certainly one of the most highly respected, sees "no valid reason why possession of handguns should not be prohibited by law."

In yesterday's New York Times, Mr. Smith concluded a column on the attempted assassination of President Reagan with the following pithy paragraphs:

Inevitably the attempted assassination revived talk about strengthening gun-control laws, a campaign that has not had ardent support from the President up to now. Wouldn't this experience alter his views?

Maybe, maybe not. The fact is, there is no valid reason why possession of a handgun should not be prohibited by law, though that would not keep the weapons out of the hands of assassins and other criminals.

Handguns are not sporting goods like rifles and shotguns. They are not used for any normal kind of hunting, not even trap shooting. Target-practice competition could be held with toy guns and rubber-tipped darts. The only practical civilian use for pistols and revolvers is shooting people.

This being the case, the law ought to ban these weapons. Such a law may make it more difficult for a wife, in a moment of pique, to plug her ever-loving helpmeet. It would be observed by the law-abiding and ignored by the lawless. President Reagan, who has waved plenty of six-shooters around playing cowboy in the movies, is perfectly aware of that.

Mr. Smith, the bill that does what you advocate is numbered H.R. 40.●

COGENERATION LEGISLATION

HON. CECIL (CEC) HEFTEL

OF HAWAII

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 2, 1981

● Mr. HEFTEL. Mr. Speaker, today I am pleased to introduce legislation which I feel will have a significant impact on our Nation's energy conservation effort. The bill, the Cogeneration and Small Power Production Deregulation Act of 1981 is intended to streamline those aspects of the 1978 National Energy Act which have constrained the full use of cogeneration by America's industries and utilities.

The United States is faced with an energy problem of unprecendented dimensions. As the present war between Iraq and Iran clearly demonstrates, our Nation is perilously dependent on highly unstable and uncertain foreign supplies of oil. Energy now has a direct and significant impact on our foreign policy and our domestic economy. It is essential then that strategies be devised and implemented to deal with the energy problem in the short term. We feel that a cornerstone of any energy strategy must involve increased conservation. Since America's industries and utilities consume well over half of all energy utilized in the country, we believe that an aggressive energy conservation effort in the industrial and utility sectors is essential to our Nation's energy future.

Cogeneration is perhaps the most important and readily accessible source of industrial conservation in the near term. The highly acclaimed work, "Energy Future," by Harvard Profs. Daniel Yergin and Robert Stobough, describes cogeneration as "industry's North Scope." Very simply, cogeneration is the production of two forms of useful energy from one fuel source, leading to a more efficient use of the primary energy. A number of studies estimate that perhaps over 20 percent of total industrial energy presently used in the United States could be saved through cogeneration. Our European allies are already effectively using this conservation technology. For example, cogeneration acounts for approximately 27 percent of all electric power used in West Germany, as compared with less than 5 percent in the United States. Interestingly, the United States once relied on cogeneration for a significant measure of its electricity needs. In 1922, for example, 22 percent of all our electricity came from industrial cogeneration. However, declining electricity prices and inexpensive oil led to a marked decline in the role cogeneration played.

Mr. Speaker, the legislation I am introducing today is aimed at encouraging utility cogeneration by removing those barriers in the Public Utility Regulatory Policies Act of 1978 which discourage utilities from owning and operating cogeneration plants. By removing these barriers, utilities will have been given a significant incentive to cogenerate, which will in turn maximize the energy efficiency of their power generation. A second major aspect of this legislation is intended to increase the efficiency of oil and gas use by America's industries. By modifying those aspects of the 1978 Powerplant and Industrial Fuel Use Act, which to now have prohibited, the use of oil and gas in industrial cogeneration facilities, I hope to encourage the more efficient use of these precious resources. Eventually, cogeneration using coal, biomass, synthetic fuels, and other energy sources will be used with great efficiency by industry and utilities. For now, oil and gas fired cogeneration will allow us to bridge a major gap in our Nation's conservation effort until such time as these other cogeneration methods are ready and other renewable energy sources are adequately developed.

It is important that we provide regulatory incentives to once again establish cogeneration as a major energy-saving technology. This proposal represents a first step to modifying those regulations which to date have unnecessarily restricted the utilization of cogeneration by industry and by utilities. I look forward to working with you and our colleagues in fashioning a comprehensive energy policy in which cogeneration occupies a major role. Our current energy dilemma requires no less than our full commitment to this challenge.

Mr. Speaker, for the benefit of our colleagues, I am including a Washington Post editorial on cogeneration

which appeared in the September 8, 1980, edition. The editorial discusses the merits of the technology of cogeneration and the need to proceed expeditiously with regulatory changes to encourage its development. The editorial follows:

[From the Washington Post, Sept. 8, 1980]

AN ENERGY SOURCE READY AND WAITING

Like the trolley car and the ceiling fan, a process known as cogeneration is another energy-saving technology that, although once commonplace, disappeared in the march of time, a casualty of "progress." Its enormous potential is finally beginning to be appreciated again. Unfortunately, industries, utilities and state power commissions are simultaneously discovering that a variety of energy regulations unintentionally inhibit its use.

Cogeneration is an alternative to the familiar way of generating electricity by producing electricity together with a large amount of low-temperature "waste heat." Cogeneration produces two products: electricity and useful, higher-temperature heat. That way, much more usable energy is extracted from the same amount of fuel, and energy is conserved.

Since the easiest and cheapest way to use that heat is in an industry that needs a lot of steam, cogeneration facilities are most attractive at industrial sites. Early in this century many American industries produced all the energy they needed by this means. However, as electric utilities grew and the price of electricity fell, most decided to leave the business of making electricity to the utilities.

As the cost of fuel for making electricity has soared in the last few years, cogeneration has slowly begun to be seen as an attractive alternative to conventional electrical plants. One recent study estimated that cogeneration could save the equivalent of almost two million barrels of oil a day, or more than one-quarter of current U.S. electricity consumption.

What is holding back the realization of this enormous savings? The greatest barriers are laws and regulations that discourage utilities from owning and operating cogeneration plants. Because of these, most such facilities are owned by businesses, which are generally reluctant to get involved in the heavily regulated and unfamiliar world of producing energy.

Utilities are far better suited to do the job. They are already in the business of making and selling energy. They are equipped to raise the needed capital. They have the experience to design and build the plants, to operate and maintain them at lowest cost and to obtain the necessary government permits.

Another major hold-up is restrictions that prohibit the use of oil and gas in cogeneration facilities. The most efficient cogeneration technologies today can be run only on oil or gas, though eventually the means will be developed to use coal, biomass and synthetic fuels. In the meantime, the restrictions have the unintended effect of wasting precious fuels.

As in so many other areas of energy policy, government needs to "unwrite" a lot of regulations to start saving more energy. Though utilities have been slow to appreciate its potential, cogeneration is so economically attractive that if they can be set free to get into this business, and encouraged by a few state utility commissions, the marketplace should do the rest.●

HELP ATLANTA

HON. AUSTIN J. MURPHY

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 2, 1981

● Mr. MURPHY. Mr. Speaker, last week, I introduced House Concurrent Resolution 99. This resolution expresses the sense of Congress that the Secretary of the Department of Health and Human Services, acting under the Child Abuse Prevention and Treatment Act, and other Federal officials should cooperate with State and local officials in their efforts to solve the recent murders of black children in Atlanta, Ga., and to provide for the safety and well-being of the children in Atlanta who are threatened by this crisis. I wish to take this opportunity to briefly explain the thrust of House Concurrent Resolution 99, and solicit your support.

The recent murders of children in Atlanta, Ga., represent one of the most heinous episodes in the history of the United States. Unfortunately, solving these killings will only resolve the superficial criminal element of this crisis. Beneath the surface lie festering psychological scars which will long survive the apprehension of the person or persons responsible for these killings, House Concurrent Resolution 99 seeks to offer assistance to State and local officials as they grapple with these scars.

The National Center on Child Abuse and Neglect, established under the Child Abuse Prevention and Treatment Act of 1974, has been the focal point of Federal efforts to combat child maltreatment since its inception. It is capable of pulling together the resources necessary to assist the States and local governments as they attempt to treat and provide services to children and families in which the threat of maltreatment exists. The purpose of its activities has been to help States insure that children who have been exposed to the threat of abuse grow to lead normal and productive lives.

Action by the National Center, utilizing its network of resources, could clearly assist the State and local government in providing the services that these children and their families will need in order to cope with the stress under which they have lived for so many months. I do not intend to infer that the families of the slain children have been abusive or neglectful families. Rather, I believe that the stress that these children are experiencing is closely akin to the stress generated by living in an abusive home environment. Each child must constantly ask, "Who can I trust? Who will be next? Will it be me?" It is my belief that the National Center on Child Abuse and Neglect is in the unique position of being able to provide assistance to the State of Georgia, and the city of Atlanta, as they provide appropriate services to these children and their families. Successful passage of this resolution will mean that the National Center will be able to respond to any request for assistance by Georgia officials.

It is in this spirit that I seek your bipartisan support. Please join me by cosponsoring this message to the children and families of Atlanta, Ga., that the Members of Congress are concerned and willing to do whatever they can to see them through this period of stress. I need not remind you that the 21st body of a slain black child was discovered yesterday. With each day, the stress grows more severe. If you will join me, please contact my staff of the Subcommittee on Select Education. Your support will be greatly appreciated. Thank you.●

EL SALVADOR POLICY IS WRONG

HON. BARBARA A. MIKULSKI

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 2, 1981

● Ms. MIKULSKI. Mr. Speaker, I am absolutely opposed to the present administration policy in El Salvador because I think it is wrong. It is not in the best interests of our Nation. It is not in the best interests of El Salvador—particularly those thousands of Salvadorans who have become refugees as a result of the violence. These refugees have been uprooted from their homes and been subjected to unspeakable horrors—all in the name of stopping communism.

On January 9, 1981, I traveled to Central America as part of a delegation sponsored by the Unitarian-Universalist Service Committee. Congressman GERRY STUDDS and Congressman EDGAR were also part of that delegation. We traveled through Costa Rica, Nicaragua, and Honduras. I took every opportunity to speak to people who had been in El Salvador recently; and I also traveled to the Honduran border for extensive meetings with Salvadoran refugees who had fled to that village.

In these meetings, I learned that the uniformed military forces of El Salvador are using American equipment to carry out a deliberate policy of terror against an unarmed civilian population. The soldiers of El Salvador arrive in American helicopters to kill and torture men, women, and children. During my interviews with the refugees, I asked "Who does this?" Always they answered, "It is the military." Again and again I asked, "Does the

Left do this?" "No" they told me—"They do not kill children."

I have said that I believe that our policy in El Salvador is morally wrong. It is morally wrong for this country to lavish arms on a government that cannot or will not stop its own troops from making war against its own people. It is morally wrong to offer U.S. helicopters that will be used to gun down peasants. It is morally wrong to use a small helpless country in our own backyard to send a message of toughness to Moscow.

I would like to insert in the RECORD excerpts of my interviews with the refugees.

A VOICE. The woman previously that we talked to is named Crecensia. We're talking with Maria.

[Portions in foreign language.]

A VOICE. She says that she would like to tell us the following, that many of her family were killed, so many that she doesn't even remember all their names now.

She said I'd like to speak first about my brothers and sisters and she just mentioned about five people who had been killed.

[Portions in foreign language.]

A VOICE. She said six of her—well, two of her sisters and four of her cousins, all women, were killed and were found naked. One of those women was pregnant.

[Portions in foreign language.]

A VOICE. And these women have left children.

[Portions in foreign language.]

A VOICE. One woman left two children, the other woman left three children orphans, but they haven't been able to find them all yet, so they haven't accounted for all of them. They do not know where they all are.

[Portions in foreign language.]

A VOICE. About nine or seven months ago, they killed one of her family, and the child that was left, one of the children that was left was an infant, and is now in the hospital of a nearby town, and is close to death.

[Portions in foreign language.]

A VOICE. The women were bathing in the river when the military found them and they took them into the woods, and then later they were found.

That's all she's going to say right now.

[Portions in foreign language.]

A VOICE. She says she personally saw them kill children and rape children from ten years of age and older, and then they would also take their bayonets and make what they call mincemeat out of them.

[Portions in foreign language.]

A VOICE. She said with the guns they would shoot at their faces.

[Portions in foreign language.]

A VOICE. And disfigure the people.

[Portions in foreign language.]

A VOICE. She said even going to the mountainside you weren't safe because they would have these huge machines that would climb up the mountainsides and try and get them, and they would set up their mortars and shoot at the villages.

A VOICE. Did the Left ever do those things?

[Portions in foreign language.]

A VOICE. No, they didn't.

[Portions in foreign language.]

A VOICE. No, they haven't done those kinds of things.

[Portions in foreign language.]

A VOICE. What she was saying is they would cut people's stomachs open and put salt and coffee inside their stomachs as a mocking.

[Portions in foreign language.]

A VOICE. They would open up the people's stomachs, the women's stomachs as if they were iguanas to take the child out as if they took out the eggs of an iguana.

[Portions in foreign language.]

A VOICE. And that is what I saw, and that is what I have to say.

The woman that just spoke was named Marcella. She is 45 years old.

[Portions in foreign language.]

He doesn't want to give his name.

A VOICE. This man had a wife and seven children, and one day 15 armed men arrived, some in civilian clothes, and some in army uniforms.

[Portions in foreign language.]

A VOICE. The government of Salvador is saying that the United States is helping them, and the man just expressed fear that that aid is going to be used against the people across the border in his country in Salvador, and he is afraid that once they keep on pushing people out they are going to come across the border and use that same armament here in this country.

A VOICE. He is afraid that they are going to take the military aid that the United States Government is giving and use that also to cross the Honduran border in pursuit of the Salvador refugees?

A VOICE. Exactly, yes. That's exactly what he's afraid of.

A VOICE. Is it the helicopters?

[Portions in foreign language.]

A VOICE. He said, yes, we fear the helicopters because they are up in the sky and they shoot at us.●

WHAT DOES ATLANTA TEACH US?

HON. CHARLES F. DOUGHERTY

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 31, 1981

● Mr. DOUGHERTY. Mr. Speaker, the entire Nation is in a state of shock and disbelief following yesterday's assassination attempt on the life of our new President. Our hearts cry out for an end to the violence in our streets which threatens the very foundations of America. Our people have shown remarkable resilience throughout the many violent attacks on our national leaders in this century. But today we truly wonder how much more we can take and not lose our national sanity.

On the same tragic day that our President was gunned down in a Washington street, the body of yet another young black child was discovered in Atlanta, making a grim total of 21 children who have been slaughtered in that city by a savage psychopath.

I cannot find the words to describe the sense of sorrow and helplessness I feel for this Nation and I am struggling to find a sense of hope. A renowned news columnist from my city of Philadelphia has described the tragedy in Atlanta far better than I can and he finds hope in the prospect that we will share an "overriding concern which believes that what hurts one hurts the other." I want to share with my colleagues the words of Chuck Stone in an article he wrote for the February 17, 1981 edition of the Philadelphia Daily News:

WHAT DOES ATLANTA TEACH US?

(By Chuck Stone)

The more gruesome Atlanta's nightmare has become, the wider a national sense of helplessness has spread.

Businesswoman Olivine McCoy probably mirrored a prevailing frustration when she asked in a pain-choked whisper, "What can we do?"

She has shared those mother's anguish. Seven years ago, her youngest son, Tyrone, was killed in a senseless homicide.

"Praying is good and I'm happy people are doing that," she reflected. "But it's not catching the murderers."

Even with those limitations, McCoy still supports prayer vigils and other publicly expressed alliances.

Symbols may not solve a crisis, but they're important. Atlanta mothers need to believe a nation cares for their children. National unity didn't get the hostages released in Iran. But the depths of that love comforted their wounds.

Atlanta's civic heart has been infected with a criminal abscess that will not easily be healed.

The murders of 17 black children in 19 months—almost one per month—in a predominantly black city headed up by a black administration has unleased a tidal wave of paranoia among black families. Who's out to get them?

When a boiler in a black housing project exploded, few were convinced it was accidental.

Struggling to preserve an inner calm, the city administration reached the outer limits of civic sanity weeks ago.

It has been now reduced to finding bodies instead of catching murderers.

In this kind of vacuum of frustration, the bizarre feeds on the unknowing.

Talk show callers are reliving their dreams in which a particular face or house keeps recurring. Weirdos paint color books of visions.

Psychics have been deputized. Only fortune cookies have not been pressed into service.

Yet, Americans of good will continue to offer hard-nosed strategies. Daily News reporter Kitty Caparella was the first to suggest that a team of trained dogs be used, and they were sent to Atlanta from Philadelphia.

Police Inspector Bernard Small has discussed with Atlanta police a sensible plan to use child-sized featherweight boxers as bait for the killers.

With out-of-state detectives, state investigators and the FBI scouring Atlanta for that one thread that ties the murders together, two one-word questions blanket the city like a circling swarm of vultures.

Who? Why?

The 17 victims are all black. Are their deaths the twisted work of a sick racist or a normal-looking, respectable-acting psychotic?

Some authoritative callers and responsible writers are convinced these kids could not have been murdered so easily if they had not been lured by a guileless-appearing authority figure, somebody they trusted.

What more commanding authority figure than a person in uniform?

White? Some have narrowed it to that one chromatic dimension. That theory suffers from one fault.

Random black-on-black crime has done more to wipe out black kids and desecrate black women today than an army of white racists.

In Philadelphia, some of the most ghastly murders and rapes imaginable in the black community are being committed by black men.

In Atlanta, the possibility of one black pyschopathic killer running around loose holds as much water as one city-uniformed white racist stalking those kids.

Again, we are forced to return to the emptiness of our ignorance and the futility of no clues.

If we can hold on to our commonsense long enough before it surrenders to hysteria, we can retain the lessons Atlanta teaches us.

First, organized terror knows no racial boundaries. There is no immunity to depravity whether orchestrated by one fiend or organized by a mob of demented thugs. No defense can be mounted against the planted bomb, the stealth of the rapist or the assissin's plot.

In the Middle East, innocent women and children are systematically murdered. Businessmen are kidnapped in Europe, elderly white women are murdered in Columbus, Ga., black men are assassinated in Buffalo and their hearts ripped out, and the bodies of 33 white boys tortured and murdered in Illinois by John Wayne Gacy Jr. were eventually dug up. At any time anywhere, organized terror can strike any of us.

Secondly, parents have got to be more lovingly protective about their children. In a couple of instances in Atlanta, parents didn't report children missing immediately because it was normal for them not to be at home at a certain time. Parents should know their children's schedule with the same authority as they sign a check.

Thirdly, we ought to be quicker about spotting possible trends.

By the time five kids were missing, Atlanta authorities should have been climbing their municipal walls and offering huge rewards.

Yet there was no great national outcry. The headlines didn't scream. Are five missing kids to be cherished less than 17? Life has been cheapened. We seem to require bigger numbers before we get excited.

To contain the barbarianism within us, we must not rely on occasional prayers or offers of assistance.

The hope of Atlanta, as does the hope of America, lies not in the sponsorship of official prayer breakfasts and longer Sunday morning sermons.

Rather, our peace comes only with the embrace of an overriding concern which believes that what pains one hurts the other. What debauches me eventually destroys you.

That's what makes our humanity indivisible. The cold partitions of color, religion and class ultimately will dissolve in the warmth of our oneness.

If President Reagan can become the forceful exponent of that vision, nothing will come between us and the power of its affection.

Mr. Speaker, surely today we can agree with this outstanding black news columnist that "terror knows no racial boundaries" and that "there is no immunity to depravity whether orchestrated by one fiend or organized by a mob of demented thugs". Indeed, in the words of Chuck Stone, "No defense can be mounted against the planted bomb, the stealth of the rapist, or the assassin's plot." He believes with all his heart that when our people "embrance an overriding concern which believes * * * that what debauches me eventually destroys you" then the "cold partitions of color, religion, and class ultimately will dissolve in the warmth of our oneness". Let us pray that it is true.●

AGRICULTURAL LAND RESOURCES ACT OF 1981

HON. JAMES M. JEFFORDS

OF VERMONT

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 2, 1981

● Mr. JEFFORDS. Mr. Speaker, today I am introducing the Agricultural Land Resources Act of 1981, in order to further local and State efforts to address the continuing permanent conversion of agricultural land to nonagricutlural uses.

The act builds on the intent of Congress expressed in House Concurrent Resolution 92, which already has 80 cosponsors, and goes further to spell out:

The overall national policy that Federal programs should be administered, except where precluded by law, in a manner that will not cause the unnecessary, irreversible conversion of agricultural land to other nonagricultural uses, and that will not conflict with local or State programs to protect agriculture;

The role that the Secretary of Agriculture should carry out to cooperate with other Federal agencies whose programs may influence the conversion of agricultural land and to report to Congress on how Federal programs could be redesigned to assure the retention of productive agricultural land;

The responsibility of the Secretary to provide technical assistance to any State, locality, or qualifying nonprofit organization which desires to develop farmland retention programs or policies; and

The specific charge to the Secretary to implement educational programs and disseminate educational materials emphasizing the importance of productive agricultural land, and to designate one or more agricultural land information centers.

I was very encouraged by the testimony provided in hearings of the Conservation, Credit, and Rural Development Subcommittee of the House Agriculture Committee, in which several witnesses urged the Congress to seek swift passage of a bill such as I am introducing today. They further recommended that such a bill be made an important part of the 1981 farm bill.

I also was very encouraged by the testimony provided to the full committee earlier this week by Secretary of Agriculture John Block, and the explanatory notes that he provided for the administration's farm bill language. It is very timely to include an agricultural land resources title in the farm bill, and the bill I am introducing today is consistent with the position of the Secretary.

As Secretary Block said at the national agricultural lands study workshop in Chicago in February, the agricultural community has to convince the rest of the Nation of the dangers to farmland of unchecked urban development.

He said:

> In the next 20 years we cannot realize a 60- to 85-percent increase in demand for U.S. agricultural products while urbanizing 3 million acres of productive land each year and maintaining current low productivity rates.

At the same time, I know Secretary Block and many of my colleagues understand that decisions about managing and improving the productive capacity of the agricultural land resource belong primarily to citizens and to their local and State governments. Where they request technical assistance or educational materials or background data, the Department of Agriculture should be ready to provide it. Where they call for further information or research, the Department of Agriculture should be ready to seek it. Where they speak up that a Federal program of any kind may be unnecessarily bringing about the irretrievable conversion of agricultural land resources that are important to them, the Department of Agriculture and the Office of Management and Budget should be ready to cooperate with the appropriate agencies in making sure the programs blend with rather than conflicting with the local and State interests or objectives.

The bill I am introducing today calls for no new agency or institution. It calls for no new expenditure of Federal funds. It simply encourages that the Federal Government operate its programs and facilities in a little different way so that this Nation's strategically important ability to produce food and fiber is not unknowingly or unnecessarily compromised. It simply sends a signal to local and State governments that we will begin to help them in their growing efforts to maintain a productive agriculture.

This one bill will not solve the whole problem; I am considering further legislation, along with other Members, that might address such other elements as economic research, tax, and other incentives to farm on good land

and build on other land, and other possible shifts in programs and assistance.

Yet this bill will set the overall stage for a responsive, well coordinated effort to provide the agricultural land resource assistance needed for a permanent agriculture. I am pleased that Secretary Block has agreed to make this kind of title an important segment of the 1981 farm bill. It blends well with initiatives in soil and water conservation, commodity programs, and the like. I encourage all of you to support such a title with the language that I have suggested.●

WOMEN'S RESEARCH AND EDUCATION INSTITUTE

HON. LINDY (MRS. HALE) BOGGS

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 2, 1981

● Mrs. BOGGS. Mr. Speaker, the Women's Research and Education Institute of the Congresswomen's Caucus, in an effort to determine the impact of the proposed budget revisions on women, has prepared analyses of a number of these cuts. I thought my colleagues would be interested in seeing the reports on student benefits and the proposed tax cut.

GUARANTEED STUDENT LOANS (IN FUNCTION 500)

Loans to students and parents from private and state lenders are guaranteed against default by the Guaranteed Student Loan Program. Eligible recipients include any student enrolled at least half-time in a post-secondary education program. Interest charges are paid by the federal government while the students are in school; a 7 to 9 percent interest rate is charged upon leaving. The Administration proposes to:

Take into account other forms of aid, including familial, and limit the loan to the remaining "assessed" need;

Eliminate the in-school interest subsidy;

Eliminate all federal subsidies, except the default guarantee, for parental loans.

The Congressional Budget Office estimates that the needs requirement would reduce the eligible population by approximately 50 percent. However, there is no guarantee that the number of participants would be reduced, since only about one-third of the eligible population currently borrows.

Impact on Women: It is not clear that cuts in this program would have a direct disproportionate impact on women. One objective of the proposed changes is to ensure that the GSL's go to students who truly need them. Possibly, the children of female-headed households, whose incomes fall well below that of other households, would have a high probability of qualifying for these loans. However, lenders might be more reluctant to provide sufficient capital if loans were made on the basis of need. Thus, these same students might face considerable difficulty in obtaining loans.

Comment: The GSL program must also be considered in relationship to the proposed elimination of the student Social Security benefit. Cuts in the latter program are discussed elsewhere in this paper; however, we might repeat that a very high percentage of student Social Security beneficiaries are the children of widows. Although no estimates are available, it is likely that students who are—or would have been—eligible for student Social Security benefits will apply instead for a GSL. Cutbacks in the GSL program might make it difficult for some of these students to transfer to GSL, especially if the pool of available loan capital for needy students is reduced.

PELL GRANTS (IN FUNCTION 500)

The Pell Grant (formerly the Basic Educational Opportunity Grant) program provides grants to low-income undergraduate college or post-secondary vocational/technical school students enrolled at least half-time. Grants vary in amount, depending on the family's discretionary income. Among the proposed changes are the following for fiscal year 1981:

Maintaining the maximum grant at $1,750;

Rescinding an inflation adjustment in the family cost-of-living allowance; and

Requiring students to contribute $750 to their educational expenses.

These changes would be retained in 1982. In addition, the Administration proposes that the:

Assessment rate on discretionary income be increased; and

State and local tax deductions used in determining family contributions be eliminated.

Impact on Women: Lower-income persons constitute the majority of Pell Grant recipients. The Congressional Budget Office concludes that most of the overall reduction would affect these students. Some 575,000 fewer students would receive grants in fiscal year 1982 than are currently receiving them. In addition, the average benefit would be about $150 less than it is now.

The impact on women is by no means self-evident. A disproportionately high percentage of low-income families are headed by women. Their children (and children of other low-income families) should receive preferential treatment in the grant award process. Benefit levels to the truly needy, however, will drop. This development, combined with reductions in other forms of student assistance, may have a very negative impact on female-headed households.

Comment: Moderate- and middle-income families would also be affected by these reductions; however, according to the CBO, "even awards for the most truly needy would fall behind previous levels." The demand for other types of assistance will probably increase, although cuts in these programs may make it difficult for many students to obtain adequate financing.

INCOME TAX RATE REDUCTION

With the aim of encouraging savings and investment, and improving the incentive to work, the Administration proposes to cut personal income tax rates by 10 percent a year over the next 3 years.

Impact on Women: Enactment of this proposal would do very little to help the vast majority of those millions of women (some 21 million) who are not part of a married couple. The Congressional Budget Office estimates that only 3.3 percent of the Administration's proposed tax reductions would benefit taxpayers with incomes below $10,000, the income category in which 60 percent of all female householders with no spouse present and 70 percent of widows are found. Less than 14 percent of the proposed tax reductions would benefit those with incomes between $10,000 and $20,000, the range in which the incomes of 28 percent of female householders and about 20 percent of widows fall. More than four-fifths (84 percent) of the benefits of the proposed tax reductions would go to taxpayers with incomes of more than $20,000, a group into which only 12 percent of female householders and 10 percent of widows fall.

For women in the nearly 40 percent of all married couples with incomes over $25,000, the cuts in the tax rates should be helpful, especially in cases where both spouses work. A reduction in the marginal tax rates does lessen the tax impact of a second salary. Nevertheless, the Congressional Budget Office has pointed out that a reduction in tax rates is not as effective in reducing the "tax on marriage" as would be other suggested approaches targeted specifically to the marriage tax.

APPENDIX

POVERTY IS A WOMEN'S ISSUE

1. Three out of every 5 persons with incomes below the poverty level are women. Two out of every 3 older persons living in poverty are women.

2. Female-headed families with no husband present comprise only 15 percent of all families, but 48 percent of all poverty families.

3. Female-headed families with no husband present comprise 11 percent of all households and 27 percent of all poverty households. Another 31 percent of all poverty households are female nonfamily households.

3a. The poverty rate for female-headed families with no husband present is more than triple that of all families. At 64 percent, the poverty rate for households headed by young (aged 15-24) women is seven times the poverty rate for all families.

4. Black female-headed families with no husband present are particularly likely to be poor. Black families headed by young women are especially disadvantaged.

5. The median income of all women aged 14 and older is well below half that of their male counterparts. This income differential widens in the middle years.

6. Older women are concentrated in the lowest income brackets. Seven out of every 10 widows, most of whom are older women, had incomes of less than $10,000 in 1979.

7. In general, women are much more likely than men to live in central cities. Older women in central cities outnumber men by a wide margin. (Figure 5.) Thus, cuts in aid for apparently gender-neutral city services could disproportionately affect women.

8. Households headed by women are far more likely than other households to be benefiting from federally-assisted programs.

9. Poor women who work are concentrated in the lowest paying kinds of jobs with few opportunities for increasing their income.●

FAMILY ENTERPRISE PRESERVATION ACT

HON. E. THOMAS COLEMAN

OF MISSSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 2, 1981

● Mr. COLEMAN. Mr. Speaker, not long ago, Senator NANCY KASSEBAUM introduced S. 574, the Family Enterprise Preservation Act which would ease the burden of taxes on family farm enterprises and other small businesses. It is with great pleasure that Mr. ROBERTS and I offer this bill for the consideration of the House of Representatives.

The family farm has changed greatly during the past decade. Farm values have increased dramatically as inflation has driven up the cost of buying farmland. It is extremely difficult for young people to enter farming on their own.

Mr. Speaker, I have recently heard from young people in my district—who earnestly want to farm—describe the difficulty they expect to face because of the current unfair, confiscatory inheritance taxes.

Land, machinery, and other production costs are quickly becoming insurmountable for the young farmer, especially when coupled with exorbitant interest rates. For these reasons it is absolutely necessary that Congress act to assure that farms can be passed on from one generation to another without losing the greatest asset of the estate, the land.

Under current law the owner of a family enterprise often is forced to sell a portion of the estate to pay taxes. This must be corrected.

This bill would clearly safeguard the family farm enterprise by excluding the first $750,000 from Federal estate taxes. The bill would allow the $750,000 exclusion as long as the farm or business accounted for at least half of the estate.

To discourage any kind of windfall to the survivors of an estate, the legislation also provides for a payment of the excluded taxes if the estate is sold within 5 years of the original owner's death. For each year after that, 10 percent of the property's value would be protected from estate taxes.

As the Senator from Kansas noted when S. 574 was introduced, this legislation would be extremely beneficial to farm wives. They are as involved as their husbands in the day-to-day operations of a family farm, but when their husbands die they are often forced to sell the farm in order to pay estate taxes. No consideration is given, under current law, to the fact that these women are fully capable and willing to continue farming on the family estate.

Mr. Speaker, this legislation is essential to preserving the family farm in America and I urge my colleagues to give it rapid and favorable consideration.●

PROPOSED BUDGET CUTS EFFECT ON WOMEN

HON. MARGARET M. HECKLER

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 2, 1981

● Mrs. HECKLER. Mr. Speaker, the Women's Research and Education Institute, the research arm of the Congresswomen's Caucus, has prepared analyses of the impact on women of the administration's proposed budget cuts. The areas under consideration include education, selected social security benefits, and health programs. I insert in the RECORD statements by the institute relating to these issues:

PROPOSED BUDGET CUTS EFFECT ON WOMEN

HOUSING ASSISTANCE—FUNCTION 600

The housing programs targeted for reduction subsidize the housing costs of lower-income families in rental units. The Administration proposes to:

Reduce the long-term budget authority for FY81;

Rescind new commitments for FY82 by more than $9 billion;

Increase over a five-year period the maximum tenant rent payment from 25 to 30 percent of income; and

Reduce funding levels for public housing modernization.

A large proportion of new rental units (perhaps as many as 75 percent in 1979) is subsidized by the federal government. Consequently, the budget decisions may have a substantial impact on the supply of housing in the coming years.

Unsubsidized housing is increasingly out of the reach of low-income persons. A reduction in support, therefore, can be expected to restrict further the housing available to this income group. The National Urban Coalition estimates that 125,000 people faced with displacement or living in unsubsidized housing will be unable to obtain decent, affordable housing.

Impact on Women: Two-thirds of all households in publicly owned or other subsidized housing in 1979 were headed by women. (Some 64 percent of all householders living in subsidized housing were 65 years or older. Sex breakdowns by age are not available; however, the majority are probably women.) Persons currently residing in subsidized housing will not be affected by reductions in capital outlays for such housing, at least while the existing units remain livable.

Estimates of the characteristics of persons who might be inconvenienced or harmed by the proposed reductions in capital outlays for subsidized housing, or by cuts in public housing modernization, are not available. If, however, the population in need of subsidized housing or housing improvement reflects the population currently living in such housing, then the majority of persons would be women.

Again, because the majority of tenants in subsidized housing are female householders, the proposed rent increase would have a disproportionate impact on women. $5,325 was the median income of female-headed families, with no husband present, who lived in subsidized housing in 1979. (The median income for nonfamily households headed by women was only $3,845.) Although the proposed rent increase might seem modest, it could mean economic hardship to those persons who are already straining to make ends meet.

The proposed rental increase should also be viewed within the context of proposed reduction in other programs, namely AFDC. The combined impact of simultaneous cuts in several programs could be devastating for low-income people.

BLOCK GRANTS

The Administration proposes to consolidate 26 health service programs, 13 social service programs, and low-income energy assistance into four block grants to states. The FY82 level of funding would fall some 25 percent below that for FY81. In fact, taking inflation into consideration, the funding reduction would in effect be greater than 25 percent.

A wide range of programs would be affected by consolidation, among which are home health services, primary health care centers and services, mental health, drug abuse and alcoholism services, family planning services, and Title XX social services (which include day care).

Impact on Women: The magnitude of the impact depends largely on how states respond to consolidation. However, a substantial reduction in services can be expected, since there is little evidence that many states would be able to compensate for the cut in federal funding. Moreover, many of these programs were established because states and localities were not meeting certain needs in the first place.

The Majority of the programs proposed for consolidation are targeted toward poor and low-income persons. As noted repeatedly throughout this paper, women predominate among the poor. Thus, they may be disproportionately affected by any cut in services. Some programs, such as day care and employment services, may mean the difference between welfare dependency and self-support, particularly for women. If these services are not available, greater welfare dependency could be the only alternative.

Comment: The long-term consequences of a reduction in some of the proposed block grant services, such as maternal and child health, could be extremely costly (e.g., an increase in untreated health problems, an increase in the already alarmingly high teenage pregnancy rate, etc.). A large portion of the anticipated savings from consolidation might be offset by future expenditures that could have been prevented by timely intervention.

Projected savings in administrative costs might not be as great as estimated, because states and localities would have to develop administrative systems for work that is now done on the federal level. With 40 programs being administered by 50 states, accountability would be extremely difficult.

THE LEGAL SERVICES CORPORATION—FUNCTION 750

The Legal Services Corporation (LSC) was established in 1974 to provide legal assistance to the poor in civil matters. Under present law, LSC is authorized to provide free legal services to persons at or below 125 percent of the poverty guidelines established by the Office of Management and Budget. There are more than 300 local Legal Services programs; the LSC reported

that one million legal services cases were closed in 1979.

The Administration proposes to eliminate funding for the Legal Services Corporation entirely, beginning in FY 1982. ($321 million was appropriated for LSC in FY 1981.) Under the Administration's proposal the states could fund legal aid for the poor from the proposed consolidated social services block grants if they chose to do so.

Impact on Women: The disproportionate impact on women of eliminating the Legal Services Corporation is clear, since more than two-thirds of Legal Services clients are female. It is likely that at least 15 percent of these women are over 60 years of age—the percentage is probably greater.

Comment: If the Administration's proposals both to eliminate the Legal Services Corporation and to fund major social services programs in block grants at a reduced level of support are adopted, continuing access on the part of the poor to legal assistance in civil matters is likely to depend on the answers to two questions:

1. What budget priority will states assign to legal aid to the poor, given overall reductions in federal funding for a range of social services?

2. Will—as the Administration has suggested—large numbers of private attorneys undertake to help fill the vacuum with "pro bono" legal work for the poor?

If the anwers to these questions prove to be "no," there is a third—and fundamental—question:

Can people reasonably be expected to abide by the laws if they themselves are effectively denied legal recourse because they cannot afford the services of lawyers?

ELEMENTARY AND SECONDARY EDUCATION PROGRAMS—BLOCK GRANTS IN FUNCTION 500

The Administration proposes that most federal aid for elementary and secondary education be consolidated into block grants. Among the programs involved are two large categorical grant programs: Title I of the ESEA, which currently funds over $3 billion in grants for services to disadvantaged students, and approximately $1 billion in grants for programs for handicapped children. Also included would be a number of other smaller programs, among them the Women's Education Equity Act programs, currently funded at $10 million, and the Equal Educational Opportunity programs authorized by Title IV of the 1964 Civil Rights Act. 28 percent ($13 million) of the latter's funds are currently targeted for assistance and training to end sex discrimination in education. (The Administration also proposes to end "impact aid" for school districts having a concentration of federally-assisted low-income housing.)

Under the Administration's plan, these and other programs would be combined into block grants, one to states and one to local education agencies (LEA's). 1981 funding would be cut by 25 percent of current appropriations; in FY82, there would be a small (7 percent) increase over this reduced 1981 level. States and localities would have wide discretion in allocating the block grant funds.

Impact on Women: Since nearly 60 percent of poor families with school-age children are female-headed, a large percentage of the children served by Title I programs are certain to be from female-headed families. The National Urban Coalition estimates that a 25 percent reduction in funding for the kinds of education programs now funded under Title I could mean that as many as 1.5 million children would be eliminated from such programs.

Eliminating the federal impact aid targeted to school districts with a significant concentration of federally-assisted low-income housing could have a pronounced effect on the schools attended by children of female-headed families, since 58 percent of all families in public or federally-subsidized housing are female-headed. (Two-thirds of all households in such housing are female-headed.)

Women could also be noticeably affected by cuts in education for handicapped children, since mothers are mostly likely to bear the heaviest burden of responsibility for their care. Local school boards faced with allocating a substantially reduced education budget might choose to cut back severely on education and training programs for the handicapped, since "special education" can be more than twice as expensive per child as "regular" education. Moreover, to the extent that education and training equip handicapped children to lead more independent lives in adulthood, failure to provide that education could have serious implications for their mothers in the long run.

Since 71 percent of all elementary and secondary teachers are female, women would be disproportionately affected by reductions in the number of teaching jobs. It has been estimated that 64,460 teacher positions would be eliminated under the Administration's proposed education budget; this translates into 45,000 jobs lost by women teachers.

Women would unquestionably be affected by cuts in programs to end sex discrimination in education. Educational opportunities play an important role in determining the economic status of women in adulthood, and there is still a long way to go before educational inequities based on sex are eliminated. WEAL points out that in 1978 women were only 11 percent of all participants in vocational training programs leading to higher-paying, traditionally male, jobs.

Comments: The Administration proposals will mean a real cut in funds for education programs (The Congressional Budget Office estimates at least 20 percent in 1982, even if the "best case" administrative savings are achieved) unless the states and localities can—and are willing to—make up the difference. Although federal funds have accounted for only about one-tenth of all annual spending on elementary and secondary education, the Administration's proposed reduction in federal support would mean the loss of very large dollar amounts for many states.

The question is whether states and localities, many of which are already having a hard time making ends meet, could—or would—increase taxes to make up for the loss of federal support, and whether they would, in any case, be likely to embrace present federal priorities in targeting funds for the education of disadvantaged and handicapped children. Another question: with a shrunken budget, how much priority would be given to programs to end sex discrimination, especially in light of the fact that the vast majority of high-level school administrators are men?

CETA—FUNCTION 500

The Comprehensive Employment and Training Act (CETA) provides funds to state and local governments for employment and training programs. The Administration proposes eliminating all Public Service Employment (PSE) jobs by the end of 1981. The jobs targeted for elimination include those funded by Title II-D, which addresses structural unemployment, and Title VI, which addresses cyclical unemployment. Some 315,000 PSE slots will be lost. In fact, however, the number of persons may be somewhat higher, since more than one person may fill a PSE slot in a given year. According to the Congressional Budget Office, natural attrition will take care of about half of the jobs; in the other half, workers would be fired, laid off, or perhaps absorbed into other public employment positions.

Impact on Women: Although women will not be disproportionately affected by these PSE cuts, the impact on women should not be minimized. About one-third of the PSE job holders, or some 100,000 persons, are women. Many of these women are structurally unemployed (i.e., unskilled, undereducated, etc.) and have moved from welfare rolls to employment only because of PSE opportunities. It will not be easy for such women—many of them only partially trained—to find employment in the private sector, especially in view of the fact that no proposals to open up private sector jobs for PSE employees have been introduced. Access to other forms of economic assistance, as an alternative to PSE employment, is threatened by other proposed budget cuts. Even though the number of women affected is relatively small, especially when compared to the number affected by cuts in such programs as AFDC, the PSE cuts can be regarded as an erosion of the employment gains that women have managed to make in recent years.

The impact of these cuts may extend to other women, as well. According to Wider Opportunities for Women, about one-fifth of all women's employment programs depend on monies from Titles II-D and VI of CETA. Cuts would limit opportunities for women to increase their employability, thus restricting employment options in the short and long run. In addition, many other programs that benefit women (e.g., displaced homemaker services, women's health clinics, and the like) are staffed by CETA employees. Many of these programs operate from hand to mouth, and whether they could afford to replace a CETA employee is questionable.

Comment: The long-range consequences of these proposed cuts should also be considered. According to preliminary estimates cited by the Congressional Budget Office, CETA participation does increase post-CETA-employment earnings. PSE employees in state and local government jobs have enabled states and localities to stretch limited resources in providing services. Without PSE employees, a cut in some services might ensue. An increase in spending for public assistance and food stamps may also be expected. Unemployment compensation costs will increase, while Social Security and federal tax revenues will decline.

SOCIAL SECURITY MINIMUM BENEFITS—FUNCTION 600

Social Security recipients are currently entitled to a minimum benefit of $122 a month, regardless of the amount of covered earnings. Although this benefit does not ensure an above-poverty-level income, it does provide a higher income than many sporadic, discontinuous, or low-earning workers would otherwise have received. The Administration proposes to eliminate it.

Impact on Women: Elimination of the minimum Social Security benefit would clearly affect older women. About three-fourths of the beneficiaries—some 2.3 mil-

lion persons, many of them black—are women.

Comment: The proposed cuts are designed to eliminate payments to "double dippers" and persons with substantial income from other sources (e.g., spouse's earnings). The Administration argues that the truly needy would not be adversely affected by this reduction because such individuals would be eligible for Supplemental Security Income (SSI) if they are not already receiving it, or higher benefits if they are.

The recommendation to eliminate the minimum benefit was based on a 1977 General Accounting Office attempt to identify minimum beneficiaries. GAO found that some 15 percent of the beneficiaries were also receiving federal pensions. The average pension was $900 a month. However, 20 percent of these were receiving federal pensions of $250-$499 a month. In some instances, the minimum Social Security benefit might make the difference between a poverty- and above-poverty-level existence.

According to GAO, another 30 percent of the minimum beneficiaries have substantial other income. It is important to note that "substantial" merely means "ineligible for SSI." The benefits of persons with incomes above the SSI maximum (about 75 percent of the federal poverty level for single persons) would be only partially offset by SSI.

Eighteen percent of minimum beneficiaries are receiving SSI. GAO is unable to tell us anything at all about 26 percent of the minimum beneficiaries. GAO believes that a "significant" portion of this 26 percent has substantial other income; however, the validity of this conclusion is very much in question. It was based on a supplemental survey of 89 minimum beneficiaries in Los Angeles, California.

It may be that eliminating this benefit will not cause undue harm to the poor (who will transfer to SSI) or to persons with adequate other sources of income. It is the near poor—many of whom are women—who may experience substantial income reductions if their Social Security minimum benefit is eliminated. Further research on the characteristics and income of minimum beneficiaries is clearly warranted before this benefit reduction is approved.

SOCIAL SECURITY BENEFITS FOR STUDENTS—FUNCTION 600

The Administration proposes to phase out Social Security benefits to unmarried, full-time students aged 18 to 21, who are dependents of retired, disabled, or deceased workers. Almost 800,000 students were receiving such benefits in 1979.

Impact on Women: Widows attempting to support and educate their children will be especially affected by this phase-out. Over half of the student beneficiaries are children of deceased male workers. (The remainder are children of retired or disabled male and female workers.)

Comment: According to the Congressional Budget Office, the median income for families with student beneficiaries was only 71 percent of the median income for all families with unmarried full-time college students between the ages of 18 and 21. It is by no means clear that families of student beneficiaries could assume the additional burden of educating these children. A woman receiving a Social Security widow's benefit would truly be between a rock and a hard place if her student child or children no longer received Social Security student benefits. Taking a job, or working longer hours, in order to earn more money for college bills could cause her widow's benefit to be reduced or eliminated.

The Administration contends that Social Security students benefits duplicate other federally-funded education assistance programs. Some students might benefit from other educational assistance programs. However, the CBO analyses reveal that most low-income student beneficiaries of Pell Grants (formerly Basic Educational Opportunity grants, discussed elsewhere in this paper) are already receiving the maximum allowed under that program. Moreover, estimated additional outlays for Pell Grants for 1982 will offset only about two percent of the Social Security savings.

Low-income students—who come from families that are generally not preferred borrowers—may also have difficulty obtaining Guaranteed Student Loans (GSL's), especially if the GSL loan capital is substantially reduced.●

TO THE AMERICAN LIBERAL FROM A FORMER VIETNAM LIBERAL

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 2, 1981

● Mr. McDONALD. Mr. Speaker, it is usually away from the Halls of Congress that we find something in our travels worthy of sharing with all our fellow Americans. Such was the case for me, when I recently read the New York Times Magazine of March 29, 1981. The title of the article: "A Lament for Vietnam."

Everybody is familiar with Solzhenitsyn's "The Gulag Archipelago," but as Doan Van Toai, the author of "A Lament for Vietnam," points out, there was such a thing as "The Vietnamese Gulag." He should know. He wrote it.

I earnestly hope that all those who read this CONGRESSIONAL RECORD, and especially the liberals of the Nation's press who constantly berate those of us who are sincere and dedicated anti-Communists, that they will sharpen their pens, to make the testimony of Doan Van Toai, heard far and wide.

Here is the testimony of one who marched in streets of both Saigon and Berkeley. Here is one who worked in a bank in his land of Vietnam and at the same time, gave secret information to support the Communist Vietcong. Here is one who witnessed the facade of Harrison Salisbury parroting the Communist line for U.S. acceptance by media and the general public.

And then came the rude awakening. Doan Van Toai became the victim of the ideology and the Communist leaders who promoted the massacre of his fellow—peace at any price—liberals. The rude awakening began when his former salary, while working at a bank, was reduced by 90 percent. Then he went to prison. There the list of former ideologues, peace activists, Buddhist peace marchers, and others, who promoted Communist victory, met their deaths—one by one.

Probably the most devastating item in this New York Times article, is the author quoting Mai Chi Tho, a member of the Central Committee of the Communist Party of Vietnam, directing his remarks to a selected group of political prisoners including author Doan Van Toai:

But we won and the Americans were defeated because we convinced the people that Ho Chi Minh is the great man, that Nixon is a murderer and the Americans are the invaders . . . the key factor is how to control people and their opinions. Only Marxism-Leninism can do that. None of you ever see resistance to the Communist regime, so don't think about it. Forget it. Between you—the bright intellectuals—and me, I tell you the truth.

I earnestly hope all will pay heed to the message of this article:

A LAMENT FOR VIETNAM

(By Doan Van Toai)

When the Communists took over North Vietnam in 1954, a million refugees fled to the South. I personally heard stories of their incredible suffering. But, along with other South Vietnamese, I refused to believe them. A generation later, I could not believe Solzhenitsyn's book "The Gulag Archipelago," either. I dismissed it as anti-Communist propaganda. But by 1979, I had published my own book, "The Vietnamese Gulag." Can those who have suffered the horror of Communism ever convince those who have not experienced it?

From 1945, when I was born in the village of Caivon in Vinh Long province, 100 miles south of Saigon, until I left Vietnam in May 1978, I never enjoyed peace. My family's house was burned three times in the war against the French. To escape the fighting, my parents moved from one village to another throughout my youth. Like the majority of Vietnamese patriots, they joined the resistance forces fighting the French. As I grew up, I myself saw how the peasants were oppressed by the local officials of the successive Saigon regimes, how they were victimized by the French bombardments. I learned the history of my country's thousand-year struggle against Chinese occupation and its century-long effort against Western domination. With this background, my compatriots and I grew up with a hatred of foreign intervention.

When the students at Saigon University elected me vice president of the Saigon Student Union in 1969 and 1970, I participated in the different peace efforts, leading student demonstrations against the Thieu regime and against American involvement. I published a magazine called Self-Determination, and traveled in January 1971 to California to give antiwar lectures at Berkeley and Stanford. For my activities, I was arrested and jailed many times by the Thieu Government.

During that period, I believed that I was fulfilling my commitment to peace and the independence of my country. I had faith, too, in the program of the National Liberation Front (N.L.F.), which led the revolutionary resistance in South Vietnam. I hated Saigon's rulers, men like Gen. Nguyen Van Thieu, Gen. Nguyen Cao Ky, Gen. Dang Van Quang—former soldiers of the French colonial army. These were the men whom the French had recruited in the

1940's to help destroy the Vietnamese resistance. They had risen over the years to become leaders themselves, but they commanded no respect from the people. Because of their lack of popular support, they were predisposed to rely on foreign forces.

As a student leader, I felt I had to pursue the aspiration of the Vietnamese people for democracy, freedom and peace. Naively, I believed that the Hanoi regime at least had the virtue of being Vietnamese, while the Americans were foreign invaders like the French before them. Like others in the South Vietnamese opposition movements, I believed that our Communist compatriots in the North would be more amenable to compromise and easier to work with than the Americans. Moreover, I was hypnotized by the personal sacrifices and devotion the Communist leaders had demonstrated. Ton Duc Thang, former President of North Vietnam, for example, had been imprisoned for 17 years in a French jail. I was hypnotized also by the political programs advocated by the N.L.F., which included a domestic policy of national reconciliation, without risk of reprisal, and a foreign policy of nonalignment. Finally, I was influenced by progressive movements throughout the world and by the most prestigious intellectuals in the West. My impression was that during the 1960's and early 70's the leaders of the American peace movement shared my convictions.

These convictions endured through the signing of the 1973 Paris peace accords and the subsequent collapse of the South Vietnamese Government two years later. When liberation was imminent, I was the one who told friends and relatives not to flee. "Why do you want to leave?" I asked. "Why are you afraid of the Communists?" I accepted the prospect of enduring harships to rebuild my country and I decided to stay in Vietnam and continue working as a branch manager at a Saigon bank, where I had been for more than four years, writing secret reports about the economic situation in South Vietnam for the N.L.F. (After leaving the university, I had not been drafted by the South Vietnamese Government because I was the only son in my family. And I had not joined the Vietcong because the N.L.F. felt I could serve a more useful role providing financial reports from the bank.)

Several days after Saigon fell, the Provisional Revolutionary Government, formed by the N.L.F., asked me to join the finance committee, a group of intellectuals whose job it was to advise the Government on matters of economic policy. I complied willingly, taking a pay cut of 90 percent. My first assignment was to help draw up a plan for confiscating all the private property in South Vietnam. Shocked, I proposed that we should expropriate only the property of those who had cooperated with the former regime and those who had used to war to become rich, and that we distribute it in some fashion to the poor and to the victims of the war, Communist and non-Communist alike. My proposals, of course, were rejected. I was naive enough to think that the local cadres were mistaken, that they misunderstood the good intentions of the Communist Party leaders. I had many fights with them, believing as I did Hanoi's previous statement that "the situation in the South is very special and different from that of North Vietnam." A few months before the liberation of Saigon, Le Duan, the First Secretary of the Communist Party, had said, "The South needs its own policy."

In the end, I could not obey the order to help arrange the confiscation of all private property, a plan that was subsequently carried out. Such a scheme had nothing to do with fulfilling the aspirations of the South Vietnamese, and it went against my conscience. I decided to resign. But no one resigns in a Communist regime. The implication of nonconformity is intolerable to Communists. When I submitted my resignation, the chief of the finance committee warned me that my action "would only serve as propaganda to excite the people; here we never do it that way." Several days later, while I was attending a concert at the great National Theater (formerly the National Assembly Hall, which my fellow students and I had occupied so many times under the Thieu regime), I was arrested. No charges were made, no reasons were given.

After the fall of Saigon, many progressive intellectuals and former antiwar-movement leaders believed that the new Vietnamese regime would bring internal democracy and freedom from foreign domination. They believed that the new regime would pursue that best interests of the people, honoring its promise to carry out a policy of national reconciliation without fear of reprisal. Far from adhering to their promises, the Vietnamese rulers have arrested hundreds of thousands of individuals—not only those who had cooperated with the Thieu regime but even those who had not, including religious leaders and former members of the N.L.F.

Vietnam today is a country without any law other than the arbitrary directives of those in power. There is no civil code. Individuals are imprisoned without charges and without trial. Once in jail, prisoners are taught that their behavior, attitude and "good will" are the key factors in determining when they may be released—whatever crimes they may have committed. As a consequence, prisoners often obey the guards blindly, hoping for an early release. In fact, they never know when they may be released—or when their sentences may be extended.

How many political prisoners are there in Vietnam today? And how many of them have died in prisons during the first six years of Communist rule? Nobody can know the exact numbers. The United States Department of State has said there are from 150,000 to 200,000 prisoners; Vietnamese refugees estimate about one million. Hoang Huu Quynh, an intellectual, a graduate of Moscow University, who served as a director of a technical school in Ho Chi Minh City (formerly Saigon), recently defected to France during his Government-sponsored tour of European countries. He told the French press: "There are at least 700,000 prisoners in Vietnam today." Another witness, Nguyen Cong Hoan, a former member of the reunified National Assembly, which was elected in 1976, who escaped by boat in 1978, said that he himself knew "about 300 cases of executions" in his own province of Phu Yen. In 1977, officials in Hanoi insisted that only 50,000 people, who posed the greatest threat to national security, had been arrested. But Prime Minister Pham Van Dong said, in the French magazine Paris Match, on Sept. 22, 1978, "In over three years, I released more than one million prisoners from the camps." One wonders how it is possible to release more than a million after having arrested only 50,000.

When I was arrested, I was thrown into a three-foot-by-six-foot cell with my left hand chained to my right foot and my right hand chained to my left foot. My food was rice mixed with sand. When I complained about the sand, the guards explained that sand is added to the rice to remind prisoners of their crimes. I discovered that pouring water in the rice bowl would make the sand separate from the rice and sink to the bottom. But the water ration was only one liter a day for drinking and bathing, and I had to husband it carefully.

After two months in solitary confinement, I was transferred to a collective cell, a room 15 feet wide and 25 feet long, where at different times anywhere from 40 to 100 prisoners were crushed together. Here we had to take turns lying down to sleep, and most of the younger, stronger prisoners slept sitting up. In the sweltering heat, we also took turns snatching a few breaths of fresh air in front of the narrow opening that was the cell's only window. Every day I watched my friends die at my feet.

In March 1976, when a group of Western reporters visited my prison, the Communist officials moved out all the prisoners and substituted North Vietnamese soldiers. In front of the prisons, one sees no barbed wire, no watchtowers, only a few policemen and a large sign above the entrance that proclaims Ho Chi Minh's best-known slogan: "Nothing Is More Precious Than Liberty and Independence." Only those detained inside and those who guard them know what kind of place is hidden behind that sign. And every prisoner knows that if he is suspected of planning to escape, his fellow inmates and relatives at home will be punished rather than he himself.

We will never know precisely the number of dead prisoners, but we do know about the deaths of many well-known prisoners who, in the past, never cooperated with President Thieu or the Americans: for example, Thich Thien Minh, the strategist of all the Buddhist peace movements in Saigon, an antiwar activist who was sentenced to 10 years in jail by the Thieu regime, then released after an outpouring of protest from Vietnamese and antiwar protesters around the world. Thien Minh died in Ham Tan prison after six months of detention in 1979. Another silent death was that of the lawyer Tran Van Tuyen, a leader of the opposition bloc in the Saigon Assembly under President Thieu. This well-known activist died in Communist hands in 1976, although as late as April 1977, Prime Minister Pham Van Dong was telling French reporters that Tuyen was alive and well in a re-education camp. One of the greatest losses has been that of the famous Vietnamese philosopher Ho Huu Tuong. Tuong, a classmate of Jean-Paul Sartre's in Paris in the 1930's was perhaps the leading intellectual in South Vietnam. He died in Ham Tan prison on June 26, 1980. These men were arrested, along with many others among the most prominent and respected South Vietnamese, in order to pre-empt any possible opposition to the Communists.

Some American supporters of Hanoi have ignored or rationalized these deaths, as they have the countless other tragedies that have befallen Vietnam since 1975. It is more than likely that they will continue to maintain their silence in order to avoid the profound disillusionment that accepting the truth about Vietnam means for them. Yet if liberty and democracy are worth struggling for in the Philippines, in Chile, in South Korea or in South Africa, they are no less worth defending in Communist countries like Vietnam. Everyone remembers the numerous demonstrations protesting United

States involvement in Vietnam and the war crimes of the Thieu regime. But some of those people who were then so passionately committed to democratic principles and human rights have developed a strange indifference now that these same principles are under assault in Communist Vietnam. For example, one antiwar activist, William Kunstler, refused to sign a May 1979 open letter to the Socialist Republic of Vietnam in which many former antiwar activists, including Joan Baez, protested Hanoi's violations of human rights. Kunstler said, "I don't believe in criticizing socialist governments publicly, even if there are human-rights violations," and, "The entire Baez campaign may be a C.I.A. plot." This statement reminds me of the argument used by the Thieu regime to suppress opposition: "The peace movements and the opposition activists are all the Communists' lackeys."

There are other illusions about the current regime in Vietnam about which people should be disabused. Many people believed that Ho Chi Minh was primarily a nationalist and that the Vietnamese Communists were and are independent of the Soviet Union. I believed the same before they took over South Vietnam. But portraits of Soviet leaders now adorn public buildings, schools and administrative offices throughout "independent Vietnam." in contrast, one never saw pictures of American leaders even during the so-called puppet regime of President Thieu. The degree of subordination the present Government feels toward its Soviet patron is suggested by a famous poem by the well-known Vietnamese poet To Huu, a member of the Politburo and president of the Communist Party Committee of Culture. Here we have an opportunity to listen to a high ranking Vietnamese weep on the occasion of Stalin's death:

Oh, Stalin! Oh, Stalin!
The love I bear my father, my mother, my wife, myself
It's nothing beside the love I bear you,
Oh, Stalin! Oh, Stalin!
What remains of the earth and of the sky!
Now that you are dead.

It may seem incredible that such a poem could have been written in Vietnam, which is known for the strength of its family traditions and its feeling for filial piety. Yet this poem occupied a prominent place in a major anthology of contemporary Vietnamese poetry recently published in Hanoi.

Moreover, Le Duan, First Secretary of the Communist Party, said in his political report to the reunified National Assembly in 1976: "The Vietnamese revolution is to fulfill the internationalist duty and the international obligation," and to do so, in the words of the 1971 party platform, "under the leadership of the Soviet Union." The glorification of Soviet life is, in fact, a major goal of Communist Vietnam's censorship policy.

Immediately after the fall of Saigon, the Government closed all bookshops and theaters. All books published under the former regimes were confiscated or burned. Cultural literature was not exempt, including translations of Jean-Paul Sartre, Albert Camus and Dale Carnegie. Margaret Mitchell's "Gone With the Wind" was on the list of decadent literature as well. The new regime replaced such books with literature designed to indoctrinate children and adults with the idea that the "Soviet Union is a paradise of the socialist world."

Another argument made at times by Western apologists has to do with freedom of religion in Vietnam. One article in the new Constitution of Vietnam, adopted this year, declares that "the regime respects the liberty of the believers and also the liberty of the nonbelievers." In regard to this article, Le Duan has repeatedly proclaimed: "Our present regime is a million times more democratic than any other in the world." The reality, though, is suggested by an incident involving the desecration of a Buddhist pagoda, in which a nude woman, on orders from the Government, entered the pagoda during a worship service. When Thich Man Giac, a prominent Buddhist leader, protested, the Government used the opportunity to try to discredit the Buddhists as enemies of democracy—specifically, of the freedom to disbelieve. Thich Man Giac, who had served as liaison between the Buddhists and the Communist Government, escaped Vietnam by boat in 1977 and is now living in Los Angeles.

All of those who supported the N.L.F. in its struggle should be aware of how they were betrayed and deceived. When Harrison Salisbury of The New York Times visited Hanoi in December 1966, the leaders in Hanoi told him: "The direction of the struggle in the South is by the South and not by the North." Pham Van Dong, Prime Minister, said to Salisbury: "No one in the North had this stupid, criminal idea in mind" that the North wanted to annex the South.

Yet in a victory-day celebration speech made on May 19, 1975, Le Duan said, "Our party is the unique and single leader that organized, controlled and governed the entire struggle of the Vietnamese people from the first day of the revolution." In his political report to the reunified National Assembly in Hanoi on June 26, 1976, Le Duan said: "The strategic task of the revolution in our country in the new stage is to achieve the reunification of our homeland and to take the whole country rapidly, vigorously and steadily to socialism, and Communism."

In 1976, the Provisional Revolutionary Government formed by the N.L.F. was abolished, and South and North Vietnam were reunified under Communist rule. Today, among 17 members of the Politburo and 134 members of the Central Committee of the Vietnamese Communist Party, not a single one is from the N.L.F. (there are several members who had been North Vietnam Communist Party representatives with the N.L.F.). Even Nguyen Huu Tho, former chairman of the N.L.F., holds only the post of acting President of State, a ceremonial position that involves greeting visitors and participating in festivals. But his position will be abolished under the new Constitution.

Listen to Truong Nhu Tang, 57 years old, a founder of the N.L.F., former Justice Minister of the Provisional Revolutionary Government, more recently one of the boat people. Tang escaped in November 1979 and is now living in Paris. He told reporters of his experience in a news conference in Paris in June 1980. Twelve years earlier, he said, when he had been jailed by the Thieu regime for his Communist activities, his father came to visit. "Why," he asked Tang, "have you abandoned everything—a good job, a rich family—to join the Communists? Don't you know that the Communists will betray you and persecute you, and when you finally understand, it will be too late to wake up?" Tang, an intellectual, answered his father: "You would do better to keep quiet and accept the sacrifice of one of your sons for democracy and our country's independence. . . ."

After the Tet offensive in 1968, Tang was exchanged for three American colonels who had been prisoners of war held by the Vietcong; then he vanished into the jungle with the N.L.F. He has visited many Communist and third-world countries on behalf of the N.L.F. during the war. Tang said in his news conference: "I was well aware that the N.L.F. was a Communist-dominated national united front and I was naive enough to believe that Ho Chi Minh and his party would place national interests above ideology and would place the interest of the Vietnamese people above the party's. But the people and I were wrong."

Truong Nhu Tang told of his own knowledge of the way Communist ruling circles operate: "The Communists are expert in the arts of seduction and will go to any length to woo you over to their side, as long as they don't control the Government. But once they are in power they suddenly become harsh, ungrateful, cynical and brutal." Tang summarized current conditions in Vietnam: "The family is divided, society is divided, even the party is divided."

Looking back now on the Vietnam war, I feel nothing but sorrow for my own naïveté in believing that the Communists were revolutionaries worthy of support. In fact, they betrayed the Vietnamese people and deceived progressives throughout the world. The responsibility for the tragedies that have engulfed my compatriots is mine. And now I can only bear witness to this truth so that all former supporters of the Vietcong may share their responsibility with me.

While I was in jail, Mai Chi Tho, a member of the Central Committee of the Communist Party, addressed a selected group of political prisoners. He told us: "Ho Chi Minh may have been an evil man; Nixon may have been a great man. The Americans may have had the just cause; we may not have had the just cause. But we won and the Americans were defeated because we convinced the people that Ho Chi Minh is the great man, that Nixon is a murderer and the Americans are the invaders." He concluded that "the key factor is how to control people and their opinions. Only Marxism-Leninism can do that. None of you ever see resistance to the Communist regime, so don't think about it. Forget it. Between you—the bright intellectuals—and me, I tell you the truth."

And he did tell us the truth. Since 1978, the Vietnamese-Communists have occupied Laos, invaded Cambodia and attacked Thailand, while the Soviet Union has invaded Afghanistan. In each of these depredations, the Communists have portrayed themselves, incredibly, as liberators, saviors, and bulwarks against foreign aggression. And each time, world opinion has remained relatively quiescent.

But in Vietnam, people often remark: "Don't believe what the Communists say, look instead at what they have done." One South Vietnamese Communist, Nguyen Van Tang, who was detained 15 years by the French, eight years by Diem, six years by Thieu, and who is still in jail today, this time in a Communist prison, told me: "In order to understand the Communists, one must first live under a Communist regime." One rainy evening in Saigon's Le Van Duyet prison, he told me: "My dream now is not to be released; it is not to see my family. My dream is that I could be back in a French prison 30 years ago." This is the one wish of a 60-year-old man who has spent his entire adult life in and out of prison fighting for the freedom and the independence of his country. At this moment, he may already

have died in his cell or have been executed by the new rulers.

The Vietnamese people wish to achieve the real revolution; they do not want Communism. The measure of popular hatred for the Communists is that thousands of Vietnamese have abandoned their historical attachment to the land. Under French colonial domination, throughout the long war years, even during the catastrophic famine of 1945 when two million starved to death, Vietnamese simply did not willingly leave their homeland—the land of their ancestors' graves. The recent outpouring of refugees is a direct result of the terror of the present regime. Listen to another refugee, Nguyen Cong Hoan, former N.L.F. agent and member of the new unified Assembly elected in 1976: "This current regime is the most inhuman and oppressive [Vietnam] has ever known." Hoan escaped by boat in 1977, after abandoning his position in the Communist Assembly. "The Assembly," he declared, "is a puppet, the members know only how to say yes, never how to say no."

Among the boat people who survived, including those who were raped by pirates and those who suffered in the refugee camps, nobody regrets his escape from the present regime. I am confident that the truth about Vietnam will eventually emerge. It is already available to those who wish to know it. As Solzhenitsyn has said, "Truth weighs as heavy as the world." And Vietnam is a lesson in truth.●

THE PLIGHT OF REFUGEES FROM EL SALVADOR

HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 2, 1981

● Mr. WEISS. Mr. Speaker, thousands of refugees from the violence in El Salvador could be forced to return to their war-torn homeland unless the United States gives them temporary refuge. The current policy of the U.S. Immigration and Naturalization Service is to force as many as 400 refugees to return to El Salvador each month. Once in El Salvador, some refugees face retribution from their government and all are thrown again into the dangerous situation they sought to escape.

An article which appeared recently in the New York Times provides a thorough explanation of the problems faced by Salvadoran refugees, and of the poor response thus far by U.S. officials. The Secretary of State could initiate a procedure which would grant temporary shelter to these refugees, and a letter urging him to do so was sent 3 weeks ago by myself and 19 of my colleagues. In spite of the urgent importance of offering a temporary haven to Salvadoran refugees, documented in the article which follows, the Secretary of State has failed to take such action.

The issue is of serious concern to us all. I urge my colleagues to carefully consider the information provided by this article.

[From the New York Times]

U.S. IS SENDING HOME SALVADORAN ILLEGAL IMMIGRANTS

(By John M. Crewdson)

LOS ANGELES, March 1.—Refugees from the fighting in El Salvador are streaming into the United States in ever-greater numbers, in many cases having sold all they own to finance the difficult, expensive and illegal journey from their Central American homeland. But they are being sent home again nearly as fast as they are captured, to what many of them fear may be mistreatment or death.

Lawyers working in behalf of the Salvadorans say that, in an effort to keep them from clogging the overloaded immigration system, the Immigration and Naturalization Service sometimes does not tell the refugees that they have the right to have a deportation hearing or to seek political asylum, or it intimidates them into forgoing these procedures.

One Mexican immigration official in Tijuana said last month that some of the Salvadorans apprehended in this country had simply been sent back across the border by American officers.

A spokesman for the United States immigration service, Verne Jervis, said that this practice would be illegal but denied that it was going on. Mr. Jervis said that while there "might be some violations" by local offices of the service, he was unaware of widespread trampling on the Salvadorans' rights.

In the fiscal year that ended in September, 11,792 Salvadorans were apprehended by the immigration service, up from 7,890 four years before. Border Patrol Agents estimate that for every illegal alien they catch, from two to five others manage to evade detection, which would place the number of new arrivals at 25,000 to 60,000 a year.

The Salvadorans are only one small group among the uncounted people entering the United States illegally south of the border. But they are the only ones for whom church groups and others are seeking a temporary haven in this country. Unlike the hundreds of thousands of Mexicans who commute here each year to work, the Salvadorans are driven not by poverty but by war, and for them the prospect of returning home holds far more anguish.

In January, alarmed by an unconfirmed report that some refugees sent home in December had been murdered by right-wing "death squads" shortly after they arrived in San Salvador on Christmas morning, 42 Salvadorans at the immigration service's detention facility in El Entro, Calif., 150 miles southeast of here, released a statement saying they had begun a hunger strike to underline their appeal for asylum from "the political situation which presently exists" in El Salvador.

The report of the Christmas murders, which has gained currency among Salvadoran exiles in this country, remains unconfirmed. But many of those knowledgeable about conditions in El Salvador say there is little doubt that some number of those sent home by the immigration service have been killed, as victims of random violence if not as specific targets of the left or right.

"It just stands to reason," said Millard Arnold, who was deputy assistant secretary of State for human rights in the Carter Administration. "The odds are some of them are going to be killed."

Prof. Blase Bonpane, a sociologist and Latin American expert at California State University here, went further. "There is no doubt in my mind that somewhere between 5 and 10 percent of those who are returned are executed, because the Government had something on them, a member of a union or something," he said.

Some of the refugees, among them teachers and trade unionists, say their names have appeared on what purport to be "death lists" circulated by various right-wing "terror squads." But United States immigration officials say most of those they apprehend seem to be associated with no political faction. "They've seen the fighting," said one, "but they're generally uninvolved in it. They're just frightened."

Whatever their reasons for leaving, the identities of those who are caught once they arrive here are made known to the Salvadoran Government. Before they can be "repatriated," at a cost to the Federal Government of about $300 apiece, officials of the immigration service said, the refugees are interviewed by the Salvadoran Consul General in Los Angeles to confirm their nationality. When they arrive home, according to Professor Bonpane, they are interviewed again and asked "to give some kind of explanation" for having left the country. He said he had seen films of such interviews, adding that "the level of abuse is frightening."

A spokesman for the United States Embassy in San Salvador said that he had heard many reports of mistreatment or killing of Salvadorans returned from the United States, but that he had no evidence that any of the reports were true. But Mr. Arnold said the State Deparment had repeatedly asked the embassy whether it could confirm or disprove the reports and was told, "No one really knows, the situtation is so chaotic."

REPORTS OF PEOPLE MISSING OR DEAD

Among the Salvadorans in this country, it seems, almost everyone knows, or has heard of, someone who has been sent back and is now missing or dead. Mario Vasquez, a Los Angeles lawyer representing a 27-year-old Salvadoran mechanic who has been awaiting deportation at El Centro for 13 months, said his client had received a letter from his mother reporting that two friends sent back to El Salvador a few weeks earlier had been killed.

Such reports are spread mainly through the mail and by word of mouth, but there are also occasional telephone calls from home. It was such a call to a refugee at El Centro, from someone who had been detained there whom he knew only as "Carlos," that provided the Salvadorans with their first account of the rumored Christmas massacre.

The rumor swept through the camp and was passed on to a reporter for El Diario, the Spanish-language newspaper in New York City, which published a brief account Jan. 4. It was later picked up by other Spanish-language newspapers, but none of the published reports have contained any confirmation.

Documents of the Immigration and Naturalization Service made available to The New York Times showed that a group of 25 Salvadorans left here Dec. 24 aboard Western Airlines Flight 746, spent the night at the Mexico City airport and arrived in San Salvador on Christmas morning aboard a Costa Rican airliner. Twelve of the Salvadorans were returning under orders of deportation and the rest as "voluntary returnees."

BODIES ALONG THE ROAD

"Carlos," the man who telephoned El Centro with news of the incident, was said to have been among those aboard the plane who somehow escaped death, and the list of passengers includes three persons with that first name. The man reportedly said he had returned to the airport the morning after his arrival and had recognized the bodies of some of his fellow passengers lying along the road.

The immigration service rejected a request by The New York Times, made under the Freedom of Information Act, for the home addresses of those who returned on Christmas Day, saying it was concerned that any inquiries in El Salvador about their well-being might jeopardize their lives.

As is true of all illegal aliens, no one knows how many Salvadorans are living in the United States. Community services officials here estimate that there are 100,000 to 300,000 in the Los Angeles area alone, and there are also sizable Salvadoran communities in San Francisco and the District of Columbia.

The flow of refugees abated somewhat last summer after the deaths from dehydration of 13 Salvadorans who had crossed the border into Arizona without sufficient water, a case that was widely reported in El Salvador. But immigration officials say the refugees are once again arriving at a rapid pace.

The route they follow leads through Guatemala and Mexico, which as a result are now confronted with illegal immigration problems of their own, and the journey is an expensive one. Rings that specialize in smuggling Salvadorans charge from $1,000 to $1,700 for passage to Los Angeles and $500 more for a trip to the East Coast. Because they come with the intention of remaining here until the Salvadoran conflict is resolved, many of the refugees sell their houses and personal possessions to pay their way. If they are captured and returned home, there is often nowhere for them to go.

Not many of the refugees appear to be applying for political asylum, which requires a showing that the applicant has a specific reason to fear that he will be harmed upon returning home, for example because of membership in a particular political group. The immigration service has no reliable figures, but some estimates place the total number of applicants as low as 400.

Even though there may be more who could meet the criteria for asylum, the great majority of the refugees are probably not qualified under a strict interpretation of the rules requiring a threat of political persecution. "They say they left because they don't want to take sides," said John Weis, an El Centro lawyer who has many refugees among his clients. "but they're caught in the middle, and they feel that they're in real danger."

STATUS OF TEMPORARY REFUGE

United States law also provides, however, for giving temporary refuge to aliens unable to return home because of "civil war or catastrophic circumstances," Such status has been conferred at different times on citizens of Vietnam, Laos, Uganda and, most recently, on Nicaraguans after the fall of the Government of President Anastasio Somoza Debayle. Last fall, President Carter ordered the admission of more than 150,000 Cubans and Haitians who had landed in Florida in boats.

A coalition of Congressmen, religious organizations and other groups, among them the National Council of Churches, the United States Catholic Conference and the American Civil Liberties Union, has been urging the State Department to follow the same policy in admitting the Salvadoran refugees. In a letter to Secretary of State Edmund S. Muskie in January, the coalition quoted Phillip Sargisson, the Central American representative of the United Nations High Commission on Refugees, as having declared that "anyone who comes out of El Salvador today deserves refugee status."

When the Carter Administration left office, according to Millard Arnold, the former State Department official, it was "very, very, close to working out a compromise" that would have allowed the Salvadorans to remain here temporarily, not through any official action but simply by not sending them home.

The plan was endorsed, he said, by the department's human rights bureau, after reports that more than 10,000 people of El Salvador's 4.5 million people had been killed there last year, a figure Mr. Arnold termed "an enormous number of deaths in a country that size." But he said that it was rejected by other State Department officials concerned that it might suggest that the United States, which had been pushing for a political settlement of the Salvadoran conflict, "did not have faith in the ability of the Salvadorans to resolve their own problems."

There were also concerns, he said, that such a policy might lead to a still greater influx of refugees, and that the arrangement would be "difficult to police" since it might be impossible to distinguish Salvadoran citizens from other Central and South Americans.

Of the nearly 12,000 Salvadorans arrested last year, only 2,378 were formally deported, suggesting that a large number were returned through what the immigration service calls "voluntary departure," an agreement by an illegal alien to return home without demanding the deportation hearing, with its expensive and time-consuming appeals process, to which he is entitled. Without a large number of voluntary returns, immigration experts agree, the overloaded adjudication system would quickly collapse.

The immigration service is required to provide all those it arrests with a written notice of rights, including the right to free legal counsel. But lawyers working with the Salvadorans say they are convinced that the options are not being fully explained by immigration officials.

REASONS FOR RETURNING QUESTIONED

"I.N.S. would like people to return voluntarily without going through the system," said Mr. Weis, the El Centro lawyer. Another lawyer, William H. Steiner of Los Angeles, questioned why so many Salvadorans were agreeing to return home voluntarily "when they've risked their lives and spent their life savings to go 2,500 miles to get here."

"It's a safe assumption," he said, "that they were forced back."

Mr. Steiner said he had seen some voluntary departure agreements signed with an "X" by Salvadorans who could neither write nor read what they were signing. In "practically every case," Mr. Weis said, his clients withdrew their agreements to return home after being told of the available alternatives.

There are also accounts of instances in which the advice of rights has been followed by what Mr. Steiner termed "mental coercion." "They're told if they want a hearing or asylum they'll have to stay in jail, or that their relatives will be arrested," he said.

"You'll get an overzealous border guard who says, 'You either go back or we'll lock you away for the rest of your life,'" Mr. Arnold said. "So the poor fellow elects to go back."●

A LAMENT FOR VIETNAM

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 2, 1981

● Mr. MICHEL. Mr. Speaker, those who worked to see to it that the South Vietnamese Government was finally conquered by the tanks of the Communist North Vietnamese Army have much to answer for. Despite overwhelming evidence of the brutality of Communist dictatorship in Vietnam today, those who told us that such a dictatorship was what the Vietnamese people wanted are curiously silent about their terrible error.

I commend to their attention an article appearing in the New York Times Sunday Magazine, entitled "A Lament for Vietnam."

At this time I insert "A Lament for Vietnam" by Doan Van Toai, the Sunday New York Times Magazine, March 31, 1981.

A LAMENT FOR VIETNAM

(By Doan Van Toai)

When the Communists took over North Vietnam in 1954, a million refugees fled to the South. I personally heard stories of their incredible suffering. But, along with other South Vietnamese, I refused to believe them. A generation later, I could not believe Solzhenitsyn's book "The Gulag Archipelago," either. I dismissed it as anti-Communist propaganda. But by 1979, I had published my own book, "The Vietnamese Gulag." Can those who have suffered the horror of Communism ever convince those who have not experienced it?

From 1945, when I was born in the village of Caivon in Vinh Long province, 100 miles south of Saigon, until I left Vietnam in May 1978, I never enjoyed peace. My family's house was burned three time in the war against the French. To escape the fighting, my parents moved from one village to another throughout my youth. Like the majority of Vietnamese patriots, they joined the resistance forces fighting the French. As I grew up, I myself saw how the peasants were oppressed by the local officials of the successive Saigon regimes, how they were victimized by the French bombardments. I learned the history of my country's thousand-year struggle against Chinese occupation and its century-long effort against Western domination. With this background, my compatriots and I grew up with a hatred of foreign intervention.

When the students at Saigon University elected me vice president of the Saigon Student Union in 1969 and 1970, I participated in the different peace efforts, leading student demonstrations against the Thieu regime and against American involvement. I published a magazine called Self-Determina-

tion, and traveled in January 1971 to California to give antiwar lectures at Berkeley and Stanford. For my activities, I was arrested and jailed many times by the Thieu Government.

During that period, I believed that I was fulfilling my commitment to peace and the independence of my country. I had faith, too, in the program of the National Liberation Front (N.L.F.), which led the revolutionary resistance in South Vietnam. I hated Saigon's rulers, men like Gen. Nguyen Van Thieu, Gen. Nguyen Cao Ky, Gen. Dang Van Quang—former soldiers of the French colonial army. These were the men whom the French had recruited in the 1940's to help destroy the Vietnamese resistance. They had risen over the years to become leaders themselves, but they commanded no respect from the people. Because of their lack of popular support, they were predisposed to rely on foreign forces.

As a student leader, I felt I had to pursue the aspiration of the Vietnamese people for democracy, freedom and peace. Naively, I believed that the Hanoi regime at least had the virtue of being Vietnamese, while the Americans were foreign invaders like the French before them. Like others in the South Vietnamese opposition movements, I believed that our Communist compatriots in the North would be more amenable to compromise and easier to work with than the Americans. Moreover, I was hypnotized by the personal sacrifices and devotion the Communist leaders had demonstrated. Ton Duc Thang, former President of North Vietnam, for example, had been imprisoned for 17 years in a French jail. I was hypnotized also by the political programs advocated by the N.L.F., which included a domestic policy of national reconciliation, without risk of reprisal, and a foreign policy of nonalignment. Finally, I was influenced by progressive movements throughout the world and by the most prestigious intellectuals in the West. My impression was that during the 1960's and early 70's the leaders of the American peace movement shared my convictions.

These convictions endured through the signing of the 1973 Paris peace accords and the subsequent collapse of the South Vietnamese Government two years later. When liberation was imminent, I was the one who told friends and relatives not to flee. "Why do you want to leave?" I asked. "Why are you afraid of the Communists?" I accepted the prospect of enduring hardships to rebuild my country and I decided to stay in Vietnam and continue working as a branch manager at a Saigon bank, where I had been for more than four years, writing secret reports about the economic situation in South Vietnam for the N.L.F. (After leaving the university, I had not been drafted by the South Vietnamese Government because I was the only son in my family. And I had not joined the Vietcong because the N.L.F. felt I could serve a more useful role providing financial reports from the bank.)

Several days after Saigon fell, the Provisional Revolutionary Government, formed by the N.L.F., asked me to join the finance committee, a group of intellectuals whose job it was to advise the Government on matters of economic policy. I complied willingly, taking a pay cut of 90 percent. My first assignment was to help draw up a plan for confiscating all the private property in South Vietnam. Shocked, I proposed that we should expropriate only the property of those who had cooperated with the former regime and those who had used the war to become rich, and that we distribute it in some fashion to the poor and to the victims of the war, Communist and non-Communist alike. My proposals, of course, were rejected. I was naive enough to think that the local cadres were mistaken, that they misunderstood the good intentions of the Communist Party leaders. I had many fights with them, believing as I did Hanoi's previous statement that "the situation in the South is very special and different from that of North Vietnam." A few months before the liberation of Saigon, Le Duan, the First Secretary of the Communist Party, had said, "The South needs its own policy."

In the end, I could not obey the order to help arrange the confiscation of all private property, a plan that was subsequently carried out. Such a scheme had nothing to do with fulfilling the aspirations of the South Vietnamese, and it went against my conscience. I decided to resign. But no one resigns in a Communist regime. The implication of nonconformity is intolerable to Communists. When I submitted my resignation, the chief of the finance committee warned me that my action "would only serve as propaganda to excite the people; here we never do it that way." Several days later, while I was attending a concert at the great National Theater (formerly the National Assembly Hall, which my fellow students and I had occupied so many times under the Thieu regime), I was arrested. No charges were made, no reasons were given.

After the fall of Saigon, many progressive intellectuals and former antiwar-movement leaders believed that the new Vietnamese regime would bring internal democracy and freedom from foreign domination. They believed that the new regime would pursue the best interests of the people, honoring its promise to carry out a policy of national reconciliation without fear of reprisal. Far from adhering to their promises, the Vietnamese rulers have arrested hundreds of thousands of individuals—not only those who had cooperated with the Thieu regime but even those who had not, including religious leaders and former members of the N.L.F.

Vietnam today is a country without any law other than the arbitrary directives of those in power. There is no civil code. Individuals are imprisoned without charges and without trial. Once in jail, prisoners are taught that their behavior, attitude and "good will" are the key factors in determining when they may be released—whatever crimes they may have committed. As a consequence, prisoners often obey the guards blindly, hoping for an early release. In fact, they never know when they may be released—or when their sentences may be extended.

How many political prisoners are there in Vietnam today? And how many of them have died in prisons during the first six years of Communist rule? Nobody can know the exact numbers. The United States Department of State has said there are from 150,000 to 200,000 prisoners; Vietnamese refugees estimate about one million. Hoang Huu Quynh, an intellectual, a graduate of Moscow University, who served as a director of a technical school in Ho Chi Minh City (formerly Saigon), recently defected to France during his Government-sponsored tour of European countries. He told the French press: "There are at least 700,000 prisoners in Vietnam today." Another witness, Nguyen Cong Hoan, a former member of the reunified National Assembly, which was elected in 1976, who escaped by boat in 1978, said that he himself knew "about 300 cases of executions" in his own province of Phu Yen. In 1977, officials in Hanoi insisted that only 50,000 people, who posed the greatest threat to national security, had been arrested. But Prime Minister Pham Van Dong said, in the French magazine Paris Match, on Sept. 22, 1978, "In over three years, I released more than one million prisoners from the camps." One wonders how it is possible to release more than a million after having arrested only 50,000.

When I was arrested, I was thrown into a three-foot-by-six-foot cell with my left hand chained to my right foot and my right hand chained to my left foot. My food was rice mixed with sand. When I complained about the sand, the guards explained that sand is added to the rice to remind prisoners of their crimes. I discovered that pouring water in the rice bowl would make the sand separate from the rice and sink to the bottom. But the water ration was only one liter a day for drinking and bathing, and I had to husband it carefully.

After two months in solitary confinement, I was transferred to a collective cell, a room 15 feet wide and 25 feet long, where at different times anywhere from 40 to 100 prisoners were crushed together. Here we had to take turns lying down to sleep, and most of the younger, stronger prisoners slept sitting up. In the sweltering heat, we also took turns snatching a few breaths of fresh air in front of the narrow opening that was the cell's only window. Every day I watched my friends die at my feet.

In March 1976, when a group of Western reporters visited my prison, the Communist officials moved out all the prisoners and substituted North Vietnamese soldiers. In front of the prisons, one sees no barbed wire, no watchtowers, only a few policemen and a large sign above the entrance that proclaims Ho Chi Minh's best-known slogan: "Nothing Is More Precious Than Liberty and Independence." Only those detained inside and those who guard them know what kind of place is hidden behind that sign. And every prisoner knows that if he is suspected of planning to escape, his fellow inmates and relatives at home will be punished rather than he himself.

We will never know precisely the number of dead prisoners, but we do know about the deaths of many well-known prisoners who, in the past, never cooperated with President Thieu or the Americans: for example, Thich Thien Minh, the strategist of all the Buddhist peace movements in Saigon, an antiwar activist who was sentenced to 10 years in jail by the Thieu regime, then released after an outpouring of protest from Vietnamese and antiwar protesters around the world. Thien Minh died in Ham Tan prison after six months of detention in 1979. Another silent death was that of the lawyer Tran Van Tuyen, a leader of the opposition bloc in the Saigon Assembly under President Thieu. This well-known activist died in Communist hands in 1976, although as late as April 1977, Prime Minister Pham Van Dong was telling French reporters that Tuyen was alive and well in a re-education camp. One of the greatest losses has been that of the famous Vietnamese philosopher Ho Huu Tuong. Tuong, a classmate of Jean-Paul Sartre's in Paris in the 1930's was perhaps the leading intellectual in South Vietnam. He died in Ham Tan prison on June 26, 1980. These men were arrested, along with many others among the most prominent and respected South Vietnamese, in

order to pre-empt any possible opposition to the Communists.

Some American supporters of Hanoi have ignored or rationalized these deaths, as they have the countless other tragedies that have befallen Vietnam since 1975. It is more than likely that they will continue to maintain their silence in order to avoid the profound disillusionment that accepting the truth about Vietnam means for them. Yet if liberty and democracy are worth struggling for in the Philippines, in Chile, in South Korea or in South Africa, they are no less worth defending in Communist countries like Vietnam. Everyone remembers the numerous demonstrations protesting United States involvement in Vietnam and the war crimes of the Thieu regime. But some of those people who were then so passionately committed to democratic principles and human rights have developed a strange indifference now that these same principles are under assault in Communist Vietnam. For example, one antiwar activist, William Kunstler, refused to sign a May 1979 open letter to the Socialist Republic of Vietnam in which many former antiwar activists, including Joan Baez, protested Hanoi's violations of human rights. Kunstler said, "I don't believe in criticizing socialist governments publicly, even if there are human-rights violations," and, "The entire Baez campaign may be a C.I.A. plot." This statement reminds me of the argument used by the Thieu regime to suppress opposition: "The peace movements and the opposition activists are all the Communists' lackeys."

There are other illusions about the current regime in Vietnam about which people should be disabused. Many people believed that Ho Chi Minh was primarily a nationalist and that the Vietnamese Communists were and are independent of the Soviet Union. I believed the same before they took over South Vietnam. But portraits of Soviet leaders now adorn public buildings, schools and administrative offices throughout "independent Vietnam." In contrast, one never saw pictures of American leaders even during the so-called puppet regime of President Thieu. The degree of subordination the present Government feels toward its Soviet patron is suggested by a famous poem by the well-known Vietnamese poet To Huu, a member of the Politburo and president of the Communist Party Committee of Culture. Here we have an opportunity to listen to a high ranking Vietnamese weep on the occasion of Stalin's death:

Oh, Stalin! Oh, Stalin!
The love I bear my father, my mother, my wife, myself
It's nothing beside the love I bear you,
Oh, Stalin! Oh, Stalin!
What remains of the earth and of the sky!
Now that you are dead.

It may seem incredible that such a poem could have been written in Vietnam, which is known for the strength of its family traditions and its feeling for filial piety. Yet this poem occupied a prominent place in a major anthology of contemporary Vietnamese poetry recently published in Hanoi.

Moreover, Le Duan, First Secretary of the Communist Party, said in his political report to the reunified National Assembly in 1976: "The Vietnamese revolution is to fulfill the internationalist duty and the international obligation," and to do so, in the words of the 1971 party platform, "under the leadership of the Soviet Union." The glorification of Soviet life is, in fact, a major goal of Communist Vietnam's censorship policy.

Immediately after the fall of Saigon, the Government closed all bookshops and theaters. All books published under the former regimes were confiscated or burned. Cultural literature was not exempt, including translations of Jean-Paul Sartre, Albert Camus and Dale Carnegie. Margaret Mitchell's "Gone With the Wind" was on the list of decadent literature as well. The new regime replaced such books with literature designed to indoctrinate children and adults with the idea that the "Soviet Union is a paradise of the socialist world."

Another argument made at times by Western apologist has to do with freedom of religion in Vietnam. One article in the new Constitution of Vietnam, adopted this year, declares that "the regime respects the liberty of the believers and also the liberty of the nonbelievers." In regard to this article, Le Duan has repeatedly proclaimed: "Our present regime is a million times more democratic than any other in the world." The reality, though, is suggested by an incident involving the desecration of a Buddhist pagoda, in which a nude woman, on orders from the Government, entered the pagoda during a worship service. When Thich Man Giac, a prominent Buddhist leader, protested, the Government used the opportunity to try to discredit the Buddhists as enemies of democracy—specifically, of the freedom to disbelieve. Thich Man Giac, who had served as liaison between the Buddhists and the Communist Government, escaped Vietnam by boat in 1977 and is now living in Los Angeles.

All of those who supported the N.L.F. in its struggle should be aware of how they were betrayed and deceived. When Harrison Salisbury of The New York Times visited Hanoi in December 1966, the leaders in Hanoi told him: "The direction of the struggle in the South is by the South and not by the North." Pham Van Dong, Prime Minister, said to Salisbury: "No one in the North had this stupid, criminal idea in mind" that the North wanted to annex the South.

Yet in a victory-day celebration speech made on May 19, 1975, Le Duan said, "Our party is the unique and single leader that organized, controlled and governed the entire struggle of the Vietnamese people from the first day of the revolution." In his political report to the reunified National Assembly in Hanoi in June 26, 1976, Le Duan said: "The strategic task of the revolution in our country in the new stage is to achieve the reunification of our homeland and to take the whole country rapidly, vigorously and steadily to socialism, and Communism."

In 1976, the Provisional Revolutionary Government formed by the N.L.F. was abolished, and South and North Vietnam were reunified under Communist rule. Today, among 17 members of the Politburo and 134 members of the Central Committee of the Vietnamese Communist Party, not a single one is from the N.L.F. (there are several members who had been North Vietnam Communist Party representatives with the N.L.F.). Even Nguyen Huu Tho, former chairman of the N.L.F., holds only the post of acting President of State, a ceremonial position that involves greeting visitors and participating in festivals. But his position will be abolished under the new Constitution.

Listen to Truong Nhu Tang, 57 years old, a founder of the N.L.F., former Justice Minister of the Provisional Revolutionary Government, more recently one of the boat people. Tang escaped in November 1979 and is now living in Paris. He told reporters of his experience in a news conference in Paris in June 1980. Twelve years earlier, he said, when he had been jailed by the Thieu regime for his Communist activities, his father came to visit. "Why," he asked Tang, "have you abandoned everything—a good job, a rich family—to join the Communists? Don't you know that the Communists will betray you and persecute you, and when you finally understand, it will be too late to wake up?" Tang, an intellectual, answered his father: "You would do better to keep quiet and accept the sacrifice of one of your sons for democracy and our country's independence. . . ."

After the Tet offensive in 1968, Tang was exchanged for three American colonels who had been prisoners of war held by the Vietcong; then he vanished into the jungle with the N.L.F. He has visited many Communist and third-world countries on behalf of the N.L.F. during the war. Tang said in his news conference: "I was well aware that the N.L.F. was a Communist-dominated national united front and I was naive enough to believe that Ho Chi Minh and his party would place national interests above ideology and would place the interest of the Vietnamese people above the party's. But the people and I were wrong."

Truong Nhu Tang told of his own knowledge of the way Communist ruling circles operate: "The Communists are expert in the arts of seduction and will go to any length to woo you over to their side, as long as they don't control the Government. But once they are in power they suddenly become harsh, ungrateful, cynical and brutal." Tang summarized current conditions in Vietnam: "The family is divided, society is divided, even the party is divided."

Looking back now on the Vietnam war, I feel nothing but sorrow for my own naïveté in believing that the Communists were revolutionaries worthy of support. In fact, they betrayed the Vietnamese people and deceived progressives throughout the world. The responsibility for the tragedies that have engulfed my compatriots is mine. And now I can only bear witness to this truth so that all former supporters of the Vietcong may share their responsibility with me.

While I was in jail, Mai Chi Tho, a member of the Central Committee of the Communist Party, addressed a selected group of political prisoners. He told us: "Ho Chi Minh may have been an evil man; Nixon may have been a great man. The Americans may have had the just cause; we may not have had the just cause. But we won and the Americans were defeated because we convinced the people that Ho Chi Minh is the great man, that Nixon is a murderer and the Americans are the invaders." He concluded that "the key factor is how to control people and their opinions. Only Marxism-Leninism can do that. None of you ever see resistance to the Communist regime, so don't think about it. Forget it. Between you—the bright intellectuals—and me, I tell you the truth."

And he did tell us the truth. Since 1978, the Vietnamese-Communists have occupied Laos, invaded Cambodia and attacked Thailand, while the Soviet Union has invaded Afghanistan. In each of these depredations, the Communists have portrayed themselves, incredibly, as liberators, saviors and bulwarks against foreign aggression. And each time, world opinion has remained relatively quiescent.

But in Vietnam, people often remark: "Don't believe what the Communists say, look instead at what they have done." One

South Vietnamese Communist, Nguyen Van Tang, who was detained 15 years by the French, eight years by Diem, six years by Thieu, and who is still in jail today, this time in a Communist prison, told me: "In order to understand the Communists, one must first live under a Communists regime." One rainy evening in Saigon's Le Van Duyet prison, he told me: "My dream now is not to be released; it is not to see my family. My dream is that I could be back in a French prison 30 years ago." This is the one wish of a 60-year-old man who has spent his entire adult life in and out of prison fighting for the freedom and the independence of his country. At this moment, he may already have died in his cell or have been executed by the new rulers.

The Vietnamese people wish to achieve the real revolution; they do not want Communism. The measure of popular hatred for the Communists is that thousands of Vietnamese have abandoned their historical attachment to the land. Under French colonial domination, throughout the long war years, even during the catastrophic famine of 1945 when two million starved to death, Vietnamese simply did not willingly leave their homeland—the land of their ancestors' graves. The recent outpouring of refugees is a direct result of the terror of the present regime. Listen to another refugee, Nguyen Cong Hoan, fromer N.L.F. agent and member of the new unified Assembly elected in 1976: "This current regime is the most inhuman and oppressive [Vietnam] has ever known." Hoan escaped by boat in 1977, after abandoning his position in the Communist Assembly. "The Assembly," he declared, "is a puppet, the members know only how to say yes, never how to say no."

Among the boat people who survived, including those who were raped by pirates and those who suffered in the refugee camps, nobody regrets his escape from the present regime. I am confident that the truth about Vietnam will eventually emerge. It is already available to those who wish to know it. As Solzhenitsyn has said, "Truth weighs as heavy as the world." And Vietnam is a lesson in truth.●

SOUTHERN CALIFORNIA RAPID TRANSIT DISTRICT HONORS JACK GREASBY WITH RETIREMENT DINNER

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 2, 1981

● Mr. ANDERSON. Mr. Speaker, on April 10, 1981, at the Chalon Mart Restaurant in Los Angeles, the Southern California Rapid Transit District will be honoring the retirement of one of its most distinguished employees, Jack Greasby.

Jack was born on January 9, 1922, in Mangum, Okla. After his 1940 graduation from Mangum High School, he entered the National Guard and was mobilized into service for World War II. He was assigned to the 179th Infantry of the 45th Division, U.S. Army. While in the service, he married the former Frances Fuqua. He rose to the rank of sergeant, and while operating an Army motor pool developed the expertise that would lead to a career in public transportation.

Jack and his wife moved to California in 1947, where his first job was as a trolley driver with Los Angeles Transit Lines, the company that was later to become the Southern California Rapid Transit District. He was promoted to clerk, then cashier, and then assistant manager. He next assumed the responsibilities of the El Monte Division manager, and in 1978 became transportation superintendent in downtown Los Angeles.

Upon retirement from the Southern California Rapid Transit District, Jack and his wife will be moving to Houston, Tex., where he will be lending his expertise to the Houston Metropolitan Transit Authority as assistant director of transportation. Before that assignment starts, however, Jack and Frances will leave on May 10 for a vacation that will celebrate their 40th wedding anniversary. They will also celebrate their first honeymoon, which was delayed by military, family rearing, and employment obligations. They are indeed a fortunate pair to be on a honeymoon after 40 years of marriage.

My wife, Lee, joins me in wishing the best of success in the years ahead to Jack, Frances, and their children John, Jr., Charles, and their youngest son Glenn, whom I am privileged to have as my namesake.●

SENATE—*Friday, April 3, 1981*

(Legislative day of Monday, February 16, 1981)

The Senate met at 11 a.m., on the expiration of the recess, and was called to order by the Honorable CHARLES E. GRASSLEY, a Senator from the State of Iowa.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. THURMOND).

The assistant legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., April 3, 1981.

To the Senate:

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable CHARLES E. GRASSLEY, a Senator from the State of Iowa, to perform the duties of the Chair.

STROM THURMOND,
President pro tempore.

Mr. GRASSLEY thereupon assumed the chair as Acting President pro tempore.

RECESS UNTIL 11 A.M. ON TUESDAY, APRIL 7, 1981

The ACTING PRESIDENT pro tempore. Under the previous order, the Senate stands in recess until 11 a.m., Tuesday next.

Thereupon, at 11:01 a.m., the Senate recessed, under the order of Thursday, April 2, 1981, until Tuesday, April 7, 1981, at 11 a.m.

MESSAGES FROM THE PRESIDENT RECEIVED DURING THE RECESS

Under the authority of the order of the Senate of April 2, 1981, the Secretary of the Senate, on April 3, 1981, received messages from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(The nominations received are printed at the end of the Senate proceedings.)

SIXTH ANNUAL REPORT OF THE NUCLEAR REGULATORY COMMISSION—MESSAGE FROM THE PRESIDENT RECEIVED DURING THE RECESS—PM 41

Under the authority of the order of the Senate of April 2, 1981, the Secretary of the Senate on April 3, 1981, received the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Environment and Public Works:

To the Congress of the United States:

I transmit for the information of the Congress the Sixth Annual Report of the Nuclear Regulatory Commission as required by Section 307(c) of the Energy Reorganization Act of 1974 (42 U.S.C. 5877).

The period covered is fiscal year 1980, ended September 30, 1980, with occasional treatment of events occurring after that date.

RONALD REAGAN.

THE WHITE HOUSE, *April 3, 1981.*

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC–856. A communication from the Deputy Secretary of Agriculture, transmitting, pursuant to law, a final report on facilities for food and agricultural research; to the Committee on Agriculture, Nutrition, and Forestry.

EC–857. A communication from the Executive Associate Director of the Office of Management and Budget, Executive Office of the President, transmitting, pursuant to law, a report on the apportionment of an appropriation on a basis indicating a need for a supplemental estimate of appropriation; to the Committee on Appropriations.

EC–858. A communication from the Secretary of Defense, transmitting, pursuant to law, eight reports of violations of the Anti-Deficiency Act; to the Committee on Appropriations.

EC–859. A communication from the Deputy Secretary of Defense, transmitting, pursuant to law, nine reports of violations of the Anti-Deficiency Act; to the Committee on Appropriations.

EC–860. A communication from the Acting Assistant Secretary of Defense (Manpower, Reserve Affairs, and Logistics), transmitting, pursuant to law, a report on the adequacy of pay and allowances of the Armed Forces; to the Committee on Armed Services.

EC–861. A communication from the Acting Assistant Secretary of Defense (Manpower, Reserve Affairs, and Logistics), transmitting, pursuant to law, a report on the pay adjustment mechanism for military personnel; to the Committee on Armed Services.

EC–862. A communication from the Assistant Secretary of State for Congressional Relations, transmitting, pursuant to law, a report covering certain property to be transferred to the Republic of Panama in accordance with the Panama Canal Treaty of 1977; to the Committee on Armed Services.

EC–863. A communication from the Chairman of the National Credit Union Administration, transmitting, pursuant to law, the second annual report on the Board of the National Credit Union Administration; to the Committee on Banking, Housing, and Urban Affairs.

EC–864. A communication from the Chairman of the Federal Financial Institutions Examination Council, transmitting, pursuant to law, the annual report of the Council for calendar year 1980; to the Committee on Banking, Housing, and Urban Affairs.

EC–865. A communication from the Secretary of Transportation, transmitting, pursuant to law, a report on the future of rail services in the Northeast; to the Committee on Commerce, Science, and Transportation.

EC–866. A communication from the Secretary of the Interior, transmitting, pursuant to law, the Federal Coal Management Report for fiscal year 1980; to the Committee on Energy and Natural Resources.

EC–867. A communication from the Acting Administrator of the Energy Information Administration, Department of Energy, transmitting, pursuant to law, supplemental data to the previously submitted quarterly report on imports of crude oil, residual fuel oil, refined petroleum products, natural gas, and coal; refinery activities; and inventories for the period October through December 1980; to the Committee on Energy and Natural Resources.

EC–868. A communication from the Assistant Secretary of State for Congressional Relations, transmitting, pursuant to law, a report on international agreements, other than treaties, entered into by the United States in the 60-day period prior to March 31, 1981; to the Committee on Foreign Relations.

EC–869. A communication from the Chairman of the United States International Trade Commission, transmitting, pursuant to law, a report on the activities of the Commission during calendar year 1980 under the Government in the Sunshine Act; to the Committee on Governmental Affairs.

EC–870. A communication from the Acting Assistant Secretary of Commerce for Administration, transmitting, pursuant to law, a report on a proposed new system of records for the Department for implementing the Privacy Act; to the Committee on Governmental Affairs.

EC–871. A communication from the Chairman of the Board of Governors of the Federal Reserve System, transmitting, pursuant to law, the annual report of the Board on its activities under the Government in the Sunshine Act for calendar year 1980; to the Committee on Governmental Affairs.

EC–872. A communication from the Acting Inspector General, Department of Energy, transmitting, pursuant to law, the annual report of the Office of Inspector General, Department of Energy, for calendar year 1980; to the Committee on Governmental Affairs.

EC–873. A communication from the Vice President for Corporate Communications of the National Railroad Passenger Corporation, transmitting, pursuant to law, the annual report of the Corporation on activities under the Freedom of Information Act for calendar year 1981; to the Committee on the Judiciary.

EC–874. A communication from the Chairman of the National Council on the Handicapped, transmitting, pursuant to law, the first annual report of the National Council

on the Handicapped; to the Committee on Labor and Human Resources.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. DOMENICI, from the Committee on the Budget, without amendment:

S. Res. 105. Resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 694.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. BAUCUS:

S. 876. A bill to encourage the use in programs under the Agricultural Trade Development and Assistance Act of 1954 (Public Law 480), in the export credit sales program, and in the commodity donation program, of the protein byproduct resulting from the production of fuel alcohol from agricultural commodities; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. INOUYE (for himself, Mr. CANNON, and Mr. LONG):

S. 877. A bill to authorize appropriations for certain maritime programs of the Department of Commerce for fiscal year 1982, and for other purposes; to the Committee on Commerce, Science, and Transportation.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. BAUCUS:

S. 876. A bill to encourage the use in programs under the Agricultural Trade Development and Assistance Act of 1954 (Public Law 480), in the export credit sales program, and in the commodity donation program, of the protein byproduct resulting from the production of fuel alcohol from agricultural commodities; to the Committee on Agriculture, Nutrition, and Forestry.

POTENTIAL OF PROTEIN BYPRODUCTS

● Mr. BAUCUS. Mr. President, the bill I am introducing today would direct the Secretary of Agriculture to consider the potential of using protein byproducts to meet the food needs of developing countries.

This legislation is identical to a bill introduced in the House by Representative BEDELL and my friend and colleague from Montana, Representative MARLENEE.

The United States currently exports food products to a number of developing nations through the food for peace programs, the export credit sales program, and other programs. My bill would direct the Secretary of Agriculture to consider including protein byproducts in our export and donation programs.

Protein byproduct, commonly called mash, comes from the production of alcohol fuel from agricultural commodities, like wheat and corn. It is the residue from the distilling of alcohol fuel.

In my home State of Montana, a concerned and ambitious group of farm wives—members of Women Involved in Farm Economics—WIFE—has perfected the use of this protein byproduct in baking traditional food products such as bread, cakes, and other flour-based products. These products, however, improve on traditional recipes by increasing the protein and nutritional value of the food products.

Mr. President, the potential for protein byproducts is too great to be overlooked. If developed, protein byproducts could be a real way for families in developing countries to stretch their food dollars.

Also, the savings in shipping costs could provide a substantial benefit to our economy. Protein byproduct is concentrated—which means the same nutritional value in a quantity of wheat or corn can be provided by a lesser quantity of protein byproduct.

The thought of providing a high protein food product to developing countries without any increase in handling, storage or transportation is too significant a benefit to overlook.

Mr. President, I would again like to commend the members of the Montana chapter of WIFE and the members of the South Carolina WIFE chapter for their cooperative effort in promoting the use of protein byproduct. To help demonstrate the potential of protein byproduct for food production, I ask that the following selected WIFE recipes be entered into the RECORD.

There being no objection, the recipes were ordered to be printed in the RECORD, as follows:

Renewed Grain is a high-protein mash flour that is made from the residue of making alcohol from grain. Renewed Grain is 2 to 3 times higher in protein content than regular flour and can be made from most grains. The name Renewed Grain has been registered with the trademark office. Receipts in this booklet have been made with Renewed Grain high-protein wheat mash flour unless otherwise indicated.

This recipe booklet is presented to you courtesy of the Valley County WIFE organization, Glasgow, Mont.

MASH BREAD

1 cup white flour;
1 cup whole wheat flour;
1 cup renewed grain flour;
½ cup milk;
¼ cup water;
2 T. brown sugar;
1 cake yeast;
2 T. salt;
2 T. shortening.

Crumble yeast in ¼ cup lukewarm water. Scald milk. Add salt and brown sugar. Let cool. Combine milk and water mixtures. Add whole wheat flour and beat well. Add the melted shortening. When mixed in, add white flour and renewed grain flour gradually.

Lightly flour bread board. Turn dough out on it and knead well. Place dough in greased bowl, oil top, and cover. Let rise until double in bulk. Punch down. Let rise again. Place into oiled bread pans. Let rise until doubled in bulk. Bake at 425 for 10 minutes, turn down to 375 and bake for 40 minutes.

ZUCCHINI BREAD

3 eggs;
2 cups zucchini;
2 cups sugar;
1½ tsp. vanilla;
1 cup oil.

Mix these ingredients in a saucepan and boil.

1½ cups renewed grain flour;
2 cups whole wheat flour;
1 tsp. baking soda;
½ tsp. baking powder;
1 tsp. salt;
1 tsp. cinnamon.

Mix these dry ingredients in a bowl. Blend with above mixture. Add ½ cup crushed nuts. Bake at 350 for one hour.

By Mr. INOUYE (for himself, Mr. CANNON, and Mr. LONG):

S. 877. A bill to authorize appropriations for certain maritime programs of the Department of Commerce for fiscal year 1982, and for other purposes; to the Committee on Commerce, Science, and Transportation.

MARITIME AUTHORIZATION

● Mr. INOUYE. Mr. President, everyone, I believe, supports the President's objective to reduce Government spending, provided that in the process, we do not jeopardize essential services and public policy objectives which are prescribed in laws which Congress has enacted over the years.

One of these policies, of course, is set out in section 1 of the Merchant Marine Act of 1936, as amended. That section states that it is necessary for the national defense and development of our foreign and domestic commerce that the United States shall have a merchant marine which, among other things, is:

Sufficient to carry a substantial portion of our waterborne export and import foreign commerce, and to provide shipping service essential for maintaining the flow of such commerce at all times;

Capable of serving as a naval and military auxiliary in time of war or national emergency; and

Supplemented by efficient facilities for shipbuilding and ship repair.

The reasons why we need the kind of merchant marine mandated by the 1936 Act, go to the very heart of the economic prosperity and survival of our country. It would therefore be national folly to assign anything less than "priority" to the task of achieving these objectives.

Our merchant fleet not only serves as an essential supply line for U.S. forces throughout the world in peace and war, it also minimizes political pressures that could be brought to bear against the United States if we are forced to depend on foreign maritime powers for shipping services.

There is, after all, no guarantee that the United States will be able to purchase all the shipping we need. There may be nations, or blocs of nations, who

believe it is in their best interests to prevent the United States from trading during a crisis.

Since the end of World War II the United States has become increasingly dependent on import sources for minerals and metals which are esssential for our national defense and industrial base. Of 91 nonfuel minerals listed by the U.S. Bureau of Mines, the United States has a net import of 66. And with respect to 25 of those we import more than 50 percent.

Aluminum, for example, which ranks next to steel as the largest tonnage metal industry, is produced from bauxite. We import about 95 percent of our bauxite, and it comes principally from such countries as Jamaica, Guyana, Surinam, the Dominican Republic, Haiti, Guinea, and Australia.

In 1942, 25 percent of all vessels carrying bauxite from Surinam and Guyana—then our sole import source—were sunk by German submarines in the Caribbean and the Gulf of Mexico.

We import about 90 percent of our chrome and 100 percent of our manganese and cobalt, and all, except a modest amount from Mexico, is waterborne.

It is also significant to note that with the exception of the imports from Canada and Mexico, all of them must for the most part move by dry bulk carrier.

The reasons for our maritime policy are therefore quite clear and compelling, in my judgment.

Is the U.S. merchant marine as presently constituted capable of fulfilling the vital national role which that policy intends it should?

Tankers: U.S.-flag carriage of our oil imports is near an all time low;

Dry-bulk vessels: Dry-bulk cargoes comprise about 40 percent of our foreign trade, yet less than 2 percent of it moves on U.S. bottoms. Our dry-bulk fleet consists of 18 small vessels averaging over 25 years of age;

Liners: According to the latest MARAD report, the U.S. Fleet continued its steady decline in the share of our containerized cargo trade; and

Shipbuilding mobilization base: Our present shipbuilding base is composed of 24 shipyards (excluding Sun Ship, Inc.). There has been a precipitous decline in capability and a broad loss of mobilization flexibility. Some 30,000 skilled shipyard workers, and another 90,000 in supporting activities face the prospect of unemployment over the next several years.

Over 2 years ago, the British publication Maritime Weekly summarized the situation as follows:

The U.S., as the world's largest trading nation, not only lacks a merchant fleet commensurate with its true requirements, but will shortly lack the means to achieve it.

Mr. President, when the previous administration's budget for the Maritime Administration for fiscal year 1982 was submitted to the Congress, many of us felt it was barely adequate to arrest the serious decline of the U.S. merchant marine. Nevertheless, those of us who felt this way were inclined to go along with the requested funding levels because we expected Congress to complete its work and make the necessary recommendations to revitalize our merchant marine. In the meantime, the funding levels requested in the January 1982 budget request would, if nothing more, hold the line against further erosion of the industry.

We were therefore dismayed with the present administration's budget request which substantially undercut even the barely adequate funding levels requested by its predecessor.

Most significantly, the administration has proposed no funding for the construction differential subsidy (CDS) program, whereas the Carter budget requested $107 million.

CDS is based on the difference between United States and foreign shipbuilding prices, and is paid to U.S. shipyards. The Merchant Marine Act of 1970 established the major national policy objective of maintaining a base of efficient shipbuilding and ship repair facilities.

Mr. President, if the CDS program is not funded in fiscal year 1982, and $92 million of CDS funds already appropriated for fiscal year 1981 are deferred, as the administration proposes to do it will mean that two dry bulk ships which would have been built will not be; that national defense features will not be added to certain existing commercial vessels as authorized by law; and CDS funds will not be available to pay for the changes to tankers which are required by the Port and Tanker Safety Act of 1978.

Mr. President, in addition to the $107 million of CDS funding, the administration proposes another $8.8 million of reductions in essential MARAD programs. In total the administration's revised request is $115,884 million less than its predecessors.

I realize the administration has said that "alternatives to existing maritime subsidy policies are currently under consideration," and all of us hope they will soon be forthcoming. Such a contingency cannot, in my judgment, justify such drastic curtailment of such essential programs, however.

Accordingly, Mr. President, Senators CANNON, LONG, and myself are today introducing legislation to authorize funding the program of the Maritime Administration at the minimal levels requested in the January 1982 budget submission to Congress.●

● Mr. LONG. Mr. President, I join with Senators CANNON and INOUYE in introducing legislation to authorize appropriations for certain maritime programs of the Department of Commerce.

The State of Louisiana has extensive shipbuilding and repair facilities which have played a major role in the development of our Nation's maritime fleet and naval forces.

I believe this legislation is minimally necessary to maintain our ship mobilization base.

In January of this year the previous administration submitted a bare bones budget for the programs of the Maritime Administration. Many of us felt that it was barely adequate to arrest the serious decline in our merchant marine. Nevertheless we were inclined to go along with the requested funding levels because we expected Congress to complete its work and make the necessary recommendations to revitalize our merchant marine.

The present administration has, however, proposed further reductions of $115.88 million. Of that amount the most serious is the complete elimination of funds for the construction differential subsidy, that is, $107 million.

Mr. President, the administration has told us that whatever harm this cut would do to our shipyard mobilization base would be more than offset by an expanded naval building program.

Just last week, the Shipbuilders Council of America testified before the Merchant Marine Subcommittee, and had the following to say about the administration's claim:

The exact dimensions of the Administration's expanded naval building plan have yet to be publicly announced, but from all indications it contemplates a "balanced mix" of 30 new ships per year. The average over the past five years has been closer to 16 per year. On this basis, the naval workload demand on the private sector of the U.S. shipbuilding industry could approximately double, but with the lead time involved in the contracting of sophisticated warships, the full impact of naval orders will not be felt for at least three years. Additional commercial ship construction work will clearly be required to sustain these yards at an economical level.

Mr. President, until we come up with a concrete definite alternative to the present system of encouraging U.S.-ship construction, it is essential that Federal assistance be maintained.●

ADDITIONAL COSPONSORS

S. 158

At the request of Mr. HELMS, the Senator from Georgia (Mr. MATTINGLY), the Senator from Nebraska (Mr. ZORINSKY), and the Senator from Alabama (Mr. DENTON) were added as cosponsors of S. 158, a bill to provide that human life shall be deemed to exist from conception.

SENATE JOINT RESOLUTION 33

At the request of Mr. HELMS, the Senator from Hawaii (Mr. MATSUNAGA), the Senator from Wyoming (Mr. WALLOP), the Senator from Montana (Mr. MELCHER), and the Senator from Alabama (Mr. HEFLIN) were added as cosponsors of Senate Joint Resolution 33, a joint resolution to establish a Commission to plan for the 200th anniversary celebration of the birth of our Constitution.

NOTICES OF HEARINGS

COMMITTEE ON BANKING, HOUSING, AND URBAN AFFAIRS

Mr. GARN. Mr. President, I am pleased to announce that the Banking, Housing, and Urban Affairs Committee will conduct a comprehensive review of major banking and consumer protection laws enacted by Congress in recent years—affecting everything from truth-in-lending to money market mutual funds.

It is important for Congress to step back and reassess what we already have done to consumers and the financial community as a basis for formulating policies to cope with the rapidly changing economic environment of the 1980's. This type of comprehensive review is virtually unprecedented. All too often, Congress simply passes new laws in a willy-nilly fashion, piling new mistakes on top of old ones, without looking at the consequences of laws already on the books.

The committee will hold seven hearings between April 28 and May 19, involving representatives from the banking, thrift, money market mutual fund, securities, and financial services industries, as well as Federal regulators, consumer groups, and academicians. Information gleaned from these hearings could well establish the groundwork for banking and consumer legislation for the next few years.

Special attention during the hearings will be given to the problems of the thrift industry in a high interest economy and the impact of the rapid growth of money market mutual funds on insured depository institutions.

As interest rates have risen in the past year and a half, many thrift institutions have suffered a continuous decline in earnings. The result has been that they have been limited in their ability to provide mortgage credit in an amount and at a price necessary to satisfy consumer's needs.

The hearings will provide the committee with information about the increasing shift of savings to money market mutual funds and the effects of such growth on competing financial institutions and on monetary and economic policy. Money market mutual funds have afforded small investors with an opportunity to earn more interest in a highly inflationary environment but, through the use of third-party checking and other bank-type services, they have raised questions about the historical separation of banking and securities activities.

As one Senator who is opposed, in principle, to over-regulation of any institution or industry, it is not my purpose to seek to impose new regulations on money market funds. However, in a free market system, it is important to insure that unfair advantage is not given to any institution or industry offering the same sort of services as another institution or industry by the uneven application of regulations.

The hearings also will further the Reagan administration's efforts to identify and eliminate burdensome and unnecessary regulations which fuel the Nation's inflation rate. One of my personal concerns is the truth-in-lending law, which presently requires businesses and lenders to provide consumers with more financial information than they can reasonably use. The costs of additional time and paperwork to comply with the law are, of course, passed on to the consumer in the form of higher prices.

In the spirit of the Reagan administration's commitment to a new beginning, I expect the committee hearings to give us a better idea of which laws work and which do not—with the overall objective of helping to promote new growth and competitive vigor in the financial industry.

The schedule of hearings—to be held in 5302 Dirksen Senate Office Building—includes: April 28—Federal financal regulators; May 6—banking industry and financial services representatives; May 7—thrift industry representatives and State financial institution regulators: May 13—money market mutual fund and securities regulators; May 14—money market mutual fund and financial industry representatives; May 18—consumer credit regulators and consumer group and industry representatives; and May 19—former thrift industry regulators and academicians.

COMMITTEE ON AGRICULTURE, NUTRITION, AND FORESTRY

Mr. HELMS. Mr. President, I wish to announce that Deputy Secretary of Agriculture Richard Lyng will testify before the Committee on Agriculture, Nutrition, and Forestry on the reauthorization of the food stamp and commodity distribution program on Monday, April 6 beginning at 9:30 a.m. in room 324 Russell Building. Also, I wish to advise the Senate that David Stockman, Director of the Office of Management and Budget will testify before the committee on the food and agriculture budget for fiscal year 1982 on Thursday, April 9, beginning at 2 p.m. in Room 324 Russell Building.

Anyone wishing further information should contact the Agriculture Committee staff at 224–2035.

ADDITIONAL STATEMENTS

POLAND—THE PROLETARIAT CHALLENGE TO THE COMMUNIST BOURGEOIS

Mr. ROBERT C. BYRD. Mr. President, the ongoing crisis in Poland presents the international community with a classic study of the contradictions between the theory and actual practice of communism. We are witnessing the so-called revolution of the proletariat coming full circle.

On March 29, 1981, we were greeted with news stories that the Kremlin had charged the solidarity union, representing 10 million Polish industrial workers, with being counterrevolutionary and an enemy of the state.

The official Soviet news agency, Tass, in expressing the deepening concern within the Soviet leadership over events in Poland, raised the following alarm:

Solidarity itself is following the path of transformation into a political party hostile to Polish Communists and the Government.

Leaders of the Soviet Union and its Eastern European allies, East Germany and Czechoslovakia in particular, have urged Polish authorities to crack down on the solidarity government.

I find these events particularly illuminating since the proletariat, or the industrial worker, is supposedly the foundation upon which a truly Communist state is built.

One only has to read the Communist Manifesto, written by Karl Marx and Friedrich Engels, to appreciate the contradictions inherent in the Eastern bloc's alarm over events in Poland. In the chapter on bourgeois and proletarians the following commentary can be found:

> From time to time the workers are victorious (in their struggle against the Bourgeois), but only for a time. The real fruit of their battles lies, not in the immediate result, but in the ever expanding union of the workers. This union is helped on by the improved means of communication that are created by modern industry and that place the workers of different localities in contact with one another. It was just this contact that was needed to centralize the numerous local struggles, all of the same character, into one national struggle between classes. But every class struggle is a political struggle. . . .

What an irony that this commentary should be a prophecy not only for Communist Poland, but the entire Eastern bloc as well. One only has to recall that Solidarity began as a small, almost obscure, union in the shipyards of Gdansk. Today, it has grown to encompass 10 million industrial workers from the coal miners of Silesia to the factory workers in nearly all the major cities of Poland.

If one were to believe Soviet propaganda, I suppose the West should feel secure in the knowledge that somehow we have the capability to organize 10 million Polish workers in an attempt to subvert the socialist systems of Eastern Europe. However, despite all of this propaganda, it cannot conceal the fact that the proletariat of Poland represents a fundamental threat to the underpinnings of Communist ideology. This is the real threat to the Soviet Union and its Allies—one which the Soviets understand only too well.

The present situation in Poland does have an historical base. It has been 64 years since the first Communist state was established through the overthrow of Czar Nicholas II in the Bolshevik Revolution of 1917. According to Marxist-Leninist theologians of the time, this

historic occasion was to have set in motion a chain of events leading to the dictatorship of the proletariat and eventually to a completely classless society.

Yet, during this span of 64 years, the proletariat has remained the exploited proletariat in the Eastern bloc, only now they labor under the Communist system. Far from evolving into the dictatorship of the proletariat or into classless societies, we have seen the emergence and perpetuation of new elites—a Communist bourgeoisie. Comprised of political and military loyalists to the party line, the Communist bourgeoisie enjoy a standard of living far beyond the reach or the dreams of the proletariat in their countries. They maintain dachas, feast on caviar, are driven around in limousines, and generally enjoy all the amenities of life.

Contrary to Eastern Europe under communism, the worker of the West has evolved into a major political and economic force in the capitalist system. Through the trade union movement, the laborer in the West has increased his purchasing power and with it, access to a wide variety of consumer goods. This is not to say that all inequities for the Western worker have been resolved. However, his counterpart in the Eastern bloc is faced with a declining quality of life. He, or members of his family, spend numerous hours in food lines waiting to purchase the barest necessities. Few consumer goods are within his financial reach. Yet, the leadership of the Eastern bloc does not endure the same hardships.

This is the fundamental issue involved in Poland, and this is what is so threatening and so frightening for the Soviet leadership. Poland today is not Hungary of 1956 which the Soviets invaded to suppress a revolt of intellectuals and students. Poland today is not Czechoslovakia of 1968 where Soviet tanks were used to roll back the liberalization of the "Prague Spring." Poland today is not Afghanistan, a neutral, Third World country for which the Soviets have always had imperialist designs.

Poland today is 10 million industrial workers who want a greater voice in the running of their unions and a greater voice in controlling their own destinies. And this creates a dilemma for the Soviets. It is one thing to turn guns on students and intellectuals. It is quite another to turn guns on the proletariat, the so-called foundation of the Communist state.

The Soviet bloc is nothing more than a collection of governments comprised of dictatorial elites. V. I. Lenin, on page 441 of volume XXV of his collected works (second edition) defined dictatorship in the following manner:

> The scientific concept of dictatorship means nothing more than unlimited government, unrestrained by any laws or any absolute rules and supporting itself directly by force. Nothing other than that is the meaning of the concept of dictatorship.

It is apparent this has been the central dogma for the dictatorial elite of the Soviet Union—beginning with the rule of Josef Stalin. The maintenance of this status is the overriding concern of the Soviet leadership even if it means it has to be accomplished at the expense of the workers and peasants. The historical expansionist policies of the Russian leaders have always taken primacy over the welfare of the proletariat. Little has changed since the czars.

SECRETARY OF STATE ALEXANDER HAIG'S TRIP TO THE MIDDLE EAST

Mr. ROBERT C. BYRD. Mr. President, the Secretary of State is embarking upon his first overseas diplomatic mission to one of the most troubled regions of the world—the Middle East. I want to wish him the very best for a successful trip.

News reports announcing the Secretary's trip emphasized his intention to heighten awareness among the moderate Arab States, such as Saudi Arabia, to the Soviet threat in the region and the U.S. resolve to respond firmly to that threat. However, as I am sure the Secretary will soon discover, he will be traveling to a region of the world which has markedly differing perceptions as to what are the threats to peace and stability in the area.

The Secretary will be traveling to the Middle East at a time when:

The Egypt-Israeli peace talks are at an impasse over the issue of Palestinian autonomy;

Iran and Iraq are still locked into a seemingly intractable war which could threaten the West's oil lifeline;

Jordan and Syria have become increasingly hostile neighbors;

The Soviets continue to accupy Afghanistan, and their presence and role in Ethiopia, South Yemen, and Libya is viewed with varying degrees of concern;

The Israelis are in the midst of preparations for national elections in the early summer; and

Lebanon continues to be torn asunder by a multitude of internal and external forces.

In Saudi Arabia, the Secretary will find that resolution of the Palestinian question is high on that country's agenda and the Saudis are deeply concerned over the potential spread of radical Islamic fundamentalism as espoused by the Khomeini regime in Iran. On the issue of the Middle East peace settlement, he will find the Saudis preoccupied by the formal annexation of Jerusalem as Israel's eternal capital and the proliferation of settlements on the West Bank. In other words, Arab-Israeli issues will take precedence over the Soviet occupation of Afghanistan or the presence of a Marxist regime in South Yemen.

In Israel, the Secretary will find a country beset by serious economic difficulties. The price of oil, the need to replace strategic bases in the Sinai with ones in the Negev, and defense expenditures which comprise 40 percent of the Israeli budget have contributed to an inflation rate which is now estimated to be 140 percent a year. While the vast majority of Israelis favored the Camp David agreement and the Egypt-Israeli peace treaty, many are now wondering whether the economic price of peace has been too high. In addition, Israel is still confronted with terrorist raids, launched by the Palestinian Liberation Organization which has yet to retreat from its commitment to destroy the State of Israel.

The administration's proposed sale of AWACS and enhancement of F–15's previously sold to Saudi Arabia, has heightened concern in Israel that this would significantly increase Arab military capability.

In Egypt, he will find a President who shares this administration's concern for Soviet influence in the region. In addition, the present stalemate in negotiations with Israel on the autonomy issue has created some internal difficulties for President Sadat.

Jordan still views the Camp David agreement with suspicion, foreclosing any option to legitimate negotiations on the west bank and Palestinian issue.

Thus, the Secretary of State will be visiting a region of the world which is highly complex in its politics. I am confident the Secretary will listen carefully to the concerns of all parties. I know that I am joined by all my colleagues in wishing him success.

MIDDLE EAST CONFLICT

● Mr. LEVIN. Mr. President, one Middle East conflict has now burst, again, into flames—flames which may well consume the entire region unless action is taken soon. I refer to the current crisis in Lebanon in which Syria is shelling Lebanese villages. For years we have ignored Lebanon, hoped that in some way the situation would resolve itself and go away. Well, it is clear now—as it should have been for years—that it will not be easily resolved and it will not just go away.

When I visited the Middle East last December, I went to Lebanon—the first American Senator to do so in years. I was struck then by the human suffering and the political instability which tormented that once beautiful land. In my report on that trip, I suggested that "the U.N. role must be expanded, and the United States should initiate discussions in the U.N. Security Council to determine the possibilities for such an expansion."

I also shared with my colleagues and President Reagan my belief that "the Syrians will have to leave." As far as I know, however, no steps were taken by the new administration to move ahead in these areas. The results of that inaction are now all too clear. The bloody town of Zahle and the people who live there are now paying the price for our neglect.

But, Mr. President, I believe it is still possible to take action which can help this troubled country. President Sarkis has called on the Syrians to stop their shelling and remove their forces. So far there has been no response from Syria. The failure to respond constitutes interference in Lebanon's internal af-

fairs. Secretary Haig is leaving today for a visit to this area. In a letter I had delivered to him today, I made some suggestions about the role our Government might play in this area. I hope those suggestions will be heeded and that action will be taken. And I ask unanimous consent that the text of that letter appear in the RECORD at this point.

The letter follows:

U.S. SENATE,
Washington, D.C., April 3, 1981.

Hon. ALEXANDER HAIG,
Secretary of State, Department of State, Washington, D.C.

DEAR MR. SECRETARY: As you embark on your trip to the Middle East, the region is once again teetering on the brink of disaster. I refer specifically to the current conflict in Lebanon which threatens to consume that nation and possibly spread to other states in the area.

Mr. Secretary, on my recent visit to the Middle East, I was particularly struck by the tragedy which is Lebanon today—with the human misery and political instability which has transformed a once lovely land into a bleeding nation filled with suffering. America simply must do everything it can to moderate the conflict that rages there now.

In that context, I am informed that President Sarkis has formally commanded, in his capacity as Commander in Chief of all forces in Lebanon, that the Syrian troops stationed there cease the shelling of civilian areas and withdraw from certain areas in Lebanon. I understand that he is particularly concerned about restoring some degree of moderation to the troubled city of Zahle. Despite the clear order of President Sarkis, Syrian forces have neither ceased their shelling nor taken any steps toward withdrawing from the areas he specified.

I hope, Mr. Secretary, that you will do everything possible to help assure that President Sarkis' order is, in fact, executed. In this context I believe that, during your trip, you should arrange to meet with Syrian officials in Saudi Arabia to discuss with them the situation in Lebanon. I would also hope that you might communicate to Saudi officials our interest in securing their cooperation in persuading Syria to honor the order of President Sarkis and cease shelling and begin an orderly withdrawal from whatever portions of Lebanon he might enumerate.

Mr. Secretary, what we are seeing in Lebanon now is nothing more nor less than interference in the affairs of a sovereign nation by an external power. Given your views on foreign intervention, I am sure you will do everything you can to assist Lebanon in securing Syrian compliance with their requests.

Sincerely,

CARL LEVIN.●

DOE ALCOHOL FUEL PROGRAM

● Mr. BAUCUS. Mr. President, today I would like to add my support to that of many of my colleagues who are asking President Reagan and the Secretary of Energy to carry out the loan guarantee program under title II of the Energy Security Act. I joined many of these same Senators in writing to Secretary Edwards in February asking that the intent of Congress be carried out in awarding these loan guarantees. I ask that a copy of our letter to Secretary Edwards be inserted at this point in the RECORD.

The letter follows:

U.S. SENATE,
Washington, D.C., February 3, 1981.

Hon. JAMES B. EDWARDS,
Secretary of Energy,
Washington, D.C.

DEAR MR. SECRETARY: We are, like you, committed to reducing this nation's dangerous dependence on foreign sources of oil as quickly as possible. We strongly believe that, if we are to be successful, the United States must develop a diversified energy supply system, and employ a wide variety of technologies and feedstocks. Of all the domestic alternatives now under consideration, the production of alcohol fuel from biomass has significant near-term potential for contributing to the nation's high grade liquid fuel needs.

As you are aware, the Congress recognized this important potential of alcohol fuels in passing the Energy Security Act, Title II which authorized the awarding of loan guarantees for alcohol fuel production of these funds for a total of approximately $1.2 billion (the equivalent of what the U.S. spends in five (5) days on oil imports). To date, fifty-seven applications have been filed, and sixteen firms have been invited to negotiate on final guarantees. Consequently, there remains both a significant number of worthy projects interested in applying for funding in a new solicitation, and a substantial amount of funds remaining to be obligated.

Mr. Secretary, it was the intent of Congress in authorizing and appropriating these funds that worthy projects would be selected and awarded as expeditiously as possible so that construction could begin and the "first generation" of alcohol fuel plants could begin commercial operation. The goal of maximum private sector participation is one we all share, but loan guarantees are necessary at this stage in order to bridge the psychological risk factor that still remains with respect to alternative energy projects. With the completion of these "first generation" facilities, full participation by the financial community will follow.

The loan guarantee program is not a subsidy, but an important investment in the nation's energy future. At a time of increasing uncertainty and instability in the world's oil producing regions, it is even more critical than ever before that we put our words into action. For this reason, we respectfully urge that you: (1) expedite the current negotiations so that commitments can be made as soon as possible and project construction can begin; and (2) promptly announce a new solicitation to commit the remainder of the loan guarantee funds for commercialization of alcohol fuel production.

Thank you in advance for your consideration of this request.

Sincerely,

Bob Dole, James A. McClure, Larry Pressler, Charles E. Grassley, Wendell H. Ford, Quentin N. Burdick, Max Baucus, J. Bennett Johnston, John Glenn, Gary Hart, Strom Thurmond, Charles H. Percy, Rudy Boschwitz, David Durenberger, Walter D. Huddleston, John Melcher, Edward M. Kennedy, Howard M. Metzenbaum, Lloyd Bentsen.

Mr. President, as the above letter states, I believe the support for alcohol fuel projects provided under the Energy Security Act is important in breaking the barrier of hesitation facing private investors. I am sure that once the viability of these alternative energy facilities is realized, the financial community will follow with their wholehearted support of the industry.●

SEPARATION OF POWERS—UPHOLDING THE CONSTITUTIONALITY OF CONGRESSIONAL ACTION ACT

● Mr. BAUCUS. Mr. President, insuring the efficiency and effectiveness of Government programs is one of my top priorities. Overseeing how the Department of Justice exercises its litigation authority is a primary responsibility of mine. As the ranking minority member of Judiciary's Separation of Powers Subcommittee, I am particularly concerned about the Department's effectiveness in defending the constitutionality of laws passed by Congress.

Unfortunately, the Department of Justice's effectiveness in meeting its obligation to defend congressional actions is impaired by the fact that they sometimes refuse to defend the constitutionality of certain provisions of laws. In response to this problem, I have introduced S. 285, the Separation of Powers—Upholding the Constitutionality of Congressional Action Act.

Mr. President, S. 285 requires the Attorney General to advise Congress when the Department of Justice intends to refrain from defending the constitutionality of a law passed by Congress. It is equivalent to title IV of S. 284, which I previously introduced as an omnibus measure containing several reforms in the management of litigation in the Federal Government. S. 285 is a companion measure to Congressman LEVITAS' bill, H.R. 1134, and it echoes provisions which were adopted in the Department of Justice Appropriation Authorization Acts for 1979 and 1980.

S. 285 responds to a relatively novel and questionable assertion of authority by the Department of Justice. Until 1970, there were very few instances in which the Department of Justice declined to defend significant Federal legislation. Principally, those few instances occurred when the Department declined to defend laws which it considered to infringe the President's removal power. Since 1970, however, the Department has asserted expansive authority in these areas, in two respects. It has increased sharply the frequency with which it declines to defend statutes which it views as infringing Presidential powers, such as legislative veto provisions. Second, it has asserted an unprecedented authority to decline to defend statutes which do not affect Presidential powers at all.

Last year, I chaired oversight hearings which focused on one particular assertion of authority to decline to defend statutes which do not affect Presidential powers. My subcommittee reviewed Department of Justice documents, took testimony from Justice Department officers, and obtained the views of the Attorney General and the Senate legal counsel on a number of key legal questions.

I was somewhat concerned by what was revealed in those hearings. First, it appeared that there was serious doubt where the Department of Justice gets the authority it asserts. Certainly the framers of the Constitution did not provide such authority and Congress never gave it by statute. The Justice Department could not point to any significant in-

stance, before the last administration, when it declined to defend a statute which had no effect on Presidential powers. Past Attorneys General had foresworn such authority, scholarly commentary was critical of it, and there were strong constitutional objections to it.

Second, in a particular case where the Department recently asserted its authority, League of Women Voters against FCC, the value of its doing so was highly questionable. Inside the Department, the Office of Legal Counsel had advised against asserting the authority. Congressional leaders asked the Department to reconsider its assertion. When it failed to change its position, the Senate reluctantly appeared as amicus in the case which the Department refused to defend, and the court dismissed the case on the grounds argued by the Senate. The case is now on appeal.

If the Senate had not appeared in that case, the court would likely have struck down the statute in the absence of any defense of it. This raises the specter of the Department of Justice acting as an ultimate reviewing authority on statutes, deciding which shall survive and which shall be struck down, and allowing some to be struck down which a neutral and politically independent court would preserve. Of course, one may hope that this case was not a typical instance of departmental action of the kind. However, the departmental officials who testified at our oversight hearings last year did not leave the impression that what happened could not happen again; they continued to defend their actions in the case.

In light of these concerns about the authority asserted by the Department of Justice, S. 285 is a measured and appropriate response. It does not legitimize or validate the authority asserted by the Department, but provides a means for close oversight. It sends a signal to the Department about Congress' concern. It forewarns Congress so that appropriate steps can be taken in particular cases where the Department declines to defend statutes. Finally, it insures the preparation of a record of the Department's assertions of authority, should further action by Congress be necessary.

S. 285 makes permanent a notice requirement which has been included in the last two Department of Justice appropriation authorization acts. The Department has not found that requirement onerous. On the contrary, Assistant Attorney General for the Civil Division Alice Daniel told us during the oversight hearings that the procedures required by those past provisions "are working well." Whether they are working well enough is something that may need to be addressed again in the future, but for now, S. 285, which merely continues those provisions, is a basic minimum step in this area.●

CONFLICTING VIEWS ON THE VALUE OF THE CLEAN AIR ACT

● Mr. BAUCUS. Mr. President, I would like to insert in the RECORD today two articles recently published in the Washington Post which present widely divergent views on the value of the Clean Air Act.

The first article, entitled "The Clean Air Act Is Worth It," was written by Leon G. Billings, a former aide to Senator Muskie.

Mr. Billings is known well by students of the legislative history of the Clean Air Act. Born and bred in Montana, Leon worked as a staff director for Senator Muskie's environmental subcommittee during the sixties and seventies, the formative years of the Clean Air Act debate.

Mr. Billings was recently recognized for his efforts when he was presented the Second Biennial Philip A. Hart Award in honor of three distinguished individuals for outstanding work in improving urban and working environment.

The second article, to which Mr. Billings responds, was written by Mr. Ben Wattenberg, whose political expertise needs no introduction in these Chambers. Mr. Wattenberg's article, a provocative attack on the Clean Air Act is entitled, "A Healthy Society, Getting Healthier."

The articles follow:

[From the Washington Post, Apr. 2, 1981]

THE CLEAN AIR ACT IS WORTH IT

(By Leon G. Billings)

"Would the Clean Air Act have been passed in the form that it was a decade ago if lawmakers hadn't been health-mongered by environmental activists hit-listing the 'dirty dozen' legislators while predicting that a Silent Spring of poisonous degradation was just over the smoggy horizon?"

Not quite the way I would phrase the debate, but that's how Ben Wattenberg, "the Democrats did it themselves" polemicist, put it on this page ["A Healthy Society, Getting Healthier," March 25].

Wattenberg is not alone in the attempt to revise history in order to make a point. Many would tell you that the Clean Air Act has been tried and found guilty on all counts: primary cause of inflation; major cause of reduced productivity; significant contributor to unemployment; important factor in balance of payments deficit, and declining international competitiveness; and, most heinous, the real reason business does not have any capital to invest in "reindustrialization."

These are all debatable points. I won't concede any of them. And the prosecution of the Clean Air Act obviously bears the burden of proof.

Wattenberg, however, goes beyond all of these allegations to make another point: Dirty air is good for your health. That is a conclusion one can draw from Wattenberg's argument that there is a direct relationship between recent "findings" of gain in life expectancy and the kind of contamination currently found in our environment.

In 15 years of exposure to this issue, I have never before heard the argument that a more polluted planet is a healthier planet. But, obviously, if there are greater pollution and more pollutants and improved life expectancy, one must conclude that a positive correlation exists.

So much for facetiousness. There is a much more significant and troubling point to the Wattenberg polemic: The contention that absent "good evidence of important health or life expectancy gains due to clean air regulation" there ought to be major relaxation if not outright repeal of the Clean Air Act. Why? Because the act "costs" an alleged $30 billion a year to implement. (According to the Air Quality Commission, it's more likely to be $20 billion and won't reach that until late in the decade.)

If during air pollution alerts, sick kids and old folks were dying on the street; if normally healthy people were suffering from acute respiratory ailments; if people were suffering acute cardiac distress, then, and only then, we should have Wattenberg's "laws and tough ones," according to this reasoning.

That certainly is a clear choice for the American people. A barn-door strategy that only results in an after-the-fact cleanup is clearly an option for Congress (albeit 10 to 100 times more expensive than a preventive regulatory strategy).

Current law is premised on two concepts: first, there is a whole lot we don't know about air pollution, but we have reason to believe that it isn't good for you and that certain sensitive groups in society are especially vulnerable to levels of dirty air that simply don't bother the great majority of Americans.

Second, before air becomes so filthy that draconian cleanup measurements would be needed, we ought to do the best we can with our pollution-control technology and community planning to clean up dirty areas and avoid dirtying up clean areas.

These concepts have met with some success. A lot of cleanup has been purchased. And a great deal of new pollution has been avoided. The auto industry (foreign and domestic) is producing cars that are immensely cleaner than 15 years ago; and, as a bonus, we got lead out of gasoline, out of the air and out of our lungs.

Many cities are now cleaner than ever. Only those with overwhelming growth have failed to keep pace—but absent the Clean Air Act, the result would have been much worse.

Significant advances in technology have been made. And, in some cases, the new technology has improved productivity and reduced energy costs. So, is this the time to take the pressure off? I think not.

Of course, the Clean Air Act has deficiencies. No statute so far reaching in its effect could be faultless. But I can remind Wattenberg that the test of the Clean Air Act is not as he defines it. It has been something very different, best defined not by "health-mongering environmental activists" (many of whom are more interested in parks than people), but by a U.S. surgeon general in the Lyndon Johnson administration.

Dr. William Stewart, testifying on April 19, 1967, before Sen. Muskie's pollution subcommittee on the health effects of air pollution, summed up that test this way:

"Today, thanks to many advances in protecting people against disease, we are able in the health professions to think about the positive face of health—the quality of individual living. . . . Being healthy is not just being unsick. . . . In controlling air pollution for the benefit of health, we are working toward an environment that is not only safe, but conducive to good living."

Ben Wattenberg—meet Dr. William Stewart.

[From the Washington Post, Mar. 25, 1981]

A HEALTHY SOCIETY, GETTING HEALTHIER

Once in a while a set of findings comes along that could explode like a bomb in the public arena. One is that life expectancy in the United States has been going way up. Not just those marginal numbers about infant survival, either.

In the last dozen years, the gain in life expectancy for adults has even surpassed that made between 1940 and 1954 with the introduction of antibiotics. In fact, the recent rate of gain exceeds that of any other time in this century.

In the 1940s, for instance, a typical 45-year-old American could expect to live to age 72. The most recent data show a typical 45-year-old living to age 77—an increase in life expectancy of more than 18 percent.

The increases at the older ages are even more dramatic because of the lowered death rate from heart disease and stroke. A person who is 65 today can expect to survive to age 81.

The life-expectancy projections for the rest of this century may turn out to be even more significant. Prof. Eileen Crimmins of the California Institute of Technology has studied the relevant medical data and says it is likely that "we have entered a new era of mortality decline, one concentrated at the older ages." She projects that someone who is 65 years old in the year 2000 will survive to age 87.

Her estimates are pretty high, but they are not even close to those made by the respected French demographer, Jean Bourgeois-Pichot who says that 65-year-olds in Western countries should expect to live almost to age 100 by the year 2000. A recent report from the World Health Organization verifies the direction of the changes, if not the actual numbers.

All of this leads to a striking, if subversive, notion: We live in a healthy society, getting still healthier. That you will notice is directly contrary to the notion that we live in an unhealthy society, getting still unhealthier.

We have heard about air pollution, water pollution, noise pollution, toxic wastes, carcinogens, low-level radiation, nuclear hazards, DDT, cyclamates, ozone layers and stress—to just begin a long, long list. We have heard that "the enemy is us." American economic effort has been described as "the Gross National Pollution."

This perceived unhealthiness has, of course, generated a small army of lawmakers making laws. After all, we live in a responsive society; sooner or later, our legislators respond to perceived conditions.

Now the perception will change—or at least it should. We have to accept the fact that we live in a healthy society, getting healthier. Are we any longer capable of facing up to the good news?

First to face that music should be the environmentalists. Have they perhaps built their castle on sand? They have in recent years helped change industry, politics, culture and birth rates by drumming home one simple notion: Modern society is hazardous to your health.

That notion was accepted by legislators, professors, students and a lot of people who read the article in the paper that said that designer jeans caused cancer. The result has been a bewildering array of environmental laws and regulations, some quite sensible, some bizarre.

But the question before the house is not whether there are some environmental conditions that seriously harm us. Of course there are, and there ought to be laws and tough ones.

The real question is: What kind of laws would we have if prevailing opinion urged us to improve an already healthy society instead of screaming "stop poisoning the planet"?

A case in point: Would the Clean Air Act have been passed in the form that it was a decade ago if lawmakers hadn't been healthmongered by environmental activists hitlisting the "dirty dozen" legislators while predicting that a Silent Spring of poisonous degradation was just over the smoggy horizon?

That law costs the public and private sectors about $30 billion a year. Yet, eminent scientists, in and out of government, today ask whether there is any—repeat, any—good evidence of important health or life-expectancy gains due to the clean-air regulations.

Pittsburgh cleaned up its air decades before the rest of us. A good thing, too. But there has been no evidence that the once-smoky city improved its health any faster than the rest of the United States.

What sketchy evidence exists begs this question: Is the Clean Air Act worth the whole $30 billion, or could some some of that money be spent on other things with better payoffs? (The sharp gains in life expectancy began well before the new environmental laws took hold.)

So now, a new premise: What will be the ripples from the idea that we live in a healthy society, getting healthier?

One such ripple will be prosaic and difficult: There will be greater chaos in the Social Security system as estimates have to be changed to account for increased life expectancy. Brace yourselves for screeds that denounce this heartless society for maltreating its elderly. Better yet, put away more of your own bucks for your own retirement.

Other ripples operate at another level. We were told that ours was a sick society. We were even warned that it might be irresponsible to bring children into such a world. We were told that we should lower our expectations. We were told that America was over the rim, a decaying, polluted suburb of history.

We were told a lot of things that weren't so. We should each, typically, have many extra years left to think about that.●

LET US SUPPORT PRESIDENT REAGAN'S RECOVERY

● Mr. D'AMATO. Mr. President, a horrifying and unconscionable act occurred earlier this week when a would-be assassin's bullet struck and injured President Ronald Reagan and three other men as they emerged from the Washington Hilton Hotel here in our Nation's Capital. The events evoked from all of us nightmares of the tragedies involving the numerous other public servants in our Nation's history who have been victimized by senseless violence of this kind.

Mr. President, it would be a fine display of support for the President and the others injured in Monday's shooting, if we would all heed a suggestion put forth by one of my constituents, Mr. Leo A. Boller, of Little Neck, N.Y. Mr. Boller has suggested that all flags throughout the Nation be prominently displayed and motor vehicle lights be lit today, April 3, 1981, as a gesture of unified patriotism in this time of crisis.

To this end, I urge my congressional colleagues and fellow citizens throughout the Nation to join with us this day in displaying our collective desires for a quick and complete recovery for President Reagan and those who were with him this past Monday.●

NOMINATIONS

Executive nominations received by the Secretary of the Senate April 3, 1981, under authority of the order of the Senate of April 2, 1981:

BUREAU OF LAND MANAGEMENT

Robert F. Burford, of Colorado, to be Director of the Bureau of Land Management, vice Frank Gregg, resigned.

DEPARTMENT OF COMMERCE

Raymond J. Waldmann, of Maryland, to be an Assistant Secretary of Commerce, vice Abraham Katz, resigned.

DEPARTMENT OF ENERGY

William Stewart Heffelfinger, of Virginia, to be an Assistant Secretary of Energy (Management and Administration), vice William Walker Lewis, resigned.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Edward N. Brandt, Jr., of Texas, to be an Assistant Secretary of Health and Human Services, vice Julius Benjamin Richmond, resigned.

DEPARTMENT OF STATE

John J. Louis, Jr., of Illinois, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the United Kingdom of Great Britain and Northern Ireland.

ENVIRONMENTAL PROTECTION AGENCY

Ann McGill Gorsuch, of Colorado, to be Administrator of the Environmental Protection Agency, vice Douglas M. Costle, resigned.

FEDERAL EMERGENCY MANAGEMENT AGENCY

Louis O. Giuffrida, of California, to be Director of the Federal Emergency Management Agency, vice John W. Macy, Jr., resigned.

SOCIAL SECURITY

John A. Svahn, of Maryland, to be Commissioner of Social Security, vice William J. Driver, resigned.

IN THE AIR FORCE

Lt. Gen. George H. Sylvester, U.S. Air Force (age 53), for appointment to the grade of lieutenant general on the retired list pursuant to the provisions of title 10, United States Code, section 8962.

HOUSE OF REPRESENTATIVES—*Monday, April 6, 1981*

The House met at 12 o'clock noon.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

O God, as we are aware of the actions of violence in our Nation and pressured by the threats of discord in our world, remind us of the purposes for which we were created. Teach us again of our responsibility to seek after righteousness and live in peace and concord with all people. May we turn our hearts, souls, and minds to follow Your way—the path of understanding, forgiveness, and reconciliation one with another. Guard us against false pride, and open to us instead the wonder of Your presence, that filled with Your spirit, we may go forth in service and good will to others this day and every day. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

CONSENT CALENDAR

The SPEAKER. This is Consent Calendar day. The Clerk will call the first bill on the Consent Calendar.

CONVEYING CERTAIN INTERESTS IN PUBLIC LANDS TO THE CITY OF ANGELS, CALIF.

The Clerk called the bill (H.R. 618) to convey certain interests in public lands to the City of Angels, Calif.

There being no objection, the Clerk read the bill, as follows:

H.R. 618

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. The Secretary of the Interior (hereafter in this Act referred to as the "Secretary") shall convey by quitclaim deed, subject to the conditions in section 3 of this Act, to the city council of the City of Angels, California (hereafter in this Act referred to as the "council"), or, if the council so designates, to a trustee (hereafter in this Act referred to as the "trustee") which the council may designate pursuant to section 8 of this Act, all right, title, and interest, including any future interests described in sections 6 and 7 of this Act, of the United States in and to 601.51 acres of land in Calaveras County, California, further described as Mount Diablo meridian:

Township 3 North, Range 13 East
Section 28:
Lots 1 and 2,
North half southwest quarter,
Southwest quarter southwest quarter,
Section 29: East half southeast quarter,
Section 33:
Lots 1 through 4, 6, 16 through 18, Northwest quarter northwest quarter,
Northeast quarter southeast quarter,
Section 34:
Lot 2,
Northwest quarter southwest quarter,

including mineral surveys 356, 370, 479, 743, 1245, 1345, 2036, 2682, 3040, 3065, 3066, 3067, 3068, 3085, 3882, and 4449.

SEC. 2. The council or the trustee shall notify, within one year after the date of enactment of this Act, all individuals or other legal entities which appear, as of the date of such notice, upon the secured tax rolls of Calaveras County, California, as the owners of lands referred to in the first section of this Act, or of interests in such lands—

(a) of the conveyance by the United States of its interests in such lands under the first section of this Act,

(b) of the possible defect in the title to such lands or interests resulting from such interests of the United States,

(c) of the possible interests in such lands arising out of the mining laws of the United States, and identified pursuant to the operation of section 6 of this Act, and

(d) of the opportunity to remedy such defect under this Act.

SEC. 3. The conveyance referred to in the first section of this Act shall be made without consideration, but shall be made upon the following conditions:

(a) The council or the trustee shall convey, at any time after two years from enactment of this Act, the interests conveyed to it under the first section of this Act to individuals or other legal entities—

(1) which have submitted to the council or the trustee an application for such interests, and

(2) which appear, or which are the heirs, successors, or assignees of individuals or other legal entities which appear upon the secured tax rolls of Calaveras County, California, as of July 1, 1978, as the owners of the lands or interests with respect to which such application was submitted.

(b) The conveyed property shall remain subject to all encumbrances, if any, existing on the date of enactment of this Act, including easements, servitudes, leases, and rights-of-way, except those encumbrances that are related to interests in mining claims which may be extinguished pursuant to sections 6 and 7 of this Act.

(c) Conveyance of the conveyed property shall be conditioned upon and subject to the right of mining claimants whose rights and interests were initiated pursuant to the mining laws prior to entry and patent under the Townsite Act (43 U.S.C. 711 et seq. (repealed)), and who initiate patent procedures pursuant to section 6 of this Act which result in the issuance of a patent under the mining laws.

SEC. 4. Any administrative or recording costs incurred with respect to any conveyance made by the council or the trustee under section 3 of this Act shall be borne by the party to whom such conveyance is made.

SEC. 5. Any of the interests conveyed under the first section of this Act which do not appear on the secured tax rolls of Calaveras County, California, as of July 1, 1978, shall be conveyed to the council, if held by the trustee, and held or disposed of by the council for the benefit of the City of Angels, California.

SEC. 6. (a) Any unpatented mining claim located within those lands described in the first section of this Act recorded pursuant to the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701), for which the claimant has not made application for patent within two years after the date of the enactment of this Act shall be conclusively deemed to be abandoned and shall be void and all interests in such claim shall be deemed to have reverted to the United States for the purpose of this act: *Provided, however,* That upon a showing that a mineral survey cannot be completed within said two-year period, the filing of an application for a mineral survey, which states on its face that it was filed for the purpose of proceeding to patent, shall be acceptable for the patent application purpose of this section if all other applicable requirements under the general mining laws and other laws have been met and if the applicant subsequently prosecutes diligently to completion his application for patent.

(b) Final rejection of any patent application filed under section 6 of this Act shall cause to lapse and be void the condition imposed by section 3(c) of this Act in the grant to any person receiving conveyance of lands embracing all or part of the mining claim which was the subject of the rejected patent application.

SEC. 7. For the purposes of this Act, any unpatented mining claim located within those lands described in the first section of this Act which on the date of enactment of this Act was not recorded pursuant to section 314 of the Federal Land Policy and Management Act of 1976, or which is not maintained by the annual filings required by section 314 of said Act, shall be conclusively deemed abandoned and shall be void, in accordance with the provisions of section 314 of said Act, and all interests in such claim shall be deemed to have reverted to the United States upon such failure to record or annually file.

SEC. 8. The trustee designated by the council pursuant to section 1 of this Act shall be an individual, residing in Calaveras County, California, capable under the laws of that State to act in the capacity of trustee.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

□ This symbol represents the time of day during the House proceedings, e.g., □ 1407 is 2:07 p.m.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

PROVIDING EXCEPTION TO REQUIREMENTS OF ACT OF AUGUST 30, 1890, WITH REGARD TO CERTAIN LANDS IN RIVERSIDE COUNTY, CALIF.

The Clerk called the bill (H.R. 1528) to provide an exception to the requirements of the act of August 30, 1890 (26 Stat. 391; 43 U.S.C. 945), with regard to certain lands in Riverside County, Calif.

There being no objection, the Clerk read the bill, as follows:

H.R. 1528

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, that the proviso in the paragraph entitled "FOR GENERAL EXPENSES OF THE GEOLOGICAL SURVEY:" in section 1 of the Act of August 30, 1890 (26 Stat. 391; 43 U.S.C. 945), shall hereafter be inapplicable to lands in section 18, township 2 south, range 4 east, San Bernardino meridian, Riverside County, California, that were conveyed by the United States by patent numbered 969694, patent numbered 844747, and patent numbered 657564.

SEC. 2. The reservation to the United States of rights-of-way for ditches and canals constructed by the authority of the United States, recited in patents listed in the first section of this Act shall be of no further force and effect with regard to the lands covered by those patents.

The bill was ordered to be engrossed, and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

The SPEAKER. This concludes the call of the Consent Calendar.

BUDGET COMMITTEE TO BEGIN MARKUP OF 1982 BUDGET

(Mr. WRIGHT asked and was given permission to address the House for 1 minute.)

Mr. WRIGHT. Mr. Speaker, this morning the Honorable JAMES R. JONES of Oklahoma, the chairman of the House Committee on the Budget publicly announced the chairman's mark from which this committee will begin tomorrow in the markup of our budget for fiscal 1982.

The chairman's mark is the result of long and careful studies, assiduous analysis, painstaking, even agonizing efforts to find reductions in expenditures. It embraces about half of those expenditure reductions requested by the administration without change and includes additional reductions, while restoring certain programs otherwise marked for extinction or drastic reduction such as early childhood nutrition, basic educational programs, skill training for jobs in the private sector, health and nutrition programs for young and old, and various programs trying to replace welfare with work.

The total result would be that, based upon the same set of assumptions, the chairman's mark upon which the committee will begin consideration tomorrow would cut spending by $5 billion more than it would be cut under the Stockman proposal. It would reduce the tax cuts from those proposed by Mr. Stockman, the so-called Kemp-Roth plan, by some $19 billion in its impact upon the Treasury.

The total deficit then would be reduced by something like $25 billion below the Stockman-Reagan figure. We think that is extremely important in a day when deficits are prone to cause higher interest rates and more inflation. The Jones budget proposals are certainly creative, constructive, and responsible. They are worthy of the serious consideration of all Members. We hope they may earn and achieve a degree of bipartisan support.

CONGRATULATIONS TO CHAIRMAN JIM JONES ON HIS FINE WORK ON THE BUDGET

(Mr. ALEXANDER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ALEXANDER. Mr. Speaker, I congratulate the work of Congressman JIM JONES of Oklahoma, chairman of the Budget Committee, for his work and announcement today of the Democratic alternative to the Reagan budget. The Democratic budget corrects the course of the Democratic Party by addressing the economic concerns of middle America, but does not abandon the needs of the poor and the disadvantaged.

Chairman JONES' budget proposals not only cut more deeply than those proposed by the President, but will result in a deficit for 1982 which is smaller by half than the President's. I urge my colleagues on both sides of the aisle to closely scrutinize and thoroughly assess Mr. JONES' budget and when it becomes clear that this is a highly constructive response to our fiscal problems, to support it as enthusiastically as I do.

MOMENT OF TRUTH FOR STUDENT AID

(Mr. PEYSER asked and was given permission to address the House for 1 minute and to revise and extend his remarks and to include extraneous matter.)

Mr. PEYSER. Mr. Speaker, we are nearing the moment of truth for student aid in this country. We have been fighting this battle since the first report of what the administration's budget would do to young people going to college or in college today, the poor and the middle income.

Fortunately, Mr. Speaker, I am delighted to hear that the Budget Committee is considering making a number of changes that are going to make these programs be able to continue. It is my hope that the Budget Committee's action will follow that and that the House will follow that.

Mr. Speaker, today I am entering into the RECORD letters from Moravian College in Congressman RITTER'S district; San Jose State University in Congressman EDWARDS' district; Johns Hopkins University in Congresswoman MIKULSKI'S district; Cornell College in Congressman TAUKE'S district; and Wesleyan University in Congressman GEJDENSON'S district.

In closing, Mr. Speaker, a message at the bottom of the letter from Moravian College from their philosophy professor says:

One cannot revitalize America by forcing students out of colleges and colleges out of existence.

MORAVIAN COLLEGE,
Bethlehem, Pa., March 24, 1981.

Hon. PETER PEYSER,
U.S. House of Representatives,
Washington, D.C.

DEAR REPRESENTATIVE PEYSER: I have been teaching Philosophy at Moravian College for the last 15 of the college's 174 years of existence. Twelve years older than my own alma mater, Colgate University, Moravian too continues to provide a strong liberal arts education for students of superior ability. Without continued support from the Federal government at least ⅓ of our students simply could not afford to stay.

Moravian College, last year depended on Federal aid to students for over one-third of its tuition income. One-half of our students needed an average guaranteed direct loan of $2000 and one third received Pell Grants.

We would tighten our belts if we could, but I share one secretary with four other departments, go to only one academic conference each year and use the least expensive texts for my classes. The students too are doing their share as my son who graduated from college last year and my daughter who is now in college can attest.

One cannot revitalize America by forcing students out of college and colleges out of existence.

Sincerely,

CHRISTOPHER W. RUSSELL,
Department of Philosophy.

SAN JOSÉ STATE UNIVERSITY,
San Jose, Calif., March 24, 1981.

Representative PETER PEYSER,
House Education and Labor Committee,
Cannon House Office Building, Room 301, Washington, D.C.

DEAR MR. PEYSER: As I'm sure you are aware, we in Student Financial Aid are presently preparing for the 1981-82 Academic Year. And, as I'm sure you are also aware, we are unable to take any action until such time as Congress makes some decisions as to allocations for the various federal student aid programs.

At San Jose State University we have almost 3,000 students receiving Basic Educational Opportunity Grants (BEOG's). Unless the $911 million in supplementary appropriations is approved, our estimates show that as many as 75 percent of our most needy students will be unable to continue their education. In addition, unless the appropriation is approved quickly, we will be unable to notify students of their award, perhaps causing many of them to halt their education totally. Moreover, we currently have over 1,600 students who each receive an average of $2,400 in the Guaranteed Student Loan (GSL) program. If the proposed cuts and restrictions are approved, only 1,000 students will be eligible to divide $1.5 million for an average loan of $1,500.

With the costs of living and education rising so rapidly, the proposed cuts in financial aid programs will be disastrous to countless numbers of students and Higher Education will return to the days when only the rich elite can attend.

As a former educator, financial aid professional, and a constituent, I urge you to give your total support to a speedy release of appropriations and to a reprioritizing of governmental funds to include not only the "truly needy" but those who will, as a result of cutbacks, become the needy.

Sincerely,

BART ASTOR,
Financial Aid Counselor.

JOHNS HOPKINS UNIVERSITY,
Baltimore, Md., March 25, 1981.

Hon. PETER A. PEYSER,
House of Representatives,
Washington, D. C.

DEAR CONGRESSMAN PEYSER: Please let me respond to your recent letter asking if we at Johns Hopkins are willing to take an active part in preventing the decimation of the student loan program (GSL and NDSL) as proposed in the recently announced budget of the Reagan Administration. The answer is yes.

While I have considerable sympathy for efforts directed at capping the eligibility for these loans so that they may not, in fact, be "loans of convenience" I am painfully aware of the very great importance of these two programs to our students here at Johns Hopkins, graduate and undergraduate, and to students all across the country in the independent colleges and universities whose historical contribution to American education and American life has been so great.

The Johns Hopkins University is a member of the National Association of Independent Colleges and Universities, of the Consortium on Financing Higher Education, of the American Association of Universities, of the American Council on Education, and of numerous other college and university groups with offices in Washington, D.C. Representatives of my office have been working closely with these associations and their staffs in recent weeks to provide every possible assistance in the effort to which you so admirably have dedicated your interest.

I hope that all of us working together can convince the Administration and the cognizant committees of the House and Senate of the vital importance of this program to the continuing opportunity of so many of our bright young people, to enter higher education or to complete the work that they may have already begun. There is no more important National resource. In the phrase which was repeated to me by one of my assistants who sat with you at the NAICU/GRAC meeting in Washington in early February, "the education of the next generation of Americans is no special group." Please be assured of my support for what you are attempting to accomplish and of our commitment to it.

Sincerely.

STEVEN MULLER.

CORNELL COLLEGE,
Mount Vernon, Iowa, March 27, 1981.

Mr. PETER A. PEYSER,
House of Representatives, 301 Cannon House Office Building, Washington, D.C.

DEAR CONGRESSMAN PEYSER: I certainly applaud your leadership efforts in the fight to sustain the student assistance programs of the government.

The proposals before the Congress have the potential to wreak havoc on higher education in general and on the private sector in particular. At Cornell alone some $1.5 million of our $8 million annual budget comes directly from federal student assistance programs.

If a student's freedom of choice is to be safeguarded, continuing financial assistance is an absolute necessity.

Although there are many specific proposals that could be very deleterious to the financing of higher education, allow me to illustrate my concern by indicating the impact of just one of these items; the $25,000 income cap for the Guaranteed Student Loan program.

This year 472 Cornell students (50.6 percent of the student body) partly financed a year at Cornell through guaranteed loans totaling $933,238.

These figures include 132 loans totaling $268,101 to students from families with incomes above $25,000 and, in addition, another 41 loans for $93,750 to students who did not even ask for financial aid—presumably the families also are above the $25,000 figure.

Imposition of a $25,000 income cut-off would have meant the loss of $361,851 in financing for 173 students attending Cornell this year.

Cornell along with 12 other premier midwestern colleges form the Associated Colleges of the Midwest—one of the oldest higher education consortiums in the nation. The impact on these 13 colleges for this academic year would have seen over 6,000 students (roughly one-third the total enrollment) forfeit more than $13 million in guaranteed student loans if the $25,000 income test had been enacted.

These figures clearly support the need to take another look at the proposed reductions. This is made particularly obvious in light of the fact that I have limited my discussion to but one specific in but one program out of many specifics in many higher education programs being considered for reduction.

I hope this information is helpful in your efforts and if we can be of any further assistance feel free to call on me or Mr. Frank Krivo, a member of my staff who has responsibility and expertise in this area and who has been in contact with your Mr. Williams.

Sincerely,

PHILIP B. SECOR,
President.

WESLEYAN UNIVERSITY,
Middletown, Conn., March 30, 1981.

Hon. PETER A. PEYSER,
House of Representatives, 301 Cannon House Office Building, Washington, D.C.

DEAR CONGRESSMAN: Your letter telling us of your determination to fight for strong student aid programs was very heartening.

You may be sure that we at Wesleyan University will continue to do everything we can to be helpful in what must be a major national effort to preserve Federal loan and grant programs which are essential to our students.

Please call on us if we can be helpful in your efforts.

Sincerely,

COLIN G. CAMPBELL,
President.

RETIREMENT BENEFITS FOR DIVORCED SPOUSES

(Mrs. SCHROEDER asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. SCHROEDER. Mr. Speaker, today I am introducing two bills to amend the civil service and military retirement systems.

Under present law, survivors benefits are optional and the retiree may unilaterally waive survivors benefits at the time of retirement. Similarly, a divorced spouse is prohibited from receiving survivors benefits, even after a long-term marriage. This policy ignores the economic contribution of former spouses of Federal employees, the majority of whom are homemakers.

Recent social changes make it necessary to revamp retirement policy as it applies to divorced spouses. Since 1974, all but two States have adopted some form of no-fault divorce, which has eliminated the traditional defenses against divorce. As a result of this move to no-fault, the divorce rate has doubled, with limited, if any spousal support or alimony provided. Moreover, alimony offers no protection for old age since it ceases with the death of the wage earner.

As a result of these developments, certain retirement laws have changed to provide greater protection to divorced spouses.

In 1965, Congress amended the Social Security Act to provide benefits for divorced spouses married 20 years or more. The 1977 Social Security Amendments reduced the marriage requirement from 20 to 10 years.

In 1980, Congress enacted the Foreign Service Act (Public Law 96-465) to permit divorced spouses to receive a pro rata share of the retirement annuity and survivors benefits subject to

court review, modification, or rejection.

A major policy question before us is whether spouses should have a right to a portion of the retirement benefits earned during the marriage. Should pension plans continue to emphasize benefits for retired workers solely, or should they significantly expand protection for workers' spouses? This question and the way we answer it forces us to reevaluate the traditional role of wife, mother, and homemaker, and to determine its value in our society. If it is valueless, we must take appropriate steps to educate young women to prepare for a full-time, lifelong, participation in the paid work force. If we determine that there is some benefit to society from the traditional homemaking role, we must change those aspects of our legal and social systems which penalize women for choosing that role.

The bills I introduce today are based upon the premise that marriage is an economic partnership and that the retirement credits earned during the marriage should be shared upon divorce. It is my contention that the spouse makes a significant contribution toward the employee's ability to earn the wage and consequently receive the pension.

These bills would make survivors benefits mandatory unless the retiree, spouse, and former spouse (if any) elect in notarized signed writing to waive survivors benefits.

It also would entitle a divorced spouse married 10 years or more to a pro rata share of the retirement and survivors benefits. The exact amount of the former spouse annuity would depend upon the number of years of marriage that overlap with the creditable years of service. The former spouse married during the entire period of creditable work years would be entitled to a maximum of 50 percent of the retirement benefits.

This legislation would tie the entitlement to retirement benefits to the divorce proceedings. The pro rata formula contained in the bills could be adjusted or rejected by the divorce courts. This permits the courts to review each case upon its own merits.

The provisions are prospective for those who become divorced after enactment. Spouses who remarry before age 60 would lose their entitlement to a pro rata share of the retirement benefits. Moreover, a former spouse, previously married to another Federal employee or member of the armed services, would only be entitled to one survivor annuity.

In the 95th Congress, Public Law 95-366 was enacted to require the Civil Service Commission—now the Office of Personnel Management—to honor court orders that divide the civil service retirement annuity during a divorce action. While this was an improvement in Federal law, it was a limited remedy. Since it did not apply to survivors benefits, the court ordered retirement benefits cease after the death of the retiree. Since Federal employees are not automatically covered by social security, homemaker spouses are left without even these minimal retirement benefits for their old age.

Unlike civil service personnel, military members do not pay into the military retirement system. However, since 1957 members of the armed services have made mandatory contributions for social security coverage. While this gives military spouses more retirement protection than is available to civil service spouses, it is inadequate protection. First, the former spouse cannot draw social security benefits until the military member retires and begins collecting social security. Since military members frequently retire at an early age and begin another career in midlife, many work well beyond age 65, which prevents a former spouse from receiving social security benefits.

Second, for surviving spouses entitled to both spousal benefits under the survivors benefits plan (SBP) and social security dual benefits are limited by statute. One-half of the amount of social security benefits attributable to the member's military service is offset from the SBP payments.

Third, social security was never intended to be the sole source of retirement income for the elderly. Rather, it was intended to supplement pension benefits and savings. The average monthly social security benefit for women is $230—$2,760 annually; 48 percent of the unmarried women who depend solely on social security have incomes that fall below the poverty level.

Finally, frequent moves prevent a military wife from accumulating employment tenure that would entitle her to her own retirement benefits. Private employers are also wary of hiring a military wife because her husband will inevitably be reassigned to another duty station. Traditions and customs within the military community have also discouraged military wives from working.

Retirement issues are women's issues since a majority of those over 65 are women. Women outnumber men 2 to 1 in the rapidly expanding population over age 75. Contrary to the myth that most older people are married and living in families, the majority of older women are widows, while most older men are married and living with their wives, frequently younger women who are second wives. In 1978, there were 8 million unmarried women over age 65, compared with 2 million unmarried men.

Older women are the fastest growing poverty group in America; 72 percent of the elderly poor are widowed, divorced, or never-married women. Median income for these women is $3,087 for those over 65 and $4,533 for those between 55 and 65. Even though these women living below the poverty level would like to work to supplement their meager incomes—most find it difficult to find jobs and others are too sick or too old to work. Only 9 percent of women over 65 are employed, and 29 percent of women 55 or older.

Most of these women have not always been poor, but their circumstances have deteriorated with advancing age. What happens to them is not inevitable, but rather the result of discrimination throughout their lives which strikes its cruelest blow at the end. It is my view that our retirement systems contribute to the economic impact of sex discrimination and punishes women for their traditional roles in society.

We are a society which places value on home and family, encouraging women to stay at home and take care of their children. Yet one of the most severe forms of economic discrimination is that we fail to attach an economic value to this service. The feature of pension portability and earned rights for the homemaker is essential if spouses are to have a choice whether to work inside or outside the home.

Congress must determine whether it wants to continue a public policy which deprives a long-term spouse of retirement benefits following divorce. Congress must decide who is responsible for the welfare of these spouses. Should they be entitled to a share of the retirement benefits earned during the marriage or should they be relegated to the poverty rolls, dependent upon food stamps, welfare, and medicaid, at the taxpayers' expense. Earnings sharing provides a reasonable remedy to the problem of these older women.

SECRETARY DONOVAN EXPRESSES HIS OPINION

(Mr. WILLIAMS of Montana asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WILLIAMS of Montana. Mr. Speaker, a dialog occurred last Thursday in the House Education and Labor Committee between myself and Secretary of Labor Donovan which I should like today to describe briefly to this House. Later I will submit the transcript of that committee's meeting.

Secretary Donovan was espousing his theory that America became great because of new machinery, capital formation, investment and profit. I departed from that, saying I thought that helped make America rich but most particularly it made a few Americans rich. I told Secretary Donovan I thought what made America great was the fact that we were able through

our genius to distribute that wealth among the American people.

Mr. Speaker, Secretary Donovan said to me, in effect, Congressman, that is how they do it in Russia.

Now, Mr. Speaker, it has been a long time, I guess 30 years, since those kinds of charges have been leveled on Capitol Hill. I do not know if ever before a Cabinet-level official has expressed that as his theory of this Government.

THE GREAT ORANGE SQUEEZE OF 1981—PART II

(Mr. MILLER of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MILLER of California. Mr. Speaker, today I am introducing legislation to reform the agricultural marketing order program.

This program is an outstanding example of a well-intentioned idea gone awry.

A program intended to support small farmers in many cases now protects large agricultural domination of the food market.

A system designed to benefit the public now excludes the public from major decisions which affect our pocketbook and our health.

So, now we have growers who are using subsidized water—paid for by taxpayers—which is delivered through irrigation systems—paid for by taxpayers—to grow crops which are destroyed in order to inflate food prices—which are paid by taxpayers.

And this is justified as preserving the free enterprise system?

My legislation will reform the marketing program, as recommended by many experts who have studied its misguided impacts.

My bill will require that at least half the marketing boards be composed of consumers, and that members of the boards can require that public hearings be conducted before we again witness the purposeful destruction of hundreds of thousands of tons of food as we are seeing this year in California.

My bill will also increase the voice of the small farmer in the decisionmaking process.

I am very pleased that the chairman of the Subcommittee on Domestic Marketing, Consumer Relations, and Nutrition, Congressman FRED RICHMOND, has joined me in introducing this legislation.

This bill is in the consumer's best interest, it is in the farmer's best interest, and it would end the unwarranted intrusion of the Federal Government into the private sector in a manner which obstructs the orderly operations of the marketplace.

MORE SPARING USE OF WORD "BIPARTISAN" URGED

(Mr. MICHEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MICHEL. Mr. Speaker, oftentimes there are words in the English language which are so misused or overused that they gradually become meaningless. Before long, you just do not hear them anymore.

One very descriptive word, I fear, is headed for such a fate. It is the word, "bipartisan." It is most often couched in the phrase: "The spirit of bipartisan cooperation."

I think this word is a favorite of the Budget Committee majority. When talking about drafting a budget resolution, they always refer to bipartisan cooperation. The truth is that the majority is doing all of the drafting. The extent of our participation is attending their press conferences to find out what is being done, along with the rest of the country.

The Ways and Means Committee also overuses the term. Their definition is: "Your tax bill is out and ours is in."

The Democratic leadership seems to think bipartisanship lasts only as long as the President's popularity. To him the term "bipartisan cooperation" is synonymous with the term "smokescreen".

I personally fear for the word "bipartisan." I would hate to see it become a trite, meaningless expression. That is why I am not using it much these days.

I would suggest more sparing use by those on the other side as well, so that when it does apply, we will all sit up and take note.

DEMOCRATIC BUDGET PROPOSAL

(Mr. SOLOMON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SOLOMON. Mr. Speaker, I just want to commend my Republican leader for his remarks. I do not know if he was on the floor a few minutes ago when the majority leader took the floor and was presenting a new proposal, a new Democratic proposal from himself and the gentleman from Oklahoma where they have found additional budget cuts or I should say additional tax cuts and budget cuts and they are going to give us a whole new proposal and throw out the Reagan economic recovery program.

Well, Mr. Speaker, I can recall the majority leader taking the floor at the time of the second budget resolution last year and chastising me for saying that the Democratic proposal was a sham, that they were balancing the budget, after every newspaper in the country had said the Democratic proposal is going to balance the budget.

□ 1215

Well, lo and behold, 6 months later we looked at the budget and we were $50 billion in debt. I think that we are getting the same old game as last year.

Mr. Speaker, let us give the President a try. The American people want us to go along with his economic recovery program. I think we owe it to the country to give him a chance.

Mr. ALEXANDER. Mr. Speaker, will the gentleman yield?

The SPEAKER. The time of the gentleman from New York (Mr. SOLOMON) has expired.

THE BUDGET COMMITTEE'S ALTERNATIVE

Mr. ALEXANDER. Mr. Speaker, I ask unanimous consent that I may be allowed to address the House for 1 minute.

The SPEAKER. Without objection, the gentleman from Arkansas (Mr. ALEXANDER) is recognized.

There was no objection.

Mr. ALEXANDER. Mr. Speaker, I would like to ask the gentleman from New York (Mr. SOLOMON) if he has apprised himself of the information that the chairman of the Budget Committee articulated this morning at the announcement.

Mr. SOLOMON. Mr. Speaker, if the gentleman will yield, I listened very carefully to what the gentleman from Texas (Mr. WRIGHT) had to say on the floor, and I said that if he has found additional moneys, we should not be reinstating cuts; we ought to be using them to bring down the deficit and balance the budget.

Mr. ALEXANDER. Mr. Speaker, I would like to advise the gentleman that the chairman of the Committee on the Budget, the gentleman from Oklahoma (Mr. JONES), was very fair and statesmanlike in his response to questions about Mr. Stockman and the budget that has been sent to the Hill, and before our Republican colleagues on the other side of the aisle declare the Democratic alternative to be a sham and a fraud, I would like for the gentleman and for his colleagues to at least advise themselves of the facts before they reach that conclusion.

Mr. SOLOMON. I would be more than glad to do that, but I have heard this gentleman from Arkansas state on the floor that we need to balance the budget, and I appreciate the gentleman's support.

What I am just saying is that if we have found additional revenues, let us use them to balance the budget. Let us not reinstate any cuts. Let us try and live with the President's budget. Let us give him a chance.

Mr. ALEXANDER. Mr. Speaker, I direct the gentleman's attention to the budget document filed today by the committee.

Mr. SOLOMON. Mr. Speaker, I thank the gentleman.

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER laid before the House the following communication from the Clerk of the House of Representatives:

U.S. HOUSE OF REPRESENTATIVES,
Washington, D.C., April 6, 1981.

Hon. THOMAS P. O'NEILL, Jr.,
The Speaker,
U.S. House of Representatives,
Washington, D.C.

DEAR MR. SPEAKER: Pursuant to the permission granted in the Rules of the House of Representatives, I have the honor to transmit a sealed envelope from The White House, received in the Clerk's Office at 12:23 p.m. on Friday, April 3, 1981 and said to contain a message from the President wherein he transmits the sixth annual report of the Nuclear Regulatory Commission covering fiscal year 1980.

With kind regards, I am,

Sincerely,

EDMUND L. HENSHAW, Jr.,
Clerk, U.S. House of Representatives.
By W. RAYMOND COLLEY,
Deputy Clerk.

SIXTH ANNUAL REPORT OF NUCLEAR REGULATORY COMMISSION—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, referred to the Committee on Interior and Insular Affairs and the Committee on Energy and Commerce:

To the Congress of the United States:

I transmit for the information of the Congress the Sixth Annual Report of the Nuclear Regulatory Commission, as required by Section 307(c) of the Energy Reorganization Act of 1974 (42 U.S.C. 5877).

The period covered is fiscal year 1980, ended September 30, 1980, with occasional treatment of events occurring after that date.

RONALD REAGAN.

THE WHITE HOUSE, *April 3, 1981.*

PORTSMOUTH PROJECT

(Mr. McEWEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. McEWEN. Mr. Speaker, as you know, the Budget Committee will mark up the fiscal 1982 budget authorization bill on April 6 and 7, including Department of Energy funding for the Portsmouth, Ohio, gas centrifuge project.

It is absolutely essential that the administration's requested budget be maintained in order to keep the project on schedule. The first phase of production from the gas centrifuge was delayed from 1988 to 1989 because of budget revisions under the Carter administration. This $149 million reduction resulted in an increased cost for plant construction of at least $200 million. Similar cost increases would occur if there is another delay in construction.

Mr. Speaker, another effect of this delay was to jeopardize industry involvement. Manufacturers of needed parts and equipment are receiving a signal of uncertainty regarding the project. One manufacturer has already announced a slowdown in its commitment to the project while it tries to read the intent of Congress. At the encouragement of the Federal Government, private industry has already invested over $125 million in capital costs for equipment and plant construction. The Government has required a commitment through phase 2 of this project that represents $400 to $500 million of private industry capital. Further delays will have serious financial consequences and threaten the entire project and will probably precipitate total abandonment by private sources.

Mr. Speaker, the enrichment program is also a moneymaker for the U.S. trade balances. The United States will not continue to serve our foreign customers if they perceive that the United States does not have the capacity to meet their needs. The U.S.S.R., France, and others provide enrichment services as our competitors. We must keep our enrichment capacity more efficient and growing.

Loss of our customers would mean the loss of a significant contribution to our balance of payments. It would also defeat the goals of U.S. nonproliferation policy should our customers turn to foreign sources. Yet we have been reducing our production of enriched uranium and drawing down our reserves in reaction to a perceived reduction in near-term demand. This is shortsighted and may become a self-fulfilling prophecy for the long term despite electric utility and DOE projections of increasing demand for enriched uranium which argue for the speedy completion of the Portsmouth project.

In summary, Mr. Speaker, any budget reductions will result in further slippage in construction schedules as well as cause contractors who are vital to the timely completion of the project to reevaluate their participation in the project. In addition, any further deferrals will result directly in increased costs to the ratepayer, the endangering of our foreign enrichment sales and the loss of American jobs.

When the Budget Committee considers this project in the markup sessions, I urge careful scrutiny of any budget revisions which would cause unnecessary and costly delays in the completion of the uranium enrichment program.

THE 1981 HOUSING ACT

The SPEAKER. Under a previous order of the House, the gentleman from Texas (Mr. GONZALEZ) is recognized for 15 minutes.

● Mr. GONZALEZ. Mr. Speaker, the bill I am introducing this morning reauthorizes for fiscal year 1982 the primary housing and community development programs administered by the Department of Housing and Urban Development and the Farmers Home Administration. Fifteen cosponsors, all members of the Subcommittee on Housing and Community Development, join me in offering this essential piece of legislation.

It is no secret that I believe the budget proposed by the Reagan administration launches a war against inflation which is a rich man's war and a poor man's fight. Nothing demonstrates this more graphically than comparing this administration's proposal for fiscal year 1982 budget authority to support our assisted housing programs with the budget authority appropriated by Congress for fiscal year 1981. Most of the families who benefit from these programs survive on incomes that are less than 25 percent of the area median income. Many of these families will be hurt by proposed cuts in programs operated by agencies other then HUD. Most significantly, the administration proposes a new budget authority for the assisted housing program which is more than 60 percent less than last year's appropriation. Last year Congress appropriated enough funds to assist 255,000 additional low-income families to find decent, safe, and sanitary housing. The administration proposes only 175,000 additional families to be assisted with fiscal year 1982 funds.

The Members who are cosponsors of this bill could not stand idly by and support the wholesale reduction of programs that are targeted primarily to low-income and elderly families who are slipping through the gaping holes in the so-called safety net. We are determined that the programs which Congress carefully designed to address the needs of our low-income citizens and of our financially distressed communities be preserved and funded at levels that will assure meaningful progress in meeting critical needs.

First, in proposing $28.627 billion in budget authority for the assisted housing programs, the national com-

mitment to helping the Nation's poor to find decent, safe, and sanitary housing is reasserted. This amount would be adequate to assist 250,000 additional low-income families. Given the marginal incomes of many families who live in assisted housing and the reductions in disposable income that will occur because of proposed reductions in alternative forms of Federal assistance, the bill does not assume adoption of the administration's proposal to increase the tenant's contribution to rent from 25 percent to 30 percent of income. Those increases, as modest as they might appear to middle-income families, would cause significant hardship to the over 50 percent of all section 8 and public housing tenants who have extremely low incomes—below 25 percent of area median income. Since the national vacancy rate for rental housing is at the lowest level in over 25 years, the bill does not assume that a reduction in the amount of Federal support for the construction of new or rehabilitated assisted housing units is appropriate at this time. The evidence is that the demand is growing, not shrinking.

An important component of our efforts to make more housing available for truly needy low-income families is the assurance that below-market financing will be available through the Government National Mortgage Association special assistance functions. The bill is consistent with the administration's recommendation that an additional $2.7 billion in budget authority is necessary to support a total program of $3.6 billion in mortgage purchase commitments. Without this support, we estimate that 874 multifamily projects in the FHA processing pipeline as of February 14, 1981, will be halted in their tracks.

The bill contains $3.96 billion in budget authority for the community development block grant (CDBG) program and $675 million for the urban development action grant (UDAG) program. These effective programs should be retained as separate functions and at reasonable funding levels. The CDBG program is used by communities to address broad community development needs. The availability of these funds and the program requirements have been instrumental in assisting communities to develop multiyear strategies for addressing both community development and low-income housing needs. Given the administration's proposal to eliminate the Economic Development Administration, and several other programs that have been used to revitalize and rehabilitate communities, CDBG is more vital now than ever. The primary focus of the UDAG program is to retain jobs, to stimulate additional employment opportunities and to leverage private investment in distressed communities. To date, no valid justification for the merger of UDAG with CDBG has been presented. I believe any merger will vitiate the effectiveness of these two distinct tools for stimulating community revitalization.

The bill limits the Federal Housing Administration's insuring authority to $44 billion in fiscal year 1982. The FHA should operate as a demand program, and not be subject to credit limitations. However, if a limit is established it should be sufficient to account for the greater demand placed on the FHA programs during periods of economic downturn. The administration has proposed a $35 billion limitation. There is a deep concern that this lower limit indicates a change in Federal policy and that the proposed restriction of the FHA programs is intended to direct credit away from housing. This should not be done without fully investigating the critical role of the Federal Government in facilitating access to housing credit for moderate- and middle-income persons. In periods of restricted mortgage credit such as 1974, 1975, 1979, and 1980, FHA's proportion of total insuring activity increases. The FHA programs are often the only mechanism by which middle-income or first-time home buyers can enter the homeownership market. Given the past history of the FHA programs, it is unreasonable to assume, as the administration does, that the FHA insuring activity for 1982 should be restricted to the same level as 1981 or that private mortgage insuring companies will be able to serve those borrowers who currently use the FHA programs.

This bill also provides an authorization adequate to subsidize an additional 110,660 housing units for rural low- and moderate-income families in fiscal year 1982. This is a lower level of assistance than the Congress provided in 1980 and 1981, but at least it will maintain a modest level of assistance for rural Americans who are among the poorest and worst housed citizens in the Nation. Under current law, 60 percent of the loan amounts authorized in connection with these units must go to low-income families—those whose income is under 80 percent of the area median income, 30 percent of this amount must go to families who have less than 50 percent of the area median income. The remainder must go to families whose incomes are just above 80 percent of area median income and who are lacking decent, safe, and sanitary housing. In addition to these units, the bill provides an authorization of $57 million in grant assistance for very low-income persons, including the elderly and domestic farm laborers.

For the first time since enactment of title V of the 1949 Housing Act, this bill provides authorizations for appropriation of all rural housing subsidies. For 1982, the bill provides an authorization of $379.1 million in new contract authority for interest credit, rental assistance, and homeownership subsidies for rural low- and moderate-income families. This method of authorization assures conformance to the Budget and Accounting Act and eliminates back-door financing practice applicable to the rural housing programs which has been criticized in recent years.

The bill also includes a $200 million authorization for the Department of Energy low-income weatherization program—a program that is critical if Federal financial incentives to encourage energy conservation among families with incomes too low to take advantage of energy tax credits are to continue. The decontrol of oil and the impending decontrol of gas prices may well stimulate energy conservation efforts on the part of above-moderate-income individuals who have the access to capital to finance such investments or who have a tax liability high enough to take advantage of the tax credit. However, a large segment of the lower income population is simply unable to take advantage of the tax credit. Without practical weatherization work available through the DOE program—or grants available through the Solar Energy and Energy Conservation Bank—most low-income families will be unable to reduce their energy consumption and their utility bills. The weatherization program makes sense.

Finally, the bill extends for 1 year the basic insurance authorities of the Federal Housing Authority, extends the Federal crime insurance, riot reinsurance and flood insurance programs for an additional 2 years, and makes minor changes in the law affecting the National Institute of Building Sciences.

In closing, I believe this bill is a reasonable response to present conditions. It reaffirms our national commitment to decent housing, particularly for our most vulnerable citizens, and will provide critical assistance for restoring the vitality of our urban and rural communities.●

SAVE OUR CHILDREN: THE TRAGEDY OF ATLANTA

The SPEAKER. Under a previous order of the House, the gentleman from California (Mr. DYMALLY) is recognized for 5 minutes.

Mr. DYMALLY. Mr. Speaker, it is certainly fitting that the Congress of the United States should pause in the conduct of business to protest the tragic situation in Atlanta and to memorialize the children who have lost their lives. It is fitting because these are not only black children, not only Atlanta's children; they are America's children. They are our children.

It is beyond our capacity to imagine the sickness that would cause a human being to murder defenseless children. It is beyond our ability to truly know the grief of the families of these children. It is beyond our imagination to know the fear that must pervade every waking moment of every parent and child in Atlanta.

Over 20 children are dead or missing. And because of the media coverage that has been given to this tragedy, much of the Nation mourns, much of the Nation is outraged.

Nothing can replace these children. Nothing can compensate for their loss. But their importance is not diminished—indeed, their too short lives may be given meaning—if their deaths cause us to recognize that they are not the only children whose lives are lost. They are not the only children to be threatened.

It is human nature to repond to what we know, to what we see, to what is forced upon our consciousness. We hear no outrage over the children we do not see. We express no indignation over the children whose names are not eulogized on television and in the newspapers.

Every year, thousands of youngsters go to jail. Every year, thousands of teenagers die from homicide, alcohol, and drugs. Every year, babies die from freezing, or malnutrition, or lack of health care. Our children are in the streets, with no education, no recreation, no jobs. They are without supervision, while their parents work at jobs that pay too little, or cope with the despair of having no job at all. Many homes are cold and dark, and there is no food on the table. More parents than we want to know about live in dread that their child will not come home tonight.

These are our children. Our children are dying right here in Washington, D.C. They are dying in New York and Chicago, in Detroit and Kansas City, in Los Angeles and San Francisco.

It is not enough for us to set aside a few moments to remember the children of Atlanta. If we are sincere in our distress and concern, then this entire legislative session should be made a memorial to these innocent victims of abuse.

It is not just one mad individual who is killing our children. And I do not believe that cutting food stamps, school lunches, nutrition programs, educational funds, and job programs will cure the sickness of our Nation's soul. It is the sickness of which the Prophet Jeremiah spoke:

They know no bounds in deeds of wickedness;

They judge not with justice the cause of the fatherless, . . . and they do not defend the rights of the needy.

Shall I not punish them for these things? says the Lord, and shall I not avenge myself on a nation such as this?

We must decide whether to let our children live. If we cry, let us cry for all the lost children. Let us weep for ourselves.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. DYSON) to revise and extend their remarks and include extraneous material:)

Mr. GONZALEZ, for 15 minutes, today.
Mr. ANNUNZIO, for 5 minutes, today.
Mr. DYMALLY, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

The following Members (at the request of Mr. HARTNETT) and to include extraneous matter:

Mr. FINDLEY.
Mr. CHENEY.
Mr. DORNAN of California.
Mr. SHUMWAY.
Mr. MARLENEE.
Mr. MICHEL in two instances.

(The following Members (at the request of Mr. DYSON) and to include extraneous matter:)

Mr. SOLARZ in two instances.
Mr. YATRON.
Mr. ANDERSON in 10 instances.
Mr. GONZALEZ in 10 instances.
Mr. BROWN of California in 10 instances.
Mr. ANNUNZIO in six instances.
Mr. JONES of Tennessee in 10 instances.
Mr. BONER of Tennessee in five instances.
Mr. STOKES in three instances.
Mr. RANGEL.
Mr. ECKART.
Mr. MURTHA in three instances.
Mr. CORRADA.
Mrs. SCHROEDER in three instances.
Mr. MILLER of California in two instances.
Mr. MCDONALD.
Mr. WILLIAMS of Montana.
Mr. HAWKINS.

JOINT RESOLUTION PRESENTED TO THE PRESIDENT

Mr. HAWKINS, from the Committee on House Administration, reported that that committee did on April 2, 1981, present to the President, for his approval, a joint resolution of the House of the following title:

H.J. Res. 182. Joint resolution to designate April 26, 1981, as "National Recognition Day for Veterans of the Vietnam Era."

ADJOURNMENT

Mr. DYSON. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 12 o'clock and 25 minutes p.m.), the House adjourned until tomorrow, Tuesday, April 7, 1981, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1009. A letter from the Deputy Secretary of Agriculture, transmitting the final report on the agricultural research facilities study, pursuant to section 1462 of Public Law 95-113; to the Committee on Agriculture.

1010. A communication from the President of the United States, transmitting a request for an appropriation language change for fiscal year 1981 and budget amendments for fiscal year 1982 (H. Doc. No. 97-42); to the Committee on Appropriations and ordered to be printed.

1011. A letter from the Acting Assistant Secretary of Defense (Manpower, Reserve Affairs and Logistics), transmitting a report on the adequacy of pay and allowances of the Armed Forces, pursuant to 39 U.S.C. 1008(a); to the Committee on Armed Services.

1012. A letter from the Acting Assistant Secretary of Defense (Manpower, Reserve Affairs and Logistics), transmitting a report on the pay adjustment mechanism for military personnel, pursuant to section 802 of Public Law 96-342; to the Committee on Armed Services.

1013. A letter from the Acting General Counsel, Department of Defense, transmitting a draft of proposed legislation to amend title 37, United States Code, to provide to members of the Armed Forces a pay increase of 5.3 percent; to the Committee on Armed Services.

1014. A letter from the Chairman, Federal Financial Institutions Examination Council, transmitting the Council's 1980 annual report, pursuant to section 1006(f) of Public Law 95-630; to the Committee on Banking, Finance and Urban Affairs.

1015. A letter from the Secretary of Transportation, transmitting a report on the future of rail services in the Northeast, pursuant to section 703 of Public Law 96-448; to the Committee on Energy and Commerce.

1016. A letter from the Acting Administrator, Energy Information Administration, Department of Energy, transmitting volume 3 of the Administration's annual report for 1980, pursuant to section 57(a)(2) of the Federal Energy Administration Act of 1974, as amended; to the Committee on Energy and Commerce.

1017. A letter from the Secretary of State, transmitting a draft of proposed legislation to amend the Foreign Assistance Act of 1961 and the Arms Export Control Act to authorize development and security assistance programs for fiscal year 1982, and for other purposes; to the Committee on Foreign Affairs.

1018. A letter from the Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting copies of international agreements, other than treaties, entered

into by the United States, pursuant to 1 U.S.C. 112b(a); to the Committee on Foreign Affairs.

1019. A letter from the Secretary of the Interior, transmitting the annual report on Federal coal management for fiscal year 1980, pursuant to section 8B of the Mineral Lands Leasing Act, as amended; to the Committee on Interior and Insular Affairs.

1020. A letter from the Secretary of the Interior, transmitting a draft of proposed legislation to amend the Land and Water Conservation Act of 1965, as amended, and for other purposes; to the Committee on Interior and Insular Affairs.

1021. A letter from the Assistant Secretary of State for Congressional Relations, transmitting notice of the proposed transfer of certain property to the Republic of Panama, pursuant to section 1504(b) of Public Law 96-70; to the Committee on Merchant Marine and Fisheries.

1022. A letter from the Secretary of Commerce, transmitting a draft of proposed legislation to authorize appropriations for the fiscal years 1982 and 1983 for certain maritime programs of the Department of Commerce, and for other purposes; to the Committee on Merchant Marine and Fisheries.

1023. A letter from the Acting Assistant Secretary of the Army (Civil Works), transmitting a draft of proposed legislation to authorize the Secretary of the Army to undertake further engineering and design of water resources development projects upon transmittal of a report to Congress recommending implementation of such projects; to the Committee on Public Works and Transportation.

1024. A letter from the Acting Assistant Secretary of the Army (Civil Works), transmitting a draft of proposed legislation to amend the act approved August 8, 1972, Public Law 92-367 "To authorize the Secretary of the Army to maintain and update periodically the National Inventory of Dams"; to the Committee on Public Works and Transportation.

1025. A letter from the Chairman, Civil Aeronautics Board, transmitting a draft of proposed legislation to amend title IV of the Federal Aviation Act of 1958 and to eliminate unnecessary subsidy payments, and for other purposes; to the Committee on Public Works and Transportation.

1026. A letter from the Secretary of Health and Human Services, transmitting the fifth annual report on the child support enforcement program, pursuant to section 452(a)(10) of the Social Security Act; to the Committee on Ways and Means.

1027. A letter from the Chairman, International Trade Commission, transmitting the 25th quarterly report on trade between the United States and the nonmarket economy countries, pursuant to section 410 of Public Law 93-618; to the Committee on Ways and Means.

1028. A letter from the Secretary of Health and Human Services, transmitting a draft of proposed legislation to eliminate free medical care for merchant seamen, to permit closure of Public Health Service hospitals, and for other purposes; jointly, to the Committees on Energy and Commerce and Merchant Marine and Fisheries.

1029. A letter from the Acting Comptroller of the United States, transmitting a report on DOD's use of remotely piloted vehicle technology (MASAD-81-20, April 3, 1981); jointly, to the Committees on Government Operations and Armed Services.

1030. A letter from the Acting Comptroller of the United States, transmitting a report concerning selected Navy Department activities (AFMD-81-30, April 3, 1981); jointly, to the Committees on Government Operations and Armed Services.

1031. A letter from the Comptroller General of the United States, transmitting a report on Federal onshore oil and gas exploration and development (EMD-81-40, February 11, 1981); jointly, to the Committees on Government Operations and Interior and Insular Affairs.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BREAUX (for himself and Mr. FORSYTHE):

H.R. 3016. A bill to give permanent effect to the provisions of the Fishermen's Protective Act of 1967 relating to the reimbursement of U.S. commercial fishermen for certain losses incurred incident to the seizure of their vessels by foreign nations; to the Committee on Merchant Marine and Fisheries.

By Mr. FAZIO:

H.R. 3017. A bill to amend title 10 of the United States Code to allow the Secretary concerned to take into consideration various factors in determining the amount of space in military medical facilities programed for retired members of the uniformed services and their dependents; to the Committee on Armed Services.

By Mr. GONZALEZ (for himself, Mr. ST GERMAIN, Mr. FAUNTROY, Mr. PATTERSON, Mr. LAFALCE, Mr. BLANCHARD, Mr. LUNDINE, Ms. OAKAR, Mr. VENTO, Mr. GARCIA, Mr. LOWRY of Washington, Mr. MITCHELL of Maryland, Mr. D'AMOURS, Mr. SCHUMER, Mr. FRANK, and Mr. WILLIAM J. COYNE):

H.R. 3018. A bill to amend and extend certain Federal laws which establish housing and community and neighborhood development and preservation programs, and for other purposes; to the Committee on Banking, Finance, and Urban Affairs.

By Mr. HOWARD:

H.R. 3019. A bill to amend the Internal Revenue Code of 1954 to allow a refundable tax credit for amounts paid for increases in electricity under automatic fuel adjustment clauses as a result of the shutdown of nuclear power generating facilities; to the Committee on Ways and Means.

By Mr. JONES of Tennessee (for himself, Mr. DE LA GARZA, Mr. WAMPLER, and Mr. JEFFORDS):

H.R. 3020. A bill to insure necessary funds for the implementation of the Federal Crop Insurance Act of 1980; to the Committee on Agriculture.

By Mr. MARLENEE (for himself and Mr. WEAVER):

H.R. 3021. A bill to authorize the Secretary of Agriculture to convey certain national forest system lands, and for other purposes; jointly, to the Committees on Agriculture and Interior and Insular Affairs.

By Mr. MILLER of California (for himself and Mr. RICHMOND):

H.R. 3022. A bill to amend the Agricultural Adjustment Act to provide for consumer participation in the administration of marketing orders for agricultural commodities; to provide that certain procedures be applied by an agency making a rule or regulation in the administration of a marketing order; and for other purposes; to the Committee on Agriculture.

By Mr. PRICE (for himself and Mr. DICKINSON):

H.R. 3023. A bill to authorize appropriations to the Department of Energy for fiscal year 1982 for conservation, exploration, development, production, sale, and use of the naval petroleum reserves and naval oil shale reserves; to the Committee on Armed Services.

H.R. 3024. A bill to amend section 7227 of title 10, United States Code, to provide for the furnishing of routine port services at no cost to naval vessels of a friendly foreign country when, by agreement or custom, such services are provided reciprocally to visiting naval vessels of the United States; to the Committee on Armed Services.

By Mr. RAHALL:

H.R. 3025. A bill to amend the Railroad Retirement Act of 1974 to double the amount of earnings permitted to persons receiving disability annuities; to the Committee on Energy and Commerce.

By Mr. RINALDO:

H.R. 3026. A bill to amend the Federal Rules of Criminal Procedure and the Federal Rules of Appellate Procedure to provide for postconviction proceedings in certain criminal cases; to the Committee on the Judiciary.

H.R. 3027. A bill to amend the Immigration and Nationality Act to authorize certain courts which have naturalization jurisdiction to retain up to $20,000 of the fees collected in naturalization proceedings held in such courts in any fiscal year; to the Committee on the Judiciary.

H.R. 3028. A bill to amend title 38, United States Code, to require that home and mobile home loans may not be guaranteed by the Administrator of Veterans' Affairs unless an approved smoke detector has been installed in the residential structure involved; to the Committee on Veterans' Affairs.

H.R. 3029. A bill to amend the Internal Revenue Code of 1954 to increase to $500 the dividends which may be excluded from the gross income of an individual; to the Committee on Ways and Means.

H.R. 3030. A bill to amend the Internal Revenue Code of 1954 to treat certain charges for waste treatment services as deductible State or local taxes; to the Committee on Ways and Means.

H.R. 3031. A bill to prevent the retroactive assessment of certain deficiencies in the case of employees of the Panama Canal Zone Government or of the Panama Canal Company; to the Committee on Ways and Means.

H.R. 3032. A bill to amend title II of the Social Security Act so as to remove the limitation upon the amount of outside income which an individual may earn while receiving benefits thereunder; to the Committee on Ways and Means.

H.R. 3033. A bill to amend the Tariff Schedules of the United States by repealing item 807.00 relating to certain articles assembled abroad from fabricated components which are products of the United States; to the Committee on Ways and Means.

H.R. 3034. A bill to amend the Internal Revenue Code of 1954 and title II of the Social Security Act to provide a full exemption (through credit or refund) from the employees' tax under the Federal Insurance Contributions Act, and an equivalent reduction in the self-employment tax, in the case

of individuals who have attained age 65; to the Committee on Ways and Means.

H.R. 3035. A bill to amend the Internal Revenue Code of 1954 to exclude each year $10,000 of pensions and annuities from the gross income of individuals who have attained age 65; to the Committee on Ways and Means.

H.R. 3036. A bill to amend the Internal Revenue Code of 1954 to provide individuals a refundable credit against income tax for maintaining a household a member of which is an individual who has attained the age of 65; to the Committee on Ways and Means.

H.R. 3037. A bill to amend the Trade Act of 1974 to make certain changes in procedures applicable to Presidential actions to provide relief to U.S. industries from injuries caused by import competition, and for other purposes; to the Committee on Ways and Means.

H.R. 3038. A bill to protect the interest of consumers and provide information to consumers regarding the effective use of smoke detectors through the establishment of smoke detector placement demonstration projects, to require the Consumer Product Safety Commission to take into account the results of such projects in connection with the promulgation of certain consumer product safety standards, and for other purposes; jointly, to the Committees on Energy and Commerce and Science and Technology.

H.R. 3039. A bill to amend chapter 73 of title 10, United States Code, to provide that a former spouse of a member of the uniformed services who is married to such member for 10 years or more shall be entitled to a portion of such member's retired pay and to a portion of the annuity of any surviving spouse of such member, and for other purposes; to the Committee on Armed Services.

H.R. 3040. A bill to provide that a former spouse of a Federal employee who is married to such employee for 10 years or more shall be entitled to a portion of such employee's annuity and to a portion of the annuity of any surviving spouse of such employee, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. WILLIAMS of Montana:

H.R. 3041. A bill to amend the Gun Control Act of 1968 and the Omnibus Crime Control and Safe Streets Act of 1968 to improve the administration of Federal firearm laws, and for other purposes; jointly, to the Committees on the Judiciary and Rules.

By Mr. NEAL:

H. Con. Res. 105. Concurrent resolution expressing the sense of the Congress that women should not be subject to registration, or involuntary induction, under the Military Selective Service Act; to the Committee on Armed Services.

By Mr. RODINO:

H. Con. Res. 106. Concurrent resolution to provide for the printing of the brochure entitled "How Our Laws Are Made"; to the Committee on House Administration.

H. Con. Res. 107. Concurrent resolution to provide for the revised printing of the House document entitled, "The Constitution of the United States of America, as amended"; to the Committee on House Administration.

H. Con. Res. 108. Concurrent resolution to provide for the printing of the publication entitled, "U.S. Immigration Policy and the National Interest"; to the Committee on House Administration.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

32. By the SPEAKER: A memorial of the House of Representatives, Commonwealth of Pennsylvania, relative to Poland; to the Committee on Foreign Affairs.

33. Also, memorial of the Legislature of the State of Alaska, relative to honoring military personnel still listed as missing from the Vietnam war at the Tomb of the Unknown Soldier; to the Committee on Veterans' Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. FAZIO:

H.R. 3042. A bill for the relief of Edmundo Jose Alagao; to the Committee on the Judiciary.

By Mr. NEAL:

H.R. 3043. A bill for the relief of Elinor R. Chandler; to the Committee on the Judiciary.

By Mr. SOLOMON:

H. Res. 123. Resolution to commend Agents McCarthy and Parr and Officer Delahanty for their unselfish courage and patriotism during the recent attempt on the life of the President of the United States; to the Committee on Post Office and Civil Service.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 27: Mr. NELLIGAN, Mr. RINALDO, Mr. ROEMER, and Mr. SENSENBRENNER.

H.R. 44: Mr. FRANK.

H.R. 151: Mr. CONYERS.

H.R. 644: Mr. DAVIS and Mr. WOLF.

H.R. 911: Mr. SMITH of Alabama, Mr. CAMPBELL, and Mr. WHITEHURST.

H.R. 1005: Mr. ATKINSON.

H.R. 1034: Mr. CORCORAN.

H.R. 1100: Mr. SIMON.

H.R. 1133: Mr. BAILEY of Pennsylvania, Mr. BEVILL, Mr. COLLINS of Texas, Mr. DENARDIS, Mr. DERWINSKI, Mr. GINGRICH, Mr. GRADISON, Mr. HUTTO, MR. LAGOMARSINO, Mr. LOTT, Mr. MINISH, Mr. MOTTL, Mr. PAUL, Mr. PETRI, Mr. ROE, Mr. SOLOMON, Mr. SPENCE, and Mr. WILLIAMS of Ohio.

H.R. 1206: Mr. CORCORAN, Mr DAVIS, and Mr. EDWARDS of Oklahoma.

H.R. 1207: Mr. EDWARDS of Oklahoma and Mr. DAVIS.

H.R. 1353: Mr. MINETA, Mr. STARK, Mr. ROE, Mr. LEE, Mr. PRICE, and Mr. MAZZOLI.

H.R. 1540: Mr. DICKINSON.

H.R. 1603: Mr. EVANS of Iowa, Mr. HOWARD, Mr. GREGG, Mr. CHENEY, Mr. MOORE, Mr. LEWIS, Mr. MCCOLLUM, Mr. STANGELAND, Mr. TAUZIN, Mr. HUGHES, Mr. CHAPPELL, Mr. BEARD, Mr. RUDD, and Mr. WEBER of Minnesota.

H.R. 1643: Mr. BAILEY of Missouri, Mr. SHELBY, Mr. O'BRIEN, Mr. WILSON, Mr. FORSYTHE, Mr. WON PAT, Mr. KINDNESS, Mr. MONTGOMERY, Mr. PARRIS, Mr. WALKER, Mr. DANNEMEYER, and Mr. BROWN of Ohio.

H.R. 1711: Mr. MCCLOSKEY.

H.R. 1918: Mr. SKEEN.

H.R. 2156: Mr. BONER of Tennessee and Mr. DUNN.

H.R. 2163: Mr. BAILEY of Missouri, Mr. SMITH of Alabama, Mr. PASHAYAN, Mr. JEFFRIES, Mr. LENT, Mr. HILER, Mr. DAUB, Mr. COLEMAN, Mr. HARTNETT, and Mr. CAMPBELL.

H.R. 2385: Mr. LUKEN, Mr. WOLPE, Mr. LEHMAN, and Mr. MILLER of California.

H.R. 2431: Mr. WEBER of Minnesota, Mr. PANETTA, Mr. CHAPPIE, Mrs. SCHNEIDER, Mr. GILMAN, Mr. ROE, and Mr. GUARINI.

H.R. 2456: Mr. GUYER, Mr. SHUMWAY, Mr. PEPPER, Mr. LOTT, Mr. LIVINGSTON, Mr. WORTLEY, Mr. BAFALIS, Mr. COLLINS of Texas, Mr. LOWERY of California, Mr. HALL of Ohio, Mr. FIELDS, and Mr. MCKINNEY.

H.R. 2805: Mr. ENGLISH, Mr. DANIEL B. CRANE, Mr. FORSYTHE, and Mr. LEBOUTILLIER.

H.J. Res. 202: Mrs. SMITH of Nebraska, Mr. HORTON, Mr. CRAIG, Mr. GRISHAM, and Mr. LEBOUTILLIER.

H. Con. Res. 50: Mr. GILMAN and Mr. LANTOS.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

46. By the SPEAKER: Petition of the Legislature of Erie County, N.Y., relative to local content requirements for domestic automobile sales; to the Committee on Energy and Commerce.

47. Also petition of the Mid-South Health Professional Association, Memphis, Tenn., relative to proposed budget cuts for health and social services programs; to the Committee on Energy and Commerce.

48. Also, petition of the administrative staff of the Memphis (Tenn.) Health Center, Inc., relative to funding for community health centers and related health programs; to the Committee on Energy and Commerce.

49. Also, petition of the Board of Chosen Freeholders, Burlington County, N.J., relative to construction of a Veterans' Administration hospital at Camden, N.J.; to the Committee on Veterans' Affairs.

50. Also, petition of the National Association of State Departments of Agriculture, Las Cruces, N. Mex., relative to quotas on import of casein; to the Committee on Ways and Means.

51. Also, petition of the Legislature of Erie County, N.Y., relative to the use of regional instead of national standards in the Federal-State extended unemployment compensation program; to the Committee on Ways and Means.

EXTENSIONS OF REMARKS

H.R. 2606—THE NEED FOR WATER PRICING REFORM

HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 6, 1981

● Mr. MILLER of California. Mr. Speaker, last week I introduced the Water Pricing Reform Act which would eliminate many of the excessive and counterproductive subsidies in the Federal water program which encourage inefficient uses of our dwindling water resources.

There is general consensus among every dispassionate observer that such reforms are long overdue. If realistic pricing can be justified to promote conservation of energy, we certainly should apply that lesson to water which is developed at tremendous cost to the taxpayer.

Many business analysts share this view. In the February 23, 1981, issue of Fortune magazine, Julia Vitullo-Martin has written a comprehensive essay on the need for water pricing reform very similar to that which I have proposed in H.R. 2606. I suggest that my colleagues read this important article.

The article follows:

ENDING THE SOUTHWEST'S WATER BINGE—FEARS TO THE CONTRARY, THERE'S NO REAL SHORTAGE YET—AND WON'T BE IF THE PRICE OF WATER IS ALLOWED TO SEEK ITS OWN LEVEL

(By Julia Vitullo-Martin)

To most Americans the semiarid and desert regions of the Southwest evoke sharply contrasting images—the old one of cowboys roaming the dusty terrain in search of waterholes, and the more recent one of verdant new communities whose growth is dizzying even by Sunbelt standards. The whole region, which stretches from western Texas to the southern California coast, seems a threatened paradise, with agriculture, industry, and urbanization fast approaching the limits dictated by scant rainfall.

The statistics sound scary. Arizona claims that its supply of water already falls short of its needs by 2.3 million acre-feet a year; an acre-foot of water, or 326,000 gallons, is enough to cover an acre to a depth of one foot. California is said to have a shortage of three million acre-feet, and West Texas four million.

Yet profligate waste goes on amid all the water worries: gardeners in Beverly Hills hosed down sidewalks during the 1978 drought; farmers routinely use irrigation water far more lavishly than they really need to; desert developments like Arizona's Fountain Hills feature enormous fountains—in this case the world's largest, shooting water skyward at 7,000 gallons a minute. Arizona, the second-fastest-growing state in the country with an estimated population jump of 53% during the Seventies, ranks eighth in the nation in per capita water use.

BILLIONS FOR DAMS

The waste goes on because the Southwest's water is underpriced. As Fortune said of the entire country 15 years ago ("Water Shortage Is a Frame of Mind," April 1965), the Southwest is not running out of water—it's running low on cheap water. The region's problems differ from those of large parts of the Northeast and Midwest currently suffering water shortages; these are a temporary affliction caused by subnormal rainfall in parts of the country that usually get more than they need. In the Southwest, limited rainfall is a permanent condition. But subsidies—mainly from the federal government, which has spent tens of billions on dams and canals—have kept the price artificially low. Because water is priced far below its replacement cost—the cost of providing additional supplies—it is being squandered.

The Southwest's reaction to its artifical water shortage is to cry out for even more federal spending, on projects ranging from the one-third-completed, $2.2-billion Central Arizona Project to a $26-billion dream of bringing water from the Mississippi to western Texas. The proposed budget for fiscal 1982 that the Reagan Administration inherited contains at least $1 billion for western water projects—and gives the new President an opportunity to show he is serious about cutting federal spending. The same opportunity was bungled by Jimmy Carter, who in the early days of his administration made a "hit list" of water projects, a lot of them in the West, and then bowed to political pressure and allowed many of them to go ahead.

NEEDED: A WATER MARKET

New projects could be avoided for years if the price of water were allowed to move toward its replacement cost, which is 50 times what some farmers are currently paying. This would happen if all users whose water supplies exceed their needs were allowed to sell to those who don't have enough. Amazingly, the buying and selling of water is restricted in most of the region, and this encourages those with a surplus to use it wantonly.

The reform of water pricing would cause widespread economic dislocation in the short run as marginal farms and other enterprises closed, profitable farms were forced to shift crops, mines were revamped to conserve more of the water they use, and homeowners pondered their gardens, swimming pools, and way of life. But these changes, many of the region's economists argue, would not halt the Southwest's growth, nor would they cause general hardship. Instead, the Southwest would begin to use water more intelligently, as it eventually must, and the rest of the country would stop underwriting its development.

Water subsidies take several forms in the Southwest, depending on where the water comes from. Wells are generally the preferred source, since groundwater is often right under the user's land and there for the taking. In this case there is no direct subsidy at all, unless the landowner's pumps run on subsidized electricity. The other source is surface water from streams, rivers, lakes, and reservoirs, most of which is subsidized directly and heavily. Some surface-water projects are financed by state governments. But the most important projects—with the most generous subsidies—are federal.

Federal water, like energy before the OPEC price explosion of 1973, is priced far below its replacement cost. Water from new federal projects would cost at least $160 an acre-foot if the price covered construction of dams and canals at today's inflated costs, plus the operation and maintenance of these facilities. But few agricultural users of federal water pay anything remotely as high. Farmers in California's Central Valley pay only $3.50 an acre-foot.

NOT A PENNY FOR INTEREST

One obvious reason is that most of the water comes from projects built years ago, at a fraction of today's costs, by the Water and Power Resources Service (WPRS), the federal agency concerned with western water supplies. But that's far from the whole story. By law, the fees collected by the WPRS, formerly called the Bureau of Reclamation, cover only costs defined as "reimbursable." Under this formula users repay some of the funds advanced to build the projects, but not all. Nor does Washington get a penny of interest on construction funds used in irrigation projects—quite an omission in a time of high interest rates.

The fees do not even cover the government's operating and maintenance costs. Many projects are designed to control floods as well as to supply water, and the law bars WPRS from charging users—even farmers in a flood plain—for any part of a project attributable to flood control. Finally, irrigation water is priced according to the ability of farmers in each area to pay. Small wonder, then, that many federal projects aren't taking in enough to cover even their narrowly defined reimbursable costs. California's Central Valley Project loses $79,000 a day.

The full extent of the federal water bonanza will never be known, since the figures are buried in various parts of the budget, but it is undoubtedly huge. According to the Department of the Interior, the federal subsidy is worth about $1,500 per acre in California's giant Westlands district, or $3.4 million for a typical 2,200-acre farm. In the Central Valley, the subsidy is worth $1,100 per acre, or $2.7 billion for the entire area.

At the turn of the century, when Congress passed the Reclamation Act, it made sense for the rest of the country to help underwrite development in the Southwest. The region couldn't be opened up without water, and few private groups had the capital to finance projects themselves. But as the recent economic growth suggests, the region no longer needs favored treatment. Subsidies, moreover, are a needless drain on the federal government when it is running huge deficits. And underpriced water, whether from federal projects or any other source, is bad for the Southwest.

DRIP, NOT DITCH

Because water is so cheap, its use is based on its price and not its supposed scarcity. Many farmers, for example, use inferior land to grow low-value crops that require

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

large amounts of water, like alfalfa and sorghum. Similarly, many farmers use cheap, open-ditch systems of irrigation, which use almost six times as much water as the more expensive sprinkler systems, and 100 times as much as drip irrigation, which allocates controlled amounts of water to each plant. The General Accounting Office concluded in a 1976 study that more than 50% of all the country's irrigation water is wasted.

Water-saving irrigation systems require a relatively large capital investment—roughly $1,000 per acre for drip systems—but in the long run, farmers can come out ahead by increasing their yield per acre-foot of water or growing higher-value crops. So long as water is cheap, however, many farmers see little reason to make the switch. As a result, the Southwest's farm economy as a whole is producing less food than it might, and less wealth. The Rand Corp. estimated in 1978 that California alone was losing between $60 million and $370 million annually from the inefficient use of water.

Farmers are not the only careless users of water. The Los Angeles region today bothers to clean up only 60,000 acre-feet a year of its 550,000 acre-feet of potentially reusable wastewater, while insisting that the state build a $1-billion canal to bring south another 600,000 acre-feet from the northern part of the state. Even state governments were wasteful. About a fourth of the 1.2 million acre-feet of the water sent west each year in California's unlined and uncovered Coachella Canal is lost; it seeps into the ground or evaporates.

The West's extravagant use of water has also reduced water quality to the point that some farmland—including land in California's San Joaquin Delta, one of the most productive agricultural regions in the country—is being poisoned by waterborne salts. State and federal projects take so much fresh water from the delta to send south that its water table has been dropping, permitting ocean water to move farther into the water table from San Francisco Bay. Similarly, the naturally saline Colorado River is so overused by the time it leaves the Southwest and enters Mexico that its water is highly salty—too salty for agricultural use, says Mexico.

GRANDFATHERING THE RIGHTS

If the Southwest is to avoid a true water shortage from which it might never recover, the waste will have to stop. The way to stop it, as with any limited commodity, is to introduce the discipline of the marketplace.

It is impossible to create a market for water as efficient as the market for pork bellies or Seventh Avenue dresses. For one thing, it would be politically difficult if not illegal to sweep away the great patchwork of water rights granted over the years to farmers, cities, industry, and political jurisdictions. These rights, which in many cases still have decades to run and involve prices ludicrously below replacement costs, would have to be "grandfathered." The only exception might be water from sources that are "overappropriated," most notably the Colorado River. The total claims on this river's water, though never fully exercised, exceed the total flow into the Southwest by at least two million acre-feet and therefore may someday have to be cut across the board.

Within a context of grandfathered water rights, many of the blessings of the law of supply and demand could be realized. Any user who had too much water, or excess water rights, would be permitted without restriction or red tape to sell to those who need water. Sellers could demand whatever the traffic would bear, even though they might reap enormous windfall profits during the remaining years of their water rights. A political uproar might result, but the advantage would outweigh any flagrant profiteering as well as the widespread litigation the new system might cause. This is because the newly traded water, its price moving toward replacement cost, would be used carefully.

Since a new conservation ethic would take hold, it would be possible to take another step: to impose a temporary moratorium on all new government water projects, state or federal. Not until genuine scarcities loomed would any additional new dams and aqueducts be built, and only if users were charged water fees that fully reimbursed the public treasury.

PROTECTING THE COMMON SUPPLY

The new system would have one untidy but unavoidable complication: it would have to include strict regulation of groundwater usage. Under relatively free-market conditions, farmers and other users would have a stronger incentive to use this water, which is often the cheapest available. But if they pumped more than before, they would be taking more from the common supply. And because ground and surface water are interconnected—surface water has a tendency to move to replace depleted groundwater—anyone who pumped out groundwater might in effect be taking neighbors' surface water.

Even today users in arid areas are pumping out more groundwater than nature replenishes. If a farmer's electric power costs are low, he may pay as little as $3 per acre-foot to tap the stuff in an area with a high water table. In depleted areas, like those north of Tucson, his costs can be high—about $45 per acre-foot—as he drills down 700 feet or more to find his water. But even that is cheap compared with what new surface water might cost in a free market.

Any reform of water pricing, therefore, would have to be accompanied by some kind of restraint to keep users from depleting the common groundwater. The water table is falling in at least some sections of all western states. Pima, the county around Tucson that relies entirely on wells, is pumping groundwater five times as fast as nature replenishes it. The Ogalala Aquifer—one of the country's largest underground resevoirs, extending 160,000 square miles under eight states—gets recharged hardly at all. West Texans, who are heavy users, are "mining" its water at the rate of four million to six million acre-feet a year.

Some economists, including William Martin at the University of Arizona, see nothing wrong with using water faster than nature replenishes it. "There's no reason to avoid mining water any more than we avoid mining coal, or copper, or any depletable resource," says Martin. "Economically, resources do us no good just lodging in the ground."

Nevertheless, depletion can and should be restricted. This can be done by limiting the amount of water each landowner can lift, much as England limits grazing on common pasturelands. The English are very specific about how many cows can be grazed on which commons, and violators are subject to prosecution. Similarly, a landowner would be restricted to pumping so many acre-feet per year from the groundwater basin beneath his property. The restrictions would be enforced just as they are now; a landowner would complain to the state if he thought a neighbor was taking more than his share. But because the temptation would be greater, the enforcers could expect to be a lot busier.

A PERMIT FROM STEVE REYNOLDS

Water markets already exist to a limited extent in the Southwest, although transfers tend to be expensive and subject to red tape. One of the best systems operates in New Mexico, which permits the buying and selling of ground- and surface-water rights among holders in basins containing 90% of the state's water.

Anyone wishing to buy or sell water need only apply for a permit from state engineeer Steve Reynolds and show that the transfer will not impair a third party. Once granted a permit, he can buy and sell his water rights as he wishes. When the market became active two decades ago, marginal farms began to sell water to municipalities, and in recent years even profitable farms have been selling to industry. Copper mines in western New Mexico have bought up 75% to 90% of the water, paying up to $3,000 an acre-foot for rights that cost only $50 to $70 an acre-foot in the 1950s.

But there's a hitch in New Mexico's market system and those of most other states: it's difficult to sell off what economists call the "conserved surplus"—the water left over when a farmer or any other user manages to use less water than before. Frequently he does this simply by eliminating waste that, if proven, would have been subject to criminal penalties. Under law, the "conserved surplus" is supposed to be forfeited so others can use it, and not sold.

Fortunately, "conserved surplus" has a narrow definition, and means water saved without any change in the way the land is used. New Mexico farmers can easily sell water—and avoid a run-in with Reynolds—by putting the land to a different use, or even by growing another crop. If they stick to the same crops, however, thay cannot sell any of the water they save unless they are prepared to go through the cumbersome process of proving they were not wasting it in the first place. The practical effect is that even in New Mexico, farmers who want to go on producing the same crops have insufficent incentive to conserve.

AN OBVIOUS BUYER

Most economists who push for a free market want to permit users to sell any water they have, conserved surplus and all. Richard Howitt, an economist at the University of California at Davis, suggests that if all California farmers were able to sell the water they didn't need, enough water might be freed up to eliminate the need for more government water projects, at least in the near future. "No one knows," he says, "what farmers would do if they were given clear title to their water and permitted to sell it. But suppose the farmers of the Imperial Valley wanted to sell some of their water—say 300,000 acre-feet. An obvious buyer would be the Metropolitan Water District of Southern California, which has the system in place for transporting the water cheaply. The farmers would make a profit, and the water district would get more water."

The Southwest's farmers, mining companies, and even city dwellers tend to dread any proposals for ending the era of cheap water, fearing a crippled or distorted economy. Such fears are unfounded or exaggerated. City dwellers have the least to worry about, since the average household uses only one acre-foot of water a year. Were the price of water for residential users in Los Angeles to rise, say, 2½ times from its

present $225 an acre-foot, the average monthly water bill would be $47. That's almost twice what homeowners using the same amount of water would pay in eastern cities, but hardly out of line considering the enormous cost of bringing water long distances in the West.

TOO GOOD TO THROW AWAY

Economist Lee Brown of the University of New Mexico argues the full market pricing would induce more southwestern cities to treat waste water, which can then be used for most purposes other than drinking or swimming. "We'll get reclaimed water," says Brown, "when scarcity is properly reflected in a market signal." Albuquerque has seen no such signal and continues to throw away its used water. Lubbock, Texas, which sits atop the rapidly depleting Ogallala Aquifer, reclaims every drop it can—about 58 acre-feet a day. In California's Orange County, where the groundwater table has also been falling and ocean water has begun to displace it, a local water district is spending no less than $196 an acre-foot to reclaim waste water, which is then pumped into the ground to hold back the intruding ocean water.

The Southwest's mines require tremendous amounts of water: 25 gallons to produce a pound of copper. Even water at $160 an acre-foot, however, would not put the mining industry out of business. Some companies have already been forced to buy land at up to $2,500 an acre just for the groundwater, and then must pay pumping and delivery costs of $40 to $80 per acre-foot to lift it. Furthermore, mines have the technology to reuse about 30% of their water, and higher prices would induce them to recycle even more than they do now.

But what about agriculture, which uses about 90% of the West's water? Most experts doubt that calamity is in the cards. The University of Arizona's Martin says that without additional water at subsidized prices, 25% of Arizona's acreage would go out of production. But by his estimate, the net value of the farm crop would fall only 12%.

THE HAND ON THE SPIGOTS

There may be less time for facing up to the Southwest's water problems than is commonly realized. Just to the north, in the states that lie upstream on the Colorado, water usage is rising. The rise could turn into a surge if a lot of share-oil plants, which consume tremendous quantities of water, get built. If this happens, upstream "donor" states will claim more Colorado River water than they have to date. It is only because of the nonexercise of these claims that the Southwest has been spared a shortage under the present wasteful pricing system.

Even before those shale-oil plants begin to appear to the north, Ronald Reagan may show his hand on water policy in ways that the Southwest may not like. If Reagan's policies in his Sacramento days are any guide, he will finish up construction projects already under way but initiate no new ones. When he was stumping California as a candidate, Reagan applauded water projects, but while he was governor not a single new dam or aqueduct was started. Since Governor Reagan turned down the water spigots, there's no reason to believe that President Reagan will keep them wide open.●

REAUTHORIZATION OF SECTION 7 OF THE FISHERMEN'S PROTECTIVE ACT OF 1967

HON. JOHN B. BREAUX

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 6, 1981

● Mr. BREAUX. Mr. Speaker, I am introducing today a bill to extend section 7 of the Fishermen's Protective Act of 1967. That provision of law assures the continued viability of our distant-water fishing fleets in the face of persistent threats of illegal seizure by foreign nations. Under section 7, an insurance program provides for the reimbursement of certain losses suffered by U.S. flag commercial fishermen as a result of such seizures.

That distant-water tuna and shrimp fleets of the United States make an important contribution to our national economy. The Congress and the executive recognized that fact when they enacted the Fishermen's Protective Act in 1954. By several extensions of the act, the Federal Government reaffirmed its commitment to these vital sectors of our fishing industry.

This bill would extend section 7 of the act. A failure to continue the insurance program beyond its current October 1, 1981, expiring date would certainly result in the loss of our distant-water fleets to nations which would offer essential financial security.●

CATHOLICS AND EL SALVADOR

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 6, 1981

● Mr. DORNAN of California. Mr. Speaker, during the past few weeks, there has been a chorus of indignation on the part of certain members of the American Catholic hierarchy regarding the Reagan administration's foreign policy position on El Salvador. Criticism of the Duarte government has been sustained, vociferous, and often vitriolic. At the same time, the silence surrounding the activities of the leftist Marxist guerrillas has been deafening. Virtually ignored have been the remarks of Salvadoran Archbishop Arturo Rivera y Damas regarding the Marxists:

The left has lost support because the people saw that they were more interested in obtaining power than in fulfilling hope for the people.

Also ignored have been the observations, critical of the Marxists, of former Archbishop Oscar Romero:

When I returned from Rome in April [1979], I found their bombs in the cathedral. Our popular groups had been taken over by the far left. They want the Church to support everything, not only justice but all their strategies.

Why this selective indignation on the part of certain members of the American Catholic hierarchy which is in stark contradiction to the views of the Salvadoran hierarchy? A recent article, March 31, 1981, in the Washington Star by syndicated columnist Georgie Anne Geyer should shed considerable light on this entire controversy and is worthy of close attention by all Members of Congress as well as the Catholic hierarchy. I would like to submit G. A. Geyer's hard-hitting essay for the RECORD:

[From the Washington Star, Mar. 31,1981]

AMERICAN CATHOLICS ARE BEING USED ON EL SALVADOR

(By Georgie Anne Geyer)

Salvadoran Archbishop Arturo Rivera y Damas, whose own reformist credentials are impeccable, said last week: "The left has lost support because the people saw they were more interested in obtaining power than in fulfilling . . . hope for the people."

The president of the temporary government, Napoleon Duarte, is the most prominent and respected Catholic in the country and founder of the Christian Democrat Party. He is fighting to hold things together until elections in 1982.

Figures just out on the first year of his government's massive land reform show not only that it is working but that production has even remained stable in this turbulent year.

And yet—and yet—this last week has seen demonstrations throughout the United States unprecedented since the Vietnam War. They were waged largely by Roman Catholics, and they were all against Rivera, Duarte and the land reforms.

Perhaps most ironically, they were mourning the first anniversay of the assassination of Archbishop Oscar Romero, who was murdered in his chapel, probably by the far right. They were doing all this in his name.

But how many of the mourners and the manipulative activists actually knew Romero, a man I revered, or know the endless, dangerous and unique complexities of Salvadoran politics and society?

FAR LEFT TAKES OVER

When I interviewed Romero in August 1979, for instance, he was bitterly critical of the Marxists. "When I returned from Rome in April, I found their bombs in the cathedral," he said. "Our popular groups had been taken over by the far left. They want the church to support everything, not only justice but all their strategies."

He was equally critical of—and determined to make a change in—the "theology of liberation," which reached its quintessence in El Salvador and which in effect, makes Christianity and Marxism almost interchangeable.

"If 'liberation' is only temporal, that is not complete," the archbishop commented. "I've always said that such a 'liberation' is not Christian. It must be total—social, yes, but eternal and transcendent."

It is true that Romero hated the far right, which is as much the author of the bloody carnage in El Salvador as the left. Only a month before his death, he wrote a now famous letter to the American bishops begging them to fight against American military aid to the right. But what people are

not remembering is that he was a balanced man of the humane center and was against both extremes.

His relationship with the American church is one reason for the little less than extraordinary reaction by American Catholics last week. The terrible murders of the four American Catholic women in El Salvador, probably also by the right, is another. As one church leader described the effect of the murders here, "The death of the four became the symbol of thousands and thousands of dead there that you never heard about."

At the same time, El Salvador is the first test of "reverse missions," the church's policy, developed during the last five to six years, of feeding back to home countries information about the peoples and countries where it has missions.

CONTROL THE MILITARY

Now, there is no question that the savage military in Salvador has to be changed or destroyed—that there must be elections, that this slaughter of the innocents must end. But is the activist Catholic position a wise one? The answer to that may lie in these questions:

Why are virtually none of the activist American Catholics supporting the archbishop there? President Duarte? The Christian Democrats? By ignoring and disparaging the Catholic leadership in El Salvador, are the Americans really supporting what the people there want?

Why are the Catholic missionaries and other American church leaders not supporting land reform? Why indeed do many of them belong to the American protest group, the Committee in Solidarity With the People of El Salvador, that has as its No. 1 priority the dismantling of the land reform? Could it not be that the church people are accepting the word and position of the far left, which wants to destroy all other organizations so that it can preside?

MARXIST CLERGY

Are they willing to recognize the fact, as the Vatican certainly has, that there are many clergy there, in particular many European Jesuits, who frankly describe themselves as "Christian-Marxists" of various incarnations? Do they, in effect, know what confused messages they are responding so tumultuously to?

Many Catholic activists say they want political participation for the people of El Salvador as well as economic participation, yet they are less than entirely moral when they refuse to take the hard responsibility for the structure of that participation. Many of them, to put it bluntly, are being used.●

CONVEYANCE OF FOREST SERVICE LANDS

HON. RON MARLENEE

OF MONTANA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 6, 1981

● Mr. MARLENEE. Mr. Speaker, today my colleague from Oregon, Mr. WEAVER, and I introduced legislation that will permit the Forest Service to convey, by quitclaim deed, certain small parcels of national forest system land which cannot be practicably disposed of in any other manner. Lands which may be disposed of are: First, road right-of-way which are no longer needed by the United States; second, parcels of 5 acres or less which were innocently encroached upon by persons who relied in good faith on erroneous surveys; and third, parcels of 40 acres or less, but worth less than $150,000, that are interspersed with, or adjacent to, mineral patents.

Upon creation of the national forests, the Forest Service came to administer lands which are scattered and of little or no practical use for national forest system purposes. The Forest Service estimates they hold 200,000 tracts of land of which the size, shape, and/or location make them difficult to administer.

For example, many mineral patents are no longer held for their mineral value, and the land is now supporting ranches, power sites, industrial plants, and vacation homesites. Intermingled with these sites are unpatented public lands of varying shape and size owned by the Forest Service and acquired upon creation of the national forests. Such lands are of little benefit to the Forest Service.

Another example showing the need for this legislation are the 50,000 title claim cases existing on national forest lands. Such cases arise when persons acquire land through innocent occupancy or good faith trespass and a subsequent survey finds these lands overlap Forest Service property. Oftentimes such claims are of an acre or less in nature and were the result of improper line survey or an error in the title or land description. At present, such cases must be resolved through long and cumbersome administrative procedures or by Congress. The proposed legislation would provide for an orderly transfer of title on such properties.

Similar legislation was introduced last Congress by the gentleman from Oregon (Mr. WEAVER) and had the full support of the Forest Service. Although the legislation easily passed both the House and Senate, it was vetoed by the President due to an amendment added by the Senate in the closing hours of the 96th Congress. The amendment did not relate to the transfer of land by the Forest Service, but rather related to operations of the Alaska Railroad.

Let me assure my colleagues that the proposed legislation is not a land giveaway. Nor will such land transfers adversely impact upon the national forest system. The legislation assures that only small land parcels may be transfered and does not permit the Secretary of Agriculture to convey any lands within the National Wilderness Preservation System.

Mr. Speaker, this legislation is straightforward and has a wide base of support, and we urge our colleagues to join us in cosponsorship.●

BASING OF MX MISSILE

HON. DICK CHENEY

OF WYOMING

IN THE HOUSE OF REPRESENTATIVES

Monday, April 6, 1981

● Mr. CHENEY. Mr. Speaker, a recent New York Times article describing the preliminary Office of Technology Assessment report on the various basing modes for the MX missile neglected to fully address the thrust and conclusions of the OTA study. Dr. Peter Sharfman, of the OTA, has written the Times to correct any misunderstanding which might emerge as a result of this article. I offer both the Times article and Dr. Sharfman's letter for the benefit of my colleagues:

[From the New York Times, Mar. 11, 1981]

STUDY FOR CONGRESS BACKS BASING MX MISSILES ABOARD SUBMARINES

(By Richard Halloran)

WASHINGTON, March 10.—A Congressional assessment of the MX missile asserted today that the current plan to base it on land would leave it vulnerable to Soviet attack and suggested instead that the missile be put aboard small submarines.

A long-awaited report by the Office of Technology Assessment said that the Air Force's plan to scatter 200 of the intercontinental nuclear missiles among 4,600 concrete shelters across Utah and Nevada would severely disrupt life there.

The analysis, which was presented to the House Subcommittee on Public Lands, also asserted that the present basing plan would cause large-scale harm to the environment and to economic ventures in those states.

LIKELIHOOD OF SURVIVAL

On the other hand, the study said that putting the missiles aboard small submarines was technically feasible and would make the missiles highly likely to survive a Soviet attack. It contended that the missiles could retain their accuracy if fired from submarines and that the cost would be competitive with the land-based plan. Estimates of that cost vary from $35 billion to $100 billion.

The analysis, which was requested last year by members of Congress who were skeptical of the Air Force's plan, immediately became ammunition for opponents of the deployment in Utah and Nevada. Representative James D. Santini, a Democrat and Nevada's sole Congressman, said that the analysis "provided the first objective assessment that we have vitally needed." Mr. Santini has supported the missile program but opposed basing it in his state.

WEINBERGER STILL SKEPTICAL

The analysis was published just as Secretary of Defense Caspar W. Weinberger again expressed his skepticism about the land-basing plan. "It's got an element of the unreal in it," he told a Senate committee yesterday. "There's no question about that."

Mr. Weinberger, who presented the Reagan Administration's military budget to the House Armed Services Committee today, said that a panel of prominent people outside the Pentagon, whom he did not name, would review the basing issue and make recommendations to him by June.

The new study, which took more than seven months to complete, came from the Congressional agency staffed by scientific and technical specialists that has the task of giving Congress independent, non-partisan analyses of technical questions. The study of the MX missile was done at the request of Senator Ted Stevens, Republican of Alaska, and Representative Morris K. Udall, Democrat of Arizona, both critics of the land basing plan.

The briefing was presented to the subcommittee today as an interim report, with a final report due in May. At the outset, the presenters of the report, led by Peter J. Sharfman, a specialist in defense and arms control, cautioned that no basing plan avoided all problems.

They focused one section of their report on the issue of vulnerability, which the Air Force contends would be assured by constantly moving each missile from shelter to shelter in a giant "shell game."

The report said that hiding the missile from sophisticated sensors and detectors required "the equivalent of a new technology." The report continued, "One cannot have confidence in the success of this new technology before actual hardware is constructed and tested in the field. Even then, lingering doubts would remain."

Even small doubts would be important, the study said, because "the Soviet Union could easily attack all the MX missiles" if the system broke down.

Moreover, MX would become increasingly vulnerable to Soviet attack unless the United States had an agreement with Moscow to limit the number of Soviet nuclear warheads. The most recent strategic arms limitation agreement has not been ratified.

The analysts estimated that the Soviet Union could have 6,000 to 7,000 warheads by 1990 and 11,000 to 12,000 by 1995. "By the year 2000," the report said, "the Soviet inventory could be so large that 15,000 or more could be aimed at an MX deployment."

The United States would have to build 360 missiles and 8,250 shelters by 1990 and 544 missiles and 12,500 shelters by 1995 to have 100 missiles survive a Soviet nuclear attack and be ready to fire back, the report said.

On the other hand, the assessment said, building a large number of small submarines, carrying two or four missiles each and patrolling in the deep ocean near the United States would be "highly survivable" without additional naval protection.

[From the New York Times, Mar. 12, 1981]

To the EDITOR:

I am writing to correct a misleading statement which your story in the March 11 *Times* made about the findings of the ongoing Office of Technology Assessment study of MX Missile basing. The story incorrectly stated that OTA suggested that basing MX on small submarines would be preferable to the current Air Force plan. In fact, OTA does not believe that it is possible to make such a choice only on the technical grounds that our study is considering.

The story omitted a description of the problems which OTA found would result from basing MX on small submarines. The small submarines, while they are indeed technically feasible and highly likely to be survivable, could probably not be deployed until the 1990s because of shortages of experienced shipyard capacity, critical materials, and critical manpower. Assuring missile accuracy would also be more difficult than with land-basing. These problems could be overcome with enough time and money, but adequate time and money might also do much to deal with the problems associated with the current Air Force plan. The story correctly reviewed OTA's cautions about the possible vulnerability of land-based MX, but omitted our warning that small submarines could have a vulnerability in common with Trident submarines if an unforeseen anti-submarine threat developed in the future.

We explicitly stated at the conclusion of our briefing: "Thus we see that all available modes of basing MX pose serious problems. We at OTA have not ranked these basing modes, because the choice of MX basing depends in the last analysis on what kinds of problems the U.S. is most willing to face. That is necessarily a political judgment."

PETER SHARFMAN,
Director,
MX Missile Basing Project.●

THE SECOND ANNUAL SPRING PREMIERE AWARDS

HON. JOHN P. MURTHA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 6, 1981

● Mr. MURTHA. Mr. Speaker, it is a pleasure for me to mention the upcoming dinner of the United Black Service Clubs of Johnstown and to help honor the men and women being recognized for their contributions to the community.

Mr. Allen P. Andrews, chairman of the service clubs notes the dinner is an attempt to bridge a gap in fellowship that should continue to strengthen the bonds of fellowship between the black and white communities to make the total community of Johnstown a better place to live.

Certainly, it is through efforts such as this and the individual work of the people being honored, that we can all join in promoting a nation of harmony that is working and pulling together to meet our common needs and goals. Our future as a nation rests on all of us pulling together, for it will not be one ethnic, racial, or religious group that will make progress in the coming years, it must be all of us—regardless of those characteristics—that improve our world.

Please let me note the seven people being honored at this April 25 dinner who certainly meet this standard of excellence in service to the community and their fellow citizens.

Homer M. Burton—Mr. Burton has given his time and effort constantly over the past 50 years to promote and develop the black community and has been an individual leader in promoting community togetherness in the Johnstown area.

B. T. Du Pont—Mr. Du Pont has shown his special caring about people and their future through his constant volunteer work in service organizations including the NAACP, the Pennsylvania Human Relations Commission, the Boy Scouts, and Mount Aloysius Junior College.

Perry Holloway—Mr. Holloway has worked to blend the efforts of the black community with local labor and political groups to promote a united progress that helps the community to pull together and work together for common goals.

George Minno—Mr. Minno is a banker in Johnstown who has devoted considerable portions of his time to promoting public development, and has been a leader in the efforts to develop economic growth, jobs, and community development in Johnstown.

Christopher C. Quarles—Mr. Quarles is now retired, but he continues his lifelong efforts to improving Johnstown and the black community. He worked as a businessman, but his true love has been the people of the community and their improvement which he has shown through his active participation in the NAACP.

Dorothy Robinson—Miss Robinson is involved in banking in the Johnstown area and has used that position not simply as a job but as an opportunity to work with the churches and people of the Johnstown community to help solve financial problems and keep churches and community groups active.

Ruth Whitehead—Mrs. Whitehead has been a regular contributor to efforts and causes within the black community and has given regularly of her time to community projects and her church, the Shiloh Baptist Church.

I certainly extend my congratulations to these people for their excellent examples of individual contributions to the community, and I know we can all count on their continuing efforts to improve our community and help our fellow citizens.●

THE WATER PRICING REFORM ACT

HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 6, 1981

● Mr. MILLER OF California. Mr. Speaker, a recent article in the Christian Science Monitor illustrates that reform of Federal water pricing would be wholly consistent with the budgetary goals of the Reagan administration.

I have introduced legislation, the Water Pricing Reform Act, H.R. 2606, which would largely end the unjustified subsidization of water in the West. Most of the farmers in the reclamation program can afford to pay a reasonable price for the water, as my bill would require, and their assumption of this obligation would reduce the sizable cost to power users, municipal and industrial users—who already

pay full cost plus interest on their water—and also the general taxpayer who will ultimately pick up the cost of these projects which we have always been told will pay for themselves.

My proposal would inject some sound financial management into a system thoroughly distorted by Federal financial interference. Water, like energy, will be more efficiently utilized when its price is subject to the marketplace and actual costs. With price inducing greater conservation, the demand for additional water storage and transportation facilities might well decrease, and costs to taxpayers would be reduced even more.

The article follows:

A FEDERAL SUBSIDY SO FAR MISSED BY BUDGET CUTTERS—IRRIGATION

(By Brad Knickerbocker)

WASHINGTON.—It seems like a perfectly good Republican idea: Provide a federal subsidy only to the extent that it is truly needed, and make the recipients pay their fair share whenever possible.

This argument, which underlies much of the Reagan administration's budget-cutting these days, is being thrown back at the White House in an attempt to drastically reduce a large government expenditure in President Reagan's home region—federal subsidies for farm irrigation.

The General Accounting Office (GAO) recently reported that farmers in the West who receive water from federal irrigation projects pay only a small fraction (less than 10 percent on average) of its cost.

In one central California project area, for example, farmers pay only $7.79 per acre-foot of water (about 325,000 gallons). The full cost is $86.54, with taxpayers picking up the balance. Multiplied by the millions of acres served by such projects in the West and the vast amount of water involved, the total federal subsidy adds up to several billion dollars.

The original intent of water reclamation law was to encourage westward settlement and regional development. But there is growing agreement with the GAO conclusion that "those goals have been reached and the projects should now be reevaluated in the light of current economic and social conditions."

The GAO recommends that the Interior Department rethink the way it arrives at water charges. The rate charged for each irrigation area is determined, in large part, by how much the department figures the farmers can afford to pay.

Rep. George Miller (D) of California has introduced legislation requiring that construction and operating costs be recovered from water users.

Irrigation is a program where the subsidies just grew and grew, and now we find billions of dollars in taxpayers' money being used to subsidize some of the wealthiest agricultural interests in the United States," says Mr. Miller.

The issue is a key part of broader water policy questions that will have to be faced by Congress and the new administration.

One is the growing controversy over whether federally irrigated farm land should be reserved for "family farms" of modest size (160 acres per family member), as Congress originally intended. Studies consistently have shown that much of this land already is held by large farming interests, including absentee corporations.

One recent Interior Department study notes that fewer than 3 percent of farm operators control nearly one-third of the land in federal reclamation areas.

Last year the House and Senate could not agree on legislation setting new acreage limits. Sources close to the issue expect it to be resolved in favor of increased limits, reflecting the "economies of scale" possible on large farms.

Another growing concern is water conservation and the long-range environmental effects of massive irrigation. Among the points of concern are ground water shortages in Arizona and other parts of the West, increasing salinity as a result of irrigation in California's San Joaquin Valley, and the wisdom of damming more rivers to cultivate land of marginal agricultural value.

The Interior Department has found that increasing the price of irrigation water to more accurately reflect its true cost would result in farmers using it much more efficiently. Congressman Miller likens this to deregulating the price of oil and gas in order to encourage conservation of those valuable resources.

Interior Secretary James Watt says "the marketplace" should govern energy development in the United States. Congressman Miller seems determined to find out if the Reagan administration will apply the same standard to using the nation's water resources.●

HONORING 1981 SLOVENIAN MEN AND WOMEN OF THE YEAR

HON. DENNIS E. ECKART

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, April 6, 1981

● Mr. ECKART. Mr. Speaker, Slovenian culture, dramatic arts, music, and social arts flourish in the Cleveland area today due in large part to the efforts of the Federation of Slovenian Homes.

Recently, at the Federation of Slovenian Homes awards banquet, 10 outstanding contributors to the Slovenian community were honored. Their dedication and energy are so exemplary that I wish to honor them here.

Andy Hervatin is the 1981 Slovene Man of the Year representing the American-Slovenian Club. He was a driving force in organizing the club in 1946 and was its first president.

He is active in several fraternal organizations and Slovenian clubs and is currently organizing a pensioners club. He and his wife, Edith, live in a house he built himself.

Antonia Stokar is the Slovenian National Home of Maple Heights' Woman of the Year. She has been active with many Slovenian organizations, particularly the Slovenian National Home.

She and her late husband, Frank, have nine children. She has worked at the Cleveland Worsted Mills and the Richman Bros., Co.

The Slovenian Workmen's Home on Waterloo's Woman of the Year is Mary Furlan.

Born in Cleveland, Mary has also lived in Yugoslavia. She has been a member of the Slovenian National Benefit Society and the Progressive Slovenian Women of America for over 45 years. She is the widow of Louis Furlan.

Tony Sustarsic is Man of the Year of the Slovene Society Home of Euclid. Active with the Slovene Hall since he was a child, Tony has given a lifetime of service to the community.

A World War II veteran, he was a founding member of the Euclid Vets Club. He and his wife Helen have two children and two grandchildren.

The West Side Slovene Home has chosen Anna Jesko as its Woman of the Year. Known as the "West Side Reporter" to her friends, Anna has written over 500 articles for Slovenian newspapers.

She has been a member of several Slovene organizations for over 50 years and was a founder of the Club of the West Side Lodges.

June Price is Woman of the Year of the St. Clair Slovenian National Home. A popular and respected singer, she has used her talents for Slovenian culture and causes since her early teens.

Her voice has enlivened Slovene benefits, festivals, singing groups, and operas and she also is active in many Slovene societies.

The Slovenian National Home in Newburgh has chosen Robert Zura as Man of the Year. Bob is an air traffic controller who is active not only in the Slovene community, but also in political and civic events in Parma. He and his wife Mary have three children.

Rose Slapnik is Woman of the Year from the West Park Slovene Home. She has been a member for 20 years and is especially active in bringing new members to the club. Rose and her husband Adolph have three children and five grandchildren.

The Collinwood Slovenian Home Man of the Year is John Primozich. John has been a director of the home for the past 3 years. He and his wife Vera have one son.

Vidi Kumse is the Woman of the Year of the Slovenian National Home of Lorain. She has been active in many Slovene womens' groups since emigrating to Lorain from Yugoslavia in 1907.

She and her husband John will celebrate their 70th wedding anniversary this year.

Mr. Speaker, I am pleased to join in honoring these 10 fine citizens of the Slovenian community. Their hard work and enthusiasm is commendable. Their heritage has enriched these Men and Women of the Year, and they have enriched their community and their country.●

CETA WORKS FOR AMERICA

HON. AUGUSTUS F. HAWKINS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 6, 1981

● Mr. HAWKINS. Mr. Speaker, Hilda Bynum, 46 years old and handicapped, works as a blood donor recruiter in rural Buncombe County, N.C. Unemployed for the past 11 years, she is now able to earn $3.39 an hour as a participant in a CETA training and employment program.

"CETA has given me hope," she says, "has helped me to stand up and say, 'I can get a job. I can do something with my life. I am somebody.' CETA doesn't give you something for nothing, only the incentive to go out and do for yourself."

Shelley Johnson also benefits from a CETA program. She has moved off welfare and is supporting a 9-year-old daughter with the stipend she receives from her CETA sponsored part-time job at the San Bernardino County Economc Development Agency. When not working at the agency, she receives word processing training. At completion of the program, she could land a job with a starting salary of $1,100 a month.

If the administration has its budget slashing way, Hilda, Shelley and roughly 330,000 others will soon lose their jobs, along with the pride and independence their individual CETA programs provide them. The President has already deferred title II(d) and YACC moneys, and rescinded title VI PSE funds. This has caused immediate and serious repercussions. Many people have already lost their jobs, many small programs have been forced to close their doors, and many families at the borderline of poverty have given up the hope that CETA provides and moved onto welfare. If the administration continues to push further and alter the CETA legislation—as they threaten to do—these negative effects will be greatly multiplied.

These actions make no sense whatsoever, especially from an administration which claims to want to put Americans back to work. These large cuts in CETA will result in more unemployed people, not less. Training opportunities for those who need it the most will be greatly diminished, the long-term unemployed will be denied one of the few opportunities they have for substantive employment, and the cycle of poverty will become even more entrenched.

That CETA works has been clearly borne out by the statistics. Almost half a million of this Nation's most seriously disadvantaged people moved from CETA programs into unsubsidized employment last year. This is exactly the purpose of a training and employment program, yet the administration wishes to sharply curtail CETA. To state that these cuts, made in the name of fiscal austerity, will be counterproductive, is to belabor the obvious.

CETA workers are not only helping themselves through their training and work experience; they are also helping the Nation by performing needed tasks and services which would otherwise go undone, paying taxes, and lowering the unemployment and welfare rolls. In a sluggish economy, this Nation has a vested interest in increasing employment as much as possible. A full-employment society not only benefits the individual worker, it means that the American economy is functioning at a high and productive level.

Economic recovery cannot come about by forcing thousands of Americans out of productive employment and onto welfare. Economic recovery cannot be achieved by condemning the long-term unemployed to a life without hope or work. Economic recovery cannot be achieved by eliminating skills training opportunities for the underemployed and unemployed. Economic recovery will not be attained by making insignificant budgetary savings now, while insuring economic and personal catastrophe in the near future.

I have introduced two measures, House Resolutions 111 and 120, which would counter the Reagan deferral of title II(d) and rescission of title VI funds. Support of these measures is vitally important since the Department of Labor has already begun to implement the deferrals and rescissions. Many thousands of people have already lost their jobs because of this accelerated implementation, and many thousands more will soon be out of work and on the streets. We must support House Resolutions 111 and 120, and put America back to work.●

H.R. 3007

HON. NORMAN D. SHUMWAY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 6, 1981

● Mr. SHUMWAY. Mr. Speaker, as a result of last Monday's tragic attempt on the life of the President, on Thursday I introduced legislation (H.R. 3007) to close a glaring loophole in the Gun Control Act of 1968. As I am certain each Member of the House is now aware, the .22 caliber handgun used in the attempted assassination was assembled in Miami of parts imported from Germany. The gun itself could not have been imported; its parts were.

Mr. Speaker, this exception to existing prohibitions on the importation of "Saturday Night Specials" not only makes no sense, but, as we have just seen, can have deadly implications. My bill, therefore, provides that the importation of parts of firearms shall be illegal if the assembled firearm is already prohibited by law. Illegal parts should be treated in the same manner as the illegal "whole."

I am not proposing additional gun control. I am suggesting, rather, that if existing law were consistently and strictly applied, we might substantially reduce the number of cheap handguns annually made available in this country. I urge my colleagues to join in sponsorship of this effort.●

TUITION TAX CREDITS: A SCHOLAR'S VIEW

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, April 6, 1981

● Mr. MICHEL. Mr. Speaker, it is not necessary for me to give in detail the academic credentials of sociologist James S. Coleman, author of the famous "Coleman Report" which did so much to shape educational policy in this country. Dr. Coleman has recently studied the nonpublic school system in the United States. It would seem from reports based on early drafts of his study that tuition tax credits will be money well spent by the Government.

For more details, I suggest you read "Private High Schools Are Better Than Public, Study Concludes" by Dan Morgan, the Washington Post, April 3, 1981, which I insert in the RECORD at this time:

PRIVATE HIGH SCHOOLS ARE BETTER THAN PUBLIC, STUDY CONCLUDES

(By Dan Morgan)

A major study by sociologist James S. Coleman concludes that Catholic and other private high schools provide a better education than public ones do, and in some respects are less racially segregated. The study is certain to cause controversy in U.S. educational circles.

Coleman, whose 1966 report on educational opportunity became one of the decade's most debated documents on schools, based his latest findings on data covering 58,728 students in 1,015 high schools.

The report was compiled for the National Center for Education Statistics, a branch of the Department of Education. It is one of the most extensive examinations of nonpublic schools ever sponsored by the federal government.

Although officials of NCES described the report yesterday as a "draft . . . still subject to change," it has been sharply attacked by supporters of public schools who fear that the findings could strengthen the case for tax credits to families paying tuition for private schools.

Coleman went on record in favor of tuition tax credits as early as 1978, saying they would widen the school options of low-income black parents.

President Reagan has promised to fight for tuition tax credits that would aid families that send their children to parochial or private schools. But a major storm is brewing over this, with public-school backers saying that Reagan's policy is to slash funds for schools serving poor and minority children and transfer the savings to middle-class families through tax credits.

David Sweet, assistant administrator of NCES, said yesterday that "we would not say we fully support each and every conclusion" reached by Coleman. And an internal NCES evaluation of the Coleman study obtained by the Washington Post "urges the author(s) to take less liberty with the data and provide a more complete picture" of one of the issues dealt with.

"The statistical techniques used here are out of date, and I think nearly every expert in the field would say that the method has to overestimate the quality of private schools," said Robert L. Crain, an educational sociologist and author who now works at the Rand Corp. "If you took a high school student body which came from families of above-average income, those kids would do well in either a public or private school. There is no evidence in this report that makes me think they would do any better in private school."

Coleman, a University of Chicago sociologist, is affiliated with the National Opinion Research Center, which has the contract to gather data for a massive federally financed survey of high school sophomores and seniors.

About one high school out of four in the United States is non-public, but only about one of 10 students in grades 9 through 12 attends these facilities. By far the largest number of the private school students—900,000 of 1,359,000—attend Catholic parochial schools.

To gather the data, the National Opinion Research Center examined school records, tested thousands of students and interviewed administrators.

According to Coleman, "the evidence is that private schools do produce better cognitive outcomes that public schools. When family background factors that predict achievement are controlled, students in both Catholic and other private schools are shown to achieve at a higher level than students in public schools."

In a warning that critics already have seized on, however, Coleman acknowledges that factors other than family background could affect achievement.

"Coleman has mixed up cause and effect," a critic said. "These kids are in Catholic schools because they have high scores. They don't have high scores because they're in Catholic schools. This is not a minor problem; it's huge."

Also certain to provoke controversy is Coleman's finding that "Catholic schools more nearly approximate the 'common school' ideal of American education than do public schools," in that achievement levels of children with different backgrounds are more nearly alike in Catholic than in public schools.

Coleman also challenges a major contention of critics of tuition tax credits, who assert that the aid would intensify racial segregation. Coleman argues, on the basis of computer models, that there would be a slightly higher percentage of blacks and Hispanics in private schools after the first year of such aid than are there now.

He argues that this would be constructive because "the public sector is by far the most segregated" on a school-for-school basis.

In his analysis, Coleman concluded that individual private schools are less likely to be racially segregated than individual public schools, although public schools have a considerably higher percentage of black enrollment than Catholic schools nationally. Coleman reports that public and private schools now enroll about the same percentages of Hispanics.●

FORMER MEMBER SUPPORTS LEGAL SERVICES

HON. PAT WILLIAMS

OF MONTANA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 6, 1981

● Mr. WILLIAMS of Montana. Mr. Speaker, I am very pleased to share with my colleagues a letter from a former Member of this body, Arnold Olsen, who writes of his support for the Legal Services Corporation. In addition to being a former Member of this body, Mr. Olsen is in an ideal position to observe the Legal Services Corporation as he is the judge of the Second Judicial District of the State of Montana. He makes a good argument by invoking the preamble of the U.S. Constitution where it states that one of the purposes of this great Union is to establish justice. The Legal Services Corporation has helped establish a measure of justice, or at least access to the judicial system, for the people of our country who otherwise would not have it because of the excessive costs. I commend him for his observations and hope my colleagues will take a minute to read his comments:

DISTRICT COURT OF THE
STATE OF MONTANA,
Butte, Mont., March 27, 1981.

Hon. PAT WILLIAMS,
U.S. House of Representatives,
Washington, D.C.

DEAR PAT: As a member of the Judiciary, and presiding in the District Court of the Second Judicial District of the State of Montana, I would like to express my personal and professional opinion in regard to House Bill 2506 relating to the Reauthorization of the Legal Services Corporation.

It is my understanding the Corporation is operating under a $321 million appropriation for the year 1981, and I urge the Reauthorization of the Corporation, together with an appropriation in, at least, the area in which it is now funded, in order that the poor, the low income, and those families with earnings below poverty level may obtain legal counsel and receive the equal and just treatment to which they are, of right, entitled.

The Legal Services Program has provided these individuals with able and competent legal counsel and has immeasurably assisted the court in the administration of justice. This is an extremely sensitive area, and their civil rights must be protected at all costs. Without counsel, such civil rights are jeopardized, endangered and violated. The program in my opinion has more than proven its worth; and, without it, funding from other sources would be impossible to obtain.

I believe that the legislation presently before Congress, dealing with the Reauthorization of the budgeting of the Legal Services Corporation is vital and essential, and I would appreciate your positive assistance towards the approval of such legislation.

I sincerely hope that you will give positive effect to the Preamble of the Constitution of the United States. "We the people of the United States, in order to form a more perfect union, *establish justice*, insure domestic tranquility, provide for the common defence, promote the general welfare, and secure the blessings of liberty to ourselves and our posterity, do ordain and establish this constitution for the United States of America;" by establishing justice for the poor who under on circumstances could afford to pay for it themselves.

Very truly yours,

ARNOLD OLSEN,
District Judge.●

VIOLENCE

HON. CARROLL HUBBARD, JR.

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Monday, April 6, 1981

● Mr. HUBBARD. Mr. Speaker, with the recent tragic events here in the Nation's Capital, I wish to share with my colleagues a timely letter from my constituent, Mr. Bert Jody, Jr., of Paducah, Ky. Mr. Speaker, I submit the following:

The article by Mr. Kilpatrick strikes a responsive chord on my part. I travel at times to Washington as well as to other cities in this country on business. I do not walk the streets of those cities, nor visit their attractions, simply because I do not wish to be robbed, beaten, or possibly killed by someone that Judge Bazelon might term "an unfortunate product of his social environment."

I am concerned with staying alive to support my family. I am frightened for my daughter, a senior in college, who must go out alone to earn a living in some "war zone."

The mood of my friends and peers is turning ugly. We are collectively fed up with paying the price in fear and innocent lives lost to street toughs and "crazies" like Steve Judy and Ted Bundy and then paying the price of endless appeals to maintain these killers on death row for years.

The thought strikes me that if we did not permit tens of thousands of unskilled persons to enter this country, we would not be packing those same tens of thousands into slums to become desperate enough to commit acts of violence against society. Who knows, we might even lower the unemployment ratio.

Frankly, the sociological excuses made for these animals do not interest me, I have abided by the laws of this country for fifty years. The question is, when is government, established to secure the rights of the law abiding, going to stop coddling the lawless and start protecting the innocent for real?

I am like Mr. Kilpatrick. My heart doesn't bleed for them. I've been robbed.

With best regards, I remain,

Yours very truly,

BERT JODY, Jr.

Well said.●

REMARKS BY BETHLEHEM STEEL CORP. CHAIRMAN DONALD H. TRAUTLEIN

HON. JOHN P. MURTHA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 6, 1981

● Mr. MURTHA. Mr. Speaker, on Monday, March 30, I had the pleasure to serve as master of ceremonies for the annual Talus Rock Girl Scout Council dinner. We were honored to have as our speaker this year Donald H. Trautlein, chairman of the board of Bethlehem Steel Corp.

Mr. Trautlein, in his remarks, made an extremely positive presentation of the role of Scouting in helping to promote the role of women in today's society. Mr. Trautlein said that while we know all citizens are not exactly equal, we do have equality of opportunity, and added:

And that is what's important about the women's movement: not that women should succeed to positions that have been traditionally dominated by men; not that women should leave the home and hearth in favor of careers; but rather that they should have equal opportunities to do so if they so choose.

Girl Scouting can, and does—help to prepare young women for such opportunities. It helps by teaching them useful skills, by providing basic vocational training, and by helping them acquire the patterns of disciplined thought that can serve them well throughout their lives.

Mr. Trautlein went on to note that from his perspective with one of the Nation's leading corporations that the outlook was excellent for women today choosing to develop careers in the business world.

I can tell you that those prospects are immeasurably better today than they ever were in the past. For example, when I started out in the accounting profession, there were very few trained woman accountants around. Not so today. In fact, we have about fifty women in accounting, supervisory, and administrative-type functions in Bethlehem's Accounting Department.

After citing some statistics on the increase of women receiving Ph. D. degrees and moving through medical, law, and graduate schools, he added:

All the statistics add up to the same conclusion: we are in the midst of a virtual revolution, a tide that is sweeping women into positions of importance, influence, and prestige that were hardly dreamed of only a few years ago.

Mr. Trautlein added that he thought future job prospects were favorable for women, and added the formula he foresaw making those careers even more likely.

There is no question about it. Women are making progress, and we want them to keep on making progress. We still have a long way to go, and I can assure you that we're far from satisfied. But there's another problem, and it's pretty fundamental. I'm referring to the fact that we can't hire women or anybody else for jobs that they aren't qualified to fill.* * *

Here again, it comes down to a matter of direction and training early in life—in the family, in the schools, and in organizations such as girl scouting. That's where girls need the kind of guidance that will expand their career horizons as women.

I believe Mr. Trautlein's comments served very well to indicate the importance of the Girl Scouts in the coming decade. I appreciated him joining us in Johnstown, and am very pleased to further distribute his excellent comments through these remarks.●

THE AGRICULTURAL MARKETING AGREEMENT ACT OF 1937

HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 6, 1981

● Mr. MILLER of California. Mr. Speaker, I am introducing legislation today to correct serious abuses in the Federal agricultural marketing program which artificially inflate food prices, undermine the competitive market system, injure consumers, and encourage the squandering of vital national resources. I am very proud to have Congressman FRED RICHMOND, chairman of the Subcommittee on Domestic Marketing, Consumer Relations and Nutrition as a cosponsor of this bill.

The Agricultural Marketing Agreement Act of 1937 (7 U.S.C. 601 et seq.) establishes a program providing for the issuance of marketing orders with respect to numerous crops by the Secretary of Agriculture. These orders were designed to reduce the fluctuating volume and price of certain crops during the uncertain years of the Great Depression. The benefits of this stabilization, it was believed, would accrue to both farmers—who would enjoy regularized prices—and consumers—who would benefit from the regular availability of the product.

But like so many well-intended Federal programs, this one has gone awry. A program intended to support small farmers in many cases now protects large agricultural domination of the market. A system to benefit the public from major decisions excludes the public from major decisions which affect our pocketbooks and our health.

The marketing orders have become a mass of intertwined Federal regulations and restrictions, frustrating the entrepreneur, assuring rather than preventing market capture. And this very system nourishes itself off still more consumer financing through the program of taxpayer subsidies to agricultural users.

These were some of the findings of the Federal Trade Commission staff report, "Agricultural Cooperatives" in 1975. Like too many thoughtful studies, this one has languished, its criticisms unpublicized and its recommendations ignored. Marketing orders, the report concluded, may:

* * * generally overstimulate production, keep unnecessary numbers of growers in industry, and protect inefficient operations by artificially inflating prices. Such economic costs may outweigh any advantages that orders may actually have (214-125) * * *. Marketing orders do have potential and actual effects counter to consumers' interests * * *. Surely there should be consideration of alternative methods which would not so clearly lead to societal costs from the misallocation of resources.

These warnings went unheeded by the Congress. And today, in the Central Valley of California, there are hundreds of thousands of tons of navel oranges rotting in the Sun or otherwise disposed of to keep them out of the supermarkets of this country. As much as 25 percent of the crop may be withheld from consumers. This has occurred in the past. Between 1960 and 1968, 58.1 percent of lemons were diverted from the domestic fresh fruit market, and during the 1960's, 19.5 percent of the almond crop was kept from consumers. So, too, with 25 percent of Ocean Spray's 1973 cranberry crop, and 25 percent of the cling peach crop—81,000 tons—in 1976. While 1981 will be a bumper year for oranges, consumer prices will increase by 12 percent in the markets. The USDA reported in 1975 the marketing order program definitely inflated prices to consumers.

Why is this unconscionable waste taking place? And why is the Federal Government, and particularly the Department of Agriculture, not only sanctioning this immoral destruction of food but contemplating legal action against private entrepreneurs who simply want to sell the food they have labored to grow?

Again, the 1975 study provided the answer: "Orders are used to engage in a form of price discrimination. The fresh market price is kept up by limiting supplies". The effect of the orders is also to restrict entry to the agricultural market and extend monopolistic control of our food production.

There is a pernicious aspect to this situation which is only now becoming appreciated, but which includes a taxpayer subsidy to growers which encourages crop over production, and that is the provision of heavily subsidized irrigation water.

Irrigation subsidies are another of those well-intended Federal programs identified by the Reagan administration which is not doing what it is supposed to do. We thought we were underwriting the perpetuation of small, family farms in the United States; now we find that the taxpayers are really underwriting some of the largest agri-

business operations in the country with billions of dollars in taxpayers' subsidies. Those subsidies, and the availability of water provided by those projects, have combined to encourage the planting of crops covered by marketing orders. More subsidies are one of the reasons there was a massive movement of orange growers into the Central Valley in California.

So now we have growers who are using subsidized water—paid for by taxpayers—delivered through irrigation projects—paid for by taxpayers—to grow crops, a significant portion of which are periodically destroyed in order to inflate prices—paid for by taxpayers.

And this system is justified as preserving the free enterprise system.

My legislation would correct the worst abuses in the marketing order program. It would change the present system whereby an officer of the U.S. Government—the Secretary of Agriculture—delgates authority to influence the availability of food and market price to a group of people with a strong proprietary interests in the decisions they are making.

Philisophically, I strongly object to this principle because the Government should not intrude into the private economic sphere solely for the purpose of enriching one class of citizens at the enormous financial expense of all others unless there is some overwhelming national interest. But in the case of marketing orders, those interests—protecting small farmers against domination, preserving entry to farming, assuring availability of a product to the consumer—are being undermined rather than strengthened.

I particularly object to the virtual exclusion of qualified consumer spokespersons from the marketing decisions.

The consumer is affected by inflated prices.

The consumer is affected by reduced product availability.

The consumer is affected by the use of his tax money to underwrite this irrigation and crop marketing system.

And yet the consumer is excluded from the decisionmaking process entirely under the current law.

My bill would require that at least 50 percent of the marketing boards appointed by the Secretary be composed of consumers or representatives of consumer organizations. In addition, my bill would require a public hearing on any rule by the board when demanded by one-third of the board in order to permit a thorough public notice and discussion of the proposal.

I think it is very important to note the current exclusion of consumers from decisions by private interests acting in the name of, and with the power of Government. Except for a restricted procedural hearing at the time an order is promulgated, at which anyone may appear, consumers are denied any standing regarding rules implementing the order, including weekly decision regarding the withholding of the crop from the market.

Consumers may not seek judicial review of these decisions, and under current regulations cannot participate in any modification of an order, rule or regulation. (7 CFR 900.1 et seq.)

As the 9th circuit found in *Rasmussen* v. *Hardin* (461 F.2d 595, 9th Cir. 1972):

> The whole scheme of the act is to raise the prices of agricultural products to, and keep them at, levels fixed by the Secretary, and to establish "orderly" marketing of them. Bluntly stated, that means, in part, marketing freed to a very large extent from price competition. It is arguable that the immediate, and possibly the longrun, interests of consumers are contrary to these goals * * *. Nowhere in the act can we find an express provision for participation by consumers in any proceeding. We are convinced that this is no accident.

It is time that Congress corrected that accident, whether intentional or not. This Congress cannot sanction anticonsumer actions by special interests.

My bill would also protect the smaller farmer by requiring that orders be approved by 66⅔ percent of producers rather than by producers controlling 66⅔ percent of the crop. The current provisions permits a very large grower to act to the detriment of smaller farmers and perhaps to the detriment of the industry and the Nation as well.

Lastly, my bill will require the Secretary to investigate methods for utilizing the produce withheld from the market in both domestic and foreign food assistance programs. Surely there must be a better way to utilize the products of American agriculture than allowing millions of pounds of fruit and vegetables to be destroyed while millions of people throughout the world go hungry. Assuming that we do continue the process of withholding products from the market in some reasoned manner, there is no reason that we should not attempt to establish a means for assuring that all available food is appropriately utilized.

A small portion of the potentially consumable fruit which has been withheld from this year's market has been donated to charitable groups, including the Community Food Coalition in my own district of Contra Costa County. But there are far more people, both in our own country and world-wide who could utilize a large portion of the nutritious food which currently is wasted because of the marketing order program.

Mr. Speaker, my legislation is an effort to introduce a measure of balance into the marketing order program—to consider the needs of millions of consumers and taxpayers as well as serving the interests of farmers who profit from this program. This balance is lacking in the program today, and as a result, the program strays far from sound policy. I would hope that the administration continues its review of the marketing order system, and that the Congress will address this clear case of federal regulatory intrusion into the free market system to the detriment of consumers.●

ADDRESS BY NTSB CHAIRMAN, JIM KING, ON GAS PIPELINE SAFETY

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 6, 1981

● Mr. ANDERSON. Mr. Speaker, tomorrow morning, our Surface Transportation Subcommittee will begin hearings on gas and liquid petroleum pipeline safety. I believe that a recent address by Jim King, Chairman of the NTSB, to the Society of Gas Operators, on this same subject is an excellent invitation to cooperation between Government and industry—an invitation, which if accepted, will speed the drive toward less Government regulation. Chairman King's message is one which could apply to a number of industries which feel burdened by regulation:

The statement follows:

STATEMENT BY JAMES B. KING, CHAIRMAN, NATIONAL TRANSPORTATION SAFETY BOARD

Thank you.

I am delighted to be here tonight. I am particularly happy to be talking with you at a quiet time of your choosing rather than in the midst of a crisis.

It is also undeniably a pleasure to be speaking to an organization that represents an industry proud of its commitment and accomplishments in the field of safety. Your industry, more than any other mode of transportation with which we work at the Safety Board, has consistently shown the most responsiveness to our suggestions for solving safety problems.

And let me be clear about this. I'm not saying this now just to be a gracious guest. I've said it many times before, including congressional hearings. We are grateful for your willingness to tackle safety issues in a timely fashion. That, in turn, has meant that we have been encouraged to make recommendations for safety corrections directly to you—rather than to the Department of Transportation for a regulatory fix. The truth is that you can do it better and you can do it faster and that's why I want to talk to you this afternoon about the current regulatory climate.

Most of you are keenly aware of the President's temporary freeze on new regulations. While it may be too early for us to see any great effect yet, let me assure you there are already dramatic changes. The slowdown in regulation is reflected by the Federal Register, the document in which all regulatory actions must be published. During the last months of 1980, each day's issue consisted of 2 or 3 volumes with 800 to 1200 pages of light reading. This month, we are seeing daily issues of the Federal Register just

over one hundred pages—a mere shadow of its former self.

The regulatory freeze postponed new regulatory actions for 60 days to provide time for reevaluating their importance and effect upon industry and the public. This action prevented hundreds of new regulations from taking effect as scheduled and postponed additional hundreds of proposals which were ready for publication.

A subsequent presidential order set the pattern for new regulation. Essentially, agencies must weight the costs against the expected benefits of their proposals. After they've done that, they are required to justify why lower-cost alternatives, if any, were rejected.

Further, regulatory agencies must now initiate reviews of existing regulations using the principles established for justifying new regulations. I have no doubt that you will see substantially less rulemaking activity by Federal agencies, except possibly actions to eliminate many existing regulations.

This may be good news for many of you. It is also the reason why I view this as a period of opportunity and challenge.

I am convinced that this new direction in Federal regulatory action carries with it certain assumptions about industry's future role. It certainly increases industry's responsibility to attain—and maintain—expected levels of public safety. Nevertheless, opportunities for your industry to actively participate in molding your future with respect to the federal regulations under which your operate, appear to be without bounds.

As with many agencies, the Materials Transportation Bureau, will soon begin the mandated review of its existing regulations—those requirements under which you have operated for more than 10 years. This process will be now not only to the MTB, but also to your industry. I believe that this offers great opportunity for you to work with the MTB and provide practical direction to its efforts.

An early review of the existing regulations by the gas industry to identify those that increase costs without improving the safety of constructing, maintaining, or operating your facilities should be initiated promptly. Documentation of regulatory costs which produce no safety benefit, filed with a petition for elimination, most likely would be accepted gratefully by the MTB. This would also serve to direct MTB's initial focus upon an area of needed relief.

During this early review of the regulations, your industry also should seek to identify those regulations which provide safety guidance to gas operators whose staffs are unable to make technical determinations about the safety benefits of these requirements.

Your review should identify those regulations which provide guidance for actions reasonably necessary to achieve and maintain safe operations and those determined essential for restricting the types and uses of materials in natural gas systems.

To illustrate, I don't believe that anyone in this room would advocate the discontinuance of standards for welding lengths of steel pipe together or standards for forming steel into pipe by welding. These standards were developed over many painstaking years of effort to eliminate a problem of considerable magnitude in the 30's, 40's, and even into the 50's. Continuance of welding requirements applicable to all of the industry is essential for numerous small gas operations as a recommended, proven procedure for maintaining the progress accomplished by industry. You have all but eliminated this essential procedure as a cause of leaks or accidents.

Another example of regulations which should be maintained is design criteria for plastic pipe. While changes to existing criteria may be desirable, continuance of criteria to guide the industry is essential. To your credit, the present requirements were established by your industry prior to the development of Federal regulations. This was done because technical data about the performance of plastic materials under pressure over time was inadequate. While considerable research and additional testing has been conducted which some believe may justify relaxing the existing restrictions, there are still not sufficient data to predict the effect of pressure and time to the degree possible with steel. This is an area which you would not want individual experimentation by some gas operators because the results could reduce public acceptance of this material for use in gas distribution operations and possibly inspire increased government requirements.

Continued vigorous support of your policy of employing voluntary action to identify and correct safety problems and then motivating individual operators to implement corrective action is essential if reduced Federal involvement is to continue beyond this Administration. The extent of your future freedom from Federal safety regulation is now in your hands. While past experience demonstrates that you have the ability and, more importantly, the desire to develop codes and guidelines, and to motivate most of your industry to adhere to your standards, a major obstacle to your success is the lack of an effective means for collecting the types of leak and accident data required for identification of existing and emerging safety problems.

Presently, the MTB collects data about gas industry leaks and accidents. The Safety Board, like the gas industry, knows that the types of data collected, as well as the procedures for collecting and analyzing these data, are woefully inadequate for safety problem identification. Recently, the Safety Board published two reports concerning uses of MTB's pipeline safety data system. One, a study on plastic pipe failures, provided some limited insight into possible safety problems associated with the use of this material in gas distribution systems. The primary finding was that the types of data collected and the MTB's management of this data failed to identify whether the types and frequency of plastic pipe failures were significantly different from that of steel.

The other study, an analysis of the uses of the pipeline safety data by the MTB, provided the basis for what we hope will be a new data system for identifying and collecting the types of information that can be used for safety problem identification and compliance program management. I submit to you that this function properly belongs with the Federal government so that all matters affecting safety are in a central repository. This helps all of us. Additionally, I urge that your industry actively encourage the MTB to identify the types of data which should be collected by performing a data-use analysis. A properly structured data collection system operated by the federal government would provide that missing element essential to your industry's future ability to operate in a reduced regulatory environment.

Despite some obstacles I have cited, none of the new initiatives I am advocating should be difficult to achieve. Your history has demonstrated that you can provide effective leadership for improving the safety of gas operations.

Prompt action by the gas industry to provide its customers with an early warning about gas leaks lead to the universal introduction of odorants into distribution gas mains. More recent efforts resulted in standardizing the design and use of plastics for gas mains and services. Present efforts are stimulating increased emphasis on reducing excavation damage to gas pipelines.

Nevertheless, I am sure that each of you well recognize that without some governmental involvement, there is no way that the industry can require that even the most obvious safety precautions be taken by all persons who operate gas distribution systems. For instance, it is only in the last few years that many of the small gas operators (master meter if you will) such as trailer park owners, low-rent housing projects, and liquefied petroleum gas operators have made substantial safety improvements to their facilities. The challenge confronting the industry is to develop a process in which the benefits of government regulations can be effectively used to promote safe operations throughout the industry.

Within this new era of less regulation by government, there are several improvements toward which I hope you will be directing your efforts. New methods for providing increased guidance and technical advice to small operators must be developed. An existing process and publication may offer substantial opportunity for early accomplishment of this objective—the American Society of Mechanical Engineers' Gas Piping Standards Committee and the Guide published by this Committee. While the present efforts of this Committee are directed toward assisting gas operators to comply with Federal regulations, this activity could be quickly and easily redirected to develop practices required for safe operation. I am told that there have been efforts within this Committee to encourage the development of guidance beyond compliance with Federal regulations, but little has been accomplished to date. With the present direction of Federal regulations, it appears the time may now be ripe for such work, and I for one encourage you to act on this matter at this time.

The need for industry to participate in the development of an industrywide data-reporting system has already been discussed. I want to emphasize that this is an area which should be promptly and vigorously pursued since much of your future success will depend upon this system.

Development of a means to rapidly shut off the flow of gas resulting from ruptures in high pressure service lines should also be accomplished. Excess flow valves presently available appear to hold promise for accomplishing this objective; but without industry support for these devices, many gas operators will not install them, I am told. The Safety Board has advocated the development and installation of devices capable of detecting gas flows in excess of expected customer demands and upon detection of such conditions, closing off the flow of gas at or near the main. If you feel that existing devices are not adequate to accomplish this desirable objective, then do you think you have a responsibility to perform the testing and research necessary for development of a device capable of attaining this objective? If not, then you may find yourself in the posi-

tion of saying you were unwilling to act without federal intervention.

And last, there are unquestionable economic and safety reasons for the industry to develop new programs and support effective existing programs capable of reducing excavation damage or underground gas facilities. Improvements in this area, more than any other, would favorably improve the gas industry's record for safety achievement.

I urge you to take the lead in this new era of de-regulation and seize this opportunity to demonstrate your capability for effective leadership in the field of public safety. The regulatory pendulum now is swinging in a direction often urged by regulated industries—away—but you should recognize that action by your industry is required to eliminate the impetus for the pendulum's reversal. Even if the government philosophy swings back in years to come, you'll be ahead of the game if you've used the time wisely to maintain your impressive track record for effective safety action without the need for a governmental "helping hand."

I would like to thank you for having me with you today and permitting me to have the honor to serve you at the Safety Board.●

STATEMENT OF HON. BALTASAR CORRADA ON THE ATTEMPT AGAINST THE LIFE OF PRESIDENT REAGAN

HON. BALTASAR CORRADA

OF PUERTO RICO

IN THE HOUSE OF REPRESENTATIVES

Monday, April 6, 1981

● Mr. CORRADA. Mr. Speaker, it is with a sense of deep outrage and disbelief that I speak today on the attempt made on Monday, March 30, on the life of President Reagan. Once again our Nation has gone through a wrenching experience, one during which we must ask ourselves what makes our society so prone to violence. Why are we particularly susceptible to violent acts against our leaders when those same leaders are elected in a democratic process which is the envy of the rest of the world? It is sad that our efforts to preserve freedom in an open and democratic society should result in the abuse of that freedom by irresponsible elements in our midst.

Mr. Speaker, I was in Puerto Rico when the first news reports came out on the attack on the life of the President and as the rest of our fellow Americans, the people of Puerto Rico were outraged and perplexed at this senseless act.

Puerto Ricans share the Nation's pride in our democratic system which protects a person's right to freedom of expression and beliefs and thus they join with all other Americans in deploring this despicable act against our President. For that is the strength and power of this great country; that once the democratic process has taken place, we stand united behind our President. We may disagree over some of the policies that he seeks to implement, but we stand firm in our support of him as the duly elected President of our Nation.

As information becomes available, it is clear that the assailant is a seriously disturbed young man. It is against this kind of irrational individuals that we are less protected. For in their imbalanced psyche they transpose a personal grievance to a public figure such as the President and then seek to confront and destroy it.

Our thoughts and prayers are with the President and also with Press Secretary Jim Brady, Secret Service Agent Timothy McCarthy, and District Police Officer Thomas Delahanty. May God protect and speed them on to a complete and full recovery. And we should also make a prayer for our Nation; that as a result of this terrible experience we may gain in compassion, understanding and commitment to resolve our differences through debate and compromise, not through violence.●

AN ANALYSIS OF THE REAGAN BUDGET—PART II

HON. LARRY McDONALD

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 6, 1981

● Mr. McDONALD. Mr. Speaker, the following is the second part of a two-part series entitled "The Reagan Budget Fraud," by Murray Rothbard published in the World Market Perspective, March 19, 1981, issue. It is an excellent analysis by this Austrian economist and seems to put President Reagan's proposals in perspective. Though one would desire the picture painted to be more attractive, the harsh realities of our future must be faced.

I commend part two of the article to the attention of my colleagues:

AN ANALYSIS OF THE REAGAN BUDGET—PART II

THE PRESIDENT EXPLAINS

The President's February 5 fireside chat to the nation, presaging his budget message, has won him the accolade of "good communicator." But it was something else: a typical model of conservative economies, in its good and bad features. For the President began his talk with an excellent analysis of what is ailing the country; how the federal government has swollen like a cancer since the 1950s, how it has expanded out of control, and how inflation has grown and the dollar shrunk as a result of the government's printing money to pay for its deficit. Reagan also showed how unemployment has increased along with inflation, and how high taxation has crippled our incentives to work, save and invest.

OK, fine. But then what? What policy recommendations flowed from Mr. Reagan's incisive analysis? Are we therefore supposed to slash and roll back Leviathan government, cut spending and taxes back at the very least to the levels of the 1950s? Are we even supposed to begin this task? No, indeed. Typical of conservatives, the policy conclusions seem to bear no relation whatever to the analysis. Instead, gears are suddenly shifted, and now we are supposed only to lower the rate of increase of government spending. Budget cuts, Mr. Reagan assured us, would not "reduce total government spending to a lower level than was spent the year before." Instead, "the budgets will increase as our population increases and each year we'll see spending increases to match that growth."

But this is a feeble justification indeed for the betrayal of Reagan's own insight, for his failure to match the analysis of what has gone wrong. In the first place, as Reagan himself said in the early part of his speech, our population has only increased 23 percent since 1960 while the federal budget has grown by 528 percent. So why not at least roll back federal spending to the 1960 level adjusted by population growth? Secondly, the 1982 Reagan budget rises by 6.1 percent. Is Mr. Reagan claiming that the U.S. population will be increasing by that much in one year? (Annual rate of population growth is now about 1.0 percent per year.)

The unspoken but real argument for these increases is that federal spending must rise to keep up with inflation, so that spending will be maintained in real terms. But since the spending of the American public is not indexed for inflation, why should the federal government reap this advantage? Especially when government is itself the cause of inflation? In fact, a sharp and real cut in federal spending will give the government, at long last, an incentive not to inflate: for higher prices will cut into the real spending of every federal agency. But that, alas, is not to be under Mr. Reagan.

IGNORING MONEY

Perhaps the most disturbing aspect of all the flim-flam and ballyhoo about the Reagan program is the lack of attention to what the President himself has admitted to be the cause of inflation: the government's printing of money. Yet, money creation and the Federal Reserve as its creator have been almost ignored. In his State of the Union Message, Mr. Reagan spoke vaguely about "consulting regularly" with the Fed, making the Fed's "job easier in reducing monetary growth," and achieving "stable and moderate growth patterns in the money supply."

None of this, however, is good enough by a long shot. For one thing, the man who continues as chairman of the Fed with Reagan's blessing, Paul Volcker, has achieved neither stable nor slow monetary growth so far. Ever since Volcker pledged stable and slow growth in October 1979, Federal Reserve actions, and the resulting money supply, have been unprecedentedly erratic and volatile.

More important, the Reagan program of gradually reducing the rate of money growth until a "moderate" level is achieved is not going to work. Gradualism won't work, now less than ever. Gradualism has helped wreck the Thatcher policies in Great Britain.

Gradualism won't work for two vital reasons. First, because any cessation of monetary growth, gradual or sudden, will inevitably bring about a recession. A recession is painful but necessary to eliminate the grave distortions of investment and production brought about by the inflationary boom. It is important for the recession to be deep enough, and to be over quickly. If the brakes are slammed on, and the government

interferes no longer, then the recession will be deep enough to be cleansing but over so swiftly that little pain will be suffered in the process. But President Reagan has adopted Milton Friedman's Pollyanna theory that recession can be totally avoided if the growth of the money supply is reduced only in tiny, gradual amounts. Gradual reduction of money growth will either be so gradual that nothing will happen and inflation will bubble along merrily, or else a recession will come that is not deep or cleansing enough but will be prolonged indefinitely. We will have the worst of both worlds, as we had partially in the recession of 1973-75.

But we are not being prepared for recession in the Reagan program, and so its unexpected onset is bound to drive the Administration back into volatile monetary expansion, to the accompanying jeers of all nonconservatives.

Secondly, the time is past for gradualism, even if it could have worked earlier. For, in the past two decades, the public has woken up: we all realize that inflation will continue permanently, and so we all accelerate our purchases to try and stay ahead of inflation. These "inflationary expectations" fuel inflation beyond the rate of monetary increase. Fifteen or twenty years ago the public did not expect inflation deep in its bones. But now we do, and therefore the market does; and hence gradualism is simply not enough. No one is going to pay attention to honeyed promises, theories and jawboning; only the slamming on of the monetary brakes, permanently and not just for a few months, will do the job of reversing monetary expectations and stopping inflation.

But the Reagan program shows no sign of tackling the problem of money or inflation. To stop inflation now, with our inflationary expectations, the government must stop its own inflating of money, period, and must do so in such a way as to make its new-found policy credible. But to stop printing money, and to make itself credible, it must engage in fundamental reform of itself: first, by getting Congress to pass a law ordering the Federal Reserve to buy no more assets ever again, and to repeal the notorious Monetary Contol Act which provides for inflationary lowering of bank reserve requirements. Instead, Congress must freeze reserve requirements permanently at present levels. But more than that: a fundamental reform means stopping the Fed from resuming its inflationary course, which at the least means a return to the gold standard, so that money is a market commodity again rather than pieces of paper that can be multiplied *ad infinitum* by the federal government.

Nothing less will work, but there is nothing of this in the Reagan program.

FOOLING THE PUBLIC

The true nature of the Reagan program is discernable behind the ballyhoo. The Administration hopes to escape the really hard choices: to avoid genuine budget cuts, tax cuts, slamming on the money brakes or going back to a commodity money. It hopes to achieve an end to inflation by acting as if all these things were being done. The point of the Reagan program is to fool the public and the market; if we are successfully conned, the Reagan people hope inflationary expectations will disappear, and inflation will indeed be moderated. The success of the Reagan plan is grounded in wholesale deception.

So far the con seems to have worked, temporarily at least, among my friends and colleagues in the hard-money, free-market movement, most of whom seem to have turned into a self-appointed cheering squad for the Reagan Administration. People who should know better are hailing Reagan's "disinflationary psychological impact," the "favorable economic climate" he will bring, and the campaign promises the President is supposed to have kept. James Sinclair asserts that "Reagan, Regan and Volcker have been saying exactly the right things, which are exactly the wrong things for gold," and my old friend Dr. Mark Skousen persists in claiming significant future reductions in inflation and "improvements in the economic climate."

Reagan may well be saying the right things, but, in the manner of politicians everywhere, he is doing the wrong ones. The market might be fooled for a few months, but it has been burned too long and too often by politicians not to be deeply and healthily skeptical. Very soon the facts will triumph over hype and hoopla. Even the Reagan Administration projects a $45 billion deficit for next year, and if history is any guide, it will really be a lot higher. How does the Administration expect to finance it? If by selling bonds to the public, interest rates will be pushed to all-time highs, private investments will be crowded out of the capital market, and a steep recession will arrive at the same time as continuing inflation. We will suffer from the Thatcher syndrome of accelerating government spending while chronic recession and unemployment hit the private sector. If the deficit is financed by new reserves created by the Fed—surely the most likely scenario—then the money supply and inflation will accelerate still more.

The bottom line is that the Reagan program is all talk and no action. In short order, the market will discover this, will realize that all we are getting is retread Nixon-Ford economics, and inflation will resume its accelerating course. The interesting question is: will my friends in the hard-money movement wake up before, or later than, the market?●

COMMONSENSE ON EL SALVADOR

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, April 6, 1981

● Mr. MICHEL. Mr. Speaker, the Committee for the Free World, a distinguished group of intellectual and religious leaders has recently shown its support for the policy of President Reagan toward El Salvador. At a time when emotionalism, ignorance, political hysteria, and ideological opportunism seem to be getting front-page attention concerning El Salvador, it is good to know that commonsense—and common decency—still have a place in analysis of our foreign policy.

At this point I wish to insert into the RECORD the full page statement of the Committee for the Free World, as it appeared in the New York Times, Monday, April 6, 1981.

[From the New York Times, Apr. 6, 1981]

WE—A GROUP OF INTELLECTUALS AND RELIGIOUS LEADERS—APPLAUD AMERICAN POLICY IN EL SALVADOR.

In what the State Department accurately describes as "a textbook case of indirect armed aggression by Communist powers," El Salvador has been under military attack by a coalition of guerrilla groups whose ability to wage war depends on weapons supplied by the Soviet Union through such client states as Cuba, Nicaragua, Vietnam, and others.

That these guerrillas, dominated by the Salvadoran Communist party and other Marxist-Leninist factions, should be getting weapons from the Soviet bloc is not surprising. If they succeed in taking over El Salvador, another country in this hemisphere would be added to Cuba and Nicaragua as instruments of the further expansion of the burgeoning Soviet empire. Nicaragua, for example, is among the few countries to have acquiesced in the Soviet invasion of Afghanistan, and Cuban troops have been used in Africa and the Middle East to serve in the coming to power of parties subservient to the Soviet Union.

The fact that the Soviet bloc has been pouring arms into the arsenals of the guerrillas in El Salvador is, then, not surprising. What is surprising is the support the guerrillas have received from liberals and socialists both in the United States and abroad.

These non-Communist apologists for the guerrillas tell us—and themselves—that the war in El Salvador is caused by intolerable local conditions and not by outside intervention. Yet the government in El Salvador, backed and encouraged by the United States, has been working to improve those conditions, It has inaugurated a program of land reform so extensive that the extreme Right has turned against it with as much murderous vehemence as the extreme Left. Without intervention by the Soviet bloc there would be less violence and a better chance for the reforms to take hold, as well as for the present government to bring the anti-democratic Right under control. Indeed, we believe that only American protection, and aid, will make it possible for the Salvadorans now to create their own free and stable society, secure against depredations of both Left and Right.

The apologists also tell us, and themselves, that the insurgents are supported by the people of El Salvador. Yet the failure of the most recent military offensive launched by the guerrillas is acknowledged even by their allies in Cuba and Nicaragua to mean that they have not succeeded in enlisting popular support.

The apologists also tell us, and themselves, that by opposing the guerrillas the United States is aligning itself with the forces of "right-wing repression" and against the forces of "progressive change." Yet it is the government of El Salvador that today represents progressive change. As for the guerrillas, similar movements which have come to power in Cuba, Vietnam, and Cambodia have brought not "progressive change" but totalitarian regimes far more repressive than even the most repressive of the regimes they have replaced. Moreover, being so much more ruthless in dealing with opposition than those earlier regimes, they are much less likely to be liberalized. Nor are they likely to be overthrown in their turn by movements genuinely seeking greater democratization and more protection for human rights.

Finally, the apologists tell us, and themselves, that "another Vietnam" is in the making in El Salvador. Yet there is little likelihood that American military and economic aid to the government in El Salvador will lead either to the commitment of large numbers of American troops or to a defeat of the forces we are trying to help.

There is, however, a sense in which El Salvador could become another Vietnam. If we abdicate and allow the Soviet bloc to force a Communist regime into existence there, El Salvador will suffer the same hideous fate that has befallen Vietnam since that country was unified under totalitarian Communist rule: a new Gulag, thousands upon thousands of refugees driven into the sea, the destruction of any hope for future liberalization, and the creation of another armed instrument of Soviet imperialism.

Because the United States has a vital stake not only in holding the line against Soviet expansionism and the totalitarian horrors that follow in its train but also in helping the Salvadoran government to strengthen democratic institutions through free elections and further land reform, we deplore the misguided support being given by non-Communists to the forces opposing these aims. We applaud the determination of the United States government to assist the government of El Salvador which is working, against armed opposition, to build a more stable and equitable society and thereby add to the sum of freedom in the world.●

CONTINUING WORDS FROM VIETNAM

HON. JOHN P. MURTHA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 6, 1981

● Mr. MURTHA. Mr. Speaker, it is vital to the future of U.S. foreign policy that we continue to study the past to learn from our successes and our mistakes.

I want to share with the Members a column written by Mr. William F. Buckley, Jr., which reminds us of some valuable lessons to keep in mind about Vietnam:

VIETNAM'S GULAG IS TOO FAMILIAR TO ABSORB

The New York Times has shown courage and integrity in publishing an article ("A Lament for Vietnam," New York Times Magazine, March 29) by a South Vietnamese (Doan Van Toai) now affiliated with Tufts University, where he is writing a book about his experiences. They are illuminating, and tragic.

Toai was a South Vietnamese dissident—one of those Vietnamese the American peace movement cheered along as they deplored American intervention in Vietnam, denounced the regime of President Thieu and confidently urged their countrymen to cooperate with the insurgents and the liberating armies of Ho Chi Minh, secure in the knowledge that when Western forces were finally extruded, peace, freedom, democracy and harmony would come again, after 300 years, to Indochina.

When the North Vietnamese tanks rolled in, Toai was a member of the cheering section and because he had had banking experience, was assigned the job of helping to expropriate "all private property." Surely you don't mean *all* private property, he asked. Surely you mean only the property of those who cooperated with Thieu and the Americans, and those who got rich off the war?

NOT THE METROPOLITAN CLUB

When he was directed to confiscate the land even of indigent peasants he balked, and resigned from the Communist Party. He did not know that resigning from the Communist Party in a Communist country is different from resigning from the Metropolitan Club.

So: the old, hauntingly familiar story—how many tales of Gulag can we absorb? Albert Jay Nock once wrote that the difficulty with pornography is that copulative fancies are finite. So, really, are tales of torture. I give, therefore, only the first three sentences of his account of his ordeal. "When I was arrested, I was thrown into a 3-foot-by-6-foot cell with my left hand chained to my right foot and my right hand chained to my left foot. My food was rice mixed with sand. When I complained about the sand, the guards explained that sand is added to the rice to remind prisoners of their crimes." You can take it from there.

Or, you can go the macro route. How many political prisoners like Toai are there today in South Vietnam? The State Department estimates 150,000 to 200,000. Vietnamese refugees estimate one million. A recent Moscow-trained defector, an academic who served as a director of a technical school, says "at least 700,000." In 1977, Hanoi insisted that the figure was (a mere) 50,000. But Prime Minister Pham Van Dong said, in the magazine Paris Match in 1978, "In over three years, I released more than 1 million prisoners from the camps." Toai comments: "One wonders how it is possible to release more than a million after having arrested only 50,000."

One wonders about other things. The figures quoted above, to convey reality to Americans, should be multiplied by 10 for comparison. If you take the figures of the defecting intellectual, which lie at roughly midpoint between the refugees' figures and the State Department's, you have the equivalent of 7 million Americans in concentration camps.

Had enough?

Not Toai. He doesn't understand American apathy now, contrasted with American excitement when the (relatively) trivial derelictions of Thieu (fighting a civil war) were exposed. He finds little interest, in America, in the ideological thoroughness of the Vietnamese revolution, very little curiosity about the utter disappearance of Vietnamese sovereignty. Such is their vassalage to the Soviet Union that a national struggle for liberation from foreign control is symbolized by the dirge composed by the new poet laureate To Huu, president of the Communist Party Committee of Culture, who celebrates the anniversary of Stalin's death with the words:

Oh, Stalin! Oh, Stalin!
The love I bear my father, my mother, my wife, myself.
It's nothing beside the love
I bear for you.
Oh, Stalin! Oh, Stalin!
What remains of the earth and of the sky!
Now that you are dead.

I don't know about the earth and the sky, but can infer that much has happened to Vietnamese poetry since the fall of Saigon, but not much—Joan Baez and a few of her companions being notable exceptions—by way of expiation from Americans who backed the positions of Doan Van Toai the innocent, and fortunately were spared the vicissitudes of his re-education.●

THE PEOPLE RESPOND—PART IV

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, April 6, 1981

● Mr. GARCIA. Mr. Speaker, I am inserting into the CONGRESSIONAL RECORD a statement which exemplifies the concern people are feeling over the proposed budget cuts. President Reagan's economic plan would not affect every segment of this society equally; minorities and the poor would have to shoulder the greatest suffering while businesses and the rich would be favored disproportionately. As part of my continuing crusade against the inequities in the proposed economic plan, I am inserting today's statement to show that there are still citizens who are concerned over the impact of this plan.

NATIONAL COUNCIL OF LA RAZA,
Washington, D.C., March 19, 1981.

Hon. ROBERT GARCIA,
House of Representatives, Cannon House Office Building, Washington, D.C.

DEAR MR. GARCIA: On behalf of the National Council of La Raza (NCLR), I would like to bring to your attention our concerns regarding the Reagan Administration's economic proposals. NCLR is one of the largest Hispanic constituency-based organizations in the country, with more then 125 affiliated community organizations representing more than one million Hispanic Americans.

Our communities are greatly concerned about the budget cuts proposed by the Administration because many of these cuts will most severely affect or totally eliminate "opportunity-creating" programs while preserving some "dependency-producing" programs. Sixty percent of the proposed cuts will affect poor people.

The National Council of La Raza supports continuation of critical assistance programs such as public assistance and Food Stamps, and reformation of these programs to decrease their tendency to institutionalize dependency. But we are even more gravely concerned about cuts in critical opportunity-creating programs. Many of these programs will not just be cut back, they will be eliminated. These programs provide means by which low- and moderate-income Americans can improve their own status and strengthen their communities—programs like the Neighborhood Self-Help Development Program of the Department of Housing and Urban Development (HUD), like the Legal Services Corporation, and like certain economic development efforts of the Economic Development Administration, the Farmers Home Administration, and the Community Services Administration. The critical employment and training programs of the Department of Labor, authorized under the Comprehensive Employment and Training Act (CETA) and the Youth Employment Demonstration Projects Act (YEDPA) now are also threatened.

Experience has also taught us to fear the concept of "block grants," with no targeting, no set-asides, no requirements that programs meeting essential human needs be continued. Without a mandate that services be targeted to those with the greatest need—low-income, disadvantaged, and minority Americans—the states may well use these block grants to replace other federal funds no longer available. Moreover, political constituencies more powerful than the poor are all too likely to receive primary consideration. Finally, subcontracts to community-based organizations—groups committed to meeting the needs of their local residents, and uniquely capable of reaching minority and low-income target groups—appear likely to decrease drastically.

These are not unwarranted fears. Studies of HUD's Community Development Block Grant programs and of the CETA programs operated by state and local governments greatly concern us. These studies show that the shift from "categorical" programs to block grant programs has resulted in a significant decrease in services to the poor, to minorities, and to the chronically unemployed.

It is now clear that low- and moderate-income people, including most Hispanics, will suffer disproportionately should these proposed cuts become a reality. For these reasons, the National Council of La Raza urges your opposition to the proposed across-the-board budget cuts. Let cuts be made equitably, and let tax cuts be designed not to favor only those with the highest incomes. Federal funds must be targeted to those with the greatest need, and must protect those who rely on federal intervention due to their lack of political power. Critical opportunity-creating programs should be expanded, not reduced, so that dependency will not increase. Unless this is done, we can only foresee significant increases in the number of Amercians requiring public assistance and other dependency producing services.

The National Council of La Raza urges you to support alternative methods of controlling unnecessary government costs, without abrogating the Federal Government's responsibility to protect the rights of, and encourage opportunities for, the poor, the minority, and the disadvantaged.

We further urge you to oppose the Reagan Administration's block grant proposal because it will not target funds to those in greatest need as efficiently as existing categorical programs.

These proposed cuts are expecially disturbing at a time when the defense budget is increasing. Our concern for national security is no less than the Administration's. But it is time for our allies, some of whom now enjoy a higher standard of living than the U.S., assume more of our common defense burden.

Both a balanced budget and an increase in military capability can be achieved. Alternative approaches can be used, such as:

Implementation of General Accounting Office (GAO) recommendations which could save $4 billion in the Department of Defense's operating costs;

Implementation of another GAO report recommendation for saving $14 billion throughout the federal sector by implementing better management procedures;

Development of new sources of energy in order to reduce America's dependency on foreign oil, which is a chief cause of inflation;

Containment of hospital costs;

Medicare approval of generic rather than prescription drugs;

Readjustment of the Consumer Price Index and Cost of Living Adjustments to more accurately reflect today's living conditions;

Reduction or elimination of certain tax expenditures, such as the oil depletion allowance and the interest exemption on industrial development bonds;

Reformation of pension plans; and

Collection of unpaid taxes on dividends and savings accounts.

The Hispanic community has already sacrificed for too long. We have the lowest level of educational attainment in the nation, a higher-than-average unemployment and poverty level, and in some states the highest incidence of housing discrimination.

We urge you to carefully analyze the proposed remedy for our economic ills. The medicine may be worse than the disease.

Your very truly,

RAUL YZAGUIRRE,
President.●

EL SALVADOR—316 TO 6

HON. PATRICIA SCHROEDER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Monday, April 6, 1981

● Mrs. SCHROEDER. Mr. Speaker, my colleagues might be interested to know that during February and March my mail ran 316 to 6 against U.S. military aid to El Salvador.●

NEEDY VERSUS THE TRULY NEEDY

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, April 6, 1981

● Mr. STOKES. Mr. Speaker, thank you for allowing me to address my colleagues about the inherent misleading Reagan administration rhetoric about assistance for the "truly needy." This term has become a code word for the Reagan budget cuts and movement to promote them.

Mr. Speaker, I contend that this particular code is designed to cloud the potentially devastating impact of budget cuts to the poor and the disadvantaged in this Nation. Accordingly, it is our responsibility to unmask and decipher this and other code words before we give the budget any consideration.

The rhetoric of the Reagan administration is that the President's proposed budget cuts, especially those to the various social programs, will not hurt those who are truly needy but only those who incorrectly are labeled currently as needy but who really are not. Such a position from this Nation's Chief Executive is irresponsible and potentially dangerous. Further, it shows a lack of vision and insensitivity to the human conditions outside the purview of the White House.

Embedded in this position is the illusion that the many Americans who currently receive benefits from Federal social programs, those who will be the victims of the President's budget ax, are not needy.

Mr. Speaker, this cold and remote stance will affect human beings, who although employed, need Federal assistance to survive. Since they are a part of this Nation, they are entitled to assistance from their Government.

Mr. Speaker, while officials at the White House are preoccupied with the lipservice on how the truly needy will not be hurt and how it is necessary to cut out waste, fraud, and abuse in Federal programs, who will take care of the working mother who cannot feed her school-age children because the school lunch program has been slashed? What will happen to the low-income family of four who have shrinking buying power because of inflation when they have to go to the grocery store? And, Mr. Speaker, who will aid the sick who happen to be poor when they have to suffer because medical assistance has been eliminated for them?

Mr. Speaker, hunger, sickness, and injustice has no respect for superficial delineations such as the truly needy. Similarly, there is no such thing as being somewhat needy or quasi-needy. All of the people needing assistance, can be called as Mr. Reagan phrases it "truly needy." But, if Mr. Reagan has his way, there will be no assistance or safety net for these Americans from their own Government. This is wrong.

So that my colleagues will not blindly accept the Reagan propoganda about the truly needy, I would like to enter an article in the RECORD written by Mr. W. Shepherdson Abell. In that article, Mr. Abell discusses the problems of the needy and those persons who the President would cast aside as not being entitled to Federal assistance.

The article follows:

[From the Washington Star, Mar. 15, 1981]

A DAY IN THE LIFE OF THE "TRULY NEEDY"

A new phrase, the "truly needy," has crept into the political vernacular. If the phrase is not redundant—what does it mean to be "needy," but not "truly" needy?—it is deceptive.

For it implies that there are large numbers of people presently receiving welfare, food stamps, medical assistance and other benefits who are called needy (presumably by softhearted bureaucrats), but who really are not. And it further suggests that the Stockman budget cuts won't hurt those who are "truly" needy. It would be exceedingly convenient if these notions were right. I believe that both are dangerously wrong.

Perhaps it all depends on definitions. I note that a senior administration official (who, for reasons that will readily become apparent, declined to be named) was asked by a reporter a couple of weeks ago to

define "truly needy," and answered that a "working definition" was someone who "would not survive without government assistance." I would like to think that he was speaking figuratively, that you could qualify for the Reagan welfare program even if you couldn't prove that you would die next week if the check arrived late. But just what did he have in mind? Who is "truly needy"? Where do you draw the line?

We have at least a tentative answer to that question in the State of Maryland, as a result of the work of the 1979 Governor's Commission on Welfare Grants, which I was privileged to chair. Our task was simple: to try to fix the cost of maintaining a minimum decent standard of living in Maryland.

Our studies indicated that a family of three, consisting of a mother and two young children (the most typical size and composition of a welfare family in our state) would find it impossible to manage a minimally decent life on less than about $470 per month—assuming the family received the maximum allotment of food stamps ($37 for a family at that income level) and full Medicaid benefits. That was in October 1979.

You might be interested in knowing what the Commission (which consisted of a school teacher, two businessmen, two bankers, two lawyers, a doctor, and a realtor, not exactly a group of mushy-headed liberals) thought should go into a minimal standard of living. We used the Thrifty Food Plan, which the U.S. Department of Agriculture says is the rock-bottom food budget for a nutritionally adequate diet: $163 per month for our family of three. (Some food experts at USDA say this food budget cannot provide an adequate diet for anyone but a trained nutritionist, but we opted for it anyway.)

Rent, including heat and electricity, was set at $197. We made no allowance for a car, of course, but did allow each family member one public transportation ride per week. We cut virtually all clothing repair and cleaning, reading materials, recreation, tobacco, alcohol, allowances, life insurance, birthday or Christmas gifts. We excluded nearly all medical costs as they could be covered by Medicaid.

You can see why we felt we arrived at a bare bones budget. The state government recently estimated that the figures should be increased by about 16 per cent to allow for the rise in costs of the component items from 1979 to 1981; that would bring the need level to about $40 per month for a family of three, assuming full food stamp and medical benefits.

Before the administration and the Congress put their collective axe to the nation's social programs, they might do well to consider these facts: (1) the present welfare check of $270 furnished by the State of Maryland to our hypothetical family goes only half way toward meeting that minimum cash requirement; and (2) in Maryland alone, there are at least 30,000 people in family units whose monthly income, together with food stamps and Medicaid, leaves them below the minimal standard of living, but who do not qualify for welfare under existing standards.

The key point is that, if our assessment of need is a fair one, any family of three with less than $540 per month to live on is needy, even if it receives the maximum in food stamps and free medical care. (Dissenters are invited to point out the "fat" parts in our monthly budget.)

But let's suppose we were too liberal—about 10 per cent high. Let's peg the level of need for a family of three at $500 per month. Would any of the Reagan cuts affect a family at this level?

FROM THEIR MOUTHS

You bet they would. Welfare reductions would affect this family—especially if it happened to have, say, a high school senior aged 18. The proposed cap on Medicaid will either make such a family in Maryland altogether ineligible for the program, or reduce covered services (which would have to be paid out of some source such as the monthly food budget), or both. Cuts in the food stamp allotments and some other proposed "adjustments" would almost literally take food out of this family's mouths. So would school lunch cutbacks.

So when we talk of trimming waste from these programs, let us not be under any illusions. There is waste, to be sure, and eligibility limits for some programs may be too high.

The Reagan proposals would trim benefits for many who undoubtedly can survive without them. But the proposed cuts would also reduce benefits to many people who desperately need them.

We are not just talking about surfers in California who use food stamps to buy beer and wine (by the way, someone had better tell the "senior officials" to stop using that one: by law, food stamps cannot be redeemed for beer or wine). Nor are we talking about strong men who would rather loaf and drive Cadillacs than work (I don't know about other states, but the vast majority of Marylanders on welfare are women and children, and hardly any of them drive cars; it is pretty hard to make the payments on $270 per month).

Many of these cuts would hit people who clearly are in need. As for those cuts which take from recipients who are not "truly needy," you might expect to hear the administration propose to use the savings from those reductions to increase benefits to the truly needy. You don't; no Robin Hoods here.

So, Mr. President and Mr. Stockman, please be candid and clear about what is being proposed. There is a respectable case to be made for drastic budget cuts. There is a case to be made for structuring those cuts to affect a wide range of programs.

If you must, tell the poor that the country cannot afford to pay as much as it has in the past for their benefits. Tell them that the programs need to be simplified, that eligibility has to be tightened. Tell them that it is sounder policy to cut back now, so that everyone—including themselves—will be more prosperous in the future.

Just don't tell them they aren't "needy."

I have a recurrent fantasy, which is that, by some miracle of modern technology, David Stockman were suddenly to find himself unemployable, with two children to raise and an income of $300 per month. He might still be a believer in supply-side economics. Knowing his reputation for a well-disciplined intellect, I can imagine that he might even persuade himself that it would be in the public interest to reduce his own benefits. But I doubt he would say that he didn't need the money.●

DIABETES: THE SILENT KILLER

HON. WALTER E. FAUNTROY

OF THE DISTRICT OF COLUMBIA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 6, 1981

● Mr. FAUNTROY. Mr. Speaker, I am pleased to be a cosponsor of House Joint Resolution 84, which designates the week of October 5-11, 1981, as National Diabetes Week.

This disease, the third largest cause of death in our Nation, has stricken 150,000 people in the District of Columbia. Across our Nation, approximately 10 million Americans suffer from diabetes and 600,000 new cases are diagnosed each year. Regrettably, the incidence of this life-threatening disease appears to be increasing.

Diabetes is a disease whose cause is unknown and while treatment is available, its effectiveness is dependent upon early diagnosis of the ailment. As a result, it is imperative that the American public be educated in recognizing the early warning signals of the disease, and that funds be available for research so that one day soon its cause and a lasting cure may be found.

The American Diabetes Association, Inc., has made an invaluable contribution in both education and research. I would like to share with my colleagues a partial listing of the activities of the Washington, D.C., area affiliate of this national organization as listed in its annual report:

RESEARCH

Research grants are awarded to provide scientists from leading medical schools with equipment and technical assistance for the study of the cause of diabetes and the search for its cure. Funding from the Washington, D.C. Area Affiliate is granted after careful peer review of all applicants by the Affiliate's Research Committee. Beginning in 1981, the Affiliate will sponsor the "E. Clarence Rice Fellowship", (Dr. Rice founded the Diabetes Association of the District of Columbia in 1964), to fund a young physician for one year in a diabetes-related research project under an established local investigator.

PUBLIC EDUCATION

The Washington, D.C. Area Affiliate educates the general public to recognize the seriousness of diabetes and to know its warning signs. The affiliate employs a nurse and dietitian who present community-based education programs to schools, senior citizen centers, and government agencies. We provide speakers for women's clubs, church groups and service organizations. Each spring the Affiliate participates in health fairs reaching thousands of area citizens and our public service announcements are seen and heard on the major metropolitan TV and radio stations.

PATIENT EDUCATION

Monthly nutrition classes, the Diabetes Education Core Course, and our Annual Education Seminar are highlights of the D.C. Area Affiliate's Patient Education Program. Our nurse and dietitian are available to answer medical and diet-related ques-

tions. Our professional committees have published nutritional supplements to the standard ADA exchange list and booklets designed to educate the diabetic in the self-management of his or her disease. In addition, the Affiliate Support Groups—Parents of Diabetics, Adult Group and Young Adult Group—meet regularly to discuss pertinent issues, share experiences, and hear lectures by guest speakers.

PROFESSIONAL EDUCATION

To assure continuing improvement in the care of diabetic patients, the Affiliate sponsors educational programs for physicians, nurses and dietitians which keep the health care team abreast of the latest developments in research and treatment methods.

Finally, diabetes is a disease which brings a great deal of stress, concern, and uncertainty into the lives of those it afflicts. Dr. Elliot P. Joslin, an early pioneer in the research and treatment of this illness, stated:

Diabetes is a disease which depends on the honesty and intelligence of the patient for successful treatment. It develops character, for to follow the rules involves self-control.

During National Diabetes Week we will resolve not only to educate and seek a cure to this affliction; but also pause to offer our support, and recognize the courage, of our fellow citizens who bear the burden of this affliction.●

SISTER MARY BENEDICT AND THE FRANCISCAN HANDMAIDS OF MARY SERVE IN HARLEM

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, April 6, 1981

● Mr. RANGEL. Mr. Speaker, I would like to bring to the attention of my colleagues an article written in the New York Times, dated March 1, 1981, describing members of the Franciscan Handmaids of Mary. They are a group of black nuns in Harlem, dedicated to serving the children, poor, and elderly in the community. A dear and longtime friend of mine, Sister Mary Benedict, is a member of the Franciscan Handmaids of Mary. Her compassion, not only for the poor and disadvantaged, but for all humanity, has made her one of the most outstanding citizens in my district. I would like to commend her and all the sisters for their role in helping to make the area in which they work a safer and better place.

The article follows:

ORDER OF BLACK NUNS DEVOTES ITS LABORS TO HARLEM

(By Laurie Johnston)

Sister Hyacinth, untethered by her long, dark blue skirts and veil, shuttles a blue station wagon among Harlem's parochial schools, picking up children of working parents for safekeeping after school. Mornings, this Franciscan Handmaid of Mary shepherds the aged to clinics or does errands for the housebound.

Between her obligations at the Convent of St. Benedict the black, the short and sturdy nun also helps at the Joseph P. Kennedy Jr. Community Center, 134th Street and Lenox Avenue. She headed its Senior Citizens' Center before turning after-school chauffeur and caretaker.

"Sometimes, when there's vacation or a short school day, I just boil up a big pot of macaroni at the convent and keep 20 or 40 children playing safely in the yard," she said with a twinkle behind her eyeglasses.

Sister Hyacinth, who was born Olive Thomas on St. Thomas, in the Virgin Islands, but grew up in Harlem, is one of 27 New York members of the Franciscan Handmaids of Mary. The only predominantly black order of Franciscans, it was founded to teach black children in Savannah in 1916 but moved its headquarters to Harlem in 1922.

Of the 700 black nuns now in this country, 500 are in their own three orders, according to the Rev. Mother Loretta Theresa, the Handmaids' mother-general. (The other are the Baltimore-based Oblate Sisters of Providence and the Holy Family Sisters in New Orleans).

The Handmaids were invited north, by the late Francis Cardinal Hayes, when blacks were first flowing into Harlem and Black Roman Catholic clergy were rare. The current Catholic population in the area's seven black parishes is 5,000 to 10,000, according to the Office of Black Ministry of the New York Archdiocese. The Handmaids' present membership reflects the Caribbean and West Indian immigration.

The mother house, 15 West 124th Street, is a bastion of serenity and self-discipline a block or two from the bustle of Lenox Avenue and 125th Street and the hustle of gambling clubs and narcotics "markets."

Among residents of the mother house is Mother Dorothy, a former mother-general, who moved north with the Savannah group. Another is Sister Bernadette, a tiny, elderly seamstress who for years has made priests vestments, dressed dolls and church statuary and provided curtains, aprons and pillows for the Kennedy center.

Next door to the mother house, in what had been the Handmaids' training center when they had novices to train, the nuns operate Harlem's only Catholic residence for working women.

At Misericordia Hospital in the Bronx, Sister Joseinda teaches pediatric nursing. Sister Maria Goretti Mannix is archdiocesan superintendent of elementary schools for Manhattan. Several Handmaids teach in parochial schools in Harlem and elsewhere in the city.

On Staten Island, the Handmaids have a camp and a novitiate with the order's only current postulant—who is white. (They have had white novices before but none took final vows.) The camp provides summer vacations to 300 children from Harlem, the South Bronx and Bedford-Stuyvesant area of Brooklyn.

St. Benedict the Black's Day Nursery, where the Handmaids supervise 68 children, is in the Kennedy center, near one of Harlem's best apartment areas and the Harlem Hospital medical complex.

Describing the waiting list as "unreal," Mother Miriam Cecilia, the director, notes that "maybe about 9 percent are Catholic."

"But most will go on to parochial schools so they have to pass skill tests," she said. "Small as they are, they all have formal work. The parents tell us, 'We don't want them to play all day.'"

A scarcity of candidates makes the Handmaids something of an endangered species. From a peak of 80 in 1967 the membership has dropped to 38, with a median age of 60. Besides the 27 in New York, others conduct two schools in North Carolina, one in South Carolina and one in Kingston, Jamaica.

The Handmaids—not a mendicant order—depend mainly on nursery school tuition fees ($35 weekly), salaries of sisters teaching elsewhere and annual bazaars and garden parties. Sister Hyacinth asks $5 a week for after-school service but, she said, "Some parents say, 'I'll pay you next week,' and others can't pay at all."

Although both residence and camp "need a lot of repairs," Mother Loretta Theresa said, "we can't in good conscience charge the young ladies or poor children what we need."

Last year the Handmaids of Mary were co-recipients—with Eddie Bonnemère, the jazz pianist and liturgical composer—of the archdiocesan Black Ministry's Pierre Toussaint Medallion for community service and spiritual leadership.

This evening, as a 65th-anniversary benefit for the Handmaids and their work, a concert of Dr. Bonnemère's music will be presented at Avery Fisher Hall. And, six or seven Handmaids will be singing in his Jesu Choir. They nearly always are when the choir sings his jazz masses at vespers at St. Peter's Lutheran Church the first Sunday of each month.●

THE ILLUSION OF AMERICAN OMNIPOTENCE

HON. PATRICIA SCHROEDER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Monday, April 6, 1981

● Mrs. SCHROEDER. Mr. Speaker, in the short time that Alexander Haig has been Secretary of State he has, on more than a single occasion, echoed Theodore Roosevelt's boast of the 1890's. "No triumph of peace is quite so great as the supreme triumphs of war." Roosevelt was seeking war with England, Spain, Chile, any war, in order to bolster American prestige and strengthen our military.

Recently I came across Dennis Brogan's essay, "The Illusion of American Omnipotence," which was originally published in the December 1952 Harper's magazine. Mr. Brogan's essay ought to be added to Secretary Haig's reading list, perhaps on a daily basis.

Remember that Mr. Brogan was writing during the Korean war, just after the so-called fall of China, and only 7 years from the close of World War II.

Part 1 follows:

THE ILLUSION OF AMERICAN OMNIPOTENCE

(By D. W. Brogan)

I am writing this on the Pacific Coast, before the election, but in the conviction that the result of the election will very little affect the problem that I want to discuss. Even if the Republicans should make a clean sweep, even if the State Department is cleaned out, from the Secretary to the doorkeepers, even if the Pentagon is purged

from the Joint Chiefs of Staff to the leaders of the rescue teams who find lost visitors, one problem of American policy will remain: the problem of the existence, in the American mind, of what I call the illusion of omnipotence. This is the illusion that any situation which distresses or endangers the United States can only exist because some Americans have been fools or knaves.

Such a situation may exist because of conditions about which the United States has, and will have, little to say. For America, powerful though she is, is not omnipotent. A great many things happen in the world regardless of whether the American people wish them to or not. I deeply regret this state of affairs; like Bertrand Russell, I would gladly settle for an American hegemony; but we are not representative characters, and American hegemony not only does not exist, but is not even universally expected or desired.

I should, perhaps, say that the illusion of omnipotence to which I refer is not shared by all Americans. Nothing could be sillier than to attribute to nearly 160,000,000 people one common attitude, or to assume, as many European intellectuals do, that there is such a thing as "what the American people are thinking." Nevertheless, the idea that I am trying to describe is expressed by Senators and columnists, by candidates, by preachers, by people overheard in taverns and club cars, in drugstores and restaurants—the idea that the whole world, the great globe itself, can be moving in directions annoying or dangerous to the American people only because some elected or non-elected Americans are fools or knaves. When something goes wrong, "I wuz robbed" is the spontaneous comment—the American equivalent of that disastrous French cry, "Nous sommes trahis."

It should also be said that I am not reproaching the American people, or even any important fraction of them, with the sort of mere arrogance that the British displayed in the nineteenth century, the arrogance that made the humiliation of the Boer War so refreshing to the rest of the world. There would be plenty of justification for reproach if the American people were as pleased with themselves today as the English were around the time of Queen Victoria's Diamond Jubilee. But except in the Tribune Tower and a few other strongholds of the spirit of Jefferson Brick, Americans are not overflowing with self-satisfaction.

It would not be surprising if they were self-satisfied. For twice, in a not very long lifetime, America has redressed the balance of history. But for American intervention in the first war, it would have ended in a draw. But for American intervention in the second (which began with Lend-Lease, not with Pearl Harbor), Hitler would have had, with his Axis partners, a free hand. One result of this would, in the long run, have been war with the United States; but that long-run consequence matters little in this context. What does matter is that what stopped the Second and the Third Reich was American power. By 1945—with the greatest fleet, the greatest air force, and one of the two greatest armies in the world—the United States had become a world power such as had never been seen before. Never had plowshares been beaten into swords so fast and on so large a scale.

And never were swords beaten back into plowshares as fast as in 1945. As a demonstration of power, and of pacific intention, the scenario was perfect. The crowd that formed a conga line round the White House on V-J Day represented the American temper of August 1945 to perfection. So did Mr. Leo Crowley cutting off Lend-Lease; so did the immediate pressure to end all the controls and get the boys home. True, there was the atomic bomb—but the thought that there would soon be a world in which the atomic bomb would be a very present hope would have shocked nine Americans out of ten. The war had been won; the facist menace had been destroyed. True, there was no such mood of high hope as in 1919; but the lesson of 1919 was not lost. America would not again take mere victory for enough, would not again walk out on the job.

And America has not walked out on the job. American policy since 1945 has, on the whole, been wise, far-seeing, magnanimous. Compare it with the policy of the years after the first war, with the policy of the years of Harding and Coolidge, and the growth in wisdom and responsibility is remarkable. Had there not been such a growth, the Kremlin would have won without firing a shot.

It is partly because the American people feel—rightly—that they have used their great power generously, that in 1952 they are perplexed, distressed, angry and to some extent deluded. Why is it that, given the power, given the generosity of its use, the United States should be involved in the Korean mess? Why should so great a part of the world have passed into hostile hands? Why should the United States still be in danger, know the irritation of the draft in "peacetime," suffer, in Korea, one of the most humiliating of American military defeats, and nominate, for the Presidency, a soldier not merely or mainly as a reward, but because the times seem to call for a soldier in the White House?

It is my opinion that one reason for American distress is the American belief in American invulnerability and American omnipotence.

II

Belief in American invincibility is, on the whole, a good thing. A corresponding English belief in 1940, without nearly as much material justification for it, probably changed the history of the world. "The English always win, don't they?" asked my intelligent four-year old son. The English won, but at a cost that has taken away the taste for victory. The Russians won too, but in the recent past they had lost. Probably the only people in the world who now have the historical sense of inevitable victory are the Americans. This belief, in its most extravagant, or McCormick, form, assumes that America doesn't need friends. In the less romantic, or Taft, form, it assumes that America doesn't need friends much. But even in the case of people who laugh at the Colonel and swear at the Senator, there is a lingering suspicion that there must be something grossly wrong when American policy suffers rebuffs; when, in spite of American opinion and interests, things go awry.

That grave mistakes have been made need not be doubted. As Mr. Walter Lippmann keeps on reminding his fellow-countrymen, one of the most obvious was the decision to exploit the victory at Inchon, regardless of the natural interest of the Chinese Communist government, of any Chinese government, in the arrival of a victorious American army on the Yalu. For that decision, Mr. Truman, Mr. Acheson, and General MacArthur are responsible, in that order. (For the actual military dispositions, General MacArthur is responsible, unless we are, belatedly, to blame Lincoln for the errors of General John Pope before Second Manassas.) That a naive view of the world was displayed at Yalta, and long before Yalta, by many powerful Americans, is true. Eyes were kept on the conniving British Empire, as they are still kept by Colonel McCormick, Mr. George Sokolsky, and others—eyes which had better have been directed elsewhere. But even had those eyes been more prudently fastened upon Russia, even had American policy been controlled by a Richelieu or a Bismarck, some of the present disillusionment would have occurred at the same. For America, the most powerful nation in the world, was not omnipotent and a great many things in the world were going on and going their own way regardless of the views of the American people.

For, great as is American power, it is not so great as to quell, by its mere existence, all opposition. In the good old days an English fleet could sail into the Bay of Naples and tell that able Bourbon, King Charles III, that he could be neutral or have his capital blown up around his ears. In the good old days before the "good neighbor" policy, the United States (or the United Fruit Company, if they could be distinguished) could lay down the law in the Caribbean. As Cleveland's Secretary of State said, the fiat of the United States was law in America, if the United States chose to insist.

But those days are gone. The United States could insist if she wanted to, but at excessive political cost. Even that American by-blow, the Republic of Panama, can defy Washington, up to the point where the safety of the United States is directly and indisputably involved. These facts are accepted. Yet a great many Americans, when China gets out of hand, or into the wrong hands, think this can only be because of some gross error or even crime on the part of the official rulers of America. Even so simple an explanation as that Chiang made the mistake denounced in all the military textbooks, and exemplified in the careers of Jefferson Davis and of Hitler, of commanding at long range and through favorites, is ignored. People feel that Chiang's defeat (a disaster for America, I freely admit) must have been due to American folly or American treason. People refuse to believe that it might have had other, more important causes, above all the one admirably described by Senator Tom Connally: "If he's a generalissimo, why doesn't he generalize?"

The Chinese situation is, at the moment, the most important of these American preoccupations and causes of bewilderment. But the sense of bewilderment is visible in some American attitudes toward Europe too. Why hasn't Marshall aid won over the French Communists—that is, ended a schism in French society going back to the Commune of 1871, if not to the Commune of 1793? Why hasn't it converted "Red Emilia," the Italian district that was in a violent revolutionary uproar in Wilson's first term? Why is it not certain that the inhabitants of the "People's Republic of Germany," after being fought over, and driven here and there, and after having had their social structure destroyed, following the disillusionments caused by the collapse of the Hohenzollerns, the Weimar Republic, and the Thousand-Year-Reich, will welcome slogans admirably designed for Cincinnati or Oakland? In such perplexities there is embedded, at the foundation perhaps, the illusion that the world must go the American way if the Americans want it strongly

enough and give firm orders to their agents to see that it is done.

III

This illusion of omnipotence is best illustrated by a very common American attitude toward the Chinese Revolution. In this attitude—apparently the dominant one at the moment—there is a curious absence of historical awe and historical curiosity. The Chinese Revolution, an event of immense importance, is often discussed as if it were simply a problem in American foreign and domestic policy and politics. The Communist triumph in China is discussed as if it were simply the result of American action or inaction, the result of the mistakes, and worse than mistakes, of General Marshall, Secretary Acheson, President Roosevelt, and the Institute of Pacific Relations; and as if the Communists or the Russians would not have "captured" China had American policy been represented and controlled by Representative Judd—or even, perhaps, by Senators Cain and Jenner.

Is this not to display the belief in American omnipotence in very striking form? What is going on in China affects the oldest civilization now in existence. It affects about a fifth of the human race. It must have roots, deep roots, in the Chinese problem as seen by the Chinese. This is no matter of a regime imposed by Russia on a helpless small nation like Romania or Hungary. It is a historical phenomenon that may turn out to be more important than the Russian Revolution. It may well turn out, also, to be disastrous for us and for China. But the first thing to notice is the size of the phenomenon; to notice, for example, that there are five Chinese for every two Americans. What inherent necessity is there that the decision in China is, was, or ever will be in American hands?

It is not only a matter of scale. There is distance. China is six thousand miles from the Pacific Coast of America. How was and is American power to be effectively exercised at that distance? I anticipate one answer—that Russian power is being exercised, and that it was Russian power (in the absence of American power because of American folly and treason) that "took over" China. This is not demonstrated and in this crude and popular form is not probable. But even if it were true, Russia is not six thousand miles from China. Russia has had a common frontier with China for three hundred years, and as Russia's center of industrial gravity moves eastward, Russian power gets nearer China and can be more readily exercised there. In a straight contest for control of China between the United States and the U.S.S.R., with the Chinese regarded as vile bodies, the U.S.S.R. would hold the trumps. To ignore that is to show the attitude of mind of those who have complained that, at Yalta, F.D.R. "permitted" Russia to become a Pacific power. Russia was a Pacific power before the United States existed. And she was and is an Asiatic power, which the United States is not. Lake Baikal and Lake Superior are on different continents. Vladivostok and Peiping are not.

But the real lack of historical reverence and realism is in the assumption that Russia "took over" China as she took over Poland. Even if we assume that there is as united an opposition to Communist rule in China as I believe there is in Poland, the scale of the taking-over ought to impose reflection. By what miracle was it done? Could General Hurley or General Chennault have prevented it? Would a sounder understanding of what the Communists were have prevented the Communist triumph? If it would have, then China is a more torpid body, more open to mere manipulation, than it is pleasant to think. If so great an event as the Chinese Communist Revolution could have been prevented by a different American policy, China is "a corpse on the dissecting table," as Charles Gavan Duffy said of Ireland after the Famine. In that case, Mao and Stalin may dissect it and make a monster of it like Dr. Moreau in H. G. Well's prophetic story. If it was taken over as easily as all that, it will be kept taken over even more easily.

There is some reason to believe and to hope that it is not quite as simple as this. We are in danger of being obsessed with the important and indisputable fact that world Communism is a real and potent force and that it is controlled from Moscow. We tend, therefore, to see the hand of Moscow everywhere and attribute to it an initiating and dominant role that may not always be justified. The Chinese Revolution, we should remember, has been going on longer than the Russian Revolution. Sun Yat-sen was the successful leader of a revolution when Lenin was an obscure and not too hopeful exile in Switzerland. But, I shall be told, that was a different Chinese Revolution; that was the good Chinese Revolution, the one that deposed the Manchu dynasty and abolished the pigtail and the binding of feet; that was the revolution which was inspired and encouraged by American missionaries and American-trained students. But isn't it a truism of history that when you start a revolution, you can't be sure where it is going and how far?

It wasn't Lenin who overthrew the Tsardom or Robespierre who stormed the Bastille. In a long, bloody, and profound revolution, the extreme party has many advantages. It may not win; it may not stay victorious; the Jacobins learned that. But it may destroy the old order, the old ruling classes, the rival revolutionary parties, Social Revolutionists or Birondins. It doesn't need, in a genuine revolutionary situation, outside aid, outside doctrine, though it may get and benefit by both. The Chinese Communists got aid; they got doctrine. They probably benefited by both (though in 1927 they might have done better without either). But to deny that the Chinese Communists are a large, native Chinese party is to fly in the face of all the evidence. Their leaders may be docile tools of Moscow, but that doesn't alter the fact that the Chinese Communist party which survived the Kuomintang war against it, which survived the "long march," is a formidable indigenous party. On the record, it seems to have been the most formidable indigenous party—the one that, had both the U.S.A. and the U.S.S.R. stayed out, might have won anyway.

Could it have been prevented from defeating the Kuomintang by the provision of "massive and controlled" American aid? I have already suggested that the Russians could play that game too, and their aid could have been both more massive and controlled than the American. But even assuming that they did not so react to open American intervention in a civil war against their political allies, in a neighboring country, how was the aid to be made massive and how was it to be controlled?

Does anyone think that a continuation of what arms aid had been given, or even a stepping-up of such aid, would have done the trick? The Washington wit who said that supplying arms to Chiang was simply a round-about way of Lend-Lease to the Chinese Communists was a jester, possibly frivolous; but he was not altogether wrong. Lend-Lease to Britain, Lend-Lease to Russia was direct and massive aid to coherent, united, and combative governments. It was not aid to a divided party in a country torn and tired by a generation of foreign and domestic war. More aid to Chiang might have prolonged the war; it might have saved the situation south of the Yangtse; but would it have brought conquest of the Communists by Chiang's forces?

And how was American aid to be controlled—except by exercising a degree of American authority which would not only have inflamed the *amour propre* of the Generalissimo, but would have deprived the Kuomintang of its last political asset, its claim to be "nationalist," to represent the independence of China? Could the aid have been effective without active American participation—without keeping the Marines in China, without sending in more troops, without, in fact, involving the United States in a greater Korean war? Does anyone who remembers the temper of the American people in 1945, from the White House and Capitol to churches and bars, believe that such a policy was politically practicable?

I have been in America every year since 1944 with the exception of 1949. I have sometimes been twice in America in one year. I have been in all regions. At no time before the Korean war did I find anything like the resolution to make great sacrifices to save China which alone could have saved China.●

THE REAGAN ADMINISTRATION'S SHIFT TOWARD SOUTH AFRICA

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, April 6, 1981

● Mr. STOKES. Mr. Speaker, Thank you for giving me this opportunity to comment on what I view as an alarming and apparent shift in our foreign policy toward South Africa and that apartheid government. From my perspective, the actions of the Reagan administration to this date with regard to South Africa, amount to a clarion call that the United States is ready to either reverse or modify the pro-African policies of the Carter administration.

These signals have been received with anger and disillusionment by black-African countries, especially oil rich Nigeria, as well as among black Americans. Conversely, the same signals have been received by the South Africans who are elated about the prospect of being accepted by the United States. To me, Mr. Speaker, the signals constitute a comedy of grave errors on the part of the Reagan administration.

Mr. Speaker, I am adamantly opposed to a foreign policy shift, however shrouded as being subtle, in favor of the oppressive government in Pretoria. This apartheid government is notorious around the globe for its inexcusable human rights violations and overt

practices of racism against blacks in South Africa as well as acts of aggression in neighboring countries like Angola, Namibia, and Mozambique. In view of these blatant violations and disregard of human life and rights, we must not shift our policies toward South Africa until their policies and government are drastically changed.

But, Mr. Speaker, President Reagan is seemingly blind to this just and moral obligation and has divorced himself of the ramifications of his actions with regard to South Africa. What the Reagan administration seems to be looking at is not the horrid Pretoria government but at our own self-interest. Even high ranking administration officials freely articulate the self-centered rhetoric that we should base our policies toward South Africa on our own self-interest in terms of defense and resources instead of on South Africa's apartheid policies of racial segregation and oppression.

To be concise, Mr. Speaker, the signals we are sending show a shift of U.S. interest from the quality of human existence for the people of South Africa to the quality of military strategy. With this pronouncement, we will be taking the stance that America, the self-proclaimed champion of human rights is no longer concerned with that but rather has regressed to the callous policy of being concerned only about military and economic superiority.

Mr. Speaker, the stance that these signals imply are wrong. While they may well help us win the grand prize in terms of help with defense and resources, they will relegate us to the booby prize in terms of the principles of human rights and equality.

Now, Mr. Speaker, the signals that I have alluded to are quite visible. When put together, we have the harsh reality of the priorities of the Reagan administration in terms of Third World countries and South Africa.

The first signal, Mr. Speaker, is the rumor possibility of the Reagan administration inviting Prime Minister Botha to visit Washington.

The second signal occured 2 weeks ago when we welcomed a group of high-ranking military officers from South Africa including the army's intelligence chief to this country. The official explanation for this was that we didn't know who they were when they applied for their visas.

The third, and probably most disturbing signal, was when U.N. Ambassador Jeane Kirkpatrick broke with tradition and met secretly with South Africa's top military intelligence officials. Others who met with them were the Deputy Director of the Defense Intelligence Agency, Maj. Gen. Richard Larkin and an official of the National Security Council.

Mr. Speaker, these signals, when put together are wrong and most importantly dangerous. I ask my colleagues to think about these signals and the ramifications. To enhance this consideration, Mr. Speaker, I insert an article in the RECORD written by Mr. Clayton Fritchey on our apparent shift and signals to South Africa.

[From the Washington Post, Mar. 16, 1981]

A WORRISOME TILT TOWARD SOUTH AFRICA

(Clayton Fritchey)

SALISBURY, ZIMBABWE.—It is hard to exaggerate the dismay of black Africa over what it regards as the Reagan administration's tilt toward white South Africa.

Here, in the region dominated by the "frontline" nations of southern Africa (Zambia, Zimbabwe, Tanzania, Mozambique, Botswana, Angola), the concern is especially acute, for their fate is inexorably involved with the future of the Pretoria government.

Ever since the election of Ronald Reagan, there have been hitherto suppressed fears in this part of the world that the new U.S. president would reverse or modify the pro-Africa policies of former president Carter, particularly his effort to liberate Southwest Africa (now Namibia) from long domination by South Africa.

These fears have now been confirmed by President Reagan's first statement on South African relations: "As long as there's a sincere and honest effort being made [to end apartheid], we should be trying to be helpful. Can we again take the other course? Can we abandon a country that has stood beside us in every war we've ever fought, a country that is essential to the free world, that has minerals?"

It was not surprising that these comments were promptly hailed in Johannesburg by Prime Minister P. W. Botha and other South African officials. Headlines in the Johannesburg press proclaimed: "U.S. Will Not Leave South Africa in the Lurch."

Washington, it was reported, had reversed the American policy of the past two decades. One report said, "Not only is it virtually the opposite of that adopted by the Carter government, but it is even more friendly than the policy of Richard Nixon."

The distress in black Africa was deepened by the fact that Reagan's remarks coincided with the start of a United Nations debate on South Africa's latest refusal to agree on a date to implement an independence plan for Namibia, where native liberation forces have been fighting South African troops for independence.

Reagan's statement is seen as the first step in a retreat from that plan, which was proposed in the first instance by the United States, along with Britain, France, West Germany and Canada. It called for a ceasefire supervised by U.N. peace-keeping forces, to be followed by elections and the drafting of a constitution, also under U.N. auspices.

South Africa accepted the proposal in principle nearly three years ago but has always found an excuse for not putting it into effect. At a recent Geneva conference, it was accused of stalling until Reagan came to power.

On the heels of Reagan's new statement, the U.N. General Assembly, by a vote of 114 to 0, condemned South Africa for blocking a settlement and called for sanctions by the Security Council. The United States abstained, but there is little doubt that it will veto sanctions when the council acts.

The reaction in black Africa to Reagan's views was summed up by the times of Zambia, which faithfully reflects official opinion. "America," it said, "cannot be a true friend of free Africa. Reagan's remarks have dashed any such hope. . . . Reagan has sold the conscience of the American people for investments in and profits from South Africa."

In friendly Kenya, where the United States is counting on bases for its Indian Ocean military operations, The Nation of Nairobi said, "It is obvious that Mr. Reagan has already come around to the ill-conceived view that stability in South Africa is essential to the promotion of Western interests in the region as a whole."

Noting Reagan's statement that South Africa was making a "sincere and honest effort" to stamp out apartheid, The Nation asked, "Whom is he kidding?"

The front-line nations are not in a position to strike back at the United States, except by turning to Russia for help, but the Times of Zambia is urging Nigeria to use the "oil weapon" against America.

Although few Americans are aware of it, Nigeria is the second-largest oil supplier to the United States—so much so that last year the U.S. trade deficit with Nigeria was around $13 billion, the largest the United States has ever had with any trading partner.

Moreover, Nigeria has been selling its oil to the United States at a price substantially below what it could get on the spot market. Nonetheless, when President Shagari of Nigeria visited the United States a few months ago, he pointedly said, "We cannot allow businesses to accrue profits from us which they will then use to support the oppression of our brothers in South Africa."

The Organization of African Unity, representing 51 of the continent's black nations, is also dedicated to the independence of Namibia. So the question seems to be: Should the United States risk alienating all of black Africa in order to ingratiate itself with an ever more isolated white South Africa?●

THE NEED FOR A NEW AMERICAN POLICY TOWARD SOUTH AFRICA

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, April 6, 1981

● Mr. SOLARZ. Mr. Speaker, last week I introduced comprehensive legislation, H.R. 3008, which would bring critical aspects of our policy toward South Africa in line with our frequently expressed condemnation of the legally sanctioned system of racism which exists in that Nation.

This bill, which is the product of 2 years of hearings and research I conducted as chairman of the Subcommittee on Africa, has four parts: First, establishment of a set of legally enforceable fair employment standards for American firms operating in South Africa with more that 20 employees; second, a ban on loans by U.S. banks to the South African Government or its parastatal entities, except for loans made for educational, housing, or health facilities which are available on a totally nondiscriminatory basis in areas open to all population groups; third, public disclosure of U.S. bank

loans to any South African corporation; and fourth, a ban on the importation into the United States of the South African krugerrand or any other gold coin minted or offered for sale by the South African Government.

REASONS FOR THE BILL

South Africa offers the world a unique example of systematic, legally enshrined discrimination on the basis of race. Of the 24 million people who live in South Africa, only the 4 million whites enjoy full political, legal, and economic rights. Millions of blacks have been stripped of their citizenship and arbitrarily assigned to ethnically based homelands which have remained in a state of perpetual underdevelopment. Blacks are consigned to an inferior educational system in which per pupil spending is roughly one-tenth of the spending in white schools. Blacks and other nonwhite South Africans have been uprooted from their homes in order to allow white citizens to move in.

To keep the country locked into a policy of white supremacy, the Government refuses to allow political participation by nonwhites in parliamentary elections. The Government has shown no desire to discuss the possibility of political power-sharing arrangements which would include Asians, coloreds, and blacks, as well as whites. Nor has the Government recognized that by pursuing its present policies it greatly increases the chances of serious and sustained violence in South Africa. While supporters of the present South African regime call it a bastion against the advance of communism, the truth is that it is the very existence of the apartheid policies of the South African Government which constitutes the greatest incentive for Communist expansion in Southern Africa.

In the final analysis, a political resolution of South Africa's problems will come from within South Africa, not from the United States or any other outside nation. Yet given the large amount of economic interaction between our two countries, there are a number of steps we could take which would have a significant symbolic and substantive impact upon events in South Africa.

We should take those steps for humanitarian, as well as strategic reasons. In the first place, the apartheid system in South Africa is repugnant to our own democratic principles. Second, South Africa's racial policies are assailable on strategic grounds. It is inconceivable that a small minority in South Africa will be able to continue indefinitely the denial of political rights to the majority of its people solely on the basis of race. It is therefore in the enlightened self-interest of the United States, in terms of our future relations with South Africa as well as many other African and Third World countries, to distance ourselves from the South African regime and demonstrate in meaningful and concrete terms our affinity with the legitimate aspirations of nonwhite South Africans.

I believe we can achieve that goal through the legislation I have introduced.

THE ECONOMIC RELATIONSHIP

The United States maintains extensive economic ties with South Africa. The 350 American compaines in South Africa employ nearly 100,000 workers, of whom about 70 percent are black. The book value of the American corporate investment is about $2 billion, making the American stake in South Africa second only to that of Great Britain. In addition, U.S. trade with South Africa reached almost $3.5 billon in 1979, making us South Africa's largest trading partner.

While some American firms have been in the forefront of progressive reforms at the workplace, many others are only paying lip service to fair employment principles. The Sullivan Code, a statement of fair employment principles drawn up by the Reverend Leon Sullivan of Philadelphia and signed by over 100 companies in South Africa, has provided some momentum for equal employment opportunity. But the Sullivan Code is voluntary, and as Reverend Sullivan himself has testified, many of its signatories have honored the code more in the breach than in the observance. Indeed, that is one of the reasons Reverend Sullivan has spoken out in favor of a mandatory code.

On a study mission to South Africa last summer, I found that the overwhelming majority of blacks with whom I spoke felt that the United States should withdraw all investment, or at least prohibit new investment, in South Africa. Significantly, they also said that if those measures could not be achieved and U.S. firms were to remain in their country, those companies should abide by a fair employment code which eliminates racial bias and provides equal opportunity in the workplace.

Whatever the advantages of disinvestment by American firms may be, disinvestment is clearly not politically feasible at this time. There are, however, a number of other actions Congress could take which would have a constructive impact on the prospects for peaceful change in South Africa and which would be well received by the majority of the people in that country.

FAIR LABOR CODE

The bill I have introduced sets out seven fair employment principles which American companies with more than 20 employees must adhere to: No segregation at the workplace; equal employment; equal pay; establishment of minimum wage and salary structure; increased representation of nonwhites in managerial, supervisory, and administrative jobs; improvement of the quality of employees' lives outside the workplace; and labor union recognition and fair labor practices.

The bill empowers the Secretary of State, with help from corporations, labor unions, and other interested parties in South Africa and the United States, to monitor compliance with these principles. Failure to comply would result in the following penalties: loss of the right to enter into any contract with the U.S. Government; loss of the right to export any goods or technology directly or indirectly to South Africa; loss of the right to receive any tax credit or deduction for any income, war profits, or excess profits taxes paid or accrued to South Africa; and loss of the use of any services of the Export-Import Bank.

The adoption of this enforceable code of fair employment for American firms in South Africa should not be viewed as legitimizing our corporate presence there. Nor should it be seen as a catalyst for wholesale, immediate change in South Africa. An effective fair employment code can, however, make a meaningful difference in the lives of the men and women who work for American firms and can send an unmistakable signal that our country does not countenance South Africa's system of racial discrimination.

BANK LOANS

Another component of my legislation is a ban on American bank loans to the South African Government or its parastatal institutions, except for any loans made for educational, housing, and health facilities which are available on a totally nondiscriminatory basis in areas open to all population groups. Some American banks have had the foresight to suspend all loans to the South African Government. Other American banks have taken a different approach and have thereby helped to provide financial and psychological sustenance for the apartheid regime.

The South African Government has hailed the loans it has received from American banks as evidence of its international creditworthiness and respectability. South Africa says these loans are used to support black development—but always in the context of separate development, rather than for facilities accessible to and benefiting all population groups. It is simply unacceptable for American banks to directly promote a policy of racial separation through these loans.

My bill does not bar loans from U.S. banks to private entities in South Africa. It does, however, mandate disclosure of the amount, purpose, and recipient of these loans. The American people have a right to know the full

extent of our economic cooperation with South Africa.

KRUGERRAND SALES

Finally, my legislation would bar the importation into the United States of the krugerrand or any other gold coin minted or offered for sale by South Africa. Current holders of these coins would be allowed to keep or sell them.

Since the U.S. Government removed the restrictions on the purchase of gold by American citizens in 1975, South Africa has flooded the U.S. market with krugerrands. In 1978 and 1979, Americans purchased nearly half of all the krugerrands sold by South Africa. In 1978 this amounted to nearly $600 million and in 1979 the figure totaled over $800 million.

South Africa has used the sale of krugerrands to help push the cost of gold to abnormally high levels. While the resulting upsurge in gold prices has been the principal stimulus in the resurgence of the South African economy, South Africa has not used its increased wealth to promote genuine social change.

As gold prices have risen, the South African Government has not undertaken any steps to dismantle apartheid, institute a nondiscriminatory franchise, end residential segregation, terminate its homelands policy, or put large sums of money into black education and social services. The majority of the Government's increased earnings has gone into defense expenditures and major industrial and commercial projects run by the Government, and to expand social services for whites—not blacks.

By barring the importation of the krugerrand, Congress will prevent South Africa from draining away precious foreign exchange from our country in a manner which supports apartheid. A prohibition on krugerrand sales will symbolize to black South Africans that the United States is increasingly allied with their struggle for human rights, social justice, and complete political equality.

WAIVER PROVISIONS

The legislation allows for termination or waiver of various provisions to meet changing circumstances. The President may waive fair employment provisions of the bill upon a Presidential determination that enforcement would harm the national security interest of the United States. Congress would then have 60 days to overturn that decision by a joint resolution of disapproval. In addition, the fair employment guarantees in the bill would no longer apply if the President determined that the Government of South Africa has terminated its system of racial discrimination.

Provisions of the bill governing bank loans and krugerrand sales would be waived for up to 1 year if the President determines that the Government of South Africa has made sustantial progress toward the full participation of all the people of South Africa in the social, political, and economic life of that country, and toward an end to discrimination based on race or ethnic origin. This waiver could also be overturned by joint action of the House and Senate within 60 days.

The multifaceted, measured approach I have outlined here will not work miracles in South Africa. It can, however, demonstrate to the majority of the people of that country that the United States is willing to act, as well as speak out, against the day-to-day horrors of the apartheid system. It can demonstrate to many of our friends on the African Continent—including such strategically important nations as Nigeria, Kenya, and Zimbabwe—that the United States shares their view that South Africa's racial policies ar unacceptable.

Passage of the bill would have a beneficial effect within South Africa and would help us shore up our relationships throughout the continent. Not incidentally, it would undermine efforts of the Soviet Union to portray us as defenders of the apartheid system while itself posing as an advocate of human dignity and freedom.

ARGUMENTS ON THE OTHER SIDE

Some opponents of this type of legislation make the claim that quiet diplomacy will prove more effective than mandated restrictions on commercial activity. But those who advocate a course of gentle persuasion and voluntarism toward South Africa carry a particularly heavy burden of proof. For 32 years, since the Nationalist Party came to power in South Africa, the United States has pursued quiet diplomacy—and the situation inside South Africa has not significantly improved. When change does come to South Africa—as it inevitably will—the United States may wind up paying a heavy price for leaving the impression, our public pronouncements notwithstanding, that we would not offer meaningful opposition to the apartheid system.

Another critique of bills regulating our commerce with South Africa comes from those who claim it is wrong to single out South Africa when many other African nations, not to mention other countries elsewhere, have engaged in a systematic denial of human rights and escaped any punitive action by the United States. In fact, over the past several years, Congress has passed legislation directed against the Central African Empire, Uganda, Zaire, Cuba, Chile, Argentina, Vietnam, Cambodia, and other nations—in an effort to improve human rights or simply to express American abhorrence over the way people in these nations have been treated. Having imposed on these countries sanctions ranging from reduction in military assistance to elimination of economic aid and trade, Congress would certainly be justified now in placing modest restrictions upon our commerce with South Africa.

I believe the bill I have introduced would serve both our sense of national purpose and our national interest. I would very much welcome the support of other Members for this legislation.●

SPEECH BY MICHAEL NOVAK TO THE UNITED NATIONS HUMAN RIGHTS COMMISSION IN GENEVA

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, April 6, 1981

● Mr. KEMP. Mr. Speaker, the distinguished Michael Novak is an acute and principled observer of modern society. As author, philosopher, and theologian, he demonstrated his acuity again recently in Geneva, when he addressed the United Nations Human Rights Commission as a representative from the United States.

Mr. Novak discussed the right to development in terms of the experience of the United States. He pointed out that, as in this country, the increase of wealth and well-being of the world's people ultimately stems from freedom and democratic institutions—economic freedom no less than political and religious freedom, and economic democracy no less than political democracy.

I find it heartening to hear such an analysis from representatives of this country. It signals the beginnings of a new approach to international development and foreign policy, one which offers hope for all people. I commend Michael Novak's excellent speech to my colleagues.

Mr. Chairman, in addressing this item, my delegation finds it useful to translate the phrase "right to development" into terms rooted in our own experience. We are quite conscious of the fact that only two hundred years ago, our nation was a colony of a great European power. Our population numbered four million. Even one hundred years ago, our nation was a poor nation, full of promise, but quite undeveloped. In 1881, there were no airplanes, automobiles, electric lights, radios. The poverty of our frontier settlements and even of most of our cities was legendary.

In 1881, Mr. Chairman, no one spoke of a "right to development." But our nation had an opportunity to develop, perhaps even a responsibility to develop. Our people knew that a responsibility to develop was imposed on them by their own capacities and blessings, and by their new ideas about political economy. They thought they were bound to begin "novus ordo seclorum" a new order of the ages, not in their own name only but in the name of all.

Development is, then, an idea—an idea which entered the history of nations only in relatively recent times. When Julius Caesar first came to Geneva, he came by conveyances not much different from those used in

every century afterwards until early in the nineteenth century. Only then did the first steam railroad come into existence. Between Caesar's time and the year 1800, economic development occurred but only slowly. There was not much new under the Sun.

In the year 1800, this planet supported barely 800 million persons. Famines occurred in major cities, on the average, every fifteen or twenty years. Medical science was primitive. The average age of mortality for a male in France was approximately twenty-four and of a female twenty-seven. In 1800, not a thousand families in all of Germany had an income of one thousand dollars. In France, the land then described in "Les Miserables," ninety percent of all citizens used eighty percent of their income solely for bread—bread alone.

Mr. Chairman, poverty and lack of development have been the main fact of human history. The first "inquiry into the nature and causes of the wealth of nations" did not occur until Adam Smith undertook it in 1776. Smith may properly be called the father of the idea of international economic development. Much, of course, has been learned since then. But that was the decisive breakthrough. Wealth does have causes. Wealth can be created. The human race can learn how to escape from famine, misery, ignorance, and fear.

Mr. Chairman, the fundamental purpose of democratic capitalism—the vision that sustains my nation and a score of others—is to reduce the material suffering of all humankind. To increase the wealth of all nations, so that all individuals may use their freedom as they choose.

Democratic capitalism holds that a rising tide lifts every boat. The rising prosperity of the poor engenders new economic skills, enlarges markets, brings fresh dynamism and invention in important ways, societies prosper from the bottom up.

So it is with nations, the larger the number of developed and wealthy nations in the world, the better for all. Development is not a zero-sum game. Before 1899, when the first oil well was dug in Titusville, Pennsylvania, the world did not enjoy the wealth available from petroleum. With each decade since then, the entire world has become richer. Wealth constantly expands through new inventions, new methods, and new types of economic activism. Most of the things we today call resources were not known to be resources 200 years ago. The human spirit—in invention and creativity—bring the unknown into the circle of knowledge. It is in the interests of all for all nations to become economically alive, vital, prosperous. The rising wealth of all nations is a valid social goal.

Mr. Chairman, political activism is only one kind of activism. It is chiefly economic activism that produces wealth.

Developing nations have enormous needs for legions of economic activists—highly motivated, skillful, disciplined by profit and loss, able to produce sustained increments of real growth, able to compete with others in the marketplace, such activists can be educated and trained. But they also require the support of their surrounding culture, and sufficient liberty from political bureaucracies to do their job. Mr. Chairman, religious liberties are important. Political liberties are important. But so are economic liberties.

Mr. Chairman, in this commission we have heard transnational corporations maligned. But no single institution has been so responsible for the great leap forward of economic development in this century as the private business corporation. The large business corporation is relatively new in history. The private independent transnational corporation is even newer. The very first American transnational was Tiffany's, the jeweler, which opened a Paris branch one hundred years ago. The second, a few years later, was Singer sewing machines.

Such cooperative enterprises have shown that the state is not the only instrument of development. Private individuals in voluntary association can also meet social challenges, pursue social goals, and heighten the common good. Corporations are founded for economic purposes, but they are not economic institutions only. They are creatures of certain free political systems, on which they depend for their right to exist at all. They further depend on certain moral-cultural values and structures of law, without which they cannot function and apart from which they make no sense. Business corporations, therefore, have economic effects, political effects, and moral cultural effect. Their directors need to respect local conditions. But those who desire to share in the great benefits brought by transnational corporations must also respect the economic, political, and moral-cultural conditions on which they depend.

Mr. Chairman, we have heard distinguished delegates in this room speak of "obscene profits," are we to understand that losses are virtuous? Where there are not profits, there can be only losses or stagnation. But these are the exact opposite of development. Development itself is a form of profit—a reasonable return on investments made, a reasonable growth, a reasonable surge forward. We recognize that both profits and losses can be judged by a rule of reason. A reasonable rate of return is just; a reasonable amount of losses must, in some years, be expected. But, on the whole, an economy without profit is an economy without development.

These considerations are necessary, Mr. Chairman, if we are to clarify the thicket of issues hidden in the theory of development. How is wealth created? What constitutes development? What—to paraphrase Adam Smith—are the nature and the causes of development? These issues are complex. The perspective of those who approach them—whether in the marxist, in the traditional, or in the liberal world—are many. The concept of "development" is itself in need of development. The fact of development in certain nations under certain conditions is clear. But theories as to why such development has occurred are not clear.

Mr. Chairman, theories about development are many, and the places in which the United Nations discuss the complex aspects of development are also many: UNCTAD, UNIDO, UNDP, the IBRD including IDA, the UNGA itself, and other organizations such as the IMF and GATT. Mr. Chairman, the human rights of the individual as outlined in the universal declaration are already difficult enough for this commission to deal with. Moreover, these rights of the individual are by no means insignificant for the success of development.

Of course, when we speak of development, in the Human Rights Commission, the key issue before us is the relationship to be established between cultural, political, and economic rights. The views of my delegation are shaped not only by our own history, but also by observation of other experiments in other nations. We cannot accept the view that before civil and political rights can be fully accorded to a people, an ideal economic order must first be established. We do not believe with Dostoevsky's grand inquisitor: "First Bread, Later Liberty." Our road to development lay in trusting economic liberty first, in unleashing human energies from which bread—and more than bread—came. Totalitarians who take away political and civil rights in the name of bread, more often than not, produce less and less bread and—in addition—never do restore the rights they have usurped. In our close observation of the nations, Mr. Chairman, we see that totalitarianism produces bread as poorly as it produces civil and political liberties.

By contrast, we observe that some nations which are small, or poor in natural resources, but strong in their dedication to the disciplines and freedoms of economic markets, show spectacular economic progress in a relatively short period of time. Sometimes such regimes are authoritarian, not democratic. But we observe that, often enough they evolve in a democratic direction. No socialist nation on the Soviet model has yet experienced a revolution of political and civil rights in the direction of democracy, but other nations have. We believe that when citizens have economic liberties, inevitable pressures lead toward greater political and civil liberties. This is precisely why totalitarian regimes are stubbornly opposed to economic liberties. Their economies stagnate under strangling and suffocating bureaucracies, but they do not dare to bestow economic liberties—for in their train all other liberties follow.

History teaches even young nations lessons. History show a close relationship between various types of human rights. History shows that those people who have the right to choose their political and cultural activities, will exercise their inherent good sense to choose the economic activities which will most benefit them. On the other hand, those governments which think little of the individual worth of the human being, and deny their citizens the right to choose their own economic activities, also suppress political and civil rights. Thus, all these rights and liberties turn out to be very closely connected, but in complex ways. Such reflections as these guide our delegation in considering matters related to the right to development.

Finally, Mr. Chairman, we should point out that our conviction, based on real experience and practical observation, can scarcely be altered by such documentation as E/CN 4/1421, which is unbalanced and lacking in intellectual rigor. For example, the discussion of transnational corporations ignores the real benefits wrought by such corporations, in favor or hypothetical speculations on what transnational corporations might do. Throughout the study an effort is made to buttress points by arbitrarily selecting quotes or examples, while ignoring other points of view. We hope that parts II and III of the study will show greater rigor—and simple commonsense.

Mr. Chairman, in 1200 there were only eight hundred million persons on this planet. For all too many, life was nasty, brutish and short. Today, this planet must support 4.5 billion persons, whose lifespan has increased, on the average, by at least thirty years. The problem this planet faces in increasing its productivity to find food, clothing, schools, medicines for all its children is immense. The secrets of how to develop are known—so development is clearly an opportunity. Many nations have become economically alive, inventive, creative, hard-

working and dynamic. All nations wish to become so all without exception need to grow in knowledge, technique, capital investment, and new forms of economic activism.

The growing wealth of the poorer nations does not detract from the success of those nations which developed earlier. Moreover, a developing world economy offers incentives to every single participant.

The people of the United States wish to see the wealth of all nations increase. Particularly important to them in this regard is the lot of the very poorest nations, and of the very poor within every nation. Acute poverty prevents citizens from being economically active. The economic inactivity of millions makes the world far less productive and far less prosperous than it can yet become. Our own experience teaches us that mass markets prosper only when a minimal floor has been established under every citizen. Only then can all participate in the economic activism from which the wealth of the world springs.●

A PROGRAM TO REDUCE HIGH INFANT DEATH RATES

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, April 6, 1981

● Mr. STOKES. Mr. Speaker, I would like to take this opportunity to address my colleagues in the House on an issue of great importance affecting many communities throughout the Nation—high infant mortality rates among the poor and minority newborns.

As many of my colleagues know, the administration has proposed that Federal funds for maternal and child health services be reduced and combined into a health services block grant. I have grave reservations on this attempt to downgrade the importance of the Federal responsibility and financing of health services to poor and underserved pregnant women, who run the highest risk of having complicated and dangerous deliveries.

Mr. Speaker, if the Congress decides to reduce funding for maternal and child health and limit Federal funds for medicaid, we will experience more pregnant women with reduced access to quality medical care and high rates of infant mortality especially for poor and minority newborns. The latest figures available from the National Center for Health Statistics show that in 1978, minority infants in the Nation's 10 largest cities had an average infant death rate of 22.7 deaths per 1,000 live births; a rate that was more than 1½ times higher than the national average.

INFANT MORTALITY, WHITE AND NONWHITE PER 1,000 LIVE BIRTHS FROM BIRTH TO YEAR IN 1978

	White	Nonwhite
Baltimore	20.0	24.7
Detroit	16.0	25.3
Chicago	15.3	27.0
Philadelphia	15.0	22.0
Dallas	13.0	23.0
New York	13.3	21.0
Houston	13.2	20.0
Los Angeles	13.0	18.0
San Antonio	12.7	26.0
San Diego	12.3	14.7

In a large part, high infant mortality rates are related to the high rate of teenage pregnancies, poor nutrition for pregnant women and the newborn, and a failure of pregnant women to seek early prenatal care.

As you know, the title V program is this Nation's oldest existing health care program, which is now in great need of reform. I urge my colleagues to consider a number of reforms that I have included in H.R. 2507, the Maternal and Infant Health Care Services Act of 1981. This legislation pays particular attention to the following issues:

First, establishes a national goal to reduce infant mortality to 9 infant deaths per 1,000 live births by 1990;

Second, develops a comprehensive needs assessment and planning responsibilities for regional high infant mortality areas in conjunction with the State maternal and child health agency;

Third, emphasizes the development of comprehensive care providers to upgrade existing services sites to increase the availability of medical care to high risk mothers and infants; and

Fourth, encourages States to improve their medicaid State plans to increase reimbursement and services to medicaid eligible pregnant women and their newborns.

Mr. Speaker, the long-range potential results of improving the delivery of medical services to pregnant women and their newborns can help to reduce infant deaths and the high cost of hospitalizations for many newborns. In certain communities throughout the Nation including: Newark, Oakland, Houston, and Washington, D.C., have reduced infant mortality rates through better coordination of health services and programs for pregnant women and newborns. In these communities the minority infant death rates were as high as 35 to 40 per 1,000 live births, but were reduced to only 21 to 26 per 1,000 live births. These communities established blue ribbon commissions to concentrate on planning programs to educate pregnant women to take better care of themselves; emphasized early prenatal care; and provided more physician and nursing care to areas identified as high infant mortality areas. The legislation that I have introduced will assist more inner-city and rural areas to combat high infant death rates resulting in improved health status of the entire Nation. I urge that each of my colleagues give full consideration of this bill and its early enactment.●

IMPACT OF FEDERAL FUNDING FOR FAMILY PLANNING

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, April 6, 1981

● Mr. CRANE. Mr. Speaker, a few weeks ago I introduced a bill, H.R. 2446, prohibiting use of Federal funds under title X of the Public Health Act to support any institution that provides abortion counseling or services to unmarried minors without parental consent. This legislation is simply designed to prevent a wage-earner's tax dollars from subsidizing agencies which may trample on his rights as a parent.

Even the Supreme Court acknowledges the wisdom of this policy. In a 6-to-3 ruling on March 23, 1981, the Court upheld a Utah law requiring notification of parents before a minor may obtain an abortion.

Mrs. Susan Roylance, vice president of United Families of America, testified yesterday before the Senate Committee on Labor and Human Resources in favor of provisions which would require institutions to honor parental prerogatives as a precondition for receipt of Federal funds. I commend Mrs. Roylance's testimony to all of my colleagues, particularly those who may be considering cosponsoring H.R. 2446.

TESTIMONY OF SUSAN ROYLANCE, VICE-PRESIDENT OF UNITED FAMILIES OF AMERICA

[Charts are not printed in RECORD]

MR. CHAIRMAN: Continuing to fund Planned Parenthood Program in an effort to solve the problem of teenage pregnancy could be compared to appropriating funds to the American Petroleum Institute for additional gasoline to help put out a raging forest fire.

The facts I will present to you today will dramatically demonstrate the accuracy of the comparison.

I come before you today as a taxpaying citizen, and a mother of four teenagers—with more children who will yet be teenagers. And yes, all my children were wanted and planned!

My personal experience with government family planning services has been limited to clinics operated by the Planned Parenthood Federation of America. I became aware of this organization in 1976, and very closely acquainted with their programs from 1977 through the present. This experience was gathered from residency in three states: Washington, Oregon, and Utah.

My active involvement with Planned Parenthood began at a meeting conducted by Planned Parenthood officials at a local Planned Parenthood clinic in Kennewick, Washington. At this meeting I received copies of Planned Parenthood's national

goals, and several pamphlets designed to counsel young teenagers about sexual behavior and the availability of contraceptive and abortion services.

Among the goals presented by Planned Parenthood (in a national publication) were:

1. Providing contraceptive services through the school health programs, and

2. Providing portable abortion clinics (at public expense) to increase abortion availability in areas where hospitals refuse to perform abortions.

Two pamphlets produced by Rocky Mountain Planned Parenthood were available free of charge at this clinic for girls and boys in their early teens. They were "The Perils of Puberty" for girls, and "You've Changed the Combination" for boys. (I have seen these pamphlets in many other Planned Parenthood clinics.)

These, and other pamphlets, condoned masturbation and prostitution, suggested the use of alcohol for relief of menstrual cramps, discussed homosexuality as an experimental stage of development, and described abortion as a routine, simple medical procedure.

The posters on the walls, and the literature which was available seemed to emphasize that children were an unwanted commodity in our community, and anyone who produced children was not "responsible".

As a mother, I found the pamphlets very offensive, and totally unacceptable for teaching my children about sex. And I was concerned with the attitudes which could result from promoting these philosophies among all teenagers.

At the Planned Parenthood meeting I described earlier, we received a paper indicating that our local clinic was funded 70 percent by public funds—38 percent from federal grants. I concluded that this was not an appropriate use of my tax dollars, and decided to investigate the matter further.

Subsequently, I have visited Planned Parenthood clinics in three different states, testified at numerous hearings against the public funding of Planned Parenthood, and participated in the drafting and subsequent passage of legislation in the state of Utah (SB 3) which will prevent public funds from being used to provide contraceptive or abortion services to unmarried minors without parental consent.

In hearings before the Utah State Legislature, Planned Parenthood used extensive statistical data to back up their claim that there was a serious need to reduce the state's fertility rate—and that the funding of Planned Parenthood would accomplish that goal. In response to their testimony I began to look into our states' fertility and pregnancy rates. I discovered, quite by accident, that Planned Parenthood's claim that Utah had a high teenage pregnancy rate, when compared to other states, was false. In fact, I learned that the Utah rate was one of the lowest in the nation. The use of outdated, low projection figures had been used to produce a misleading statistic. These figures were used to justify the need for increased funding for family planning services in the state of Utah.

This discovery whetted my appetite—and I plunged into a rather extensive research of pregnancy rates in the United States. I wanted to see if there could be any correlation between the increased public funding of family planning services—and the increase in teenage pregnancy rates. With the help of a new home computer, statistical experts who were friends, and a neighborhood graphic artist, I have prepared some charts to demonstrate my findings. This research is only preliminary, but it represents considerable time and expense. The expense was covered by donations from concerned citizens, none of which was more than $100, and none of which was tax dollars.

It was very difficult to obtain data, and some of the data from different sources conflicted. The most difficult figures to obtain were the federal dollars spent for family planning services. I would suggest that if any private company knew as little about where its money is going as does the federal government, it would have been bankrupt long ago.

The first chart (see Figure 1, attached) shows the fertility rates and pregnancy rates for the United States. Although other factors such as fetal deaths, and miscarriages can be a part of the pregnancy rate, I excluded these additional data for two reasons: 1) The data was almost impossible to obtain in sufficient enough quality to produce a meaningful comparison, and 2) The data which was available did not affect the rate significantly. Therefore, the pregnancy rate is made up of live births and abortions per 1000 females ages 15 to 19. Since abortion figures were not available before 1972, the pregnancy rate for 1970 is probably too low. However, the trend which is established from 1972 through 1978 is very clear.

Interestingly, after exhaustive efforts to gain accurate, complete data through the federal government failed, I finally called the Alan Guttmacher Institute, the research arm of Planned Parenthood, to obtain the needed information. The figures I was furnished by them make it very difficult to understand Ms. Wattleton's contention that pregnancy rates are declining.

Chart #2 (see Figure 3, attached) shows the relationship between two variables: expenditures of family planning dollars, and the teenage pregnancy rate. I think this chart is the perfect illustration of the statement, "a picture is worth a thousand words."

I want to make it perfectly clear that I recognize there are many forces at work which might influence a rise in pre-marital sex and consequently a rise in teenage pregnancy. Among these are the media, (TV and movies which show increasingly suggestive sexual relationships more frequently), the "new morality", the discovery of new methods of contraception which supposedly reduce the risks of pregnancy, etc.

However, we cannot ignore the implications of these statistics. A statistics professor in Utah correlated the figures on which the chart is based. They are cross-lag correlations, which take into account the fact that an appropriation one year will probably have the greatest effect on the pregnancy rate two years later. The correlation coefficients for this data (for the years 1972 through 1978) are:

Comparing appropriations and abortion rates	0.928
Appropriations and pregnancy rates	.882
Pregnancy rates and abortion rates	.978

Any correlation coefficient above .870 is significant.

The third chart (Figure #4 on this page) compares the pregnancy rates of Oregon and Utah. Oregon and Utah are similar in many ways, shown in Figure #5 (see attachment). However, in one area they are significantly different, the amount of dollars appropriated for family planning services. Oregon's appropriations are almost double Utah's, when you divide the appropriation by the total population. I have personally visited Planned Parenthood clinics in both Oregon and Utah, and they are significantly different in their entire approach to the problem. The Oregon clinics are filled with posters showing the dangers of overpopulation, with an emphasis on abortion. Because of public opposition, Utah's Planned Parenthood clinics have had to modify their approach.

One can almost predict the rise or fall in either states pregnancy rates when compared with the increase or decrease of Title X appropriations (as shown in Figure #5).

Following this comparison, I collected data on other states which were similar in nature. I chose 15 states with 100 or less people per square mile, less than a 3% black population, and less than a 70 per 1000 teenage pregnancy rate in 1970 (so that one would not confuse a high pregnancy rate with a pre-existing problem.

To obtain a single index for the key problems we are examining I added the abortion rate and the illegitimate rate to provide a new number I call the "problem rate".

The relationship of "problem rate" to expenditures was then examined for 1979. Those states above the median in Title X dollars per thousand teenage population were compared to those states below the median. The average problem rate was over one and one half times greater in those states with the greater expenditures of Title X funds. Again, we see evidence that use of Title X funds create, rather than reduce, problems for our teenagers.

Only one state, besides Utah, had an actual reduction in the pregnancy rate at any time in the years between 1970 and 1979. That state was South Dakota. In addition to a pregnancy rate reduction, there had been a reduction in Title X appropriations. I was extremely interested in discovering what had prompted the appropriation reduction in South Dakota, and called the Right to Life organization in that state, to see if they could give me additional information.

I was informed that the citizens of South Dakota united to prevent their tax dollars from being used for any program or organization which accepted or promoted abortion. Elected public officials who had supported abortion were replaced. Because there is a perceived connection between Planned Parenthood and abortion the people of South Dakota have demanded a reduction in Title X funding. Consequently, the subsequent reduction in the teenage pregnancy rate provides further evidence of the relationship between Title X funding and teenage pregnancies.

Many local and federal officials have claimed an inability to affect the programs of Planned Parenthood. Local officials defer all operational details of Planned Parenthood's family planning programs to Planned Parenthood because they are federally funded. Federal officials on the other hand, cannot account for the activities because the money is administered locally. Planned Parenthood is ostensibly a private organization, but it is largely funded by taxpayer dollars.

Attempts by parents to view and evaluate the materials available through Planned Parenthood clinics in various states, have been repeatedly denied even though these materials and films are largely paid for with public funds.

One thing that is absolutely certain is that Planned Parenthood is accountable to

no one: Its officers are not elected and they are not responsible to those who provide the money to pay their salaries. But even more significantly, they profit personally from the expansion of Family Planning programs, increased pregnancies, and increased acceptability of abortions. It would be hard to imagine a clearer case of conflict of interest than Planned Parenthood provides.

This is perhaps one of the most tragic examples of another expensive, unwanted and unnecessary government program which continually produces results opposite to those for which the program was designed.

Until such time as it can be conclusively proven that the benefits outweigh the liabilities, we recommend that you discontinue the Title X programs in the interest of the teenagers of the future.

UNITED STATES 1970–78 FAMILY PLANNING DOLLARS WITH TEEN PREGNANCY RATES

[All figures are for 15–19 year old females]

Year	1,000's	Births	Abortions	Out of wedlock	Federal funding (in millions)	(Rate is figured per 1,000 15–19-year-old females) Fertility rate	Pregnancy rate	Abortion rate	Illegitimate rate	Problem rate	Dollars per 1,000

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Tuesday, April 7, 1981, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

APRIL 8

8:45 a.m.

Labor and Human Resources

Business meeting, to mark up S. 648, authorizing funds for fiscal year 1982

for certain youth programs under the Comprehensive Employment Training Act (CETA).
4332 Dirksen Building

9:00 a.m.
Appropriations
Interior and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1982 for the Office of the Secretary and the Office of the Solicitor, Department of the Interior.
1114 Dirksen Building

Armed Services
Military Construction Subcommittee
To continue hearings on S. 834, authorizing funds for fiscal year 1982 for military construction programs of the Department of Defense.
212 Russell Building

9:30 a.m.
*Appropriations
Defense Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1982 for the defense establishment, focusing on Navy shipbuilding programs.
1223 Dirksen Building

Appropriations
*HUD-Independent Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1982 for the Office of Science and Technology Policy, Council on Environmental Quality, and the U.S. Regulatory Council.
S-126, Capitol

*Appropriations
State, Justice, Commerce, and the Judiciary Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1982 for the Securities and Exchange Commission, Office of the U.S. Trade Representative and the Equal Employment Opportunity Commission.
S-146, Capitol

Labor and Human Resources
To hold hearings on S. 799, authorizing funds for certain public health professional education and nurse training programs of the Department of Health and Human Services, and S. 801, authorizing funds through September 30, 1984, for the National Health Service Corps of the Department of Health and Human Services.
4232 Dirksen Building

10:00 a.m.
Agriculture, Nutrition, and Forestry
Foreign Agricultural Policy Subcommittee
To hold oversight hearings on U.S. agricultural export policies.
324 Russell Building

Appropriations
Transportation and Related Agencies Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1982 for the Office of the Secretary of Transportation.
1224 Dirksen Building

Appropriations
Treasury, Postal Service and General Government Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1982 for the Administrative Conference of the United States, Federal Elections Commission, Office of Federal Procurement Policy, Domestic Policy Staff, U.S. Tax Court and the Committee for Purchase From the Blind and Other Severely Handicapped.
1318 Dirksen Building

Budget
Business meeting, to continue markup of the proposed first concurrent budget resolution for fiscal year 1982 setting forth recommended levels of total budget outlays, Federal revenues, and new budget authority.
6202 Dirksen Building

*Commerce, Science, and Transportation
Communications Subcommittee
To resume hearings on S. 720, authorizing additional funds for the Corporation for Public Broadcasting for fiscal years 1984, 1985, and 1986.
235 Russell Building

Energy and Natural Resources
*Water and Power Subcommittee
To hold hearings on S. 306, authorizing funds for fiscal year 1982 for the construction, operation, and maintenance of specified hydroelectric powerplants at various existing water projects.
3110 Dirksen Building

Environment and Public Works
To hold oversight hearings on the implementation of the Clean Air Act.
4200 Dirksen Building

Foreign Relations
To resume hearings on proposed legislation authorizing funds for fiscal year 1982 for foreign assistance programs, receiving testimony from public witnesses.
4221 Dirksen Building

Rules and Administration
To hold hearings on Senate Resolution 20, providing for television and radio broadcasting of Senate Chamber proceedings.
301 Russell Building

Select on Intelligence
Closed briefing on intelligence matters.
S-407, Capitol

10:30 a.m.
Governmental Affairs
To hold hearings on S. 591, to provide incentives for the Federal Government in their debt collection efforts.
3302 Dirksen Building

11:00 a.m.
Appropriations
Defense Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1982 for the defense establishment, focusing on the Naval submarine shipbuilding program.
424 Russell Building

1:30 p.m.
*Governmental Affairs
To hold hearings on the nomination of Gerald P. Carmen, of New Hampshire, to be Administrator of General Services.
3302 Dirksen Building

2:00 p.m.
Appropriations
Labor, Health and Human Services, and Education Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1982 for programs of the Department of Health and Human Services.
1114 Dirksen Building

Energy and Natural Resources
To hold hearings on the nominations of R. Tenney Johnson, of Maryland, to be General Counsel of the Department of Energy, William H. Coldiron, of Montana, to be Solicitor of the Department of the Interior, Garrey E. Carruthers, of New Mexico, to be Assistant Secretary for Land and Water Resources, Department of the Interior, G. Ray Arnett, of California, to be Assistant Secretary for Fish and Wildlife and Parks, Department of the Interior, and Robert E. Burford, of Colorado, to be Director of the Bureau of Land Management.
3110 Dirksen Building

Foreign Relations
To hold hearings on S. 849, authorizing funds for fiscal years 1982 and 1983 for the International Communication Agency, S. 847, authorizing supplemental funds for fiscal year 1981, and authorizing funds for fiscal years 1982 and 1983 for the Board for International Broadcasting, and on proposed legislation authorizing funds for fiscal year 1982 for the Arms Control and Disarmament Agency.
4221 Dirksen Building

Joint Economic
Monetary and Fiscal Policy Subcommittee
To hold hearings on the President's proposed program for economic recovery.
457 Russell Building

APRIL 9

8:00 a.m.
Appropriations
Defense Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1982 for the defense establishment, focusing on Navy aircraft/weapons procurement program.
1223 Dirksen Building

9:00 a.m.
Select on Intelligence
Budget Subcommittee
Closed business meeting, to mark up proposed legislation authorizing funds for fiscal year 1982 for intelligence activities of the United States.
S-407, Capitol

*Special on Aging
To hold oversight hearings to determine if certain energy assistance programs are meeting home insulation needs of elderly victims of extreme heat and cold.
457 Russell Building

9:30 a.m.
Energy and Natural Resources
Energy and Mineral Resources Subcommittee
To resume oversight hearings to review the strategic minerals and materials research policy of the United States.
3110 Dirksen Building

Judiciary
Constitution Subcommittee
To resume hearings on proposals to require a balanced Federal budget.
2228 Dirksen Building

Labor and Human Resources
Aging, Family and Human Services Subcommittee
To hold hearings on proposed legislation authorizing funds for the Domestic Volunteer Services Act.
4232 Dirksen Building

Rules and Administration
Business meeting, to consider pending legislative and administrative business.
301 Russell Building

10:00 a.m.
Appropriations
Military Construction Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1982 for Guard and Reserve Forces construction programs, Department of Defense.
1224 Dirksen Building
Appropriations
Transportation and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1982 for the Office of the Secretary of Transportation, and to review the Administration's proposed budget recommendations for transportation programs.
S-126, Capitol
Appropriations
Treasury, Postal Service and General Government Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1982 for the Internal Revenue Service, and the savings bond division of the Bureau of the Public Debt.

HOUSE OF REPRESENTATIVES—*Tuesday, April 7, 1981*

The House met at 12 o'clock noon.

The Reverend James J. Benson, United Methodist Church, Hicksville, N.Y., offered the following prayer:

Good morning, Father. Before Your sons and daughters begin their deliberations, we pause to say thank You for another day of opportunity, a day in which great things can be done in Your world by those obedient to Your will. Comfort, dear Lord, the personal lives here present so that with steady hearts and minds they may be free to address the concerns presented to them. Guide them as they seek to be sensitive to the real needs of our Nation. Grant them great strength and resolve so that they may be agents of reconciliation in our world. Enable them to use the gifts and graces You have given them so that they may govern our people wisely, justly, with love and with mercy. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

PRIVATE CALENDAR

The SPEAKER. This is Private Calendar day. The Clerk will call the first individual bill on the Private Calendar.

CONFIRMING CONVEYANCE OF CERTAIN REAL PROPERTY BY CENTRAL PACIFIC RAILWAY CO. AND SOUTHERN PACIFIC CO. TO A. C. TABER AND HIS WIFE, MARY TABER

The Clerk called the bill (H.R. 1543) to confirm a conveyance of certain real property by Central Pacific Railway Co. and Southern Pacific Co. to A. C. Taber and his wife, Mary Taber.

There being no objection, the Clerk read the bill as follows:

H.R. 1543

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subject to section 3 of this Act, the conveyance described in section 2(a) of this Act involving certain real property in Alameda County, California, is hereby confirmed in the successors in interest to A. C. Taber and his wife, Mary Taber, the grantees in such conveyance, with respect to all interests of the United States in the rights to the real property described in section 2(b) of this Act. Portions of the real property described in section 2(b) formed part of the right-of-way granted to the Union Pacific Railroad by the United States by the Pacific Railroad Act of 1862 (12 Stat. 489).

SEC. 2. (a) The conveyance confirmed by this Act was made by a deed dated October 29, 1942, by the Central Pacific Railway Company and Southern Pacific Company to A. C. Taber and his wife, Mary Taber, and recorded on November 5, 1942, book 4297, page 388, Alameda County records.

(b) The real property referred to in the first section of this Act is certain real property in Alameda County, California, described as follows:

All that portion of the 400-foot right-of-way of the Central Pacific Railway Company in section 7, township 4 south, range 1 east, Mount Diablo base and meridian, lying south of the southerly line of the right-of-way of the State highway and north of a line that is parallel with and 25 feet at right angles, northerly from the center line of the main track of the Western Pacific Railroad Company, as now located, excepting therefrom that portion conveyed to the Department of Public Works of the State of California by condemnation recorded November 1944, book 4625, page 186, instrument Numbered RR-69436, Alameda County records.

SEC. 3. (a) Nothing in this Act shall—

(1) except to the extent specified in section 2 of this Act, diminish the right-of-way referred to in the first section of this Act to a width of less than 50 feet on each side of the center of the main track or tracks established and maintained by the Central Pacific Railway Company, Southern Pacific Company, or their predecessors in interest, on the date of the enactment of this Act; or

(2) validate or confirm any right or title to, or interest in, the land referred to in the first section of this Act arising out of adverse possession, prescription, or abandonment, and not confirmed by conveyance by the Central Pacific Railway Company or Southern Pacific Company before the date of the enactment of this Act.

(b) There is reserved to the United States all oil, coal, or other minerals in the land referred to in the first section of this Act, together with the right to prospect for, mine, and remove such oil, coal, or other minerals under such rules and regulations as the Secretary of the Interior may prescribe.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

The SPEAKER. This concludes the call of the Private Calendar.

THE REVEREND JAMES J. BENSON

(Mr. LENT asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. LENT. Mr. Speaker, it is a great pleasure and an honor to welcome as our guest chaplain today, the Reverend James J. Benson, pastor of the United Methodist Church in Hicksville, N.Y. I know my colleagues join me in thanking Pastor Benson for his message of inspiration. His thoughtful words offer real benefit to all of us.

The Reverend Benson's prayer gives us an indication of why his pastorates with the United Methodist Church have been so outstanding.

Born in Scranton, Pa., the Reverend Benson received his M.A. in divinity from the Drew Theological Seminary in 1956.

His first pastorate was with the United Methodist Church in Monticello, N.Y. Five years later, the congregation of the United Methodist Church in Yonkers, N.Y., called him as their pastor. He served that church for 7 years, before becoming the pastor of the United Methodist Church in Hicksville, N.Y., 14 years ago.

Throughout his ministry, the Reverend Benson has given of himself to the utmost in attending to the needs of his congregation and of his community. In his pastorate at Hicksville, for example, the Reverend Benson has been president of the Helping and Directing (HAD) drug program in Hicksville, vice president of the East Plains Mental Health board of directors, and president of the Mid Island Ecumenical Council.

Some indication of the widespread admiration, affection, and respect the Reverend Benson commanded may be gained from the fact that in 1971 he was honored as man of the year by the Knights of Columbus in Hicksville.

Mr. Speaker, the Fourth Congressional District of New York, which I have the honor to represent, is more fortunate to have had the devoted service of the Reverend James J. Benson for the past 14 years.

It is with mixed emotions, however, that I learn that Pastor Benson will be leaving his church at Hicksville later this year. In June he will become the district superintendent for the Connecticut Central District of the United Methodist Church in Hamden, Conn. As a member of the Bishops Cabinet, the Reverend Benson will have the responsibility of supervising the 55 churches in the Connecticut Central District.

I know that while we regret his departure, Pastor Benson's many, many friends on Long Island join me in offering congratulations to him and in extending our very best wishes for the future to him, his lovely wife Lee, and to their two children James and

Judith. We will miss the inspirational leadership of the Reverend Benson and his compassionate devotion to the service of others which so distinguished his ministry in Hicksville.

But we know the United Methodist Church will benefit as the talents and abilities of the Reverend Benson are applied to challenges in a broader field.

APPOINTMENT AS MEMBERS OF BOARD OF VISITORS TO THE U.S. MERCHANT MARINE ACADEMY

The SPEAKER. Pursuant to the provisions of title 46, United States Code, section 1126c the Chair appoints as members of the Board of Visitors to the U.S. Merchant Marine Academy the following Members on the part of the House:

Ms. FERRARO of New York; and

Mr. CARNEY of New York.

COMMUNICATION FROM CHAIRMAN OF COMMITTEE ON MERCHANT MARINE AND FISHERIES

The SPEAKER laid before the House the following communication from the Honorable WALTER B. JONES, chairman, Committee on Merchant Marine and Fisheries:

COMMITTEE ON
MERCHANT MARINE AND FISHERIES,
Washington, D.C., February 24, 1981.

Hon. THOMAS P. O'NEILL, Jr.,
Speaker of the House, House of Representatives, the Capitol, Washington, D.C.

DEAR MR. SPEAKER: Pursuant to Public Law 301 of the 78th Congress, I have appointed the following Members of the Committee on Merchant Marine and Fisheries to serve as members of the Board of Visitors to the United States Merchant Marine Academy for the year 1981.

The Honorable Mario Biaggi of New York;

The Honorable Brian J. Donnelly of Massachusetts; and

The Honorable Paul N. McCloskey of California.

As Chairman of the Committee on Merchant Marine and Fisheries, I am authorized to serve as an ex officio member of the Board.

Sincerely,

WALTER B. JONES, *Chairman.*

STOP INFLATION

(Mr. MOTTL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MOTTL. Mr Speaker, the latest official figures show that inflation is still roaring along at a ferocious rate. At the wholesale level, prices are surging at an annual rate of more than 16 percent.

Inflation like this was unthinkable just a few years ago. Now, I am shocked that so many in Congress accept high inflation as normal in our economy, despite the suffering this inflation causes home-buying families, the elderly, small businessmen, the poor, and the average wage earner.

Sure, let us balance the budget and cut spending. But let us also give Americans some room to breathe, by giving the President the authority to invoke temporary, mandatory wage, and price controls.

After so long on the inflation treadmill, it is just not enough to keep telling Americans to be patient.

ADMINISTRATION SHOULD NOT DESTROY WORK INCENTIVES FOR WORKING POOR

(Mr. BONIOR of Michigan asked and was given permission to address the House for 1 minute.)

Mr. BONIOR of Michigan. Mr. Speaker, all Americans share the common goal of putting Americans back to work again. We share with the administration the desire to reinvigorate our economy and to create opportunities and incentives for all persons to be gainfully employed. However, it should be noted that the administration has presented a set of proposals to change the aid to families with dependent children, which would substantially reduce the incentives for the working poor to keep their jobs. The administration would have the Congress reduce the deductions for work-related expenses and child care in the calculations of benefits, count the earned income tax credit against benefits, and reduce benefits after the parent has worked 4 months.

Mr. Speaker, according to a recent study from the center for the study of welfare policy, the average working AFDC mother with two children in Michigan, having worked more than 4 months would still be under the poverty line under the administration proposals and she would be only $4 better off than a nonworking AFDC mother with two children. Currently, she is over $100 better off each month than the nonworking mother. Mr. Speaker, we in Congress—and the American people—should not allow the administration to destroy the work incentives for the working poor. The administration proposals subvert our collective effort to get America working again.

ADMINISTRATION DISCOURAGES WORKING MOTHERS BY REMOVING INCENTIVES

(Mrs. BOGGS asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. BOGGS. Mr. Speaker, in my State of Louisiana working mothers receiving aid to families with dependent children often work at low wages in order to provide the basic necessities of life for their families. We in Congress and many private sector persons and institutions share the goal of encouraging such hard-working people to maintain their jobs in order that they can continue to contribute to the well-being of their families and to break the cycle of poverty and dependence. The administration's proposals to count the earned income tax credit against benefits, to reduce deductions for child-care and work-related expenses, and to reduce benefits after working 4 months will discourage such people from maintaining their jobs in my home State.

A recent study of the administration's proposal from the University of Chicago shows that the average working AFDC mother with two children in Louisiana earns only $150 a month, but it is an amount vital to the livelihood of her family. Mr. Speaker, under the administration's proposal, she would have at her disposal no more money than the AFDC mother with two children but with no earned income after she had worked 4 short months. Mr. Speaker, we cannot allow the incentive to work for the working poor to be undercut if we wish to cooperate in getting the economy on a sure footing.

TIME FOR FAIRNESS IN ADMINISTRATION TAX CUT PROPOSALS

(Mr. DORGAN of North Dakota asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DORGAN of North Dakota. Mr. Speaker, last Wednesday I testified before the House Ways and Means Committee to discuss with them the administration's tax cut proposals.

I discussed with them what I felt were the inequities of that proposal. It showers tremendous benefits toward the rich and the large corporations while not providing any real tax relief for the middle income wage earner and the small business people.

I also discussed with the committee the importance of getting back to some basics in our tax laws. In our tax system, we rely on voluntary compliance. People will continue to file their tax returns and pay their taxes only if they have respect for the tax system itself—that is, people must feel they are being treated fairly, and these days they are not. There are some storm clouds brewing on the issue of tax fairness and we better pay attention to them. Our tax system has turned to what should have been a very simple civic duty of paying taxes into a bureaucratic thicket for most Americans.

We have used the revenue system in this country as a clothes hanger to try to accomplish every economic and social good, and it is ruining that system. Too many auto mechanics,

secretaries, cabdrivers, office workers, and farmers who work hard find that they are paying a higher effect tax rate than some of America's largest corporations and many of America's richest citizens. That is why I encouraged the House Ways and Means Committee to include in their discussions the good old-fashioned notion of fairness.

PERMISSION FOR COMMITTEE ON ARMED SERVICES TO FILE REPORT ON H.R. 2614, DEFENSE DEPARTMENT SUPPLEMENTAL AUTHORIZATION

Mr. PRICE. Mr. Speaker, I ask unanimous consent that the Committee on Armed Services have until midnight, Thursday, April 9, to file a report on H.R. 2614, the fiscal year 1981 Department of Defense supplemental authorization bill.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

VOTING RIGHTS EXTENSION

(Mr. RODINO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RODINO. Mr. Speaker, today I am introducing legislation that would extend for 10 years the Voting Rights Act of 1965 and amend those absolutely essential provisions that have made this law the most successful Civil Rights Act ever passed by the Congress.

My proposal has three major provisions:

First, it would continue for 10 years section 5 of the act. Without extension of this preclearance requirement, we will regress to where the law was before 1965, a condition that was both unsatisfactory and ineffective.

Second, it would amend section 2 of the act so that plaintiffs in voting rights suits would have to prove that actions by State and local governments had resulted in voting discrimination. This change is necessary to restore the law to where it was—and to what Congress intended—before a Supreme Court ruling last year.

Third, this legislation would put the bilingual provisions of the act on the same timetable as other special sections of the law.

Mr. Speaker, not to extend the law, the major provisions of which will expire in August of 1982, will risk undoing gains that have been so beneficial to minorities and have given so much life and meaning to the principles of equality and fairness that are the very foundation of our Nation.

I fully expect that this legislation will receive the same bipartisan support that it has enjoyed since it was given birth in this body back in the days when the former chairman of the Judiciary Committee, Mr Celler, and the ranking Republican minority member, Mr. McCulloch of Ohio, introduced this legislation.

To that end, I understand similar legislation to mine is being introduced in the other body today.

This legislation is needed, and it is right.

SLAUGHTER OF LEBANESE CHRISTIANS MUST END

(Mr. LANTOS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LANTOS. Mr. Speaker, the tenuous stability of wartorn Lebanon has been severely shattered. Syrian occupation forces make a travesty of international justice with their latest brutal attack on Lebanon's Christian community. Syrian troops, backed by PLO terrorists, mounted a ruthless campaign last week which so far has left more than 150 dead and 500 wounded. Families huddle without food inside their homes, terrified of walking Beirut's embattled streets. The brutality of Syrian and PLO actions poses a serious threat to peace and stability in the wartorn Middle East.

Yesterday in Jerusalem Secretary of State Alexander Haig made the following statement:

> We view the brutality of Syrian action against the Christian enclave as a very, very serious turn of events which is unacceptable by any measure of appropriate international standards.

I commend Secretary Haig and call upon the administration to take immediate and effective action to safeguard the survival of Lebanon's beleaguered Christian community and to take all appropriate steps to expel Syria's brutal occupation army from Lebanon.

ADDITIONAL SMALL SAVER TAX RELIEF

(Mr. BIAGGI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BIAGGI. Mr. Speaker, today I am introducing major tax relief legislation for small savers, featuring tax-free interest for senior citizens, up to a $1,000 permanent savings interest exclusion for all other individuals, and up to $2,000 for couples filing jointly.

In addition to providing much needed economic relief for the small saver—the majority of which are age 55 or older—my bill seeks to stimulate our Nation's declining savings rate. By the end of 1978, the rate of disposable income savings in the United States reached a 30-year low of under 5 percent—far less than any other Western democracy.

The importance of savings to productivity and our overall economy cannot be overstated. One-third of all the capital in this country is made available through personal savings. Without adequate savings, there cannot be sufficient investments in industry, small business, and home construction. The result is higher consumer prices and increased unemployment.

Last year, we made major legislative strides benefiting the small saver. I offer my proposal as the next step.

□ 1230

MAJORITY BUDGET PROJECTION

(Mr. MICHEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MICHEL. Mr. Speaker, I listened very intently this morning to the majority leader and the chairman of the House Budget Committee, both of whom appeared on national television to explain the Democratic budget proposal.

Their discussions of a balanced budget were novel. I heard something to the effect that had it not been for higher interest rates, inflation, OPEC, unemployment, poor productivity, and the eruption of Mount St. Helen's the budget this year would be balanced. And I suppose had it not been for Sun spots and the flooding of the Yangtze River we might even have had a surplus.

I do not know how much farther you can spread the blame.

The fact is that the Democrats have been notorious for juggling their budget figures.

In fiscal year 1980 they started out with an estimated deficit of $29 billion, raised it to $46 billion and actually wound up the year with a deficit of $60 billion.

In fiscal year 1981 they began with an estimated deficit of $15 billion, then boosted it to $27 billion, and are now talking about it being $51 billion, with 5½ months left in the year.

And people wonder why we are skeptical. My advice to this House and to the public is to take a close look at the majority's projections, and do it quickly. They have a tendency to dissolve before your very eyes.

REGULATORY REFORM IN THE AUTO INDUSTRY

(Mr. DUNN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DUNN. Mr. Speaker, yesterday the President presented the report of his task force on the U.S. automobile industry. This report shows a recogni-

tion on the part of the administration of the economic depression now weighing on the U.S. automakers and their employees.

The President deserves praise for his swift action in dealing with regulatory reform. The industry and the economy need speedy revision of the regulatory system, and the proposals of the task force start this process in motion.

Nonetheless, as regulatory reform is just part of my own legislative package, it is only just part of what must be done to effectively bring our auto industry back to worldwide competitiveness. Tax legislation must be enacted to incite demand for U.S.-built cars in the short term, and to facilitate retooling and other major capital efforts by our automakers for the long term.

The administration is already on record in support of liberalized depreciation allowances for manufacturers. Tax credits must be employed to stimulate the sales of automobiles. The effects of high interest rates must be decreased by use of a tax credit toward interest on auto loans, and, of course, by the control of Government spending. The plight of auto parts suppliers must be recognized and helped by extending carryback provisions in the Tax Code.

Regulatory reform is necessary, but simply not enough. I look forward to working with the administration and with my colleagues in the Congress on further measures aimed at lifting this industry out of its crisis.

There can be no comprehensive national economic recovery without help for an industry with hundreds of thousands unemployed and whose economic condition touches so many across the country.

RENEWED OUTBREAK OF VIOLENCE IN LEBANON

(Mr. CONTE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CONTE. Mr. Speaker, I rise to express deep concern over last week's outbreak of the worst violence in Lebanon since the cease-fire in 1976. At last count over the weekend, the death toll had reached more than 150, and more than 500 left wounded.

Moreover, I must condemn the indiscriminate shooting and killings by the so-called peacekeeping Syrian Army in Christian sectors both within Beirut and outside. The continued wholesale shelling of Christian residential areas by the Syrian-Arab forces long after their formal commander, Lebanese President Elias Sarkis, had ordered them to stop shooting is both reprehensible and tragic. These actions make a mockery of the original purpose for the Syrian-Arab forces' arrival in Lebanon 5 years ago and for their continuing presence—to restore peace in this strife-torn country. It is also a severe blow to the hopes of achieving permanent peace throughout Lebanon—a country ravaged by violence far too long.

PARENTS ANONYMOUS

(Mr. NELLIGAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. NELLIGAN. Mr. Speaker, in our efforts to control excessive Federal spending, it would be my hope that we will not cut spending to the point that no money remains for the activities of Parents Anonymous. Parents Anonymous is the largest single treatment resource for abusive parents and abused children, as well as those parents who are afraid of abusing their children. This group has 1,200 chapters in the United States as well as a U.S. military affiliate in Europe, and one of these chapters is located in my own congessional district. More than 50,000 families are in touch via the Parents Anonymous hotline, which enables callers to receive support and information.

Parents Anonymous is able to service a family at an annual cost of $50, compared to a $1,500 annual cost spent by social service agencies to provide similar services. The Parents Anonymous national program maintains its programs for less than $500,000 annually, and I am pleased to say taxpayers are getting their money's worth while at the same time protecting children from parental abuse and neglect.

PARRIS FIGHTS FOR TWICE-A-YEAR COLA

(Mr. PARRIS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PARRIS. Mr. Speaker, much concern has been directed my way by many anxious and wary citizens who have responded to recent legislation introduced in the other body which proposed reduction of the twice-a-year cost-of-living adjustment for retired Federal employees under the age of 65. This outcry of distress is coming from elderly citizens who have suddenly realized that their well-thought-out plans for retirement have the potential of being marred. It is not that they object to making their contribution to society, it is that they have already contributed greatly up to this point and have looked forward to the day when they could relax comfortably and enjoy the fruits of their accomplishments. In other words, the safety net of programs of which the President spoke in his statement of February 18 should certainly extend to the pension benefits earned by retired civil servants.

There are several reasons why many believe a change in the COLA would be unfair and unjust. First of all, some Federal employees are placed on mandatory retirement plans where they have to retire before the age of 65. For example, special agents of the FBI are required to retire at the age of 55. Air traffic controllers, of which there are 17,000, are forced to retire at age 55, to name only two organizations affected. Is it fair to penalize these persons who would rather stay at their jobs until the age of 65 and also have a very difficult time in gaining further employment? I would submit that this is not an equitable situation.

Another factor that may not have been considered by the author of the reduction proposal is that, for many persons, one of the incentives to accept Federal employment is the retirement benefit. By making Government jobs less attractive, we will certainly lose some of our most competent individuals. We must make the Federal sector of employment competitive with the private sector in order to retain and encourage the most qualified people in the field to enter and to stay.

We must also consider the extensive hardship and disappointment that our elderly citizens may have to endure after having made future life plans around an income that had been promised them early in the stages of their careers. At this late point in time they would be told to alter these plans, that what they had counted on and had expected to secure them in a supposedly nonhectic, peaceful time of life, can no longer be relied upon. They have already gone through the stage in life where one scrimps and saves. Do they deserve to go through that again? Not at this point in life.

Please let us not break a promise that has already been made. It is a moral obligation that should be binding on all of us.

Mr. Speaker, I am not exaggerating these claims. This is the way it has been presented to me by concerned and upset citizens. Let us not alter or upset the lives of those who have already contributed to society and who have previously been secure in the knowledge that the future they have made for themselves will continue to exist.

SANCTIONS AGAINST SOVIET UNION IF THEY INVADE POLAND

(Mr. RITTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RITTER. Mr. Speaker, the tension in Poland continues. It is more important than ever that the process

of compromise and negotiation be allowed to develop between the Polish Labor Solidarity Movement and the Polish Government without Soviet interference.

However, ominous signs are coming from the Kremlin and reports now say the Kremlin is planning not a naked, blatant invasion, but a "creeping intervention." Military maneuvers have increased the presence of Soviet and East German troops in and around Poland. The Russians have developed an independent transport and communications network. They can now move without the Poles even knowing it.

We must continue to insist that the Soviets know of our firm commitment to allow the Polish people to resolve their own disputes and that, in the event of Soviet military action in Poland, the United States should work in conjunction with its NATO allies, Japan, and Australia, to discontinue loans and credits to the Soviet Union.

I have sponsored a resolution to do that and I ask the support of my fellow Members. America and her allies should not finance the Soviet economy while they destroy security in Europe.

AFRICAN REFUGEE RELIEF DAY

(Mr. PETRI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PETRI. Mr. Speaker, as a cosponsor of House Joint Resolution 202, and as a former Peace Corps volunteer in Somalia, I believe that recognizing April 9 as African Refugee Relief Day is an excellent way of drawing attention to the fact that over one-half of the world's refugees are in Africa—with 1 million in Somalia alone.

I am pleased that the administration of President Reagan has noted the importance of African issues in the fabric of our foreign policy by naming Ambassador Jeane Kirkpatrick to head the U.S. delegation to the April 9 and 10 International Conference on Assistance to Refugees in Africa, which will be held in Geneva, Switzerland. Another indication of the President's interest in African issues is the current trip by Chester Crocker, Assistant Secretary of State for Africa-designate to a number of states including Angola, Nigeria, Zaire, South Africa, Mozambique, and Zimbabwe.

Mr. Speaker, while the African refugee situation points up the difficulties facing some of the nations on that continent, we must also keep in mind the enormous political and economic vitality of Africa. To give just two examples, Nigeria is the second largest supplier of oil to the United States, and we depend on African producers for the vast majority of our requirements for such vital minerals as ferrochromium and cobalt.

SOLOMON INTRODUCES RESOLUTION PRAISING AGENTS McCARTHY AND PARR AND OFFICER DELAHANTY

(Mr. SOLOMON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SOLOMON. Mr. Speaker, I would like to call attention of our colleagues that directly following the 1-minutes this morning, one of the first orders of business will be a resolution which I introduced which will commend Secret Service Agents McCarthy and Parr and Police Officer Delahanty for their courageous efforts in saving the life of our President. I would welcome the participation of my colleagues in paying tribute to these brave Americans.

ANOTHER CARTER BUDGET

(Mr. KEMP asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KEMP. Mr. Speaker, a few weeks ago, President Reagan stood before the U.S. Congress and talked to us about his conviction that there is nothing wrong with the American economy that we cannot fix with sound economic policy. His sense of optimism and his pledge to work in close touch with the Congress and the American people to fashion a monetary, fiscal, tax, and regulatory policy package that would lead this country toward price stability and higher levels of economic growth, were welcomed that night not only by the Congress but also by the American people.

□ 1245

Yet today the Budget Committee, of which I am a member, rejected President Reagan's program for economic recovery and accepted the Democratic party's budget, which, in effect, is another Carter budget. In fact, it was put together by President Carter's staffers. It is putting off tax reform until 1982. It is calling for higher taxes in 1981 on the American people. It calls for higher spending—except on defense. Not surprisingly, the budget projects that in 1982 we are going to have more unemployment, higher inflation, high double-digit interest rates and, in general, more of the stagflation that has been gripping the Western democracies' economies for some time.

This budget is pessimistic. I think it lacks the essential sense of optimism that President Reagan has about the future of the American free enterprise system. It rejects his belief that the American people would respond to sound economics, to a restoration of a sound dollar and incentives in the economy for both labor and capital, and get America moving again.

Considering the specifics in the Democratic budget, its sense of pessimism about the future of the country is perhaps understandable. But President Reagan is not asking my colleagues in the majority to abandon their whole world view overnight. All he asks is that they do not obstruct his own efforts to enact a program for economic recovery and ending inflation. Unfortunately, the budget of the majority signals their intention to do just that. It is another Carter budget.

A MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed a joint resolution of the following title, in which the concurrence of the House is requested:

S.J. Res. 61. Joint resolution to authorize and request the President to issue a proclamation designating April 9, 1981, as "African Refugee Relief Day."

The message also announced that the President pro tempore, pursuant to Public Law 96-374, appointed Mr. STAFFORD to be a member, on the part of the Senate, of the National Commission on Student Financial Assistance; also Dr. David Gardner, from private life, was appointed to the above-mentioned Commission.

EXTENDING DEPARTMENT OF JUSTICE APPROPRIATION AUTHORIZATION ACT OF 1980

Mr. RODINO. Mr. Speaker, I ask unanimous consent that the Committee on the Judiciary be discharged from the further consideration of the Senate bill (S. 840) to continue in effect any authority provided under the Department of Justice Appropriation Authorization Act, fiscal year 1980, for a certain period, and ask for its immediate consideration in the House.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

Mr. McCLORY. Mr. Speaker, reserving the right to object, I take this action because I want to inquire of the chairman concerning the matter that he proposes to bring up. I think this relates to the authorization of the Department of Justice since the authorization expired last Sunday. This legislation which the gentleman requests to bring before the House now would enable the Department of Justice to carry on certain activities which might otherwise lapse, activities which were

recounted in the other body when this legislation was acted upon last week.

Would the gentleman explain what the resolution would do?

Mr. RODINO. If the gentleman will yield, the gentleman is correct.

I would merely point out that the Department of Justice is currently operating on a continuing resolution for its fiscal year 1981 authorization. Public Law 96-397 simply extended to April 5, 1981, the Department's 1980 authorization. This bill would extend those authorities to September 30, 1981.

Mr. Speaker, the House was unable to consider the Department of Justice's fiscal year 1981 authorization bill during the last session of Congress because of various scheduling problems. A continuing resolution was therefore enacted to permit the Department to carry on many of its vital activities. The resolution, however, lapsed on April 5, 1981.

The Department of Justice has assured us that it can continue to function effectively if the authorities contained in the fiscal year 1980 Authorization Act are continued to the end of this fiscal year. What we need today is this simple bill. Because the first continuing resolution expired on April 5, 1981, it has been argued that authority to conduct certain Department activities would not exist after that date. Therefore, I intend to offer an amendment to the bill to insure that there will be no hiatus in the Department's authority through the 1981 fiscal year. I urge my colleagues to support the bill and the amendment I intend to offer.

Mr. McCLORY. Further reserving the right to object, I yield to the gentleman from Wisconsin (Mr. SENSENBRENNER).

Mr. SENSENBRENNER. I thank the gentleman from Illinois for yielding.

On April 5, 1981, because Congress did not act last week to extend the Justice Department's authority, a number of authorities expired. I would like to point out a few of them.

First, authority for the FBI to conduct undercover operations in all areas of their investigative responsibilities expired.

Second, authority to expend funds by the FBI to protect the President and the Attorney General expired.

Third, authority to hire motor vehicles for the Drug Enforcement Administration for their undercover operations expired.

Fourth, the Bureau of Prisons lost its authority to expend funds for assisting State and local governments to improve their correctional systems.

Fifth, the Attorney General's authority to expend funds for certain emergency situations was curtailed.

Sixth, the authority to pay rewards by the FBI, Drug Enforcement Administration, Immigration and Naturalization Service, and Bureau of Prisons expired.

Seventh, the authority for the U.S. Marshals to expend funds to provide for the supervision of U.S. prisoners in non-Federal institutions were curtailed.

Eighth, the authority to permit the U.S. Marshals to bring to the United States from foreign countries persons charged with a crime expired.

Ninth, the specific authority to expend funds by the FBI to collect, acquire and classify records and exchange them with authorized Federal, State, local, and other institutions expired.

Tenth, the authority for the Attorney General to expend funds regarding the conduct of certain investigations requested by the Department of State was curtailed.

Eleventh, the reprograming restrictions this Congress has placed on the movement of funds from one program to another to improve fiscal discipline within the Department lapsed.

Twelfth, the requirement that the Attorney General report to Congress any policy change in the enforcement of the law which is the responsibility of the Department also lapsed.

There is at least 1½ day hiatus from the expiration of the authority that I have outlined until the present time. I am wondering if the gentleman from Illinois or the distinguished chairman of the Judiciary Committee will be offering an amendment to try and cure whatever has occurred during this hiatus period?

Mr. McCLORY. I can say to the gentleman that an amendment will be offered before the passage of S. 840.

Mr. SENSENBRENNER. Will the gentleman yield further?

Mr. McCLORY. Yes.

Mr. SENSENBRENNER. I wish this bill would have been taken up last week so this gap did not occur. I recall the gentleman from Illinois urging that that be done, as did I. But I think that it is better late than never, so I would hope that this bill would be enacted promptly.

Mr. McCLORY. I withdraw my reservation of objection, Mr. Speaker.

The SPEAKER pro tempore (Mr. MOAKLEY). Is there objection to the request of the gentleman from New Jersey?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 840

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the authority, and any limitation on authority, contained in the Department of Justice Appropriation Authorization Act, Fiscal Year 1980, shall continue in effect with respect to activities of the Department of Justice (including any bureau, office, board, division, commission, or subdivision thereof) until September 30, 1981.

The SPEAKER pro tempore. The gentleman from New Jersey (Mr. RODINO) is recognized for 1 hour.

Mr. RODINO. Mr. Speaker, I merely wanted to state that the gentleman from Wisconsin (Mr. SENSENBRENNER) ought to be advised, since he made reference to the fact that he would have hoped that the bill might have been considered last week, that while we had this under consideration, there was no request from the Department of Justice until last week, and last week there were only pro forma sessions in the House. As a result, it was impossible to take this matter up. This is the earliest date. The problem of the lapse is being rectified in this manner and by an amendment to the bill sent over by the other body.

Mr. Speaker, I yield to the gentleman from Illinois (Mr. McCLORY).

Mr. McCLORY. Mr. Speaker, I rise in support of S. 840 and the amendment to that bill that the gentleman from New Jersey intends to offer. As amended, S. 840 would continue in effect the authority provided under the Department of Justice Appropriation Authorization Act for Fiscal Year 1980 from April 6, 1981, to the end of the fiscal year.

We are all painfully aware of the urgent need for immediate enactment of this bill. Last September, when we considered the first continuing resolution for the Justice Department for this fiscal year, this body was apprised of the vital activities which would cease upon any lapse in their authorization. At that time, we acted promptly and responsibly to insure that there would be no such lapse. In a similar manner, the other body passed S. 840 before the first continuation expired at midnight on April 5. Unfortunately, despite my expressions of grave concern, this body adjourned without taking the same action last week. Now we are considering this important legislation 2 days after the continuing authorization expired.

Mr. Speaker, because speedy action on S. 840 and the amendment of the gentleman from New Jersey is imperative. I strongly support their immediate passage, but not without voicing this mild protest. This approach to fulfilling our legislative responsibilities by extending an earlier extension must, and hopefully will, cease following the enactment of this bill.

Mr. RODINO. Mr. Speaker, I yield back the balance of my time.

AMENDMENT OFFERED BY MR. RODINO

Mr. RODINO. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. RODINO: Page 2, strike out line 2 and insert in lieu thereof the following: "thereof) during the period

beginning on April 6, 1981, and ending immediately before October 1, 1981.".

The SPEAKER pro tempore. The question is on the amendment offered by the gentleman from New Jersey (Mr. RODINO).

The amendment was agreed to.

The question is on the third reading of the Senate bill.

The Senate bill was ordered to be read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the Senate bill, as amended.

The question was taken; the Speaker announced that the ayes appeared to have it.

Mr. SENSENBRENNER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 368, nays 2, not voting 62, as follows:

Mr. Long of Louisiana with Mr. McCloskey.
Mr. Moffett with Mr. Martin of North Carolina.
Mr. Wilson with Mr. Vander Jagt.

Mr. EMERSON changed his vote from "nay" to "yea."

So the Senate bill, as amended, was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

AUTHORIZING THE SPEAKER TO REFER EXECUTIVE COMMUNICATIONS, NOTWITHSTANDING ADJOURNMENT

Mr. MURTHA. Mr. Speaker, I ask unanimous consent that notwithstanding the adjournment of the House until April 27, 1981, the Speaker be authorized, pursuant to clause 2, rule XXIV, to refer executive communications to the appropriate committees when received.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

COMMENDING AGENTS McCARTHY AND PARR AND OFFICER DELAHANTY FOR UNSELFISH COURAGE AND PATRIOTISM

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from the further consideration of the resolution (H. Res. 123) to commend Agents McCarthy and Parr and Officer Delahanty for their unselfish courage and patriotism during the recent attempt on the life of the

President of the United States, and ask for its immediate consideration.

The Clerk read the title of the resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. SOLOMON. Mr. Speaker, reserving the right to object. I do not object to the content of this resolution, since I submitted it, but House Resolution 123 is identical to a Senate resolution which was introduced by Senator PAUL LAXALT and passed by the Senate on Thursday.

It commends Secret Service Agents Jerry Parr and Timothy McCarthy and Washington Police Officer Thomas Delahanty for their courage and patriotism in protecting the President of the United States last week.

Mr. Speaker, I think it is clear to all Americans that if it were not for the bravery of these men, last week's tragedy would have been an even greater tragedy. When the shots rang out, they placed themselves directly in the line of fire to shield the President. That took real guts, Mr. Speaker, and I think this Congress should go on record praising this act of sheer courage.

At the same time, Mr. Speaker, my resolution calls the Nation's attention to the fact that for every act of life-endangering heroism that receives public acclaim, there are literally hundreds of equally courageous acts performed every day by law enforcement officers all over this country. The men and women in uniform who patrol our streets and highways and guard our neighborhoods, risk their lives every day to protect us—and for the most part, they do it without headlines, honors or acclaim. My resolution calls attention to the courageous actions of the security officers protecting the President not because it is an exceptional situation, but because it is representative of the kind of unselfish bravery which is exhibited daily by heroes in uniform in every State, county, city, and town all over America.

God bless them all.

Mr. BIAGGI. Mr. Speaker, will the gentleman yield?

Mr. SOLOMON. Further reserving the right to object, I yield to the gentleman from New York.

Mr. BIAGGI. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, as a former police officer for 23 years in the city of New York and as a grateful American—I rise today to lend my total support to the pending resolution saluting the heroic actions of Federal and local law enforcement personnel in last Monday's assassination attempt on President Reagan.

The resolution singles out two men in particular for their actions. The first is Secret Service Agent Tim McCarthy—the man who is actually credited with saving the life of President Reagan. It was McCarthy who literally threw himself in the path of one of the bullets intended to kill the President. Agent McCarthy sustained serious wounds but all indications are that he is recuperating satisfactorily if not excellently.

District of Columbia Police Officer Thomas Delahanty also is cited by name in this resolution for his acts of high bravery in the moments after the assassination attempt. Despite enduring a serious gunshot wound of his own—Delahanty contributed significantly to the apprehension of the assailant—one Mr. Hinckley. Accounts at the scene stated that Delahanty actually helped tackle Hinckley.

The highest commendation must go to Agent Parr of the Secret Service whose lightning fast reaction in pushing the President into his limousine saved the President from further harm. Equally as important was his perhaps lifesaving decision to have the President directed immediately to George Washington University Hospital rather than the original destination—the White House.

And one should not overlook the work of Secret Service Agent Unrue who skillfully drove the Presidential limousine out of the danger zone and to the hospital.

Secret Service agents by and far represent the cream of the law enforcement crop. They are responsible for guarding the life of the most powerful leader in the world. In this work, they must be ever vigilant—ever protective—ever sacrificing. The outstanding response work of the Secret Service detail at the Washington Hilton this past Monday has earned the lasting respect of all the people of the Nation.

Today we pay tribute to the Secret Service and the District of Columbia Police Department. Let us use this occasion to reiterate our prayers for President Reagan's continued progress toward a full recovery—as well as for Press Secretary Brady who continues to make remarkable progress.

Law enforcement officers are often overlooked for their work. What is routine for a law enforcement officer—can be lifesaving for an individual. President Reagan learned this last Monday. Law enforcement officers seek to be recognized as the professionals they are. Today we salute the exemplary work of a small number of Federal and local law enforcement personnel who saved the life of the President of the United States. Let us use this occasion to pause and thank our State and local law enforcement personnel for the fine work they are doing every day in the streets of our towns, villages, and cities.

Mr. SOLOMON. Mr. Speaker, I thank the gentleman from New York (Mr. BIAGGI) for his remarks.

Let me just say that every Member of this House knows of the fine service the gentleman from New York gave to the city of New York when he was a police officer. He certainly is a living example of what we are talking about today.

Mr. COURTER. Mr. Speaker, will the gentleman yield?

Mr. SOLOMON. I yield to the ranking minority member of the subcommittee.

Mr. COURTER. Mr. Speaker, I thank the gentleman very much for yielding.

I just want to associate myself with the comments of the gentleman in the well, the gentleman from New York (Mr. SOLOMON). I think that bringing this resolution to the floor was the proper thing to do. I know that I talked with the gentleman from New York a few times before about this, and I am very, very happy to be in a position to assist the gentleman in bringing the resolution up in an expedited fashion for consideration.

Mr. Speaker, I think it is extremely important for Americans at this time to remember these three individuals who performed their duty so outstandingly. Again I congratulate the gentleman from New York (Mr. SOLOMON) for bringing this to our attention.

Mr. SOLOMON. Mr. Speaker, the gentleman from New Jersey (Mr. COURTER) along with the gentleman from New York (Mr. GARCIA), was extremely helpful in assisting us in drafting the resolution, and we thank him very much.

Mr. DERWINSKI. Mr. Speaker, will the gentleman yield?

Mr. SOLOMON. I yield to the gentleman from Illinois.

Mr. DERWINSKI. Mr. Speaker, I, too, wish to congratulate the gentleman from New York (Mr. SOLOMON) for his special attention and his leadership in this effort, and I realize this could not have been done without the cooperation of the gentleman from New York (Mr. GARCIA), who was very instrumental in the effort and who appreciates and understands the point of the resolution. I think it is obvious that the gentleman's sentiments express those of all the Members of the House.

Mr. SOLOMON. Mr. Speaker, I likewise thank the gentleman from Illinois (Mr. DERWINSKI), who is also the ranking minority member of the full committee.

Mr. GILMAN. Mr. Speaker, will the gentleman yield?

Mr. SOLOMON. I yield to the gentleman from New York.

Mr. GILMAN. Mr. Speaker, I, too, rise in support of the resolution and commend both the gentlemen from New York (Mr. SOLOMON and Mr. GARCIA), for their efforts in bringing this matter to the attention of the

House. It is certainly appropriate at this time that we bestow deserving honors on those who have given so much for our Nation during the recent attempt on the life of our President.

To Agent McCarthy and Officer Delahanty go the prayers and thanks of our entire Nation for their courageous fulfillment of their duties in protecting the President.

Mr. SOLOMON. Mr. Speaker, I thank the gentleman from New York (Mr. GILMAN).

Ms. OAKAR. Mr. Speaker, will the gentleman yield?

Mr. SOLOMON. I am most happy to yield to the gentlewoman from Ohio.

Ms. OAKAR. Mr. Speaker, I would like to commend the gentleman from New York for offering this resolution as well as the chairman of the subcommittee for dealing with the resolution so expeditiously.

It should be noted, however, that there are two, unmentioned, unsung heroes who played key roles in accosting the assailant of the President, Press Secretary Brady, the Secret Service agent, and the District of Columbia police officer. Mr. Alfred Antenucci, president of the Carpenter's Local 1750 and Mr. Frank McNamara, president of Millwright Union Local 1871, both of whom are from my hometown of Cleveland, heroically tackled the assassin, obviously risking their lives. Mr. Antenucci suffered heart seizure following his intervention. He is recuperating in Georgetown University Hospital. Mr. McNamara apparently did not incur any injuries.

Mr. Speaker, the spirit of this resolution speaks not only to saluting law enforcement personnel, but also to the citizen on the street who chooses to become involved in the prevention of violent crime. Both Mr. Antenucci and Mr. McNamara are exemplary individuals who were not afraid to lend their assistance in a perilous situation. Their bravery deserves our respect and our applause.

Mr. Speaker, I thank the gentleman very much for yielding to me.

Mr. SOLOMON. Mr. Speaker, I thank the gentlewoman from Ohio (Ms. OAKAR) for her comments, and let me just say that we did not deliberately leave their names out.

I also had a secret agent, who is a constituent of mine from the very small village of Schaghticoke, N.Y., who was also one of those participants. I just felt that we did not want to dilute the meaning of this resolution for those three, but we certainly pay tribute to all of them, as I said in my resolution.

Mr. SOLOMON. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the resolution, as follows:

H. RES. 123

Whereas those charged with the duty of protecting our Nation's leaders place their lives in jeopardy every day of their service;

Whereas these people perform their duty in an anonymous manner except during times of national crisis when the eyes of the country are focused on them;

Whereas on March 30, 1981, in the city of Washington, Agent Timothy J. McCarthy of the United States Secret Service and Officer Thomas K. Delahanty of the Metropolitan Police Force suffered critical injuries in the line of duty while protecting the President of the United States; and

Whereas the unselfish and skillful efforts of all these men in helping to save the life of the President placed their own lives in the greatest peril: Now, therefore, be it

Resolved, That the United States House of Representatives commends Agent McCarthy and Officer Delahanty for their courageous actions on behalf of the Nation and prays for their speedy recovery and commends Agent Jerry Parr for his phenomenally quick action and judgment in time of crisis and further commends all of the brave men of the Presidential protective detail who acted to save the life of the President of the United States on March 30, 1981.

SEC. 2. The Clerk of the House of Representatives shall transmit copies of this resolution to Agents McCarthy and Parr and Officer Delahanty.

The SPEAKER pro tempore. The Chair recognizes the gentleman from New York (Mr. GARCIA).

Mr. GARCIA. Mr. Speaker, before passage of this resolution, I would just like to say that it was a sad day last Monday, probably one of the saddest days in our history, but out of sadness comes the heroism of the three persons of whom we speak.

I am also delighted to report that as most of us have read, the President's press secretary, Mr. Brady, answered the question yesterday when they asked him who he worked for, and his response to them, which I think was quite appropriate, was: "I work for the President, and who is asking those stupid questions?"

So he seems to be well on his way to recovery.

Mr. Speaker, I want to commend my colleague, the gentleman from New York (Mr. SOLOMON), for this resolution, and I am very hopeful that we will never have to pass a resolution of this type again.

The SPEAKER pro tempore. The question is on the resolution.

The resolution was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks, and to include extraneous matter, on the resolution just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

AFRICAN REFUGEE RELIEF DAY

Mr. GARCIA. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate joint resolution (S.J. Res. 61) to authorize and request the President to issue a proclamation designating April 9, 1981, as "African Refugee Relief Day," and ask for its immediate consideration in the House.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. DIXON. Mr. Speaker, reserving the right to object, the House is being asked to consider Senate Joint Resolution 61, asking the President to designate April 9 as African Refugee Relief Day.

As the sponsor of this resolution, it has been my privilege to have the sponsorship of more than 230 Members of the House.

This Thursday and Friday, the United Nations is sponsoring a conference on assistance to refugees in Africa in cooperation with the Organization for African Unity.

It is my hope that increased public awareness of the grave refugee problems in Africa will result in greater support for those agencies, as well as stronger humanitarian assistance from our Government.

For the record, I would like to include in the RECORD a listing of those agencies recognized by the State Department and United Nations for their work in providing care and relief to refugees in Africa.

HOW CAN YOU HELP AFRICAN REFUGEES

There are private relief agencies throughout the country that are working to provide food, medicine, and other assistance to refugees in Africa. All of these groups are recognized by the State Department or the United Nations for their work in this field. In every instance, contributions to these groups should specify: "for African refugees."

United Nations High Commissioner for Refugees, 1785 Massachusetts Avenue, N.W., Washington, D.C. 20036.

American Friends Service Committee, 1501 Cherry Street, Philadelphia, Pa. 19102. Patricia Hunt.

World Relief Corporation, P.O. Box WRC, Wheaton, Ill. 60187. Bill Hewitt.

Assemblies of God Foreign Service Committee, Division of Foreign Missions, 1445 Boonville Avenue, Springfield, Mo. 65802.

Mr. DIXON. Mr. Speaker, I withdraw my reservation of objection.

● Mrs. COLLINS of Illinois. Mr. Speaker, I rise in support of Senate Joint Resolution 61, which requests that the President designate April 9, 1981, as African Refugee Day.

The purpose of this commemorative day is to highlight attention to the precarious plight of over 4 million refugees in Africa and to encourage public support for private relief agencies involved in assisting the refugees with food and medical supplies.

In responding to the African refugee crisis, the United Nations General Assembly on November 25, 1980, called on the Secretary-General to convene an international conference to mobilize assistance for refugees in Africa. This meeting, convened by the Secretary-General in close consultation with the Organization of African Unity and the United Nations High Commissioner for Refugees, will be held in Geneva, Switzerland, on April 9 and 10, 1981. The Conference will be at the ministerial level and attended by governments, international organizations, and nongovernmental organizations all concerned with finding the ways and means to solve this major humanitarian problem.

Accordingly, I would like to share with my colleagues the January 28, 1981, ICARA report entitled: "World To Focus Attention on African Refugees."

WORLD TO FOCUS ATTENTION ON AFRICAN REFUGEES

The International Conference on Assistance to Refugees in Africa (ICARA)—to be held in Geneva, 9–10 April—will be the first major world meeting of its kind to focus attention primarily on the plight and needs of the African refugees.

Called for by the United Nations General Assembly in its resolution of 25 November 1980, ICARA's objectives, as explained by the Secretary-General of the United Nations Dr. Kurt Waldheim are:

To focus public attention on the plight of refugees in Africa;

To mobilize additional resources for refugee programmes in Africa;

To assist countries of asylum and strengthen their ability to cope better with the extra burden placed on their services and facilities.

Participating in ICARA will be member states of the Organization of African Unity (OAU) and the United Nations. National liberation movements recognized by the OAU and the UN will participate in the Conference as will do several non-governmental organizations (NGOS), intergovernmental organizations (IGOS) and the information media, all who have in the past been seized of the African refugee problem, and were engaged in various measures of solving it.

Previous conferences dealing with the African refugee problem were held at the OAU and Pan-African levels—one in Addis Ababa, 1967 and the other in Arusha, Tanzania, twelve years later. The salient achievements of these conferences were to define clearly the refugee problem in Africa, and to underline the will and determination of the African countries to assist refugees.

Referred to as the Conference on the Legal, Economic and Social Aspects of the African Refugee Problem, the Addis Ababa OAU Conference in 1967 led to the drafting and subsequent adoption in 1969 of the OAU Convention Governing the Specific Aspects of Refugee Problems in Africa.

The OAU Convention incorporated the traditional definition of the term "refugee", as stated in the earlier 1951 Convention and the 1967 Protocol Relating to the Status of Refugees. It went a step further, however, in clarifying that "the term refugee shall also apply to every person who, owing to external aggression, occupation, foreign domination or events seriously disturbing public order in either or part or in whole of his country of origin or nationality, is compelled to leave his place of habitual residence in order to seek refuge in another place outside his country of origin or nationality".

The flux condition of Africa in the early seventies—the intensification of the liberation struggle, especially in southern Africa, internal conflicts as well as inter-territorial disputes in a number of other regions led to an unprecedented growth of refugee numbers on the continent. By the middle of the seventies decade, the refugee problem in Africa, had clearly assumed emergency proportions. One year alone, 1976, for instance, saw an increase of over 700,000 refugees in Africa, establishing that with every passing day, about 2,000 Africans turned refugees or displaced persons—a rate of growth well over 2 times the world average of 800 refugees created per day.

RECOGNITION

The first Pan African Conference on Refugees in 1979, was held therefore against the background of great concern, at both the continental and international levels, about the rising refugee tide in Africa. It was considered that given their own great economic difficulties, the African refugee asylum countries were finding themselves extremely hard put to cope effectively with the daily refugee influxes which were imposing and extra burden on their services and facilities.

Sponsored by the OAU, the United Nations, High Commissioner for Refugees (UNHCR) and the United Nations Economic Commission for Africa (ECA), the Pan African Conference therefore met not only to review the refugee situation in Africa, but also to find ways and means of promoting permanent and effective solutions. Consequently, the OAU countries initiated the call for an international conference to deliberate and act on the African refugee crisis, a call which was met by the United Nations General Assembly in its resolution to convene ICARA.

ICARA comes therefore at a time of heightened recognition of the fact that Africa has the largest and fastest growing refugee population in the world today. Over one half of the world's refugees are in Africa. Africa's refugees who numbered one million in 1975, increased to 3.7 million in 1977 and to 5 million in 1980, their numbers having multiplied by a factor of five in as many years.

The International Conference also comes in the wake of yet another realization that most of the African refugee asylum countries, plagued by their own critical social and economic problems—the droughts, food deficits, rising energy and other import costs on which they depend, debt repayments and balance of payment difficulties—need aid for themselves, to keep their economies and social institutions surviving, just as much as they need support to cope with the added refugee emergency.

In their 1969 Convention, the OAU countries had made the emphatic declaration that, "No person shall be subjected by a member state to measures such as rejection at the frontier, return or expulsion, which would compel him to return or remain in a territory where his life, physical integrity or liberty would be threatened."

On account of this generosity and open-door commitment, a number of African countries—for example, Somalia with 1.5 million, Sudan with 490,000, Zaire with 400,000 and Cameroon with 266,000 refugees have had to handle massive influxes of people who seek asylum and refuge. They acted responsibly, realistically and resolutely, giving asylum to the numbers who kept on coming and growing. They set a good example of respecting international treaties on the granting of asylum, and especially observing the principle of nonrefoulement.

All in all, the African countries showed a tremendous goodwill towards the suffering refugees in the continent. But goodwill alone, it is now tragically clear, is not enough, which is why the forthcoming ICARA is so important, to ensure that there will be adequate resources for better and more effective provision, coordination and management of the services that the African refugees require to feel at home and self-actualizing wherever they are.

Between the statement and the realization of this ideal, there is long shopping list for refugees in Africa. Refugees administrative and managerial services need boosting in the asylum countries so that counselling services for refugees in the continent may

be satisfactorily continued and extend; roads and other transport and communications networks in the refugee areas need in some cases to be established, and in others to be improved and constantly maintained so that food, medicine, and other essential supplies may reach refugees expeditiously where and when they are needed.

Hospitals, health centres, clean water supplies, and the necessary tools of production need to be made available especially in the remote and usually arid rural areas of Africa where the bulk of the refugees are found. Education, employment and other self-advancement opportunities need to be more reliably provided for the refugees so that they may be made to shed off the frustrating sense of anomie which the refugee condition has normally given them.

In the countries like Tanzania where successful rehabilitation and integration programmes for refugees have been effected, in Somalia where emergency operations for refugees are underway, as well as in the others like Zimbabwe and Uganda where refugees have been repatriated to their homeland and are facing the challenging task of reconstruction, the need is expressed even more to assist governments in their meritorious and expensive commitments.

Above all, international mobilization of assistance to African refugees, which should also involve introduction of positive legislative measures and continuous education of the public in all the countries of the world, should make it possible for refugees at all times, and anywhere they are, to retain confidence in the sense of their human worth, as fully participatory, respected and welcome members of the communities in which they find themselves.

MASSIVE SUPPORT

It is expected, therefore, that rather than any polemics dominating the planned conference, it is the sincere and practical concern about the suffering and fate of the millions of refugees in Africa—most of them women and children—that will excercise the hearts and minds of all participants.

Indeed, what is required is expression of international sympathy and solidarity with the African refugees, but also marshalling of massive financial and material support, involving billions of dollars over the years, to refugee aid in Africa. And since the African countries, on their own, do not have requisite resource power, the principle of collective international responsibility towards solution of the refugee problem in Africa is justifiably invoked. At the very least, it is expected that those who have more will give more to a solution of the African refugee emergency which left unsolved, threatens global repercussions.●

● Mr. RANGEL. Mr. Speaker, I rise in support of Senate Joint Resolution 61, a bill authorizing the President to proclaim April 9, 1981, as "African Refugee Relief Day."

The massive number of refugees has been a problem of immense magnitude in Africa, yet it is overshadowed by U.S. concerns in other parts of the world. The refugee population on the African continent is an estimated 4 to 5 million, and still growing.

Most refugees have found sanctuary in neighboring countries. These host countries, due to desperate economic conditions, have been unable to adequately provide the basic needs for their own citizens, let alone the refugees.

The refugee assistance given by African countries, in the context of their limited resources is substantial and generous, despite the negative effect this generosity has on their own development programs.

Relief efforts are not keeping pace with the rate at which the problem is multiplying. Essential life sustaining services such as food, water, and clothing are needed because these countries of asylum are taxed to the maximum, and are unable to meet these basic human needs.

The magnitude of the refugee problem is awesome, not only because of the sheer numbers involved, but also because of the potential for the political and economic havoc which the problem poses.

Prospects for these people and countries look even bleaker with such negative outside factors as drought, mounting energy costs, food deficits and world recession.

These African nations cannot effectively cope with such an overwhelming burden. In order for these countries and their inhabitants to survive our immediate assistance is absolutely essential.

On April 9 and 10, 1981, the Organization of African Unity and the United Nations High Commissioner for Refugees will convene an international conference in Geneva, to develop a plan of action to respond to this grave crisis.

I hope that this conference will lead to greater international participation and involvement. Recognition of this refugee problem on a worldwide basis is desperately needed for any successful changes to take place.

I thank Congressman DIXON for his work on this issue, and I urge passage of this resolution.●

● Mr. GRAY. Mr. Speaker, Senate Joint Resolution 61 is meant to increase the awareness of the plight of our 4 million refugees on the continent of Africa.

As a cosponsor of this resolution, I am pleased to share with my colleagues an article that vividly describes the conditions of the refugees in Somalia.

[From the Philadelphia Tribune, Apr. 3, 1981]

TWO MILLION REFUGEES STARVING IN AFRICA

(By Joseph C. Kennedy)

"Somalia is a disaster zone. Every fourth person in the country is a refugee. The strain on the economy, the water, the grass, the trees, is destroying the country."

Those were the words of a Somali woman working with an international organization in Mogadishu.

Since the United States began negotiating to establish naval and air bases at the port of Berbera on the Indian Ocean as a response to the Soviet build-up in the Persian Gulf, Americans are beginning to hear more about Somalia. Few Americans are aware, however, that there are more refugees in Somalia than in any other single place in the world—more than the boat people of Cambodia and Vietnam.

Somalia, located on the northeast coastal and other limited areas, agriculture, and livestock grazing is possible but two-thirds of the Texas-sized country is rocky, semi-arid, without surface water. The same drought which ravaged the Sahel from 1969-75, struck Somalia, uprooting hundreds of thousands. Over the past year, rainfall has been meager; once again, drought and starvation may exist.

To this harsh land, refugees are streaming in at the rate of 3,000 per day, fleeing from the fighting in the Ogaden—a vast grassland, with widely spaced wells and watering holes, ceded to Ethiopia by the British in 1954, contested by Somalia. (Since the 16th century, Christian Amharas, and Somali and Oromo Muslims have struggled for this area. Twice in recent times, 1964 and 1977, there has been full-scale war.) Since 1978, Ethiopia has totally dominated the struggle.

Today there are nearly two million refugees in Somalia. At least 700,000 have moved in with relatives, drifted into the towns and in general absorbed themselves into the Somali society of 3½ million. Over 1.3 million are in the camps.

The refugees in the camps are mainly nomadic pastoralists. Few are skilled. Sixty-one percent are children, 30 percent are women. Of the nine percent male population, most are elderly or ill. Many of the able-bodied men have been killed. Many remain in the Ogaden fighting or attempting to hold on to the family herds. Some of the refugees have walked a month to get to the camps. Most arrive with nothing.

The camp, Sabaa'd, is 31 kilometers west of Hargeisa, the second largest city in Somalia.

One of the major problems at Sabaa'd is the lack of tree branches. The typical nomadic house is made by sticking branches into the the ground, bending and tying the branches together at the top, then covering them with straw mats (now with burlap, canvas, plastic, tarpaulin, anything which is available). The refugees have come so suddenly there has not been time to collect branches.

In all the camps there are desperate needs—water, sanitation facilities, food, health facilities and shelter. Agabar in the West Galbeed (northwest region) is typical. Sand and dust blow across the camp. Ten thousand tents housing 50,000 refugees stretch as far as the eye can see, looking like ant hills in the distance.

Camp Agabar is located near a river. At this time of the year, though, the river is dry. A few feet below the surface there is water. Children and women sit in the river bed, digging through the sandy soil until they hit a trickle of water. Sitting with their feet in the water they use a small can to fill a larger one-gallon can. Making five or six trips a day, they carry this water the half-kilometer to the camp.

There is a general hospital, with seven wards, and a TB hospital. All of the structures are built of tree limbs. Some of the walls are covered with mud; others are totally open. The canvas roofing is held on by large tree boughs. This day there are 122 patients (including 30 malnourished children suffering from marasmus and kwashiorkor, caloric and protein deficiencies). At the general hospital and the seven clinics around the camp, about 800 outpatients are seen every day. Malnutrition, bronchitis,

whooping cough, malaria, dysentery, measles and dehydration are prevalent. There is neither enough medicines nor enough health personnel. Fifteen percent of the people need therapeutical assistance 30 percent need supplemental feeding. During one recent month, there were 103 deaths.

For the past six months, there has been little meat or milk at Agabar. There has been no "supplementary" (fortified cereal for baby pablum) for a month and a half, no sorghum or tea for two months. In a country where no alcohol and little coffee is consumed, going without tea is one of the greatest sacrifices.

World Food Program projections are made every three months, but the numbers of incoming refugees increase each day, so projections are usually off. When the food does not arrive on time, the Somalia government dips into its own central stores, which provide food for the general population, to feed the refugees, depriving the citizens themselves there is little food throughout the country, however, as a consequence of the light rains of 1979, and so the food shortages persist in the camps.

One of the bright notes at Agabar is the children and the primary school. Wearing a mishmash of clothing, long pants, short pants, skirts, wraparounds, barefoot or in rubber sandals, they come running, chasing the vehicle, waving, smiling, turning away shyly, like children everywhere.

There are 56 Somali teachers for 2,200 pupils in 22 classrooms. The children go to school from 7 A.M. to noon, six days a week. A regular curriculum of math, history, Arabic, Somali and the Koran is offered.

The school is defined by a large circle of thorn brush. Here the children sit on rocks so they can use their knees for desks. Pencils, exercise books and a blackboard have been provided by the United Nations High Commission for Refugees. The classrooms for grades one through four are separated by small stacks of stones.

This situation at Agabar is repeated at the other camps. The government of Somalia has struggled valiantly. The army, university students, Somali volunteers have answered the call. The administration of the camps is remarkable.

At the central government level, there is a National Commission for Refugees under the direction of the minister of local government and rural development. A commissioner of refugees is secretary of this commission, which includes the ministers of health, education, agriculture, mineral and water research, finance and representatives from other related ministries.

Administration at the regional level is under regional commissioners, supported by a staff which parallels the services represented at the national level. The 34 camps, ranging in size from 32,000 to 50,000, are in four of the country's 16 regions. West Galbeed has eight camps. Hiran 10, Gedo 12 and Lower Shabellie three.

Camp administration is headed by a commandant with an administrative cadre responsible for food distribution, housing and planning, health, education, water and security.

At Agabar, administrative personnel number about 250, including 30 volunteer self-help teachers, 83 volunteer self-help health workers and 50 "victory pioneers," who help with security. Camps are broken into five subdivisions, starting with sections (400 persons per section) to the smallest division, units (10 households per unit). Through committees which exist at each subdivision, there is a heavy involvement by the refugees in managing their own affairs. The complicated task of food distribution and allocation by family is handled by the refugee committees, for example. In spite of the excellent administrative structure and personnel, the government and people of Somali are still being overwhelmed.

In September 1979, the Somalia government declared a state of emergency, and sent out a world wide appeal for assistance. The international community has begun to respond: the Swiss have provided a technical team; Australia, nurses; the British and French, physicians. The European Economic Community has donated vehicles. The World Food Program, WHO, UNICEF, Oxfam, the Mennonites are involved. The US has provided nearly $28 million in assistance for food, transportation, medicines and shelter. The UN High Commission for Refugees is coordinating the effort. The response has been encouraging, but not sufficient to meet the needs.

The government of Somalia, with the assistance of a UN commission, has identified short-term and long-term needs, which will require $277 million. UNICEF estimates $175,000 per camp will be needed to provide adequate water supplies to the refugees.●

● Mr. DERWINSKI. Mr. Speaker, I rise in support of Senate Joint Resolution 61 designating April 9, 1981, as "African Refugee Relief Day."

Nearly 1 million Africans are now located in 32 refugee camps with an additional 3 million in 27 locations on the continent of Africa. They are suffering from the lack of food, shelter and the necessary resources to sustain themselves. These refugees are totally dependent on international relief effort if they are to survive.

As the Organization for African Unity and the United Nations High Commissioner for Refugees convene in Geneva on April 9 and 10 to develop a plan of action, I feel it is most fitting that we designate April 9, 1981 as African Refugee Relief Day. Through massive public awareness programs we can make the difference between life and death for the millions of refugees now suffering in Africa.

I feel that once the American people are informed of the conditions now existing in Africa, made aware of the facts and become knowledgeable as to what success could be achieved in overcoming this situation with their assistance, they will respond to the needs of the African refugees as they did with Cambodian relief.●

● Mr. ERDAHL. Mr. Speaker, tomorrow I will be traveling to Geneva, Switzerland, to participate in an International Conference on African Refugees. It is certainly fitting that the Congress go on record as proclaiming "African Refugee Relief Day" for April 9 as this conference is meeting.

With some 4 million refugees Africa today has the most serious refugee problem of any continent. The developed nations meeting in Geneva will be reviewing ways the international community can relieve the suffering of these displaced persons. I am pleased to participate because the United States plans to offer a substantial pledge of assistance for use over the next 2 years. There are whole civilizations in Africa that face extinction unless we respond meaningfully to their need. Millions of people in Somalia, Ethiopia, Kenya, Uganda, the Sudan, Zimbabwe, and elsewhere have been displaced by war, drought, and famine.

Most of the refugees are women and children. They are the future of Africa and the permanent damage that can be caused by severe malnutrition can be both physical and mental. This damage is irreversible and our need to act is now. There is no better way for us to invest in the future security of the world than by responding to the millions of refugees in Africa and giving them hope for a future.

Thank you.●

● Mr. FAUNTROY. Mr. Speaker, it is with a sense of urgency that I join with my distinguished colleague from California, Congressman JULIAN DIXON, in cosponsoring House Joint Resolution 202 (S.J. Res. 61), to authorize and request the President to issue a proclamation designating April 9, 1981, as "African Refugee Relief Day."

The more than 4 million refugees on the continent of Africa, predominantly women and children must have our support. They are innocent victims of armed conflict, drought, and political unrest and should point out to us the need for the nonviolent resolution of conflict and the human cost of increasted militarization.

It is also important to note that the many African countries impacted by refugee populations have met their responsibilities with a superb demonstration of humanitarian concern. While this is true, the African countries so impacted generally lack sufficient resources to provide the necessary relief and to carry on much-needed development efforts.

It is for this reason that the Congressional Black Caucus in our constructive alternative budget has called for and restored $32 million to migration and refugee assistance for a recommended total of $585 million and has called for the earmarking of 20 percent of these funds for refugees on the African Continent.

Such a budget commitment and the passage of House Joint Resolution 202 (S.J. Res. 61) will signal to the world our country's commitment to the tragedy unfolding in Africa.●

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 61

Whereas there are more than four million refugees on the continent of Africa, and more than half of the world's refugees are African;

Whereas these refugees, who are primarily women and children, have typically crossed hundreds of miles to escape the ravages of armed conflict, drought, and political unrest;

Whereas world attention has focused on the plight of the more than one million refugees in Somalia who have fled the war in Ogaden, are suffering greatly from disease and malnutrition, and are being housed in overcrowded camps in which more than 90 per centum of the refugees are women and children;

Whereas approximately twenty-seven African countries are confronted with refugee problems, and generally lack sufficient resources to provide these victims with necessary sustenance; and

Whereas the Organization for African Unity and the United Nations High Commissioner for Refugees will convene an international conference in Geneva on April 9 and 10, 1981, to develop a plan of action to respond to this grave crises: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President of the United States is authorized and requested to issue a proclamation designating April 9, 1981, as "African Refugee Relief Day" and calling upon the people of the United States to observe such day by (1) increasing there awareness of the plight of African refugees; and (2) foregoing one meal and using the funds that otherwise would have been spent on such meal to make contributions to recognized private voluntary agencies providing care and relief for such refugees.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks, and to include extraneous matter, on the Senate joint resolution just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

□ 1330

REPRINTING OF "INTERNATIONAL INFORMATION FLOW: FORGING A NEW FRAMEWORK"

Mr. GAYDOS. Mr. Speaker, by direction of the Committee on House Administration, I call up a privileged resolution (H. Res. 97) to authorize the reprinting of the report entitled "International Information Flow: Forging a New Framework," and ask for its immediate consideration.

The Clerk read the resolution as follows:

H. RES. 97

Resolved, That there shall be reprinted for the use of the Committee on Government Operations one thousand copies of the report entitled "International Information Flow: Forging a New Framework".

The SPEAKER pro tempore. The gentleman from Pennsylvania (Mr. GAYDOS) is recognized for 1 hour.

Mr. GAYDOS. Mr. Speaker, House Resolution 97 authorizes the reprinting of 1,000 additional copies of the report entitled, "International Information Flow: Forging a New Framework" (H. Rept. 96-1535) for use of the Committee on Government Operations.

The Government Printing Office estimates that the cost of these 1,000 copies will be $1,103.05. This report was issued just 3 months ago, and the committee's initial supply of 1,350 copies has been exhausted. Industry, concerned Government officials, and the general public have continually expressed a desire to acquire this document. Furthermore, the Subcommittee on Government Information and Individual Rights of the Committee on Government Operations will be conducting hearings during this spring on the bill, H.R. 1957, which resulted from the recommendations in the report. Both the hearings and consideration of H.R. 1957 will clearly enhance the further demand for this report.

Mrs. MARTIN of Illinois. Mr. Speaker, will the gentleman yield?

Mr. GAYDOS. I yield to my colleague from Illinois for debate purposes only.

Mrs. MARTIN of Illinois. I thank the gentleman for yielding. Just for the record, on this and the resolution to follow, each member of the majority and minority of the Committee on House Administration supported these regulations.

● Mr. BROOKS. Mr. Speaker, I want to thank the House Administration Committee and particularly the gentleman from Pennsylvania (Mr. GAYDOS) for bringing this resolution to the House floor. We are all reluctant to take any action that would increase costs but we also have an obligation to make our reports available to the public.

Our total supply of the report was exhausted in 3 months. It deals with a subject of great importance to industry and Government, as well as the general public. We can expect renewed requests for the report since another round of hearings on the international data flow was held just last week by the Subcommittee on Government Information and Individual Rights. Witnesses at those hearings testified that the report has been of great value and influence in helping us respond to the problems raised by new communications technology. We need these additional copies, and I hope the resolution will be approved.●

Mr. GAYDOS. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

PRINTING OF ADDITIONAL COPIES OF REPORT ON FIRST CONCURRENT RESOLUTION ON THE BUDGET

Mr. GAYDOS. Mr. Speaker, by direction of the Committee on House Administration, I call up a privileged resolution (H. Res. 105) approving the printing of additional copies of the report accompanying the first concurrent resolution on the budget for fiscal year 1982, and ask for its immediate consideration.

The Clerk read the resolution as follows:

H. RES. 105

Resolved, That there be printed for use by the House Committee on the Budget one thousand additional copies, at a cost not to exceed $1,200 of the House report entitled "First Concurrent Resolution on the Budget—Fiscal Year 1982".

The SPEAKER pro tempore. The gentleman from Pennsylvania (Mr. GAYDOS) is recognized for 1 hour.

Mr. GAYDOS. Mr. Speaker, House Resolution 105 approves the printing of 1,000 additional copies of the report to accompany the first concurrent resolution on the budget for fiscal year 1982, for the use of the House Committee on the Budget.

At this time, a cost estimate is not available since the report has not been written and filed in its final form. However, the language of this resolution provides that the cost of the additional reports shall not exceed $1,200. Based on the demands for this type of document during previous years and the present interest in it, the Committee on the Budget believes that its initial supply will quickly be exhausted and its wishes to have an adequate supply of the report available as the House begins consideration of the first concurrent resolution on the budget. This document will be in great demand during consideration of this resolution and during the reconciliation process.

Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. GAYDOS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to

revise and extend their remarks on the two resolutions just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to the provisions of clause 5, rule I, the Chair announces that he will postpone further proceedings today on each motion to suspend the rules on which a recorded vote or the yeas and nays are ordered, or on which the vote is objected to under clause 4, rule XV.

After all motions to suspend the rules have been entertained and debated, and after those motions to be determined by nonrecord votes have been disposed of, the Chair will then put the question on each motion on which the further proceedings were postponed.

PROVIDING FOR DISTRIBUTION OF ICA FILM: "IN THEIR OWN WORDS"

Mr. FASCELL. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 2884) to provide for the distribution within the United States of the International Communication Agency film entitled: "In Their Own Words," as amended.

The Clerk read as follows:

H.R. 2884

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) notwithstanding the second sentence of section 501 of the United States Information and Educational Exchange Act of 1948 (22 U.S.C. 1461)—

(1) the Director of the International Communication Agency shall make available to the Administrator of General Services a master copy of the film entitled "In Their Own Words"; and

(2) the Administrator shall reimburse the Director for any expenses of the Agency in making that master copy available, shall secure any licenses or other rights required for distribution of that film within the United States, shall deposit that film in the National Archives of the United States, and shall make copies of that film available for purchase and public viewing within the United States.

(b) Any reimbursement to the Director pursuant to this section shall be credited to the applicable appropriation of the International Communication Agency.

The SPEAKER pro tempore. Is a second demanded?

Mr. DERWINSKI. I demand a second, Mr. Speaker.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Florida (Mr. FASCELL) will be recognized for 20 minutes, and the gentleman from Illinois (Mr. DERWINSKI) will be recognized for 20 minutes.

The Chair now recognizes the gentleman from Florida (Mr. FASCELL).

Mr. FASCELL. I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 2884 as amended, a bill which would provide for distribution within the United States of an International Communication Agency film. Normally, films and other publications of this Agency are produced only for dissemination abroad. This one, I feel, is of special interest and educational value to U.S. citizens.

The film is entitled, "In Their Own Words." It tells the story, as seen through the eyes of the refugees who came by boat to Florida, of the Cuban boatlift from Mariel Harbor on April 21, 1980. It gives insights into life in Cuba and provides a perspective on the Cuban refugee situation which may not always be covered by our own domestic media.

This legislation as amended would allow the International Communication Agency to make a master copy of the film available to the Administrator of General Services. The Administrator would, in turn, reimburse the ICA for its expenses in providing the master copy domestic rights or any licenses required for the film's distribution within the United States, and would then make copies of the film available for public purchase through its National Audio Visual Center.

I urge my colleagues to support this legislation.

Mr. Speaker, I yield now to the distinguished chairman of the full Committee on Foreign Affairs, the gentleman from Wisconsin (Mr. ZABLOCKI).

Mr. ZABLOCKI. I thank the gentleman for yielding.

Mr. Speaker, I rise in support of H.R. 2884, as amended by the Committee on Foreign Affairs last week. The bill provides for the distribution within the United States of the International Communication Agency film entitled "In Their Own Words." The film documents the mass exodus of Cuban refugees from Mariel Harbor, Cuba to the United States last spring. Interviews were conducted with some of the 125,000 Cuban refugees who participated in the sea shuttle to the Florida coast. Firsthand accounts of the events were provided by the fleeing Cubans, who described their departures and their aspirations for a future in America.

Normally, films produced by the International Communication Agency are not made available to the U.S. public. Congress, however, does have the authority to approve such films for distribution within the United States, and has done so in the past. Previous examples include films about George Meany, Lyndon Johnson, and Margaret Mead. It is believed that "In Their Own Words" will be of significant interest to the American people in describing the events and motivations which impelled the Cubans to leave their homeland.

The amendment adopted by the Committee on Foreign Affairs simply designates the General Services Administrator as the person who will reimburse the ICA for any expenses of the Agency, incurred in the distribution of the film. The movie will be available for purchase and for viewing within the United States. Mr. Speaker, I urge the adoption of the bill.

The SPEAKER pro tempore. The Chair recognizes the gentleman from Illinois (Mr. DERWINSKI).

Mr. DERWINSKI. I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 2884, to permit the International Communication Agency to release for public use inside the United States its film "In Their Own Words." Almost a year ago, a phenomenon of exceptional drama and importance unfolded in Cuba. Thousands upon thousands of people of all walks of life, once again, chose freedom from communism. At first they sought assylum in the Peruvian Embassy in Havana, until it figuratively burst at the seams. Then Fidel Castro permitted them and other Cubans to leave the country legally, calling the refugees human garbage and saying good riddance.

The 10,000 Cubans who sought refuge on Peruvian Embassy grounds were an acute embarrassment to Castro. The thousands of others who chose to follow them in leaving Cuba stung him further. In an effort to reduce the damage to his image inflicted by these events, Castro injected into the stream of everyday Cubans leaving his socialist country, a number of convicted criminals, mental patients, perverts, and DGI agents.

But it is important to recognize that the vast majority of individuals that eventually flowed from Cuba—more than 110,000 people—were ordinary Cuban citizens. The people who created problems in the camps were, by and large, the professional troublemakers who Castro injected into the stream. He certainly has made a lot of trouble for us, there is no doubt about that. But, that cannot obscure the greater fact, that the exodus of those thousands of working class Cubans from the worker's paradise demonstrated to the world the truth about conditions in Cuba. They revealed the hollowness of Castro's claims about conditions in his country—and, of course, those same claims made by his supporters in Moscow and around the world.

This film, "In Their Own Words," is the story of those Cubans who gave up everything, suffered deprivations that most of us can only imagine, and en-

dured the dangers of the voyage by sea. Some of those who survived testified before the cameras in their own words about the realities of Cuba today. The American people should see and hear that testimony.

Finally, it would be useful for Americans to see an example of the kind of work the International Communication Agency does. The Agency has done a fine job. "In Their Own Words" is an eloquent statement originally intended for the overseas audience. The folks at home should witness that production also.

Mr. Speaker, I now yield such time as he may consume to the chief sponsor of the bill, the distinguished gentleman from New York (Mr. GILMAN).

Mr. GILMAN. I thank the gentleman from Illinois, and I thank him, too, for his kind words.

Mr. Speaker, as the author of H.R. 2884, I want to take this opportunity to thank the chairman of the Committee on Foreign Affairs, Mr. ZABLOCKI, and the ranking minority member, Mr. BROOMFIELD, as well as the chairman of the Subcommittee on International Operations, Mr. FASCELL, and the ranking Republican member, Mr. DERWINSKI, for their leadership and cooperation in the favorable and timely reporting of this legislation.

It was just 1 short year ago that more than 100,000 brave Cubans risked their lives to escape Castro's Cuba for a chance to find freedom and a better life in this country. Contrary to the impressions of some media coverage, the vast majority of these people were not criminals, misfits, or mental cases. They have found new homes and jobs and are already making positive contributions to our society and Nation as their forerunners have done for more than 20 years.

As we reflect on the first anniversary of the Cuban boat lift from Mariel, we should look beyond our domestic concerns and for the real lessons of this historic event from the refugees themselves. The International Communication Agency's brilliantly produced and directed film "In Their Own Words" gives the Cuban refugees an opportunity to tell their story. The story of what motivates a human being to so willingly abandon the socialism of Cuba, their family and friends and the only life most of them have ever known for freedom and for a chance to succeed or fail on their own.

H.R. 2884 would allow this significant film to be made available for purchase and public viewing within the United States. While I understand the reasoning behind the basic prohibition against wholesale domestic release of all ICA projects, I do believe that in certain cases the messages they send abroad about this Nation, our values and our way of life are of equal importance to our citizens. At the same time it builds support and a better understanding for the important work of the U.S. International Communication Agency.

Mr. Speaker, I would like to point out that this important film was brought to my attention by a constituent of mine, Mr. Giuseppe A. Yannuzzi; of Congers, N.Y. As he stated in his letter to me about this film—

It is very important that the people of the United States be aware of the main reasons of the recent Cuba exodus.

Accordingly, I urge your full support for passage of H.R. 2884.

Mr. DERWINSKI. Mr. Speaker, I now yield 3 minutes to the gentleman from Wisconsin (Mr. ROTH), the new but dynamic, vigorous, and take-charge type of member of our committee.

Mr. ROTH. I thank the distinguished gentleman from Illinois, who has such unique insight, for yielding 3 minutes to me.

Mr. Speaker, I want to extend and associate myself with the remarks of the minority Member and all of the different speakers who have spoken on this issue this morning. I support H.R. 2884 and thank my colleague, the gentleman from New York (Mr. GILMAN) for his fine work on this measure. H.R. 2884 authorized the domestic presentation of the International Communication Agency film entitled "In Their Own Words." The film, as we have heard, is made up of the interviews of many of the hundreds of thousands of Cuban refugees who came to the United States last year. This film is important because it allows the refugees to explain their reasons for leaving Cuba and their dreams and hopes for a new and better life in America. Beyond this I think a principle is involved that transcends the film.

We spend billions of dollars on defense, and appropriately so, and many times I believe we are neglecting the most powerful weapon in our arsenal. The powerful weapon that is the idea of what people think is still the most potent weapon of all. All others, in my opinion, fade into insignificance when compared with it.

The gentleman from New York (Mr. GILMAN) has recognized this principle and addressed the legislation, and we thank him very much for filling this void. Many times we lose I think by default and by forfeiture in the most crucial and meaningful battle of all, the battle for men's minds. Those who would make themselves our adversaries in their propaganda portray America as exploiters, racists, warmongers, and sadists. We counter their propaganda with the truth.

That is why this legislation is so important. Let the people know the truth and all will be well.

We in this Congress must concentrate on this issue more and more. We have an obligation to let the people throughout the world get our side of the story, too.

Mr. Speaker, I hope that all of our colleagues will join in supporting this legislation of the gentleman from New York (Mr. GILMAN).

Mr. DERWINSKI. Mr. Speaker, I have no further requests for time.

Mr. FASCELL. Mr. Speaker, I want to particularly associate myself with the very cogent remarks of the gentleman from Wisconsin (Mr. ROTH) in his observation with respect to the most important, if not the most important, arsenal which our form of government has in the competition which we face in the world. This film very aptly demonstrates what we really have and how it should be made available in order to demonstrate to people around the world what the United States really means. It is very important, it seems to me, also for our people in this country to have an opportunity to fully appreciate the same message.

I also commend the gentleman from New York (Mr. GILMAN) for taking the leadership in sponsoring this bill. This is not just an ordinary film, Mr. Speaker, which we seek to have released; it is a very important story we are telling the rest of the world and Americans should know what that message is.

Mr. Speaker, I have no further requests for time.

● Mr. BROOMFIELD. Mr. Speaker, I, too, support this bill, H.R. 2884, to release the ICA film, "In Their Own Words," for viewing domestically. This message of the ordinary Cuban citizens who fled from Cuba in numbers exceeding 100,000—until Castro stanched the hemorrhage—is a powerful one. The vivid story of the people who lived through the Castro nightmare that is Cuba today and risked everything to escape should be shared with the American people.

Well over a 100,000 Cubans became boat people, turning their backs on their homeland. What is it that makes so many people do such a dangerous and heartrending thing? The Communists have the answer. The Cuban refugees testify to that fact and ICA has put it on film. Let Americans see this film.●

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Florida (Mr. FASCELL) that the House suspend the rules and pass the bill H.R. 2884, as amended.

The question was taken; and (two-thirds having voted in favor thereof), the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. FASCELL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER pro tempore. Is ther objection to the request of the gentleman from Florida?

There was no objection.

TREATMENT BY THE SOVIET UNION OF DR. VIKTOR BRAILOVSKY AND HIS FAMILY

Mr. ZABLOCKI, Mr. Speaker, I move to suspend the rules and agree to the concurrent resolution (H. Con. Res. 50) expressing the sense of the Congress that the Soviet Union should provide proper medical care for Viktor Brailovsky and permit him and his family to emigate to Israel, urging the President to protest the continued suppression of human rights in the Soviet Union, and for other purposes, as amended.

The Clerk read as follows:

H. CON. RES. 50

Whereas the Universal Declaration of Human Rights and the International Covenant on Civil and Political Rights guarantee to all the right to freedom of thought, conscience, and religion, the right to hold opinions without interference, the right to freedom of expression, and the right to emigrate;

Whereas the Final Act of the Conference on Security and Cooperation in Europe commits the signatory countries to respect individual rights and fundamental freedoms, in particular to "deal in a positive and humanitarian spirit" with the applications of persons wishing to emigrate to rejoin relatives;

Whereas the Soviet Union signed the Final Act of the Conference on Security and Cooperation in Europe, is a party to the Universal Declaration of Human Rights, and has ratified the International Convenant on Civil and Political Rights;

Whereas Viktor Brailovsky was dismissed from his position as a doctor of computer science at the Institute of Electronic Control Machines in 1972 as a result of requesting permission to emigrate;

Whereas Viktor Brailovsky has been continually harassed by Soviet authorities for the past eight years;

Whereas Soviet officials have searched Viktor Brailovsky's home and confiscated invaluable scientific papers and Jewish cultural materials;

Whereas Viktor Brailovsky organized the Moscow Seminar for Jewish Scientists and published the unofficial Jewish journal, Jews in the U.S.S.R., for which he was arrested and kept under investigation in April of 1980;

Whereas Viktor Brailovsky bravely led a group of over two hundred and thirty other Soviet Jewish refusniks in an appeal to President Leonid Brezhnev for free emigration of Soviet Jews on the eve of the Madrid Conference in November of 1980;

Whereas Viktor Brailovsky was arrested and imprisoned in connection with this activity and his other efforts to encourage free emigration;

Whereas Viktor Brailovsky was in ill health when arrested and has not been receiving proper medical treatment for a serious liver ailment while in prison;

Whereas Soviet authorities have commenced questioning and investigation of Viktor Brailovsky and have extended the period of investigation for two months due to his serious condition; and

Whereas Viktor Brailovsky is in need of immediate and adequate medical attention: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That it is the sense of the Congress that, in accordance with the Final Act of the Conference on Security and Cooperation in Europe, the Universal Declaration of Human Rights, and the International Covenant on Civil and Political Rights, the Union of Soviet Socialist Republics should provide proper medical care for Viktor Brailovsky and permit him and his family to emigrate to Israel to join his brother and his family.

SEC. 2. The Congress urges the President, acting directly or through the Secretary of State or other appropriate executive branch officials—

(1) to continue to express at every suitable opportunity and in the strongest terms the opposition of the United States to the imprisonment and treatment of Viktor Brailovsky; and

(2) to inform the Soviet Union that the United States, in evaluating its relations with other countries, will take into account the extent to which these countries honor their commitments under international law, particularly with respect to the protection of human rights.

SEC. 3. The Clerk of the House of Representatives shall transmit copies of this resolution to the Soviet Ambassador to the United States and to the Chairman of the Presidium of the Supreme Soviet Socialist Republics.

The SPEAKER pro tempore. Is a second demanded?

Mr. LEACH of Iowa. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Wisconsin (Mr. ZABLOCKI) will be recognized for 20 minutes, and the gentleman from Iowa (Mr. LEACH) will be recognized for 20 minutes.

The Chair now recognizes the gentleman from Wisconsin (Mr. ZABLOCKI).

Mr. ZABLOCKI. I yield myself so much time as I may require.

Mr. Speaker, I rise in support of House Concurrent Resolution 50, as amended, expressing the sense of the Congress that the Soviet Union should provide medical care for Viktor Brailovsky and permit him and his family to emigrate to Israel, it urges the President to protest the continued suppression of human rights in the Soviet Union, and for other purposes.

The resolution was unanimously approved by the Committee on Foreign Affairs last week after previously being considered by the Subcommittee on Human Rights and International Organizations. I would like to commend the chairman of that subcommittee, the Honorable DON BONKER, for his interest and continuing efforts on behalf of human rights matters, and also our colleague from New York, the Honorable HAMILTON FISH, who is the chief sponsor of the measure.

House Concurrent Resolution 50 points up the gross insensitivity of the Soviet Union and its lack of concern for the fundamental rights of Viktor Brailovsky, a Soviet citizen who is incarcerated there, Brailovsky, who is in very serious health, was thrown in prison without being given essential medical attention.

Viktor Brailovsky's activities in support of free emigration policies for Soviet citizens, jeopardized what little freedom he did enjoy. He was arrested, and remains jailed, although he has not been charged with any crime. The real crime is that the Soviets have imprisoned him and denied him essential medical help.

House Concurrent Resolution 50 is a humanitarian plea to the Soviet Union urging that Brailovsky be granted access to medical expertise to alleviate his threatened health conditions. In addition, the resolution calls on the Soviets to permit Brailovsky and his family to emigrate to Israel. It takes note of Soviet violations of human rights and Soviet renegings on its international legal obligations. Further, the resolution emphasizes that such renouncement of agreements as the Helsinki accords and other international human rights documents, will be taken into account when the United States assesses its relations with other nations. The President and other officials are encouraged to raise U.S. concerns and voice displeasure over the handling of the Brailovsky case, at every possible opportunity.

Mr. Speaker, I urge the adoption of House Concurrent Resolution 50.

□ 1345

Mr. LEACH of Iowa. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I would like to concur wholeheartedly with the gentleman from Wisconsin (Mr. ZABLOCKI) in extending my appreciation to the gentleman from New York (Mr. FISH) for initiating this legislation.

Mr. Speaker, August 1 of this year will mark the sixth anniversary of the signing in Helsinki, Finland, of the Final Act of the conference on Security and cooperation in Europe (CSCE), more commonly referred to as the Helsinki accords. In considering this resolution, we should recall the observation made during the Helsinki signing ceremony by then President Ford that the Conference adopting the final act would be judged, "Not by the promises we make, but by the promises we keep." As we all know, many of these commitments have not

been honored, especially by the U.S.S.R. and its Eastern bloc allies.

Some of the most important provisions of the Helsinki agreement pertain to human rights and, inter alia, the freer flow of people across national boundaries. specifically, the final act stipulates that governments must handle exit visa applications as expeditiously as possible and, not modify the rights and obligations of the applicant or his family. Furthermore, in connection with the fundamental right to emigrate, special reference is made to other human rights documents, including the International Covenant on Civil and Political Rights.

With that as backdrop, I invite my colleagues' attention to the specifics of the human rights case addressed in this resolution.

Mr. Viktor Brailovsky, a doctor of computer science, lost his position as a computer scientist at the U.S.S.R.'s Institute of Electronic Control Machines in 1972. Why? Simply because he requested permission to emigrate. Since that time, he has been harassed frequently by Soviet authorities.

Because of his efforts to encourage free emigration, Brailovsky is now in prison. Worthy of note in this regard was Brailovsky's leadership of a group of Soviet Jewish refusniks who, on the eve of the Helsinki Review Conference in Madrid in November 1980, appealed to President Brezhnev for free emigration of Soviet Jews.

In ill health when arrested, Brailovsky has not been receiving, during his imprisonment, adequate medical treatment for a serious liver ailment. This resolution expresses the sense of the Congress that the Soviet Union should provide him with appropriate medical care.

House Concurrent Resolution 50 also calls upon the Soviet Union to allow Mr. Brailovsky and his family to emigrate to Israel to join his brother and his family. Additionally, it urges the President to continue expressing at every appropriate opportunity the U.S. opposition to the incarceration and treatment of Mr. Brailovsky and inform the U.S.S.R. that the United States, in assessing its relationships with other countries, will take into consideration how they honor their commitments under international law, especially with respect to human rights.

In short, Mr. Speaker, this resolution asks the Soviet Union to honor human rights commitments embodied in the Helsinki accords, as well as in two other human rights documents it is a party to—the Universal Declaration of Human Rights, and the International Covenant on Civil and Political Rights.

I urge its immediate adoption.

Mr. Speaker, at this time I yield such time as he may consume to the gentleman from New York (Mr. FISH).

Mr. FISH. Mr. Speaker, I am grateful that the members of the Foreign Affairs Committee unanimously supported House Concurrent Resolution 50 and have taken prompt action on this vital resolution. I would particularly like to express my appreciation for the efforts of the distinguished subcommittee chairman, Mr. BONKER, and Chairman ZABLOCKI, in bringing the plight of Viktor Brailovsky before the Congress.

The imprisonment and treatment of Viktor Brailovsky is more than a case of official Soviet repression and harassment of Soviet Jews. Viktor Brailovsky has been a leader of the Soviet refusenik movement for 8 years. Since his initial efforts to emigrate with his wife and family in 1972, Viktor has made invaluable contributions to Soviet Jewish culture and science. By publishing the unofficial Jewish cultural journal, "Jews in the U.S.S.R.," Viktor kept Soviet Jews aware of Western Jewish writing and of their own rich cultural history. Since the loss of his job as a doctor of computer science, teaching, and researching in Moscow, Viktor held seminars in his home every Sunday to inform other scientists who shared his fate of the latest developments in various fields. On many occasions, Western scientists spoke at the Brailovsky home.

Prior to his arrest last fall on false charges of "slandering the Soviet State," Viktor had been in ill health. His stay in prison has seriously impaired his liver ailment. Treatment has been inadequate, and the investigation of his case has been moving slowly. An extension of 2 months has already been granted due to his inability to answer questions and the lack of evidence against him. Recent reports indicate that questioning of other refuseniks about Viktor's activities has not led to any basis for filing formal charges.

Soviet authorities have not stopped with the arrest of Viktor Brailovsky. Viktor's wife, Irina, was warned that she will be expelled from Moscow if she continues to host the Sunday seminars. Many of the Jewish refusenik scientists who participate in the seminars were visited by KGB agents just last week. The agents strongly suggested that they no longer participate in the seminars or they might share the fate of Brailovsky.

Equally distressing to the cause of Soviet Jewry and the hope that emigration policies will be modified to permit freer and more open emigration is the recent arrest of two long-term refuseniks from Kiev, Vladimir Kislik and Kim Fridman. In July 1980, Kislik was arrested for "petty hooliganism" and spent 15 days in jail. It is feared that he now may face more serious charges of malicious hooliganism, which could lead to a 5-year jail sentence. Fridman, who is in poor health, has been arrested and charged with parasitism. Both men have been trying for many years to join their wives and families in Israel.

Mr. Speaker, these recent activities and the incarceration of Viktor Brailovsky are ominous signs of an official crackdown on the entire Soviet Jewish emigration movement. After a year of great hope in 1979, when over 50,000 Soviet Jews were allowed to emigrate, emigration was cut by more than half in 1980. I am still concerned that long-term refuseniks are being ignored, harassment of key Jewish teachers continues, and official Soviet policy toward Soviet Jews gives little hope for many who suffer from repression and the denial of their right to emigrate.

Mr. Speaker, I was to give a statement yesterday in conjunction with the annual Call to Conscience Vigil, which enables Members of Congress to demonstrate their support for individuals and families who wish only the ability to emigrate to join the free world. The prisoner of conscience whom I chose for my statement exemplifies the courage and commitment of Soviet Jews. His current plight is representative of the extraordinary difficulties faced by these people. He is the man we speak of today, Viktor Brailovsky.

I can think of no more fitting statement on his behalf than the one which the entire Congress will make today by approving House Concurrent Resolution 50. I urge my colleagues to support this resolution, which will make it clear to Soviet officials that the U.S. Congress will act on such violations of human rights, and that Congress and the administration will consider these incidents in conducting its relations with the Soviet Union

Mr. LEACH of Iowa. Mr. Speaker, I yield to the gentleman from New York (Mr. GILMAN), who has taken a leading role on this resolution, such time as he may consume.

Mr. GILMAN. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I rise in support of House Concurrent Resolution 50, sponsored by the gentleman from New York (Mr. FISH), which calls upon the Soviet Union to allow Dr. Viktor Brailovsky and his family to emigrate from the Soviet Union, and to provide Dr. Brailovsky with adequate medical care while he remains in the hands of the Soviet authorities.

Mr. Speaker, it has been more than 9 years since Dr. Brailovsky and his family first asked for permission to leave the Soviet Union for the State of Israel. As Jews, they felt that they could not live under the restrictions the Soviet Government places on living a religious life in that country. But they were refused permission, as

thousands of Jews have been refused, on spurious security grounds.

Dr. Brailovsky, a top Soviet mathematician, responded to this refusal by becoming active in the movement of Jews within the Soviet Union who have been refused permission to leave—the refuseniks. These people, who usually lose their jobs when they make their desire to leave the Soviet Union known, meet together to maintain their intellectual faculties in seminars, and Dr. Brailovsky became a leader of that seminar. He participated in hunger strikes, published the journal "Jews in the U.S.S.R.," was involved in a sit in, and, generally, worked to focus attention on the problem he shared with many thousands of his coreligionists.

Just before the opening of the Madrid review conference on the Helsinki agreement, Dr. Brailovsky was arrested by the Soviet authorities. He has not been formally charged, but when he was arrested he was in poor health and he continues to be in poor health. This resolution is being considered today because of grave fears for Dr. Brailovsky's life if he remains in prison without adequate medical care.

Mr. Speaker, I have written to Soviet President Brezhnev and to Ambassador Dobrynin about the case of Dr. Brailovsky and his family. I renew my call that Dr. Brailovsky be set free, and I hope my colleagues will support this resolution.

Mr. LEACH of Iowa. Mr. Speaker, the right to emigrate is an important international right, and it is particularly unfortunate when any country violates that privilege, particularly when there are implications, as in this case, that anti-Semitism is involved.

I would urge my colleagues to adopt this resolution.

There being no further requests for time, I yield back the balance of my time.

Mr. ZABLOCKI. Mr. Speaker, I yield such time as he may require to the gentleman from Washington (Mr. BONKER), chairman of the Subcommittee on Human Rights and International Organizations.

Mr. BONKER. Mr. Speaker, House Concurrent Resolution 50, as amended, introduced by my colleague, Mr. FISH, expresses the sense of the Congress that the Soviet Union should provide proper medical care for Viktor Brailovsky and permit him and his family to emigrate to Israel, and urges the President to protest the continued suppression of human rights in the Soviet Union.

Viktor Brailovsky, a prominent computer scientist, has been harassed by the Soviet authorities for years because of his active work on behalf of independent scholarship and free thought in the Soviet Union.

Among his other accomplishments, Mr. Brailovsky organized the Moscow Seminar for Jewish Scientists and published the underground Jewish journal, "Jews in the U.S.S.R." He also led a group of over 230 other Soviet Jewish refuseniks in an appeal to President Brezhnev for emigration of Soviet Jews.

Mr. Brailovsky is a member of the New York Academy of Sciences, and a member of the American and British mathematical societies.

Mr. Brailovsky was in ill health when he was arrested, and has received little medical treatment for a serious liver ailment while in prison. Humanitarian considerations alone demand that he be released from prison.

Mr. Speaker, the case of Viktor Brailovsky is the same old ugly story. The Soviet authorities and the KGB make life unbearable for their brilliant thinkers and scholars, then prevent them from leaving the Soviet Union to join family and friends in Israel or the West. Brailovsky's arrest is a particular loss to the Jewish intellectual community because of his outstanding service in their behalf.

I would like to quote Viktor's wife, Irini Brailovsky, as she reflected on her husband's arrest in a recent interview. Irini Brailovsky is also a computer scientist. She has also been harassed and bullied by the Soviet police for continuing her husband's work.

Viktor Brailovsky was arrested because he wanted to remain true to himself; he did not want to deterioriate spiritually or to submit to the order that he abandon his scientific calling. He was arrested because he hung on and helped others to hang on—dozens of our friends. He was arrested because he remained a pure and honorable man. My husband is in prison for a reason simple enough to be understood by a child. The authorities failed in their attempts to frighten him, to crush him morally, and to entangle him in the sticky cobweb of the KGB.

By expressing our concern about the particular case of Viktor Brailovsky, and by reasserting our support for the Helsinki accords, the Universal Declaration of Human Rights, and the International Covenant on Civil and Political Rights, the U.S. Congress is giving voice to thousands of Soviet dissidents who cannot speak.

Mr. Speaker, I wish to commend Mr. FISH for introducing House Concurrent Resolution 50. The Subcommittee on Human Rights and International Organizations favorably reported the resolution by unanimous voice vote on March 26, 1981. The full Committee on Foreign Affairs favorably reported the resolution by unanimous voice vote on April 2.

I commend House Concurrent Resolution 50 to my distinguished colleagues, and urge unanimous passage of the bill.

Mr. ZABLOCKI. Mr. Speaker, I yield as much time as he may require to the gentleman from Florida (Mr. FASCELL), chairman of the Subcommittee on International Operations as well as Chairman of the European Commission on Cooperation and Security, also known as the Helsinki Committee.

Mr. FASCELL. Mr. Speaker, I rise in support of this resolution and join the sponsorship of the distinguished gentleman from New York (Mr. FISH), who is the prime sponsor of this resolution. This resolution is important because of its humanitarian significance to the individual who is named in the resolution and who deserves the encouragement and support of all of us, as well as the decent consideration of the government under whose jurisdiction he happens to be; it also signifies and symbolizes the horror which is faced by all other people in the Soviet Union in the same difficulty, the thousands of refuseniks, thousands of Jews, and others who suffer religious persecution and harassment, people who have been jailed simply because they want their government to respect the international agreement which they signed at Helsinki for cooperation and security in Europe. That agreement holds out to the world a set of decent principles to guide man, fundamental of which is human dignity and independence and the right of the individual, all of which has been ignored in significant degrees by the Soviet Union, not only in the Brailovsky case, but in thousands of other cases and it still goes on.

The immigration of Jews from the Soviet Union is reduced, it goes up a little bit, and then it is reduced again. They turn it on and off as a political spigot whenever it suits them without regard to the fantastic impact it has on the individuals and their families, both inside the Soviet Union and outside the Soviet Union. Those who are on the list for years and years and years suffer harassment of all kinds before they leave. They lose their jobs. their children are harassed. They are abused in school. They are charged with all kinds of crimes. They are considered, if they express their own opinions, as guaranteed under all concepts of international law and particularly the Helsinki accords—if they express their opinion in any of these matters of rejoining their families or speaking out for their rights—they are considered as either criminals or psychopaths. That is the treatment accorded by the great Soviet Union toward the individual.

This resolution again reminds us and reminds the world that the Soviet Union has invaded Afghanistan and threatens Poland because they fear every single concept which deals with human dignity; because any expression of the individual regarding himself, his family, or his own thoughts and dignity they see as a threat to

their institution. It is the one great vulnerability they have.

Mrs. FENWICK. Mr. Speaker, will my colleague yield?

Mr. FASCELL. I will be delighted to yield to the gentlewoman from New Jersey (Mrs. FENWICK).

Mrs. FENWICK. Mr. Speaker, I thank my colleague for yielding.

I would like to add my voice to those we have heard here. Dr. Brailovsky is a distinguished man, but I think we have all learned some lessons in this century, and that is that until we can care with equal passion for those who are not so famous, not so well known, the famous will never be safe. Whether it is a matter of terrorism or assassination, until we stand together as human beings consoling and helping, and where we can rescuing the helpless, we will never do well by the leaders and the distinguished people of this world.

I think of all of the people who have come before our Commission, of which my colleague from Florida (Mr. FASCELL) is chairman. I remember a young Jewish girl who had been in prison because she had tried to help some Pentacostalists. The parents had been in prison because they tried to teach their children their religion. I remember all the many figures, including Amalrik, who was so tragically killed before the Helsinki Conference in Madrid. These figures pass before us, and now here is another one, ill, and there is nothing we can do except to speak here and to urge every person in this country who belongs to any kind of an organization to get their organization also to write on his behalf. Whether they are groups of engineers, architects, scientists, or computer scientists, any organization has great influence, I have found, in the Soviet Union. That is what we ought to mobilize here, something that we know is effective.

But we must also do this for the not so famous if we want to see justice in this world. This new empire—the Soviet Union—does not send people to be slaves in the ships as ancient empires did. It sends them to the psychiatric hospital or to prison. And this is what has happened to Dr. Brailovsky.

□ 1400

Mr. FASCELL. I thank the gentlewoman from New Jersey for her continuing leadership and dedication in the cause of human rights and as a valued member of the Helsinki Commission which she created.

I yield to the distinguished gentleman from New York (Mr. BINGHAM).

Mr. BINGHAM. I thank the gentleman for yielding.

Mr. Speaker, I would like to associate myself with the remarks he has made about the broad significance of this resolution, the continuing effort that must be made not only for Dr. Brailovsky but for others in the same situation, for others in the future who will find themselves in the same situation unless we continue to speak out.

Mr. FASCELL. I thank the gentleman for his contribution.

Mr. Speaker, I want to commend the distinguished gentleman from Washington (Mr. BONKER), who is the chairman of the Subcommittee on Human Rights and International Organizations. He has, since I have known him and since he has been on the Committee on Foreign Affairs, been a vital leader, totally dedicated to the cause of human rights, and continues his interest even now with the thorough and prompt consideration of this resolution. We are all grateful to him for his leadership and participation in this very important issue.

● Mr. HUGHES. Mr. Speaker, I am particularly proud to be a cosponsor of House Concurrent Resolution 50 which passed the House today. Never has it been more important for those of us fortunate enough to live in a democracy to voice our support for those who must suffer the consequences of tyranny.

While our actions today cannot force the Soviet Union to permit the emigration of Dr. Brailovsky and his family, while it cannot force them to give him adequate medical care or humane treatment, it does forcefully inform Soviet officials that we do care and we are watching. It says in the clearest possible way that we in the Congress will not permit the abridgement of human rights anywhere in the world to go unnoticed.

Dr. Brailovsky first began speaking out against Soviet harassment of Jews wishing to emigrate in 1972. Like many before it, his application to leave with his family was denied. As usual in such cases, his knowledge of scientific secrets was cited as the reason for denial of his exit visa.

Brailovsky then began working on "Jews in the U.S.S.R.," an unofficial journal devoted to Jewish history, culture, and religion in the Soviet Union, Israel, and around the world. He became active in the refusenik program and was a leader of the Moscow Sunday seminar created to facilitate discussion of scientific and other matters among Soviet Jews who had been prevented from emigrating.

When the Soviet Union finally granted him permission to leave in 1976 they engaged in even greater cruelty. They denied his wife permission to leave with him. Dr. Brailovsky refused to leave without her and the rest of his family. This now all too familiar attempt to separate the Brailovskys violates the Helsinki accords and is a gross abuse of fundamental international human rights.

On November 13 of last year, Viktor Brailovsky was arrested. Concern for his health and for his safety grows daily.

His wife has not been allowed to visit him and her inquiries along with others of us who are concerned, have been ignored.

We all know of the injustices suffered by Soviet Jewry, of their struggle to practice their religion and to emigrate to countries where they do not have to deny their almost 6,000-year-old heritage. It is therefore, especially fitting that we have passed this legislation on the last week we are in session before Passover, the Jewish "Festival of Freedom." This holiday commemorates Israel's deliverance from enslavement in Egypt over 3,200 years ago, as recounted in Exodus.

Viktor Brailovsky and his family have been singled out by Soviet authorities for daring to stand up to injustice. They are a symbol of all that living in a land of oppression, of totalitarian rule, means. Let us hope that this is the last Passover that Viktor Brailovsky will be spending in a Soviet jail and that next Passover, for Viktor Brailovsky and all Soviet Jewry it will truly be a "Festival of Freedom."●

● Mr. WAXMAN. Mr. Speaker, the start of the Madrid Conference last November foreshadowed the hope of a new thread of cooperation between the Soviet Union and the United States. The purpose of the meeting was to review the Helsinki Final Act and to reaffirm the commitment of both countries to the goals of international stability and world peace. But on the very eve of the Conference, this mood of optimism was shattered by the Soviet refusal to recognize the indivisibility of human rights—perhaps the most important tenet in the Helsinki agreement. Just 3 days after the Madrid Conference convened, the world witnessed the arrest of Dr. Viktor Brailovsky by Soviet officials—obstensibly for his crime of "slandering the Soviet State," in actuality for his desire to emigrate to Israel and his refusal to be silenced.

A world renown cybernetist, Dr. Brailovsky lost his job and faced continual harassment and frequent arrests from the moment in 1972 that he first made known his intention to emigrate. Although stripped of his professional status, Dr. Brailovsky proved that while the authorities could attempt to suppress his professional actions, they could never restrain his hopes or his determination. Refusing to allow Soviet repression interfere with his dedication to science, he continued to publish in prominent Soviet journals. Dr. Brailovsky also organized and ran the Moscow seminar for Jewish scientists—a group of scientist refuseniks who met weekly at his home to discuss the latest advancements in their respective fields.

In an effort to promote cultural awareness and self-identity among other Soviet Jews, Brailovsky edited an unofficial magazine, "Jews in the U.S.S.R." Although the journal was devoted strictly to cultural and historical aspects of Jewish life, it had long been a target of suppression for the Kremlin. Last April, Dr. Brailovsky and his wife Irina were arrested in connection with the publication. While they were eventually released, both remained under investigation. In spite of this, as a leader in the emigration movement, he initiated a courageous appeal on behalf of some 230 other refuseniks to President Breshnev requesting the free emigration of Soviet Jews. This action ultimately led to Dr. Brailovsky's final arrest on November 13.

Presently, Viktor Brailovsky is in a Moscow prison. His health is rapidly deteriorating and reports confirm that he is not receiving proper medical care. His wife has been denied permission to see him and her inquiries as to his physical condition remain unanswered. Despite his increasingly failing health, Brailovsky still faces the possibility of up to 3 years in a labor camp for his crimes, while Irina's efforts to continue the scientific seminars have been met with severe intimidation by the secret police.

Mr. Speaker, the timing of Viktor Brailovsky's arrest is compelling evidence that Soviet officials want to make an example of his plight—to make the fate of Dr. Brailovsky serve as a warning to other dissidents who refuse to silence their hopes and grievances. Yet these acts of repression will not work. If anything, there are more Soviet Jews who want to leave than ever before.

Our responsibility is clear. Together, we must reaffirm our dedication to the goal of human rights. House Concurrent Resolution 50 is a major step. It declares our firm demand, as the Congress of the United States, that Dr. Brailovsky and the more than 200,000 other Soviet Jews who remain prisoners of conscience be freed. I am especially gratified by the support this resolution—the first of its kind in this Congress—has commanded, and want to thank the gentleman from New York, Representative HAMILTON FISH, JR. who led this effort, and the gentleman from Washington, Representative DON BONKER for bringing this resolution to the floor. It is a powerful statement of our principles and our concern—and I am honored to have been a cosponsor of this initiative. I deeply hope our action today will lead to freedom for the Brailovskys.●

● Mr. FINDLEY. Mr. Speaker, I rise in support, as a cosponsor, of House Concurrent Resolution 50, regarding the Soviet treatment of Dr. Viktor Brailovsky and his family.

Viktor and Irina Brailovsky, with their children, have been trying to emigrate from the U.S.S.R. since 1972. The result of their endeavor has been abuse and mistreatment by the Soviet authorities. Rather than being able to join his brother who lives in Israel, Viktor Brailovsky has been subjected to repeated arrests, interrogations, and imprisonment while his home has been searched and his personal papers—including books on Jewish history and culture—confiscated.

Soon after the Madrid Review Conference on Security and Cooperation in Europe opened in November 1980, the Soviet authorities again arrested Viktor Brailovsky. This time it was for his appeal to President Leonid Brezhnev to permit his own family and more than 230 other Russian refuseniks to emigrate. What a tragic irony that, at the same time East and West were meeting to review the Basket III human rights observance to which all including the U.S.S.R. had committed themselves at Helsinki, the Soviets were, once more, blatantly violating every concept of human freedom and dignity.

The Madrid Conference is still in progress. It is important that we signal, by passing this resolution, not only the Soviet Union but every signatory of the Helsinki agreement that we care about human rights and that we care about Viktor Brailovsky and others like him. We are today reminding the Soviet Union that we are aware of Dr. Brailovsky's plight, that we will not forget him, and that we want his freedom and the freedom of other refuseniks to emigrate from the Soviet Union.●

● Mr. CORRADA. Mr. Speaker, I rise in support of House Concurrent Resolution 50, a resolution urging the Soviet Union to provide proper medical care for Dr. Victor Brailovsky and to permit him and his family to emigrate to Israel.

Dr. Brailovsky is to be commended and praised for his efforts on behalf of 230 Soviet Jews when he urged President Brezhnev to allow them to emigrate. For his efforts he was jailed, although no formal charges have been brought against him. He is in poor health and the circumstances under which he is imprisoned can only help to aggravate his condition.

The Soviet Union is punishing Dr. Brailovsky for his courage and zeal in helping his fellow men in achieving the life-long dream of every Jew in the Soviet Union; the right to emigrate to Israel where they may practice their faith without fear of persecution and imprisonment. That dream is now being denied to him in a case in which the Soviet Union stands to gain nothing by its actions but the reproach of the rest of the world. The Soviet Union can show its commitment to the Helsinski agreements by insuring that proper medical care is given to Dr. Brailovsky and by allowing him and his family to emigrate to Israel.

I urge all my colleagues to join me in support of House Concurrent Resolution 50.●

● Mr. SMITH of New Jersey. Mr. Speaker, the continued detention of Dr. Viktor Brailovsky, his wife, and children is just another sign of the heartlessness of the Soviet system.

Back in February we in this House discussed the matter of the Brailovskys. I am very glad the House is taking this opportunity to pass a resolution on this vital matter.

Mr. Speaker, the Brailovskys asked to leave for Israel some 9 years ago. Their answer has been unnecessary prosecution and a complete violation of their rights under the declaration of human rights and the Helsinki accords. Ironically, the Soviet constitution and laws also supposedly guarantee their rights; yet, tragically, they have been ignored.

Mr. Speaker, as a testament to human rights we should pass this resolution, asking the Soviet authorities to release Viktor and Irina Brailovsky, together with their children, and allow them to emigrate. This is only simple justice.

The other day we learned the fate of another dissident, the Estonian patriot Juri Kukk. We raised the matter of his imprisonment also. We discussed that question on the floor of this House.

Now Juri Kukk is dead in a slave labor camp. His crime was his desire to see his country free.

None of us wants to see Viktor Brailovsky suffer the same fate. Yet the Soviet authorities are holding him prisoner, refusing to address his medical needs.

I believe this is the sort of thing we in conscience have to protest—and, God willing, we must prevent.

Mr. Speaker, I believe the passage of this resolution will help bring home to the Soviet authorities the great and serious nature of this matter. I hope it will spur our State Department to take all possible steps to secure the release of Dr. Viktor Brailovsky, his wife Irina, and their children, and to expedite their emigration to Israel.●

● Mr. PORTER. Mr. Speaker, I join my distinguished colleague from New York to rise in support of House Concurrent Resolution 50, urging the Soviet Union to provide Dr. Viktor Brailovsky with proper medical care—and to allow him and his family to emigrate to Israel.

I wish to reiterate my previous remarks of February 5, 1981, and urge the United States, either through the President directly or through the Secretary of State or other appropriate executive branch officials, to express to the Soviets our opposition to Dr.

Brailovsky's treatment and imprisonment; and to remind the Kremlin that the United States will consider countries' records in honoring human rights commitments when evaluating future relations.

Mr. Speaker, the Congress and the President have a responsibility to bring before the world the torture that Soviet Jews have experienced at the hands of their government and to bring to bear every effort to release them from this tyranny of Soviet persecution.●

● Mr. GLICKMAN. Mr. Speaker, as a cosponsor of House Concurrent Resolution 50 and as one who has worked for nearly 4 years now to bring attention to the plight of Viktor Brailovsky and his family, I rise to urge all of my colleagues to join in approving this resolution. We must send a signal to the Soviet Union that international agreements are to be kept, not broken. We must remind the Soviets that human rights as protected under the Helsinki agreements remain of great concern to the American people and to our Government.

For nearly a decade, Dr. Brailovsky and his wife, Irina, have sought permission to emigrate from the Soviet Union to Israel to join his brother, Mikhail. But—in spite of specific references in the Helsinki accords to reunification of families—those requests have been denied. In fact, in the instance when Dr. Brailovsky was granted permission, in 1976, pemission for his wife and children was denied. Clearly, he did not see that as a viable option given his experience with emigration officials. Leaving alone would have likely left him separated from his wife and children for years and, possibly, forever.

To bring attention to this blatant violation of the provisions of the Helsinki Pact, Brailovsky and others appealed to Soviet President Brezhnev for exit permits on the opening day of the Madrid Conference to review compliance with the Helsinki agreement. As a result, he has been jailed purportedly for having slandered the Soviet state. Since being imprisoned, he has not been given adequate medical treatment for a liver ailment and requests by his wife for an opportunity to visit him and for information with regard to his health have been denied.

As fellow signators of the Helsinki accords, we have an obligation to see that the protections embodied therein are not routinely and blatantly ignored. Unfortunately, the situation facing the Brailovsky family is not unique. Instead, imprisonment and harassment have become routine responses to refusal to accept rejections of requests for exit visas.

Dr. Brailovsky is to be commended for his willingness to stand up for his rights and those of others. Passage of this resolution will show that this House stands behind his courageous efforts to see the Helsinki agreements implemented.●

● Mr. DERWINSKI. Mr. Speaker, I am pleased to join with my colleagues in offering my support for House Concurrent Resolution 50, which expresses our concern for the proper treatment of Dr. Viktor Brailovsky and requests that the Soviet authorities allow him and his family to join their relatives in Israel. Brailovsky, a prominent refusenik scientist, was arrested for slandering the Soviet state. Since his arrest, Dr. Brailovsky has fallen ill, and Soviet authorities have not provided him with adequate medical care.

For many years, I have participated in various efforts to bring case histories of Jewish familes, who have not been permitted to emigrate to Israel to join their families, to public attention. We cannot forget these dissidents who are continuing to be victimized within the Soviet borders by repressive internal policies of that nation's leaders.

I have directed special attention to the plight of Vladimir Kislik, who along with thousands of other Soviet Jews, remains separated from his family. On March 19 of this year, Vladimir Kislik was again arrested on hooliganism charges of misbehavior with a woman. He remains imprisoned in a jail in Kiev, and his future remains unknown. I have requested that our chargé d'affaires in Moscow and our State Department monitor this situation and make a special effort to see that Vladimir Kislik be released.

The continued incarceration of Viktor Brailovsky and Vladimir Kislik and many others, are examples of the continuing repression by Soviet authorities of Jews whose sole crime is a desire to be reunited with their families and to enjoy their religious freedoms. Constant attention must continue to be directed to the inequities of the Soviet emigration system so that conditions will improve for those Soviet Jews, like Viktor Brailovsky and Vladimir Kislik, who have been separated from their families by political boundaries.

It is my hope that this resolution will show the Soviet Union that the United States is deeply concerned over the fate of Viktor Brailovsky and Vladimir Kislik and other Soviet citizens who are only exercising their basic human rights. I urge the adoption of House Concurrent Resolution 50.●

● Mr. OTTINGER. Mr. Speaker, I rise in support of House Concurrent Resolution 50, urging the Soviet Union to provide proper medical care for Dr. Viktor Brailovsky and permit him and his family to emigrate to Israel. The resolution also urges the President to protest the continued suppression of human rights in the Soviet Union.

Dr. Brailovsky was arrested last November because of his leadership in the emigration movement and because he would not allow the Soviet system to shackle his commitment to freedom of scientific expression. Dr. Brailovsky has a serious liver condition which has drastically deteriorated during his confinement. He requires immediate medical treatment which the Soviet authorities have denied. I strongly protest this abhorrent action by the Soviets.

Dr. Brailovsky has made invaluable contributions to international science. The Soviets are attempting to quash the indominable spirit that made those contributions possible. House Concurrent Resolution 50 demands that the Soviets fulfill their responsibilities as a signator of the Universal Declaration of Human Rights and the Conference on Security and Cooperation in Europe to deal in a positive and humanitarian spirit with applications of persons wishing to emigrate to rejoin relatives. I urge my colleagues to join me in support of this resolution.●

● Mr. BROOMFIELD. Mr. Speaker, the human rights record of the Soviet Union is one of recorded history's most deplorable and this resolution, in a very personal sense, illustrates why.

Viktor Brailovsky is a computer scientist who lost his job in 1972 when he first applied for emigration. Regularly harassed by Soviet authorities from that time on, he is now in ill health in a Soviet prison.

The official charge leveled against Brailovsky at the time of his arrest was defaming the Soviet State and public order. The real reason, however, is best summarized by his wife, Irina, who says that it must be because of my husband's refusal to sit still and keep quiet about our plight and the plight of tens of thousands of other Soviet Jews who want to emigrate and cannot. Strongly buttressing that contention is the fact that Brailovsky's latest detainment came hard on the heels of his leadership of a group of 237 other refusniks who, on the opening day—November 11, 1980—of the Helsinki Review Conference in Madrid, signed an appeal to President Brezhnev demanding exit permits.

The U.S.S.R.'s actions against Brailovsky constitute a blatant flouting of both the letter and spirit of three human rights documents the Soviets are obliged to honor. I am referring specifically to the Universal Declaration of Human Rights, the International Covenant on Civil and Political Rights, as well as the human rights provisions contained in Basket III of the Helsinki accords.

Mr. Speaker, House Concurrent Resolution 50 expresses the sense of Congress that the Soviet Union should provide Brailovsky with adequate

medical care for his serious liver ailment. It also calls upon the U.S.S.R. to permit Mr. Brailovsky and his family to emigrate to Israel to join his brother and his family. Is that too much to ask of a signatory to the Helsinki agreement? The best answer to that question is a unanimous vote of approval for this compassionate initiative offered by our colleague from New York (Mr. FISH).●

Mr. ZABLOCKI. Mr. Speaker, I have no further requests for time.

Mr. Speaker, I move the previous question on the concurrent resolution.

The SPEAKER pro tempore (Mr. BONIOR of Michigan). The question is on the motion offered by the gentleman from Wisconsin (Mr. ZABLOCKI) that the House suspend the rules and agree to House Concurrent Resolution 50.

The question was taken; and (two-thirds having voted in favor thereof), the rules were suspended, and the concurrent resolution was agreed to.

The title was amended so as to read: "Expressing the sense of the Congress that the Soviet Union should provide proper medical care for Viktor Brailovsky and permit him and his family to emigrate to Israel, urging the President to protest the continued suppression of human rights in the Soviet Union, and for other purposes."

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. ZABLOCKI. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the concurrent resolution just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

IMPLEMENTING OBJECTIVES OF THE INTERNATIONAL YEAR OF DISABLED PERSONS, 1981

Mr. BONKER. Mr. Speaker, I move to suspend the rules and agree to the House concurrent resolution (H. Con. Res. 55) expressing the sense of the Congress with respect to implementing the objectives of the International Year of Disabled Persons, 1981.

The Clerk read the concurrent resolution, as follows:

H. CON. RES. 55

Whereas a new era in recognition of human rights and universal respect for these rights has begun;

Whereas the United Nations General Assembly had declared 1981 as the International Year of Disabled Persons;

Whereas the United States has made great strides during the last decade in improving the lives of thirty-five million American citizens with physical and mental disabilities;

Whereas there is still much to be done to open doors for disabled persons;

Whereas the United States recognizes the need for further progress in strengthening public understanding and awareness of the needs and aspirations of disabled persons; and

Whereas the United States Council for the International Year of Disabled Persons is coordinating public and private participation during the International Year of Disabled Persons: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That it is the sense of the Congress that the President should take all steps within his authority to implement, within the United States, the objectives of the International Year of Disabled Persons (1981), as proclaimed by the United Nations General Assembly Resolution 31/123 of December 16, 1976, as well as the goals of the Federal Interagency Committee which coordinates the activities for the International Year of Disabled Persons within the Federal Government.

SEC. 2. The Clerk of the House shall transmit a copy of this concurrent resolution to the President.

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from Washington (Mr. BONKER) will be recognized for 20 minutes, and the gentleman from Iowa (Mr. LEACH) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Washington (Mr. BONKER).

Mr. BONKER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, House Concurrent Resolution 55, introduced by my distinguished colleague on the Foreign Affairs Committee, Mr. WINN, expresses the sense of the Congress that the President should take all steps within his authority to implement domestically the objectives of the International Year of Disabled Persons.

Amidst growing international concern for the world's 450 million disabled, the U.N. General Assembly in 1976 declared 1981 as the International Year of Disabled Persons. The International Labor Organization reported last year that about 10 percent of the world's population are seriously disabled by blindness, deafness, polio, leprosy, and other debilitating diseases. The purpose of calling for an international year to recognize the disabled is to improve public awareness about the disabled and about opportunities available to them. In addition, the International Year of Disabled Persons seeks to promote their full participation in society.

Although we have been a world leader in broadening opportunities for the some 35 million Americans with physical and mental disabilities, a great deal remains to be done both here and abroad. Our active involvement in promoting observance of the international year and in the implementation of the world plan of action will contribute to greater recognition of the special problems facing the disabled and of ways to help them more fully participate in society.

Mr. Speaker, I wish to commend Mr. WINN for introducing House Concurrent Resolution 55, of which I am a cosponsor. The Subcommittee on Human Rights and International Organizations favorably reported the resolution by unanimous voice vote on March 26, 1981. The full Committee on Foreign Affairs favorably reported the resolution by unanimous voice vote on April 2. I strongly urge my colleagues to lend their full support to House Concurrent Resolution 55.

I would like to yield to the distinguished chairman of the full committee, the gentleman from Wisconsin (Mr. ZABLOCKI).

Mr. ZABLOCKI. I thank the gentleman for yielding.

Mr. Speaker, I rise in support of House Concurrent Resolution 55, expressing the sense of the Congress with respect to implementing the objectives of the International Year of Disabled Persons, 1981. The resolution was unanimously approved by a voice vote in the Committee on Foreign Affairs last week.

The purpose of the year of the disabled is to highlight the plight of those individuals around the world who must cope and function with some sort of physical or mental disability. An estimated 500 million people, which is approximately 10 percent of the global population, suffer some kind of disability. The objective of the year is to foster an awareness of the special needs of the disabled, the contributions they can offer, and to help them develop to their fullest potential.

The diverse needs and limitations of the disabled must be recognized. It is important to heighten understanding of the problems confronting the disabled, and to develop a sensitivity to their problems. Efforts will be made to develop programs and advance the interests of the disabled in the short run, as well as the long run, in a very pragmatic manner. The United Nations resolution which created the Year of the Disabled, set forth a conceptual framework of the world plan of action stressing "full participation and equality." During the year, activities will address primary health care, disability prevention, and rehabilitation—including training, counseling, and the development of special technical aids.

The primary thrust of the year is at the national level, however, activities are to be undertaken at the regional and international levels as well. Links are to be established among national committees, with the Secretariat of the Year of the Disabled, and will also include involvement of the specialized agencies of the United Nations. An international symposium is planned, emphasizing action-oriented technical assistance in the disability field, which

will focus on technical cooperation among developing nations for the benefit of the disabled.

Throughout the year, and after, attention should be paid to encouraging participation of the disabled in the decisionmaking process affecting them, as well as eliciting the involvement of other key groups, such as unions and political parties.

House Concurrent Resolution 55 calls on the President to do what he can to implement and promote the objectives of the International Year of the Disabled within the United States. It is sincerely hoped that 1981 will prove a new beginning toward easing the lives of the disabled, and promoting their integration into the mainstream of society.

Mr. Speaker, I wish to commend my colleague on the committee, Hon. LARRY WINN, the primary sponsor of this important measure, and urge adoption of House Concurrent Resolution 55.

The SPEAKER pro tempore. The Chair recognizes the gentleman from Iowa (Mr. LEACH).

Mr. LEACH of Iowa. Mr. Speaker, at the outset, I wish to commend two of Congress most distinguished Members, Representative LARRY WINN and Senator BOB DOLE, for sponsoring this resolution regarding the International Year of Disabled Persons, 1981. Both have overcome serious handicaps and are inspirational examples of what disabled persons can accomplish when given the opportunity. They are living testaments that a physical handicap need not be an occupational impediment.

The United Nations General Assembly (UNGA) declared in 1981 as the International Year of Disabled Persons (IYDP), with special emphasis on fully integrating the disabled into the lives of their countries.

While recognizing that the problem of disability is global, the U.N. believes the solutions must be specific and suited to regional and local situations. Thus, the purpose of this resolution is to urge the President to take all possible steps within his authority to implement within the United States IYDP objectives, as well as the goals of the Federal Interagency Committee coordinating IYDP activities within the Federal Government.

Tremendous gains have been made in the United States over the last decade in bettering the lives of 35 million American citizens with physical and mental disabilities. Although much still remains to be done here, even more must be done elsewhere in the world. World Health Organization consultants told U.N. officials last year that disability would become a major problem during the balance of this century and stressed the need for worldwide research and surveys implemented at the local level. Of particular importance in this regard is the need to focus attention on disabilities caused by preventive diseases like measles and polio and the need to give highest priority care to refugees the world over.

Mr. Speaker, every so often a legislative proposal comes before us that is compelling in the concerns it addresses. House Concurrent Resolution 55 is that kind of an initiative and is in keeping with this country's human rights tradition and the IYDP's theme of "full participation and equality" for those who are disabled.

I unreservedly recommend it to my colleagues for approval.

At this point I would like to yield such time as he may consume to the gentleman from Kansas (Mr. WINN).

Mr. WINN. I thank the gentleman from Iowa for yielding, and I thank the gentleman from Washington (Mr. BONKER) and the chairman of the Committee of Foreign Affairs (Mr. ZABLOCKI) from Wisconsin for their kind remarks.

Mr. Speaker, the United Nations has declared 1981 as the International Year of Disabled Persons, establishing as a theme the full participation of disabled persons in the lives of their respective countries.

It has urged each member state to formulate objectives and programs to accomplish those objectives, bearing in mind, of course, that such programs must remain appropriate to the society and stage of development.

While Americans can take great pride in the progress we have made over the past 10 years in improving the quality of life for the approximately 35 million Americans with physical and mental disabilities—progress which has established this Nation as the world leader in increasing opportunities for the disabled—much work remains to be done. Our participation in the observance of the International Year of Disabled Persons will go far, I believe, toward increasing public awareness of the unique needs of our disabled citizens and to increase the active involvement of the general population to help increase those opportunities.

My legislation, House Concurrent Resolution 55, recognizes this very important International Year of Disabled Persons, as well as the two primary groups involved in its promotion: The U.S. Council for the International Year of Disabled Persons and the Federal Interagency Committee.

The U.S. council is a nonprofit organization formed by private initiative to promote the United Nations observance. It urges the nearly 1,800 communities, States, corporations, and national organizations it represents to make meaningful commitments during this year to achieve the long-term goals of and for disabled citizens. They are striving to continue our progress in the areas of opportunities for the disabled that have established America's leadership as a defender of human rights and a Nation advanced in biomedical research, accident and disease prevention, and technological application.

The Federal Interagency Committee, the second organization involved in coordinating the International Year of Disabled Persons, seeks to coordinate U.S. policies to maximize cooperation and minimize overlap in Federal programs. It seeks as well to promote awareness of the needs of the disabled in identifying and developing all Federal programs.

As a nation committed to human rights, to the dignity of all citizens, to equality of opportunity, especially in areas over which our citizens have no control, we cannot fail to set the example that we have traditionally set in this endeavor, and to take the lead as we always have, symbolized in this case by our full participation in and observance of the International Year of Disabled Persons.

I urge the support of my colleagues in approving House Concurrent Resolution 55.

Mr. LEACH of Iowa. I thank the gentleman for his comments, and I yield 3 minutes to the gentleman from Michigan (Mr. DUNN), who has taken such initiative in helping in his State with the problems of the handicapped.

Mr. DUNN. Mr. Speaker, as chairman of the Greater Lansing Council for the International Year of Disabled Persons (IYDP), I am honored to urge passage of House Concurrent Resolution 55, which recognizes the IYDP and its sponsors, the U.S. Council for the IYDP and the Federal Interagency Committee. I am a cosponsor of House Concurrent Resolution 55.

The United Nations has declared 1981 as the International Year of Disabled Persons to promote the full participation in the life of our society of America's citizens with physical or mental disabilities.

In recognition of this challenge, a group of concerned citizens formed the U.S. Council for the IYDP. The council, a nonprofit organization located in the Nation's Capital, has developed national leadership by forming a board of directors of disabled and nondisabled representatives of the corporate community and of public interest groups. The board is chaired by David T. Kearns, president of Xerox Corp.

The Federal Interagency Committee, the second organization involved in coordinating the International Year of Disabled Persons, was established by the direction of the White House domestic policy staff, to coordinate U.S. policies to maximize cooperation and minimize overlap in Federal programs. It seeks to promote awareness

of the needs of disabled in identifying and developing all Federal programs.

The council and the interagency committee hope to build on the progress that has already been made toward establishing America's leadership as a defender of human and civil rights and as a Nation advanced in biomedical research, accident and disease prevention and technologicial application.

During the 1970's disabled Americans began to see physical barriers come down. Ramps and curb cuts are more common now. Transportation systems adapted for persons with disabilities are providing increased mobility and independence. Education and employment opportunities are expanding for both the physically and mentally handicapped. Medical and technological breakthroughs and improving the human condition.

The 1970's was a beginning that is by no means complete. Much more needs to be done. We must each do our part to help bring the remaining barriers down.

I have hired two disabled persons in my Washington, office—one who is confined to a wheelchair from a sporting accident and one who lost a limb in the Vietnam war.

For anyone who knows the crowded conditions that Capitol Hill staff serve under, they know that there is not much room for those of us who can walk normally to maneuver and certainly much less for a person in a wheelchair. There were some skeptics among my staff members who were not sure that it would be possible to accommodate disabled persons under those circumstances. There were others, however, including me, who felt that it was all simply a matter of attitude—If you want it done, you do it.

The first barrier that we had to overcome was to find handicapped housing—housing that is accessible to a wheelchair. I must say that I have been disappointed to find such a lack of handicapped housing in the Nation's Capital. In fact, the young man who is confined to a wheelchair has been forced to begin work later than he wanted because it took him so long to find handicapped housing. The second barrier we had to overcome was finding appropriate office furniture that would accommodate a wheelchair. Property supply said that they had no desks for a handicapped person. We have also worked that out.

I must admit, however, that it has been the drive and perseverence of the young staffer who is disabled more than anything else that has enabled him to come work for me. It is a shame that society as a whole has not done more to make way for disabled persons. But at least progress is being made.

The second young man I have hired, to coordinate my activities as chairman of the Greater Lansing Council for the IYDP, is a Vietnam veteran who lost his leg in the Vietnam war.

I serve on the House Veterans Committee and I have worked closely with the Disabled American Veterans of America and the Paralyzed Veterans of America. The Veterans' Affairs Committee daily addresses the needs of thousands of disabled veterans.

As a member of the Subcommittee on Hospitals and Health Care of the House Veterans' Affairs Committee, I have asked for oversight hearings on prosthetic and spinal cord research. Congressman RON MOTTL, chairman of the subcommittee, has enthusiastically agreed to hold those hearings which will take place sometime in November of this year.

On April 24 and 25, the planners of the IYDP in the State of Michigan are holding a conference. I will be attending that meeting and chairing a meeting of all handicapped groups in the Greater Lansing area to map out plans for our local promotion of the IYDP.

I believe that each of us can do something to promote access for disabled persons to mainstream them into society. But perhaps the most important contribution we can each make is to look at our own attitude toward disabled persons in our community, at home or at work.

For ultimately, the best any one of us can do and the most a disabled persons asks from us is to be treated as an equal. Fittingly, the IYDP logo represents two people in a position of equality joining hands in solidarity and support of each other.

This is what we hope to accomplish during this year of special recognition for disabled persons, and we believe that the resolution before us today will help to foster that goal.

I urge passage of the resolution.

□ 1415

Mr. LEACH of Iowa. Mr. Speaker, I yield such time as he may consume to the gentleman from New York (Mr. GILMAN).

Mr. GILMAN. Mr. Speaker, I am pleased to rise in support of House Concurrent Resolution 55, a measure urging the President of the United States to implement the goals and objectives of the International Year of Disabled Persons, and I commend the gentleman from Kansas (Mr. WINN) for bringing this measure to the floor this afternoon.

In proclaiming 1981 as the International Year of Disabled Persons (IYDP), the United Nations called upon governments, organizations, and people all over the world to focus on improving the condition of the world's 450 million persons with physical or mental disabilities.

In our own Nation, these efforts are coordinated by the U.S. Council for the IYDP, a nonprofit organization formed by private initiative, and the Federal Interagency Committee, established by the White House domestic policy staff to coordinate U.S. policies to maximize coordination of IYDP Federal programs. Among the goals of this joint effort to promote full participation in American life by the disabled are:

Expanded educational opportunity;

Improved access to housing, buildings, and transportation;

Greater opportunity for employment;

Expanded and strengthened rehabilitation programs and facilities;

Purposeful application of biomedical research aimed at conquering major disabling conditions;

Reduction in the incidence of disability through accident and disease prevention;

Increased application of technology to ameliorate the effects of disability; and

Expanded international exchange of information and experience to benefit all disabled persons.

Our Nation can be proud of the vast strides that have already been made in opening all facets of American life and society to the disabled, and of the major medical advances in the treatment and prevention of disabling conditions that have been achieved. Great progress has been made in our own lifetimes toward improving the quality of life for the physically and mentally handicapped. However, there is still much to be done before the door is open wide for all of America's 35 million disabled persons.

Full participation by our Nation in the activities of the International Year of Disabled Persons will bring greater understanding and acceptance of the handicapped not as disabled Americans but as Americans with a disability. As a nation long committed to equality of opportunity and respect for the individual dignity of each and every citizen, we cannot fail to take the lead in the world-wide effort to provide participation by the disabled through efforts to guarantee full participation of disabled Americans in the life of our Nation.

The President and the Congress have already affirmed their commitment to the International Year of Disabled Persons. The year 1981 offers a unique opportunity to spark programs, activities, and greater understanding that will continue throughout the decade of the eighties and beyond, and that will benefit all Americans, regardless of whether or not they are disabled.

Accordingly, I am pleased to join in support of this resolution, and urge my colleagues to cast their votes in

favor of this measure and in favor of enhancing the lives of the disabled throughout our Nation.

Mr. BONKER. Mr. Speaker, I yield 3 minutes to the gentleman from New York (Mr. PEYSER).

Mr. PEYSER. Mr. Speaker, first of all I want to thank the chairman of the subcommittee for bringing this to the floor, and to all those who have joined in cosponsoring it.

Obviously, Mr. Speaker, this is the kind of resolution and the kind of action that we should all take, and will take unanimously in this House. But, it does pose a real question for me, Mr. Speaker, that I think we ought to take a minute to think about, because the United States has been one of the leaders in this field of understanding the problems of the handicapped in our country. Here we are today, about to pass a resolution supporting the International Year of Disabled Persons, and at the same time, Mr. Speaker, we are about to cut 25 percent of the budget from the rehabilitation services as being recommended by Mr. Stockman, the Director of OMB. We are about to cut 25 percent of the handicapped children's program in this country, and somehow it does not seem to add up to the right figures because, if we are so concerned about the International Year of Disabled Persons, and I really believe we are concerned, how in the world do we justify making these kinds of cuts in the budget that is coming before this Congress within the next month? I hope that all of us remember, when this budget reaches the floor, the way we vote today to support the International Year of Disabled Persons, because it seems to me that we will not be very true to ourselves if we support this measure and then vote to cut hundreds of millions of dollars away from the handicapped programs in this country.

Mr. Speaker, I support the resolution, and I am also going to support the effort to get these moneys back in the budget. I thank the gentleman for yielding.

Mr. BONKER. Mr. Speaker, I thank the gentleman for his comments.

Mr. Speaker, I will just remind the House that this resolution is an expression of the Congress that the President should take all steps within his authority to implement within U.S. objectives the International Year of Disabled Persons. This is a resolution that has been proclaimed by the U.N. General Assembly, Resolution 31-123, of December 16, 1976, as well as the goals of the Federal Inter-Agency Committee, which coordinates the activities for the International Year of Disabled Persons within the Federal Government.

Mr. McCLORY. Mr. Speaker, I would like to take this opportunity to express my strong support for House Concurrent Resolution 55, which focuses attention on the year 1981, as the International Year of Disabled Persons and my particular concern for the disabled child. The goals of this program to establish full participation of handicapped adults and children in their communities are commendable.

During the years I have been in Congress, we have made substantial progress toward improving the quality of life for the physically and mentally disabled. There is still much to be accomplished. In my view this resolution will increase citizen awareness of the contributions these people are eager to make to society and will draw attention to the opportunities available to them. Hopefully, the adoption of this resolution will aid our efforts in the Congress and other parts of the public sector and will be complemented by every community which utilizes the talents and services of these individuals.

Recalling the efforts and progress made by the International Year of the Child during 1979, we can go even further in turning our attention to those disabled children who need and want to grow into useful and happy adults. In the goal plans for the International Year for Disabled Persons as outlined by the U.N. resolution, emphasis must be placed in several areas as they relate to disabled children. Educational and health care activities aimed at the prevention of disability among children can be a first step. Government can coordinate efforts with the private sector to provide direct services to children with disabilities such as encouragement and participation in recreational activities, opportunities for educational advancement consistent with a level of ability and need, and supporting rehabilitation programs designed to utilize talents and energy so often evident in these children. Continued research into efficient transportation to schools and children's social activities is urged. We need the interest, cooperation, and technical research from the industrial community that would provide for the biomedical engineering assistance to make life a little less complicated for these developing children.

Mr. Speaker, I take this occasion to call to the attention of the Members of this body the forthcoming Interparliamentary Union Conference taking place in Manila, the Philippines, between April 19 and April 25.

One of the subjects to be discussed by the Committee on Education, Science, Culture, and the Environment is the International Year for Disabled Persons established under the sponsorship of the United Nations. Clearly, disabled persons and particularly disabled children are a primary cause for concern and for appropriate legislative, administrative, and executive action by all governments. In addition, it seems even more important for those of us who serve in Government to draw public attention to the need for private individuals and organizations to involve themselves with the cause of disabled persons. The attitudes and the concerns which we individually express and which are embodied in our private and combined actions in the private sector hold forth the greatest hope for easing the plight of the disabled.

Mr. Speaker, it seems important also to recognize that to the extent possible disabled persons prefer to be treated like other individuals regardless of their disability. The tremendous accomplishments of persons without sight or hearing or full control of their physical being are legion. In respect to these accomplishments we should remember to pay special tribute to them by acknowledging the talents, the skills, and the substantial contributions of such individuals—competing against others who have no such disabilities.

Mr. Speaker, above all let us not overpromise or commit ourselves to goals or actions which we cannot fulfill. Working together the disabled and able bodied can achieve much. Indeed, that should be the combined task which we undertake during the International Year of Disabled Persons.

● Mr. SANTINI. Mr. Speaker, they are now debating House Concurrent Resolution 55, the International Year of Disabled Persons. Attached is a statement, if you would like to speak on it. Otherwise, I will have it entered into the RECORD.

Mr. Speaker, I rise in support of House Concurrent Resolution 55, which calls upon the President to take all appropriate steps to recognize and address the needs of disabled persons.

As the father of a handicapped child, I have a personal awareness of and sensitivity to the needs of disabled individuals. Only recently has the public become aware of the needs of the handicapped and has Congress responded to these needs through such legislation as Public Law 94-142.

I am delighted that the United Nations has now chosen to make the needs of the disabled an international priority. Through means such as the removal of architectural barriers and the removal of discrimination against the handicapped in employment the disabled can become fully integrated into our society. I ask that during 1981, as part of the International Year of the Disabled, the United States continue its efforts on behalf of the handicapped. Passage of House Concurrent Resolution 55 will be the first step toward insuring the full involvement of the disabled in our society.●

● Mr. COELHO. Mr. Speaker, as proclaimed by the United Nations Gener-

al Assembly, 1981 is the International Year of Disabled Persons, and it is fitting and proper that we approve House Concurrent Resolution 55 expressing the sense of the Congress that the objectives of this special year be implemented within the United States.

Great strides have been made in recent years in enhancing the lives and the opportunities of those who have disabling or handicapping conditions and in furthering public awareness about the capabilities and the potential of those with such conditions. But a great deal remains to be done.

As one who has a potentially disabling condition, I know whereof I speak when I state that the "handicapped" and the "disabled" are no different from other people. I have epilepsy, but I have not let it hold me back in life, even though it has certainly affected my life in many ways. I know from my personal experience that every individual, regardless of physical health, has talents, interests, hopes and aspirations, and that every individual has something to contribute to the good of our society. Sometimes the greatest handicap or hurdle we have to overcome is not our own physical condition so much as it is the attitudes and expectations others have about us.

In this International Year of Disabled Persons, let all of us commit ourselves to keeping our minds open and to educating others about the potential of all persons and the rights of all to realize that potential. This year, let us commit ourselves to helping in any way we can—whether in government or out—to make it possible for those with disabilities to show the rest of the world not what those disabilities are, but what our abilities and capabilities are.●

● Mr. CORRADA. Mr. Speaker, I rise in support of House Concurrent Resolution 55, expressing the sense of this Congress with respect to implementing the objectives of the International Year of Disabled Persons.

The United States has, in the past, taken an active role in assuring the equal rights of disabled persons, and this year we are joined in worldwide effort through the United Nation's designation of 1981 as the "International Year of Disabled Persons." This initiative will draw special attention to the needs of a very special population, highlighting ongoing programs designed to allow the disabled to follow a meaningful career, and illustrating ways each individual can become involved in improving their participation in American life.

Currently, there are over 36 million disabled persons in the United States alone, persons who have an enormous amount of determination, perseverance and drive. Through this international year, we hope to heighten public awareness of their rights, capabilities, achievements and needs, recognizing that they too have hopes and desires for the future, that their goals are attainable, and that they have a vital contribution to make to our society.

President Reagan has echoed the United Nations action by establishing the Federal Interagency Committee for the International Year of Disabled Persons. This committee will serve to coordinate public and private, State and local efforts to insure "full participation and equality" for the disabled as is set out in the United Nations proclamation.

This Congress has previously indicated its sensitivity to the plight of the disabled—the Education of the Handicapped Act, the Vocational Rehabilitation Act, and others are strong reaffirmations of the rights of all citizens to their share of opportunity in our great Nation. I have joined my distinguished colleague JOE MOAKLEY as a cosponsor of H.R. 3345, the Equal Employment for the Handicapped Act to further remove discrimination against the disabled.

I urge my colleagues to join with me to approve House Concurrent Resolution 55, to bring attention to our 36 million disabled and to reiterate this body's commitment to equal opportunity for all.●

● Mr. WALGREN. Mr. Speaker, today we are considering House Concurrent Resolution 55, requesting the President to implement the objectives of the International Year of Disabled Persons.

As a cosponsor of this resolution, I feel the year is an important recognition of the substantial handicapped population of our country. Only in recent years have the handicapped been encouraged to join the mainstream of our society. And only through laws and court orders were they given such basic rights as access to education and public buildings.

In the past, this country has too often chosen to ignore the problems of the disabled. In a sense, these people are the last to gain visibility and receive equal rights.

We sometimes forget that we are all only temporarily able-bodied. An accident could disable any of us at any time. So when we plan for the handicapped, we are indeed planning for ourselves and our children.

I hope that during this year we will increase awareness of the contributions as well as the problems of the disabled. It is important that the designation of the year, which is largely ceremonial, be accompanied by activities and legislation promoting awareness and filling the needs of this group.

In particular, I am concerned about the fate of benefits to the disabled. No one could be more "truly deserving" of aid than the severely disabled. Administration proposals would reduce aid to those with interrupted work histories. We should evaluate these proposals with an understanding of the difficulties of these handicapped persons—who often are lucky to be able to work at all.

I hope this resolution will be followed by true awareness, not just rhetoric. The Congress and the President can make this truly the International Year of Disabled Persons, if they will.●

● Mr. MINISH. Mr. Speaker, I am proud today to lend my support to House Concurrent Resolution 55 which expresses the sense of the Congress that the President take appropriate measures within the United States to attain the objectives of the International Year of Disabled Persons, 1981. It is my hope that my colleagues in our distinguished body concur with me on this matter.

The International Year of Disabled Persons was proclaimed in 1977 by a resolution of the 31st regular session of the General Assembly of the United Nations. The intent of this honorary year is to nurture the participation of those suffering from physical or mental disabilities so they might be fully integrated into society. It is estimated that 450 million people throughout the world live with a physical or mental disadvantage. In accordance with the United Nations resolution, all of the member states of the General Assembly were requested to establish programs. To date, 60 countries have created programs to commemorate the year.

I believe that the establishment of a program in the United States is important and that we here in Congress can take the initiative in formulating that program and in disseminating it to the American public by approving this resolution. As noted in the Presidential Proclamation for the International Year of Disabled Persons, there are currently 35 million disabled Americans. These individuals represent a grossly underutilized resource of our great Nation. If we can only develop and sustain the full participation of this group into our society, the whole of society will benefit from the total increase of skills, energy, and commitment to our national well-being.

The method which I favor for aiding disabled persons is the independent living services. The independent living concept encourages disabled people to exert control over their personal living arrangements, to participate in peer counseling, and to actively participate in the administration of the support services which they need to live and function as independently as possible within their own community. Such a method lends itself to disabled people residing in small housing units, with

support services nearby, instead of large institutions. The former method encourages and nurtures independent lifestyles for those capable of the adjustment.

Mr. Speaker, it is indeed not only in the interest of disabled Americans, but indeed of all Americans, if we implement the objectives of the International Year of Disabled Persons as expeditiously as possible.●

● Mr. BIAGGI. Mr. Speaker, I rise to join my colleagues to voice my support for the resolution before us. House Concurrent Resolution 55, calling upon the President to take appropriate steps to recognize 1981 as the International Year of Disabled Persons.

Our consideration of this legislation today causes me to pause and reflect upon how far we have come in addressing the needs of the disabled community in this Nation since I first came to Congress in 1969. One of the first amendments I sponsored was to the 1970 Urban Mass Transportation Act, which prohibited Federal funds from going to transit systems which were not accessible to the handicapped and elderly. That amendment served as a conduit for a number of additional legislative initiatives which would further secure the rights of disabled people in the workplace, in our educational systems and on public transportation systems.

Today we face an even greater challenge than we did in the 1970's when we approved programs which would allow handicapped people full access to productive and healthy lives as viable members of society. Our everdecreasing financial resources have resulted in mass disruptions in services to handicapped children and adults since we have created Federal mandates without providing adequate Federal funds to meet these mandates.

For example, since the enactment of Public Law 94-142, the Education for All Handicapped Children Act in 1975, legislation I cosponsored, the costs of educating a handicapped child have risen 112 percent, not including transportation, lunch or overhead costs. On the other hand, Federal funds received by New York City have only risen from $5 million to an expected $12 million in fiscal year 1981—merely 4 percent of the cost of special education and related services.

There are three essential problems with funding of Public Law 94-142: First, Congress has never appropriated the full amount authorized which should be 40 percent in fiscal year 1982, but in fact has not risen above 12 percent. Second, the distribution formula does not take into account regional differences in costs associated with the education of the handicapped. While the national per pupil expenditure has risen from $1,400 to roughly $1,992, this is only 65 percent of the costs of educating the same child in New York City, where we spend on the average $8,000 per child. Finally, enrollment figures for the purposes of claims lag actual enrollment by 2 years. The number of children served by special education in New York City grew by 10,000 in 1979, 20,000 in 1980, and an additional 20,000 in 1981. Basing a claim on last year's October and February enrollment will not include all costs associated with over 30,000 children.

Our experience with this one program has demonstrated the dramatic need for adequate Federal funds for our handicapped programs. I have joined my colleagues on the Select Education Subcommittee in contacting our House Budget and Appropriations Committee members to alert them to this problem. If we cannot make the appropriate commitment to these programs, then a major rethink on the goals and structure of our programs for the handicapped must occur. It is both fiscally unfair and unworkable to create requirements which we cannot realistically expect to fulfill.

Nonetheless, our commitment to full equality for disabled citizens cannot be allowed to falter. Our original goal of assuring the handicapped access to all aspects of society has in large part been met, not only on the Federal level, but on the State and local level as well. We have an obligation—both social and moral—to insure equal opportunity to handicapped citizens, whether it be on the Federal, State, or local levels.

I join with my colleagues today in urging support for this resolution which will assure that the International Year of the Disabled will receive all due attention by our Government and in States and localities around the country. This is the year to demonstrate just how far we have enabled our disabled population to progress and to reaffirm our support for full civil and human rights for all citizens, regardless of their handicap. I urge approval of House Concurrent Resolution 55 and hope my fellow members will join me in their support of this most worthy resolution.●

●Mr. MURPHY. Mr. Speaker, I would like to take this opportunity to commend my distinguished colleague from the State of Washington, Chairman DON BONKER, and the members of the Committee on Foreign Affairs, along with the sponsors of this resulution, for their initiative in enabling the United States to continue to focus on the plight of disabled persons as one of its national priorities.

It is only fitting that this Congress, representing the people of the United States, lead the world in addressing the needs of all handicapped persons and in encouraging them to fully participate in society.

In order to adequately address the plight of the disabled, we must keep in mind that handicapped children can be self-sufficient, taxpaying members of society in their adult years if we provide them with appropriate educational programs during their preschool and school years. When these programs are provided in the early stages of a child's development we may be preventing additional or more severe handicaps and the need for costly remedial or maintenance programs which would occur later in life.

It is my hope that my colleagues on both sides of the aisle will not abandon us in this commitment by attempting to curb immediate Federal spending. Rather, I would hope that they show their support for this investment in the future of all handicapped individuals which in turn is the future of our country.●

Mr. BONKER. Mr. Speaker, I have no further requests for time.

The SPEAKER pro tempore. (Mr. BONIOR of Michigan). The question is on the motion offered by the gentleman from Washington (Mr. BONKER) that the House suspend the rules and agree to the concurrent resolution (H. Con. Res. 55).

The question was taken.

Mr. PEYSER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 364, nays 2, not voting 66, as follows:

□ 1430

The Clerk announced the following pairs:

Mr. Rosenthal with Mr. Young of Florida.
Mr. Jones of Tennessee with Mr. O'Brien.
Mr. Rangel with Mr. Michel.
Mr. Lowery of California with Mr. Napier.
Mrs. Bouquard with Mrs. Heckler.
Mr. Clay with Mr. Livingston.
Mr. Derrick with Mr. Quillen.
Mr. Dymally with Mr. Pashayan.
Mr. Cotter with Mr. Lungren.
Mr. Huckaby with Mr. Weaver.
Mr. Conyers with Mrs. Smith of Nebraska.
Mr. Leland with Mr. Taylor.
Mr. Long of Louisiana with Mr. Rudd.
Mr. Roe with Mr. McDade.
Mr. Shannon with Mr. Mitchell of New York.
Mr. Wilson with Mr. Hansen of Utah.
Mr. Edgar with Mr. Myers.
Mr. Daschle with Mr. Gingrich.
Mr. Moffett with Mr. Hollenbeck.
Mr. Regula with Mrs. Holt.
Mr. Porter with Mr. Badham.
Mr. Pursell with Mr. Beard.
Mr. Fish with Mr. Bliley.
Mr. Green with Mr. Hiler.
Mr. McCloskey with Mr. Erlenborn.
Mr. Loeffler with Mr. Deckard.
Mr. Dickinson with Mr. Coughlin.
Mr. Dixon with Mr. Burgener.
Mr. Edwards of Oklahoma with Mr. Campbell.
Mr. Emery with Mr. Edwards of Alabama.
Mr. Lott with Mr. Marriott.

So (two thirds having voted in favor thereof) the rules were suspended and the concurrent resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PERSONAL EXPLANATION

Mr. LUNGREN. Mr. Speaker, on rollcall No. 22, I was unavoidably detained, as I was at a meeting of the Attorney General's Office of the Justice Department. Had I been present, as a cosponsor of this bill, I would have voted "yea."

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Chirdon, one of his secretaries, who also informed the House that on March 13, 1981, the President approved and signed a bill of the House of the following title:

H.R. 2166. An act to amend the Energy Policy and Conservation Act to extend certain authorities relating to the international energy program.

PERMISSION FOR COMMITTEE ON THE BUDGET TO HAVE UNTIL 5 P.M., THURSDAY, APRIL 16, 1981, TO FILE REPORT TO ACCOMPANY CONCURRENT RESOLUTION ON THE BUDGET

Mr. JONES of Oklahoma. Mr. Speaker, I ask unanimous consent that the Committee on the Budget may have until 5 p.m., Thursday, April 16, 1981, to file its report to accompany the concurrent resolution revising the congressional budget for fiscal year 1981 and setting forth the congressional budgets for fiscal years 1982, 1983, and 1984.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

PERSONAL EXPLANATION

Mr. DeNARDIS. Mr. Speaker, on Thursday, March 26, because of an important meeting with one of my constituents, I was delayed in reaching the House floor for rollcall vote No. 20, concerning the designation of April 26, 1981, as a "National Recognition Day for Veterans of the Vietnam Era." If I had been present, I would have voted "yea."

JOHN B. SLINEY

(Mr. DeNARDIS asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. DeNARDIS. Mr. Speaker, on Friday, April 3, 1981, First Selectman John B. Sliney died. His death brought great sadness and a deep sense of loss to his friends, family, and the entire town of Branford, Conn., which he served as first selectman for 18 years. In all, his career in elected office spanned more than a half century.

He served on the Branford Board of Education for more than 40 years and finally ran for first selectman in 1963—a job he was reelected to regularly and held until his death.

He was an exceptionally dedicated public servant who spent his life working and caring for the people of Branford—who returned to him respect, affection, and appreciation for his concern and dedication.

He will be missed by his family, who have my deepest sympathy—and by all the residents of Branford who were

also part of his family—and who are all sorrowing today.

I am submitting, to be included with my remarks, an article by Patrick J. O'Leary, a reporter for the New Haven Journal Courier, who has covered Branford for 10 years. It is a wonderful tribute to John Sliney as a human being which well describes the respect and love John B. Sliney earned from all people:

[From the New Haven Journal Courier, Apr. 7, 1981]

REPORTER WON'T FORGET BRANFORD'S J. B. SLINEY

(By Patrick J. O'Leary)

BRANFORD.—I don't know when I first met John B. Sliney, the first selectman of Branford as far back as most people remember. It just seems like I've known him forever.

Sliney died Friday at St. Raphael's Hospital after a stroke March 20. The loss is a personal one.

John B. Sliney was the kind of politician who could survive nine terms as chief executive of the town and be contemplating a 10th term at 83 years of age. Among his proudest accomplishments was bringing Hospice, a special care center for terminally ill cancer patients, to town. Although up to his elbows with the newest state and federal mandates on local government, he still found time to drive his horse and buggy, his grandchildren at his side.

Horses and buggies were the tools by which he learned one of his most important lessons, he once said. His father, John T. Sliney, taught his four sons that hard work was a proud occupation.

"We were told that care and feeding of the horses and cleaning the carriages came first," Sliney once told me, leaning back in his chair in his Branford Town Hall office, his hands laced behind his head. "Our supper came after the work was done."

John B. never forgot that lesson. It became his philosophy of life.

His father also taught him public service was among the highest callings. The elder Sliney served as first selectman, a member of the Board of Education and representative in the General Assembly, almost unheard of accomplishments for an Irish-Catholic Democrat in a Republican stronghold.

His Irish-Catholic New England stock also served him well. He practiced brotherhood long before it became fashionable. We shared a hymn book at special services at St. Stephen's AME Zion Church when the church, with a predominately black congregation, moved to its new location.

He commented that Town Hall was surrounded by edifices of other faiths, symbols of Colonial times.

My first recollections of the man were when I met him in town Hall when I first started on my beat. He struck me as being a crustly sort of man. But soon, it seemed like I'd known him forever. I was impressed with his humility, fairness and kindness.

Observers noticed his sharing of power with Daniel Cosgrove. But these two shared more than political power. They shared a close friendship. The friendship went back to their grandparents and parents and held fast through years of involvement in town affairs.

"Sliney was perhaps the first person in Branford to know I was born," Cosgrove recalled. "My father was on his way to get a trolley car to visit my mother (who had just given birth to Daniel) in the hospital when he met Sliney and his father on their way to a blacksmith shop. I guess you could say our friendship started then." Sliney was probably in his early 20s then.

But through the years, the town changed. He worried when urban ills became suburban problems and longed for the charm and grace of a small New England town of a bygone era. He worried about the elderly and young couples caught by inflation, and about the unemployed. He talked about trying to keep the cost of government down.

Sliney is gone, but I don't think the town will ever forget him. Even if it did, I couldn't forget John B. Sliney.

REVISED 1982 PRESIDENTIAL BUDGET, WITH SPECIFIC PROPOSALS FOR FISCAL YEARS 1981 AND 1982 AND TARGETS FOR 1983 THROUGH 1986—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 97-41)

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Appropriations and ordered to be printed.

(For message, see proceedings of the Senate of today, Tuesday, April 7, 1981.)

RESOLUTION STATING THE SENSE OF CONGRESS ON REFUGEES FROM EL SALVADOR

(Mr. WEISS asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. WEISS. Mr. Speaker, today I am introducing for myself and 12 of our colleagues a House resolution expressing the sense of the House that refugees from El Salvador should be given temporary haven in the United States. Current policy is to detain, deport, and return these refugees to the dangerous situation in El Salvador which they fled. Unless the Immigration and Naturalization Service grants the refugees what is formally called extended voluntary departure status, thousands of refugees could be forced back to their war-ravaged nation.

The INS is now deporting an estimated 400 refugees each month and has estimated that as many as 60,000 Salvadorans fled El Salvador and came to the United States in 1980 alone. More than 11,000 refugees are currently being detained in refuge centers in several locations across the Nation.

Extended voluntary departure status has been granted routinely in several cases in recent history, including those involving Vietnamese, Laotians, Nicaraguans, and Iranians. The procedure used to do so was for the Secretary of State to recommend to the Commissioner of the INS that such status be provided. The Commissioner then acted on behalf of the Attorney General of the United States in formally granting this temporary shelter provision.

Many refugees can not now return to their homes in El Salvador, having been forced to abandon them by the ongoing fighting. They have no immediate prospects for resettlement and little hope of resuming the lives they were forced to flee. Several reports from El Salvador indicate that some refugees face retribution from their Government when they are returned by the U.S. Government. I believe it is vital that we offer these refugees a temporary haven until the situation in El Salvador improves sufficiently to allow them to return and reside safely there.

This is an urgent problem which grows increasingly critical with every day that it does not receive appropriate attention. As the fighting continues in El Salvador the flow of refugees to the United States also will continue. The resolution that I am introducing today is a way of addressing this problem immediately.

I urge my colleagues to join me in supporting this resolution. Doing so will help remedy a serious problem for Salvadoran refugees residing in this country and restore the traditional American policy of aiding displaced victims of war.

A copy of the resolution follows:

H. RES. 126

Resolution expressing the sense of the House of Representatives that extended voluntary departure status should be granted to El Salvadorans in the United States whose safety would be endangered if they were required to return to El Salvador

Whereas ongoing fighting between the military forces of the government of El Salvador and opposition forces is creating potentially life-threatening situations for innocent nationals of El Salvador;

Whereas the Immigration and Naturalization Service estimates that as many as 60,000 nationals of El Salvador fled from El Salvador and entered the United States in 1980;

Whereas such Service in 1980 has detained more than 11,000 of such nationals and is deporting to El Salvador approximately 400 of such nationals each month;

Whereas deportation of such nationals could be temporarily suspended, until it became safe to return to El Salvador, if the Attorney General, upon the recommendation of the Secretary of State, provides such nationals with extended voluntary departure status; and

Whereas such extended voluntary departure status has been granted in recent history in cases of nationals who fled from Vietnam, Laos, Iran, and Nicaragua: Now, therefore, be it

Resolved, That it is the sense of the House that the Secretary of State should recommend to the Attorney General that extended voluntary departure status be granted to aliens who are nationals of El Salva-

dor and that the Attorney General should exercise his discretion and grant such status to such aliens until the situation in El Salvador has changed sufficiently to permit their safely residing in that country.

MORE DOCUMENTATION ON STUDENT AID CUTS AND THEIR IMPACT

(Mr. PEYSER asked and was given permission to address the House for 1 minute and to revise and extend his remarks, and to include extraneous matter.)

Mr. PEYSER. Mr. Speaker, today I have a letter with 1,500 signatures, all from Upsala College, N.J., in Congressman RODINO's district, all of whom are speaking out on the problems of the cuts in student aid and their impact on that college.

Today, Mr. Speaker, I was going to start putting into the RECORD letters from parents and students themselves, of which we now have hundreds and hundreds, in order to state their own case. I find, however, on reading these letters that they are so personal and expose so much of the individual problems financially that I do not think it would be fair for me to put them into something like the CONGRESSIONAL RECORD. But I do want to state that their needs are great. These are working people, middle-income people, who are going to be forced to take their children out of school unless we in the Congress can react positively to reinstate the funds that have been slashed by the administration.

Mr. Speaker, the letter from Upsala College is as follows:

UPSALA COLLEGE,
East Orange, N.J., March 25, 1981.

Hon. PETER A. PEYSER,
Committee on Education and Labor, House of Representatives, Cannon House Office Building, Washington, D.C.

DEAR MR. PEYSER: The enclosed petitions have been signed by more than 1,500 students, faculty, and friends of Upsala College. We are sending them to you as a realistic indicator of the very serious threat to the education of these students which will exist if the Administration's proposed reductions in student financial aid are legislated by the Congress.

Upsala's students are largely from lower, lower-middle, and middle income families which have been particularly hard-hit by the inflation of the past several years. In many cases, these Upsala students are the first members of their families to attend college. Their attendance has been made possible by significant personal and family sacrifice, by generous institutional scholarships, and by the federal and state grant, loan, and employment programs. If the Basic Grant and Guaranteed Student Loan Programs are curtailed, there will be no funds to replace them. We estimate, conservatively, that as many as 200 Upsala students—almost 20% of our enrollment—will be forced to withdraw from the College because of lack of funds. We urge you not to let this happen to these young, aspiring Americans.

We do not dispute the Administration's contention that the Guaranteed Student Loan Program as presently operating is subject to abuse. We believe, however, that abuse can be controlled by a fine-tuning of the eligibility requirements and a careful monitoring of loans in repayment. We urge you not to let the axe fall on this program which has been so instrumental in eliminating wealth as an entrance requirement for higher education.

We hope that the enclosed petitions will serve to convey to you and your colleagues the continued need for federal support of student financial aid. We the undersigned as well as our truly needy students will appreciate your efforts on behalf of higher education.

Sincerely yours,

PICHON P. Y. LOH,
Professor of Political Science and East Asian History.
ELIZABETH CARR HAMLIN,
Director of Financial Aid.

PERSONNEL PROBLEMS OF THE ARMED FORCES

(Mr. DAN DANIEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. DAN DANIEL. Mr. Speaker, nowadays everybody has a solution to the Armed Forces' personnel problem. Some of them will without doubt be helpful. All too many, though, see the problem as one which will melt away with the application of money.

It is therefore a pleasant surprise to have come across an assessment of the problem which is intelligent without being pedantic, persuasive without being emotional, and right on target in its description of service people and their families.

I do not know who wrote this editorial, but whoever the author is, high praise is due and is accorded by this Member.

I insert "The Way It Is," an editorial in the March 23, 1981, issue of Navy Times, in the RECORD at this time:

[From the Navy Times, Mar. 23, 1981]

THE WAY IT IS

One of these days, Congress will have approved the last major piece of benefits legislation the services can expect for a while.

At some point, the services also will have done about all they can to improve the quality of military life.

Then it will be up to members to decide whether they want to pursue service careers or try their luck in the civilian world.

The choice probably never will be an easy one. Despite the improvements already made and those the new Congress is likely to approve, nobody stands to get rich on military compensation. And in spite of the services' best efforts to remove the "irritants" of military life, some are built into the system and cannot be eliminated.

It is the nature of the work that it always will require some people to work long hours under unfavorable conditions. To make matters worse, the workload probably never can be spread evenly.

Some people always will be moved more often than they would like. Families will have to be separated often. When they are together it will not always be in the most attractive places.

No matter how much housing is improved, some people will live part of their lives in substandard quarters in undesirable locations.

Service people never will enjoy the degree of freedom some of their civilians neighbors have. They always will be subject to more discipline. Their careers will be more closely regulated. They will have less say in assignments. And they never will have the luxury of walking off the job at whatever moment they decide they have had enough.

Most important, perhaps, service people always must live with the knowledge that if the world erupts into war, they will be the first to face the dangers.

To those who have been in service for any length of time, all of this is obvious. But we're not sure that some younger members have the same understanding.

INTRODUCTION OF THE GOVERNMENT COST REDUCTION ACT

(Mrs. SCHROEDER asked and was given permission to address the House for 1 minute and to revise and extend her remarks and include extraneous matter.)

Mrs. SCHROEDER. Mr. Speaker, today I am introducing the Government Cost Reduction Act. I have been working on this legislation for the last 2 years because I believe that making the Federal Government more efficient is an essential element to the overall effort to reduce the size of the Federal tax burden.

Ronald Reagan was elected President because, in part, many Americans had lost faith in the Federal Government. Many of our fellow taxpayers thought they were receiving an inadequate amount of Government services in exchange for their hard-earned money. There was a widely held belief that the Government in Washington was squandering enormous sums of money on waste, fraud, abuse, high living, inefficiency, and paper.

I have been around the Federal Government long enough to know that this belief, while exaggerated, has a large kernel of truth. While I do not think the incidence of criminality is very high, I do think that antiquated procedures, unthinking management, cumbersome regulations, and useless paperwork reduce the efficiency and effectiveness while raising the cost of Government.

The Government Cost Reduction Act would remove many of the disincentives which now stand in the way of heightened productivity. It would establish new incentives for all employees to increase their efficiency and effectiveness. It would organize the currently haphazard way in which we collect productivity data, establish work force levels, and set goals. It would involve employees at all levels and encourage worker participation. And, very important, the bill does not

require us to spend money to save money.

Passage of the bill tomorrow will not result in a less expensive and more productive Federal Government the day after. On the other hand, the bill will create the types of institutional forces necessary to reduce the size of Government over the next few years.

One more point must be made. Our national economy is weak and unable to continue to support a Federal Government growing at its current rate. The Reagan administration has been spreading the myth that the Federal Government is the cause of the present economic uncertainty. This myth can be sustained by neither empirical nor theoretical data. Nevertheless, it is deeply engrained in the thinking of this administration.

The passage of the Civil Service Reform Act and the Inspector General Act have been significant steps in increasing the efficiency of the Federal Government. This bill will complete the process by creating permanent incentives to less costly Government. With the passage of this bill, Congress will do all it can to make the Federal Government efficient. Doing so will not, however, revitalize our economy. Other steps are needed to do that.

Saying that Government inefficiency is not the cause of economic weakness is not to say that Government inefficiency should not be wiped out. It should and that is why I urge speedy action on this legislation.

I am including for the RECORD a section-by-section summary of the bill:

GOVERNMENT COST REDUCTION ACT—SECTION-BY-SECTION ANALYSIS

TITLE I. GENERAL PROVISIONS

Sec. 101. *Statement of Purpose.*—Establishes the general purposes of the Act to be reduction in cost of government and improvement in government productivity. These purposes are to be met by: increasing incentives for higher productivity; centralizing responsibility for productivity improvement; increasing employee participation; and improving measurement and evaluation efforts.

Sec. 102. *Definition.*—Defines terms used throughout the bill.

TITLE II. AGENCY PROGRAM APPRAISAL

Subtitle A. Establishment of Appraisal System

Sec. 201. *Identification of Programs and Long-term Program Goals.*—The initial step in establishing agency appraisal systems is the classification by agencies of their activities into programs, and the establishment of long-term goals for each program. In making these determinations, agencies must consult with their own employees and with congressional committees and interested groups.

Sec. 202. *Management Information; Program Performance Indicators.*—Once programs have been identified and program goals established, agencies must collect data on program performance and cost control, including indicators of effectiveness, quality, responsiveness, and timeliness of service.

Subtitle B. Annual Program Appraisal

Sec. 211. *Management Improvement Plans; Proposed Annual Program Objectives and Cost Reduction Objectives.*—Using program performance indicators, agencies are required to develop and submit to the President, by June 1 of each year, an annual management improvement plan which includes program performance and cost reduction objectives for each program. This plan should specify those programs most in need of improvement. The development of this plan is a "bottom up" process involving employees at all levels in developing, articulating, and gaining commitment to the annual objectives.

Sec. 212. *Establishment of Annual Program Objectives and Cost Reduction Objectives.*—Based on the agency plans submitted, the President, in discussion with each agency head, determines which priority programs to monitor during the fiscal year. The agency head is required to monitor the remaining programs within the agency.

Sec. 213. *Implementation of the Management Improvement Plan.*—Agencies implement their management improvement plans during the fiscal year. At the close of the fiscal year, each agency reports on its success in meeting its objectives. Recognizing that external circumstances can force changes in objectives during the year, provision is made for revising objectives.

Sec. 214. *Agency and Program Performance Appraisal.*—At the end of each fiscal year, the President rates each agency and the high priority programs which he has been monitoring on the degree to which they have been successful. The agency head also rates the programs for which he alone has been responsible. The ratings are used to determine the amount of money available within each program for all employee benefits, including bonuses, awards and promotions.

Sec. 215. *Employee Participation.*—Throughout the process of plan development and implementation, agency management is required to seek the participation of employees.

Subtitle C. Employee Benefits Based on Program Ratings

Sec. 221. *Benefits Covered.*—The employee benefits which are subject to increase or decrease based on program success include Senior Executive Service performance awards, merit pay increases, cash awards, quality step increases and rates of promotions.

Sec. 222. *Employee Benefits Based on Program Ratings.*—The rating of program success, under section 214, determines the relative size of benefits for employees working on the program. Based on these ratings, employee benefit money is reallocated among programs within an agency. However, no one program can receive more than twice the amount of employee benefit money which it would otherwise receive. Such benefits should be equitably distributed among those employees, both supervisors and non-supervisors, who have been responsible for program success. This provides a form of Federal "profit-sharing" under which group effort is rewarded.

TITLE III. COST SAVINGS

Sec. 301. *Cost Savings.*—A large disincentive to more cost-conscious management is the notion that, if a manager does not spend the program's whole appropriation, the program will be punished in the next budget. Hence, there is no incentive to achieve cost savings. This title allows for the return of part of the cost savings back to the program as an incentive for reducing costs. Cost savings are defined as the money saved from the amount appropriated without a reduction in program service or quality. The savings must be initiated as a result of management improvement and the impact of such savings on the program will not result in higher future costs.

Sec. 302. *Report of Cost Savings.*—As savings occur, agencies report savings to the President on a quarterly basis. The President reviews the agency reports to assure that the cost savings meet the statutory requirement.

Sec. 303. *Disposition of Cost Savings.*—. After the President verifies the cost savings, half are returned to the Treasury, 10% can go for bonuses for employees of the program responsible for the savings and the balance goes to other authorized agency purposes. Since the cost savings provisions operate on a quarterly basis, a special fund is autorized to provide for disposition of fourth quarter savings.

TITLE IV. WORK FORCE PLANNING

Sec. 401. *Establishment of Work Force Planning Systems.*—While titles II and III deal with incentives for better productivity, titles IV and V require the development of management systems to determine staffing needs and to measure productivity. By October 1, 1985, agencies are required to develop work force planning systems capable of determining staffing needs for given levels of work.

Sec. 402. *Certification of Work Force Planning Systems.*—All work force planning systems must be pilot tested by the agencies for one year. Subsequent to testing, agencies must seek certification by the Office of Personnel Management (OPM). After certification, the system must be used by the agency for budget formulation, reorganization and contracting out determinations.

Sec. 403. *Demonstration Projects.*—As work force planning systems are certified, OPM is required to test whether these systems can substitute for agency personnel ceilings and classification systems now in use.

TITLE V. COST ACCOUNTING AND PRODUCTIVITY MEASUREMENT

Sec. 501. *Cost Accounting Systems.*—A second management system necessary to enhance productivity and cost reduction is cost accounting. Cost accounting systems, which must be established by each agency by October 1, 1985, will determine the unit cost for each good or service produced by the government. These accounting systems will be consistent with program structure and the work force planning systems.

Sec. 502. *Productivity Measurement Systems.*—A third management system is a productivity reporting system which will be established by October 1, 1985. This system should be used to assess government-wide productivity and to compare the productivity of functions which are common to several agencies. Once the OPM system is established, the existing Bureau of Labor Statistics system will be terminated.

Sec. 503. *Clearinghouse.*—OPM will also be required to establish a central clearinghouse for information on productivity improvement in government.

Sec. 504. *Employee Participation Procedures.*—In addition, OPM will encourage agencies to develop procedures to increase employee participation in agency management.

TITLE VI. CAPITAL INVESTMENT FUNDS

Sec. 601. *Capital Investment Accounts.*—A third major productivity incentive of the bill authorizes agencies to establish funds to finance capital improvements, costing less than $100,000 which generate sufficient savings to repay the cost of purchase within four years.

Sec. 602. *Project Approval.*—The general criteria for approval of capital investment projects are established with the requirement that the justification of the project be subject to independent review within the agency prior to approval.

Sec. 603. *Audits.*—After funding a capital investment project, the agency will be required to monitor and audit the project to insure that cost savings are achieved.

Sec. 604. *Role of Office of Management and Budget (OMB).*—OMB will regulate the expenditure of capital investment funds and the distribution of cost savings achieved.

TITLE VII. ADDITIONAL INCENTIVES FOR INCREASED PRODUCTIVITY

Sec. 701. *Minimize Reductions in Force.*—OPM is required to issue regulations to minimize the number of employees losing their jobs as a result of productivity improvement. Nothing sours employees on productivity improvement more than the idea that, by being more productive, they will lose their own jobs.

Sec. 702. *Grade Protection.*—OPM is charged with assuring that managers who reduce their staff requirements through productivity improvement do not get downgraded as a result.

Sec. 703. *Employee Performance Appraisal.*—Contribution to agency success in meeting program objectives and cost reduction goals are made an integral component of the individual performance appraisals of all employees.

Sec. 704. *Cost Comparisons for Contracting Out of Work.*—To ensure that government work is contracted out only when real cost savings can be achieved, employees are permitted to challenge decisions to contract out work and to demonstrate that such work could be performed as efficiently and effectively by the employees themselves.

Sec. 705. *Extension of Certain Provisions to Other Personnel Systems.*—Requires the President to extend the Act to governmental units not directly covered.

Sec. 706. *Employee Bonuses for Cost Savings Suggestions.*—Provides that any employee who discloses waste and fraud within the operations of his agency shall be eligible to receive from the Inspector General or other designated official an award of $10,000 or 1% of savings, whichever is less.

TITLE VIII. MISCELLANEOUS PROVISIONS

Sec. 801. *Centralization of Productivity Functions.*—Requires the President to centralize the government's management, reorganization, and productivity functions to avoid duplication and diffusion of responsibility.

Sec. 802. *Applicability of Certain Military Activities.*—Excludes certain * * *.

Sec. 803. *Use of Contractors.*—Generally, forbids the use of contractors in implementing the Act. This avoids the problem of agencies failing to treat productivity improvement seriously.

Sec. 804. *Absorption of Costs within Available Funds.*—Requires agencies to absorb any new costs associated with this Act into their existing appropriation.

Sec. 805. *Coordination with Government Budgetary Process.*—Requires that the information and management systems developed under this Act be coordinated with the budgetary process in order to avoid duplication.

Sec. 806. *Effective Date.*—The effective day is October 1, 1981.

LEGAL SERVICES CORPORATION

(Mr. VENTO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. VENTO. Mr. Speaker, in the name of cutting costs and getting Government out of areas best handled by the private sector, the Reagan administration has proposed to eliminate funding for the National Legal Services Corporation. The effect of this decision would be to deny millions of poor people throughout this country legal advice and civil representation that they would not otherwise be able to afford. In my opinion, zero-budgeting the Legal Services Corporation cannot be justified as saving money or improving service. Rather, it is a flagrant attack on the rights of poor people to equal access to justice under the law. Nothing is more fundamental to our democratic system than the proposition that all persons are equal before the law. We cannot allow this basic principle to become a mockery by letting legal services quietly fade away. Without legal assistance, only the affluent will be able to afford equal justice under the law.

The Legal Services Corporation is not an expensive, inefficient program. In fiscal year 1981, it was modestly funded at $321.3 million, an amount equal to just under 1/5000 of proposed defense spending in fiscal year 1982. With this $321.3 million, the LSC provided grants to 323 locally run, community-based programs. These programs, in turn, employed 5,000 attorneys, as well as support staff, and operated 1,200 neighborhood offices. Legal services personnel work at wages well below those in the private sector. All told, the LSC in 1980 provided assistance to 1.2 million of the 30 million Americans living at or near poverty level. This works out to Federal spending on legal assistance of just over $10 per poor person. Personally, I do not think that $10 per poor person is too high a price to pay for upholding one of the fundamental principles on which this country stands.

The great majority of Legal Services Corporation cases are individual problems of so-called poverty law. Characteristically, they involve family matters, housing complaints, income maintenance or consumer issues. Most legal services clients are women; and a substantial percentage are black, Hispanic, or Indian.

Legal services attorneys are specially trained to deal with the needs of the poor and their expertise has drawn the praise of both liberal and conservative legal experts. American Bar Association president, William Reese Smith, recently stated that the "continuation of the [Legal Services] Corporation is a matter of great public interest" and cited the Corporation as "a unique and remarkable example of government and the private sector working together to solve society's problems." Smith has also joined many other legal experts who feel that the private sector cannot effectively provide the services now handled by LSC lawyers. He recently said:

> I think we have found through the efforts of the organized bar in yesteryear that a purely voluntary effort on the part of the organized bar is not likely to do the job. We need core support which is provided by these poverty professionals.

If the Legal Services Corporation is zero budgeted, or block granted, as some have proposed, there is no doubt that we will see a major drop in the legal services now available to the poor. Financially pressed States do not have the funds to support a decentralized version of the Legal Services Corporation. Nor could private attorneys afford to take on the responsibility of providing extensive legal service to those who cannot afford to pay. The Legal Services Corporation now operates with a remarkable 3 percent overhead and its lawyers are the recognized specialists in poverty law. I do not believe that the level of service it now provides could be easily replicated.

The Legal Services Corporation has been most criticized by its opponents for its occasional class action suits on behalf of poor or under-represented groups. I maintain that the LSC's class action suits have been an important part of their contribution to the principle of equal justice under the law. Class action suits seek to eradicate systematic injustices and in truth are a cost and time effective way of representing many clients who have the same claim. By filing class action suits, LSC attorneys have decreased the load on our already overburdened judicial system. I think the LSC's class action suits have proven to be an effective and legitimate means for insuring that the rights of the poor are represented in the continuous evolution of Government policy.

Mr. Speaker, I urge that all Members of this House take a good hard look at the fine service that the Legal Services Corporation provides. In its 7 short years of existence, the LSC has evolved into a modest, cost-effective program that has reached millions of low-income Americans and helped them solve some of the most important problems in their lives.

The Legal Services Corporation has proved its value many times over as the heart of an effective delivery system of legal services to the poor. If we are to stand by the all-important

principle that all persons should have equal justice under the law, the Legal Services Corporation must remain intact. I urge all Members to give it their full support.

GAO FINDS WASTE IN DEFENSE CONTRACTING

(Ms. FERRARO asked and was given permission to address the House for 1 minute and to revise and extend her remarks and include extraneous matter.)

Ms. FERRARO. Mr. Speaker, I have recently received a report from GAO that disturbed me a great deal and I believe it should be brought to the attention of my colleagues. This report, "Controls Over DOD's Management Support Service Contracts Need Strengthening" (MASAD-81-19), documents serious and pervasive problems in the Department of Defense's use of consultant and management support contracts. Similar problems were uncovered in a GAO report issued last year concerning consulting-type contract arrangements by civilian agencies.

While I support spending what is necessary for a strong national defense, I do not believe the taxpayers of this Nation are willing to permit waste and mismanagement in DOD in the name of defense while budgets are slashed for mass transit, school lunches, and food stamps for the elderly. We must never compromise our national security. But, before we eliminate funds for the needy, for the cities, for the elderly in our Federal budget, we should see how much money is going to consultants working on costly projects of questionable use.

A larger question raised by this most recent report concerning wasteful consulting contracts is the ability of the Defense Department to perform its defense mission. According to GAO, "several of the contracts have preempted DOD's prerogative in directing national defense and in management and direction of the Armed Services." This is not the first time the specter of a defense establishment dominated by private interests has been raised. President Eisenhower warned us of the growing danger from the military-industrial complex 20 years ago. I hope we are wise enough to heed the warning of a great military man who saw the problem developing from the inside and felt it was important enough to warn the American public about in his farewell speech to the Nation.

The following excerpt from the GAO digest gives an idea of the types of wasteful and dangerous problems GAO found with DOD consulting contracts as well as how pervasive these problems really are:

The Department of Defense (DOD) spend at about $2.6 billion in fiscal year 1979 on all types of contract management support services. These services range from relatively simple studies to aid in management decisions to contracts involving complex engineering support services for major weapon systems.

Proper use of these services can be a normal, legitimate, and economical way for DOD to satisfy its mission requirements. GAO reviewed 256 contracts for management support services valued at about $175.4 million. These contracts were randomly selected, and GAO believes its findings are representative of the total universe of management support contracts.

In spite of the continuing attention being focused on the use of contract consultants, serious and pervasive problems continue to exist, and will continue until DOD takes the initiative to address them. Contractors are playing a significant role in identifying needs and thus, in effect, are articulating and performing defensive management functions. The result is that DOD is weakening its ability to perform in-house work essential to fulfillment of its defense mission. Much of the work is currently being performed by former DOD employees.

This increasing reliance on contractors has raised the following additional issues:

Extensive contract awards resulting from unsolicited proposals, (102 contracts review valued at $25 million.)

Significant involvement of former DOD officials and employees in contracts. (131 contracts reviewed valued at approximately $52.6 million.)

Continuous renewal of contracts. (146 contracts reviewed valued at $149.2 million.)

Instances of questionable need for and use made of the contract services. (44 contracts reviewed valued at approximately $6.8 million.)

Overuse of sole-source awards. (211 contracts reviewed valued at approximately $156.7 million.)

Extensive contract modification. (176 contracts reviewed with modifications valued at approximately $73.8 million.)

Previously, the focus of attention has been on problems with consulting services as defined by the Office of Management and Budget (OMB). GAO found the above problems in all types of management support services reviewed; therefore, GAO believes that the management controls outlined in OMB Circular A-120 should be applied to professional and management support services, and special studies and analyses. Also, there is a need to provide visibility over these services in the budgetary displays.

An assessment of DOD's capability to perform all essential management functions in-house under existing personnel ceiling constraints is needed to achieve effective actions for the problems brought out in this report. GAO is currently reviewing the issue of personnel ceilings Government-wide and will provide further insight on this issue at a later time.

I intend to carefully scrutinize the issues raised by GAO in a joint hearing with the Senate Subcommittee on Civil Service, Post Office and General Services of the Governmental Affairs Committee later this month. I urge my colleagues to carefully question the use of contract consultants during budget consideration and the appropriations and authorization process.

GAO recommends budget visibility as the first step in controlling wasteful consulting contracts. Believe it or not, despite widespread notoriety over the past few years we still do not know how many tax dollars will be spent this year on consulting and other contracts.

The $174 million worth of contracts reviewed by GAO represented 2,077 staff years. This means that at DOD alone there are 30,788 invisible management support services employees. When you include other categories of contracts in all Federal agencies you find a hidden bureaucracy of hundreds of thousands of employees all paid for by tax dollars. We must bring this invisible expense out of the shadows. We must not continue to exclude this multibillion dollar expenditure from public scrutiny.

MORE ABOUT MOBIL

(Mr. BEDELL asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. BEDELL. Mr. Speaker, in the CONGRESSIONAL RECORD of February 25, I placed a statement that was headlined: "Bedell to Mobil: Put Up or Shut Up." In that article, I pointed out that Mr. Allan Murray, president of Mobil Oil's marketing and refining division was quoted in the Washington Post as speaking out against Government financing of energy projects while Mobil has been getting and continues to get Government funding to help prove the commercial viability of a Mobil catalyst used to convert methanol to high octane gasoline.

Recently I received a letter from Mobil in which they claim that my statement "presented a completely distorted view of Mobil's role and Mobil's intentions in the areas of synfuels technology and synfuels projects." Their letter alleges that I took out of context a quote from Mr. Murray.

As I noted in my statement, the Washington Post had reported that the Mobil executive's view of Federal financing of synthetic fuels projects is as follows:

What's going to happen is if I have a good idea, I'm going to do it myself; if I have a lousy idea, I'm going to get the government to finance it so I don't lose any money.

My correspondent at Mobil does not question the accuracy of that quote, but does suggest that reading the quote in the context of the entire article will somehow change its meaning. I doubt that.

Mr. Speaker, I request that the letter I received from Mobil, along with the complete text of the Post article, be entered in the RECORD at the conclusion of this statement, so that the taxpayers can see if the quote was taken out of context, and can decide for themselves whether or not Mobil is

indeed feeding at the public trough while at the same time criticizing the Government for providing such programs.

Adding insult to injury, in fact, is the report by the Associated Press last week that Mobil has applied once again for additional financing by the Synthetic Fuels Corporation. I am seeking further information about this latest effort by Mobil to obtain money from a program they say they do not like, and I will share that information with my colleagues as it becomes available.

Returning to the Mobil letter, there was apparently some misunderstanding as to the meaning of the word "develop" as it applies to the Mobil catalyst, ZSM-5. As their letter points out, the taxpayers spent about $3 million, compared to Mobil's outlay of $1 million, for the cost of development of a pilot plant to test the methanol to gasoline process using the catalyst.

In my statement, I also noted that the U.S. Government is spending $10 million to help build a demonstration plant in West Germany. This pilot project in West Germany is to further test and prove the value of the Mobil process using this same catalyst.

In both these projects, even though the taxpayers of our country are laying out more money than Mobil for these projects to prove the value of the Mobil catalyst in the processes, Mobil, not the Government, retains the rights to any patents developed. It is true that Mobil is required to license the process to others, and to pay a portion of the resultant royalties to the Government. But after those payments have reached double the Government's costs—$20 million, with no interest or adjustment for inflation—all further royalties will go solely to Mobil.

How can anyone possibly believe that it is proper for the Government to take taxpayers money and pay a larger share than Mobil for pilot projects to prove the commercial value of a Mobil process, and then agree that Mobil should be allowed to retain all the patents, so long as they pay a portion of the royalties to the Government, but only until such time as double the Government's investment has been paid, after which Mobil will get to keep all of the royalties?

The Mobil letter indicates that the news reports of Mobil receiving almost $400 million from the New Zealand Government to build a plant there are a fiction, and the final contracts for materials and services to be provided by Mobil have not yet been negotiated. I appreciate their pointing out these facts, and I look forward to receiving more information of the New Zealand deal, since American taxpayers have been helping to fund these pilot projects to prove the Mobil process.

The Mobil letter would seem to object to the question posed in my previous statement. Noting Mr. Murray's remarks as quoted in the following news article, my question was based upon his statement and the fact that the Federal Government has made substantial investments in projects to prove the Mobil process, as well as entering into further commitments under the synthetic fuels program. I asked:

So, what is Mr. Murray telling us about the coal-to-gasoline project involving Mobil's ZSM-5 catalyst? And what is he telling us about the government's $25 million participation in a new joint venture with Mobil, announced last December in the second round of the Synfuels Program awards? $25 million, by the way is the largest award allowed by law.

Could it be that Mobil has conned the government into investing in a turkey? Or have they simply decided to grab for all the dollars they can?

It seems to me that this is a logical question.

Apparently, Mobil does not consider it to be a turkey, for which I am glad, since the taxpayers have footed the bill for such a large part of the commercial demonstration costs.

But if it is neither a turkey or a con, how does Mobil reconcile the statement made by their Mr. Murray with the company's desire to have the Government pay such a large part of the costs of this project?

I believe the word "catalyst" in one paragraph of my previous statement should be changed so that the last three paragraphs would read:

It takes some nerve for an oil company with $3.25 billion in annual profits to put the arm on the American public for an additional $10 million to develop their process and then to mount a public relations campaign criticizing government funding of energy research projects. Perhaps this is the same kind of nerve that is required of those who would take risks on new ventures.

If this is so, I recommend that Mobil take a dose of its own medicine. If the process is as good as their ads claim, and government support is as bad as the company claims, then the Mobil Oil Corporation ought to put its own money where its mouth is.

It seems to me that this is a pretty clear case. I believe Mobil ought to either put up or shut up.

Mr. Speaker, I did not really expect Mobil to shut up. When a major oil company with $3,250,000,000 in profits for 1980 can get the taxpayers to fund part of their pilot plant projects to prove their processes; and when that same oil company can run ads all across the country, as tax deductible expenditures, telling everyone how great their process is without mentioning the fact that the taxpayers paid a large part of the cost of pilot plants to prove the process; how could anyone expect them to shut up?

But neither do I believe it is proper for an elected representative to let these things occur without letting the taxpayers know how their money is being spent.

As long as the Government continues to help finance projects for Mobil Oil Corp., whose poverty I question, and whose appreciation for this help from the taxpayer is absent from their ads—which not only fail to mention these Government payments but go so far as to criticize the Government programs—and whose executives make statements like those in the enclosed Washington Post article, I do not plan to shut up either.

MOBIL OIL CORP.,
New York, N.Y., March 20, 1981.

Hon. BERKLEY BEDELL,
U.S. House of Representatives,
Washington, D.C.

DEAR MR. BEDELL: Your remarks on Mobil's activities in the field of synthetic fuels appearing in the February 25, 1981 Congressional Record, are replete with serious errors of fact. We fear you have been misled by unreliable information sources, so much so that the statement presented a completely distorted view of Mobil's role and Mobil's intentions in the areas of synfuels technology and synfuels projects.

In the interest of setting the record straight we present the following facts:

The remarks in question repeatedly contend Mobil has received government assistance in the development of the ZSM-5 catalyst. Mobil has never received any financial assistance from the government in developing the catalyst. The catalyst was discovered, developed and is manufactured by Mobil. The government was not involved in any phase of these activities.

Mobil commercialized the catalyst for use in the refining and petro-chemicals industry in the early 1970's. When the company discovered that ZSM-5 catalyst could be used to convert methanol to gasoline it spent a substantial amount of money on the early development of this process.

In 1975, in response to government appeals for programs to improve the country's synfuels capabilities as early as possible, Mobil brought this technology to the government's attention. The government subsequently shared part of the cost of development of the methanol to gasoline process. In those funding contracts between Mobil and the government, Mobil's share was about $1 million and the government's share was about $3 million. Those figures are small when compared to the many millions of dollars the company has spent over the years in additional development of the technology.

With regard to the pilot project in West Germany, which is jointly being run by the U.S. Government, the German government, two German private companies and Mobil, the statement overlooks essential facts. It is true that the U.S. government's share of the cost of this project is $10 million. What is totally ignored is:

1. That, as part of the agreement, Mobil will license the process to others.

2. That the contract calls for Mobil to repay the U.S. government twice the $10 million (or $20 million) from future royalties we derive from licensing the process.

3. That the cost to Mobil of supplying the specific catalysts to be used at the pilot plant is placed at $7 million, and the value of this Mobil contribution is acknowledged in the contract.

As for the portion of the statement dealing with the New Zealand project:

1. It says Mobil is receiving almost $400 million from New Zealand for building the facility there. The fact is New Zealand has not paid Mobil any funds, and the $400 million fee is a fiction.

2. We have shared, on a 50-50 basis, all costs with the New Zealand goverment on all studies done to date on that project.

3. We expect to negotiate contracts for materials and services which Mobil will provide, and for which we will be paid. These arrangement are yet to be worked out.

4. We, together with the New Zealand government, expect to be equity shareholders in the construction and operation of the plant.

Further, we'd like to point out that the quote of a Mobil executive, taken from his remarks reported in the February 23, 1981, Washington Post, was totally out of context. Using it this way makes a case that Mobil is grabbing for government dollars, while the paragraph that preceded those words in the Post article makes it clear that he was saying there is a proper—although limited—role for government in the developing synfuels industry.

Finally, with regard to the government's decision to negotiate a cooperative agreement with Mobil for a coal-to-gasoline project, the suggestion that Mobil has conned the government into investing in a turkey is unwarranted. It is clearly recorded in our proposal that Mobil would be committed to spending in excess of $45 million or about double the government's maximum expenditure in just this early phase of that venture. Furthermore, Mobil will be obligated to repay the government funding when the project comes on stream. This attests to the judgment of both the government and Mobil that this is a promising synfuels venture that merits our capital commitments to make it move forward.

Mr. Bedell, now that you have the correct facts, we feel confident that you will want to set the record straight, giving appropriate visibility to these clarifications by inserting them in the Congressional Record.

Sincerely,

J. J. WISE,
Vice President, Planning,
Mobil Research and Development Corp.

[From the Washington Post, Feb. 23, 1981]

MOBIL SUPPORTS PROPOSAL TO END SYNFUEL GRANTS

(By William H. Jones)

Mobil Corp., the nation's second-largest petroleum company and a major new corporate resident of metropolitan Washington, made its first presentation to local securities analysts last week since moving its U.S. marketing and refining headquarters to Fairfax County from mid-Manhattan.

Allan Murray, president of the firm's worldwide marketing and refining operations, took the occasion to express his personal support of President Reagan's proposal to eliminate federal grants to corporations for synthetic-fuel projects.

"The man who is going to make the money ought to lose it," he told the Washington Society of Investment Analysts. Murray emphasized his view that synthetic fuels must be developed as part of an overall national strategy for future energy resources. But the role of government should be limited to initial, pure research, he added.

"I do believe, however, that it would be a mistake for this nation to get involved with any financing when you get beyond the research stage. . . What's going to happen is if I have a good idea, I'm going to do it myself; if I have a lousy idea, I'm going to get the government to finance it so I don't lose any money," Murray told the analysts.

Under the Reagan administration's reordering of the budget and proposed spending cuts, Department of Energy synfuels grants would be eliminated after fiscal 1982, and the new Synthetic Fuels Corp. is supposed to emphasize development by the private sector instead of government for a savings of $2.7 billion of fiscal 1986.

Murray said the only exception should be government guarantees against sudden price decisions by the oil-producing countries, designed to drive a synthetic fuels operation out of business.

Mobil, which also owns the depressed Montgomery Ward retail chain, currently has more than 1,000 employes in the Washington area after moving its U.S. headquarters here last year. Murray heads the domestic operation as well as the firm's overseas refining arm, from offices in New York.

"They love it here," Murray said of the new Mobil residents in metropolitan Washington.

In answer to a question, Murray said emphatically that Mobil has no intention of unloading its Montgomery Ward retail chain, which reported a loss of $133 million last year. He said Ward will move to centralized checkouts in some stores and close unprofitable units but that the retailer "is basically strong."

Ward was hurt more severely during last year's recession than some other large retailers because its ratio of credit sales is higher, and its borrowing had more short-term maturies than competitors. As interest rates hit record levels, Ward's profitability from credit operations was pinched sharply.

THE CRISIS IN POLAND

(Mr. DAUB asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. DAUB. Mr. Speaker, the world's attention focuses on the tense situation in Poland, I feel it is imperative for the House to address itself to this crisis. Recent reports indicate that Warsaw Pact forces in and around Poland are at the height of readiness, and maneuvers by these forces are already 3 weeks beyond their expected expiration date of mid-March. Some informed sources feel that perhaps as many as 25,000 troops are involved in these maneuvers.

I am therefore introducing a resolution today expressing the sense of the House that the United States could not remain indifferent to any external aggression or internal repression against the people of Poland. This resolution further states that such developments would have serious consequences for East-West relations.

I have consulted with the State Department on the language of this resolution, and they have stated that it is in line with administration policy.

Since I feel that it is necessary to demonstrate our support behind the President in actions he may take to prevent the conduct we are concerned about, a provision is included to that effect in this resolution.

I ask all of my distinguished colleagues to join me in this resolution.

DEMOCRATIC-CONTROLLED BUDGET COMMITTEE'S FIGURES

(Mr. LATTA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LATTA. Mr. Speaker, President Reagan's package for economic recovery has just received its first defeat in the House Budget Committee by a 13-to-17 vote, all Democrats with the exception of Representative GRAMM from Texas voting against the President's package.

I have reference to voting on the aggregate figures presented in the President's budget. Instead of adopting the President's figures that would put us on the road to economic recovery, the Democratic-controlled committee has adopted those figures presented by Chairman JONES.

Why the administration's figures rather than those proposed by the chairman? There are several reasons: Chairman JONES did not like OMB's numbers—he did not like CBO's, and he did not like the results of his own first two sets of assumptions.

He sent to CBO—no, he had to send them a third set before he received the numbers he presented to us. Now, I personally cannot give too much credence to his figures since they were arrived at in such a manner. I elect to go with OMB since they have a specific charter from this Congress and the American people to give us their best advice on this subject.

We cannot forget there was an election last November and the people voted overwhelmingly for Ronald Reagan. Why? Because the American people did not like the direction in which their country was heading and they wanted a change and he promised them a change. He did not say, elect me and I will give you more and more spending, necessitating higher and higher taxes, and bringing on higher and higher inflation. No, he said, I am opposed to these things and I will do what I can to change them. He promised them less Government, less Federal regulation and redtape, more dependence on the individual American and less dependence on Government, more productivity and greater competitiveness in the world marketplace.

After that election and even before his inauguration—Ronald Reagan started putting together a package, a package to accomplish what the people indicated they wanted from Government. This package has many

integral and vital parts—the tax part and the budget part being two of the most vital parts. Certainly, he cannot give this country the new direction it so desperately needs without these two parts being adopted without significant change.

Does the Democrat budget proposed by Chairman JONES give us that change? Well, take a look at the numbers and answer your own question. His aggregate spending outlays will go from the $632 billion provided for in the fiscal year 1981 resolution passed last November to $713.5 billion in fiscal year 1982. This would give us an increase in spending by the Federal Government of $133.9 billion in just 2 years. To get some idea of the magnitude of this increase, one merely needs to recall that the total, I repeat, total spending of the Federal Government never reached the $100 billion mark for 1 year until the second year of the Kennedy administration. Yet, spending under the Jones proposal would increase spending over 1980 by $133.9 billion.

Is this the turnaround the people wanted and the country so desperately needs? I think not. The Jones proposal will not, admittedly reduce inflation. According to his own projections, inflation will remain in the double-digit range—12 percent for 1982. I thought high inflation is the one thing the people wanted brought under control, the same with higher unemployment. His projections would give us higher unemployment. Why?

The answer lies in the fact that he merely nibbles at the problems and does not take a whole bite. His spending aggregate is up considerably over the President's. There is no meaningful reversal of past policies.

As a matter of fact in glancing at his budget last night, I find he is restoring $8.345 billion in reductions that the President had recommended. The bloc grant concept of returning many of these functions to the States—where they could be performed cheaper and with less redtape—has been scuttled.

Taxes would be decreased by a net of only $30.5 billion and new taxes in the amount of $7.6 billion would be added to the Government take. These reductions would not become effective until 1982 and would be passed around in a manner which obviously would be to gain votes—as has been the case in the past several tax reduction bills—rather than to cure the ills now facing our rapidly fading and once very competitive economy. The Reagan tax reductions would be for $53.9 billion ($51.3 net) and would be directed at awakening that sleeping giant and putting people back to work in the private sector, producing goods and services to add to our GNP and to increase our productivity.

This cannot be accomplished when we permit the inflationary bracket creep in our tax laws and they would continue under the Jones proposal.

Interest rates would remain in the 12 percent bracket and they must come down if inflation is to come down.

I could go on and on but in the interest of time I will not.

EXEMPTING STATES AND CITIES FROM WINDFALL PROFITS TAX

(Mr. ANDERSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. ANDERSON. Mr. Speaker, I am introducing today, with Mr. LUNGREN, Mr. MATSUI, and Mr. ROUSSELOT, a bill to allow the exemption of all revenues of all States and cities from the windfall profit tax. The legislative history makes it clear that this was the intention of Congress when the tax was first enacted.

Late last year, the Internal Revenue Service issued regulations which subject the State of California to the tax on part of their oil production revenues, because of the unique type of net profits agreement which the State has with private companies to extract oil from public lands.

I have been working with the city of Long Beach and the California State Lands Commission since last November to find a solution to this problem. The text of this bill has been worked out by attorneys from the Joint Committee on Taxation, the Treasury Department, and a Washington firm which California hired specifically for this purpose.

Mr. Speaker, the issue of imposing the windfall profit tax on the States was debated thoroughly last year. I am hopeful that we can pass this bill quickly. In the Senate, the two California Senators have introduced identical legislation.

□ 1445

GENERAL LEAVE

Mr. BLANCHARD. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and include extraneous material on House Concurrent Resolution 55, which was agreed to by the House today.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

PROPOSED SALE OF F-15 ENHANCEMENT EQUIPMENT TO SAUDI ARABIA

The SPEAKER pro tempore. Under a previous order of the House the gentleman from New York (Mr. KEMP) is recognized for 60 minutes.

GENERAL LEAVE

Mr. KEMP. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and to include therein extraneous matter on the subject of my special order today and that of Mr. BLANCHARD of Michigan.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. KEMP. Mr. Speaker, Congress will soon be asked to consider whether the United States should sell Saudi Arabia enhancement equipment for the F-15 jet fighter aircraft scheduled for delivery to Riyadh at the end of this year, and probably whether we should also sell the Saudis an early warning system—in all likelihood AWAC's—to complement their capabilities.

In conjunction with my distinguished colleague from Michigan (Mr. BLANCHARD) I have requested this special order today to allow Members to join with me to express our concerns regarding this proposed sale.

I admire and support President Reagan for his commitment to process the security of Israel and to Camp David and for his firm belief—which I share—that Israel is first and foremost a strategic asset of the United States. The Israeli people could ask for no more loyal friend than President Reagan.

At the same time, I support the President's desire to improve our relations with Saudi Arabia. The potential exists for our two countries to coordinate our efforts to provide for the defense of Saudi Arabia and the Persian Gulf. It is my sincere hope that the United States and Saudi Arabia find and exploit the significant opportunity to work together.

Thus it is not our purpose today to suggest that the United States should ignore the legitimate defense needs of Saudi Arabia. It is not our purpose to subvert the good relations between our two countries.

Rather, I want to raise some questions, and express my reservations concerning the content and timing of this sale.

In 1978, this country agreed to provide Saudi Arabia 60 F-15 aircraft. I was opposed to that sale because I believed that Saudi Arabia had done nothing to demonstrate their support for our American security interests.

Congress approved the sale but only upon the express representation that the enhancement equipment now contemplated would not be forthcoming. While Saudi Arabia now claims that it never agreed to such a restriction, nei-

ther did it protest when Harold Brown told the Congress:

The aircraft can carry three external fuel tanks, but *the plane requested by Saudi Arabia will not be equipped with special features that could give it additional range. Specifically, the planes will not have conformal fuel tanks* (fastpacks) . . . Saudi Arabia has not requested that the plane be outfitted with Multiple Ejection Racks (MER 200) which would allow the plane to carry a substantial bomb load. *The U.S. will not furnish such MERs . . . Saudi Arabia has not requested nor do we intend to sell any other systems or armaments that would increase the range or enhance the ground attack capability of the F-15s.* (Italic supplied; letter to Senate Foreign Relations committee, May 9, 1978).

And in testimony before the Senate Foreign Relations Committee, Secretary Brown stated that the United States had no intention of selling the Saudis AWACS or Hawkeye in the future. (May 9, 1978.)

Now the administration has proposed to sell conformal fuel tanks (CFT) to increase the range of the F-15. According to the Manufacturer (McDonnell Douglas) the addition of conformal fuel tanks to an F-15 flying an air superiority mission enhances its flight radius 79 percent, extends the F-15's interdiction capability 93 percent, and improves its loiter capability 65 percent when under a close air support mission. (McDonnell Douglas Aircraft Co. publication, "FASTPACK Conformal Fuel Tanks (CFT) the Eagle Enhancers" April 1980, p. 7.)

In Middle Eastern geopolitics, this means that an F-15 with a 1-ton bomb and two CFT's could take off from a coastal Saudi air base, a run into the Israeli heartland, and land at the Saudis' forward airbase of Tabuk on the return. Alternatively, an F-15 with three external tanks and no bombs could make the same run, flying protective cover for other Arab attack planes. (Richard Witkin "Israelis Ponder Strategic Effect of F-15's Sale to Saudis" New York Times May 31, 1978).

While the administration has reportedly deferred a decision on selling bomb racks—multiple ejection racks or MER 200's—such racks are fairly simple in design and easily fabricated—as are other necessities for ground attack—suggesting that the Saudis could buy the needed equipment elsewhere to give the F-15 clear ground attack capability.

The AIM-9L Sidewinder missile proposed for sale is an infrared air-to-air missile with all aspect capability, providing an improved air attack versatility over the AIM 9-P-3 missile originally included in the sale.

And finally, the administration has tentatively agreed to provide Saudi Arabia an airborne early warning aircraft system—reportedly AWACS.

AWACS has an air refueling capability, and would allow radar surveillance of areas of 200 statute miles or more. Should that AWACS be configured with the capacity to direct and control interceptor action, the added capability given the Saudi F-15's would be formidable.

I must say flat out that I am mystified why the United States would give the Saudis AWACS. There are already two AWACS in Saudi Arabia, but they are controlled and flown by U.S. personnel. It seems to me that if there are going to be any more AWACS in the Middle East, they too should be controlled by U.S. personnel.

It is not my purpose today to turn my back on Saudi Arabia. On the contrary I hope that in the future the Saudis will join the United States in helping resolve those differences and disputes in the Middle East which stand in the way of peace and prosperity.

I supported the Camp David accords and that basis and hoped fervently that Saudi Arabia and Jordan would have joined the process, despite misgivings. Unfortunately not only did they reject the accords, but they attacked Mr. Sadat, they attacked Camp David, and joined in a declaration of jihad (holy war) against Israel.

The crucial question remains: How does the sale of this equipment to Saudi Arabia fit into overall U.S. strategic planning in the Persian Gulf? I am concerned, Mr. Speaker, that the timing and content of the proposed sale may overly reflect the legacy of the previous administration, rather than an integral part of a well-considered Reagan policy toward the Persian Gulf.

On Friday of last week, Secretary of State Haig departed for a tour of the Middle East. One of the purposes of his mission is to discuss with the government leaders of that region the strategic concerns that our nations share, and to lay the groundwork for achieving a consensus on how those concerns are to be defined and defended.

I believe that two pervasive considerations must govern the development of the Reagan administration's strategy regarding the Middle East and the Persian Gulf.

First, Israel's value as a strategic and reliable democratic asset to the United States and the free world, is beyond dispute. For this reason, our commitment to Israel's security is resolute and unwavering and let me add I think President Reagan and his administration will be the best friends Israel has ever had.

Second, never before has the threat posed by the Soviet Union to the security of the region been so starkly apparent as now, when Soviet troops have occupied nearby Afghanistan, Soviet arms supplies enable Iraqi troops to wage war on Iran, Soviet bases have been established in Syria and the Horn of Africa, and Cuban and East German troops provide support for the Communist government of South Yemen.

One would think that the Government of Saudi Arabia would be particularly apprehensive of these developments. One would think that the Saudis would want to coordinate efforts to provide a regional defense against this growing threat. But to date, the Saudis have given no indication that they appreciate how crucial it is for the security of their nation to work with the United States to defend our mutual security interests.

We thought back in 1978 that agreeing to sell the Saudis the F-15's—the most sophisticated American weaponry every sold an Arab State—would result in a Saudi commitment to the security interests we hold in common. Instead we have seen the Saudis time and again act as antagonists, opposing rather than supporting our interests.

The record of the recent past discloses repeated instances where Saudi Arabia has taken positions adverse to the United States. We cannot condone bankrolling the PLO's terrorist activities, such as Saudi Arabia has consistently done. We cannot allow ourselves to remain vulnerable to an interruption in oil supply, despite Saudi Arabia's opposition to our intention to build a strategic petroleum reserve and Saudi threats to reduce oil production as we proceed with those plans. We cannot be thwarted in our need to project American power into the Persian Gulf to protect the vital interests of the West including as necessary the establishment of American bases in the area, which Saudi Arabia has opposed. We cannot condone resolutions condemning our attempt to rescue our countrymen held hostage in Iran, such as that signed by Saudi Arabia in Islamabad in May of last year. And the cause of peace and stability is surely not served by Saudi Arabia's irrational opposition to the Camp David process.

Thus it is ironic—that the Saudis profess to regard the United States willingness to sell them F-15 enhancement equipment a test of the relationship between our two countries. What is being tested here, our commitment to Saudi Arabia's legitimate defense needs, or our willingness to take the path of least resistance? I put it to you that the United States may fail that test if we do not insist upon reciprocity.

Political understanding must precede a military buildup. Supplying sophisticated weaponry to the Saudis will not induce them to see that we have common security interests. On the contrary, we may undermine our own credibility if we appear to be rewarding the Saudis for working against us.

And let us put to rest the old refrain that if we do not sell them the desired equipment, somebody else will.

Certainly it is possible that if we deny the conformal fuel tanks and advanced missiles, the Saudis may cancel their order of F-15's and purchase substitute capabilities elsewhere.

Which leaves us to wonder—so what?

The United States is not in the business of arms merchandising.

The possibility that other markets may exist is not a reason for granting a sale. If it were, we would be selling armaments indiscriminately to the highest bidder. No. If we elect to sell armaments to Saudi Arabia, we should do so because we have concluded that it is in America's interest to bolster Saudi defenses in this manner—and not because we are afraid of losing the sale to someone else.

A sale of sophisticated weaponry is fundamentally a political act, signifying that we have determined that the action is in furtherance of our national security interests. That is the only criterion upon which this proposed sale should be evaluated.

Mr. Speaker, I believe that the burden of proof is on Saudi Arabia to demonstrate why the United States should want to bolster Saudi military capability through the sale of F-15 enhancement equipment. Until Saudi Arabia is prepared to give a clear demonstration of their commitment to peace and to mutual security interests, until we are satisfied that the armaments we supply will be dedicated to regional defense and not an anti-Israeli offensive, we should be in no hurry to consummate this sale.

Mr. Speaker, I would like to yield to my friend from Michigan (Mr. BROOMFIELD), for whom I have such a high regard, who is such a staunch friend of Israel and the ranking Republican on the Foreign Affairs Committee. He would like to express his thoughts at this moment. After that I would like to switch to my other friend from Michigan on the other side of the aisle (Mr. BLANCHARD).

Mr. BROOMFIELD. Mr. Speaker, I thank the gentleman from New York for yielding. I would like to indicate my strong support for the gentleman's remarks and also the remarks of the gentleman from Michigan (Mr. BLANCHARD), and thank them for bringing this matter to the floor, which is extremely important to all of us and to our country as it affects the Middle East.

One of the areas that disturbs me goes back, of course, to the previous administration where this equipment for the F-15's was granted, or at least it was indicated by the Carter administration following the November election. As far as the AWACS, that was another decision made in December.

Of course, the permission has to be granted by Congress and those resolutions have not been forthcoming. I hope that in view of the sensitivity in the Middle East right now, and what is going on in Afghanistan and Poland, that the administration would rethink this situation of providing AWACS to Saudi Arabia.

This really disturbed me when I heard this was under consideration. In fact, I do not believe the United States should sell AWACS to any country. I think the importance to the U.S. national security interests are so overwhelming that we should retain control for the U.S. Government. That is why I want to join with the gentleman from New York (Mr. KEMP) in saying it would be my hope, because we are interested in the security and the stability of that area, that we remain in the Middle East indefinitely with the AWACS that we have there without selling them to either Saudi Arabia or anyone else.

So I am not going to take much more of my colleagues time. I do have an extended speech that I will put in the RECORD.

Again I want to congratulate my colleague from New York (Mr. KEMP) and my colleague from Michigan (Mr. BLANCHARD) for bringing this important message and matter before the Congress. I would hope that this sends a signal to the administration that there are many of us sincerely concerned about this proposed sale.

Mr. Speaker, reports persist that the Reagan administration plans to implement the Carter administration's commitment to sell the airborne warning and control system—AWACS—to Saudi Arabia. These reports concern me since this would be a foreign policy decision I would consider unwise and one I would oppose.

It was only on March 6, 1981, that the administration announced its intention to sell the Saudi conformal fuel tanks and AIM-9L air-to-air missiles for their F-15 aircraft. In the same announcement, the administration said it had agreed to sell to Saudi Arabia aerial surveillance aircraft, subject to further determination of their specific requirements. It is difficult to believe that a careful determination of Saudi Arabia's requirements has now been made in the short interval of 1 month. Such a decision should only be the product of thorough study and extensive consultation with Congress.

Neither has occurred; if it had, I am sure the administration would not propose a sale of AWACS to Saudi Arabia. The transfer of this military equipment would destabilize the Middle East arms balance and threaten the security of Israel. It is a transfer which I feel confident that the majority of Members in both Houses would block.

The AWACS, or the E-3A aircraft, combines jet aircraft mobility with advanced radar techniques to provide low level and long range surveillance, threat detection, and assessment in all kinds of weather and over all kinds of terrain. Moreover, it is a command and control aircraft that is capable of coordinating complex, diverse, and simultaneous air operations, including support of tactical air missions to enhance ground capabilities. The E-3A can remain on extended alert, launch on warning, and keep track of the developing air situation, all of which increases its survivability.

In brief, AWACS in Saudi airspace can take a deep look into unfriendly territory, detect and assess the significance of military movements, and direct an attack against them. Although territory unfriendly to Saudi Arabia could mean Iran or Iraq, it could also mean Israel, against whom King Khalid declared a jihad or holy war last January. An Israeli tank could not move 20 feet without the Saudis knowing should they obtain the E-3A. This detection capability in Arab hands would deprive the Israelis of any opportunity to preempt strikes against it by hostile neighbors. To rob a nation of Israel's geographic size and population of the possibility of preemption would doom it to devastation. The greatest Israeli skill and courage could not overcome the numbers of advanced Syrian, Iraqi, and other Arab aircraft were they directed by Saudi AWACS.

Israel's qualitative military edge, which Secretary Haig has stated it is in U.S. interests to support, would vanish once the AWACS were in Saudi inventory. And no number of additional F-15 or F-16 aircraft in the Israeli Air Force—even on concessional terms—could restore this critical edge.

U.S. interests would, in fact, best be served by an indefinite continuation of current American arrangements regarding the AWACS with Saudi Arabia. The U.S. Air Force has deployed four E-3A aircraft to the desert kingdom since shortly after the outbreak of the Iran-Iraq war. The presence of U.S. AWACS has deterred attacks against Saudi Arabia and it has also provided us with an important surveillance and threat detection capability in the region. Should the United States sell the AWACS to the Saudis, it is apparently not at all certain that the Saudis would even share the data output with us. Moreover, there are no indications that the Saudis intend to be at all forthcoming regarding United States access to Saudi military facilities or prepositioning which are important to assuring U.S. interests in the Persian Gulf. Again, the Saudis appear intent on defining their security in ways that exclude U.S. security concerns.

Therefore, I urge the administration to reconsider, if it has indeed already made a decision, the sale of AWACS to Saudi Arabia. This sale runs counter to U.S. interests and I oppose it.

Rather than transferring the AWACS to Saudi Arabia, which would only fuel the Mideast conflict, the United States should devote itself to promoting a just and fair peace in the region.

Mr. KEMP. I thank my colleague for his comments and for his leadership over these last 25 years in foreign affairs and foreign policy.

I am now delighted to yield such time as he may need at this point to my colleague from Michigan (Mr. BLANCHARD), who has a similar interest in this subject.

Mr. BLANCHARD. Mr. Speaker, I want to commend the gentleman from New York (Mr. KEMP) for his persistence on this issue and his courage at a difficult time in trying to portray this issue of the sale of auxiliary equipment and AWACS to the Saudi Arabians. I rise to express my concern on this item, and most particularly, before I begin, to express the reasons why I think this is an unwise action.

I would like to join in extending the offer of support for a strong bipartisan foreign policy to the new administration and to its leaders here on the other side of the aisle. As my colleagues know, this issue relating to the F-15's and AWACS is not a new issue really. In fact, it existed under the previous administration, and a number of us were put in the position of having to echo the same kinds of criticism of the previous President.

On March 6 the Reagan administration confirmed plans to sell Saudi Arabia conformal fuel tanks and advanced Sidewinder air-to-air missiles for the 60 F-15 jet fighters that the Saudis ordered from the United States in 1978. In addition, reports indicate that the administration intends to sell the Saudis advanced surveillance AWACS aircraft in the near future.

These proposed sales are foolish and ill timed for a number of reasons.

The sale of this equipment would constitute a serious new escalation of arms into this very delicate and sensitive region of the world.

The sale represents yet another attempt to court friendship with other nations through the sale of highly sophisticated military weapons.

Because of internal security problems in Saudi Arabia, the presence of such sophisticated weapons in that country could jeopardize U.S. strategic interests and those of our established allies, if those weapons ever fell into the wrong hands.

Saudi Arabia alone simply cannot insure its own security, regardless of whether they possess the F-15's and this additional equipment.

The sale would ultimately place a much greater security burden on our oldest and staunchest ally in the region, the State of Israel.

Making the sale now would represent a reversal of the past U.S. commitment not to sell this equipment and would send precisely the wrong signal to the rest of the world about the credibility of past U.S. commitments.

Let me take a moment to touch on a few of these points in greater depth.

The history of the U.S. commitment not to sell the Saudis F-15 enhancement equipment dates back to the Carter administration. Back in 1978, when former President Carter proposed the sale of 60 F-15 jet fighters to Saudi Arabia, his Secretary of Defense said that the Saudis would not be equipped with "any system or armaments that could increase the range or enhance the ground attack capability of the F-15's." Last fall as a Presidential candidate Ronald Reagan criticized President Carter for proposing the sale of additional F-15 equipment to the Saudis, citing the need to uphold past U.S. commitments. However, 6 months later, and only 3 months into his term in office, President Reagan has reversed himself in proposing the sale of auxiliary fuel tanks and advanced Sidewinder missiles for the Saudi F-15's. The administration may even go a step further and propose that we provide the Saudis with advanced AWACS radar planes which, when used in conjunction with enhanced F-15's, will provide dramatically increased offensive capabilities to the Saudis.

The fact is, if the administration hopes to demonstrate its willingness to stand by U.S. commitments, it should pay closer attention to the historical record. In 1978, when Congress grudgingly went along with the Carter administration's request to sell the F-15's to the Saudis, it did so with the expectation that such a sale might lead the Saudis to support the Camp David peace process. I might add that I opposed the sale of the F-15's at that time because I was concerned that we were not getting any assurances from the Saudis of their willingness to play a role in the peace process. Unfortunately, in the past 2 years, we have received very little in return for the F-15's. The Saudis have not indicated any willingness to play a constructive role in helping to support the Camp David accords. In fact, earlier Saudi Arabia led the Islamic nation in calling for a holy war against Israel, and they continue to provide massive amounts of funding for the Palestine Liberation Organization.

Certainly we should be doing everything we can to improve our relations with Saudi Arabia, and encourage them to become more actively involved in the Mideast peace process. However, in order to develop a healthy and lasting relationship with the Saudis, we must make it clear that such a relationship is a two-way street. The Reagan administration has shown some indication that they favor greater linkage in our foreign policy decisions. However, I am concerned that this latest proposal to sell equipment to Saudi Arabia appears to be a departure from this policy.

Obviously the sale of such sophisticated equipment to the Saudis will also pose a new and serious threat to our closest ally in the Middle East, the State of Israel. The mere presence of such potentially offensive equipment would force the Israelis to counter with new contingency plans that will require greater investments in their military budget at a time when military spending already occupies too large a percentage of Israel's gross national product. What a terrible shame it would be if in the name of a stronger U.S. presence abroad we undermined our most reliable and effective ally in the Middle East, the State of Israel. I cannot help but wonder if this sale would even have been proposed if Israel had oil wells.

Peace in the Middle East took a giant step forward when Israel and Egypt agreed to the Camp David accord. We must do everything we can to build upon the Camp David agreements by encouraging other moderate Arab States to get involved in the peace process. We must make it clear to states like Saudi Arabia, and perhaps Jordan, that we are willing to build meaningful alliances with them in return for their efforts toward peace in the region. However, neither peace in the Middle East, nor the long-term interest of the United States are served by providing Saudi Arabia with this highly sophisticated F-15 enhancement equipment. I hope that President Reagan and his administration will reconsider this proposal, and I urge my colleagues to step forward and join me in expressing opposition to this sale.

Mr. KEMP. If the gentleman would just let me take back my time for a moment, I was pleased to see that Secretary of State Haig suggested in the New York Times the other day that part of the reason that he was going to the Middle East would be to try to work out with Israel an arrangement where the $600 million of FMS (foreign military sales) would be turned from a sale into an outright grant, that he was suggesting that that might be a proposal. I do not think that we would do anything to discourage that. I certainly would not look upon that as a concessionary loan, but as something that would be very much needed by Israel at this time, along with more important electronic equipment to help patrol their borders and

air space. Nonetheless, the Government has raised a real point that this might tip the balance, as I pointed out in my remarks a little bit earlier.

Mr. BLANCHARD. I think that is evidence of the fact this does kind of up the ante in the Middle East, the fact we feel the need to offer Israel additional moneys for credits for equipment.

Mr. KEMP. That would be helpful though, would the gentleman not agree?

Mr. BLANCHARD. Absolutely helpful. But I wonder whether we would be tendering it but for the fact that we are going to expand the range of the F-15's, give them the additional missiles and go forward with the idea of AWACS. I realize that some of the arguments relate to the Soviet intrusion in the area, but I am afraid in reaction to a very real threat, the Soviet Union, we may be creating problems among not only our ally, Israel, but a potential ally, Saudi Arabia. I say potential because I think there are a number of things that are going to have to happen before you and I can really say that the Saudis are, indeed, our allies.

Mr. KEMP. One thing that I would say the Saudi Arabians would have to do is to stop arming the PLO to the extent that they are.

I saw the other night on ABC's show "20-20," Geraldo Rivera did an hour long show on Soviet support, financing and exporting of terrorism in the Middle East and throughout the world by training the PLO and providing money. It was a remarkable show and I think it is one of the best TV documentaries I have see in a long time in identifying the Soviet's role in encouraging terrorism throughout the world. But it should also be made public that not only is the Soviet Union arming and supporting and financing the PLO, but so is Saudi Arabia, $150 million a year.

Mr. BLANCHARD. I was pleased to see the gentleman call for renunciation of their earlier declaration. As the gentleman meant to say, and certainly implied, this idea of waging a holy war against Israel, which is what the Saudi Government has subscribed to, is not the kind of signal we want from someone that we hope will join the peace process relating to Camp David and Middle East stability.

I do have a few more remarks that I would like to present if the gentleman will allow me to proceed.

Mr. KEMP. I would be glad to.

Mr. BLANCHARD. We have a number of colleagues who want to speak, and I would simply like to highlight a few items for the record here, because this is a very serious issue, one that has continued for several years. Again, this is not a partisan issue, but it is one which all of us are going to have to monitor very carefully.

The fact is that in 1978 when the Congress went grudgingly along with the Carter administration's request to sell F-15's, it did so with the expectation that such a sale might lead to the Saudis supporting the Camp David accords, and the Saudis, by the way, had not indicated any willingness to play a constructive role in the Camp David process. They have talked about leading the Islamic nations into a holy war, and they continue, as the gentleman from New York (Mr. KEMP) pointed out, to provide massive funds to the Palestine Liberation Organization.

Obviously we should improve our relations with the Saudis, but it has to be a two-way street. I like the idea of linkage in foreign policy, and the Reagan administration has talked about this. Here is an example of where it ought to be employed.

Obviously the sale of this equipment poses a new threat to the State of Israel. The mere existence of this equipment requires Israel to counter with a whole new set of contingency plans which are not only straining a very important ally, but upping the ante in terms of dollars and cents in the defense spending in the Middle East.

I think it would be a terrible shame if in the name of a stronger U.S. presence abroad if we undermine in any way our most reliable and effective ally in the Middle East. I cannot help but wonder if this would be occurring but for the existence of all of that oil in Saudi Arabia, and it concerns me very deeply.

I hope that we, along with the administration, can do everything possible to encourage going forward with the Camp David process and understand that our plan must contain the long-range interests for our country, for the Middle East, and for our dear friend, Israel. I sincerely hope, sincerely hope that, and I will do everything I can to cooperate in hoping that the administration will reconsider, reconsider its proposal before it is too late.

Mr. KEMP. I thank my friend from Michigan for his comments. I might add that they were right on target. They come from a sincere conviction as to this issue.

□ 1515

He is not someone who has only recently made up his mind, and I look forward to working with him on this bipartisan foreign policy that this Nation should have and this Congress should reflect.

I might add for the record, as someone who is familiar with the Reagan foreign policy, President Reagan has given strong support to Camp David. The one area of the recent campaign in which President Reagan gave support to Mr. Carter was on the basis of his high marks for helping bring together Egypt and Israel and starting the process through Camp David toward peace in the Middle East.

I am glad that this administration has been so forthright and candid in supporting a previous administration's attempt to begin a step-by-step process whereby the parties directly involved in the dispute and in that area of the world can work out an arrangement. Frankly, Camp David has been quite successful, particularly on the Sinai. We do not know how it is going to play itself out, but I think this Congress would be well advised to go along with the administration, or vice versa, in supporting Camp David. I would like to see that process ongoing, as I think my friend from Michigan would.

Let yield to my friend from New York (Mr. GILMAN), whose friendship I am so grateful for.

Mr. GILMAN. I thank the gentleman for yielding.

Mr. Speaker, I want to take this opportunity to thank my colleagues, the gentleman from New York (Mr. KEMP) and the gentleman from Michigan (Mr. BLANCHARD), for their leadership on this issue and for arranging this special order this afternoon to discuss the proposed sale of F-15 enchancement equipment to Saudi Arabia.

As a member of the Committee on Foreign Affairs, I have followed closely the events taking place in the Middle East. In 1978, I participated in the committee hearing process and heard with my own ears the justifications and assurances that we provided to the Congress in order to gain approval for the sale of sophisticated F-15 aircraft to Saudi Arabia. At that time I expressed my belief that there was little justification to provide such an advanced fighter-bomber. Only after strict assurances from the administration that no advance enhancement equipment would be provided did the Congress reluctantly agree to the sale. Now today, we are being asked to forget those assurances and provide that same controversial equipment.
